

GRIGORY GRABOVOY
The Doctrine of the Resurrection
**Fundamental Laws principles
and methods of resurrecting people in the Infinite Life**
(3)
17.09.2002

Thus, from the point of view of application
such technology as
methods of resurrecting people in the Infinite Life
we need to consider it precisely
focus of functionality
fundamental Laws of the World
resurrection of people in the Infinite Life

The methods are as follows

method of definition in the structure of Reality
through indirect but coming from you
Perception

the method consists of
what you must first determine
the structure of real Reality

i.e. the definition of the structure of Reality
consists in the fact that

what are you
Well, when faced with certain information
should consider the issue concerning that
what is this object in front of you
Reality i.e. what kind of Reality

and that's why it's called "mediated"
i.e. you must first consider
the first element of Reality coming to you as if
and then through this element
you have to differentiate
actually the path to management
to this Reality

i.e. it looks like this
What

light coming from you
it is reflected from the external Reality
and here in the reflected element of light
you already find a ready-made management technology

and here the task is precisely that
that when you find actually
ready-made management technology
then in principle why is it already ready
because you already have this knowledge
that's exactly the management
upon meeting with the one you have determined
well, that's exactly the purpose of the meeting

and when we talk about that
that's the definition of the goal yes
this is who you want to meet
i.e. meeting with this person

I'm speaking in general terms for now
although it is meant
meeting with the resurrected actually
as resurrected in the element of Consciousness
and as I said, we are talking about
about meeting with the ever-living

so when we talk about meeting
there is a universal principle
which refers to meeting everyone

and there is an individual principle
which refers to a meeting with that
about whom in the collective Consciousness
there is an opinion about some kind of restructuring
his biological body for example

and therefore here it is necessary to make a transition to methodology
which option do you use?
bye for the meeting for example with people
with ordinary people, acquaintances, relatives, etc.

the same option should be transferred to
it is precisely in quality that it may be closer to the option
this is such a prolonged extrapolation
to the level of meeting with the resurrected
in the Infinite Life

that's why it's necessary here

First of all, consider the sign

means according to which the methodology needs to be implemented

i.e. methods of transferring the actual signs of a meeting

in the usual version with people

to meet the resurrected one in the Infinite Life

and here first of all what matters is that

what as we said

here the concept of "resurrection" is defined

only in the structure of Consciousness

so the task is

this structure

which relates specifically to the principle of, for example, resurrection

isolate this structure

and act as if outside the structure

and just meet with the living

the method is as follows

is formulated in this way

meeting with the living in the Infinite Life

correlates

as if with the principles of resurrection in the Infinite life

just like the level of your Consciousness

determines the level of Thinking

i.e. methods can be decisive

in relation to

to the principles of information implementation

and in this regard, the situation, generally speaking, is as follows

what if we, for example, set a task

namely the application of methods

then the methods should generally be the control system

in this case in relation to generalized structures

and proceed from fundamental structures

the following method is formulated as follows

What

in order to make a meeting with the living

in the Infinite Life

element required
related to the element of resurrection
bring into the investigative structure for the living

it's quite simple
what if for the one living in the Infinite life
for example we are considering his resurrection yes
for example from the point of view of collective Consciousness
as its consequence, i.e. as a product of his Thinking
we bring it into the structure of living things
because we just think it is
the product of his simultaneous Thinking

i.e. we connect at the level of those actions
which isolate the concept
For example there is "biological decay"

the following method is formulated as follows

you perform resurrection actions
only within your Consciousness
but at the same time you reveal the one living in the Infinite Life
at the level of the structure of the development of the Soul

and as a result of this
co-operation with the Creator
is at level
your first impulse of Perception

because from the Creator
there is the first impulse of Perception precisely

and you perceived Him as the Creator
initially

therefore the method says that
What
methodologically you have to determine
the very first impulse for Perception
for example, it already means resurrected in your Consciousness
and the real living Infinitely living

