about the extrasensory work of Grigori Petrovich Grabovoi, born on
November 14, 1963 in the village of Kirovsky, Kirovsky district,
Chimkent region, Kazakh SSR (having a birth certificate series II - OG
No. 463794)

The expert commission of the international oncological organization for alternative healing methods "RUSMIL" certifies the following:

1. On June 23, 1994, an experiment was conducted on the ability of Grigori Petrovich Grabovoi to carry out extrasensory diagnostics.

2. For the purity of the experiment, patients from the current queue, who came for the first time to the international oncological organization for healing with alternative methods "RUSMIL", were randomly sent to Grabovoi G.P. The composition of the patients is as follows:

Mikhailova T.G.

Chernova N.F.

Chernova G.I.

Zhebit T.A.

Filippov F.I.

Belova V.V.

Sukhodonova N.S.

Shishkina A.P.

All patients live in Moscow and the Moscow region. Neither the staff of the organization "RUSMIL" nor Grabovoi G.P. were familiar with the patients.

(Continued on the other side of the sheet)

Unnumbered (reverse) side of sheet No. 482

3. Grabovoi G.P. extrasensorily diagnosed people he saw for the first time within a few seconds, immediately filling out a diagnostic card indicating the diseases. During the extrasensory diagnosis of eight people, conducted by Grabovoi G.P. he did not touch the patients and did not talk to them. Thus, Grabovoi G.P. extrasensorily diagnosed eight people.

4. Comparison of extrasensory diagnostics of eight people, conducted by Grabovoi G.P., both in diagnoses and in quantity coincided with the diagnoses available in the medical records of patients for all eight people. Each of the eight patients left a handwritten certificate that the extrasensory diagnostics conducted by Grabovoi G.P. coincided with the diagnoses that had medical confirmation.

5. The conclusion is as follows : Grabovoi G.P. extrasensorically establishes all available medical diagnoses in 100% of cases. All data from the above pure experiment, which proved that Grabovoi G.P. almost instantly extrasensorically determines all human diseases determined by objective means of instrumental diagnostics or established on the basis of official medical institutions, and the results of his healing activity were taken into account as practice in accordance with the diploma No. 18 provided to Grabovoi G.P. , issued by the decision of the examination committee with the assignment of the qualification of a folk healer.

After the face-to-face extrasensory work, Grabovoi G.P. determined
the change of tissue in the right and left back part of the skull, the
change of tissue of the ovary, the unremoved part of the uterus.
Indeed, on the back right and left of the skull, formations of the type
of subcutaneous tumors periodically arise, and in addition to the
genitals described by Grabovoi G.P., the rest were removed and,
indeed, on the remaining genitals there are changes diagnosed by
Grabovoi G.P.

Ermoolenko G.G. , born in 196 , resides at the address: Tashkent, Sergeli, Dustlik estate , house 26 , apartment 9 (phone number not established). He came with complaints of poor general health and severe pain in the lumbar region of the spine, which manifested itself when walking, bending over, getting out of bed, as well as shooting pains in the legs, muscle numbness on 20.07.92.

2. Information on the progress of the study and correction of EE Ermoolenko G.G.

2.1. As a result of decoding information from the deformation zones of the EE:

- major diseases in previous periods of life have been identified , which have medical confirmation (reflected in the work questionnaire);

- the timing of the onset of major diseases in previous periods has actual confirmation ;

- a diagnosis of the current state of the EE was carried out and the first course of treatment was determined in the form of sessions at a distance without physical contact with the operator.

2.2. From 20.07.92 to 10.08.92, the deformation zones of the electric power plant were restored. As a result of the first course of treatment , the patient's well-being improved, the painful symptoms of the disease disappeared (radiculitis) , and his ability to work returned .

2.3. Correction of EE Ermoolenko G.G. was carried out without combining with medical drugs and physical procedures.

2.4. For full restoration and strengthening of the EE, the following correction courses will be prescribed after the break.

The accuracy of the information provided in this certificate is confirmed by the patient's personal signature .

energy screen of Sitnikova T.D. and her daughter Svetlana,
conducted by operator Grabovoi G.P.

1. As a result of decoding the deformation zones of the en. screen of Sitnikova T.D., in her presence , diseases with medical confirmation were identified , as well as the location of the dog bite.

2. Svetlana's name was used to identify a disease that Sitnikova did not know about and which was confirmed the next day in the hospital where Svetlana was .

3. Recommendations were given to discontinue penicillin therapy administered to Svetlana in the hospital, which agreed with the decisions of the attending physicians, and the drug was discontinued until the end of the full course.

4. Restoration of deformed sections of the energy screen named Svetlana was carried out, without a photograph .

4.1 After the first session, the pain in the joints, which had persisted for 2 weeks before the session, completely disappeared, and it became easier to breathe. During the session, a clear touch of the hand to the forehead and stroking of the hair was observed at the physical level.

4.2 After the second session the temperature returned to normal. During the session the heat was unbearable, biting into the body. I barely lasted 55 minutes.

4.2 Discharged from hospital early.

I certify that the psychic Grabovoi G.P., holding a passport series III-OG No. 586058, issued on 01.02.1980, healed me from purulent sores on my body, which appeared as a result of an allergic reaction to insulin.

On 11/11/94, I went to see a surgeon at Polyclinic No. 1 in the Mirabad District because spots had appeared on my body (back, arms, legs, in the nasal cavity) - dry abscesses, around which there were purulent inflammations the size of a 2-kopeck coin. The surgeon and dermatologist recommended applying calendula tincture poultices to these inflammations or taking baths with calendula infusion.

11/12/94. After calendula lotions, all the abscesses became inflamed and the temperature rose to 39.2 °. After taking aspirin, the temperature dropped to 38 ° and rose again to 39 in the evening °.

This condition continued on November 13 and 14 of this year.

11/15/94 contacted Grabovoi G.P. by phone regarding the above-mentioned illness. During November 16 of this year, Grabovoi diagnosed me and on November 17 prescribed 30 treatment sessions. As a result of contactless extrasensory work with me and lubrication of the sores with charged Vaseline, which was charged at a distance by Grabovoi.

On November 21, my condition improved dramatically, the pains in my entire body decreased, I began to sleep, and all the sores faded and all the growths became soft. Most of these sores fell off by themselves, leaving slightly pink spots. On the 20th session, my back became clear, and the sores fell off my arms.

During the sessions, I did not apply any lotions, did not use brilliant green, and did not take any medications.

As a result of extrasensory diagnostics by Grabovoi G.P., there was a coincidence with the diagnoses of medical institutions. Extrasensory absentee treatment of his grandson with the diagnosis of "episynndrome" Grabovoi began on July 17, 1994. Medical diagnostics of episynndrome, which has been carried out on the same device over the past 5 years at the Sechenov Moscow Medical Academy, Rossolimo St., 11, confirmed the presence of episynndrome in Manuilov D.A., and before contacting Grabovoi G.P., the instrumental diagnostics from June 2, 1994 showed a pronounced negative trend compared to the records from 1993. After contacting Grabovoi G.P. and the course of treatment by him in absentia extrasensory from 17.08.1994, instrumental diagnostics from 19.09.1994 showed a decrease in epileptic EA, and instrumental diagnostics from 22.12.1994 showed clear positive dynamics as a result of extrasensory absentee treatment, carried out by Grabovoi G.P.

I am attaching to this certificate the analyses of the instrumental diagnostics.

I contacted Grabovoi G.P., who has a passport series III-OG No. 586058, issued on 01.02.1980, certificates series A No. 018465 and series A No. 018466 for engaging in extrasensory activities for the purpose of treating my husband Isamukhamedov Makhkam Mukhamedovich, born in 1922 by initials.

My husband has had Parkinson's disease for a long time, his legs were swollen, his hands and head were shaking, there was stiffness of movement. Before contacting Grabovoi G.P., my husband did not go outside (we live on the 4th floor), he was constantly in a sitting position. The treatment was carried out without my husband's knowledge, in absentia, by initials. Literally a few days later we noticed that he began to go downstairs, take out the trash, and then almost until September we both went out for walks in the evenings. The shaking significantly decreased, dizziness was observed less often. On November 9, 1994, I called Grabovoi G.P.'s assistant and reported that my husband had turned yellow and, judging by the urine, the doctors diagnosed jaundice. Lena told me that she would pass on our conversation to Grabovoi G.P. and asked me to call in two hours. After two hours, I called again to find out the opinion of Grabovoi G.P., and Lena told me that according to Grabovoi G.P., his blood test would be good and my husband did not have infectious jaundice. And indeed, on the second day, when my husband's blood was taken, Grabovoi G.P.'s words were confirmed. The tests were repeated for several days and infectious jaundice was not confirmed. On November 11, 1994, an ultrasound scan at the Tashkent Infectious Diseases Hospital revealed a gallstone in my husband's gallbladder that blocked the duct. This was what was causing the jaundice. I immediately called Grabovoi G.P.'s assistant. Lena replied that Grabovoi G.P. would continue treatment. He was hospitalized in the 1st government hospital in the surgical department. But even before the hospitalization, my husband had jaundice

began to subside, and in the hospital they said that the duct had opened a little. I believe that this is the result of Grabovoi's treatment. In the hospital, except for vitamins, my husband was not given anything, but the yellowness began to disappear quickly. In mid-December, my husband was discharged from the hospital in a satisfactory condition. Now he knows that he is being treated by the psychic Grabovoi G.P. and treats this with faith, but before that he did not accept such treatment.

