

GRIGORY GRABOVOY
The Doctrine of the Spirit
The Method of Spiritual Creation of Matter
07.10.2003

Hello again
The topic of today's seminar
This is my Teaching about the Spirit
The Method of Spiritual Creation of Matter

in this structure of the Teaching
I show you how
The Spirit of God, and of the One God
creating matter for example
personified by the physical body of a person

i.e. there is the Spirit of God in man

in connection with this, his matter
it touches very tightly
it is with the Spirit of God in action

i.e. when we generally consider
the method of precisely the Spiritual creation of matter
then we consider the methodology of application
Actions of God
in relation to how a person should act
to obtain comparable practical control
and get that level of control
when he receives matter
both spiritual and physical

because God, well when did he create man
he received the matter which is Spiritual from the beginning
because his Spirit means i.e. the Spirit of man
he was immediately and first of all originally in man
generally speaking before its creation

for this is the Spirit of God

and by analogy with this
we can very well talk about that
that when a person creates by Spiritual action

matter
then initially in its Spiritual aspect of management
there should be something that a person practically must have
similar some ^{such} level
where a person creates some matter
originally for this matter
already has a level at ^{which}
this matter
can ^{kind of} rely on this level

i.e. the Spirit of man
can rely ^{for example} on the Spirit of God ^{yes}
originally existing before its creation

also any material object
which is created by man
^{for example,} even in tissue treatment, in tissue restoration
this object must be supported
to some previous level

and this level
this is the Action of God with His Soul
here the term must be understood absolutely clearly
The action of God is precisely the Soul of God

we immediately highlight that level
which is for a person
speaks of the Infinite
and at the same time about the static level

i.e. the Soul is initially always infinitely developed in a person
i.e. he basically just learns often
some aspects or elements even ^{of} your Soul

also an element of the Soul of God
here is a very important concept
is the manifestation of His Soul
in conditions when a person creates

i.e. a person can actually do it ^{based on} logic
see the Soul of God
when the Soul of God ^{means} creates a certain platform
so that man could create
some element of my own ^{yes}
inspired by his own ^{spiritual} action

but when we come to the concept of Spiritual action

then let's consider, let's assume, some simple moment

a person creates something with his own hands
let's assume these are some kind of complex systems
let it be some kind of options for soldering boards yes
in the conditions of a technogenic society

then the concept of the Spirit is here
The Presence of the Spirit of God
consists here in that
that considering that generally speaking
all matter was created by the Spirit of God, including

then the Spirit of God is present generally speaking
it just happens in space

since the Spirit of God is present in space
then any action with hands
inspired by God
human hands are like the Action of the Soul of God

and it turns out that, for example, hands
this is the original platform
for another information object

say a person soldered some kind of microboard
so either someone made a device
it turns out this device
has this kind of carrier level
these are human hands

if it's robotics
then anyway, man originally created it
like this is like a line where robots work

it turns out that initially
it is the status of the physical body
i.e. the physically manifested human body
is the same supporting platform
for some object of information
in the spiritual creation of an information object
as is the Soul of God in Action

and here by analogy we can use logic
just make a comparison
say that the physical body of a person
this is the Soul of God in Action

when it comes to
precisely about the spiritualized action of man
to create some information object

but precisely spiritualized and precisely by the Spirit

and therefore in my Teaching on the Spirit
we primarily consider
as the Spirit of man
so is the Spirit who comes into contact with the Spirit of God
in action

and the transfer of information is carried out by
that any specific action
covers
as a Spiritual plane
as well as physical
i.e. it is a simultaneous control plan
in this system
educational technologies are often very simple

i.e. a person who has technology
can go into this optical control system
and it turns out that a person actually transfers his knowledge
only by your Spiritual state

Well, that happens often
for example, a person is looking at something in a museum, yes
some picture that he perceives
on a deep spiritual plane
and the one who passes by understands his spiritual state
although he sees only the physical body

here it already works
the manifestation of the human Soul
in the action of the Spirit

in the conditions of Spiritual development
in general in the technologies of Spiritual management
there are often complex concepts in management

because the Spirit is an Infinite quantity
and intersects simultaneously with many quantities

in this case i am talking
in this method it is Spiritual management
about what we crystallize

these are pretty simple systems after all
in a complex level of action and Spirit

and these systems should be completely simple
generally under control
and at the same time these systems must
practically be like that
so that we understand in Spiritual action
what our actions ultimately represent

because the Spirit has characteristics
how did you start
and in general the consequences
also the end of the action

