

GRIGORY GRABOVOY
The Teaching of Salvation on Harmonious Development
Method of interaction with the Soul of the Creator
19.02.2003

Hello

The topic of today's seminar
this is the introduction and distribution
my Teaching on Salvation on harmonious development

and the method is called by distribution and implementation
my Teaching on Salvation and Harmonious Development

method of interaction with the Soul of the Creator

before we open this topic
I will review past events
that occurred during the past month
and I would like to immediately consider what happened with the Shuttle
when he burned up there in the upper atmosphere
and consider the forecast that I gave
in the January issue of the newspaper
"Control option - forecast"

it was stated there that in a special department
I was talking about what is necessary
concentrate the collective Consciousness
in the Northern South American region
and the date was indicated
well, which was from February 4, 2003

but as I said earlier
according to the technology of the development of Consciousness
by control axis
to the management level
i.e. at the level of, for example, January

then here you just need to make a minus
i.e. 2003
2 plus 3 is 5
5 minus 4 equals 1
those. the number was indicated there

the second is what concerns the technology itself
work with collective Consciousness

if we consider, let's assume that
which was later shown on television
for example concentrated rays
going, for example, in the layers of the atmosphere
then the forecast specifically stated
that it is possible to deconcentrate these rays

i.e. if we consider
Human perception
for example, as a perceiving level
well, including what is shown on TV
then technology could be used here
which concerns deconcentration

considering that the management is still at this level
was carried out
and here as it was indicated
including it is necessary to work
in the upper layers already in the layers of the atmosphere
in the presence of a signal from external space
look at the trajectory of movement
then in principle the trajectory was indicated there
coming from the specified constellation

so if we look at how the work took place
then work on the control context
which was carried out according to this forecast
and those people who read this forecast worked

then there were two options
if the fire occurs, for example, in the upper layers of the atmosphere
then light fragments fall there and onto the ground

the second option is when a fire occurs below
at that time they were just there
fairly large objects
including with harmful enough ecological options of emission and in general
there of course could have been more destruction

if we talk about working out the forecast, as it were
in terms of the maximum, or something like that, the system, as if from the worst side
then in principle of course minimization
this is when the upper layer of the atmosphere

the question arises

why for example specific information

yes, it is not used in terms of finalization to specific departments
and the element of information recording is still used

because here, as I always say,

the main thing is not to record a negative status

another question is what if there is a department

which does not have strict contractual relations

then they still don't react to specific information

so here it turns out

that the main focus is in management

here in preventing disasters even of a local type

after all, this applies specifically to a local type of disaster

the emphasis is still on specific people

which still do not record information

are able to prevent local disasters as well

so, regarding the past, let's say, situation related to the Shuttle

control was applied after all

there are elements of minimization

including it was indicated there

that there may be skin lesions there, etc.

Well, as for the debris that has already fallen

and in principle I still think so

that at any level it is still possible

avoid fixing a negative forecast if possible

if there is a direct exit, let's say with a specific institution

then we can fix it

but for example in this case there was no specific agreement

for example with NASA

and that's why we were able to use only that

Well, well, well in general, it was possible to use it in management

precisely through optical processes

nevertheless I think

because according to the forecast if the fire was lower

then the consequences could have been significantly worse

and would touch millions of people

so let's say this well after i already spent

this is the analysis that expired on management
I'm moving on directly to that
how to work
precisely by the method of interaction with the Soul of the Creator

or interaction as that level
when you consider
Soul of the Creator
as well as the Soul of the person who creates next to you
so it is with the Soul of the Creator of the One God

i.e. it is meant
here is a postulate that considers such a level
what I am postulating here is that
as we consider the position
and it really is so
that man is created in the Image and Likeness of God

then naturally we can say
that God has a Soul
having the same characteristics as a human

and when we interact with the Soul of the Creator-God
then we are actually considering
level reverse
i.e. the level of movement from a specific person
to the Soul of the Creator
i.e. to the Soul, for example, of the One God here

but can be considered simultaneously
level when the Creator is that person
which creates management

that is why here, according to my Teaching,
about Salvation and harmonious development
should be considered
actually a unified characteristic

i.e. when we consider
how to interact
with the Soul of the Creator God of the One God
so is interaction
with the Soul of each one creating this Reality
i.e. every manager who is, for example, in this room
or who will do the management in the future

and therefore based on this technology
if we suppose to consider the same case
which happened with the Shuttle