and here is the principle of precisely Infinite life
this is that first light
which comes from the Creator

because there is information of different colors

for example yes to light

light has different characteristics

and here is the Light from the Creator

he has precisely the Light of Infinite Life

therefore it means

the primary impulse is the Infinite Life

in fact, the wording itself even

and so when we apply this method

we are even from in general, the formulations of the system

we have infinite life

next method

is formulated as follows

to find the living in the Infinite Life

it is necessary to determine

place of its implementation

in the system of general communications

and then from any system

go to the place of implementation

the principle is quite simple

in the implementation of this method for example

it consists of the following

what if for example we know the place of implementation

then by investigative connections

we will always go to this place

and as I said according to the fundamental Law

revealing this is already a fact

actually identifying the living

this is a fact from the point of view of the logic of resurrection

next method

is formulated as follows

you view Reality in this way

that Reality shapes

a meeting structure that is as close to you as possible

with the infinitely living

and also determines prolongs

i.e. the future structure of that

that you are the Ever-living One

and here is the concept of "Eternity"
it just comes down to this
precisely to the Infinity of life
because here I showed
the dynamics of the development of Eternity

when we talk about that
that are different concepts
determine
different control principle

then this is exactly the situation
that in the future you can be sure
that you live forever and that you should
act do certain actions
for the Infinite Life just then
when you are at your current level
you're dating that one, well that means who you brought
to the living
well, as if in the collective social status of those
who did not have for example biological decay

and that's why this is the principle
this is also your Infinite Life
from the point of view of application methodology
this technology

the following method is formulated as follows
you have resurrection
within the framework of one's Consciousness such
which reflects the true structure of that
that man lives infinitely

and as a result of this
the resurrection itself
it is a product of realized Thinking

i.e. it is necessary to find those coordinates in Thinking
which have already been implemented
in this method

and in accordance with this
it's just that
Finding the Coordinates of Thinking
where Thinking is already realized

and the resurrected one who is here in the system of Perception
this is the same Eternal Living
Living forever

so when we talk
about this level of Thinking
then first of all we must
here you can see that for example the creation of some element of the body
the person himself
it happens the same way
as a product of his Thinking, among other things

because
after all, a person sees himself
therefore he thinks
for example about exposed body parts
or he can perceive in sensations
there are internal parts of the body for example
if he does not apply the analysis suppose
through open Perception
what is related to vision controls
for example, spiritual illumination, spiritual vision

then it turns out that
a person simultaneously builds himself

and in connection with this
there is the following method of resurrection
means living forever
through the element of your Thinking

it consists of the following
that you work exactly like that
how a person perceives himself
at the level of your Thinking

as I said
that there are points of interaction for integration
and so when you perceive yourself
at the level of Thinking
look at your hand there
or how you act towards others
then you always see at a certain level
myself

and this is your Perception
represents you with others
by the commonality of the signs there
Well, for example, a person, yes

if we are talking about another object
then we are talking about that
that there is some kind of transition here

so the next method is that
to take these transition levels into account

the method is formulated as follows
What
transition to another information system
is therefore an element of instant detection
living infinitely

all you have to do is just look
from the point of view of transition
because the transition to the living is infinite
this is the revelation
it's quite simple you just need to do it
go to

the following method is formulated as follows

when do you cross over
to the living Infinitely
then the trace of the transition
this is the universal Eternal development
and Endless Life

here is the concept in this case
"The Eternal Development of Infinite Life"
this is an individual feature of Perception

why do i talk about eternity yes

Eternal life or Eternal development
and when I talk about Infinite Life
that is the principle of Infinite life
it becomes decisive in dynamics

and here are the individual levels of your development
here are defined topics

that you are on an individual level
you already know how to build a meeting
with the living Infinitely ^{here}

revealing your knowledge
which is, as I said, decisive
it is enough for you to know
then you can quite actually know
that you have already done it

it starts here now
quite an important level in methodology
in the methods of resurrection of the Infinitely Living
it is based on that
that you apply the power of knowledge in fact

i.e. knowledge is action
this is the accomplishment of the action

and I use the concept here again
"resurrection of the Infinitely Living"
methods of resurrection of Infinite life
where life is a universal system
and at the same time already a static, ^{well, actually,} kind of system
which is formally only
intermediate system of perception
such as [...] resurrection