i.e. due to the Infinite characteristics of information dissemination
the initial action already contains information
as if of final action

and it turns out that by analogy yes for example with microboards
we have a system that is practically
knows in advance what he's doing

example , in my Teaching about Salvation and harmonious development
there is precision in achieving it
it means some act of Salvation
is always an absolute value
for the act of precisely universal Salvation

here by analogy with this structure of the Teaching
precisely about Salvation and harmonious development
achievement means that the act of Salvation is already achieved by that
that a person living for example in action
according to God's plan
he is already saved because he is actually
at the level of, in general, initially correct action

and it turns out I'm here on purpose
I used this comparison
as an analogy with the action of a certain microplate
that a person acting precisely Spiritually
and creating Spiritual control systems
when it works with the same micro board
he already controls her next entire development

because there is one level of control
which exists for example in the initial action

it's usually always infinite
next level of control

i.e. for the Soul of God there is no concept
let's assume when one control let's assume it's stable
and the next control may be a consequence

for God
each subsequent control level
it is absolute in its level of, as it were, universal control

the same can be said in the same way
in relation to the technology being created
if for example a person creates technology in this way
that he spiritualizes her
as in the process of creation itself
and for example, laying down the structures of the Spirit of one's personal

i.e. laying the foundation for spirituality
in terms of human life
he is the source of life and the active man
making this microboard
and it also gives a kind of template that cannot be destroyed
in this microboard

i.e. technology is being created
which in the long term will not destroy man here

this is exactly the technology that can be embedded
in relation to any technical system

if we move to this level it means management
how to level means Well as if status in the collective Consciousness

i.e. in the collective Consciousness
there is a very significant faction now
where people create man-made systems

and the controllability of these systems is often conditional
due to the complex levels of distribution

remains to be created in the collective Consciousness
the next one is simply embedded into the control system
which would control the development of man-made systems

and here is my Teaching on the Spirit
in the method of creation through the control of the Spirit

This means that it allows you to create a faction immediately
at the time of manufacturing some device

and it turns out that this device
he will no longer be able to destroy the person there , i.e. the creator
because in some cases
the functions simply won't be implemented as they should be
if, for example, the device starts to operate
there against the person

and here by analogy, let's say , well, with instrument making
if we want to do, for example, treatment of a person
then through Spiritual action
where there is spirituality for example level means
Well in general some kind of tissue system yes
if this tissue has some pathology

and create fabric at the same time

then in general we have an inexhaustible level
then information on creating fabric

i.e. we have enough on the Spiritual level
Login
as if exactly in the Spiritual plane of the cellular system

this is what the Spiritual component is
of your own Spirit
for a given cellular system

and you get an infinite number of ways
restoration of one small material cell

and it turns out that the question is not even about the number of cells
maybe it's even a whole organism

the only question is
what when you look
on the Action of the Soul of God
as if on a platform and again carrying
you see how the Soul of God creates you

i.e. you see it very simply and very transparently
i.e. it is clearly visible
that the movements of life events
The soul of God creates you
your body

your actions

and life events in this case
inspired by that very thing
that the Soul of God is at work
as if in the space of the Spirit of God in this case

i.e. although the Soul is a creating structure
for the Spirit
nevertheless we see it as if from within
external level

it's the same as our Consciousness
perceives there let's assume the external nature yes
but nevertheless we can say
what is our Consciousness
can identify objects correctly
even if we we as if we don't penetrate well there technically
in some thing yes

for example, if you don't drill the table
it is clear that there may be something inside
let's assume there is a certain matter there

i.e. a method of studying Reality in which
an element of fixing some previous actions
is fundamental for the following study

i.e. the consciousness of a person that guides him correctly
for example in some life situations
so we can draw a conclusion
that Consciousness correctly perceives the next level

at least another instrument
Often a person does not have yes For example
for the logical phase of sustainable control

and it turns out that if we are on the Spiritual level
let's consider the Actions of God in the same way
then the Consciousness of God is his Spirit
acting around as if his Soul
at the local manifestation of the Soul of God
in event management at that level
when a person creates in a Spiritual way

when you listen to this lecture, for example
Well let's assume there next time yes

one two ^{there} three times

Look at the concepts that I am introducing now
they are quite closely related

here is the accumulation of systems of definition ^{yes}
^{for example} at the management level
here has a significant role in this lecture

because I basically build management all the time
around the Spiritual action of man
where is Spiritual action
this is the giving of Spiritual characteristics
to the object of action ^{yes}
^{well}, to the object that a person creates
including the creation of the object itself

