

GRIGORY GRABOVOY
The Doctrine of the Resurrection
**Fundamental Laws principles
and methods of resurrecting people in the Infinite Life**
(2)
17.09.2002

The next chapter is called

principles of resurrection of people in the Infinite Life

when we consider even the name itself
what is this
principles of resurrection of people in eternal life
then here a certain factor is that
that we are talking about people in the Infinite Life

i.e. we look at them like this
as on people in endless life

and in connection with this we see them this way
and if we see them like this
then first of all, that's how it is
secondly, we define them this way

and that's when we talk
about the principles of resurrection of people
here the structure is defining in these principles
is that we must create
precisely the principled positions
concerning, well, this situation
i.e. this phenomenon

and in connection with this
principles they are implemented like this
what if you know, for example, some fundamental positions
then you can generally speaking how to define your point of view
somehow take into account [...]

In this chapter you need to pay attention
that the principles have a multi-vector nature
they can change

in connection with this the name
the same name of the principle
in fact, it can lead to that
that you can have different technologies
if you change your position of consideration
of this principle

's why when will you work
precisely with the information of principles
treat this as much as possible
well , it 's all the same to vector technology
it depends on your point of view

if you are on the same page
then the principle works, for example, in a certain way
if on another
then it can work in a different way

in accordance with this the principle is as follows

when it comes to resurrection into eternal life
you define the presence parameters
and these parameters are multifactorial
in principle it really is so

because we are considering an infinite system
and in connection with this we have many factors
and to use this principle
we need to highlight in a multifactorial system
it turns out to be some kind of unified system
which can narrow down the multifactoriality
to the level of operation of the principle

i.e. why do we need a principle
needed to use for work

here from the point of view of fundamental Laws
highlighting the uniqueness of multifactorial
comes down to the following principle

What
unified system

this is not a fundamental system for general connections
truly united can be autonomous
but at the same time
universal system
can be the principle of development of a unified system

when we consider such a situation
then we see as if there is a single, single action
is located as if in the external
more let's say in the sphere of management

and although we have multifactoriality
but here is the principle
gives a kind of, let's say, slightly disunited system
inside a seemingly external system
which still controls
there it controls in terms of presence
what is presence

the next principle is this
What
presence of controls
in your Consciousness
denotes the presence of the Creator
in control action
and in the events themselves

the principle is very clear
and he talks about it
What
initially the Creator is everywhere present
exists in events too

the next principle is this
What
when you see
management is being carried out
and at a considerable distance
from you
or physically far away
or by time
then you see
that the management had taken place earlier

and from the point of view of infinite life
it is clear that management depends on that
what is the control speed
i.e. you first diagnose
somewhere in some space
control

from the point of view of infinite life
difference
i.e. you can just look there first
and see that it happened
and then make the management

and this
action before action
speaks about that
that there is a principle of universality of actions

it is based on that
that we see the universality of action
as an act of the Creator
coming from the One Creator

but also the action of the One Creator
this is a universal single action

those. everything is in the Creator

and acting as the Creator
you can quite fundamentally
describe any control position
for this you just need to know the fundamental systems

and in this regard when we speak
about the level of general management
we can have a control vector like this
what is in this vector
the principle can be made immutable

i.e. if we take the control vector
make it Infinite ^{yes}
in different directions in different meanings, etc.
then the principle can be made immutable

this one ^{is kind of} unchangeable
from the point of view of the management objective

fixed principle it means that
what when you do for example fixation
for the purpose of management
you define the fundamental management positions
i.e. where will you manage
what are you going to do

from the point of view of resurrection
there is a principle of resurrection
based on that
that universal action
this is the action of resurrection
but aimed at development
fundamental systems of life

i.e. you simultaneously give knowledge to everyone

and the principle of managing infinite life
consists in the fact that
What
management of the Infinite Future
this is the composition of the past

principle of past management
consists in the fact that
that infinity is in the future
contains a part of the past
in the form of fundamental systems
logically even this is understandable

when you talk about that
how is this SO neutral OR something?
and the dynamic element multi-vector as a principle
use for specific resurrection purposes
get a completely static system

then you should see
that any principle
this is a reflection of the fundamental Laws

i.e. you look through the principle
on the fundamental meaning of management

its transcription through the principle

gives the opportunity to control by and large
in a precise coordinate system

therefore the light of the fundamental system is as if disunited
multifaceted
where is the light that has
different functional meanings different facets there
and can be very dynamic and mobile
change your coordinate system

