

GRIGORY GRABOVOY
The Teaching of Salvation and Harmonious Development
Reality Management
from the Physical Body of the One God
and management structuring
from the physical body of a person
18.06.2003

Hello

The topic of today's seminar
this is the introduction and distribution
my Teaching on Salvation and Harmonious Development"
Reality Management Method
from the Physical Body of the One God
and management structuring
from the physical body of a person

in this method
we consider first of all
control ratio
where Reality is considered
as a structure that needs to be
first of all create
secondly, in the process of creation
management needs to be done in the same way

before starting this management method
I would like to give digital control related to that
what now for us to get
Current Time Management
and in this case this time should be considered
as time containing events

I will look at specific events
which are necessary
for a future time interval
for about four months
and this interval implies
specific management practices
where the event has already been identified

that's when it comes to

about the action from the Physical Body of the Creator
then for Him events exist physically

and in connection with this
we will look at a specific practice here

the practice is that
what is the number series that I will give now
it is primarily related
with level well as if macro political events

and here the situation is as follows
so that it doesn't happen
some extreme situations
in terms of necessity
preventing a possible global catastrophe
necessary through a number series

1 8 9 1 4 1 8 5 1 4

make management aimed at that
so that all elected presidents
here are the different countries where there are nuclear weapons
so that these presidents are in good health
and were not
as for example there is a possibility in the USA
somehow eliminated
by way of supposition there is a military coup

this is the control option
that the area that characterizes is drawn
namely the area of countries where there is
for example officially or unofficially
recorded presence of nuclear weapons

and at the same time management is done
for example, to restructure this weapon
was happening
precisely at the level of foreign policy management

when we look at real events
then we see
that the first sign of the Physical Body of the One God
this is a sign of the existing, rigidly fixed
at this moment of Reality

i.e. it 's as if time had stopped
for example, if we consider this term
well in Perception as "one second"
this situation will be like this
what exactly is this one second
Well For example let's imagine it mentally
that "1 s" is one second
this is the constant from which it comes
everything is like an external glow of Reality

i.e. at this very second
the whole Macroreality gets in
that's how it is perceived
The Physical Body of the One God
the whole Reality
i.e. Reality is located
in any even minimal action

and when we look at this
in relation to a person
those. we structure management
from the physical body of a person
relating precisely
with the Physical Body of the One God

then we see
that when for example you do some actions
let's say you write some text there with a pen
then they run into this text
as a rule macro concepts

i.e. to make some kind of recording
we include in this seemingly flat entry
Macro mental manifestations of the external World, etc.

by analogy with this
if we consider
for example, the action of the physical body
then the physical body of a person during some actions yes
for example, some intellectual work
for example, which is then, for example, output
in the creation of complex technologies of devices, etc.

it happens this way
what is this person thinking there, let's assume
then some technical systems are created

not necessarily technical there
making the right decision

and it turns out that
management here comes from the Macrosystem
as if into the target system

Macrosystem
the thought is connected
with the whole outside world

and when we look at this position
then it is clear that there are actions after all
are quite narrowly and precisely aimed
Here are the final steps

it turns out the body is like a translation system
Macrocosm
into final, as if point-like
precision control systems

and when we look at the system in this way
then we see that in principle, in fact,
if there is
information for example there is a macro explosion from a nuclear weapon
then translate it into so that there is no explosion
for example, by writing the exact numerical control there
This is actually an elementary action
connected as if simply with translation
into the precision control system

therefore, this is exactly when we speak
about the management of physical Reality
from for example the Physical Body of the One God
then we highlight
precision control area
where we should highlight the structure
which is generally characterized by the fact that
that the structure should not be related
with some external phenomena

Well for example around some person
around some event
there are many external phenomena
if we consider
the development of a given person or event there

as a target system
directed , let's say, at the goal of saving everyone

then we see that this goal
in principle, it already exists from the very beginning
but there a simple example that I often give
what's there in the next second
there was a planet there
something needs to be done so that she, for example, yes, it was not destroyed
i.e. the action of saving everyone is a natural action

and when we highlight
the area is exactly the right one
i.e. the area where the Physical Body of the One God
creates Reality

then this is first of all
the exact structure of human Perception and Thinking

i.e. when we think
then the first system of Reality
is created in the system of precise human Thinking

thus the connection
here is a direct connection between
The Physical Body of the One God
and a person
she is like that
that man is God's creation
has a permanent communication system
in the field of his Thinking

i.e. in the system which
as if not identified by all

well, that is, if I may say so
that people can guess
or who is sensory developed, for example, sees yes
that the thought of others in terms of there are still ethical prohibitions
i.e. as if controlling publicly accessible Thinking
then it turns out that we have in this case
this constantly existing connection
as a connection that reproduces itself
as if by the person himself

i.e. a sign of free will

it is a defining feature
in the precision of the selection of the information area
where is the Physical Body of the One God
works exactly in the exact system
i.e. it gives the exact position
next level of development

that's why I'm highlighting it now
namely the structure of the precise management plan
because well for example, here I am now
I give a certain management system
some time passes until the next time
for now I'm giving, for example, the next level of control

the accuracy system should be like this
for example, to the next level
Well, all the necessary systems had already been developed
in order to save everyone there
manage your own health and body
events, etc.

and it turns out
that we need a precision system
perceive in the same way
as a logical system

i.e. basically I explained it now
that accuracy is, in general, also
a simple logical system coming from a person

so it turns out that if we have
human control
then this is precisely management
which can directly go out
if, for example, a person knows the exit coordinates and methods
that this management is directly related
precisely with the Physical Body of the One God

and when we talk about the physical body
then we end up in a very simple system
in terms of management

because to see
what does the physical body do is quite simple
and when we, for example, allocate this control
from the level of events for example

i.e. we want to make some kind of control
in order for the event to be realized
then we see that the event is generally located
in every action of the physical body

i.e. if we consider , let's say Well, a simple example
how from the ratio
actions of the physical body
Well there let's assume to influence one's own health

Well, to relieve a hypertensive crisis
you just have to imagine
the right hand and head of a man
and that's all
and the pressure begins to normalize

i.e. the ratio of two
Well, it would seem that the person's own structures
gives standardization

if only we bring them out
to the area of Perception
and of one's own Thinking

then it turns out that if we, for example,
Well, let's set the goal of standardization
based on the data of the systems to the person
it's quite easy to see
that a person can only standardize on just about everything
Well in general, Reality
observing one's own physical body
and considering why, for example, a person
at some time acts does this or that action

i.e. if we assume the action according to Macrosalvation
it is a constantly ongoing action
related to the causal system

i.e. there is a reason
which requires constant work
in the system of Salvation of all
and at the same time see a specific reason

then the Creator is the One God
That's exactly what he did.
when he created both the whole Reality and

well, which is perceived
as informative
including physical Reality

and it turns out that this is exactly it
existence of a permanent cause
this is a certain path that a person goes to