and when we move to that level of understanding
then we see
what why does god create ^{well there} it seems to be quite simple ^{yes}
some elements of information
or Reality
just Mira

you can see it here
that as soon as the Spirit of God connects with His Soul
in terms of human perception
it turns out that for a person specifically
God created specifically, ^{for example}, the whole World

i.e. as soon as we fix it
^{let's assume} the structure of human perception
it turns out that God creates individually for a person

i.e. in human perception
this is a sign not only of the individuality of the person himself
but also for a specific person
the whole world is created by God

and it turns out that when we consider such a structure
as a structure ^{well as if} the general development of reason ^{yes}
to other spaces of the galaxy
some galactic systems

then the only criterion here is
after all, it is the physical body of a person
because the physical body of man
this is a structure quite ^{well as if} strictly unambiguous

fixed
in the structure of physical Reality

and the development of Divine thought turns out to be ^{yes}
according to the Infinite development of the Eternal
there is an Eternal physical body of man

here from the point of view of Spiritual knowledge
Spiritual level of construction of Reality

having looked at how God does it
it turns out that logically it is so

therefore, in order to create
some ^{for example in general}, it 's a thing , so to speak
and in order for this thing to be created
^{for example , by hand or with some calculations} there
well, i.e. some architectural scientific projects
and at the same time we can say that it is applicable
in some cases to the material world

here ^{it means} that spirituality must come into play
as a plan for the transfer ^{in general}
first of all, ^{well as if} a spiritual action
embedded in human thinking
is realized as an idea ^{yes}
in the form of some kind of system
outlined ^{well for example on paper}
or there in Thinking

and then the action happens
^{for example, in some cases to the physical level}

if ^{there let's assume} a work of art
then there is just contemplation
if it is some kind of novel or ^{means} some kind of book
it is not necessary that the book contains
a system that allows ^{there}
act on a physical level

and there are very specific books
^{there how to build a car there yes}
how to repair it, etc.

i.e. there is quite a fine line here
in docking
^{for example, information of the World}

why did I so clearly divide the management level there
in this case
that God built the world this way
that there are very specific technologies
created by people themselves

and at the same time, in general, technologies
which are built in the plane of Thinking
if this is well there is some scientific level there
realized later in the physical plane
take at least electricity yes

then here it turns out
what is the level of Thinking
and the level of implementation
this is the level that means
Infinite external quantity

after all, the world is external
this is an infinite quantity
for Human Thinking

and when we take a closer look
at the level of Spiritual knowledge
to this phase of human control

it turns out that the external infinite quantity
it is realized in human action
and it was implemented
practically in general it is completely unambiguous
from the point of view of that
that this action will definitely take place

there is a very large amount of information from the outside
for a person
well as if logically and according to plan

if the person is there
Well there without having there for example binoculars or not having a telescope there
sees some star in the distance
and can't yes for example, reach this glowing area with your hand
Well let's say we take some time
when a person was born
and he doesn't know that telescopes exist

for example he sees a star

he can't reach it with his hand, for example , physically
then a person has
level of remoteness of the object
and the remoteness of the object
this is an infinite amount of information

here is any level of remoteness of the object
it's always an infinite amount of information

and this Infinite level starts as if
well , well how should I put it in this phase?
logical human consciousness

i.e. one only has to talk about God who is distant
we have an infinite amount of information at once

if God is close to us
it turns out that He is so close
that He created us

and it turns out that the Infinite level
embodied , for example, in the physical body of a person

and here in my Teaching on the Spirit you can see
what exactly is the human physical body
this is the implementation
An infinite amount of information
from God

it means God is here
Well, I mean from the point of view of knowledge
from the point of view of including often there
in the form of the Physical Body of the One God

and when you consider
here is the opportunity to somehow distinguish technologically
the subject of construction itself yes

for example, what needs to be done to resurrect a person

here it turns out that Spiritual action
this is the act of creation
for a given person living conditions

because initially
the natural state of man
he is always alive

and when you create in a Spiritual way
all subjects of his future and development
already resurrected

it means precisely by Spiritual action
then he kind of comes back
into its True structure, i.e. it is alive

the concept of Resurrection in this case
just for the whole creation
as if the real conditions of his life
but on a spiritual basis

therefore it is logically clear
that the spiritual basis
for all information objects
this is Eternal life

and generally speaking the status is exactly what is happening here
what does it mean generally speaking the status of resurrected people
he will no longer be different from people
who, for example, did not die