this light is the statics of a dynamic system
from the point of view of infinite life

therefore the principles of resurrection in eternal life
this is the statics of the primary level of Perception
which helps to fix
in the first area of Perception
some action

and in connection with this
from the point of view of fixing the action
leading to resurrection
there are a number of special principles

for example if we want to get
as if a fundamental aspect
in understanding and working principles in endless development
then in endless development there is a dynamic system
it is clear that the light of the principle can have changes
even in general, in essence of the principle

i.e. movement towards the essence of the principle
this is movement in an infinite system
and therefore the light of principle
may have a multifactorial nature, i.e. knowledge
i.e. you can take knowledge
from the elements of the principle
but at the same time this knowledge can be like this
that they are like guiding knowledge
or fixing knowledge
or knowledge of functional development, for example

but at the same time the fundamental Law
which you know there is one
it gives external space

in relation to principles

from this point of view
when we talk about special principles

there is a principle that states that
What
any special systems
in the fundamental aspects of understanding phenomena
based on that
something you can always keep in mind
the existence of this fundamental system
but at the same time use
only the technology of the fundamental Law

and when you look
Well, let's say you're walking down the street
there is some big city there, for example
in principle it is understood
for example, in this city we go this is a city
the principle of a kind of city

but from the point of view of movement even
Well like elementary systems of movement
here it is important to be aware of yourself
i.e. fundamentalism in action
be present in every specific action
what I was talking about on the fundamental Laws

and that's why it turns out
that here is the light of fundamental systems
as an external coordinate system
this is dynamic light after all
which changes
depending on your movement

and that's when we talk about the next principle
which states that
What
you have fundamental aspects of development such
What
parameters of your development
are defined primarily in you

then it is clear that when we speak

about the Divine essence of development
then the principle of action, *for example*, means as the Creator
in endless development

it lies in the fact that you can see yourself
in the aspect of precisely this primary
i.e. Divine light

and consider that yes
basically, that's how you're developed

and in connection with this it turns out
that since you are so developed you have technology
i.e. it is a certain form
which gives an external glow

this development *means* technology
could you *kind of* spread it
to the level of infinity
then you must make the principle fixed
which gives technological efficiency
in the use of even generalized systems
such as *for example* the principle

and therefore when we do set out
fundamental *thoughts*
or fundamental systems
we are talking about the fact that these systems
must be fixed
and provide technological advancement

therefore the technological use of principles
this is a special task
so it also relates to the system of principles

and the following principle has the following content

when you look at resurrection technology
and implement it
how the Creator works
then you have a multi-level, multi-natural system
own Consciousness
ready and able
to realize the goal, *for example*, resurrection

what is said here is what is really

You work in a multifaceted environment.

and therefore in the same environment
contains quite a lot of elements
which are aimed at that
to implement management
high quality and correct
and that's why we get there
technological principle

the next principle is this
when you see the resurrection
in a version distant from oneself
from the point of view of space
well, i.e. not very close to you
then the resurrection is realized infinitely

the principle is that
that once realized resurrection
continues to exist indefinitely

and why exactly do we need to talk about it?
which is not very close ^{yes}
because in Consciousness the concept of "not very close"
means development
and development is always infinite
if it's very close it's static

the next principle is this
What
you can resurrect
acting on behalf of the resurrected

it consists of this principle that
this principle
that when you consider infinite life
here the name of the resurrected one has infinite development

and therefore intersects with information
naturally in the infinite plan of events

and acting through events
you [...] act through his name
and this name is the essence of the resurrected
as I say
or resurrected

for example, an individual characteristic

so now I have pronounced the word "resurrected"
came to this level
what is it originally from the point of view of infinite life
everything is there anyway

therefore, "resurrected" as such is this concept
it's just the elimination phase
as if to a more open level of the social system
this person
i.e. as such
since he is always there
it's just a matter of breeding

and therefore there is
also a number of fundamental features

than for example if we say simply
as about resurrection
for example, from the point of view of the principles of work through
Consciousness

The features are as follows
that the principle of prolongation of your action
into infinity
any action is truly infinite

it turns out
you wanted to go there well for example, find and bring a person
via [...] login status
here in social
i.e. having defined a goal for it

you immediately make Infinite
actions both yours and his

these actions then begin to determine the future
to participate in all the Infinite processes of life
and then you have it turns out that it is enough
in general, a specific system for implementing your tasks
which speaks about that
what does a single goal in resurrection mean
i.e. in the removal of this person
as if into the current Reality
this goal exists infinitely

and from this follows the following principle

What

any level of goal
is an endless goal

that's why creative systems
they work and gain, *yes*, usually development
destructive ones usually have a final element

moreover
destructive ones can lead to self-destruction
there are destructive, *there are* aggressive states *there yes*
bombs explode etc.

