

GRIGORY GRABOVOY
The Doctrine of the Resurrection
**Fundamental Laws principles
and methods of resurrecting people in the Infinite Life**
(4)
17.09.2002

[...] meeting visualization
or meetings of contacts of various kinds
precisely with the resurrected ones
I will give certain knowledge here after [...]
how best to perceive them so that technology is increased
so now there is practical experience
will be accepted by people who had contacts of the meeting

and in connection with the fact that our task is to show the way
well including those who had no contact
as if it starts from the beginning
and in general this is a universal task as I said
This [...]

the point is that we must integrate
i.e. to carry this knowledge to everyone
and therefore it is desirable to perceive
Well, let's say these are specific cases
when in general it is sufficient as if relating to this event

i.e. for example, the ability to see an event like this
so that it is the factor of Infinite Life
was revealed to everyone as quickly as possible
this is the task of universal salvation

so i think we'll just listen now
stories in sequence
and I will comment after the story

need to tell about meeting or contacts with the resurrected
and well, to say the signs of identification yes
factorization what was the factor
what kind of events, well, how can I describe them?
first there

it would be desirable to do it in about ten minutes
i.e. the full essence

the main factor is the meeting factor
objectification of this meeting yes

I'm interested in objective signs
from the point of view of there Perception of ordinary Perception

*objective signs they are determined first of all
memory of a person
when, for example, you know and remember very well
out of habit, some kind of special in movements
I have a lot of such moments there
that you know personally
no one knows how someone else would see it
you know this for sure*

*then when you see a person
and sometimes you just understand in the movement of your hand
that it was him*

*sometimes you just said
that he was nearby but didn't see
I haven't seen it because we can't
well, highlight it differently*

objective signs are the fact of the meeting
you just tell me
and still if you know to highlight differently
then why i.e. in what [...]

i.e. I need it apparently, but people change over time
but it could be the same person
so [...] just describe the possibilities
some meeting factors
and this [...] comments from the point of view of that
Is it just technology or something?
further knowledge of the implemented
describe everything describe the fact

*well, i.e. when we met
then it was like [...] we touched fingers
[...]*

i.e. the contact was physical

[...]

yes, exactly physical

I think I'll tell you about the situation now
here at the meeting
if there is physical contact
then it's well [...] in contact there are several levels
it's enough well let's say if touching with fingers yes
a hand is involved
this is the level related to that
that from the point of view of the fundamental Laws of the World
physics is one
The Creator also has a single physical Reality.
including the same as an ordinary person

i.e. the Creator He can naturally be
and an ordinary person
and the Creator of everything

and therefore contact on a physical level
here we need to try to see such a structure
from the point of view of fundamental Laws
What
One Physical Entity and the Creator
it is also expressed in the meeting with the resurrected

the second level in terms of principles
here is such
that the principle of conformity to its form
i.e. he also feels the contact in the same way
principle of conformity in form

from the point of view of method
this is a method of objectification
that the identification of the ^{Infinately} Living
from the point of view of physical contact there
this is a pretty good characteristic
talking about that
that the method can be formulated in this way
that in contact with the resurrected
at the same time the Eternal Living is embodied
there is a manifestation of the physical aspect of the body

i.e. you can consider the body
as a manifestation of body functions

then it is clear that it is functional

you can show this to everything ^{yes}
i.e. we can definitely meet

let's go now
further

*so I had two people
with whom I worked upon my return
one of them has the last name Yuri Klimov
this means he left our Reality in 1999
and if from the conversation [...] said
that I slowed down reincarnation
I had to work with straight thoughts [...]*

*which means in about three months
Near the Orbita cinema, this is the Kolomenskaya metro station
he went with several people in a car
well, let's just say there was a meeting with a group of people.
who drove in two cars and they were talking about something
I was [...] near the Orbita cinema
a and i.e. I saw him somewhere in the distance he was
about 50-70 meters here*

*Well, at that moment I didn't really think about it
that I need to approach him, well I just saw
I just ^{kind of knew} that he came back
although in the future there will be some such work
I didn't do it on purpose
in order to enter into physical contact myself*