when we talk
about the Spiritual phase of resurrection
specifically about Spiritual diagnostics
what is meant here is that Spiritual diagnostics
shows all communication elements at once
and it is here that only a general resurrection is possible
it's immediately clear

because if for one object of information
there is in general a property of this information yes
The spirit is omnipresent
therefore the Resurrection must be universal
well, it's just the principle of analogy

and when you are for example at this level
are you considering
process well let's assume there are meetings with the resurrected one
on the Spiritual plane
then it is the simplest
on the Spiritual plane a person is always
he recognizes and understands the other in general

i.e. again the same example
a man stands near a painting and he is inspired
in general, it is not even necessary to watch

on the person who is spiritual
you can look at the picture and understand
how will the person who watches be inspired
on this picture

i.e. the concept of the Spiritual plane
it is the same information system
from different sources

and in connection with this, here is the Infinite Spirit
which practically bypasses ^{yes}
the entire information space
touches God
always carries the same system
i.e. this is an infinite number of incoming information systems
and at the same time you have only one level , so to speak
on Consciousness

i.e. this is essentially a very strong system
confirmation of information

when you diagnose on a Spiritual basis
you have practically ^{well as if} multi-channel
in minimal approximation the system
which differentiates many sources
and ^{as if} reproduces a certain average component
which is already the True source
and you perceive it as the source of control

and it turns out
that it is the diagnostic control system
exactly the Spiritual plan
i.e. the Spirit seeing correctly
he can, in principle, immediately change for the better
i.e., ^{without} thinking, you can change for the better

for this you just need to do
some logical action
so that a negatively developing event is possible
it would be ^{like} immediately ^{means} directed ^{yes}
for example in a positive direction

for this you need to create
some source of control
for the development of the Spiritual faction

because the Spirit sees correctly and he makes no mistakes

therefore external source
it can only be the Soul

but there is a small nuance here
The soul realized in the physical body

here control can be carried out
exactly like that
for the Spiritual faction
which for example creates an event

if we set a task
here create an event
simply Spiritual level of control

i.e. for example the Soul is a control level yes
Consciousness is the control level
and at the same time we are in our purest form
we want to highlight a fraction of the event
where the event is created only by the Spirit

then it turns out
that the absolute, as it were, attribute of this action
is the physical body of a person

because the human physical body
in this case is the level
from which it comes
in general, the whole set of actions

if we well there we proceed from that
that the action takes place outside the physical
Well For example there through the external image and through the tree
some faction of Consciousness

yes, through a tree you can create another tree there
or for example there grow improve
but at the same time we work, in general, as if through a filter
one level

and say for sure that it was this faction that worked
it is no longer possible to be certain here
because there will be intersections, etc.

and when we speak
about action from the physical body
we are talking about what exists

very specific
space of the physical body
in information

a very specific space
which was originally determined by God
but at the same time this space is developed by you personally

here is the physical body
this is the principle of your personal development

personal choice of a person
this is his physical body originally
Spiritual choice of man

i.e. the physical body is that choice
which man actually did
it turns out to be up to its level of physical organization
and this level was Spiritual

then it turns out what he did
he made Soul
who knew what the body would be like
The soul knows everything in advance in this case.

and here it turns out that this knowledge
this is the place
where is the specific event located

Be more careful here in this regard
that here is a very specific technology

Optics of the Soul
it is knowing where the event is located yes
as a rule it is like a certain
just one rod, like a power rod, yes

second level
the event itself is highlighted in the action
it is related to God
towards Eternal development

then we get it absolutely clear
fraction of the work of the Spirit
in this case I highlighted
namely the fraction of the work of the Spirit

The spirit works and you can see how it works
i.e. it is visible how the Spirit creates matter

and when you start to enter
to this area
structures of one's own Consciousness

and Consciousness is you yourself
your whole body in this case is Consciousness
but the Consciousness of God's Action

and when you start getting this information
then your body
firstly, it can recover very quickly then

i.e. because you are rationing
according to the structure of the work of the Spirit
you kind of normalize because you're doing it right
by isolating a separate fraction for its study
this is the correct method yes in scientific technologies

and when you for example this faction
you start for example yes, bring closer to yourself
then you see that the closer you zoom in
Spiritual faction
the closer you become to God
in terms of the opposite, it's good, as it were yes level of implementation
and not only physical but also spiritual affairs
but also Spiritual ones

i.e. approximation
pure fraction of the work of the Spirit
this is the union of you and God
for your successful affairs