if we are from the point of view of the fundamental Laws of the World
let's look at the principles *then*
namely resurrection into eternal life
we'll see here
that we have a very simple system of characteristics
in terms of knowing infinite life
if we are calm and balanced
from the point of view of control of both the past and the future
we look at Reality

this system of principles is like this
principle of Reality management
from the point of view of movement towards peace

it is very simple, i.e. here is your calm state
you need to move towards it
in motion you capture

since all movements are Infinite

you definitely capture that too
who do you want to resurrect
and it is right next to you
already on the move
the movement is endless

next principle
the principle of the Creator's action
in your unique and universal action
aimed at that
how do you perceive yourself

through your next action

it consists of the following
what is really in the next act
You feel yourself and know what will happen
a second passed ^{here} or a moment there
you know what it is

i.e. you know before that
how did this second go
absolute knowledge

and here is the principle of absolutization
it leads to that
that you find yourself calmly

i.e. you actually find yourself

if we proceed from this system
then here is the principle of self-discovery
it consists of the following
What
you always find yourself you will always find yourself
in endless life
you find yourself first and you will find yourself

what you should take and distribute
this is for everyone
including the one you want to resurrect
no problem, it will just act the same way
he will find himself and manifest himself ^{yes}
i.e. he will come

the next level is that
that any fundamental development systems
in ^{that means in} the incarnation of man
in his actions in his systems
these are systems primarily related to it
in his connection with the Creator

The truth lies in the Creator

and therefore acting as the Creator
you can see the basic systems
which exactly correlates
or directly relates to the Creator

you see the structure of the Soul
see your Soul
and realize the tasks of your Soul

those. implementation according to the tasks of the Soul
this is the connection of the Soul
everything external and everything internal
everything that you perceive as "everything"

that's exactly it
but not from the point of view of individual Perception
and everything from the point of view of the logic of Perception

that's when you look at everything
from the point of view of the logic of Perception
you see that you are coming
to the primary meaning of oneself

your primary meaning
it is you who are always Eternal Infinite

and from here comes the principle of Eternity of your actions
in endless life
it is based on that
What
you are Eternal because
that you are Infinite

and the factor of Eternity as a local
i.e. partial system of infinity
manifests itself in that
that the Infinite Light gives your reproduction

i.e. it turns out that you were created exactly like this
that you are Infinite

if you take and build
for example, just a graph of a function
walking through the Infinite Light
take a sheet of paper for example
say this is the point
this is Infinite for example the level of light
and set the task
find yourself
just set the task

you will see yourself immediately

so you revealed yourself
you found
and technologically what difference does it make to you?
find anyone else

Next come the principles of determining coordinate systems

the principle is as follows

your coordinates
this is your location
from the point of view of universal Perception and universal connections

logically clear
but when you move on to that
to make logic a controllable quantity
here from the point of view of fundamental Laws
I said everything very simply

Thinking determines Reality

you can only think about that
that your Thinking is your coordinate
then what coordinate do you want to give yourself
that's what you'll give

and in Infinite Development
you can give yourself
only infinite coordinate
according to the Creator's tasks

therefore you are Infinite
because that's who you are

and in accordance with this
light of infinity
that comes from you
this is the universal light

and here is the universal light
where there is the presence and task of the Creator
makes it possible to fundamentally
implement your knowledge
from the point of view of training everyone

there is a transfer of knowledge to everyone

and in connection with this there is the following principle

transmission of knowledge about the resurrection and salvation of the world
and preventing possible global catastrophes
this is the transfer of one's own knowledge
based on the knowledge of the Creator

when you look at this principle
you see the sprouts of your own knowledge
but after all, the element of knowledge itself
it is still the knowledge of the Creator

hence
you are always in contact with him
i.e. you always learn from Him

and the only question is
how to technologically identify
this is some kind of optical glow
which speaks about that
and in general how to study
i.e. how to take for example a pen yes
what to write or what to think

when we talk about management
Of course we are talking about the work of our own Perception

in this regard, the following principle exists

own perception
this is an element of one's own development
prolonged into infinity
which starts at minus infinity
in the past

it's clear that you are here now
get in touch with the past
and your Perception of course touches
but you are the infinite future

as I said it is technologically quite simple
the main thing is to know the basic actions there
type of physical exercise

produce by self-healing
on management and prolongation in fact
at well as if in correct execution
there are no logical restrictions
[...] when the task of universal Salvation is at hand