i.e. a person does certain tasks
and when he comes to this
then he sees that he has come to that
what he can and should do the most
now so that everything that is the cause
would be directed towards
precisely the tasks of the One God
i.e. the tasks of Eternal development
tasks for example there is Eternal health of man

and if there is an external reason
she for example Well, it doesn't match these characteristics.
then it is brought to this kind of universal human plan yes

why do we talk
what is the cultural level
this is often the determining level
including for example there is health there yes
in the physical health of the nation

and when we do management
Well let's say on a multinational basis
where, strictly speaking, nationality itself does not matter
then we select an area that is not
area as such, well, strictly speaking, correlated with something

that's what I brought to this and I'm bringing to this
to highlight the incomparable system
with some kind of external phenomenon

i.e. in what way
we are looking at a person
well, the one that needs to be saved
and which needs to be urgently saved

we often highlight
only one single criterion
by which he is saved yes

or is the whole civilization there ?
can be saved by one criterion
we do not consider this
there let's assume the history of the development of civilization

i.e. this is a single criterion yes
which precisely exists in each
and it is a comprehensive criterion
and according to this criterion a person is often loved
only for this yes
not because he did something specifically somewhere

so when we highlight
already a criterion of this level
in a person
in general in any system of Reality
then we see that we have come out
specifically into the control system
and they came out
on such a synthesized
i.e. Spiritual
human
collective
at the level of the body including

please note that this is the first time I'm giving
exit
at the level of the physical body
into this control system

and when do you go out
already actually a physical body
then you see how it works
The Physical Body of the One God
you understand him immediately

at the same time you understand in principle
how should one communicate with Him
i.e. what are the criteria for communication
i.e. well for example why communicate
with the Physical Body of the One God
i.e. what is the difference between a yes and a human

i.e. there are no differences in physics as such
here in principle it may not exist at all
i.e. this is the usual Physical Body of a Human

then the meaning of management is obtained
coming from the physical body of a person
it may be similar

i.e. any external Reality
can be completely controlled
and precisely controlled

we are considering it
The Physical Body of the One God
as a Body that is in the system
where is Reality
and is created
and somehow it develops
where each element
This is a controlled system

and when we consider
why are there any problems with humanity yes
for a specific person, for example
in general in the world

then we see
that the path of free will
this is the path of co-development
physical body of a person
With
The Physical Body of the One God

at the same time we know
that the Physical Body of the One God
this is the indestructible Eternal Body

Well for example after the Resurrection
or the Resurrection of Jesus Christ
it's clear that he has other tasks, yes
other tasks of His Body
because it is already indestructible

and when we move to the level
already the following tasks
then at the level of free will
we can see
correspondence
For example there our thoughts our movements
namely the Physical Body of the One God

and when we are exactly
on the principles of free will
we highlight this level
well, exactly what it is
this is like a fundamental level of management in the World
then you can see that the control is here
can be completely instantaneous

just being here
take and put
tasks as if within themselves

and you will see that the body
this is how it would be filled with tasks
and the tasks were standardized

i.e. the body
this is a normalizer of your tasks
in terms of the Norm
your physical body well like a tuning fork
which if you perceive the task as if inside yes
inside precisely such a socialized level
where the criterion is not explicitly expressed
but the level is accurate

This is how I explain it
that level is exactly where the tasks are absolutely clear

You see with your Consciousness that the tasks are clear
when you solve them
you get
a full-fledged solution mechanism

hence
The Physical Body of the One God
receives the control mechanism from that
what He does but does it as if at the same time
and in the past
and in the future

i.e. a period of time is allocated
which corresponds to the future
for example, the physical body of a person
and in the past his Thinking

if for the future it is yes naturally normal

i.e. it is clear that in a second
human physical body
is in the future time interval
then for the past Thinking is normal

i.e. the level of standardization
in this case it corresponds only to Thinking
i.e. it's clear that well For example there is a variant of that
that much has been said about time
and many different points of view

that's the easiest thing
for the collective level of Consciousness
just mentally transport
there let's assume there a second ago
and connecting this interval
there is a minus and an interval where you can think
and the future where is your physical body
you see Spiritually
the best thing is first of all spiritually
or there by Soul

then connecting these two intervals
you see how God works
i.e. how does it work
from the Physical Body
but with your Thinking

and here comes the difference
how the Physical Body of the One God thinks
and how does he think, for example? there is a human physical body

so here is the level of Thinking
if there let's assume we reach the level
or there somehow
structure Thinking specifically
that the cell is a material level, well as if more basic

then it turns out
that the exit to the cellular level
this is the level that contains
exactly two components

i.e. the cell exists
Well for example, previous human processes
and she also has this, for example there is a future process

which is generally defined in the cell
in the form of a core of some processes
intracellular yes

and considering that the cell is more tightly compressed there
well, other cells of the body
meaning physical cell

then for her, for example, the following event
this is an event well as if to a greater extent
as an event from which control comes
through intermediate cells

i.e. a person, for example, wanted to drink a glass of water
and at the same time a cell of the brain, for example
she reacts somehow
but it will react to water later
when he actually drinks

so it turns out that if we consider
namely the cellular reaction
that's where it's most easily traced
that the Physical Body of the One God
works
with external Reality
approximately on the same principle

that each next element
like he goes through a certain network
certain layer, as it were
sufficiently compact dense events

and that's why we can
well to see the world like this
in general, quite close approximation
to us in the form of some phenomena of Reality
what we have to go through
Well as if with this optical glow
some specific density of nearby objects

and let's say if we ask the question
why is the physical world exactly like this
that there is a need to build
that's exactly what things are like
and that's exactly how we'll build streets, let's say
and why exactly this type of traffic

but we won't say Well , let's assume the roads are not ten times wider, right?
if you ask the question

and how to just take and turn it off
for example, management, well as if by Thinking
from the level of historical development
i.e. take it from the current time

then it turns out that there is a need
precisely as if a compaction of physical Reality
towards the person
like this specific pressure
the tone of the elements of physical Reality

and when we see
this principle in social conditions
we see that the presence of the One God is already
Physical Body of the One God
in physical Reality
this is a fact
which you can generally consider
Well For example there through the messengers of God
there through the saints
through people who are enlightened
which can make the management more, well , upper
than, for example, social systems

and when you see the World as it is arranged
you see that there is a hierarchy
Well as if some kind of distribution across management levels
this is what is the sign of equality
in relation to the One God
To God specifically

and when you look
sign of equality
that in relation to the One God
we see exactly that level
that equality is the way

i.e. just this or that person
goes through different paths
in relation to precisely
to the Physical Body of the One God in this case
and a certain level of physical Reality is obtained

why in this case I am considering
namely the Physical Body of the One God
because we see
what by analogy
Firstly, as I showed
we can see how Thinking goes yes
for example, yes, the Physical Body of the One God

and we can also consider
what do we need to do
so that Thinking well let's say it was similar
and we could think more precisely
in terms of achieving the goal, for example Yes

because there is such a criterion for free will
any Thinking is generally of a creative nature
it is accurate from the start
man by free will
somehow reproduces it