The spirit active and near
these are your affairs that are good for you
and therefore for the whole world

here you can see
that the whole World is essentially absolutely creative in general
because we have Peace
as the World is Ever-evolving
when we see God ahead of us

i.e. the one who goes ahead of the giver
or logical goals

or there are material ones
or informational

and in order to see
God having ^{yes} Infinite characteristics
in the speed of information exchange
it turns out that it is necessary to distribute it after all
your control through the Spiritual spectrum
to understand Him in dynamics

after all, a person is more used to it
understand some actions in dynamics
it moves ^{and} some elements of the external world are created

and it turns out that the Soul of a person
she is most personified by that very thing
that the Spirit creates Reality
^{as if it} supplies information
to certain points of the Soul
so that understanding can be realized spiritually
i.e. passed into Consciousness
^{as if not} in terms of speed characteristics
and according to the state of mind

and here it is clear that the Spirit is connected
with the state of mind further
as a result of when he performs some actions

but the state of mind always exists ^{yes}
this means that the Spirit is always active

^{for example} why does the heart always work
from the point of view of the Soul of God
the heart is the manifestation of the Spirit of man
because God sees the heart of man

i.e. God can see
on the Spiritual level
just like in physical
i.e. for Him there are no differences

and the Spirit that acts gives the work of the heart

this is precisely the Presence of God ^{yes}
in a person
in the form of a material organ
in the form of, ^{for example,} one cell ^{yes For example And}

well located in the heart

but by analogy
when the Spirit embraces all systems
we get that each cell
then it turns out to be equivalent

and that means going to God again
it is necessary to first single Him out as a Person
in order to develop your own Consciousness

i.e. the Spirit can be initially developed
to act

but to develop the Spirit
in terms of, for example, at least structuring the Soul
or the fulfillment of the exact fulfillment of the goals of the Soul
it is necessary to develop Consciousness
to already raise the Spirit

logically it is so
does it mean for a person to have spiritual development
but often passes the level of a conscious development plan
i.e. sets goals, tasks, some cultural goals
some goals for achieving professional activity
personal

and the result is Spiritual growth
from achieving the goal
still through the logic of Consciousness

and in this regard, when we start
these constructions are sometimes complex yes
try on in relation to oneself
we see that the Spirit of man
it's still quite simple
in general, control technology
in that case if we see the Spirit
as a structure creating
including your physical body
even if only locally

i.e. if you see
that the Spirit creates some specific organ
even if it creates more structures of the future yes
or even participates in the creation

but at the same time you see something very specific
optical structure
i.e. exactly where the Spirit works
your Spirit
to create your own body

then the Spiritual management
it becomes absolutely simple
is very clearly oriented
to the logical phase of control

i.e. you see that the Spirit creates
some elements of your body
just take Consciousness as a logical phase
illuminate the target
and the illumination of this goal in the phase of the Spirit's work
is immediately projected into event management

that's why you can
Having spiritually considered the event
immediately turn it like that yes
or direct in the right direction
if it needs correction, for example

and here we already come to the management structure
in fact, as if nested, i.e. docking
plans for a series of events or something
when the Spirit diagnoses a series
such as the plane of the Soul
or there is a hemisphere yes
or as if the surface of the Soul
surface of events
surface, let's assume, of some completely external influences

i.e. we are on the Spiritual level
we can see it quite clearly
component of the event
from the point of view of all the basics
necessary for management here
and for instant control

i.e. if we want along the plane or along the sphere of the Soul
hold an event yes
it is enough to shift the Spiritual level
to that point
where the Soul generally has a positive solution

i.e. from the management point of view
it turns out to be a completely elementary mechanical task

there is a space of the Soul
Well like a half-plane, like a part of a sphere, yes
segment of a sphere

here is an event
which develops near
and you need to make the control so that it is like this
which satisfied you in the future
this event

it's enough to just spiritually fix
as if by one scanning level
here the light of the event arose
and then the logic is to just take it and stretch it out
to that point of the Soul
where the event is normalized

but in principle it's enough to just at least make it
to the level of the Soul
up to this border where the Soul begins in optics

as soon as you got here
you get the norm
because the Soul immediately transmits, as it were, throughout the entire
structure
information

if you still managed to hit the Soul point
which exactly normalizes right away yes as if
that's even better
i.e. then you also get stability of the control phase

and it would seem complicated yes as if on a technical level
implementation
Spiritual Management System
not always as I said it is complicated but sometimes it is complicated