Well and at the same time it is natural
as I just explained earlier
in tasks for example, even for equipment diagnostics
it manifests itself very clearly
i.e. in the Salvation of people, etc.

that's why here goes
from minus-infinity from the past
light to you
says that this light is very controllable

i.e. you can do the management
because firstly the Infinite Circle is going on
and when the Infinite Circle passes
this light
you are naturally for Infinite time
develop management techniques
in the past for example
i.e. there are no logical problems here

due to this
there is the following principle
What
when the resurrected one manifests
from his infinite level of being
then you have an infinite spectrum of events
in it alone

if we combine
apply an effort of will to, for example , that
what i said in this lecture today
and connect
in the essence of its Perception
then that's how it is
this principle is what it is

when I said that
that the multi-vector nature of fundamental systems
it determines the current path
i.e. after some time

the principles may be completely different
as if completely different
containing, for example, the following development structure

but at the same time the current principle
can be filled with future data
and get control
due to, for example, the principles expressed now
which if we have completely different principles
i.e. another vector is simply
either from the past or from the future
a completely different vector going at the current time

it turns out that it is the same as on the coordinate axis
minus is a completely different system than plus

there is a principle of unification
which speaks about that
What
any fundamental systems
can be combined
in a fundamental sense
their applied significance

when do you start
choose a point of view
and apply practical values
then they work functionally
and in this the structure is somehow consistent
property of the principle
it's like a certain environment that can be applied
depending on your development

i.e. to put your own meaning into it
how to fill out a form there
and you can have targeted development
having a specific task of reform here

Well, the analogy, for example, can be very simple
with a form that is filled in with something
and are used for different purposes
for example, you can fill up your gas tank there for example there is gasoline
and drive in different directions

that's when you look at the structure of the principle
from this position

you see that the fundamental systems
they provide a fairly multifactorial level

and here it is necessary
monitor the legislative level
i.e. to track the fundamental Laws of Reality
Fundamental Laws of Resurrection
precisely in the Infinite Life

when you have data about the fundamental Laws
then the principle works exactly in that direction
in which you need

therefore we can talk about that
what are the fundamental systems
this is useful this is good
in terms of application
or there is elemental interval use
but definitely if you see
that we are talking about general coordinates
keep in mind the fundamental Laws

there are here
certain principles of communication
the principles themselves
with the fundamental Laws of Reality
with the fundamental Laws of the World
with the fundamental laws of the Creator

and these principles are that
what do you see how fundamentally e
fundamental laws
define fundamental positions

so here is the formulation of the principle in this case
next

the fundamental positions have been defined
from the point of view of your personal fundamentalism
i.e. you are the fundamental system
you are the person
located, well , as it were, at the deepest level
fundamental manifestation of the World

you are manifested
i.e. you act, you are active
and from this point of view
considering the fundamental Laws
you will be quite certain
application of local principles
where can they be found ?
and what will be their, well , actions

because it is important to us as if in a generalized characteristic
so, well, precisely in the general characteristics
which arise from principles
find some action in endless life

because principles are one thing
emanating from the work of Consciousness
then it's a different matter when
namely [...] for example about Eternal life

but if we are talking about that
What
a person already exists always
then it is a completely different value

and therefore from this point of view
the fundamental systems are completely different

therefore, for example , in Eternal Life
these are some principles, for example, resurrection
and from the point of view of Infinite life
these are completely different systems

because in principle the tasks are actually different

in one case
it is necessary as if with effort
and a reference point for Consciousness
that's if we're talking about Eternal Life
as if to a static elemental system of Infinite life
rely on the concept of "Eternity"