I am starting to show here precisely the element of knowledge
based ^{, generally speaking,} even on working with words

for example as I said since Infinite life
this person is always there
and therefore he is always alive

then it turns out that it is a resurrection
^{means} or methods of resurrection in the Infinite life
it turns out that this is already a function of Consciousness

i.e. the world is turning upside down
from the point of view of knowledge
this is the power of knowledge that turns the world around
that you have fixed control systems

it is precisely the principle of Infinite Life

in the form of, for example, elements of Thinking
and not reactions of Perception
you have such an element as resurrection

and in connection with this, here are the methods based
precisely on the application of knowledge
it is in this context that knowledge
and even work with words

the method sounds like this

you perceive the opposite
in relation to , well, destruction
the process is thus
that the process exists
in that form of your Consciousness
which is capable of restructuring
this is this kind of destructive process

i.e. this method
he is already close to a certain extent
to the Law of Perception
that Perception always has elements of normalization
from the point of view of ordinary concepts
such as "Endless Life"

therefore, based on this method
it's enough just to get it
remember Norma
Fix the norm
in the control part of Consciousness
in which you have a need
exactly, well, actually, like implementations
for example, meetings with the Infinitely Living

so based on the use of the level of knowledge
is , if you know how to work in fact
with elements of one's own Thinking

then you can own
Quite calm thinking

in a methodological form to bring to that
that after the first Perception of Reality
you go further and find
already in this Reality

certain levels what are they
that by applying the methodology
you can Reality make it like this
exactly the one you need at the right time

there is a principle in the methods used here
based on that
What
fundamental Laws of the World are necessary
apply in this way
so that the identified, i.e. revealed, system of Reality
was manageable

i.e. the meaning here is this
what else needs to be identified correctly
it's one thing to record it at all
from the first impulse

another matter
actually use this impulse
means to identify correctly
at the level of elements, after all, as it were as if Perceptions
including others
when people perceive something in approximately the same way

this is a special task
because if well if there is one goal
then Perception can also be approximately the same

in this regard, when we consider the problem
integration of Perceptions
and the methodology for obtaining information is quite simple
from others
or do we want to make a resurrection method, for example, yes
in Infinite Life very accessible

then we must
first of all, use phraseology like this
so that phraseology works independently even of the wording

for example, I say that this is exactly it
"resurrection methods are still in the Infinite Life"
defines this phrase

in reality, this is what we are talking about
that we are just that

meeting with the Infinitely Living

and yet

I can through this actually, well , that is , as if, an outdated phrase
still work on the purpose of the meeting
with the Ever-living

i.e. the next method is that
so that regardless of the definition of the phrase
we could do the action
aimed at the result of the meeting, for example

so here is the method

What
primary action coming from the Creator
spreads evenly
across all systems
and in any action
you achieve the result

essentially as a result of this method
you can just throw it off correctly
purpose of information
to any point of information
and this goal is still necessary
will come to fruition

and here is the acceleration of this goal
this is, in principle, a fairly specialized task
and it belongs to the following system of methods
so where are management methods used
where knowledge is the determining factor

so here in the system of methods
there are four of them

and the first method is the following

so when you apply
Means Well, the goal of management is this way
that this goal contains time

then to meet with the Infinitely Living
you need to identify
the outer contours of this person

i.e. we are talking about that
that external information is the meeting

because it's clear enough
if you meet someone on the street
then it is enough to understand
that which exists in Consciousness and that
what surrounds this person
and this external environment is also a meeting
you are focusing on the external environment

next element

This is a method of applying the structure of the external environment
in relation to speeding up the actions for the meeting

i.e. it is possible to exit through the external environment
but if you went out for example there, well, the corner of the building
or some kind of pole, car for example Yes
where near which there for example a pole
or near which car
the resurrected one is found
but don't go out to the resurrected one yet

that's in contrast to that
what do you see on the sidewalk
where both a pole and a person are visible at the same time, for example
or machine and man

then here we still need to go
from an external element
to the person himself

here is the method of transition:

What
you fix your attention
as on its optical path actually
as if on the trajectory of development of optics
to the external object
and from an object to a person
who are you dating
but at the same time you don't focus your attention
on the person himself

because in this method
The main thing is the free will of the person you are dating
and you do n't press it

and he just sees the target's trajectory
according to the general goal goes to the point
for example , you concentrate most

the following method is formulated as follows

to meet the Infinitely Living
it is necessary to spread the information
about one's own development to others
Living forever

the principle is very simple
in quantity and in the system so let's say Infinitely living
This method has a simple principle
it appears that well, like this is a characteristic
What
if you as many as possible
you give information
then information by the principle of similarity
gives way

the following method is formulated as follows
What
you have to connect let's say the past

i.e. minus-Infinity
With
future with plus-Infinity
at the reproduction point of the meeting place

this is where the element of creation comes in
meeting places
i.e. you reproduce and, as it were, take rays
from minus-Infinity to plus
close at one point
and get a meeting

and in this case
the meeting may take place
well, almost like instantly in front of you

let's assume if we consider management
not in relation to a person
this type of management

that is, take for example a self-assembled tablecloth, yes
such a simple principle
there is food on the tablecloth for example

then the concept of "food" includes what is known
Well, we know about food
and the fact that it gives an infinite amount of food
in the future
all this is locked in a specific tablecloth with food

and here this principle is very well related
With as if methodologically with this method
aimed at that
so that it would be possible to practically do the management
in relation to
to any information object

because I still give
universal control system

due to this
each of the methods
of course it can be applied to that
to reveal i.e. actually even create
information element
which may not be functional now
i.e. some machines of the future, for example
some situations are objects of the future
if they are not needed now
then using this method
can they be identified
and so that they become Reality here

for example to save from an explosion there
to prevent the nuclear reactor from exploding
enough Norma where there is a new sensor
which allows you to do this
identify
and how to introduce this sensor
which first functionally operates on the reactor
i.e. well, not as a physical thing
and gradually it is invented
they put it in this place
or you can invent and insert it yourself

and therefore the situation in management through these methods
it's quite simple
when you identify you use
it is the principle of Infinity
in any object

so using it
the principle of Infinity in any object

the next method sounds like this

Infinity Line
information coming from the object
leads to that
that the object is individualized

it's really so
if you look at the optics
because light comes from somewhere, which means there is a source
it means he is individualized
this is the place where the Eternal Living One is located

the next method is as follows

when you look at an object of information
and as if you are bringing him closer to you internally
for example, at the level of spiritual closeness
then you create an object at that point
where did you start to bring it closer

and here it arises again
element of creation as if creation from above
i.e. by external control

so here is the creation
from the point of view of Eternal development
consists in the fact that
that you first go all the way
to create a meeting place
and you start to bring it closer to you
i.e. where you started to zoom in
this is this point

i.e., as if the principle of using knowledge
which you have in your Soul
you still know that [...]

so you just have to set the task
start doing
without emphasizing the task of where to look
you find

the following method is formulated as follows

when do you work
with external elements of Reality
well, like the animal world, for example , the plant world
then the identification of normalized systems as external
and which relate to the concept of "life"
this is the principle of your own development

and when we consider this method
that's true
you develop in order to create around you
life
i.e. as the Creator does

and therefore there can be no situations for you there
when there is another concept
than the concept there of "Infinite Life"

i.e. you naturally do exactly that
and now it is already embedded in the Soul that this is natural
i.e. you don't even need to learn it