it is from the action of the Creator
where there is the presence of the Creator at every level
and there is a consequence
i.e. the Creator creates a consequence of some action

then these optical rays are a consequence of that
that the Shuttle, for example, was destroyed

so when we want to deconcentrate them
then generally speaking we can work with the cause
i.e. with the Soul of the Creator organizing
earlier structure in the event

and when, for example, we consider a process like this
that the Creator always creates
only positive development structures
There are no structures laid down there, for example let's assume disasters

then, for example, the lack of knowledge about a specific event
this is what leads to that
that the event can be negative

that's why here is the concept of "knowledge"
the concept of "precise knowledge about a specific event"
and "how to regulate this event at all"
this is the structure of the development of your Soul
personally of your Soul

i.e. your Soul personally is exactly in that
what do you know for sure
at this time for example at this point
what's happening

when you are looking at development specifically
that's visible
that interaction with the Soul of the Creator of the One God for example
consists of
that you are working with the event
i.e. the event that the Creator built
here is active work with this event
this is interaction
in the first Perception

at the first level of Perception

at a deep level

when do you want to see tasks

and generally speaking the action of the Soul of the Creator of the One God

you can go ahead

on the usual optical principle

and if we consider, for example, the flow of light coming towards you

for example, if a person reads prayers and he sees light

then the next level of prayer

it's like a pre-light faster recognition

the next kind of light package

and so when you work with an event

here you can highlight the light

which you perceive

as an example of a primary level

on your Perception

and as you can already see here

we are moving to the next level in the seminars

concerning that

what we are already considering

work level interaction level

with the Soul of the Creator of the One God

approximately the same as with the Soul of the Creator

Creator acting from the level of a person

we went through the process of collective interaction

and any collective action

this is an interaction with the Soul and with the Souls of those

who creates

so when we look at

namely pre-action

where, generally speaking, the concept of "time aspect" does not exist

i.e. there is no Perception from the point of view of time

and when we already move on to this Perception

to this level

then we are talking about the next level of management in fact

which immediately speaks about it

that it is possible to do it all just technologically easier

seeing how the Creator works

act in the same way both simultaneously and independently
i.e. to interact

not as if to receive
a long chain of cause-and-effect structures
do not study, for example, the details of management
but just do everything as the Creator does
One God
in terms of management, it is natural to create
because there is exceptional
management occurs only for creation

that's why it's technologically here
management generally speaking becomes easier
because doing it is just like repeating
easier than, for example, doing it using there
a complex branch of technological principles

so in essence all this management is really simpler
in terms of achieving the control impulse

and that's why the main action is here
focused on just that, on just that
see how the Soul of the Creator works

and here I am, I'm just
I'm just giving the methodology of that
to see how the Soul of the Creator works

and for this you need
Primary Light of Perception
make it a kind of launching pad
bring your Consciousness to yourself
precisely in terms of Perception
on a specific element as if on a platform

and then actually try
as if rising
above the level of this stream of light
try to see
earlier segment of light
i.e. which has not yet reached Perception

i.e. here is the control element
goes beyond the boundaries of perception

generally speaking, in logical control it is clear

because what is happening in the world in general
and where the Soul of the Creator always works
it is such a concentrated system of Perception
that we don't necessarily have to understand it on a logical level
with this system

that's why we work with what we have
beyond the boundaries of perception

and in this regard the situation here is as follows
that this level is a kind of platform
he actually is
element of the collective
and already sufficiently integrated Consciousness

i.e. here it is, as I said
there is a platform level
which acts directly from
from your actual volitional impulse

so this is the platform level
light coming from the Creator
this is the level of absolutely clear opinions
absolutely clear ideas
which exist in the collective Consciousness

i.e. in principle the platform is actually
it is not unstable
she is very stable
Moreover, it is formulated quite clearly
by the people themselves, in fact

so when you rely on this platform
then you rely first of all
on the formed system

and your task is already being on this platform
straighten it at the same time
precisely to the level of greater optimization
in level accordingly
for example, stopping a possible global catastrophe
and ensuring Eternal harmonious development

so here it turns out
what did you do when you stood on this light platform
you are still in control anyway

and here is my Teaching about Salvation and harmonious development
it's just the spread of technology
and through the recovery complex
this distribution is primarily related to the fact that
what you should do when you are at the control point
constantly increase
the basis of creativity
the basis of harmony