Eternity has, as it were, the characteristics of prolongation
to the level, well, for example, where it started
when [...] the resurrection will happen
and we rely more on the local system

when we talk about Infinite Life
First of all, we are there ourselves
and just technology
in principle, it's completely different here

if we are talking about Eternal life and resurrection
according to technology, for example, Eternal Life
then we need to build create
as I said about that city
which, for example, must first be created
then enter it
and in general even create a path from it
if you want to go out

and in the Infinite Life all this is there

this is because
that the Creator originally exists
and that means everything needs to be done to Him

for the Creator it is really the same
for Him all objects of information
have the same meaning
He created everything

and in connection with this it turns out
that the principles, for example, from the point of view of the Infinite Life
they have a completely different nature

and they are aimed at that
to identify i.e. coordinately identify

and only when you have already identified
then understand

Well , how can we take this as a fact?
that revelation is the accomplishment of an action

and naturally it is much more effective
and much, well, in general, simpler

It's one thing to create a system to create a system
due to the rigid support systems of the points there
it's another matter to take and still just
find already Eternally well as in Infinitely existing
Eternity as an element of Infinity

so when we look at this position
there is the following principle
What
Revealing the resurrected
this is a directed action
to the inter-coordinate joint coordinate system

do you really first [...] know where you are
and identify in accordance with yourself
its coordinate system

and this revelation is already a name
because individual knowledge he knows himself
because if we [...]

therefore considering the principle of identification
we can say that we are talking about that
that you act on your own

principle of coordinate system
consists in the fact that
What
you are the original coordinate
created by the Creator

when you identify
you come to the conclusion that it is
then the question is
in what form is it yes

he is and he goes on target
here are the actions of the Creator, they are aimed at that
that it manifests itself in a certain form
by purpose of presence

therefore, to identify
it is enough to determine the purpose of his presence
Here

Well, for example, it is in that form
in which, for example, he was resurrected earlier, yes
or when it is earlier

as a rule it is always advisable to strive
in this case, as if to a proof of continuity
that there was not really an element of, well, destruction, yes

biological destruction
and what we're talking about is that here he is, well , just
there is a parallelization of the event plan
he is ^{yes}

then it turns out that
the purpose of the presence of the Creator
Well, that's what needs to be taken into account
that the Creator is still everywhere and in everything
this is the direction i.e. learning and development

accordingly it is very simple
and Eternal development Infinite
Eternity is the element of Infinity in this case

from this point of view Eternity is an element of Infinity

because Infinite development
[...]
This needs to be specifically considered here
precisely to determine in detail

therefore the meaning of actions is
is that you are at the Infinite level of development
must define a mutual coordinate system
where are you originally from
a self-reproducing system ^{or something}
where is the personality
this is the principle
individual level of creation itself
with the presence of the Creator
and with the tasks of the Creator

therefore to identify means to determine
tasks of His presence

and when you define the tasks of presence
then there is the following principle
the resurrected always knows
that he needs to be among the living
the only question is for the resurrected one
^{what} how to get to the first level
general purpose tasks of living

well, for example, if a person went into the forest
or was absent for a long time

then here is the connection even to the goals and tasks if there is one
even a little bit if he was absent
he should first look at what has changed here
let's assume that it is an ecological characteristic in general
for example in the city Yes

if she has well, some kind of peculiar smog
he has to adapt to it first
those. general purpose tasks
People first adapt to smog

and therefore there is the following principle

connection with general-purpose tasks
are based on minimal features
first Perception of the resurrected

here he came out of the forest
looks like smog is obvious in such large quantities
if earlier he felt it as if it were just burning
then coming out of the forest
and seeing in a large space in a large field
that it is very dense smog
which, well, actually
at a high level of viewing and area
immediately perceived differently

he must adapt to the goal again
for example, a driver if he drives in this smog
being in the forest in smog is one thing
going out is something else again

therefore there is the following principle
principle of co-development
resurrected
And
external Reality in relation to it
to reveal it in this Reality

the example is again very simple
he must mutually develop why
because it's worth it for him to perceive something
in the world everything changes accordingly
and of course we are talking about co-development

then there is the following principle

What

you can see the resurrected one there

where is the resurrected one, well, there is definitely one, there is definitely one

because if we say

about the hard level of information

i.e. about the hard level of manifestation of Reality

at every point

i.e. Reality is lawful everywhere and always

if you see a resurrected

then this is really so

and that's when you see the resurrected

at some specific point then

or in some specific place

then you see first of all

why is he here

and if you are at the level for example as if goals and objectives

you are not connecting with him at this time

he may appear and go about his goals and objectives

so in order to return the resurrected

We now even omit the word "resurrect"

because that's what we're talking about

What

he's always there

and therefore return

well, how to return the one who is always there

and he may have his own goals and objectives

therefore there is the following principle

the principle is based on that

What

there must be simultaneous goals

the one who resurrects

and who is resurrected

because in general it's just logically very simple and clear

Why

therefore, to make the resurrection

I'm already using a somewhat outdated word, it turns out

to simply bring a person back to Reality

connect with you

that means you should be like in telepathy
or there, as it were, internally on a spiritual basis
arrange
what common tasks do you do
what [...] to click seeds or do you need what
to go somewhere

i.e. you need to agree on specific actions
at least at the level of spiritual attitude

therefore, the detection technology
the one who is always there
it consists in the fact that you must first of all
as you plan to meet the person