when you do this for example
you achieve the same goal again
well, like the fields of their action
enter everything into the structure and it works
permanent life Eternal Infinite life
then there are no problems

but simply in its impulse
take action aimed at implementation
i.e. the realization is already in you
you are simply projecting the event in front of you

here is the next method
then it is formulated as follows

event
which is in front of you

this is an event
which is described by you
but is instantly transmitted to others

i.e. you can describe and convey
and on the basis of knowledge
knowledge is action

the event described
this is actually an action

and when do you pass it on to others
then the other has a common goal
and for example it happens and there are no questions

so these are the methods that I am using now
up to the current phrase I stated
these are methods that are related to a greater extent
with a search or assignment system there management

and there are methods
which relate to principles as if so
that the methods always work
even when changing, for example , fundamental systems

and if we denote this method
this is like a variant of absolutized methods
then in this case
there should be practically no Laws there
with the fundamental Laws of the World
with fundamental Laws
resurrection of people in the Infinite Life

and here is the glow coming from your actions
in this case as I said
preferably if necessary
proceed immediately
from the point of view
fundamental organization of the World

this is where it's important in these next methods
consider precisely the fundamentalism of the structure of the World
then the methods will be clear
in even deeper terms
than what is said in words

this is where the principle begins
when words can actually convey control
but as I said
the principle is an orienting system
and we can use
methodological basis for that
to see a deeper meaning
describing something in words

and then described by actions
described for example by the structure of physical Reality there
contains the action we need
deeper meaning deeper action
containing Infinite Life

in this regard, the situation here is as follows
that when we have such an approach
based on the fundamentalism of the Laws of the World
then we have the following system of methods

so the method is as follows

when you consider the action methodological
based on that
that you are dating for example
with one's own kind, for example with a person
then the Infinity of his life
Infinity in development
this is what is in you
and you can convey it to him exactly

i.e. accuracy is what you have for example normal health
so therefore he immediately has normal health

the second method is this
What
when you consider
Infinite system of life
Endless life
as an element of your Perception
then you become Infinitely Living

and indeed
by the system of general connections
it is enough to record it
and you are already becoming such a person and [...] such a person

and at the same time you can completely agree with this point of view
just develop
and thus transmit information
to others

the following method is formulated as follows
What
when you transmit information
about creative development
or about Infinite Development
to others
you actually build Reality like this
that Reality becomes manageable
in relation to the problem of Infinite development

i.e. you build this system for yourself
and this system is spreading
to Endless Connections
and then you have it in Reality

because besides what you find
you still have to go the opposite way
those. still need to create
if possible, also from my side

thus closing the two levels
i.e. search engine
and the creation system
based on fundamental laws
you get actually
centralized so let's say glow
in relation to general goals

and get management methods
which are based on that
so that you can in the Infinite Life
get
actually a specific system
which would be determined
how is your technology system

those. simple system
which you understand very simply
and you apply it
based on fundamental laws

Thus
a technologically simple system to use
it is based on the analysis of generalization
and on the use of the fundamental Laws of the World

and at the same time this system
it should be applicable
in any simple action

therefore the following methods
they should be simple enough

in application
and in understanding

i.e. here I am combining this task
to make understanding simple
you just need to understand these methods

because we are managers
we can set a task
including the concept of "understanding"

i.e. you just have to understand
then you just need to understand

in this regard, the following methods
should be understood exactly like this
and we consider them as simple

a method of using tree leaves for that purpose
to reveal the Infinite structure of the foliage itself
and then transfer to a meeting with the Infinitely Living

the method is very simple based on that
that the foliage has a kind of contact with the branches
branches enter into a cycle
here you are further cutting out a fragment
relating to , for example, the current cycle
then in relation to the sheet
the tree acts as an infinite segment
because it is the carrier of the sheet itself
and we have a method for finding living

the following method is formulated as follows
What

when we see animals for example dogs
we can
even through animal fur, for example
or is there a bird feather
determine the structure of the object's state
and identify ^{yes}
for example, you can say that "a bird is flying" "a dog is running"