At the Tashkent Institute of Obstetrics and Gynecology, located in Mirzoulugbek (former Kuibyshev) district, where this diagnosis was not made by ultrasound on June 29, 1994, I was prescribed drug treatment (antibiotics in injections every 6 hours and hormonal tablets - "Regividon"). On the same day, I contacted Grabovoi G.P., who undertook to treat, but on the condition that I completely refuse medication. Treatment began on June 30, 1994 and continued until August 30, 1994. In September, treatment was interrupted and resumed again from November 17, 1994 to December 11, 1994. During the treatment, I did not take antibiotics or hormonal drugs. On 12/05/1994 I repeated the ultrasound at the outpatient clinic of the Tashkent Institute of Obstetrics and Gynecology. It was performed on the same device that was used for the ultrasound on 06/29/1994. The ultrasound result showed positive dynamics. The cyst of the right ovary had completely resolved (I am attaching the ultrasound report). The doctor who initially prescribed drug treatment, candidate of medical sciences Eduard Vladimirovich Petrosyants, congratulated me. I told him that I had not followed his recommendations to undergo drug treatment and admitted that I had taken extrasensory remote treatment conducted by Grabovoi G.P.

After analyzing the results of the ultrasound on 06/29/1994 and on 12/05/1994, candidate of medical sciences

During the period of extrasensory treatment conducted by Grabovoi
G.P., at the first stage from 11.02.1995 to 11.03.1995, I began to get
less tired after long walks. Before the treatment, I got out of bed in

freely and walk straight. The Achilles tendon on my left leg has
stretched by 0.5 cm, on my right leg - by 1 cm.

In connection with the fact that I contacted Grigory Petrovich
Grabovoi, born on November 14, 1963 in the village of Kirovsky,
Kirovsky district, Chimkent region, Kazakh SSR (and having a birth
certificate series II - OG No. 463794, passport series III-OG No.
586058, issued on February 1, 1980), on September 8, 1995 in the

Tsekavshiri building in Tbilisi on Svoboda Street due to a tumor of the right mammary gland.

I declare that Grigori Petrovich Grabovoi really does heal using a contactless extrasensory method in the following way:

Since 1975, she suffered from fibrocystic mastopathy of both mammary glands without tumors.

After my first meeting with Grigory Petrovich, I noticed that the condition of the second finger of my left hand, which I could not bend, had improved and it had bent completely. The mammary gland of my right breast had also decreased in size from the size of a pea to the size of a grain.

The tumor was diagnosed in 1993 in Tbilisi and was not treatable until meeting with Grabovoi G.P. Today it is constantly decreasing from the size of a grain and is not palpable, which is proven by the fact of healing in two days as a result of taking sessions conducted by Grabovoi G.P. in a contactless extrasensory way.

Please certify my application on the basis of documents proving my identity and on the basis of the above evidence.

I declare that Grigori Petrovich Grabovoi actually held 3 twenty-minute sessions with me and 2 remote one-hour sessions with my daughter.

As a result, on November 18 and 19, she began to assemble a castle from a LEGO constructor on her own. In addition, she began to show an active interest in telling time by the clock, although we had previously taught her for 5-6 years, but she had not shown any interest in the clock.

During October-November 1995, my daughter had a purulent inflammation of the big toe of her right foot. The purulent inflammation was treated with medication, but the wound did not heal for a long time.

After the above sessions, on November 19, a scab formed on the wound and the healing process began.

In addition, I, Ovtis Oleg Petrovich, after the first session on November 17, 1995, immediately felt an aversion to alcohol.

PROTOCOL

Medical examination of the patient's condition during the performance

Grigory Petrovich Grabovoi, non-contact extrasensory work.

This protocol describes the results of medical examinations and medical diagnostics.

Patient's last name: Savinkov Andrey Olegovich

Place of birth: Moscow

Description of the patient's condition before contacting Grabovoi G.P.: epilepsy syndrome, hydrocephalus, migraine. Negative changes in brain tissue.

Date: 20.12.1995

Time: 10:10

Description of the patient's condition: As a result of examination at the pediatric clinic of the University of Lubeck, Germany, completed on 11/17/95.

Telefax: (0451) 500-60-64

It was found that the tissue of my brain is unchanged.

Conclusion: as a result of contactless work by Grabovoi G.P., the tissue of my brain returned to normal.

CONCLUSION

based on the results of the healing practice of Grabovoi G.P.

Having familiarized ourselves with the results of extrasensory therapy conducted by Grabovoi G.P., confirmed by patient testimonies and medical examination data, we can conclude:

The presented materials on diagnostics and subsequent therapy using the method of Grabovoi G.P. are of great interest, since no medications are used.

I have reviewed the testimonies of diagnostics and treatment results using the method of Grabovoi G.P. of 23 patients. All patients were diagnosed as a result of examinations in medical institutions . There are no discrepancies between them and the diagnoses of Grabovoi G.P. Some patients were offered either surgical interventions or drug therapy before contacting Grabovoi G.P. After patients contacted Grabovoi G.P., they underwent extrasensory therapy lasting from one to three months, regardless of the distance between the patients and Grabovoi G.P. All patients showed positive results. confirmed by clinical examinations by specialists from medical institutions .

Considering the socio-economic instability of many citizens who have some serious illness, it is possible to use the method of extrasensory therapy of Grabovoi G.P. more widely among the population.

Wishes regarding design:

include the following columns: 1) diagnosis of medical institutions before contacting Grabovoi G.P.; 2) diagnosis of Grabovoi G.P.; 3) results of clinical examinations in medical institutions after extrasensory therapy by Grabovoi G.P.

I consider it necessary to conclude an agreement with Grabovoi G.P. for preventive extrasensory therapy of the flight crew of the National Air Company "Uzbekistan Airways", who will be written off from flight operations for medical reasons in 1-2 years. A list of pilots, about 80 people, with medical reports will be attached to such an agreement, and the NAC Medical and Sanitary Department is ready to conduct control checks of the state of the LPS quarterly with the transfer of reports to the NAC Directorate on the results of work under the agreement.

Before the session with Grigori Petrovich Grabovoi, my condition was bad, I was burdened by severe pain in the back, I had a constant temperature. The pain lasted for a month. I took drugs.

On the second day after the session the pain subsided and to the doctors' surprise I could get out of bed freely without help. The temperature was variable.

That same evening after the session, I gave up drugs.

After the first session with Grigori Petrovich Grabovoi, during an examination by a gynecologist-oncologist, a visual improvement was noticed, i.e. the cervix took the correct shape.

Today after the session I felt easier breathing, the pain has subsided, I can say it is insignificant, I feel a surge of strength.

On May 22-23, 1996, urinary incontinence, which had been going on since October 1995, stopped.

After the second session conducted by Grabovoi G.P., urinary incontinence stopped.

G.P., during the implementation of which Grabovoi G.P. was at a distance of 90 cm from my location.

I felt that my left eye did not open (as a result of purulent inflammation in March 1996) before I started using the method (since April 1996), it opened at the moment of using the method, which was confirmed visually. As a result of using the method, my right eye began to see more clearly objectively, and subjectively, at the level of sensations, I felt only my hands, felt the presence of a warm rod along the entire spine and warmth in the lumbar region.

As a result of using the method of information transformation, I concentrated on the points indicated by Grabovoi G.P. After the sessions, the noise in the ears disappeared and the dizziness stopped.

I, Kozhevnikov Valery Anatolyevich,

After the remote session conducted by Grabovoi G.P. on 28.05.1996
from 22:00 to 23:00 Moscow time, the burning pain in the head,
which began in 1989, periodically recurring, passed. The intervals
between painful sensations in the head were insignificant.

From about November 1995 to April 1996, the burning pain in the
head was absent, then it resumed with short periods and continued
until 05/28/1996. Previously, with drug treatment, there was no
natural, lively perception of the world. There were feelings of a foggy
head, inhibition, there was no real picture of perception in
communication, one of the reasons for which was drug treatment, I
can also note a different, lively attitude towards people around me
(transport, passers-by, etc.) was absent. After an in-person session
conducted by Grabovoi G.P. on 05/29/1996, the condition changed:
calmer, I adapt to the environment quite easily, lively and more
natural perception of the world, more relaxed in communication, I
feel freer.

on establishing the fact of recognition of Grigori Petrovich Grabovoi

name of document, series, number, by whom and when the document was issued: I have an identity card: B-5382 dated May 2, 1978.