Here for example you are walking on the sidewalk
even if you know him you should find him
because he has his own business

and if you think about this situation
that's a household situation
but you can say hello of course yes
look at each other:
if it's far away it might even be awkward to say hello
just to see each other, to pass by

but he goes about his business
you are on your own
The world is very rigid in this regard.

if we are looking at the principles
from the point of view of Infinite Life
it's about him walking down that road
invite
that you have to run across the street first
but you won't be running across cars there

or even if you pass
and he has very concentrated his own affairs
even sometimes you for example won't be able to distract him there yes
if there is no one

and therefore it turns out that
because everyone is free
original principle

everyone is absolutely free

as free as possible
focused on his business
you can't take it there, shake it by the hand
need to find a transition

and in connection with this there is
the principle of transition through contact with the resurrected
it consists of the following

What

we are here in this case
We consider the concept of "resurrected"
like well resurrected in this Reality
but which is always there

i.e. we change the meaning of the word "resurrected"
because as we have now come to the conclusion
that this turns out to be an outdated concept

What

he is always there

and ^{as if} in our Consciousness we restore
i.e. we resurrect in ourselves ^{and} in Consciousness

and it turns out that
but in reality we reveal
from the point of view of the true tasks of the Creator
we are just identifying

then the goals are similar to the goals of the Creator ^{yes}

Salvation of all

Eternal development

next action

this is a dynamic action

i.e. each subsequent action
this is an action directed towards Infinity

and in connection with this it turns out
that he has to do something
aimed at the Infinity of development
you are in the same position in fact

i.e. the difference between
whoever ^{gets it, well,} reveals ^{it and} goes to the meeting

and to those who are in that position
what he just needs is just
cross paths with you

consists only in that
what for your Perception
or there for the collective Consciousness yes
which were involved in this
he is kind of excluded for a while for a number of reasons
Well, what is called something there
elements of biological destruction, for example

but how do we understand it here?
that the fact of destruction of the so-called
this is also external information

it is possible to identify a system where there is no destruction
what difference does it make to you in the end
there is even a method for treating diseases
for example, let's say about treatment there
well, the same processes of the fourth stage of cancer
I often just do it
I identify a normal system
that's all

and it naturally exists even logically
after all, health is just a normal system

and therefore the concept of "destruction"
this is a rather conditional concept
but in fact it doesn't exist in principle

in essence, if we consider Infinite development
where Infinity is anyway
in systems of complete regeneration and complete reconstruction

then we have , in general, a rather conditional system
it turns out in Perception
it is based only on the current Perception
on which the collective system of Consciousness is built, so to speak
in many ways of course

but for example it doesn't work yet maybe
precisely with the Laws of the fundamental level
Reality Management
with the Laws of Infinite Life

for those who work
with the Laws of Infinite Life
the signs and essence are different

therefore there are principles
which characterize this system

the principle is as follows

the essence of phenomena as well as the signs of phenomena
they are focused
in your action
which unites
With
by the action of the one you identify

really, in essence, if you go to a store for example
and someone is walking nearby, which means you are going to the store after
all

if you do something something else
there you work in completely different directions
then the essence and signs may be different

but there is the following principle
who speaks
What
the essence is always the same
in the elements of Infinite Life
it is expressed in that
that life is infinite
the gist is clear
I just took it and reformulated it and that's why the title
where did i start

that's why it turns out
what if we assume we are moving
in the direction of , let's say, Infinite Life
in essence we are all united

therefore based on the essence
we can always talk and meet

i.e. I am revealing here

structure of the meeting obligation
why should we actually date
because it exists
the principle of ^{mandatory} meeting
in the Infinite number of events indeed
in Endless Events
at least one meeting takes place

secondly, essentially everyone does it
the common cause of Infinite development
and as such there are no limits
there are no fundamental ones

i.e. when you go from the essence
when you look at the principled positions
characterizing a meeting there or the need for a meeting
you understand that in essence there are no problems
in essence

another question is what exists
coordinate ^{as if} mutually controlled multi-purpose system
so that everyone meets
with everyone
i.e. so that there would be a general resurrection
you just need to bring the goal
into one linear system