*and the second case is also my friend
which also, well, let's say it like that
I quickly found out everything when everything happened to him
and then also quickly started working
i.e. I had a telepathic connection with him
he explained to me the reasons for his family not returning
and then just a few times at home
I had various manifestations
i.e. in the physical
i.e. in optical terms it is not visible*

*well, the thing is that i.e. there were just feelings
when I just asked a question
i.e. even just not even [...]
on a physical level
and that is, there were some manifestations, that is, [...]*

*sheet [...] several sheets of paper fell
i.e. he was just at my house
and by the way my dog felt this
All*

Thank you [...]
from the point of view of the ideology of my Teaching, yes
what ideology did you use
so for the implementation of these well contacts let's say yes
I'm interested in the ideology here
highlight precisely the structure of ideology [...]

*well, the ideological aspect in general
this is a basic basic*

I'm interested in something else
it is ideology, the ideological aspect
for example, let's assume there is universal Salvation
what worked more here

*[...] definitely worked
the thing is that these people are both of them
made a very significant contribution
in the development of certain structures here
especially Yuri Klimov, he left behind a lot of work*

*and the thing is that he really is
very positive moments i.e. showed
and in his work until well when he was in our Reality
and really just [...] when he [...] from Reality
Well, a lot of processes have slowed down.
and I just know that having received knowledge
which he already has now, i.e. at the subconscious level
he makes a very significant contribution*

I understand
Now why am I asking about the ideology of my Teaching?
because we know
that having united for common and ideological goals
through means the goal according to my Teaching
about the Salvation of all
due to the actual structure of your Soul Consciousness
and at the same time be technologically advanced

I am interested in the ideology of the Teaching
there is detailed work there yes

technological work
there are common tasks there to save everyone
just analyze it
when did you do it, for example, in the first case, yes
when even from a distance they saw
what is it from your point of view
current moral task yes

and if possible
It's better for everyone to prepare to do this
this is the ideological aspect of the Teaching
worked the most
because it is very important
when ideology is a unifying system

and then it turns out that's what I was talking about
they have the same goals
and this is the basis of the Teaching
This is the first time the task has been set in this way
that are united on the basis of the Teaching
and those who, well, for example, not that they are like living Infinitely
but those who [...] in the world do not participate so much yes
as in the form of physical bodies there

I'm interested in this ideology

please bring out the ideological
the main component so to speak
in the first case
and in the second

*so in the first case he has it [...] yes
from the point of view of Macrosalvation [...]*

so you used more of the Macrosalvation aspect

*yes of course of course I try in general
how would you first enter the form anyway
even a special case from the point of view of Macro*

well, yes, and from the point of view of personal practice
it's just in the ideology of my Teaching
there is a personal opportunity how to do it
at the expense of one's Consciousness

OR for example using well there

collective ^{yes} participation

*but the thing is that it is impossible to say for sure
that is, I apply so that all aspects*

but mostly Macro

yes, but to a greater extent the entry is through Macro

and the second case too

so in the second case

I also still think that it is like a basis

*Well, in general , the basis of the ideology is the Salvation of All
and besides the fact that they ^{kind of} transmit knowledge
and so do others , and those who live like this [...]*

*and that is, here the same one is still first and foremost
This is the Macro level*

so what about the next level

here from the point of view of my Teaching

there is prevention for example

possible global catastrophe

and the task

and there is a harmonious development ^{yes}

Eternal harmonious development

this is where you mostly used it

as an informative phase of action

you prevented it to a greater extent

well, as if at the level of action a global catastrophe

or at the same time somehow took into account [...]

I'm asking the question somewhat abstractly

to ^{sort of} identify the phase

yes yes yes I understand

the thing is that in some cases

to harmonize some situation

simply by the principle of interconnection

very often such things are observed

when [...] a very private situation

very, ^{well,} insignificant at first glance

it has entry points here at the Macro level

*which in the future is indeed
it can prevent that in general
[...] it turns out*

*i.e. and by the way me too I noticed this very often
that [...] twice [...] and then [...] then by the way they confirmed
i.e. such cases yes*

[...] objective diagnostics [...]

what is the situation there
those. it turns out you used it
the whole apparatus of universal methods
which are mostly there
found as if
you used more universal control
at the ideological level it turns out

yes, it turns out that way, but still, apparently, it's still personal preference

[...]