In connection with the fact that I contacted Grigory Petrovich Grabovoi, born on November 14, 1963 in the village of Kirovsky, Kirovsky district, Chimkent region, Kazakh SSR (and having a birth certificate series II - OG No. 463794, passport series III-OG No. 586058, issued on February 1, 1980), on October 1, 1996. The reason was that they asked for help in treating my daughter, Irina Vladimirovna, for schizophrenia.

On the second day I noticed that she went to bed without pills (before that she took strong pills and those that also affected sleep), because the disease always began with sleep disturbances. Usually she took her pills around 9 pm and went to bed about 30 minutes later (the pills began to take effect). And from the moment my friends visited Grigori Petrovich Grabovoi, as I described above, she went to bed at the same time (approximately) for a minute and fell asleep until the morning (got up at night to go to the toilet and then fell asleep just as well). I observed this from 09/02 to 10/06 inclusive, because on 10/06/96 I left for Moscow for treatment with Grigori Petrovich Grabovoi.

Please certify my application on the basis of documents proving my identity and on the basis of the above evidence.

the extinguished but not yet cooled fire. Anya received a very severe
burn on both hands, the skin on her right hand immediately came off.

We washed the burns with spring water and tied our hands with
rags. Anya screamed loudly and asked Uncle Grisha to help her. I

We had to walk about 30 minutes to get to the camp through the

instantly fell into a very deep sleep. At night I treated her hands with a furacilin solution and bandaged them with a non-sterile bandage.

We still had 2 days left before departure. Quite by chance I found out that a bus was going to Tashkent the next day . Having bought a ticket for it, we urgently left for Tashkent, where through Morozkina N.R. we informed Grigory Petrovich about what had happened.

The burns began to heal in a very short time and without complications. The wounds quickly healed with fresh skin and by the first of September (I had to go to school) slightly noticeable white spots remained on my hands, which gradually merged with the color of the surrounding skin during September.

Thank you very much, Grigory Petrovich! As a general practitioner, I believe that without the help of Grabovoi G.P. such a successful cure could not have occurred, since the wounds were clearly infected and sufficient medical care was not provided immediately.

After the program "The Third Eye" that aired on NTV on September 15, 1996, I began to imagine Grigori Petrovich Grabovoi with the aim of helping to improve my well-being from 10:00 PM to 11:00 PM. His image appeared very clearly and almost immediately. Once I asked for relief from stomach pain, another time – from a headache. It got easier immediately after 3-5 minutes, and the next day after such sessions – "contacts" I felt much better: more active, easier to move.

And then I, a weak and elderly person, began to specifically mentally turn to Grigory Petrovich from 22:00 to 23:00 about improving my well-being. It has been helping for a whole month now.

I declare that Grigori Petrovich Grabovoi is truly a healer and clairvoyant.

On 10/03/1996 I had my first appointment with G.P. Grabovoi, and in the evening of that day and every evening from 10:00 PM to 11:00 PM I began to feel an effect of extraordinary force on my body. All my unusual sensations, namely: heaviness and numbness of my arms and legs, strong pulsation in the solar plexus, sharp, piercing pain in my feet, fingers and palms, strong pressure on my head, vibration of

the liver, light touch on the thyroid gland, strong burning in my left breast, pain inside the chest, as well as many other sensations, I write down in my diary. On 10/21/1996 I had my second appointment with G.P. Grabovoi, where he asked me about the fact that I had not had the idea of wanting to lose weight 14 days ago. I remembered that 2 weeks ago, i.e. 10/07/1996, when I was trying on trousers and they were a little too small, the thought came to me that I needed to lose weight. I returned to this thought several times during the day, but I did not share it with anyone. I think that on 10/07/1996, Grabovoi G.P. saw my thought about the desire to lose weight. My health is quickly improving, I feel much better.

I declare that I was an eyewitness to the following extrasensory works of Grigori Petrovich Grabovoi:

In 1992, I was undergoing examination at the Mother and Child Hospital in Tashkent. During the examination, I was diagnosed with a 4-week uterine fibroid (ultrasound examination). Over the next five months, the fibroid grew to a size of 9 weeks. The doctors suggested surgery. I was not mentally prepared. I asked Grigori Petrovich Grabovoi for advice. He willingly agreed to help me by scheduling evening contactless sessions for a week. During the sessions, I felt sensations in the lower abdomen - as if a drill was working with some kind of rattling, grinding, twisting something inside. I was amazed - what inexhaustible strength Grigori Petrovich possessed. After the sessions, I forgot about my illness for a while, because I felt pretty good. Then I was examined again by ultrasound. The results were amazing - no fibroid, only nodules remained.

Four years have passed since the treatment sessions conducted by Grabovoi G.P. At present I am undergoing a full body examination at Hospital No. 2 of the Sergeli District of Tashkent. On July 8, 1996, I underwent a repeat ultrasound examination. The examination results showed that the uterus is at rest, there are no deviations.

Thank you, dear Grisha!

I declare that Grigori Petrovich Grabovoi really has the gift of a healer and clairvoyant.

After watching the program "The Third Eye", I contacted Grabovoi G.P. regarding the illness of my mother Grishina M.S.

The first session took place on October 4, 1996, after which I began to apply all the instructions and methods of Grabovoi G.P. (mental appeal to him at the appointed time).

After the session, my sister, i.e. my mother's daughter, also experienced changes. She had a large mole on her right shin, which was wet and caused pain in her leg. After the session, my sister's leg began to hurt very badly, and then with each passing day the mole began to shrink, began to dry out, and her leg completely stopped hurting and bothering her.

I declare that I was an eyewitness to the following extrasensory works of Grabovoi G.P.:

Our family lost two of the closest people - my father and grandmother, who died of cancer. In 1990, my mother fell ill with cancer. Grigori Petrovich Grabovoi was able to save her from a tragic end. Now my mother is alive, her efficiency and energy are at the highest level.

Being at a great distance from us, Grabovoi Grigori Petrovich cured my daughter, Morozkina Anna, of severe pneumonia without a single pill or injection. Every evening, the temperature, which had not been brought down by anything before, dropped during the sessions of contactless treatment conducted by Grabovoi G.P.

At my request, Grigori Petrovich Grabovoi performed hair restoration after a chemical perm. Hair revitalization, restoration of normal structure is confirmed by the testimony of my hairdresser, who saw my hair.

After the treatment carried out by Grabovoi G.P. in February – March 1996, the dentist removed the diagnosis I had previously made – stage 1 periodontosis.

On June 28, 1996, my daughter Anya and I were relaxing in the mountains, baking potatoes. Anyuta got carried away and, running past a fire, tripped and fell. The brushes of both hands ended up in the extinguished but not yet cooled fire.

Anya received a very severe burn on both hands, and the skin on her right hand immediately came off.

We washed the burns with spring water and tied our hands with rags. Anya screamed loudly and asked Uncle Grisha to help her. I tried to concentrate and mentally asked Grabovoi G.P. to help my child.

We had to walk about 30 minutes to get to the camp through the mountainous terrain, crossing the river several times. Crying quietly, Anyuta finally reached our room on her own. There she immediately lay down on the bed and almost instantly fell fast asleep. At night I treated her hands with a furacilin solution and bandaged them with a non-sterile bandage.

We still had 2 days left before departure. Quite by chance I found out that a bus was going to Tashkent the next day. Having bought a

ticket for it, we urgently left for Tashkent, where through Morozkina N.R. we informed Grigory Petrovich about what had happened.

The burns began to heal in a very short time and without complications. The wounds quickly healed with fresh skin and by September 1 (I had to go to school) slightly noticeable white spots remained on my hands, which gradually merged with the color of the surrounding skin during September.

On September 15, 1996, my daughter, Anya Morozkina, fell ill with purulent tonsillitis. The temperature reached 39.8 °- 38.5 ° and lasted for 2 days. Treatment - gargling with antiseptics, acupressure, semi-alcoholic compresses. The recovery was slow, the temperature did not go down well.

Anya did not get out of bed, did not eat anything. A few days later, information about this was passed on to Grigori Petrovich Grabovoi. He scheduled 3 sessions. On the very first day, the temperature dropped to normal. Anya began to eat. She sweated heavily at night for 4 days. On September 23, 1996, Anya went to school.