so when I talk about universal Salvation
on preventing a possible global catastrophe
the point is that this is the overall goal

if only I could get up in the morning
just at least start doing it
and each person
due to the development of one's own Consciousness
the goals will come simply, well, as if into a coherent, such a powerful system
in resonance ^{yes}
the amplitudes will coincide
if we translate it into a wave sign
logical thinking

then in principle there is no disunity of purpose
i.e. not even in essence
the action is again directed at one thing

then it turns out to be a truly universal resurrection

i.e. from the point of view of the logical level of resurrection

it's just that their goals also coincide
those who have not been identified
and in resonance they simply appear
that's all

so it's clear
what if we talk about resurrection
it can be truly universal

if, for example, there is more than fifty percent
they start to think like that and work regularly
everything is already beginning, the general resurrection

Of course, those who go through first
Well, they concentrate technology around themselves more
For example there using applying already
This is exactly the technology I am talking about now
from the point of view of Infinite Life
this is still a different dynamic level
which allows you to move at high speed

and therefore you can, well, let's say it this way
it is quite effective to solve current problems if in the case

well in case you see for example
that the tasks, well, let's say, are not trivial, not trivial, yes
a lot of help comes up
when you look
from the point of view of Infinite Life

because in case
when you work through Consciousness only
and the reference point is, for example, you personally
and knowledge there, for example, is certain
or use universal technologies for control
coming from you

as I explained
light coming from the resurrected
can be very strong
and in general he is free

and that's why it turns out
what to apply more as if quick solutions yes

apply and quickly navigate the situation
this is a different task
than now when you lean on it
on an already existing Reality
What
all are Infinite

then it turns out
that you don't first build a bridge and soil under yourself
and you are already standing
at the Infinite level of development
then the passage is much easier

therefore the next principle is
What
you must always act
by structure
a universal understanding of oneself

i.e. you must be aware
that you don't have to build Reality there to build this bridge
everything already exists and everything functions precisely for this purpose
so that there is unity of purpose
Togo
who is revealed
from the point of view of collective Consciousness
there is also such a sign as resurrection yes

it turns out that resurrection is only
element of collective Consciousness
are you really revealing
you just meet someone who is always there

and when i said
what do you mean you reveal to yourself
well, special purposes after all
i.e. you don't just meet there
and you still find out
what needs to be done to get to know others there and what
well, exactly tasks, goals, objectives

by the way, here
and there is an integral unifying feature
which always works

that's the goal

Well, who do you want to identify and meet with?

she is the same

this is Infinite development

you also have this goal, you know about it

and here is a sign of knowledge, the connection of knowledge

this is integration

this is a directed action

first of all, to Infinite Life

and secondly, it makes the meeting much easier

even if it's not fifty percent, for example

they are doing this now

if there is a structure

when you can do it personally

even if the collective Consciousness

for example, for now he's just sort of doing this

or from time to time solving seemingly current tasks

without considering the essence of development, let's assume

from this point of view

i.e. it turns out

what do you have under the law

about individual Perception

about individual action

a very strong characterization of personal action

and here there is the following principle

your personal individual action

just as comprehensive

and it covers the level of general tasks to such an extent

and corresponds

as far as it is necessary for Infinite life

and as much as it can do

collective consciousness

be careful here

you are able to do it yourself , i.e. in the singular

all the same

what if everyone united

and set this task and went towards this task

therefore, we must keep in mind here

next principle

What

your own development

gives that light from the Creator

which determines

for the collective Consciousness

Endless development

that's how I said it

even if you imagine it in your mind

it already exists

The world is very rigid.

and it cannot be represented

which does not exist

and in connection with this there is such a concept

as "defining Reality"

she is this system

built on the fundamental Laws of the World

and is fundamentally assessed in that

what are you doing future management

from the point of view of general principles

for example, the development of education

and at the same time your personal development

this is the Infinite development

i.e. because as I said

any impulse goes to Infinity

once you achieve the result

almost everyone has it instantly

another question is how much they will accept it, that means quickly yes

they will eventually accept it anyway

over time

but here there is the following educational principle

What

transfer of information to everyone

those. knowledge transfer for all

in terms of your personal achievement

this is the task of the universality of your knowledge

it's clear, it's enough just to consider

the seed of universal knowledge
in you
what problems they become clear to everyone
This knowledge must be considered
only from the point of view of universality

once you understand it
by the generality of the glow
as I explained in the fundamental Laws
so today
it turns out that you pass it on to everyone anyway