I know what I wanted to say now
Well, some of my own information on this issue
today's lecture after all
first case methodology
that's when you saw from a distance you didn't come up

from the point of view of fundamental Laws
well as far as I [...] there are more objective signs [...]
from the point of view

*[...] it's the clothes it's the look [...]
very big beard*

so in connection with this
there is a very simple fundamental Law
in a meeting with the Infinitely Living

first optical sign yes
light coming from the Creator
he is one
and here is the first level if you fixed it
there the fundamental Law will sound like this
what you can do action
so according to the Infinite Life

when you see personal light

i.e. here is the light of the first pulse
[...] very strictly and unambiguously

so the principle here can be defined as follows
what is the principle of coherence of influence or something
your wave your look your Spirit
and this principle it gives that
that you kind of piss him off
on this person
and you make sure that the meeting will definitely take place
well, for example, once again, etc. yes
infinite number of times

[...] *I'm still planning now*

I'll say this is just what we need
We are now basically just mastering the technology
and we just need to practice
from the point of view of what it is
next law
the following principles
the following methods etc.

so the following method can be applied here
that you can instantly compress the space of light
to get a fixed Reality
i.e. [...] you saw him
there is a question to approach yes
you didn't have an erection at all
you are convinced and calmed down

and if you take and instantly compress the light
then you fix the path
i.e. you will pass through it and can approach

I understand

so and in connection with this but if possible
so now you are tuning into this method to understand
because explain to everyone here
how did you understand this

yes, then regarding the compression of light yes
i.e. here again this path originates

from coherence i.e. from compaction

and why [...] fixes space
why does it fix

*well the thing is that well because it is possible
any physical body
it's like if you imagine
in the form of present in the form of light yes
i.e. and obtain it by compacting the light
in this way it is possible to create
physical Reality*

now is the second case when here is a sign of presence yes
so the point is that in conditions of a sign of presence
there is such a fundamental law
what does action sign mean
this is an expression of action
related to intellectual level yes
another person

i.e. [...] does something for something showing yes
sign of presence
and this Law can be used for that
to enter into intellectual contact
well, sort of [...]

that means if the contacts match
and you will define a common goal
in the task of a generally defined goal
well, kind of necessary , actually

because in essence, this is where the following Law arises
what each person does to save the world
and he is basically a very busy person every day
even if he does nothing [...]

and therefore here, as it were, we should highlight the joint action
I still need to explain this very thoroughly
that's why you [...] go there to the bar to drink beer yeah
and each of you has your own task

and in connection with this, it is necessary to determine here
next level of Laws
that joint action is a special action
but this action is decided after the Salvation of all

Here are those who are united
there is, for example, physical Reality
they save everyone
necessary [...]
the essence from the Creator
who understands this

the principle is as follows
let's say exactly this way to the contact option
consists in the fact that
when you have contact
you have a level and phase of development

i.e. contact is given for that
so that you develop it for your purpose
for example, meet there as usual yes

and the method can be applied like this
that if there is a full presence there
and on the physical plane, let's assume
as you told that there is
[...] physical plane signs yes

then it is necessary to apply the method of socialization
if the paper fell somewhere there
or some kind of movement, yes
just generalize and through generalization you will get to that
that where there is contact, there it is

and here's how I said it
select the form
the very first is the closest form of plants
a simple sheet for example yes
then the shape of the wall line is better than the vertical one
connect in the space of Thinking
and you get [...] yes the concept of "compressed space"
you can see it

if you saw it, record it
and it turns out that the situation is that
that for example in ancient even Indian philosophy
[...] the open door is quite special
i.e. there many even [...] opening the door
i.e. [...] or there is the concept of "knocking on an open door"
[...] things

as if the situation is that
that if possible use
the closest space to you there
in order to make the meeting implementation

so please [...]
It would be better to introduce myself somehow better [...]
tell us about yourself

*My name is Evgeniy, my last name is Shazhkov
[...]*

if possible, of course, here [...]
the ideological side of the Teaching
what exactly is the most [...]