On September 21, 1996, I had severe pain in the area of the sternoclavicular joint on the right. On September 22, the pain

intensified, in the evening of that day, between 10:00 PM and 11:00 PM, I tried to mentally appeal to Grigori Petrovich Grabovoi with a request for help. A few minutes after the appeal, I felt a clear and very strong burning sensation at the site of the pain. The burning continued until 11:00 PM, in the morning I felt much better. On September 23, 1996 and September 24, 1996, from 10:00 PM to 11:00 PM, I again mentally asked Grigori Petrovich for help.

I feel much better now. The pain is still a little.

Thank you very much, Grigory Petrovich!

From my personal experience and the experience of people close and dear to me, I have repeatedly been convinced of the effectiveness of contactless methods of Grigori Petrovich Grabovoi in healing patients at a distance. In addition, through my hands passed documents issued by medical institutions to patients incurable by traditional methods about the complete cure of benign and malignant neoplasms by the method of psychic Grigori Petrovich Grabovoi. For example, patient A.G. in March 1994 she was diagnosed with a cancerous process in the right mammary gland. In August, after contactless treatment by G.P. Grabovoi, doctors confirmed the absence of signs of the disease.

In the presence of two witnesses, I declare that I was an eyewitness to the following extrasensory works of Grigori Petrovich Grabovoi:

I have repeatedly asked Grigori Petrovich Grabovoi for help in restoring the health of my loved ones. The first time was in 1993. I was forced to admit my daughter Svetlana to hospital # 2 in Tashkent. She was bedridden, had a high temperature, and her joints were very swollen, accompanied by severe pain. I was very upset, because traditional treatment methods in medical institutions practically did not improve her condition. I worked in the Directorate of the National Airline of Uzbekistan and knew an amazing young man, Grigori Petrovich Grabovoi, who had healed many of my acquaintances extrasensorically. I asked him for help in restoring my daughter's health. He had never seen her, but after a few minutes he consistently told me the history of her illnesses - about lung surgery, stomach ulcers, specific female diseases and much more. I was amazed by the accuracy of his diagnosis of past illnesses. After that, he prescribed Svetlana remote sessions and recommended taking her home from the hospital. We followed his recommendations and after 3-4 days the joint pains disappeared. And a week later she felt completely healthy. Svetlana, after her miraculous healing, works

hard to improve her knowledge of the world around her, teaches children at school, and instills in them a love of beauty and knowledge . We are all grateful to Grigory Petrovich for this miracle that he performed , restoring my daughter's health.

In 1994, I fell ill with acute radiculitis and was bedridden. After my appeal to Grigory Petrovich by phone, I was assigned sessions from 22:00 to 23:00 local time. From the very first treatment session, I felt relief and after two days I forgot that my lower back hurt so much.

I once again turned to Grigory Petrovich Grabovoi for help in the spring of 1996. I began to feel severe pain under my left breast and a tourniquet the size of a finger formed, which was easily palpated and very

was bothering me. I contacted Grigori Petrovich through my friend (he was in Moscow) with a request to help me. Grigori Petrovich prescribed treatment. I hereby certify the following:

From 1992 to 1996 I suffered from sinusitis (difficulty breathing through the nose, runny nose). When I became acquainted with the information about Grigori Petrovich Grabovoi, I immediately believed him. I believe that this person in our Universe is not an ordinary person, but a person gifted by God.

In the 20th of October 1996, I asked Grigory Petrovich to help me. I prayed before going to bed and said the words: "Grigory! Help me get rid of sinusitis." On the second day, the following happened. I inhaled air and coughed, spitting out a small brownish-red clot. It immediately became easy for me to breathe through my nose. I still feel fine.

I was indeed an eyewitness to all of the above, which I confirm with my signature in the presence of two witnesses.

My appeal to Grigori Petrovich Grabovoi was formulated as follows:

I was born with a bilateral dislocation of both hips, was operated on several times, with age my coxarthrosis progressed significantly, with a strongly developed contracture. After the first broadcast on NTV in the program "Third Eye" I tried to contact G.P. Grabovoi without contact, as a result of which a significant improvement in the condition was achieved, the pain in the legs disappeared, the contracture decreased. This led me to the decision to contact him personally.

During the reception on June 27, 1997, Grigori Petrovich Grabovoi conducted contactless remote work on my request. I testify that the result of contactless work of Grigori Petrovich Grabovoi 3 (three) days after my request to him is as follows:

At the moment it feels like a bloodless operation was performed. Positive result: contracture of the right leg has decreased, curvature of the pelvis (skew) has decreased, strong stretching occurs in the spine.

I declare that Grigori Petrovich Grabovoi really healed me from prostate adenoma.

The proof of this fact is that before contacting Grabovoi I was diagnosed with prostate adenoma based on an ultrasound of the prostate (plus a rectal sensor) at the Moscow Research Institute named after P.A. Herzen on 22.11.1996. The conclusion was signed by a doctor, senior research fellow V.I. Kazakevich.

After one session conducted by Grabovoi G.P. on 10.10.1997, my prostate adenoma disappeared. This is confirmed by protocol #11288 of 17.10.1997, ultrasound (plus rectal sensor) of the prostate gland, conducted at the Diagnostic Clinical Center #1 of the South-West Administrative District of Moscow and repeated studies of 20.10.1997 at the same P.A. I declare that Grigori Petrovich Grabovoi is truly a healer.

I turned to Grigory Petrovich Grabovoi for help regarding neoplasms in the uterine area measuring 0.5 cm. This is confirmed by the results of examinations: from 01/09/92 in the Central Medical and Sanitary Unit No. 122 of the USSR Ministry of Health - doctor, professor Baskanov V.P. and from 10/19/96 in the Ulsonik UD - doctor Rodionova I.V.

G.P. Grabovoi held three face-to-face sessions with me – 10/03/96, 10/21/96, 12/18/96 and a correspondence session – 11/20/96, and I also massaged certain points myself.

The entire treatment period was carried out without any medication or surgical intervention. My repeated ultrasound examination of the pelvis on 03.03.97 at the Central Military Clinical Hospital named after ... - doctor Gromov A.I. - showed that the echostructure of the myometrium is heterogeneous, without focal inclusions, pathological formations in the uterine area were not detected.

My health has improved a lot.

In connection with the fact that I contacted Grigory Petrovich Grabovoi, born on November 14, 1963 in the village of Kirovsky, Kirovsky district, Chimkent region, Kazakh SSR (and having a birth certificate series II - OG No. 463794, passport series III-OG No. 586058, issued on February 1, 1980) on November 6, 1997 regarding the illness of his daughter, Elena Yuryevna Churkina, Solyanka street, 14/2, office 110.

I declare that Grigori Petrovich Grabovoi really helped restore the health of Elena Yuryevna Churkina.

Elena has been ill since she was 13, the first 2 seizures were 11 months apart. Treatment was carried out in Moscow, in the psychoneurological dispensary #18, in Khabarovsk, with a Chinese doctor, Dr. Jiang, in the UAE, in St. Petersburg in the 2nd clinical hospital, we are registered with a neurologist in Nizhnevartovsk, disabled person of the 2nd group. Treatment was medication, acupuncture (Jiang's personal method), but the case did not move forward, the attacks tended to become more frequent. Recently, the attacks were every 4-5 days, in the absence of medication - several times (2-3) a day.

After contacting Grabovoi G.P. (from November 6 to December 9), the attacks stopped, the emotional state improved, and there was an interest in life (before this contact, everything was the opposite, there were even suicide attempts).

Please certify my application on the basis of documents proving my identity and on the basis of the above evidence.

I declare that Grigori Petrovich Grabovoi really healed me from stage IV AIDS with scattered changes of various colors on the skin and enlarged glands in 2 months.

The proof of this is that before the start of the correspondence rehabilitation conducted by Grabovoi G.P., I had been diagnosed with AIDS for over three years in the dispensary department of the Republican Center for AIDS and Clinical Immunology of the Ministry of Health of Georgia in Tbilisi. There were black, green, and yellow spots on my body, and enlarged glands. After Grigory Petrovich conducted the correspondence rehabilitation course, the discharge from the Republican Center for AIDS and Clinical Immunology of the Ministry of Health of Georgia on December 21, 1995, states that I am practically healthy. And indeed, there are no changes on the skin, the immune analysis is normal.

I work as a student.

The question about blood testing was raised with me in connection
with the establishment of HIV infection in my husband R.R., who with
this diagnosis was registered at the AIDS center in Tbilisi since May
1992. He died in May 1995. The final diagnosis: HIV infection, AIDS
IV stage 1, toxoplasmosis abscess of the brain, neurotoxicosis,
neurovascular form.

My blood serum was tested for HIV antibodies several times using
ELISA and NIF. All results were positive. The Western Blot method
revealed the presence of antibodies to HIV proteins.