and when you see
what exactly is the Physical Body of the One God
is decisive
in relation to social categories
Well For example there in the Physical Body is the One God
walks the streets there
and when you see it like that
then you see how it is possible at all
then reorganize social conditions
to the side, for example, so that it doesn't explode
let's assume there is a nuclear bomb there

i.e. how to make it so that in general
Well, generally speaking, this situation didn't even arise

because the principle is very simple
you just exclude everything
events that are not needed
and you see that the Physical Body of the One God
which is indestructible
will not allow this

therefore you just need to
you need to somehow relate to this
well some structural actions
undertake in Thinking

and even Thinking is enough
because social actions
They are generally known to us

so when we want to know exactly
at the social level
what needs to be done
we have certain categories
specific management
Well for example for specific places yes

today if i say
for example about macro political management
then this means that under macro policy
There are always plenty of other tasks yes
prevent the opportunity from starting
some global problem
in terms of military problems , for example

then other phenomena can be calmly regulated
i.e. there is a kind of list of primary phenomena and secondary ones
in social terms

and why exactly am I touching on this?
it's like a social plan after all
because here I show
what exactly is the One God
when he formed Reality
He showed it naturally
that all phenomena must pass
through society
through Macro Management

that's why I always point it out now
exactly to this level
what is the social level
it is also decisive

That's what I teach
so that according to my particular control system
according to my Teaching on Salvation and harmonious development
knowledge was best spread instantly at once
if this knowledge concerns that
so that there are no macro-catastrophes, for example

i.e. for this it must be natural

path i.e. to everyone through society

therefore social laws

generally speaking, physical laws

laws of physical development

laws, for example, regulating human health

so that a person is always healthy

these are the laws that also determine the connection

with the Physical Body of the One God

and generally speaking they define the connection with God as such

i.e. we are considering in this case

Perception of God as the God of all

and the criteria for His awareness are different

so it turns out that

any process must concern us

i.e. if we know

that there might be some kind of disaster somewhere

macro disaster

therefore, this is also our job

so that it doesn't happen

from the point of view of dialogue with God

with the Creator of all Reality there

so it turns out that in this case

we can see the path like this

how is it going

Well for example the Physical Body of the One God

as there Yes, a person like a person

and do it just like that

i.e. such actions are always accurate

when we look at this very moment

i.e. we are considering the Physical Body of the One God

and the criteria of this unity are that

what when we talk about God

in a more general sense, let 's say

everyone can have their own understanding

then the Physical Body

this is the only criterion of accuracy

where everyone sees the same

in the form of, for example, the physical body of a person

but the Physical Body of the One God
this is the physical body of a person
i.e. God He looks like this

so it turns out that we can move
Well for example Consciousness
to the Physical Body of the One God
considering the position in this way

but we can also consider it this way
that naturally there is One God
He is maximally human.
therefore we can consider
his actions
as Actions of the Creator

He who created is thus manifested.
in our understanding
since we are in control
we can perceive Him exactly like that

therefore, movement is precisely thinking
movement of thought to the side
Physical Body of the One God
this is what allows on each element
normalize Reality

i.e. well, here is a simple example that I gave
what if we consider
that the Physical Body of the One God
is located well there is
on specific physical streets there
then it can no longer be destroyed

therefore it cannot happen for example
there is some kind of attack there let's assume there in the city yes
where is the Physical Body of the One God

i.e. it turns out
what are the criteria for standardization and management
in this case they are very simple

and it turns out that only this
appeal to this level
gives exactly the full Norm of knowledge

to this is just that example
when the criterion is as if well, some kind of beacon, yes
which we choose as the ratio
with management level
he is the complete and direct knowledge
which we receive almost instantly

but that's how humans are made
Generally speaking, he gains knowledge almost instantly
and therefore, well, for various reasons
he can react differently there
or implement it differently

and this is the principle of instantaneity
this once again speaks to that
what is the physical body of a person
that's exactly how it's designed
as the Physical Body of the One God

and when is this principle of instantaneous acquisition of knowledge
we have
how well actually how are the management levels
then in this case it is worth adding
only one simple element
as a level of co-organization

those. as organizations
some element of Reality
and the next level is like the next organization

it turns out that this is the level of co-organization
it allows you to do management in general
already distant levels of Reality
but already to a person

and when you see
distant levels of Reality
at the level of, for example, just a fact and one's own creation
The Physical Body of the One God
then it becomes completely elementary and simple for you
see
how then is there one God at all
created the future Reality
for example specifically for you
or for example for everyone

i.e. selection of elements
in this case it is absolutely the same
what to see
own development structure
what to see for example there Macro level

and it turns out that this is the level of freedom of choice
it gives the opportunity to build, generally speaking
any creative Reality

and therefore we can be integrated
at the level of social processes
i.e. well let's say the global level
where there is no possibility there are global catastrophes
because everyone should still relate
with some level of future development

that's why I touch on it quite often
for example, some foreign policy systems
domestic political
for there let's assume citizens of some country

and so when we look at
it is the integration processes
then it is clear that social conditions
For example Well, it's a sign of statehood
it was created for that
so that there would be a level of co -collective management

where are the participants of this particular level
something recreated by the people themselves
they saw what was in their hands
create the next one there Macroreality
but let's assume by way of there is no personal voting
for elections or for some kind of national projects

i.e. it turns out that if we consider the state
by analogy with necessity
management specifically
then it is clear that, generally speaking, all social structures
this is also a level of some kind of training
where is the next level
this is an expression of personal freedom
and the level where the collective already becomes
as if private to a person

i.e. that deep level
where there is precisely no correlation

because for the Physical Body of the One God
what is private
that all of humanity is there
in principle, this is generally speaking one level of Perception

i.e. for Him it is equally important
and man
and generally speaking all of humanity

so it turns out that if we consider
that's exactly how Reality is
then we see that participation in collective management
it turns out to be necessary here

why by the way here are the social authorities of many countries
they are calling for more active implementation of systems there
there are some social ones, etc.

because in principle it works out here
with this technology
that we participate in the same way
and how are they related?
with the Physical Body of the One God
who created everyone
including created social processes there

therefore it turns out to be complicity
well that's the bare minimum
which a person should do

when you look at such processes
well from this position
then you see that your health is being rationed
even with precise Thinking

here there is another control element
you can think accurately
and you get control at any distance

and it turns out that if you, for example, make management
well almost instantaneous yes
for all systems
then you get often instant control for yourself

but often you get control for yourself
there after some time interval

and by analogy with this process
the Physical Body of the One God is also arranged
where is his level of control
this is the level of first Soul management
and then comes the control from Thinking

i.e. the Soul of God is in the events further ^{yes}
it is an Infinite level of development
and Thinking
this is a projection of the physical level of a person

i.e. if we consider the Thinking of God
then it is clear that there are physical phenomena
because for God
what is informative Reality
what physical
it's the same thing

therefore if we want to consider
level
where does God have physical Reality
so here is physical Reality
is in the Thought of God

in relation to a person
I specifically relate to a person

and when we consider
why then is it so? ^{well}, it's quite natural after all.
Reality is developing
when the mechanisms of Thinking can be different