therefore the following principle
consists in the fact that

to reveal the universality of the knowledge you have achieved
the task of the Eternal

and as a consequence
It is necessary to consider here further
The Eternal as a Local Structure
move on to Infinite Life

and when we look at this system
let's say with general vision yes

we get a lot of points of view
we need to come back here
on individual perception
which is in this case
expression of the universal
you do it for everyone

when you do for everyone
in every personal action
then the principle is as follows

your personal action
aimed at the salvation of all
to achieve results for all
this is the action of everyone
focused on understanding your action

to understand your actions
just look at this
through yourself

how would you look at yourself
to the level of your co-operation
this is what we strive for

how to identify
we need to see co-operation
co-operation that is
Always
everywhere
and it is absolute

and as soon as you come
to this level of co-operation with another
then this revelation is very real
simple task
which is based solely on that

to know this system
to be able to apply it in accordance with the time

because knowledge is one thing
i.e. if we consider
that suppose there is a certain level of knowledge
we have
well we can know
that let's say there is a certain distance yes
such a concept as "distance"
it is possible within a certain time
to cover a certain distance

then to overcome it you need to do something

this is what exists [...] know
but to do this
we need to decide on the time of action

and in connection with this
so that there is no criterion of distance
and there is no criterion for distance
it is enough to know this is already an action
according to fundamental laws

so the fundamental things
here, in principle, they don't really have any significance
because knowledge is action

but the principle imposes prolongation
those. It's like we need to know something else

and so that the structure of the principle
bring under fundamentalism
true Laws of Reality
there is the following principle

fundamental systems of action
in Infinite Development
this is a fundamental level
actually manifested by the Creator
in the organization or reorganization of the system of Perception

reorganization is implied in the plan
well, organizations of a different type

principles are fast and dynamic enough
can be changed in control systems

indeed, there used to be a cart there, for example
now the car
another principle of management
or an airplane
i.e. the principles are different but the movement is the same
and it turns out that our task now is
determine how
from the point of view of fundamental Laws
means to do it this way
so that any principles that would not manifest themselves
from the point of view of fundamental Laws
always worked towards the goal
by purpose, for example, identification
Generally speaking, the purpose of the meeting is the same

i.e. in this case we are talking about
that we have a task to meet
therefore this is a sign of the task

and by and large
the tasks are defined by the Creator
why is it in everyone's soul
a specific meeting mechanism has been established
Well, basically with any person

in essence, everyone has

there is a mechanism for meeting with any person
because the light of the Creator
common to all
it's the same light

and therefore we naturally know any other
we know how to come to an agreement
even at any level of combination of events

because the event is fundamental yes often
or is there a time aspect there?
it's like just a fundamental level
they just may have different natures
different fundamental level

and then it turns out that when I say
about different fundamental levels

this is meant about different positions
from the point of view of, for example, Perception

because if we talk about the Infinite level
about Infinite Life
about the Eternal level of development
this is one, one, as it were, layer in the management of Perception
that's what I'm talking about now

if we stand on the positions of others for example
in the positions of the Creator
and action as the Creator
this is a layer that differs in terms
and the creation itself
and actions in creation

but in the Infinite Life
it will no longer be fundamentally different
because the Creator is already present in the Infinite Life

it turns out there are principles
which kind of correlate and so, well as if they define
certain forms as it were
which, for example, can last for quite a long time
at least the necessary time to work there
from the point of view of a so-called one-vector system

but if we change our point of view

then the principles change again

and that's when we talk about it
that we need to develop for example
towards universal development
having well for example, there is the structure of the fundamental Laws
having personal actions there having tasks

then I think that these are the fundamental systems
they can work well as if in each case so
how are they defined for example
at the moment of their reproduction

and they can also work with other vectors
well if you fill them with other content later

so from the point of view of all the same
these are exactly the actions
and characteristics of action

so there is a level
methods of resurrection in the Infinite Life
where the action positions are specifically defined

those. namely factualization of action
it is aimed at that
that you have practically fundamental Laws
i.e. the fundamentalism of these Laws is manifested in that
that in action you are in methodological action
have a demonstrated result
which actually means
in general, the function of the Law

here at this level you need to be more careful
because methods are a function of the Law
i.e. the function of the fundamental level
i.e. it has a determining value
precisely at the fundamental level

at the moment as a principle
This is a multi-vector system
and being the external level practically
which can change

so i'm moving on now
to the methods of resurrecting people in the Infinite Life