so the method is this
so that very quickly, ^{like} instantly
transfer this recognition situation
to meet the living

and the living one by the way may appear then
^{as if} instantly at once
closer even to teleportation

the next method is
What
any nearest object of Reality
instantly split into two parts
and connect
in my mental representation
while not ^{really} touching it

for example a table
over the table mentally ^{means} to bring out
another table
break
connect

and it turns out
that the table itself does not break
you work in the system of Perception
and this should ^{mean, well, kind of} indifferent
to the table itself

i.e. it is meant
move apart adjacent points of contact ^{for example yes}
i.e. get two table blocks
break so as not to cause breakage

you just get everything
two blocks of the same table
without cutting it mechanically

and this is, as it were, the principle of obtaining
two or more structures
from a single level
this is the development of the next action
so did the Creator
you will see the living Infinitely

the next method is
What
then you must prepare the formulation of this method
in Perception

i.e., in order to formulate a method, for example , in management

can you formulate it
quite diverse for itself

and in this regard the situation here is as follows
that here is the preparation of the formulation of the method
This is the definition of the universalism of the method

because it turns out
that I can take and prepare any formulation
for example, as I want
and this formulation will work for the purpose of management
i.e. after meeting with the living Infinite

then it turns out
that preparation of the formulation
preparing a phrase
or preparation of the management objective
this is the method

so here is the preparation of the formulation of the method
There are also certain methods of preparation
here are three of them

so the first method of preparation is that
that you formulate the goal
for oneself and as if from oneself
simultaneously

second method
What
you formulate the goal as universal
actually for everyone

and the third
you formulate it like this
in relation to whom the wording is applied
he agreed
i.e. this is a technology of exactly this formulation

when you all these methods
as if you would merge them all together into one
then it will be some kind of edging or something

inside means this edging
you can create any control goal
for example, there is a meeting in a specific place, yes

and if you satisfy
three previous methods
which I have named now
you do the management
already independent of circumstances in general

i.e. there is no need to additionally manage events [...]
it's enough to just make the external glow
three methods

then the next method is formulated as follows

when you do management
then all nearby information objects
they participate in this creatively

when you tune into this element
I meant first of all, well, information objects
related there, let's say, to cabinets and chairs
how a person is always initially involved
to walls, etc.

then that's when you tune in to these methods
then you can even build here
a certain system of knowledge there a system of methods
which will allow
from external information objects
having considered their creative constructive meaning
find a meeting place

i.e. for example, the reflection of the wall, yes, there is such a principle

there is a structure , there is a reaction of wood there
find tree background
where can this be done
and where will the meeting take place
just because
what is in the creative channels of the information object
there is a channel out of them, by the way
where is the Eternal Living
passes through this level
and you see it

and the special level method
is the discovery of the Eternal Living
even before he was born

i.e. signs, for example , where a person is located
before conception

when you know the initial signs for example yes
then you always know where a specific person is
and then you know how to get to her

so here are the signs of human excretion
before his conception
before birth
they also come down to methods of selection

the first method in this context is that
i.e. it turns out that it already is
method relating to preconception secretion
What
the closest, as it were, foliage in relation to precisely foliage
in relation to a person
you can
or remember
or see near yourself there look at the tree
this is what characterizes
primary sign of contact
i.e. the combination of the Eternal Living and you

i.e. when you look at the foliage
this is this connection
two connection coordinates
are that which is Eternally Living
he projected
your optical level on the foliage

and you see the same foliage

in this case the vision must be local
those. this is not the whole tree for example
but only a local piece, for example a leaf or a branch
i.e. a small amount

why exactly this sign
because even locally existing life
this is also Infinite Life

so if you look from the side of the Sun, for example
how are they arranged in general
processes of photosynthesis and sunlight

then it can be determined very simply
well, like that the focus of a unique collective Consciousness
which reproduces
the same tree

and here in the coordinate system:

example, you are here here yes
and you need to find for example
where is the unborn where is he
Where
what are the signs of his presence

you need to look at the line configuration
for example there in the building

the second sign is
Configuration of nearby lines
namely lines, i.e. straight lines
there are, for example, the corners of the walls

why exactly like that
i.e. the Earth is considered first
if we go through this method
through, for example, the structure of the approximation of the Eternal Living

then the concept of "Earth" is a form
here are straight lines, that's it
element of continuous organization
i.e., for example, let's assume there are spherical lines, circles, etc.