Based on these laboratory data, in July 1992, I was diagnosed with
HIV infection stage IV, generalized persistent lymphadenopathy
(according to the SPS classification) at the Republican Center for
AIDS and Clinical Immunology of the Ministry of Health of Georgia. I
did not take any medications. All examinations up to November 9,
1995 (including those in Moscow) showed the presence of AIDS.

course from Grigori Petrovich Grabovoi, I, in addition to the tests confirming the presence of AIDS, had spots of various diameters and sizes, located in different parts of the body. The glands were also enlarged, on the basis of which the diagnosis of AIDS stage IV was made.

On 09.11.1995, in the Georgian representative office of Grigori Petrovich Grabovoi, I signed a contract for Grabovoi G.P. to conduct my health restoration in absentia. In this case, I stated that I had AIDS as my main diagnosis. According to the terms of the contract, I had to record my health condition. Within a month from the date of the start of the treatment in absentia conducted by Grigori Petrovich Grabovoi from November 1995, the spots of black, yellow and green colors located on my legs disappeared and since the end of December 1995, there have been no spots on my body. My skin is clean.

During the non-contact treatment by Grigori Petrovich Grabovoi, I felt a pulsation in the glands, which in January 1996 decreased at a high speed. I feel good, I feel healthy.

On 12/05/1995 I underwent laboratory and instrumental examinations in the dispensary department of the Republican Center for AIDS and Clinical Immunology of the Ministry of Health of Georgia in Tbilisi with the attending physician L. Sharvadze. The examinations were carried out according to the full program until 12/21/1995. Unlike all previous examinations, which were carried out over 3-4 days and in all test systems the presence of AIDS was detected, after taking the rehabilitation treatment in absentia from Grabovoi G.P., the blood

I was tested 3 times from a vein and 2 times from a finger, although previously they were tested once, and as a result, no HBsAg antibodies were found. Immune system, general blood test - normal. In the discharge they wrote that I am practically healthy and gave recommendations: to conduct additional tests to confirm the diagnosis.

Considering that my skin is clean, immunological studies, general analysis showed the norm, and also that antibodies of the HBsAg spectrum and other broad spectrum were not detected, which previously showed the presence of AIDS, I believe that Grigory Petrovich Grabovoi cured me of AIDS in 2 months.

from the medical history

Patient M.G., 25 years old, a widow living in Georgia.

M.G.'s blood was raised in connection with the establishment of HIV infection in her husband L.R., who had been registered with the Center with this diagnosis since May 1992. He died in May 1995. The final diagnosis: HIV infection, AIDS stage IV, C1 toxoplasmosis abscess of the brain, neurotoxicosis - neurovascular form.

M.G.'s blood serum for the presence of antibodies to HIV was repeatedly carried out using ELISA and NIF methods. All test results were positive, the Western Blot method revealed the presence of antibodies to HIV proteins.

Based on these laboratory data, a diagnosis of HIV infection was established and the patient was placed on dispensary register.

When registered, the patient complained of enlarged lymph nodes in the cervical and axillary regions, which had been bothering her for the past 6 months, and of vaginal discharge and itching in the perianal area.

During an objective examination of the patient, enlarged lymph nodes were found: the posterior cervical node on the left - up to a diameter of 2 cm, axillary nodes - 3-4 nodes on both sides up to a diameter of 1.5-2.5 cm, inguinal nodes - single on both sides up to a diameter of 1.5-2 cm; painless, moderately dense consistency.

586058, issued on February 1, 1980) through the newspaper "Business World" due to the illness of his son.

I declare that Grigori Petrovich Grabovoi really cured my son Georgy Mushkudiani, 10 years old.

In May 1995, doctors from the Tbilisi Oncology Hospital and doctors from the Belarusian Research Institute of Medical Radiology and Oncology diagnosed my son with rhabdomyosarcoma of the oropharynx and nasopharynx with damage to the zygomatic bone on the right and damage to the bone marrow. The child was almost blind in his right eye, could not walk, and complained of unbearable pain all over his body.

At the Belarusian Research Institute of Medical Radiology and Oncology, my son underwent 3 courses of chemotherapy and began radiation therapy, when, seeing that no results were expected, I contacted Grigori Petrovich Grabovoi through the newspaper "Business World". The newspaper's correspondent V. Sudakov contacted Grabovoi G.P. on 03.06.1995 and Grabovoi G.P. began non-contact treatment. After 2 weeks, on July 17, the tumors began to noticeably decrease and after three days they had completely disappeared. Numerous tests conducted at the same clinic (attached) showed that the child was completely healthy, no cancer cells were found anywhere.

Please certify my application on the basis of documents proving my identity and on the basis of the above evidence.

about the extrasensory work of Grigori Petrovich Grabovoi, born on November 14, 1963 in the village of Kirovsky, Kirovsky district, Chimkent region, Kazakh SSR (having a birth certificate series II-OG No. 463794).

I, Mushkudiani Teimuraz Georgievich,

state: citizen of the Republic of Georgia,
name of the document, series, number, by whom and when the
document was issued: I have an identity card: passport XIV-TN No.
554003,

I certify that Grigory Petrovich Grabovoi, using a non-contact
extrasensory method, cured my son Georgy Mushkudiani of
rhabdomyosarcoma of the oronasal pharynx with bone marrow
damage, stage IV, with metastasis to the pelvic bones, left femur.
The evidence is provided below: On May 3, 1995, my son, Georgy
Teimurazovich Mushkudiani, born in 1985, was hospitalized in the
Research Institute of Oncology and Medical Radiology of the Ministry
of Health of the Republic of Belarus, located at the following address:
Minsk region, Borovlyany settlement (0172) 65-42-21, where, based
on morphological examination No. 9413/95 dated May 3, 1995, the
head of the children's department of the same clinic D.V.
Kochubinsky made a diagnosis: "Embryonic rhabdomyosarcoma of
the upper jaw on the right." The analysis of the computed
tomography performed on 05/06/95 determined a massive soft tissue
tumor of the oronasopharynx 8.5x7.5x6.5 mainly on the right with
invasion into the right maxillary sinus, pterygopalatine fossa,
sphenoid sinus, right half of the nasal cavity, with destruction of the
right zygomatic bone, with metastases in the submandibular lymph
nodes on the right up to 2.5x3.0 cm in diameter. Cytological report
No. 9668/95 dated 05/06/95 showed a scattering of cells of an
immature malignant tumor of non-epithelial genesis, corresponding in
its characteristics to rhabdomyosarcoma. Histological examination
24537-42 from 05.05.1995 showed - in all delivered areas - a
malignant tumor, alveolar rhabdomyosarcoma. Myelogram,
conducted on 05.05.1995 (reflected in the discharge summary and
medical history), showed atypical cells lying separately and in
complexes against the background of bone marrow elements. The
child was prescribed chemotherapy and radiation treatment according
to the CW1-91 protocol. Three courses of chemotherapy

and radiation (10 gray) given to the child did not produce any real results – the tumor moved from the upper part of the face to the neck area.

Having read the article "The X-ray Man" by V. Sudakov about the psychic Grigory Petrovich Grabovoi in the newspaper "Delovoy Mir" on 17.06.1995, I contacted the editor of this newspaper Yu. Kirpichnikov by fax with a request to connect me with Grabovoi G.P. V. Sudakov passed on my request for treatment of my son to G.P. Grabovoi on 03.07.1995. Two weeks later – on 17 July – the tumors on my son began to noticeably decrease and after 3 days they completely disappeared.

The entire period of treatment by G.P. Grabovoi of my son was carried out without any medication or surgical intervention. I discharged my son from the clinic, took him home to Tbilisi and to this day he does not take any medication and is at home. On September 1, 1995, he went to school and is an excellent student.

At my request, in the same clinic where my son was treated on July 24, 1995 and July 26, 1995, control tests were performed on him - morphological studies No. 19997/95 and No. 40392-93, which showed that no tumor cells were found in the bone marrow, lymph nodes, or jaw.

The above is confirmed by the discharge summary and the certificate issued on 10.08.1995 by the head of the children's department of the clinic D.V. Kochubinsky.

MUSHKUDIANI GEORGE TIMUROVYCH, born in 1985

Diagnosis: rhabdomyosarcoma of the oropharynx, with damage to the zygomatic bone on the right. Mts in the submandibular lymph nodes on the right, bone marrow damage, stage 4.

He was admitted with severe symptoms of intoxication and complaints of severe pain in the bones of his lower extremities.

CT 05/06/95: detected massive soft tissue tumor of the nasopharynx 8.5x7.5x6.5 mainly on the right with invasion into the right maxillary sinus, pterygopalatine fossa, sphenoid sinus , right half of the nasal cavity, with destruction of the right zygomatic bone, with mts into the submandibular lymph nodes on the right up to 2.5x3.0 cm in D.

06.05.95 X-ray of the pelvic bones, hips: no bone destructive changes were detected. The images were consulted with the head of the department Golub G.D.