then it is clear that by analogy we can
also create your own level of Thinking
which allows in the same way
control physical Reality
or there is an informative Reality

and thus we get
what if we correlate
^{for example} levels of Reality
Let's just set the task
and ^{for example} let's ask ourselves the question

here is the action
if in the optical expression of the Soul of man
which is precisely defined as the action of the Soul
for a person
aimed at for example there is salvation for all
let's assume it's one optics yes
for example silver - white

and if we consider
what is the Action of the Soul of the One God
that is precisely what is aimed at the same goal
then we will see what it is before
First of all, it is the person himself
i.e. his physical body

i.e. let's take a person for example
who controls or for example himself
and then we see in principle
the same silver color
only its functions are immediately Infinite

i.e. if we see in a person
optical control level
and then it goes into the Infinite phase, as it were
Well, from a certain central point there is growth into Macroinfinity
then for God every point is already Infinity
i.e. the difference is only in Perception

and it turns out that we can do it this way
differentiate
where there is God's Action even by optical criteria
and where is there for example yes, a personal action of a person
in terms of precisely the maximum
or even absolute personal freedom

thus we see that the Action of God
co-directed with a person
is located precisely in Infinity

it is clear that in the Infinite Glow
all phenomena are defined

and I think that here you can see right away
generally speaking, the maximum sense of management
i.e. the meaning of instant and precise is the most important thing
management

that precision is the main thing here
because there is precise control ^{there} so that there is no explosion there
^{for example} somewhere in Nevada at a nuclear power plant in 7 years
this is precision, i.e. specific, precise
although it is said in words

and when we make management specific
it is precisely the docking, i.e. the connection at the level
where any optics is the whole Infinity

all events
the glow of control from God
we connect
with self-control optics

then we see
which is achievable here almost instantly
any creative management
first of all for everyone
secondly for myself
in principle, almost the same or there it can be immediately instantly
someone will want it later

I am now introducing such a control criterion
i.e. try to make the following control

there is before you simply a sphere where there is control from God
as I described it
and each point of the sphere is an Infinite glow

enter into the center of the sphere
its own glow in silvery-white color
and try to see all the tasks ^{as if} inside yourself
inside the solution of already problems
that your body is physical
this is the solution to the problems

i.e. so take the Light
This light is inside ^{yes}
here are ^{like} two spheres
inside your body
so that the body is filled ^{with} two types of glow
your own already solved problem
and the glow from the Physical Body of the One God

and try to make this sphere ^{as if} well, so that it fits into the body

somewhere inside it was moving up and down
and walked around so that the issues were resolved
the solution is the Norm of your physical body
so now make the control
and I will work with you

and when you do the management
that man is not relatable
it is through this that you conduct control again
well, with some kind of even external phenomenon
i.e. a person is initially that personality
which was chosen by the One God

i.e. the principle of self-respect for the individual
this is the maximum level for that reason alone
what does man even exist
God created him well For example yes through yes parents
but initially it is the Action of God

so when you see control at this level
then try to see your own level
independent of external causes
i.e. you are already a person
because God created you

that's why you get
exactly well generally speaking
self-sufficient level in management
and you often don't have to react there
to some external events around you
you will reach the goal of Macrosalvation in any case
that's for sure

i.e. when you look at management like that
then you see that the soil
i.e. well, actually even more
closer to ideology, yes, it turns out
although this is management

i.e. here in this case
what I called the word "ideology"
this is already external information

the management is exactly like that
that when you look at your personality like that
then the management is carried out practically because

why did you look at yourself like that?

and when you see, for example, that there is some kind of problem
can exist there for quite a long time
or you need to log in to management
well in relation to that Reality
which we suppose is it destructive there or is it intended that way?
then the situation is as if for external control
that you firstly realize that it is actually not difficult
i.e. any management is always management of one level

essentially make some basic control
or there is management for Macro Rescue
generally speaking for the One God it is generally speaking the same thing
so for you it is also in Perception
should be the same

therefore in Perception you can do this
how does the Physical Body of the One God
those. point of connection and transfer of knowledge
this is Perception

and when you see the outer Reality
or react to it in some way
in the plan let's assume well some actions
then perceive it next time
then you see that your Perception can be
at a certain level completely unchanged

Well let's say I'm looking at myself
I can say that it has been there since childhood
Perception has not changed at all
Well let's say on a certain optics there
at a certain level of Spirituality
or State of mind

i.e. the situation there is quite calm
in terms of Perception there
let's say external objects and distant ones
this situation does n't seem to change
from the point of view of the availability of knowledge there

and even somehow I, well, I can say
according to their own levels of self-analysis
At university I once asked myself a question
in terms of well there is a beginner's course ending

internally compared the dynamics in general
Well, from the point of view of the management level, yes let's say
fundamental level

then except well as if this external knowledge is purely applied
i.e. that level is practically in management
he, well, as I suppose, considered it myself
he hasn't changed
i.e. I perceived it as I did in childhood
and then already there having some educational technologies
ordinary and orthodox, etc.

and it turns out that if we consider
exactly the level, well, just like I just gave as an example
let's assume our educational experience there
that is the level
which initially contains, generally speaking, all knowledge
they are originally known to man

because the Physical Body of the One God
everything is always known
i.e. He has no concept
well, in the understanding of a person "to learn something there "
He just knows and somehow implements the system.

this is what happens in human perception
the most difficult to understand , I guess
structure
in a more general sense
not in the exact but in the generalized
as if you know everything
then what is the next step
i.e. what actions where there is fame yes any situation

so it turns out that it 's kind of absolutely
i.e. there is very concentrated knowledge there, yes
let's say all the knowledge
This is also a certain system that needs to be overcome

i.e. if you take and say
that "here is all the knowledge and, for example, you can use it"
then in principle in order to use
we need to develop a technology first
when there is all knowledge
here's what to do next

and here it turns out that the next level of management
which is in human perception
is precisely the level of development
this is something that a person develops independently

i.e. it turns out that yes, a person has a level
where knowledge is practically
Well let's say close to those
what if the task of the Physical Body of the One God
this is the creation of the whole Reality
for a person, in principle, this action is well according to its task

and he has all this knowledge

i.e. it turns out that the action is based on this knowledge
this is generally speaking a ratio
again with how the Physical Body of the One God is
controls precisely the level of omniscience

it turns out that this is the order in Perception
looks exactly like action
next action
precisely in the accumulated concept
physical body of a person
Souls
Consciousness
this is what gives well development yes generally speaking there
civilizations of a specific person, learning, etc.

if we ask ourselves the question
why exactly do they teach there at some point in time, let's say
Well , there are some letters and numbers, they somehow teach you how to add
up , etc.
then we see that it is connected with the social level
originally created by the One Body of the physical plane
i.e. precisely with the Physical Body of the One God
we connect this Reality

at the same time we see that if we look from here
then any level that exists
in some historical process
in the form of manifested educational systems
this is how we see it at that moment
The Physical Body of the One God