and therefore it is necessary to find straight lines

as soon as you find
in the closest to itself, for example, in the approximation
straight lines plus plants
you already have two coordinates
and plus you ^{yes}
three coordinates already

therefore three coordinates
this is ^{generally speaking} already a location

and here when you look
to this location
you just see it

and when you look at it ^{like} more deeply
then you see
as the Creator's light comes to him

but since he is always there
i.e. this is an absolute picture of the World
it turns out the task is simply that
to attract attention
and ^{that means well} how to get me talking [...]

and therefore the situation is as follows
what when you ^{mean} define
at least two external coordinates
then the third coordinate

^{for example} if you take
and don't consider yourself
as, ^{for example}, the third one
and do you think that you are starting to find coordinates around you?
the third coordinate will be
air

further by the fourth coordinate
there will be water, etc.

i.e. you can find the coordinate system
in relation to that
if air
then you need to see which way the wind is blowing ^{yes}
water
then where is it located

and you will find the point of its location
where is it in the park
or for example he is walking down the street

for example, if you approach the fifth coordinate, yes
this is your sensual realization
i.e. what you perceive and feel
and then it turns out that you can just
based on feelings
determine the coordinate line of space

and just go along this coordinate line
and see where it is
that's all

and when we talk about it, for example,
that we should suppose to search there somehow a lot
to do something a lot
I'm already talking about that
that there is a way in the Soul
and this is the path
in this case it is defined in this way
how am i now now

The main thing here is simply the amount of practice

and following is best if possible
absolutely right
exactly what I'm saying
i.e. try not to deviate
in the level of Perception or something

because in reality
I have already named the coordinates of the Eternal Living

and if for example you look at these coordinates
and relate to yourself
then you will see
why does blood function exactly like this yes
why does hair grow this way
in a person
and why is a person like that in principle

i.e. a person is the same expression
of this system of the World

well including a person
there are other objects of information

when you transfer to other objects
you can find another thing
for example a table or a chair
or any information object in general

i.e. I just showed it
dynamic system of Infinite life
in which all technology exists
of this very Infinite Life

and if it means in this system
here's a closer look
on the structure of the organization
well, actually, from the point of view of methodology, for example, yes

look
how does this methodology work
then you will be able to see quite a lot
quite specific systems
which lead to that
that meeting with the Infinitely Living
this condition is generally mandatory
and it is absolutely systemic

i.e. there are absolutely no problems
meet the Infinitely Living

another question is
why does it exist for some time
because not all [...] let's say yes at the moment
as if the majority of people are not able to do this

and if, for example, after all
maybe one person will meet there
or there are several
but as soon as a larger quantity
for example, more than fifty percent can do this
then in principle the situation further is quite simple
because further these methods
become the same simple knowledge yes
how to eat something
well, sort of at the level of natural knowledge
which do not require special study

then it just becomes the norm of life

in [...] part of the work on this lecture
and this part is called
joint practice means for the realization of resurrection
in the Infinite Life

i.e. in fact we are talking about that
that we should just work together now
build management
well, for example , there in the space in front of you
and use it for this
just a special type of control
which is based
firstly, on the fundamental Laws
there are principles and methods of Infinite life

and I think so
what is desirable to build in this case
the design is best done this way
so that, firstly, it meets the overall goal
secondly, everyone would lay down [...] their own meaning