*so my last name must be Svetlana Nikolaevna
I started doing resurrection when [...] I met
with the book "Resurrection is now our reality
reality and Eternal life" means "Eternal life is our reality"
so the first time I read it it was Trinity holiday
reading this book
the resurrection was instantaneous
i.e. the perception of the book of the Soul [...]*

*the thing is that initially
when I became familiar with the works of Grigory Petrovich
then I am very much in connection with the fact that I was already at that
time
I started drawing with his blessing
with the blessing of Grigory Petrovich
so i started my resurrection action
my close people and acquaintances
[...] the most important thing is to resurrect with your own drawings*

*so the first appearance of the resurrection
it was like this
i.e. the presence of my relatives
[...] I had to call
and [...] the announcement of this resurrection
i.e. the manifestation of these [...]
manifestation of open exits on the grave
and on a telepathic level I saw it right away
and they confirmed to me [...] who is engaged in clairvoyance
that man is really resurrected like that*

and in the near future the desire to meet him
I conducted this meeting through drawings
through mental communication with him telepathic
it's constant communication

how did the meeting take place
when I went to bed I saw right in front of me
with the lights off in the apartment
I saw it in front of me
living portrait of the resurrected resurrected
so he was smiling
and when I turned to him and asked him
how can i prove it to you confirm it
that I see this reality
then I felt a touch on my cheek
i.e. it was already happening at that moment
when first [...] at that moment here
I saw a living [...]
and in the future I am already living at this moment
saw it this way
I saw him dressed but as I was forming for him
and his clothes and his level of communication [...]
and therefore I saw him in quite [...]
and I met his man walking right next to me [...]
i.e. [...] obviously very similar in appearance

then the meetings that I scheduled with him
he [...] but at that moment it turned out that my daughter saw him
resurrected

so how did it happen
they met him on public transport [...]
so I when she just paid attention
very similar to a person
then she began to look closely at him
she saw that the man began to
holding hands to head and such impression
that I just started analyzing
what does this mean who is it who will talk to him
and what did this meeting mean

but the daughter was not ready for this meeting
and so I just looked at [...] he was following
and they made contact through conversation
i.e. he addressed her as "girl where are you going"

*i.e. this was the kind of verbal contact
but then on a telepathic level what happened
that means due to the fact that she has already moved at the moment
and came out [...] in the same house
he went into the apartment where he had lived before
and very perception of the surrounding environment
It was a bit hard for him
due to the fact that a lot of time has passed
20 years plus
and so he perceived it
i.e. I constantly had to explain to him
this is what happened during this time and how it has changed [...]
it's hard to perceive [...]
those people whom he saw before leaving
and at that moment which he saw
now really living*

*and at the moment at the moment
on a telepathic level he explained to them
that he realized everything [...] i.e. received the information
and in the standard of living and information
which is now his real perception of the country
in which he lives monetary relations [...]*

[...]

[...] *because I just wanted to help the world
solve global issues
solve issues in order to [...] global catastrophes
[...]
global catastrophes and Macrosalvation*

so in fact, well, as I look at the situation now
these were, after all, distant contacts
and when we met it was only [...]
i.e. as you personally but only
well because [...] it is still a portrait
this is not a meeting with the resurrected

no portrait i.e. it was like a portrait

[...] when I [...] there are holes sometimes
so, that's exactly [...] I just said it
just [...] yes

it was I will say when [...] his home

the thing is that now I see him like this
that it was still similar
you know what i want to say explain the situation

the thing is that if we have
Well, I'll still stop at the first one.
on the first ^{yes} information is what I said
there if not, ^{well}, except for the daughter, what you said
because [...] then came into contact
but from your point of view
here it turns out that when you have
well, it looks similar [...]

here you need to know the fundamental laws
that's exactly it, from the point of view of resurrection
[...] align the optics align the Reality

and if possible [...] on fundamentalism
or something like that
to have [...] a task
after all, resurrection is one of the technologies
Salvation of all
and we use exactly the direction
preventing disasters
possible global catastrophe
This is what I mostly [...]