Well let's assume moving forward yes

somewhere in the thought control
somewhere around the 18th century and looking
how is mathematics presented there or writing there
and compared with the current level
we see a difference, as if the pace is accelerating
in a certain interval
what can be expressed well let's say yes to the temporary element
what is this well let's say the simplest notation
what is done faster

I don't think this is actually a simple designation
this is what is expressed in approximation

that's when we talk
why do we need technological progress
or some elements of development

the thing is that the approximation
precisely to the Physical Body of the One God
and the Physical Body of the One God
has all levels of development
naturally this is all that can be done
generally speaking from the point of view of the development of civilization
a specific person

i.e., in principle, technogenic progress
it turns out that this is also true
the task of the Physical Body of the One God
It shows that development is in principle unlimited.

and through this development
we see that any action on standardization
for example, the health of the one who develops this progress
or by his Infinite Life
this is the action that in this case
requires spiritual understanding

Yes, it is clear that there is technology
are some cybernetic systems there
but the Spirit that originally exists
as the Spirit who comprehends
The spirit that perceives
this is what allows you to control the system

and therefore it turns out that even if there is all the knowledge
a person there in his personal life or there in society, for example Yes

then he should still perceive it
to control the system next

therefore the Physical Body of the One God
having all the knowledge implements all this knowledge
in the system of Perception after all
and the next level of control

and it turns out that
Well , it's clear that people need them there
for example, physical eyes or there
Well for example, if we consider the option
that a person has some kind of disease , yes
let's say peptic ulcer

then we see that this is a disease
it would seem that yes, this is the gastrointestinal tract
nevertheless, let's assume that there is a specific stomach ulcer there
Let's consider this disease

then we see that when there is Perception
Well let's say there is white color
physical physical eyes
then the ulcer is restored

i.e. the body recovers faster
the ulcer practically disappears
if all the time
well , either imagine or look at the white color

if on green
there let's say with some dark specks
in Perception
then we well as if the recovery of this ulcer is delayed

i.e. the task here is precisely to consider
something that we perceive with physical vision
This is also included
and it is clear that the internal state

by analogy it is clear yes
we eat using physical vision there
or at least elements of skin sensitivity, etc.
smells taste sensations

if we perceive an element

as an element for example
which must be normalized within the body
then you can develop a very simple technique
rearrange colors
just knowing that the external Reality
for example for the Physical Body of the One God
it's the same thing on the Spirit
that and the inner Reality

i.e. the Physical Body of the One God
It's so versatile.
what does he do after all
well the Reality of the Physical Body
what is external Reality
in principle for Him it's the same thing

and it turns out that by normalizing this element
enough
well, the Physical Body for example
enough means just take some color for everything
put the meaning of restoration
For example there is white color
ulcer recovery yes for example stomach

then it's just enough
put a thought into it
and then the recovery process begins
which in the future
if we generally invest even
your thought as a controlling thought
then this process leads to that

that we can put the management of the next plan
for example, a blade of grass grows near a nuclear power plant
we need to put in the meaning that it will not be destroyed
this is just a zone of the earth
but we came out through a blade of grass

i.e. and when we see that it will not be destroyed
for example from radioactive radiation there
It is clear that the nuclear power plant does not explode
but we added radioactive radiation later

and it turns out that this is intelligence
i.e. human development

the next level of its development
i.e. as if Well, I made some scissors
i.e. from one level to another
this is what creates Reality
i.e. the Thinking of the Physical Body of the One God is like this
that in order to create an investigative Reality
for example, this blade of grass is created

what i did now
I just passed by
for example, according to the Thinking of the Physical Body of the One God

it turns out that the elements of creation
that exist in the World
in general, elements of Reality
it turns out that they are like
Well, in logical Perception they should be separated
on the elements well as if those through which creation occurs
and those who well as if created
already in finished form, yes, they exist

but for the Physical Body of the One God
again returning to that
that for Him all the elements of Reality
it is actually one
i.e. for Him everyone is equal
including there for example, the level of micromolecules of some
or submolecular states

and when you look at Reality in this way
then it is clear that it is the physical body of a person
this is a level
which normalizes all these systems among themselves

i.e. if we consider the question
that's why it's a person
there it determines the ecological situation there
and not a representative for example there is no animal world there
or is there a plant there ?

and because this is the task of standardizing the system
is imposed precisely on the physical body of a person
in principle, including on the body itself
just like a form

and that's why when I talk about that

that the physical body must live and develop forever
for each specific person
then I mean, among other things, that
in this case it is the body
which set such a task and accumulates knowledge
already does more and more for the external Reality
including for myself

and it turns out that it is arranged in the same way
and development into an external system
it is precisely everyday development , as it were
of the One God does there
What exactly does he drink or eat there , for example?

i.e. precisely development inward
into the human social system

and when will we even ask such a question?
then we see that the Physical Body of the One God
naturally, well at least at the predominant level
drinks clean water there
and somehow this water gets purified
before he uses it in his body yes

i.e. this is a specific technology for purifying, for example , water
or there are food products
that's what I just said

i.e. it is enough to just ask the question like this
and consider that everything that comes in well there in you in the form of food
For example yes , and in the form of some external air systems, etc.
then as soon as the question of compliance is raised
To the Physical Body of the One God
then on the mental level
immediately goes to a level of, well , spiritual telepathy
where are you most
it is mental telepathy that matters
you get a powerful channel exactly as if filtering
i.e. all processes are filtered out
which may not be beneficial for the body

and therefore with Eternal development
the more experience you get
the more you benefit from the experience
precisely the creations of Reality
The Physical Body of the One God

and as a result of this I specifically highlight
for precision control
interaction with the Physical Body of the One God
where is the manifestation of the Physical Body of the One God
in physical Reality
this is a specific mechanism
which allows you to actually work
just like the Physical Body of the One God works
as if by itself

i.e. to a greater extent
a person may not think and not control
if it is not necessary
some processes

so learn to work like this
to make your physical body work
well at least it's similar there yes
To the Physical Body of the One God
would not have any current problems there

and at the same time the body
this is what is organized by the Soul
i.e. this is also a part of the Soul and an organization from the Soul
we see that this is also the task of the Soul

i.e. we solve not only the problems of the physical body there
but we are not solving problems of destruction
specific person there, yes
where in its manifest form it is expressed
in the form of a physical body

it is enough to implement this policy
Well as if at the level of Macrosystems
it is clear that such a person, being somewhere
then it will no longer be destroyed

and therefore in this case it is meant
will not be destroyed
For example there from the macrodestruction of some macroexplosion, etc.
and then it will no longer be destroyed by some minor problems
i.e. from some random variables and everything else

it turns out that in this way such a person
he regulates the Universe

social conditions in general
just because he is like that

if it already has the functions
that it cannot be destroyed in some way
it's already forming around him
this or that social system
which when controlled
will further contribute to this

therefore achievement for example
well, some kind of normal and ordinary health
in the presence of a large number of such people
for those people who, for example, Well, I haven't mastered it yet
there is a complete system there
it will be less problematic

