Lecture 1

And in this first lecture
I'm going to give you a specialization
i.e. that maximally developed in you
let's say a state given by the Creator
through which you already carry out actions
in the Macrosalvation system

because every person who lives
he carries out these actions
explicitly or implicitly

but everyone has a maximum
and this maximum is called "specialization"

Once you develop these specializations
you'll be able to do everything through them
even on a mundane level
where you don't have to rescue, for example
but just to act in any situation

so all the training will go
through the rescue system
but by specialization

Your specialization means the following actions

you through concentration
in the depths of your Consciousness
receive
the outer phase of Consciousness

that is, you actually divide the Consciousness
for example into a sphere
where in the depth of the sphere, which is roughly in the center of the sphere
and closer even to the bottom base vertically
vertical relative to you
so it's called the depth

and the outer surface

is basically above the lower boundary

which is the upper surface
that would be the outer part of your Consciousness
that's the specialization

so you're at that level of Perception
you're doing as much as possible
on the system of general connections

where you are most harmonized
where the element of Salvation
you're most developed

so translating this action in the common bonds
through your Consciousness to conscious control

I naturally solve the problem
that then you are creative and harmonious
because this is the harmonious phase of your overall development

you can solve any of your problems
through this field of information.

So therefore, having this specialization
I will explain to you what is called "clairvoyance" in this case
and how to develop it
i.e. the methodology of applying
of controlling clairvoyance

Why "controlling" clairvoyance?
because any action
already has a creative component
when you are
at this level of understanding the world
in connection with your Consciousness
so you're creating right away

That's where clairvoyance comes in
is the propagation of an impulse from the depths
i.e. from the inner point of this sphere
to the outer surface of this sphere

but because the sphere is divided, it also has
an inner surface
and an outer surface

that's the fact of clairvoyance itself
when you move mentally in representations

let's say with your Consciousness
exactly the boundary
from the inner surface to the outer surface

and it turns out that here you see the world in Reality
as it is

which means "seeing the World in Reality"

Since it's controllable
you can make this transition
to carry out at once
the harmonization of any object.

This action is immediately transferred naturally
into the concept of "healing"
i.e. such controlling clairvoyance
when you look at a person for his diagnosis
you first maximize the restoration
and then you fix the remaining diagnosis
after one of your actions

because you are in this action immediately harmonizing them
i.e. you actually maximize the recovery and revitalize
and you're recovering yourself, by the way

because this action also applies
to you
to all the elements of Reality

so this action is restoring
also you at the same time
and therefore accordingly
and any other human being

The important part in all of this is
is identifying their diagnosis
i.e. the individual area of that person
what exactly needs to be restored

then you've maximized the restoration
you've identified, let's say a diagnosis
that the person has something
like what needs to be restored

and then you begin to restore that area

as it happens

i.e., by identifying individual characteristics
if they've already been reported to you, that's already known
but by identifying, you're already rebuilding
because you're in that area first of all

secondly there is
a very specific recovery technology
at the level of the first impulse

which means from the center
from the depth of Consciousness

you bring out two rays actually two segments
to the outer surface of the sphere of your Consciousness

but when you pass the boundary
there's a branching of your clairvoyance
to the maximum number of levels

so you're actually seeing all the possible connections
that you get from the state

you have to choose the most appropriate connection
that is, that means that it leads to less problematic situations
for the future of a given person

Once you've done that
then it gets easier
because once you've chosen a stable area
you declare it
i.e. you stabilize it at the transition point
between the inner and outer surface of the sphere

and once you've considered this
stabilization segment
then you can apply further actions to it
i.e. to restore as it were further on
i.e. you form the second impulse

This is the formation of the second impulse
leads to the concept of Spirit.

i.e. you do all this

on the basis of your own Spirit

a deeper structure
is your Soul
which controls the Spirit

so from there, you can go straight from there
to the structure of your Soul
which is where you can obviously rebuild

because the Soul is harmonized
in relation to the World
in certain stages and structures

and so finding the right structure of the Soul
in this kind of reverse action in fact
you will instantly normalize

Now you have finished the first impulse.

So in the future you can use
such terminology as "mind"
i.e. a collection of information, so Perception
is the first element of contact
of your consciousness
with another environment, for example, and so on

so there's basically no limit to the number of terms
whichever you prefer

but the basic principle is the principle of transition
from the Consciousness which is called "deep Consciousness"
and outer Consciousness

This is the terminology that you're going to work on

This principle of healing that I've just described
it can be applied to any means of action of Reality

for example materialization if it is necessary to restore
materialize an organ or an object
dematerialization if you have to dematerialize a tumor
Or there are situations
when it's necessary to dematerialize some contamination in the equipment, etc.

so in principle
the principle is quite similar

through controlling clair voyance

i.e. by tracing a branch
and there comes from the depth of Consciousness
two rays at once

i.e. a small ball
from two surfaces
rises
two rays
to the inner wall of the sphere of your Consciousness

as soon as they touch
there is a branching at the two points of contact
immediately branching out
to all possible variants of development

i.e. all the external connections possible appear
but in conditions when you are a manager
through your own structure of the Spirit
you can also see how things are developing
for example, i.e. actually seeing the future

as events unfold
to suspend the redirection back

to this center of the sphere
and pull the beam back again if you don't like it

For example, yes, you want to improve it
raise the beam again, one or two
Bring it back up again and wait for it to level out
stabilization of the surface will take place
the spheres have already been touched at the desired point

then the future is already normal
For example, what does it mean to materialize an object?
The tumor is dematerialized, you know right away
as soon as you do it several times, many times
it will become automatic

and you just have to look at it
and even without the outline of the surface of the sphere
you'll instantly get
to the right point of consciousness
and transfer what you want
well, into physical reality

So this is enough for the first lecture
The training, i.e. practice for the next lecture will be as follows
you take this sphere of your Consciousness
you stretch it to an ellipsoid

and as I told you now only
the top surface of the sphere
and the inner point
I haven't described the bottom area

So when you stretch to an ellipsoid
you're going to have to visualize clearly to see
the actual bottom region of what it is

And notice
that as soon as you start stretching into an ellipsoid
the bottom region immediately appears
when I'm talking about a sphere
the bottom area
as if it's not manifested in Consciousness

So this is a very important principle
that if you just start the right movement
and an organ will be restored, for example
events will be grouped in the right way and so on

so it's a completely universal system
aimed
to control any process of Reality

This is the training you'll be doing until tomorrow

during the telepathic lecture from 22.50 to 23.00 hours
Tonight you'll see how I do it
from the outside

and transfer it to your training

Telepathically you can do it quite easily
because telepathy involves
often even your own thought
reflected in some action

For example, I say
you get a thought

you got a response
and you got a telepathic session

but I'm going to give you today
a direct Spiritual telepathic session
where there won't even be any intermediate steps

I mean, you'll get the skill to do it right away
This is also telepathy of the Spiritual plane
you'll see how to do it too

because this will be an important element in the next lectures
on controlling instant control
any phenomena of Reality
through the Spiritual realm