it turns out that we don't need it
it's like one of the technologies for preventing disasters
and from the point of view of the fundamental Law
I would like to just say the following then
here [...] The law is as follows
if you have primary signs ^{of} contact
there is contact [...]
or do you meet people along the way

then the fundamental Law is precisely that
that general forms are including true forms yes
i.e. this is still a path [...] which is not right
well, like [...] information for implementation

the principle basically means that
what if [...] what the daughter saw ^{means} that she met
then even ^{desire} is enough
to convey the principle precisely

which implements yes for example she has a meeting

and the method here is the method sounds like this
that when you act on the resurrection
act [...] more often from the point of view of ideology
central ideology yes
for example, preventing a possible global catastrophe
Eternal harmonious development
and like [...] such
[...] stabilize
and if you work for a long time then you
using [...] yes technologies universal technologies
then you can quite easily achieve even
result in a certain time

Now you can tell us more

*so [...] I'm going to talk about my husband
I took the book about the Resurrection somewhere in 2001 [...]
She just had me for a while, well, a floppy disk
I mean, I just had it lying around the house for a while.
then her son sent her to the computer [...]
this is the situation he was in at the time of entering Moscow State University
and somehow I [...] immediately I started studying it
I read about 30 pages
and the first manifestations began
I haven't gotten to the methods yet*

the first appearance it was
*so i woke up [...] it was about 3am
I heard clear, distinct, it was [...]
"Where are you going I'm already here"*

*then the next manifestation was the intercom worked
here are the doors, I think that was also a manifestation
that's exactly it
because we opened the door there was no one there
[...] downstairs I called my eldest son
he said that "I didn't even enter the entrance
and I am on Tverskaya"
Well, the son and the younger one decided that it means this is the father*

*on the physical [...] on the physical plane
it was a meeting
I was driving from the office that used to be on Solyanka
and in the metro I had the same feeling*

*when I stepped onto the subway escalator [...]
there was a feeling, first of all, I [...] felt somewhere
[...] didn't understand what it was*

*and like at the back in the area of the pituitary gland
there was some kind of chill that passed through
and some thought immediately came to mind
as if I could meet him right now*

*Well , I see below him going up the escalator
a man gets up and looks very intently
looks at me
Well, the man is gray-haired and I look at him that way too
[...] I can't take my eyes off it's become so interesting to me
[...] is looking*

*I didn't have any such feelings that it was my husband
and when we drew level with him he lowered his eyes
I noticed that this means he is from the side
when he was still downstairs
it seemed to me that he had
that he only had one pupil, so to speak
I had this feeling all over my forehead*

*these dark eyes are big
and he lowered his eyes as if he were covering them
when we drew level with him*

*I looked [...] I see that well of course [...]
purely physical in the sense that [...] the person was
but gray with a beard and that means I turned back
I mean, [...] how could I come to my senses
how could [...] this happen
I don't think I've even read the book yet
I don't think I was involved in methods either
and at this moment the meeting has already taken place*

*but I went down
and I had such a state
to go after him [...] or not
but I couldn't do it
apparently it was some kind of feeling of fear
something like that [...] I kind of had it
i.e. stopped me*

then there was another meeting

*no then, then somewhere in August
in August or was it in October
I contacted Grigory Petrovich about the account, so there
not a cemetery, the fence disappeared [...] here*

*Well, we came and looked.
decided that she had not disappeared
this is already a good fact that
manifestation here they go as if*

*and he actually doesn't like all these fences
[...] maybe that's why the manifestations started*

*then I started to arrange a meeting with him
to meet*

*this meeting took place again
again in the same place
and again it seemed to me that it was him or not him
I went after him
but when I had already gone up the escalator
there, well, there wasn't a big distance, so to speak
I could find him [...] an opportunity
it was such a challenge to catch up with him*

*when I went out I didn't see [...] with whom I didn't see at all
[...]*

*good and simple, here is the ideology, here is the Teaching
[...] what ideology was realized*