i.e. simply the presence of such people
which are so functionally defined in the World
they themselves carry the Light
this kind of standardization
towards Eternity

and from here follows another level
functions of the human body
in relation to the Physical Body of the One God
also human

the function is that
what for Eternal development
it is necessary in principle to do so
so that your physical body
it would have been practically undirected
just for the hell of it let's say the solution to the current problems
here as if which exist in the form of there material systems

well, that is, not just something, as it were
in terms of implementing specific tasks
there take a glass of water to drink

tasks of the physical body
this is awareness by the body itself
awareness by the body itself of that
that the mission of the body is practically directed
on a generally universal level

i.e. as soon as you realize it
you see that in this way you connect
with the Physical Body of the One God
in terms of awareness

because the Physical Body of the One God
has this as an awareness on a logical level

once you put it into logic
you see that even when you sleep
you can basically do the same task
that in general, they do not actively participate in the management system
simply due to the light of your Consciousness
be able to
or there is the light of the Soul
or the light of the Spirit yes
or just some kind of glow coming from your body
be able to do management
by Macroregulation by Macrorescue

and achieve the state of the body
determined , as it were, the next step there at the Macro level

and at the same time you should see clearly
its clear this is precisely the position
where are you at this moment
i.e. how developed is your physical body

because there is a basic principle
Well, the principle is when you can't experiment
Well as if the principle of no temptation yes

i.e. a person should be healthy simply because
that he strives for this
and does this in relation to others

and at the same time well let's say this if we want knowledge, well, these
were transmitted very quickly
and that's how it should be, we can only proceed from this
that knowledge should be transmitted instantly

then if we follow the path of experiments
from the point of view of invulnerability
there let's assume there is skin on the little finger
then we can make this knowledge autonomous, so to speak
just for myself

and others who well for example, they haven't mastered this system
are not at that level yet
to have some kind of super-fast regeneration

so in no case can it be done
to determine the coordinate system yes
for example, the level of your development
use some external stimuli

i.e. you have to do it the way that person does
who, in principle, has only just begun to master technology

if everyone masters it
then the question will resolve itself
there will be no system for implementation
so the external event is sort of excluded

the system of free thinking is like this
what needs to be worked out here
location is where you are
in the system of own development
provided that a person always develops as quickly as possible
from the point of view of the Laws from the Creator
from the One God

and here a very simple element
namely the coordinate element
is the relation
in relation to the Physical Body of the One God

as soon as you work out
more and more levels of communication
precisely with the Physical Body of the One God
the more accurately you determine firstly
coordinates of one's own development
to solve some problem

because in essence a person is free
he is not obliged to engage in coordination
or think where it is in development

and there is such a simple principle
that he will only hear the first words there
for example Macro-rescue
will do it already yes
and he can also save everyone

i.e. there is no distinction
namely the concept of "growth" as such
because everyone is sent by God
according to his personal task

and it turns out that if you
you are looking for a coordinate system
then it can also be like a control search
i.e. why is this coordinate system needed?
Well, to make management more efficient

and for this you must ^{therefore} see your level
in relation to the Physical Body of the One God

it turns out that in this case
the easiest level to see this position
, look at ^{this} how deeply can one say ^{yes}
in the Soul it will rather be as deep
right in the center of events here

take and look inside your physical body
the level that denotes
the very depth of events in general
you first and foremost, ^{for example}
then ^{there are} some external systems
and if it concerns you, then it concerns the whole world ^{too}
at a certain level

and this is where it concerns both you and the whole world
there is a manifestation of the Physical Body of the One God
which shows
where is He in relation to you

and the first level if you take control optics
take ^{for example} from your heart
direct the beam towards the stomach, ^{for example}

then take and make this light like this
very comprehensive
so that it would turn into an external light, ^{as it were}
and illuminated your skin
i.e. you created yourself from the heart

i.e. they created their form from the heart
through the projection "stomach"

the stomach is an external system
where does the power come from ^{yes}
i.e. elements of the external World

if we consider the control
that the outside world is also created
The Physical Body of the One God
then it turns out for the Physical Body of the One God
external power supply
that's ^{basically it well,} purely informational products, ^{so to speak}

i.e. it is like an element of Thinking
it's like thinking for a person
that he ate something and mentally ate it

and it turns out that a person created some kind of object
^{let's assume there Well there} specifically here
create lightly salted cucumber
and take it mentally to eat

it is clear that some sensations are retained
but they are stored more in the memory function
and when we analyze it later
what did we imagine ^{there}
then it is implemented as memory

therefore memory is an element of transformation
for the Physical Body of the One God
element of transformation of external elements of the World
exactly ^{as if} into the internal reproductive system

if the Physical Body of the One God can gather together ^{yes}
and ^{it seems to be} constantly gathering
then the person believes that he is to a greater extent
^{as if} it exists automatically

then if we ^{somehow} correlate these phenomena
the system here is quite subtle
but it is very strong in control
here, if possible, listen more carefully

when it comes to that
that the Physical Body of the One God
can be assembled instantly
and It always exists
because it can do it ^{and it does}

as if every second every instant
then the external elements of Reality
i.e. what is a food product
for a person
for God
this is what is simply in Thinking
maybe ^{yes} informative Reality

as soon as we give functions
any element of the external Reality system
exactly ^{well} how we talk about what is structural
we work similarly in Thinking
then it turns out that the external element
which is nutrition
can be an element of complete self-assembly
i.e. complete self-determination
and at the Norm of events
only in the case when we just thought about eating something

Well, let's take a physical one , and the same ^{lightly} salted cucumber
and started moving towards the mouth
here on the element of movement
the person already exists and is healthy
and it is basically normal
in terms of sufficient food supply there

and it turns out that a significant part ^{yes}
physical elements ^{there}
can be replaced with the Thinking system

but at the same time if at least one person
^{for example,} he can't do this
therefore everyone eats until he learns

and this is the meaning of the dissemination of knowledge
on all
including this one, ^{in general,} it's quite trivial , ^{yes}
everyday meaning

so when we talk
about the Health Norm
if we consider ^{some} nutritional practices
that is, sometimes there are recommendations to eat something slowly
what people usually don't do
^{there} in such a busy modern life

and if this concept of "slowness"

to be derived precisely as a control criterion
just by the ratio as if at the same time
Well, it depends on how he eats in general
The Physical Body of the One God

it is clear that it is from the same regular food
you will have much more in terms of rationing there
for example, personal health
in terms of this glow
which extends to others
in terms of the Norm

i.e. it turns out to be a working mechanism
with the Physical Body of the One God very pragmatic
it allows basic things
which well generally speaking, physically very common
it allows
This mechanism is quick and easy to implement

but on the other hand
this is the highest concept
i.e. to come to the Physical Body of the One God
in terms of understanding
there at all levels of human existence
I'm not even talking specifically about a person as such
of human existence in general

those. all development of society
this is also an understanding of God

and when we consider here
which in this case is
Well let's say it's a criterion of complexity
then we see that it is both at the same time
and the maximum level, well, in terms of complexity , is Perception

and the unification of this, as it were, maximum
simplicity and complexity
gives a criterion of normalization
well , well, the macrocosm and the microcosm
give a certain Norm
in our Perception
in our development

and when we see this relationship
in terms of what it 's like in general

that's the difficulty, ^{yes}
and what simplicity
then complexity is the Physical Body of the One God
contains , generally speaking, all events of Reality
past and future
and at the same time it is just ^{one} Physical Body

and at the same time the Body that implements all this
there is a concept of God there
there is a concept of the Soul of God
and the concepts associated there with man
Action of God

and when you see such a complex concept
that your Perception is an element of Perception
i.e. you are discussing this
get a specific management result

