

GRIGORY GRABOVOY
The Teaching of Salvation and Harmonious Development
**The mechanism of formation of human Consciousness
Creator**

Lecture 1.1

In this lecture
according to my system of Salvation and harmonious development
I show the mechanism by which the Creator
forms human consciousness
and in principle any information system
both manifested and unmanifested

according to this principle
into any element of information
you can enter
unlimited quantity
any other information
necessary for the functional level
as if the selected element

so in this regard we can consider
very simple example
for example, let's consider just a speck of dust
which is located somewhere in the world
in some space-time coordinate

i.e. this speck of dust
it is on the system of general connections
interacts
with all elements of information

and this is the level of interaction
its local part, as if small, it would seem
with Macropart
makes up
projection of your Perception
on the very speck of dust

i.e. this big part
it is a projection of what you perceive

so the conclusion from this
what is your Consciousness

can manage
very large arrays of information

in principle, any for the creative purposes of Salvation

and therefore it is as axiomatic
so the situation is being considered

that the projective part is precisely
in understanding information projection
this is a very large array

i.e. in this way I connected two positions
I examined a speck of dust
and saw what came out of it
the functions of your Consciousness are very high
and have very large amounts of information
because you can perceive
all connections
in relation to this speck of dust

so that's what it perceives
any other information object
for example, there is another speck of dust there
plant
or let's assume another person

then all this information
is located in the inner part of this dust particle

i.e. I have determined the place
where is all the external information located
on other objects, so to speak, information
there is an internal one right there which is located
inside the physical part of the dust particle

so i looked at it
for your Perception
two elements
your first Perception
which has a maximum area
disseminated and that means
on all elements of information

and the second part is what others perceive

i.e. it turns out that the speck of dust itself

it is a unification of that
what do you perceive from the point of view of others
and what you perceive from your own point of view

it turns out that any physically manifested structure

this is a unification, so it works out
your point of view
in relation to that
what do you perceive
And
the entire external system perceives

i.e. it is a practical control system
all elements of connections
because Perception is also analysis
and there is adequacy of actions, for example

so i deduced
that the manifested systems
I started with a speck of dust
these are certain control systems
let's assume physically manifested

if we move on to the body
then let's ask ourselves the question
there, let's say, there is some part of the body
a nail for example or some molecule
what they represent from the point of view of this ideology

then in principle it turns out that since even one speck of dust
has , well, in its manifest form, a controlling status
and with your management status

then naturally the body is a greater controlling status
because it is defined
it is your design of Consciousness

so here is an increase in the cumulative, so to speak, understanding
this ideology
that one speck of dust is already a very large mass
and Infinite in control

united
for example the outer sides
and your own
you get an infinite number of connections

themselves, and in their own Consciousness

and bringing it closer to your own tissue, for example
you get that for example for treatment then
there's a person there
you can just highlight it
one of the fragments of, for example, external Perception
what does it mean there for example
minimization from the point of view of the disease

or just her cure
what is the goal
or simply in your Perception
reduce this component
but the effect will still be the same

but highlighting the outer part for example
as if of a different Perception
what creates this disease
it still happens
inside your Perception

i.e. it turns out to be this concept of "inside"
this is such a colossal amount of information
that in principle here is an action on a goal
defined
only by understanding access

self-understanding
this is a specific path to access
in the control system

and thus increasing it
from a speck of dust to the body through Macro-connections
we get that the speck of dust in its projection
has a point
where directly on the physical fabric
where is the infinite number of connections

i.e. the archive of information is absolutely infinite
even in the physical manifestation of a small speck of dust

and if the archive of manifestations is Infinite
in each element of the body for example
then it turns out functional, which means it immediately becomes clear
for example, giving an ideological status to the body
The creator can create

there, well, there is any number of elements of Reality
because here every element
contains an infinite number of connections

and giving even the initial small impulse to the target
this goal unfolds and turns out to be, for example, a person

that's why when we talk about it
what is understanding of the situation
then understanding is that impulse

i.e. I moved on to that
what is the storage system of information
which I have just explained
controlled by the level of understanding
from the point of view of your Consciousness

and this part of the lecture is exactly about that
what needs to be developed but independently
impulses of understanding

i.e. to develop phases of the stage levels of understanding
at some geometric points, for example
then which ones would control
this huge array of information

In the second part of the lecture I will explain
formation technology
this structure of understanding

i.e. now after this lecture
you have to do it yourself
for example, a few minutes
and then I will explain the technology

and see when you do it yourself

my next technology
how does it compare
for example with your arbitrary actions