i.e. to be able to build simultaneously
and your own for yourself
and for this to be a generalized feature
and there was a system of knowledge transfer

so now I suggest we work
with the space around you yes
in front of you there next to you
somewhere in a certain area
maybe even in the distant space of Thinking

and start working collectively
for the meaning of the resurrection of people in the Infinite Life

so the first principle of such work is that
what are you in front of you collectively yes
implying that in this case
everyone does the same thing at the same time
for example, from 22.14 to 22.18 at this time there every day
build the following structure

so the first design

this is the ball that is located
simultaneously
and in front of you and next to you
Well, you can see two balls
if three are three big balls then

and this ball is that
that you will definitely reach the meeting
with the Infinitely Living

i.e. that is why it turns out
that this practice is such
what would you possibly build?
obligation to achieve

and just fix it in a specific place
using the technology that I just talked about
do it right now
right now

start building
better in front of yourself first
because the main thing now is to build this ball

and try this ball
so that when he moves to second place and to third place
so that there is a transfer of knowledge to everyone
increase your concentration in front of you
and near you

try to think like this
that there is no need to rush
because in this case we are identifying those
who is always there
we really have no hurry

in case of technologies
precisely based on Consciousness as I said
in terms of fixation, i.e. creation of elements
speed matters
and at the same time a dynamically changing system
can change quickly
it's always here

i.e. you need to work calmly
and if in the space of Thinking

You will create a lot of such balls
in principle, having isolated a coordinate system from them
for example, there is a special sign that is very light
you find exactly that place
where do you meet the Infinitely Living

the second level of practice is that
that you take almost like a flat option
well, in the form of a flat circle
and you start in front of you very quickly
so that it was a vertical cylinder
lift up and down

and at the same time speed
this up and down, well, sort of movement
it must be so great
as if to strive for Infinity
to get the first ball

i.e. from a very strong movement
up and down

get the ball
where did everything come true for you
with whom you worked

and here is a sign that there is movement
neutral movement
created in your Perception
on the information object
realizes your primary goal
this is very important

In fact
this is of colossal importance in that regard
what did I just say
that you take a circle
and move it up and down
as if a cylindrical glow were emerging
and it implements
through this light you realize your ball

at the same time as I said
this happens in a collective process
joint management
i.e. there you find the Eternal Living

again the same single ball
there's one somewhere there
there is a sphere [...]

and the third level of practice is that
what do you mean you take some point
just working again
best in the space in front of you

as if you start drawing
defined as a circle but do not close it
and you do it like this
to combine time
when you've almost finished drawing a circle, for example
over time when you started it
i.e. you take the element of time as if

and here in the elements of time
where are they connected
you get the same ball again
that you have already reached the meeting
with the Infinitely Living

these are the same principles, in general, that are applied here
can be applied to other objects there
but here are the specific methods
these methods are related [...] practically
all methods of collective management
they refer to, therefore, precisely to the task
when everyone is working

here it is important to look at the situation as I said
that one can do the management of course
and this management will be effective

but generally speaking, great importance must be attached here
namely the collective management plan
where you can already in collective management
see
what is your action

and therefore correlate with the collective plan of action
scan at the same time or take it into account somehow
and further develop your next actions

I don't even use it here
the word for example, let's say, is "improve"
or somehow I don't use that word here
because here we are talking about the next development
how much better is it
because if there are rigid systems
it should always be unambiguous

next element of development
must be absolutely unambiguous
and always leading to the goal of achievement
meetings with the Infinitely Living

and here you already find yourself
because you too are infinitely living

here is the principle of self-discovery
and structure means what about your location ?
self-finding method
Fundamental Law of Self-Determination
this is what you define yourself as
and determine your own path

you determine your own path
because it exists

and it applies
to the Infinite development of Infinite life

it turns out that the unity of the connection
this is free will
because you choose for yourself

and on your own
because you were created originally by the Creator
who has knowledge about independent development

so I showed it here
and also a practical system
at work, well, already with the same goal
in the collective management plan