*[...] which was implemented
you know, I didn't think at that moment
I thought that was the only way he should walk on Earth
and must live
and this is already a good fact*

it means that you were just a context of just life and that's all

*yes, the context is like life
and at that moment when I was reading the book
that was it*

Fine
I'll do it now
this is the conclusion in its part

[...] still [...] at an altered level
[...] or a sign [...] it's like some kind of
[...] is it that the shade is connected with age, yes

and I can say that for that
to even things out
i.e. to make an objectified system
like [...] i.e. so that well the same age yes

and in general the point is [...] we meet a person
we can meet later
but for [...] still prove
that there was simply no fact of biological death

here the fundamental law is the following
that a single optical system for all
that's in the ideology of what

Light organizes everything

this is the reproducing entity
always the same thing in the place where you want to see it

i.e. you always have to meet with that
and in the place where we want

and therefore here [...] still more [...]
so, well, that's how it would be [...]

the principle here is that
that we can always use internal resources
for example, there are internal desires, yes
inner convictions that he should live everything

internal resource always gives
the possibility of implementing target knowledge
where the principle of Macrosalvation already enters
because [...] and the Earth is no longer destroyed
so the action is done yes

I think the method here is the following
that when you do the management from yourself
then you get control from it
because you just told me
about the dynamics of certain interactions
when I was going down the escalator [...]

and that's why we need to take this into account
if possible means

Thank you very much, can you take the microphone?
then choose if possible
the ideological side of the Teaching
what do you think was used more
specifically for [...]

*[...] you know I I think that firstly
I was pleased to do this for them
because [...] these people [...] I have respect
but this task was set specifically
exactly those people that I dealt with
I was involved with the resurrected*

*i.e. they asked me and in general
I agreed and started doing it*

and I turned on Macrosave much later

*in about three or four months
here are the methods for Macrosalvation*

so about the meeting

such a moment you at the beginning if you started working
applied, it turns out to be a universal system
in management, yes, as if simply by purpose, yes
set the task and made universal control

generally a universal control system
it is the segment of Macrosalvation
it is included in the method itself, for example there
method contains element if you don't call
You can call later in three months

Yes, I do it for myself

[...]
objectively, this is what interests me
[...] the factor of chance is objective

factor

meetings objective

*meeting factor
So I studied for a year
Ryadanov Vladimir Valentinovich
I have repeatedly formed a meeting with him here
and he arranged this meeting with me himself
when i changed the meeting place
I decided to designate a neutral territory
Cathedral of Christ the Savior*

*changed the meeting place
and asked what [...] July eighteenth
I started working with him on July 16th
just a year ago*

*then the Cathedral of Christ the Savior
You understand that this is a large territory
so of course there was a request where exactly
Kazan Icon of the Mother of God*

*I arrived at two o'clock
the time was also set*

*found the Kazan Icon of the Mother of God
this is the lower temple*

*I stood there, thought, and talked
I was always drawn to the street
where we talked to his sister*

*so I came there and it turns out that there too
There is a Kazan icon of the Mother of God on the street
I was very pleased with this, this is the first sign
I didn't want to leave, it was hot
I had such a relaxed state
and I couldn't concentrate at all
specifically on the resurrected one*

*the only thing i asked for
from external information
so that some signs would come
[...] the first sign was that a man came up
started talking to me
I thought that if his name is Volodya
I wouldn't be surprised
immediately they called out to him, "Volodya, come here"*

*the second sign I was asked to leave the water
So I'm back closer again
to the Kazan Icon of the Mother of God
there was a good view from there*

*and somewhere around five o'clock
i.e. the meeting was scheduled for two
At about five o'clock I focused on him again
I suddenly saw a young man walking
I immediately noticed the gait
i.e. externally i.e. he was looking specifically at me*

*What struck me was that in thirty-two degree heat
he was wearing a black suit of a slightly old-fashioned cut
in the antediluvian
young man 21-23 years old
[...] in an antediluvian black suit*

*and one more detail
which I immediately noticed
He was carrying a bag that is simply not carried nowadays
it reminded me of my school years
he was almost carrying my briefcase*