in some cases it makes it very easy
to exercise control
by simply selecting the exact system
as if the space of the control system location
optics there Soul Spirit and Consciousness

when we start to develop this structure further

then we see that in the Consciousness faction
i.e. in the logical phase
a person can have completely
all knowledge sent by God
for a specific level of its implementation

if we consider the level of course
with own Spirit level of control
and the next action level

why is this happening
if we take for example the sphere of Consciousness
and this sphere means
Means Well, we accept it
as a sphere, let's assume there is no next action
I need to suppose read some words there
which would be in the current lecture in the current seminar
showed
how can all people learn for example there Save everyone
and at the same time yes to solve your events

this is the area that should
Well let's assume it really is there
Here

I lay down the logical meaning
that this information was sent by God
it is originally God's information
and as information of God and Infinite information
keep in the logical sphere

this can be done by the faction of your own Spirit
present within this sphere

Spirit creating Consciousness
Spirit personified by Consciousness

and since the Spirit is an Infinite communication system
so naturally within this sphere
I have this information

The only question is how I get this information
I will highlight
from , for example, the internal structure of this sphere

Well let's assume if we compare it with that
that the sphere is dense

if somehow means to give the properties of gas yes
the internal structure of the sphere
then some hole is enough
and the gas begins to filter
and we see this information
but you can't pierce the sphere

we must penetrate into the sphere as if knowing
that the sphere is monolithic

for this we must be able to organize the sphere
Spiritually from the beginning
from the very beginning
internal structure
and then go out
on the structure of one's own Spirit
inside this sphere

therefore the management of the Spirit
This is often a necessary task.
to know exactly the information from God

and only Spiritual knowledge
can actually give
It is from God that information comes to people

i.e. if we assume we have this information
in yourself
i.e. the One God Physical Body of the One God
transmits information
yes to all people
to all elements of Reality

then a person actually has it
another task
transfer this structure to other elements of Reality

how to make it so that the status is reasonable yes
all external information objects
was comparable
from the point of view of mutual controllability

Well, a person can tell a person
and they can agree yes if mutual control

and how can you make it so that all external elements
were also controlled

for example Human Thinking
and the element is controlled by suppose Yes

for this you just need to go to the Spiritual spheres
coming from a person
just as God conveys to man
transmit information to any object

then any other object
generally speaking, I have to do something, develop somehow
in order to actually master this technology

if a person develops
in the Image and Likeness of God
and at the level of Infinite development

then any other information object
it turns out he is developing
almost in the image and likeness of a human being
in action

and when do we know this mechanism?
we understand
that our Spirit embraces all the phenomena of Reality practically
because that's his job
develop all external Reality

and when we know this we can on the Spiritual level
see huge spaces very clearly
perceive immediately
i.e. a huge amount of information

and let's assume you are doing treatment there
there let's assume there are a lot of people there yes
on the Spiritual level you can see them simultaneously
and in general and at the same time for you
simultaneity of action
will be exactly the same
as well as a common action for all

i.e. there is no division on a Spiritual basis
almost at the level of understanding
private element and common element

also the vision of God
i.e. the physical Vision of God is exactly the same
God perceives simultaneously

and in general almost the same
how a person perceives the Spirit

and we can say that the Eyes of God
this is the Action of the Spirit of man
and in essence the structure of the Eye and the internal contents of the Eye
this is the Spirit of man

i.e. through the Spirit of man through his Spiritual growth
in general, the Vision of God is visible
and the One God

and it turns out that means well, a person for example Yes
developing your Spirit in one direction or another
means it contributes to the presence of God
in some element of the World

i.e. a person actually conducts the Vision of God yes
His presence
His control
with your Spiritual growth

i.e. he also helps God
i.e., in fact, it takes upon itself the will of its own will
show God the next level of Peace
your next action

and here in my Teaching about the Spirit
this is a very important value
where a person of his own free will
by way of Spiritual action
then it shows to God
what does he do well for example, the person himself, yes

in this case, the person shows first of all
your own action
Well, it's within the framework of ethical measures.
it usually does not show the action of another

i.e. a person discovers his own world
and it turns out that the discovery of one's own world
with God's help after all
and in the full presence of God
this is a very stable position

after all, you can learn this way
to build this optical niche of our own development

what does it mean does not affect other people's worlds

constantly means increasing reserve functions
own world

i.e. the world is the same

but there are no wars there , for example

there is no nuclear destruction there

It is only worth the internal structure
fix to the level of attainability of this moment
The world will definitely not be destroyed