06.05.95 R - graph of the cell org. gr .: no pathology.

05/05/95 cons. neurologist: complaints decreased vision (OD-abs), pain in the legs and pelvis and when walking (currently does not walk), right-sided exophthalmos, muscle strength in the legs is reduced to 2-3b , tendon reflexes D=S ; no loss of sensitivity. Pain in the left thigh and pelvic bones when performing the Lassegue, Matskevich, Basserman tests. Conclusion: mts in the pelvic bone, left femur .

05.05.95 open biopsy of the intra-mandibular lymph node on the right, biopsy of the maxillary sinus, bone marrow puncture.

Cytological report No. 9668/95: scattering of cells of an immature malignant tumor of non-epithelial genesis, which in their cytomorphological characteristics correspond to rhabdomyosarcoma. Bone marrow elements, destroyed, dystrophically altered cells of a malignant tumor.

Histology 24537-42: in all delivered areas, malignant tumor - alveolar rhabdomyosarcoma.

Myelogram 05.05.95: against the background of bone marrow elements , atypical cells lying separately and in complexes .

05/06/95 cerebrospinal fluid examination: cellular elements not detected , protein 0.224 g/l.

Neurospecific enolase 235 ng/ml.

05/06/95 ENT: malignant tumor of the upper jaw on the right with spread to the nasal cavity, hard palate, zygomatic bone.

05/15/95 ENT: oropharynx - tumor has completely regressed, nasopharynx - tumor remnants are determined on the vault .

Ultrasound of the abdominal cavity 12.05.95 : no pathology.

Newspaper "RESONANCE" September 5-6, 1995, page No. 10.
GRIGORY GRABOVOI ARRIVES IN TBILISI "

"It is quite difficult to surprise anyone in Tbilisi with psychics and possessors of mysterious energy. Being a psychic here is as common and ordinary as living without gas or something like that. We also have energy owners and tamers, famous among celebrities, at least Juna Bitkashi , etc. Recently, leading specialists from all over the world have been increasingly attracting such people to spread their

own information. It would seem that this mysterious profession should not cause surprise, but the person who arrives in our city the day after tomorrow will likely cause great interest and amazement.

In Tbilisi and perhaps in other places in Georgia, many have not heard the name Grigori Grabovoi, but he is a very interesting person... As Tbilisi resident Timur Mushkudiani says, he had no one to rely on. His 10-year-old boy was struck by rhabdomyosarcoma - one of the most severe and terrible types of cancer. The disease had already reached the stage when the patient's relatives only smile sympathetically. T. Mushkudiani was advised to transfer the child to the oncology center of Minsk, and he did so. But then, one day, while in Minsk, Timur bought a newspaper - it was "DELOVOY MIR" from June 17, 1995. He leafed through the newspaper and found a rather voluminous article. The article wrote about G. Grabovoi. At first, it seemed to be nothing! Remarkable extrasensory data and possession of clairvoyance. It turns out that this young man guessed and understood everything since childhood: he knew in advance whether there was cheese in the store, or, as a student, foresaw the Chernobyl disaster. The vision came in the library, while preparing for exams, and made a terrible impression on him. Of course, he did not tell anyone about it - who would listen to a provincial student? A wonderful phenomenon, isn't it? Clairvoyance, knowing in advance what will happen, starting with the fate of a person and ending with continents and oceans. On the pages of "Business World" G. Grabovoi says: "Any event can be changed. My forecasts are not fatal." His talent, after his student years, was clearly manifested in one of the design bureaus. Then G. Grabovoi took on an even greater cause. According to the "Business World", he can, by looking at the plane, determine exactly where, from what specific place and part of the plane the danger awaits, where what is damaged. Universal psychic G. Grabovoi can accurately determine the location of a missing child, so that for this he does not need to meet with the mother of the missing person, or without any additional information at all. Of course, this is interesting, but still we are accustomed to this kind of information, but Timur read on and found the phrase: "For me, cancer and a runny nose do not make a difference," -

(end of first page, text continued on second page)

Unnumbered (reverse) side of sheet No. 725

(Continued from the first page)

said G. Grabovoi. And then followed a list of amazing, hard-to-imagine cases when G. Grabovoi turned people incurable from cancer into absolutely healthy people. G. Grabovoi's method of treatment was also amazing - he did not need to meet with the sick at all, he did not heal with the hand movements we are accustomed to , etc.

T. Mushkudiani did not think long. He contacted the newspaper editorial office and found out the address of G. Grabovoi, then contacted his office and took Georgiy straight from the hospital to Moscow. He was warned that there was no need to bring the sick person, but is it easy for a Georgian to believe in such a thing? Having met G. Grabovoi, he discovered that he was a clairvoyant and healer of a fairly young age (G. Grabovoi is 32 years old).

As Timur tells us, the boy has recovered. Now Georgiy is completely healthy and is going to school. Timur tells us that he did not buy any school supplies for Georgiy, since two months ago there was no talk of school, let alone Georgiy going to school. As Georgiy tells us, he is in constant contact with his healer, and often hears G. Grabovoi's voice. It turns out that G. Grabovoi and his patient have become great friends. "He reminds me of myself," G. Grabovoi says. According to T. Mushkudiani, one of the purposes of G. Grabovoi's visit to Tbilisi is to meet his "little friend" - G. Grabovoi will arrive in Tbilisi at the invitation of the patient's father . After all, G. Grabovoi is a person known in the world, he travels and works a lot, and even in the highest echelons of power he is an accepted and desired person, which is not surprising at all. It seems that he is the only person in the world to whom BABA NAG PAL himself devoted 23 minutes (Rajiv Gandhi was honored with this honor for only 2 minutes). As "Delovoy Mir " emphasizes, the saint blessed his activities and called on him to promote the unity of his country (he did not define the borders of the Motherland).

"His appearance in Tbilisi is very significant," says T. Mushkudiani, "this man demonstrates Miracles all over the world, and during his three-day stay in Tbilisi he will try to help many, especially since his meeting with the city's public is planned in the Griboyedov Theater

Hall. It is envisaged to conclude medical contracts with those who wish.

Our son, Nikolay Merabovich Dudugava, born in 1982, after examination on a computer tomograph on 05/29/1995, was operated on at the Institute of Neurology in Tbilisi, in the Sapzona microdistrict, for a tumor of the cerebellar vermis and the fourth ventricle. Histology showed hopoblastoma.

After the operation on June 8, 1995, a computed tomography scan performed at a diagnostic center in Tbilisi showed a relapse of the tumor.

On the recommendation of doctors, treatment was continued at the Burdenko Institute of Neurosurgery in Moscow, Fadeeva St., 5, in the radiology department under the head of the department V.A. Krinsky. The patient received 54.5 gray of radiation.

Three weeks after the end of treatment in Tbilisi, the patient's condition deteriorated sharply. He was bothered by headaches, incessant vomiting, general weakness, insomnia, and loss of appetite. The surgeon, having examined the patient, determined a relapse of the tumor and suggested a repeat surgical intervention.

Being in a desperate situation, on the advice of friends we turned to Grabovoi G.P. The telephone conversation with him took place on 09/02/1995. He was in Moscow. He immediately began a contactless extrasensory method of treatment. The patient's headache stopped, sleep was partially restored.

On September 7, 1995, Grabovoi G.P. visited our son upon his arrival in Tbilisi and informed us that he no longer had a malignant tumor and suggested that we check

on a computer tomograph. We conducted an examination at the diagnostic center with doctor A. Nemsadze (where we had conducted examinations before) on September 8, 1995. The image showed the absence of a tumor, and there were no postoperative cicatricial changes.

For us, the proof of our son, Nikolay Merabovich Dudugav's, cure from cancer by G.P. Grabovoi's extrasensory contactless method is the cessation of vomiting, headaches, restoration of sleep and, of course, the CT scan. These changes, according to doctors, should not have occurred without surgical intervention. Currently, the patient accepts only G.P. Grabovoi's prescriptions.

I learned from the newspaper that a psychic, Grabovoi G.P., was coming to our city of Tbilisi from Moscow. I learned from the newspaper that he had cured a ten-year-old boy of cancer. My sister, Lela Amiranovna Tseradze, who was born on October 24, 1962, is sick. She is 32 years old. She was diagnosed with cervical cancer, stage IV epidermal carcinoma, at the Tbilisi Oncology Hospital. The disease began in December 1994. The doctors at the Oncology Hospital refused to treat her. She did not undergo any radiation. On September 8, 1995, I went to see psychic Grigori Petrovich Grabovoi, which took place in the Tsekavshiri Hall. That same day, I filled out a form where I wrote down my sister's diagnosis, which I already wrote about above. The doctors said that she would live 3-4 months. She took painkiller narcotic injections every day, hardly slept at night, her hemoglobin was very low. On September 9, my husband, Lansadzhe Akaki Vakhtangovich, filled out the contract. In the evening, when the session had already begun, she slept very well, without using drugs. On September 8, at 1 a.m., she heard a voice that told her that her

questionnaire was being read at that time. On September 12, an oncologist, based on a gynecological examination at the Tbilisi Oncology Hospital, did not find a cancerous tumor where it had been before (on the cervix). After the session conducted by Grabovoi G.P., her protrusion in the perineum disappeared, she was able to move her legs.