Here's ^{an example} of something related to nutrition
what is the methodology ^{there?} For example ^{there is healthy food} ^{there}
you can eat ^{whatever} you want
and only relate to that
as God himself eats
His Physical Body as it takes food

and when you see
that the ratio is the path, i.e.
it is clear that even if we talk
about complex concepts or about simple ones
then the further we go from simple to complex concepts
the more stable, i.e. more accurate
becomes the way
more ^{as if} fixed

every next step
he becomes more productive ^{in general}
from the point of view of the development of the Soul first of all
of your Soul
precisely from the point of view of how God laid it down
it is the Truth of development in you
i.e. your development

it turns out that in the end
The world is still determined by one person
i.e. in this case you choose ^{yes}
criteria

you choose the route
and you move forward

that's why when, for example, I set a task there
Macrosalvation and Eternal Development
this is, in general, the task of action
in principle, this is a necessary task

and at the same time the entire next spectrum of development
you have the one you want

and when you see
that this desire is yours
develop further Reality
it is an inner desire that drives you
For example there to the next step

then you see
that development is essentially
this is what is determined, of course, by external Reality
are some tasks there
but also how you overcome it yourself
element well as if the next task
there is the next possible problem for example

or not even a problem
and in general there is no joy or rest
i.e. some favorable systems

and as soon as you see it
you see how the Physical Body of the One God is in general
Creates its own system of overcoming
because for God
what to create a system
that to overcome it
it's basically the same thing again

and when you start to see it
you see that the physical body
can be organized as if in layers
starting with the skin

i.e. if you perceived
at least one level of the human physical body
Well, look at your skin and mentally
for example, to any area

in fact, you are already invulnerable

because if God does so
That's what he is

and when you see it like that
you see that it is quite simple
at the level of Thinking, *yes*, to perceive the skin
and from the skin to build yourself simply

and then the most important thing you will see
that you built yourself exactly like this
how you and *generally speaking* were originally built

i.e. the path of construction
which goes *for example* through *well* like a skin scan
and further development from human skin
i.e. from the first impulse
this is what is the correct level
always in your Thinking

but if you begin to act by the Spirit
Infinite system
then you get the third value

i.e. the logical level it gives accuracy in construction
The Spirit gives precision when it comes from Infinity
i.e. it comes from God *yes*

here is the concept of the Holy Spirit
and when you see *well* the holiness of the Spirit
element coming from outside
then you see that the Soul reacts first of all
on the element of the Holy Spirit
or level of holiness
this is the level of some *kind* of enlightenment

when you see Reality this way
then you see that in principle
building a person through Thinking
it is a simple structure

i.e. it is enough in this case
i.e., *for example*, after listening to *today* 's material
i.e. today's system of lecture material, *for example*
having seen how the hall works due to Perception

when i say that you need to work
when you work personally
looking at who else will be watching
Well, in the future, let's assume a video recording, yes
i.e. view all elements
namely the work on today's seminar

it turns out that when you look
on all these elements
it is clear that everyone thinks in a certain place
and here is the collective Thinking
is located basically in the same place, generally speaking
human
only if for example there in the area of the stomach yes
there are intestines
a little lower there is the sphere of Thinking
somewhere three centimeters from the physical body
this is when a person thinks about his skin
there is a specific place

then if you look from the outside
then it's the same place
when others see him
what is he thinking there

but if we look
where everyone around thinks
then it will be on the other side
as if from the back projection

i.e. it turns out that the element of the future
is located yes in this case in front of you
past development is somewhere from the back
well, from the outside, sort of let the light optics go
from the kidneys, as if optical pressure passes

and when you see these elements in this way
you are convinced and you are convinced personally
that it is enough to introduce yourself
well at least imagine an element of skin
i.e. entry level
which does not actually contain the form of a human being

then you will always get the form of a person

and the idea is this

what exactly are you looking at here
human skin

i.e. if you act as the One God did
He set the task of man
and man arose
and a person who has a completely normal level of ^{yes}
next development
Infinite level Eternal level of development

so make the control as follows
Now

i.e. just look in front of ^{you}
at the level of one element
For example there is a piece of skin there, personal ^{yes} yours
you can use your eyes
you can mentally remember

and build the system like this
so that within the scope of your Thinking
you have developed a Norma

the most important thing is to follow the impulse
from this area of skin
when you already see your image ^{there, for example Yes}
any other person whom you want to help
so that the impulse passes through the head
towards the coccygeal spine, ^{like this}
^{well} along the back
and this glow went exactly along the spine

and then you will see that
what is that glowing behind my back ?
^{well} the second projection

so start working in detail
a piece of skin
image of a person
and a glow going down the back

it is enough to just do it
this is the level of ^{creation}
and standardization will already be an investigative process

i.e. now work only on
exactly

elements of creation of the physical body

when working on creating a physical body

pay attention

that God is the Creator of the Soul

showed how to structure the Soul

i.e. look at the optics of the Soul

looking as if inside oneself

look where the structure of your Soul is

and you can go higher on the structural level

i.e. to be able to structure the Soul

This is a very serious level of management.

internal management

when you go to a higher glow

you can see

Well as if the following tasks

already Souls actually

i.e. the following is meant

they are not necessarily only for the future

The Soul may have tasks for the past

and when you look at Reality in this way

you see that Norma

here is the Norm coming from correct creation

it's when you understand how it's created

and you do it yourself and create it

treatment of the human body for example

then you see that the normalization of events

takes into account what is in your Soul

initially

after all, knowledge came to you from the Soul, in fact

and when you see

this is the inner level of knowledge

well , that's also the level

about which I said that it does not change

and when you see it

well, what is it realized there in collective knowledge

i.e. you can do almost everything

what do you think is necessary and preferably as much as possible

what is necessary for salvation yes

hand over
that's exactly according to my Teaching
and it turns out
that the Soul transmits Salvation
Firstly, it does it immediately and really
secondly, you can well how to add logic
supplement with some technologies in words

i.e. this is exactly the level of that
that the Soul actually does it right away
and most importantly - it's real
i.e. the desire to save is that reality
which is maximally defined in this World

and when you work just even
Well , here 's expressing a desire
then you are already working at your maximum

and it turns out that it is precisely the verbal level
i.e. so that well let's assume there to add
just to clarify in some words
this level can be considered again
as a level of interaction
with the Physical Body of the One God