and such a principle of interaction with the Creator is actually
Of course he talks about it
because at every moment in time in every
and in every element of space
The creator naturally does
more and more optimal
increasingly creative
in the next level of development

and therefore this level of interaction with the Soul of the Creator
it also contains technology
the correct control position immediately

pay attention here
when you are in this type of management
that your positional control is immediately correct
this is quite important
because you are acquiring
virtually absolute stability
from the point of view of the next level of management

and now let's move on to a specific task
here take all your controls
what do you need right now at the current time
concentrate ^{suppose well} here in front of the hall there
in front of me there in a radius of two meters
and make the controls as the Creator does
i.e. do it right away

this is where you need to do it right away
as the Creator does
interact with the Soul of the Creator

pay attention
what am I ^{well} let's say he talked and talked for quite a long time
and immediately suggested discrete control

but if you pay attention
how does an event happen in the world
then many private events
happen and this is also true
what do you see and more global events

of a tree, for example, moved
and at this moment things happen
some movements on the whole continent

i.e. here is the next action
it's kind of discrete, kind of torn off
here's how to tie the next leaflet yes for example which we see
with what is happening in general at the Macro level

i.e. here too we can connect if we do it quickly

that's if we perceive
communication element very fast
then we see how the event is rigidly tied
here is this leaflet
we see the knowledge of our own Soul
about the accuracy of the World and worldview

that's why this discreteness
I just switched straight to management
this is actually knowledge that is given from the Creator
because you see the Creator

and when you see the Creator of the One God
then it becomes clear to you
that the Creator who is with you
that's what he does
and what does he need to add in general, maybe? Yes
technologically
maybe not even correct but just add

and therefore in my system of Salvation and harmonious development
precisely if we consider the recovery complex
then there is such a level here
as a level coming from creation, i.e. from the Creator
i.e. the level of management creation

and here it immediately becomes clear
when you look at how others around you

what needs to be added in technology in general
so that everyone can move freely and collegially
collegially correct

and generally speaking they sought control
from the point of view of all the same
for example , and preferably small disasters

i.e. that there is no global catastrophe happening

This is good

but at the level we are at now

it is desirable to influence and, among other things, to prevent things from
happening

some minor negative events, among others
not necessarily even catastrophes

so when we talk about control precision

it's about the precision of your personal actions

from the point of view of collegial Consciousness

i.e. from the point of view of the tasks of God and your Soul
and also that you definitely achieve this action

here is the exact goal of management

in the end it's still a total system

including

as Macro levels i.e. as I have already listed

more global areas

and your private action which is completely specific

so when you for example private action

set yourself

in the form of a control problem

you see this particular action

but try to put it into the specifics of management

see everything around

i.e. see the essence of the event that you are managing

in fact, I brought about that

that the Creator is That level and generally speaking That information

i.e., in general, the concept is included there

"That which controls the whole situation " creates

if we are talking about the One Creator God

then we are talking about the Personality of the Creator

and when we talk about accuracy

we must see what is put in by the Creator

what is invested by the Soul of the Creator
in this event

and that's when we see His presence
in the event
i.e. in multifaceted connections
then we can generally speaking then definitely do the management
even if we, for example, Well, we don't want to be too distracted by that.
to take into account some Macro level
let's assume that what is happening on the continent of Australia there
or what we should do for example
in regulating some microprocesses there
in some kind of research work, for example

maybe it's some kind of work
it is held , let's say, in Geneva
and we need to do management for example
that it is precisely here that what we need is happening
development in civilization

because the research parameters
which are currently happening in science
they also need management

and considering what I do, I do seminars
exactly at the moment when I say the words there
take a closer look
what if some laboratory
produces structure
which for example can have a negative impact yes
for the development of civilization

at one time there was a level of nuclear synthesis, for example , a level
and if we make an impact in terms of, for example, cold fusion
then we see other technologies are already starting

and if we do synthesis according to the type which
which is used for example in a nuclear bomb
then that's where the level comes in
which leads to nuclear weapons

and in this regard the task of the manager
understand what is being done
at any point in Reality
including some scientific research work
in laboratories which are located , for example ,

in different parts of the planet
including determining their management
and do it because it is, for example, an action
also the action of the Creator
i.e. the Creator teaches each next action
exactly what needs to be done to have Eternal development

so when we want to make control for example
sometimes very specific ones may arise
in this case, here is the methodology
very specific event lines
which would seem Well, they don't directly affect a person