Improvements occurred after sessions conducted by Grabovoi G.P. She believes in this and wants to continue the sessions that Grabovoi Grigori Petrovich will conduct with her.

STATEMENT

on establishing the fact of recognition of Grigori Petrovich Grabovoi healer and clairvoyant

I was born on November 19, 1952 in Tbilisi, name of document, series, number, by whom and when the document was issued: I have an identity card: passport IV-TI No. 514510 issued by the Department of Internal Affairs of the Leninsky District Executive Committee of Tbilisi on 18.08.77.

In connection with the fact that I contacted Grigory Petrovich Grabovoi, born on November 14, 1963 in the village of Kirovsky, Kirovsky district, Chimkent region, Kazakh SSR (having a birth certificate series II-OG No. 463794, passport series III-OG No. 586058, issued on 01.02.1980), September 8, 1995 in the Tsekavshiri building in Tbilisi on Freedom Square, due to my husband's illness – stage IV cancer of the right lung.

I declare that Grigori Petrovich Grabovoi really heals my husband's illness in the following way. My husband, Ivan Georgievich Berishvili, born on April 17, 1948, suffered from stage IV cancer of the right lung with metastases in the bronchi. The diagnosis was established at the oncology center in Tbilisi by Professor R. Gagua. I have a general chest x-ray taken on August 10, 1995. On September 8, 1995, my husband, who did not know about his cancer, and I came to meet with G.P. Grabovoi in the Tsekavshiri building on Svoboda Street. After the session conducted by G.P. Grabovoi on September 11, 1995, my husband took a general chest x-ray at the railway hospital located near the railway station, which showed that all the organs of the chest are completely healthy and without any changes. Even doctors asked me why my husband took the picture. This is proof that Grabovoi G.P. cured my husband from a distance from stage IV lung cancer with metastases in 69 hours.

Please certify my application on the basis of documents proving my identity and on the basis of the above evidence.

state: citizen of Georgia,

name of the document, series, number, by whom and when the document was issued: I have an identity card: passport IV-TI No. 514510,

Place of work, position and work phone numbers: not working.

I, Ksovreli Marina Rubenovna, was born in Tbilisi on November 19, 1952 in a railway hospital at 3 o'clock at night. I have an identity card: passport IV-TI No. 514510 issued by the Leningrad region on August 19, 1977. I live in Georgia, Tbilisi.

My husband, Berishvili Ivan Georgievich, bought the newspaper "Resonance" on September 6, 1995. I read there that a sick ten-year-old boy, who had stage IV cancer – rhabdomyosarcoma, was cured by Grigori Petrovich Grabovoi. I immediately ran to Grigori Petrovich for help. My husband has stage IV cancer on the right side of the lung. The diagnosis was made at the Tbilisi Oncology Center by Prof. Gagua.

09/08/1995, my husband and I, who did not know about his cancer and even now does not know that Grabovoi cured him of cancer. Were at a meeting with Grigori Petrovich. I filled out a questionnaire, wrote down my husband's diagnosis, and on 09/09/1995 was at the reception in person, address: pr. Agmashenebeli avenue 79, Gorky club.

On September 11, 1995, after extrasensory work conducted by Grabovoi G.P., we took a blood test and an X-ray at the railway hospital located near the railway station. The doctors were surprised and asked why we took a chest X-ray, since all the organs were normal, the lungs and other organs.

The result of the extrasensory work carried out in absentia by Grabovoi G.P. is known to my sister and brother Ksavreli. After the extrasensory work, my husband feels well. On 12.09.1995 at night he felt as if something rolled down from above. I am sure that my husband has recovered from cancer and can prove the result of the extrasensory work,

conducted by Grabovoi G.P.

I would also like to add that when my husband and I were sitting in the hall at the lecture, after some time I felt relief in my heart, as if I was flying. Before, I was afraid to go down in the subway, I felt a lack of air, but now I feel good.

It should be especially noted that G.P. Grabovoi extrasensorily cured my husband of stage IV lung cancer in absentia in 3 sessions under conditions when my husband did not know that he had cancer.

I believe in God and I believe that Grabovoi G.P. cured my husband of stage IV lung cancer, because his treatment comes from God, and only divine power helps a believer.

I, Berishvili Ivan Georgievich,
born on April 17, 1948 in the village of Glola, Onsky District, Georgian
SSR,
state: citizen of the Republic of Georgia,
name of document, series, number, by whom and when the
document was issued: I have an identity document: passport VI-TI
No. 584434.

On 10.08.1995 I went to see a doctor after a cold. The doctors sent
me to the Tbilisi Oncology Center.

After the examination, I did not know my disease (diagnosis), but
my wife, Marina Rubenovna Ksovreli, born in 1952, knew the
diagnosis.

I learned from the newspaper "Resonance" that the psychic Grigory
Petrovich Grabovoi was arriving in Tbilisi.

On September 8, 1995, in the Tsekavshiri building on Freedom
Square, a meeting between Grabovoi G.P. and patients took place,
where I was also present. After the meeting, my wife filled out a
questionnaire about me.

After the extrasensory work in absentia conducted by Grabovoi
G.P., I took blood tests and a chest X-ray at the Tbilisi railway clinic,
where after comparing it with the old test and chest X-ray, I was told
with surprise that my lungs and other organs of the chest are
completely healthy.

After this story, my wife told me that I had stage IV cancer in my
right lung with metastases in the bronchi.

We all know that such a disease cannot be cured, but perhaps it
was not in vain that God sent such a person as Grigori Petrovich
Grabovoi, who cured not only me, but also many other patients, for
which we are very grateful to Grigori Petrovich Grabovoi.

Tsekavshiri building on Freedom Square, to be cured of a lung
disease,

I declare that Grigori Petrovich Grabovoi really cured me of stage IV
lung cancer with metastases in the bronchi using a contactless
extrasensory method in 69 hours. The proof that G.P. Grabovoi cured
me of stage IV cancer is as follows: on August 10, 1995, at the Tbilisi
Oncology Center, I was diagnosed with stage IV lung cancer with
metastases in the bronchi. I know that this disease is incurable using
modern methods.

2. On September 8th, I was at a session with G.P. Grabovoi from 15:00, during which he said that he would treat cancer in absentia.

3. On September 11, 1995, I had a chest examination at 12 noon, from which the doctors concluded that the chest organs were completely healthy, without any painful changes. Now I feel well and I believe that I am completely healthy, which means that Grabovoi G.P. completely cured me of cancer.

I declare that Grigori Petrovich Grabovoi really heals the disease I
have in the following way. In 1994, in Tbilisi, oncologist
Khakhanashvili diagnosed me with breast cancer at the oncology
center. I underwent 3 courses of chemotherapy, after which my
condition worsened and I refused further treatment. In July 1995, a
wound opened on my right breast. An ulcer 8 cm in diameter with
discharge from the nipple, with an unpleasant odor, formed around
the nipple, two tumors 3-4 cm in size formed in the armpit on the
right.

"FIRST RESULTS"

From September 7 to 15, Moscow psychic Grigori Grabovoi was in Tbilisi.

a meeting of G. Grabovoi with the public took place in the assembly hall of "TSEKAVSHIRI" and the first miracles began from this hall. After the meeting, at which G. Grabovoi acquainted those present

with his own methods of healing and conducted a one -minute session, a resident of Tbilisi T. Khvedegaidze approached him and said that she felt how a malignant tumor, which was on her chest, began to decrease right in the hall. And three days later, the open wounds on T. Khvedegaidze's chest began to heal. True, T. Khvedegaidze will need more time until complete healing , but she is convinced that she will soon be completely healthy. V. Berishvili's relatives hid from him that the malignant tumor almost destroyed his right lung. V. Berishvili's wife told G. Grabovoi about this - and already on the fourth day the X-ray showed a completely healthy lung of V. Berishvili. L. Tseradze's malignant tumor disappeared from the cervix, M. Ts-vadze's tumor on the tongue significantly decreased , M. B.'s tumor on the lymph nodes, D. T-adze practically threw away his cane and his pain in the limbs disappeared, etc.

We would like to remind everyone who is undergoing treatment with G. Grabovoi once again that in no case should they violate the instructions given by him. A positive result will definitely be achieved by everyone who carefully follows all the requirements and instructions of G. Grabovoi and, in First of all, he follows the Christian commandments. During his stay in Tbilisi, G. Grabovoi took communion in the Church of St. Nina, prayed in the holy Svetitskhoveli Cathedral and calls on everyone to be peace-loving, humane and to glorify JESUS CHRIST.