*here he was walking very quickly he passed and disappeared into the crowd
I felt that [...]
I was forming a meeting just a meeting
non-physical contact [...]
that it was necessary to somehow be more specific
this meeting*

and I felt that I would see him and that would be it

*then with another resurrected one
It became clear to me later, three months later
Means [...] with Volodya, but [...] it didn't work out
in the subway after this meeting [...] he sat down next to another [...]
Here's Andryusha
I think it's so similar
Well, I don't think I was planning on dating him.
he's driving, smiling, looking at me, here
Well, here comes the check
there I enter the carriage, he also entered the carriage
sat down opposite me
sits smiling again*

*I look at him and think
that I didn't dress you like that
and in general [...] flirted with me
[...] Andryusha, then get up and come over here.
he gets up and comes over*

*I think if I ask him now "are you Andrey"
he will definitely say "yes, I'm Andrey"
Well the doors open from the outside
Now I definitely think so
that he just [...]*

*the third resurrected
[...] I just personally didn't work
specifically on the physical level
I didn't really see anything except that it was just like that
behind [...] here*

*[...] she has it, yes she saw it
i.e. if you want she can say
that we know this girl*

well i.e. [...] cases

for myself yes

[...]
so I can accompany in the first case
the following fundamental Law
that when the resurrection comes, well from an earlier time
as the situation was here

30 years ago
then [...] the principles are as follows
that [...] i.e. he [...]
i.e. you got the exact [...]

and here the fundamental Law
is the spread of that light
here

and therefore since he had
the same image actually yes
including [...] almost [...]
this is a sign of additional precision

[...] time and events

i.e. keep in mind that it is a sign of one's own presence

well, for example , there [...] or the same [...]

this is a sign of your action

[...] is present [...] there is an action event

and when [...]

signs [...] complete, etc.

this speaks of precision and, as it were,

ways of precise identification

therefore the Law [...] the next development

that full identification

it's like a set of precise actions

which [...] Souls as exact or symbolic

or physical

[...] is that when you work

with prolonged into the past for example time

here we need to correlate in the future like this

what does the projection from the future give

current time

where the past is taken into account

i.e. the speed of the future

it's so, well, kind of big

what captures the past

and at the current time you have contact [...]

he just left in the middle of the current time there

Well, there you say that he came among the people

and the method is that

what I went through like I did [...] to people actually

[...] in fact [...] that you looked at him

By the way, this is the principal amount

It was you who gave him the exit coordinates, I mean

and that's why you planned the meeting in my opinion

in general [...] accompany

because if you're not just planning on being there [...]

but build it somewhere and in what house

special support and legal segments, etc.

and therefore since you don't have it in full complex

you only plan the path
This is also important because it is fundamentally important

the method is based on that
that in the resurrection of those who have long since passed away
from the point of view of the Infinite Life
[...] is an instant approximation
him here

i.e. you take it and, like, well, like a trick, you take it
you are promoting yourself
and if he is there in this part of the circle [...] twisting motion
a purely mechanical method [...] appears
and this method works in practice with the use of
[...] the retreating man yes
which actually has [...] identification
and sat down next to you even though you were working with someone else

Yes

so it's very important [...] says that something is starting around you
well, like a chain reaction
and here are the resurrections

still an important sign
is that you are at the request of others
that an important factor is
what can you ask for

and you can resurrect this is important

there are external [...] and there is [...]
the circle has actually closed
you just worked for the purpose
or did a meeting for example
and the other [...]

the only request of man
may lead to the resurrection of all [...] and therefore the fundamental Law is as follows
that it is even impossible to imagine that the only change [...] so that the resurrection of all will definitely take place
because it is no longer the only one but numerous

then naturally everyone will be alive

and the next principle is like [...] to this fact
that when you, for example, mentally told him
he did it yes

the principle is that
what mental actions
are identified in the same way as actions
absolute Reality of the World
and as if when there is contact with the resurrected
there the boundaries clearly disappear
between mental action and physical
and to simplify their return, perhaps?
that's when they are in quality
there are just ordinary living people
come and stay forever in this World