i.e. some research parameters
in the form of some formulas, for example
arise at the management level
some private events
or political
or, in general, completely private personal
maybe even in different times

i.e. we enter an array of information
on which the future of humanity depends
and Peace in general

so when we start to enter this array
where the Creator is present
all the information is there
and everyone gets, generally speaking, that
what can he handle

if he sees that there is a complex set of formulas
[...] take any set of formulas
translate into the structure of Perception
aligned with the task of universal Salvation
and you get a completely accurate mechanism of Perception
even if you, for example, have a philological education

and in connection with this it turns out
that the task of management it cannot be
for example, more complex than what you own
i.e. you have your own level of Perception
so it turns out that you own
in general, all external information

i.e. if you perceive at least one signal

accordingly you can convert the signal
on your system of concepts

so if you get into this system
on some complex control element
as I said there is a list of formulas
or some complex technological equipment
suddenly you often see this
in the form of specific images

just display the optics on everything
on the parameter of their concepts
and you receive in your own words
process description

when you have already received the process description
no problem for you
we can standardize

the element is very simple
Enter the Norm in your own words
and just a descriptive model
you start to mechanically impose on the Norma
i.e. work with words actually

so that's when we talk about that
what was originally the Word
then it is a question of the exact Word
the question of even the precisely put Word ^{yes}
in the space of events
This is also a question of precise development

if we want to work with color
i.e. your color can be simply done like this
that you take the color and standardize it
and you say that this is a specific color

let's say I just went and approved
what is silvery white color
this is the color of Norma

and if the external event is not correlated
and my goal is to save everyone
and I know for sure that I will save each of you
this should be known to see exactly
in your information

and when you see this light
and the external event is not correlated
all you have to do is light up your color so much
so that another event would be the same, for example, color
and that's all

you make the control that contains
as Macro level
and the level of external control, for example
in relation to an external event

so that's when I was talking about that
that we are going beyond the boundaries of how exactly [...]
when we look but what comes from the Soul of the Creator
then it's completely clear to us according to logic
we're going out
to the level of that Perception
which the Creator gives
i.e. we are generally in the structure
where is Perception built in general?

and therefore if we want to work
in the system that is being built
and somehow to know her
then the next level appears

how to build perception then
that's just according to the norm
how to standardize it
so that for example at the same time
the intensity of creation was not diminished

i.e. take your private tasks for example
just put them in front of you
as constantly being solved
i.e. take this in front of you
let's say you light it up there in the form of a cylinder or sphere
what you need to decide
to the right of you next to you

and when I work, for example, I give control technology
you keep in mind all the time
that this management must be carried out
you "mean" it somehow
what is in front of you
the level of your event

this is that part of the Soul
which interacts
with the Creator, the One God

i.e. what do you mean
that's what is meant
from the point of view of the Spiritual plan of education and development
this is the part of the Soul that interacts with the Creator

and by the way, he acts more like the Creator
as the Creator who creates Eternal development

and then when it seemed like such a simple target technique yes
it shows that the goal has been set
already gives interaction with the Creator's goal

it is clear that the Creator is involved in any action
therefore management is assistance

and when, for example, we talk about that
what was done there, for example
some kind of work of art
or any business at all
and often you can see such words
like "made with Soul" yes
i.e. for example, made with Soul or Soul embedded
there in something
a work of art, for example, has a soul embedded in it

and then the question arises
if we consider these two simple concepts
quite well known in general in terms of exactly that
that almost everyone knows that it is possible
there are such concepts as "made with Soul" "Soul invested"

then the Soul of whom
if you just ask the question
[...] For example, the Soul of the Creator

after all, the Creator originally gave everything
therefore it turns out of course with the Soul of the Creator yes
Certainly

i.e. it turns out that in the phrase we already contain knowledge about that
that we interact with the Soul of the Creator

but here we naturally understand
what about the Soul of the Creator
if we assume you understand the Creator
i.e. a deeper Spiritual level
level of precise knowledge
level of precision in the understanding of precision by others

and that's when I talk about accuracy
it is in the dissemination of technology
my Teaching on Salvation and Harmonious Development
here first of all I mean
precision of the Spiritual plane
even more precision of the Soul

when you do with the Creator
doing as the Creator
you see how others do it
and you understand that this is true

i.e. synchronous precision when everyone does it
simultaneously and precisely
we are naturally not mistaken then

then there is no need to control
no need for any additional control systems
introduce at later levels
technology dissemination