for the inner Spiritual projection
in the presence of God
this is the whole external world

i.e. I just showed you the transition
where your control goes to the outside world

and often the Spiritual level of a person
that's just the way he is
that a person strong in spirit
and events are happening around him

let's assume we take the Great Patriotic War
when there are many recorded cases
when as if in a very strong zone of military actions
the man had no injuries
it's like some kind of spiritual cocoon
i.e. the level when he builds his own world

or are the astronauts in difficult situations?
i.e. some extreme situations
but they seem to generate extremes
some such as compensatory functions
and they must also coincide at this time

to use non-extreme control systems
and to create such systems, well as if by logic
just in Spirit
at the creative level of management

it is enough just to highlight
governing factions
and let them down deliberately
under the structure as if yes hard development

but in essence when we talk about that
so that it would not be possible yes for example, a global catastrophe

then here we are still talking about the same thing
that the person is
all the same in extreme conditions
that a global catastrophe is possible

therefore he must be so spiritually strong
prevent it simply with Spiritual restraint
Spiritual fixation of this Reality

and when you have this normal Reality
fix at the level of the Spirit
where the Spirit of man meets the Spirit of God
then this global catastrophe is definitely not happening
it is possible to reach a point where there are no local disasters
if there is time there , etc.

and it turns out I led to that
that the Spirit of man which restrains
it fits very tightly

he is practically inseparable from the Spirit of God

i.e. here I have revealed it in its pure form
Spirit of God
which comes to a person as if it were from outside
from a person

and where it is undivided we see the well-being of the World there
well normal health yes Eternal development of civilization

where the systems begin, as if dividing
i.e. the human spirit acts, for example , in some of those nuances
which for example Well as if first of all needed
perhaps to the person himself

then the element that appears
that either man must know the task of God
and do it yes
and then do your actions
or is it better to maintain the level of continuity?

and how to save it yes
Spirit is a dynamic system
This means that you can save it simply by tuning your Soul

i.e. the position of the static Soul
The soul that has known ^{this} element
it has the following status
i.e. she understands what to do next

By the way, you can get cured very quickly
from very complex ^{and} protracted diseases

when a person sees
^{for example} the status of your Soul
as a status of almost the Soul
perceived
my own information ^{in general}
The soul already had this information
but she ^{seemed to} discover that it exists once again for herself

and here are the methods of the next discovery
the next ^{as if} co-disclosure
these are methods that allow
carry out the tasks of the Soul

this is a colossally important level
for the Spirit in general
for the functions of the Spirit of man
for the ^{status} of the Spirit of man

when it is obtained only through the Spiritual level
a person can perform the tasks of his own Soul
and ^{what} about that level
where is the Spirit of man
docks
with the Spirit of God
only through this level

and it turns out that ^{it means} doing one task after another
we come to the conclusion that there is a way of regulation
^{means} the tasks of the Soul and the structure of the Soul

and since there is such a way
it turns out that a person is practically unlimited ^{yes}
then in free development creative free development
because then you can ^{do it completely calmly}
seeing the task of the Soul
fix it
and calmly decide on some ^{current} intermediate actions
^{Well,} like a lighthouse it shines, that is precisely the task of the Soul initially
which in principle, under certain actions

not quite even directed often
to some exact solution
the Soul is after all an Infinite construction
shows that the decision took place here

i.e. you got the solution
for example, if we consider the theory of reincarnation there
but the question was asked there
still a solution to the original question

i.e. well, well let's assume a man was passing by there
and there he could not step on a plant
but he for example there stepped in one of the lives
and he thought that next time
Don't step on this plant

and he can go through the reincarnation system
when it will no longer come
but so that he was in the same situation at the same time
he needs to create it then it works
some situations are similar yes

similar situations in time
these are often very different situations in terms of logic
he doesn't always perceive them as the same situations

that's why systems happen
Well, these reincarnations
so that in modern conditions
already get out of the reincarnation system
in terms of Eternal life in the physical body

here you just have to consciously perceive
what the Soul needs
and consciously regulate the management structure
where are the more complex concepts that take time yes
can be recorded

i.e. you must have power
means fixing the control at the desired point
and calmly go about your business

and as if more complex structures
which, for example, the Soul places as control structures
you generally consider them as static
and calmly implement

i.e. they are these constructions, well as if they are in that phase
what do they allow you to do
How are your personal affairs going?
and at the same time, they seem to hold on to that position
until you have collected the material
and do not realize the more global tasks of the Soul