i.e. having considered
how does the One God work for example
talking about some situation
then you see that this situation can be like this
that He first says it
Well as if at the level of Action

i.e. let's assume you are considering the process
when is the next action
This is also the Word of God
i.e. well He indicated it with some words yes
in your Perception

then it turns out that it's a slip of the tongue
this is what you perceive in words
your mental perception
i.e. for each He pronounces it in his own way

and when you see something like this
Well as if a personal attitude towards each one
then the perceived action is the level

which you can implement already because
what do you see
how did he speak and from where
i.e. you see where He spoke from

that's how you know it
you already see the point
where does he speak from exactly speaks
and you determine His physical location

when you
in relation to Him
define yourself
you can , for example yes, look at Him physically
with eyes
can you please? there mentally consider Him
there at some point in some place

and then you get direct knowledge
i.e. knowledge that is already defined by that
that it is precisely that level that does not change
which has absolutely always the same status
this is the One God

i.e. you have that knowledge from there
which naturally they do not change
because if you ever saw them there
or you see them for example there all the time
then they are at that level

and this is the level where you see
Well there mentally yes or there physically you see
The Physical Body of the One God
this level is like this
that you can already have direct knowledge of that plan here
which speaks about that
that it is here that the Spiritual picture of the World is recreated
i.e. you first define it on the Spiritual level

How often do you notice?
that at first some spiritual sensations
i.e. it is perceived in the Spirit
then you translate into the structure of Consciousness
therefore the Spirit
this is primarily a more precise value
in terms of contact

precisely with the Physical Body of the One God

if you are in contact

well, on a collective level

there are certain information systems

related to God

and everyone can perceive the actions there differently

Well, there are certain theosophical systems there

certain levels well religious

then you can see it here

that in fact any level of Perception

this is a level that is directly connected

still with the Physical Body of the One God

because when we look at

namely the physical body

then there is Perception

from physical body to Physical Body

and when we consider the next level

but this is already the level of God's Action

then we see that such actions

already be human

instant accurate fast

and which generally lead to an accurate result

already because we don't do things like that

what do we suppose we are considering it there

some methods we detail them

or something there somewhere secondary

or there at the tertiary level or there at the tenth

in terms of something specifically, reading something

as we do in investigative systems

investigative systems they are good

if they contain a fundamental plan

doesn't matter

and it turns out that we can fully proceed from this here

yes if there are any investigative systems yes

well, some methods related there

with some actions with some algorithms

then bringing fundamental meaning into them

of his position

in relation to the Physical Body of the One God

and having looked at how the light of God goes ^{yes}
to you
having considered His position
you see how he goes

because ^{well} if a person is standing
^{for example,} there is a flashlight shining there
and at the same time, ^{despite} the walls and everything else
naturally you see
how does light travel

and behold His Light coming to you
even if in specific methods
then you still see His Work ^{and} His Action

all investigative systems are still some kind of
It would be nice if there was a way
having considered exactly which
you see exactly His Action

and when you move on to specific actions
^{Well let's assume there} on self-regeneration
for some problems that you need to solve
then you see that in essence it is immediately visible
what is essentially the problem ^{generally speaking} is usually informative
it can be very simple

i.e. any problem in prognostication there
it can be seen immediately
as a simple level
and ^{in general} a quickly resolved level

and when you reach such a level ⁱⁿ Spiritual development
you're already getting there
in terms of there ^{are} management actions
it may be that it will take minutes there ^{or} more time

you see that there is a level
where are all the problems
can be solved quite simply
the first is the Salvation of all

then it turns out that this one
very simple and well known level
this is again the same condition that I defined
as a state that does not change

therefore this is the level of your personal knowledge
this is God
and the state of attainment of the level
Well, in this case, you can describe it like this
as Eternal development creative development

where there are resources there is a physical body
there are resources of society yes
and there are resources as such in principle yes
from the Physical Body of the One God

and that's why development is going on here
from Him too in social terms

so having considered
Well for example His presence
in all phenomena
it is possible to do it like this, with such as glimpses from Him, yes
see His specific actions

and that's why well how not so yes let's say a frequent process
that the Physical Body of the One God
often found there well with people

the thing is that His Light comes from Him
must be achieved by everyone
exactly as if his level of Perception
i.e. He comes to each person individually

and therefore it is possible to come naturally with the Light yes
then it would have worked
what is firstly in human logic
One Body
which is precisely the Unified Body of the Physical level
i.e. the Physical Body of the One God
it's still one

and therefore to come to everyone
He must have the Light of knowledge
i.e. the Light coming from Him

and this Light
Light
this is the level of creation
Physical Body of the One God

the level is the same
that the body is created and is created by the Eternal

i.e. it is constant, as if at every moment
it's practically well as if it were self-assembling

so it turns out that this Light
this is the Light of that Truth
that His Physical Body is Eternal
therefore you see that knowledge too
which lead to this

and so when you look
well, for some technological control systems
there or some methods
Of course, it would be preferable to use those exact methods
which are tough well as if expressed
in the form of some algorithms

i.e. tough, well as if written out
for example, in the form of some strict actions, yes
mental plane

It is always desirable to see
it is the Light of the One God
and when you see it
Of course the methods work then
much faster and more accurate

and I think that if for example you , well, doing management , let's say so
you set the task of natural implementation
but at the same time the task of accuracy
for you is well For example there is an important task

it happens well let's assume how exceptional the case might be
I often have this in my practice, for example
precision task
sometimes had exceptional significance
For example there in the practice of scientific calculations
when you can't do experiments
I gave exact figures there, etc.

i.e. here in general, right down to specific numbers, yes
Well, maybe these are not such frequent tasks of this type

but nevertheless, accuracy even in choosing a solution
still a comparable level of accuracy
because there is usually no difference here

that 's when you consider
precisely the task of accuracy as precisely the task
because it can not be singled out as a task in general

but if you consider it as a task
then here I think it is desirable to consider
Well, first of all, that's what I said
coordinate system in action
i.e. in relation to the Physical Body of the One God

and develop a certain optical trajectory
there are movements of thought and spiritual glow
or there Let's assume how your Soul interacts
with the Physical Body of the One God

and consider in relation
to His Physical Body
Well, His Physical Body can naturally do the same.
move move
i.e. how to see Him internally

and when you do it
you see that all your actions
became more natural, more precise
more well as if harmonious already because
that you are aiming for precision
they put a highlight on His Physical Body
like some kind of tuning fork
in relation to which
you do it somehow
something specific in a specific action

and the most example Well, it's a simple element.
if you need to level it urgently
Means well some situation
Well let's assume that there was no accident on the road
somewhere, even far away from you

then it's the same method
quickly find there well mentally yes let's say due to clairvoyance
The Physical Body of the One God

and for an optical relationship to arise

i.e. you just see Him internally
light comes from Him
all accidents do not happen then

He is Norma
when it glows there is no accident

and it turns out that you can recover in the same way
in some situations
related for example there with health, etc.

This concludes today's seminar.

Thank you very much for your attention