it is enough to mutually see the accuracy
that's how it would be well, socially developed, if you can say so
vision clairvoyance
maybe it's not exactly clairvoyance
in the concept as it is interpreted
as a vision of some events
and some specific objects at a distance
and clairvoyance in terms of real controlling clairvoyance

i.e. this can also be accuracy by vision
even Spiritual levels of development
Spiritual level of joint actions

that's when we see
how the Spirit works in one direction
then generally speaking then it is almost definitely on information
it is impossible to shift the information in any way

i.e. when on the Spiritual level
everyone is acting correctly
then this event definitely occurs

and that's why, for example, there are various ones there
aspects ^{there} of Reality in a very rigid form ^{yes}
they can hardly change for a long time
for example, stones or some historical elements
they stand for a very long time and no one destroys them

because it was created on the Spiritual level
control
some phenomenon either by people or by the Creator
this phenomenon is generally indestructible
not because it could be there purely technically
some building can be destroyed
but it is still not destroyed

and yet there is a sign of that here
that it is historically embedded
this is generally speaking an investment of the Soul or Souls
those who built this building

it turns out that we can easily single out
even in ordinary Reality
a fairly wide spectrum of Reality
where there is precisely the investment of the Soul initially
who created this

but then we see we see the experience of these people
for example in ancient buildings ^{yes}
or some kind of super new technologies
which can already really save people

i.e. these are not necessarily some static systems
here we are talking about duration and purpose
because ^{for example} transmitted in cultural levels
to some structures
this is also a goal ^{in general}
their historical value lies in that
that there is a level of those people
who perceived these buildings
and yet the buildings are not destroyed

therefore it is possible not to destroy ^{yes}
simple truth

we can destroy it for millennia, let's say

therefore if we are such simple truths
we start choosing from the management level
then the concept of "made with Soul" i.e. "with the Soul of the Creator"
or "the Soul is invested in for example yes subject"
it becomes a concept of one
one type

i.e. a concept of this type
where the time element is missing

i.e. that which gives birth to Reality
therefore gives birth and time creates time

and when we start for example
proceed from this level
which, generally speaking, I just said is actually not trivial
i.e. the point was that I was speaking in a rather complicated way
about simple concepts specifically

because here we must be able to
combine fairly simple systems
through complex levels of Perception

and that's how the mind is built
that a person often develops in a complex manner
even for simple systems

i.e. a simple system to do something like this
for example the plane didn't crash there
simple sentence in words

and for this you need a system of Perception
and the work there is often very complex, man-made work
which must be provided by the Spiritual level
then the plane might not be destroyed for sure

so here first of all
set your own management goals
again near myself
but for example on the left side
in the form of concentric spheres , let's assume
such concentrated ones are better than silvery white ones

to your right is already what I said

there in the form of a cylinder or sphere
the next level of control again

in principle you can put the same thing
but on the next level

for example, you received knowledge now literally
so therefore the next level
this is already the one who talks about it
what can we do
and with the Soul
and putting the Soul

we can put our Soul there
where does it mean there is a principle of preservation of the Soul
in one place, yes, here is the Creator
i.e. the Soul created by the Creator
or invest somewhere
in terms of mechanical movement there

the point is that the property of the Soul
given to this object
and the concept of "investment" is an action with something yes
what was i talking about
the action of the Soul in interaction with the Creator
the level that is on the right

and if we put it on the left
this is the level where you interact intensively
with the Creator

and then it turns out
that intense interaction
in real time
Well, it's a kind of creative process

i.e. how great creations happen
in terms of this, let's assume there is painting there
some actions events
that a person constantly sees light
the next light of the Creator
he actually works by interacting with God with the One
knowing the goals knowing the methodology
and it turns out that he constantly receives
a colossal amount of information
which is like means it controls the event

from the Creator

therefore interaction with the Creator

this is generally speaking to be controlled by the Creator from the One God
those. according to the light of God

and when we see, for example , near us
if on the left side
we set this already intensive level
and put the event there
then we get the second level of control
which is actually managed very intensively

and now make the control
such training practical
that the level on the left is the intensive level
and the level on the right
let them work in your Perception equally

i.e., in fact, the same goals at different levels
they work the same way
and try to see
as the light from what you do and achieve control
restores you and generally speaking all others

i.e. do this management now
I will do it together with you
and at the same time we do the training quite intensively

at the time of control
try to always proceed from that
what when you do management
you do this management now