and this is also a state of the Spirit
this is, in general, the maximum will of a person
it can hold static events
how not to react to them
but the time comes to react
but it often happens that events then
themselves come to a favorable level

after all, the Soul was originally created by God
already had everything as a norm
and it is precisely Divine action
when the event seems to return to normal
as if without additional action
simply by a person solving his current problems

they also have these tasks, for example, like this
which are solved by creative methods, for example Yes
governance through universal salvation
but nevertheless the person then controls the situation

here is the principle of control
this is the presence of the Mind of God
that's how it is yes, some kind of optical coupling exists
which controls the static event dynamic

and the Mind of God
i.e. the Mind that is generally able to
how to manage Personality
i.e. personified Reason

we see here the Personality of God
Personality in action yes
Personality in the manifestation of His Mind
as for example by analogy with the human mind

but the mind of God and the mind of man
in Infinite Action
this is basically one action initially
coming from the initial level of God
from the One

but at the same time it is developed
through educational yes like technologies
i.e. a person has learned and does, let's say, the same thing

but he can't help but do the same thing in the end
with Eternal development he will still learn to do the same
to Eternally develop

i.e. in principle it exists
a completely unambiguous level of human behavior
completely unambiguous in terms of reasonable action

why don't people cross paths with each other
there on the streets they walk along certain trajectories
do certain things
I mean they don't intersect, i.e. they don't collide, yes

if we abstract
let's say that this person has well there they blindfolded, for example Yes
and it should go from the point of view
as if abstract control
that he does not consider Reality
and just goes as if in the World yes

from the point of view of God who created man
This task is accomplished by
that he acts wisely
just as God works in practice
in terms of Eternal development

this is where it works
that the mind of man and the Mind of God
can be joined perfectly
precisely only in the structure of Eternal development

after all, it is logically clear that a person can live forever
if he researched very accurately
creation of the world
By God

and it turns out that we can say
that the Spiritual level of Eternal development
this is what is reasonable from the point of view of, as it were, in general
elementary logic too

i.e. if elementary logic says so

well , some action needs to be taken
then it turns out that this action is like this
that the mind is directly human
created by God for example yes in Infinity

after all, God creates in general
what is at the initial level
what's in the Infinite
all by one well as if apparently one by one
here it is better to say level
as for a human
and for the level of connection between man and God

and when you look at this component
as an Infinite quantity
it is generally describable
how exactly does Infinity give the Spirit of man

i.e. Infinity which contains the Spirit
already embodied yes
in the structure we assume there is physical Reality
i.e. in the future structure of physical Reality

and this one is quite complicated in general
the system being described
this is the Eternal life of the Soul and Spirit
together with the physical body of a person

and then it shows this information
how to live the physical body of a person
so that he may live forever

i.e. in what situations
to react to something
not to react to something
what self-government technologies should be used there ?
what technologies are there for managing external Reality
apply

and it is precisely the docking of physical Reality
with almost well as if by the Infinite level of Spirit
shows that this is a docking
this is the physical body of a person
acting according to the knowledge of the Laws of God

exactly where the physical body is
it all comes together more on a personal level

with the level of Infinite development

and I basically showed it here specifically
management structure in this way
that you are considering this structure
as in general in today's lecture as a complex one
where the element is already controlled
well, which is what we came to
is the Spirit in its pure form in fact

The Spirit of Creation

as your physical body is Eternal
also the future Reality is also Eternal
and also reacting with all systems
how so as if the level of information transfer

i.e. we see the Spirit and at the same time understand
that then the physical body is Eternal
when we, well, see the Spirit itself and its work

i.e. when the Eternal Spirit works
it is clear how the body works then
according to the laws of Eternity

and the principle is very simple
often the spiritual state of a person
as if it directs to some elementary actions yes

if he

Well let's assume there is something preoccupied or worried about
these are just the actions of the physical body
Spiritual state guides a person
if on the contrary there is joy then others

in principle, a person is very familiar with this
The spirit guides man
the main thing is to understand
that it is your own Spirit
defines the control position

i.e. the allocation of a fraction of the light of one's own Spirit
in this case there is precision
because there are other optical control characteristics
there is an external environment, let's assume yes and so on.

therefore, as an independent work

you try
allocation
pure faction of the Spiritual Administration
make control on object creation

and then this object should be
simultaneously created
and at the same time inspired by you

This concludes today's seminar.

Thank you very much for your attention