It is important to define the task here
when you communicate mentally
try to set tasks specifically
example, you didn't say the phrase to him in your mind
and he went out

if you for example
because well [...] for example yes
if you bet and he makes contact
need [...] clearly [...] for this contact to give
what will happen next for example
where, well, what is there
for example [...] bring or personal lesson
or fill out documents

here the situation is quite specific
we need to immediately [...] well, that is [...]

and the method here is that
what is path planning
it's a pretty simple and obvious thing
those. There is no need to complicate this method [...]
after all when you set yourself up like that
and [...] you just understand
what is the most important thing for you to return
but everything will still spin at the level
well, simple logical actions
this is the method in this case

and I think that here is another conclusion
when you have for example two specific cases
in this case, there is a kind of closed cycle
[...] changes
plus identification
a certain experience is created personal experiences
which allow you to already hold a certain base
which in itself reproduces the resurrection

i.e. it will no longer be necessary to emphasize this
it's like if possible look at it
and see and spread this goal
just to the Infinite level for myself
this is exactly this for everyone
who already has the next case at least, etc.
if possible, this method , well, sort of [...]
there make it more transparent for everyone

Thanks a lot
here you are

*[...] he has sarcoma
Resurrection work began on February 9
[...] before this on February 6 [...]
I didn't want to copy it onto the computer
Well of course, like myself, one Sunday
because [...]
and he already perceived the resurrection as
well, not with [...]
and that's why he didn't want it
worked on the literature that we had [...]*

[...]

*and [...] we worked on that
[...] February 9th, well, how is it?
I didn't know anything of course, I didn't ask anyone
because no one had contact with anyone like that after the resurrection
no [...] no experience [...]*

*[...] print [...] very quickly
and on the very first night, or rather, two nights
From ten in the evening until the morning I read with my daughter
methods and principles of resurrection*

*the daughter held her hand in turn
while one hand [...]
I read it and in general it worked out [...]
that's what I needed to read more
methods and principles [...]
I read [...]
after each reading methods
I told him son, you understand
took a pause
and to a greater extent even if I didn't understand something
I started reading it again myself
[...] read it again*

*and so here are some principles [...]
I said [...] which surprised me
that somewhere , well, practically [...]
This doesn't happen with children
usually this goes away by the third day
here's to this reading
it went by very quickly
I [...] was surprised later*

*then I already [...] with that
what is wrong it was some kind of action
this is the work*

*and that means on the day, or rather on the eve of the funeral day
it was necessary to bring a priest [...]
and we were given a condition [...] for him
[...] there was [...] a lot somewhere around eight o'clock in the evening
the husband went with his brother [...] and the car broke down
[...] quite a car driving experience
the two of them well [...] the car became
[...] neither one nor the other, really
couldn't find anything
It's been more than half an hour and time is running out
then the husband already [...] his brother [...]
put his hands on [...] cars
and so [...] help
nothing worked out
and the car was mainly repaired by the son [...]
I understood it well*

*and at some point [...]
open again where this electrical system is
and at that moment they were already looking*

*we were together
you didn't see anything*

*at this moment two wires
well, they were wrapped with electrical tape.
were torn apart
before that they, well, probably that contact that was
under the tape he came away
and then when they looked for the second time
this tape has already been torn
they twisted everything through [...] the car went [...]
this is it [...] and this moment
and even brother [...] some force is acting [...]*

*after the funeral a day
the manifestations were it was the twelfth of February
in winter of course the grave [...] there was a big hole
the cross leaned to the side
and more than twenty centimeters
he has already gone into the ground*

*well, that's also true of course [...] on this account
and the fact that it was our work that had some effect*

*then there were phone calls
somewhere on the opposite wire [...] was
and meant [...] reacted for a long time the tube lay
and then I started thinking maybe somehow
I will speed up this process now [...]
call again
there were calls*

*then [...] in March I of course recorded these moments
I didn't see it, my daughter's friends saw it
near our car near the entrance*

*we saw it clearly [...] two girls saw it
Although they didn't know there that we were doing resurrection
clearly saw him [...]
although they didn't know that I was involved in resurrection
and they came and told me
here [...] or Kolya is standing in the window here
well, I didn't see that saw the girls*

*on the ninth of April
it was exactly two months after leaving*