i.e. try not to analyze
don't remember any earlier ones
long technological cycles of management
and I'm showing you now
I'm doing the seminar information now
i.e. now I speak now I do management
For example , I didn't set it up beforehand
hardwired systems

because if previously
let's suppose we describe some system
a change of events occurs

and the system becomes inert
well, that is, it will have to be her
Well how to actually do system correlation

i.e. correlate in terms of current data
elements of Reality
so when you do management
do it right now

i.e. increase it now
intensity of control
in two spheres for example
let it be two spheres
to the right and left of your own events

and yet still doing from the point of view of that
what are you doing this now
based on the knowledge that you received spiritually
let all previous knowledge be included there
for example, according to my Teaching on Salvation and harmonious development
what do you mean by personal experience for example

and therefore try to do management as much as possible
from the point of view of what you are doing
Now

Now pay attention that as soon as you
fixed on the word "now"
then the technological cycle becomes clear to you

i.e. after all, we are talking about that
that we can study for quite a long time
some kind of management structure
and at the same time always ask yourself the question
here's when we, for example, at what time, this construction
Yes, it is fixed.
For example, it works 100%
for some specific target task

but firstly, external tasks can be different
there could be an infinite number of them
and there may not be any similar tasks at all

hence fixation
fixing the situation is now here
I recorded it

all management was implemented

so when, for example, we are talking about that
what is the concept of "now"
then the concept of "now" has a very deep meaning
unification of time
if we put such a concept as a concept
precisely the "unification of time"
we see that here we can, by the way, cure
almost any disease
due to the fact that we can unite
just time at the point of implementation

or achieve any event at all
by combining time

so "now" is generally speaking elements
including associations

i.e. i.e. well, some kind of continuation
an hour is also a continuation
if we use this word to denote a single moment yes
then we kind of fold the time equal to, for example, an hour, yes
at this moment let's assume

and it turns out that the word is put
for example in terms of management from the point of view of action
this word can unite
because it contains
deep governing meaning
if you understand it that way

that's why we're still considering this context here
that we can understand it as we need
i.e. the control element can in principle be built
if the paradigm for example Perception
take and transform as you need
in order for ordinary words
in general, they were the governing words

and so when we talk about management
try your own goals
to make it as prolonged as possible
i.e. try to do it this way
so that your goals also concern others

i.e. let's assume there is some external event
and try to make this event
was optimal for all parties

i.e. when you do the management
First of all, you need to make sure that
that this management has already been implemented
in some way it has been achieved or completely one hundred percent

and at the same time prolonged
to some external circumstances
this is precisely the prolongation
that you can see practically
a consequence of what you do

i.e. the prolongation should actually be
absolute in action

i.e. they made the management
received the control element
but at the same time you should immediately see here
and don't forget this

it is precisely in this control system
that it is first a question of universal Salvation
and the salvation of each individual in general

therefore general management
it can be quite a useful load
according to this system
and so when you do management
it would seem simple
try to see that the salvation of all
this is what this Salvation consists of right now

i.e. if you see that the beam projection is going
to some region to some molecule
for a specific laboratory test
there which will help people ^{yes}
then do the management specifically

and now having united all the controls
which ^{you for example} you produced
given that everything that has been said
always used
at the next level of management

and can we say that this is what you perceive
in Perception for example at the current moment
according to the system of interaction with the Creator
we understand
as a level of almost the next action

i.e. to see how the Creator works
you need the following action, generally speaking
or write it out clearly
or for example in an optical element
highlight it as the next level of development

i.e. a task where there is no time element as such
the next development is set
generally speaking, by you yourself

i.e. you can do the management
when does it mean Well, considering the complexity, yes
anyway, today I am giving the next level
This is quite a complex load control

so we should try to do it whenever possible
help others so that it can be mastered
precisely from the point of view that you are making a platform
here is the platform of next level perception

and so it turns out that when you, for example,
make management for everyone
then the management for yourself in this case may differ
because the Creator
It practically makes management like that
that it becomes personally yours

now when you come to management
from the point of view that you do personal management
you see the level of responsibility for what is happening
just as the Creator views this level

and postulating again the level
that man is built in the image and likeness of the Creator
created he also does as the Creator
therefore the Creator does the same as man
in certain systems

and when you see
It is the Creator God who also does

as a person
you can see then what is needed
to restore the body, for example , in this case

from the point of view of the One Creator
who created the body of the Eternal man
then all that is required here is just
knowledge of the functionality of the Eternal body