We will regularly inform the public through the press and television about the results of G. Grabovoi's healing.

on establishing the fact of recognition of Grigori Petrovich Grabovoi healer and clairvoyant

Name of document, series, number, by whom and when the document was issued: I have an identity card, passport IV-AI No. 580810.

In connection with the fact that I contacted Grigory Petrovich Grabovoi, born on November 14, 1963 in the village of Kirovsky, Kirovsky district, Chimkent region, Kazakh SSR (having a birth certificate series II-OG No. 463794), on November 27, 1996 I contacted Grigory Petrovich Grabovoi regarding the oncological disease of my wife, K.A. Kodintseva,

I declare that Grigori Petrovich Grabovoi really contributed to the healing of my wife with his healing actions. During the treatment, she used the method prescribed by Grigori Petrovich, and after the first session, metastases from the adrenal glands and spleen disappeared, which is confirmed by the results of an ultrasound examination of the internal organs conducted in the Ozersk Central Regional Hospital. At present, she is in the process of healing, her appetite is returning, the swelling of the extremities is gradually passing, and headaches have passed.

Please certify my application on the basis of documents proving my identity and on the basis of the above evidence.

The spleen is slightly enlarged in size and three large, highly echogenic, rounded spleens and similar single small ones are detected in its parenchyma.

The position and size of both kidneys are normal. No stones were found, the mobility of the kidneys is satisfactory, the calyceal-pelvic systems are not dilated. On the right in the area of the adrenal gland there is a distinct, increased echogenicity, oval-shaped formation measuring 3.0 x 2.0 cm, probably the adrenal metastasis.

CONCLUSION: metastasis of the spleen, metastasis of the adrenal gland on the right.

I declare that Grigori Petrovich Grabovoi really cured my son, Konstantin Konstantinovich Ladychenko, born on 23.02.1992, from stage IV cancer in one session. Before the session, at the oncology research center of the Russian Academy of Medical Sciences, my son was diagnosed with lymphosarcoma, blast type, pre-pre-B immunovariant with damage to the lymph nodes of the mediastinum of the lungs, pleura, bone marrow. The diagnosis was established on the basis of laboratory and instrumental studies and puncture of the bone and spinal marrow, ultrasound of the mediastinum and chest.

After the session conducted by Grabovoi G.P. on 11.11.1997, a puncture of the son's bone and spinal marrow was taken on 14.11.1997, the conclusion was: absence of tumor cells. After that, an ultrasound of the mediastinum and chest, laboratory and instrumental studies were conducted, which showed the normal health of the child.

All studies (before and after the session) were carried out by the same specialists using the same equipment.

I declare that Grigori Petrovich Grabovoi actually conducted a session on September 16, 1997. Before September 16, 1997, X-ray

examinations were conducted, which revealed cancer metastases in the lungs, and cancer metastases in the lungs were confirmed in the lungs multiple times. On December 4, 1997, a repeat X-ray was taken, which showed that the metastases in the lungs had disappeared. Data on the presence of cancer cells were confirmed by histological analysis on September 11, 1997. All of the above laboratory and instrumental studies were conducted on the same equipment, X-ray control was carried out by the same doctor at the address: Vladimir, Vladimir region, Kamanina street, 24 (Vladimir regional oncology dispensary).

I declare that Grigori Petrovich Grabovoi really extended my mother's life.

After the operation on 20.05.1997 at the Leningrad Military Medical Academy, the diagnosis was: left lung cancer with metastases to the heart, stage IV , inoperable - she was discharged home to die. But during this time her health did not worsen, but even improved.

After a session with Grigory Petrovich (in July), the tests returned to normal (for example, ESR was 45, became 20, etc.); hemoptysis completely stopped and, most importantly, the cough that prevented her from sleeping at night almost stopped.

Now she feels good, has a great appetite. She does all the housework herself. Every weekend she goes to the market for groceries (3 km one way).

Nobody believed that 8 months after the operation she would live a normal, full life.

On September 25, 1995, during a face-to-face meeting with Grigori Petrovich Grabovoi, I asked him for the full restoration of my son R.A., who was born on August 22, 1950 and died on June 16, 1995. My son was born in Moscow and also died in Moscow. Before turning to G.P. Grabovoi, I was in complete despair - I had a heart attack. After turning to G.P. Grabovoi, somewhere in early October 1995, I began to have hope for my son's return. I began to feel his presence (spiritual) in the house.

I went to the cemetery and, approaching my son's grave, I saw that a deep crack ran through the entire grave, and in the middle a hole had formed as if earth had been ejected from the inside.

Somewhere after midnight I clearly saw (with my eyes closed) how two white cords stretched from my chest to my son's grave, to the hole that had formed on it, and then I sort of pulled these cords towards myself, feeling the heaviness. All this lasted for several seconds. My son is buried in the Vostryakovskoye Cemetery in

Moscow, and my vision of his grave was at the level of the window of my apartment, which is on the 7th floor.

When I turned to Grabovoi G.P. with a request to reinstate my son R.A., I shared this with my son's ex-wife Kozlova Tatyana Ivanovna, with whom we remained on friendly terms after their divorce, she was present at his funeral. Kozlova Tatyana Ivanovna.

Later, during our conversations from October to February, Kozlova T.I. told me several times that she often met people on the streets of Kaliningrad and Moscow who looked like my son R.A.

In early February 1996, she was traveling on the Yantar train from Moscow to Kaliningrad, and in the compartment of the train with her was a man who looked very much like my son R.A. Similar in appearance, manners, behavior, gestures, gaze, but somehow detached, lost. He was traveling with a man who seemed to be accompanying him, controlling him, but at the same time never called him by name. Kozlova T.I. was surprised when my son R.A., upon seeing the money (1 thousand rubles of the new model), expressed obvious ignorance of this money.

From December 1975 to October 1982, I was married to R.A. After
the divorce from R.A., I remained on friendly terms with his mother,
Emilia Aleksandrovna Rusanova. During a meeting with her on
September 26, 1995, she, who was born in the Moscow region, told
me that she had approached Grigory Petrovich Grabovoi with a
request to reinstate her son R.A., who was born in Moscow on August
22, 1950. According to the death certificate, he died on June 16,
1995 in Moscow. After that, knowing that Grigori Petrovich Grabovoi
was working to restore R.A., I began to observe people on the street
from October 1995 to February 1996 who looked like R.A., and during
a trip to the city of Kaliningrad in the Kaliningrad region, a man was
riding in a compartment with me, and when I looked at him, I had
the impression that

the opinion that he was pulled out from the other world. This man who entered the compartment corresponded to R. A. born in 1950 according to the following criteria: hair color, eye color, appearance and oval of the face. The behavior of the man who entered the compartment corresponded to the behavior of R. A. At the same time, the character traits also corresponded, he had the same habits (silence, passion for reading - he spent most of the time reading the newspaper).

The person accompanying him was a man of average height, who during the trip never called him by name. And when this man showed the money, the corresponding R. person was surprised to see 1000 rubles of the new model, to which the person accompanying him explained to him that these were new model money. It seemed that he (the man accompanying him) had been cut off from real life for some time , but probably retained his professional skills, since the man accompanying him said that they were driving cars.

The above-described meeting took place on 02.02.1996 during my trip on the Moscow-Kaliningrad route on the Yantar train. During a telephone conversation in May 1996, R.

STATEMENT

on establishing the fact of recognition

Grabovoi Grigory Petrovich

capable of restoring a person after biological death

Name of document, series, number, by whom and when the document was issued: I have an identity document: passport VI -MЮ No. 736302.

In connection with the fact that I contacted Grigory Petrovich Grabovoi, born on November 14, 1963 in the village of Kirovsky, Kirovsky district, Chimkent region, Kazakh SSR (and having a birth certificate series II - OG No. 463794, passport series III -OG No. 586058, issued on 01.02.1980) 07.01.1998 in Moscow on the occasion of the death of O.

I declare that Grigori Petrovich Grabovoi really restored O.'s vital functions after I informed him about this issue during the period from 11:15 p.m. on January 7, 1998 to 4:15 p.m. on January 8, 1998.

The proof of O.'s death is the statement of her husband E., based on the doctors' conclusion of 01/07/1998. The confirmation of the fact of O.'s recovery of life after the session conducted remotely by Grigory Petrovich Grabovoi over 17 hours is that I personally spoke with O. at 16:15 on 01/08/1998, as well as the statement of her husband E.

Other methods of O.'s recovery, except for intensive distant extrasensory influence carried out by Grigori Petrovich Grabovoi, were not used.

Please certify my application on the basis of documents proving my identity and on the basis of the above evidence.