if we talk about the Eternal standard of living
then we are talking about the fact that only on the whole
here you need to know
how does Eternal Life develop in general
from the Creator's point of view
it means precisely the Creator, precisely the One God

then here, generally speaking, the knowledge is very simple
and are quite easy to see
here is the recorded Reality
this is what has already been done by the Creator
and the next level is what is located
in this fixed level of Reality

and when we, for example , develop further
as the Soul of the Creator develops
our Soul develops in the same way

then this synchronicity of development
it is if for example expressed
let's say in some psychological action or in prayer
it consists in the fact that we synchronize

and here is the concept of "synchronization" yes
level of the following events
this is where the event comes from
from the area where we generally speaking removed the area of time

i.e. such a high concentration of events
that we do not consider time
as a cause-and-effect quantity

and a cause-and-effect quantity
Soul is already being considered

and that's when we look at
your Soul

as a cause and effect of some event
then we see that time
i.e. we can generally speaking how to stretch it out yeah
make it shorter longer
and at the same time we can understand those aspects
which if they are expressed in simple words
then we can transform them into something convenient for us
in the control context, for example Perception

and then you get any words
which you perceive
and which you say
can be transformed by you in terms of that
that these words have a control function
necessary for the universal Salvation

in this case the control is already like this
that management is based on any events
that surround you
at the same time, the management is built the way you need it

i.e. for example you received an event
at some specific event
you can add a control element
and the event is already even past
starts working
in management for the universal Salvation

and from this it is clear that with such a system
God, he will naturally lead everyone to that
what will be Eternal life
there will be an indestructible body
and Eternal development
because every event has something embedded in it
it is the primary element of the Creator
One indestructible

that's why when we generally even construct a sentence like this
i.e. we say "The One Indestructible Creator"
then we form collective development
this is what it leads to
but already from a collective level

because thoughts are realized
in terms of specific actions
and here is the collective thinking

is realized again in the same

i.e. in principle it turns out here
that it is enough to express in words the task of the Creator
and you come to the realization of this task

it turns out to be a mutually counter movement
different completely different control elements
where the level of the One Creator approaches you

because you act in the same way as the Creator
and because the Creator gives you the knowledge you need

here by the way in this management
when you act in the same way as the Soul of the Creator acts
here you need to be more careful in this regard
that you actually have to watch all the time
to the work of the Soul of the Creator God
first of all

and then watch how the environment creates

then we will be able to fully synchronize Perception
because unlike Perception
when you work on ideology for example
well, our own control design

here, generally speaking, there is a different system, a different approach
we work here it turns out
constantly paying attention to external signs
and external signs become more dynamic
pay attention

i.e. in contrast to the seemingly mono Perception of concentrated
here we get certain
including at the physical level
movements of various types
at the information level
and the environment is the management environment
it becomes more natural
and practically reaches the background level, i.e. normal

because in this case you see
that at the normal background level of management
i.e. "whenever you manage" oh well, in quotes
because basically it doesn't matter

one way or another, at some level you are still in control
even if for example, you don't do active management

so here it is
this level of translation actually means
Well as if not targeted management
V
target level
at the level of everyday action in general
where it happens as a level of co-understanding
by task of action

Well, in this technology that I am giving now
here, in general, the system is built
to a certain extent it means so
what we must constantly see
what is the task of the Creator
transform to the level of your actions
and household and targeted often household simply

and at the same time, in general, at a diffuse level of optics
i.e. where there is everyday implementation
there are not necessarily high optical concentrations
in terms of actions there
and they are generally so ordinary

be able to see the actions of the Creator
even in some ordinary movement it means there are hands
there let's say a person drinks a glass of water
goes somewhere
this is where the thoughts of the Creator seem to be
what the Creator originally wanted in essence
when does it mean a person decided to do this
or when he already does it

when we look at this structure
then we understand that everything that follows
it is quite transparent

that's why future events are visible yes
why generally speaking it is impossible to record negative events
because since everything is originally by the Creator
is recorded as positive
in terms of the possible level of implementation

then here are all the possible changes in the implementation of events

this is a personal collective will
are people there, let's assume there
external elements of the World yes
expression of their presence in some event

and so when we talk about the next action
we must see first of all
what is the next action
It depends very specifically on you

i.e. you can do the next action like this
that you will see this action in the future
but it's absolutely clear here
i.e. how to see some position for example
associated with this or that phenomenon yes
i.e. the method of viewing this position

i.e., you can, for example, take and view a specific event
Well let's assume there is some event there
let it be positive, maybe like in the movies
detail look very specifically

but if we want to prevent a negative event
then it's just like this negative status
which for example is not available
in terms of management , let's assume
fix
then an element like this appears
that the event is additionally recorded

because here the level of control is that
what is event recording event recording
this is what you including this event
somewhere it was as if they approved yes

so when it comes to forecasting
which needs to be prevented
here I say again can be extremely careful
to expressions of words
or at least minimize
negative consequences
at least minimize

here first of all the simplest method again
according to my Teaching on Salvation and harmonious development
this is when collective work takes place

according to predictive orienting ^{factual} systems
but in principle which can be made accurate
if you look at the structure of the development of Consciousness
technological structure

and it turns out that the presence of the Creator
here is that
that you as the creator are active
Creator God ^{for example} who makes this event
actually throughout the entire complex
consists in the fact that
that you are co-present here
in order to obtain the next level of knowledge

i.e. here I am leading to the fact that it is constantly observed
how the Creator is present
and how does it work
and how is His Soul
can only be done in one short phrase
to know ^{and} have the following knowledge

and again it all comes down to
to an already super-high concentration
that receiving the knowledge of Salvation
this is also work with the present Creator
One God
who created everything

where all events are visible
and from parallelization
i.e. possible , as it were, some kind of coordination ^{of, say,} events
or when we look
that the event has a different coordinate system
i.e. they can be different

this is ^{like} a variant sign of events
it becomes completely and it becomes immediately clear
that here is a complex of events
has exactly these ^{kind of} spectra in the form of variants
and it is entirely within your power
or precisely profile
there is some negative status there
or, ^{for example,} still, if possible
to direct the collective Consciousness so
to stop collectively

and if you don't record it
then it turns out that there is only one way out
just to show everyone
that this is possible in some specific way
here is some event

i.e. here is the principle of orienting systems
it turns out that this is the only possible solution
what is the nuance here
here I am still working
just like the Creator works

for example, if we take
some predictive technologies
or there for example, certain systems in terms of missionary work, yes
when interpretations of certain deep knowledge are given
then they are often given as guidelines

i.e. they are often not given
for example, completely specifically or precisely
in this technological age
i.e. when we are forced to deal with a man-made system
Generally speaking, it's good that it allows people
to develop the management system more in fact

you just have to put spiritual meaning into it
in technical systems
and we can control them completely

so the question of accuracy arises here
including in the structures of those it would seem
which are predictive systems

if I say that the future is completely clear
in this case, if you are in today's seminar
listen first
then in the part where I said that "the future is clear"
this can be seen and felt by the Soul

yes at this point it is completely clear to us
what is happening in the future and how to influence it in general
but the only element of influence is often
the collective Consciousness appears again

and then you can make specific corrections
a bunch of all sorts of defects

there to profile the explosions of these nuclear stations there

Well, there are some trained people there

but then the question arises

and with Infinite development

that it is one group of people should all the time

to carry on oneself, well, these tasks

therefore it turns out in any case

that everyone should have this level of knowledge

for the salvation of all

everyone should be able to calmly see all events and profile them

moreover, to put it on the level of collective management there

for example, well, well let's say I exhibit

in some media

for collective management

but I draw attention to the fact that, of course, in essence

only specific students work

i.e. those who, for example, are not involved in technology

it is the disciples according to my Teaching

about Salvation and harmonious development

they participate of course

but in general, to a greater extent, as if aggregate systems

well, i.e. you can take the technology there and highlight it

and how to massively illuminate it

and some reflection will hit

the students work absolutely accurately

conduct a beam to the exact desired area

i.e. this is the difference in technology

and that's when you i.e.

when not technological

when technological

why do we need to study technology anyway

the more the better actually

so here when we talk about that

that yes, the future is quite clearly visible

and for example, you already took a look and saw

there are events there

then transform them and you will see

that it is at the level

Well as if there were quite large systems often

that even exist in the world

Well for example, there are some ancient sayings there
that the world exists for example there on three whales yes
on some large arrays of information
if you convert it like this
these earlier ideas of people there

i.e. here is the concept of a "large array"
often it is not very complicated
a large array can be just a whole lot
that your Soul touched somewhere
with the task of further action
and at an earlier time, perhaps even during creation
She wanted to implement these tasks

here is where the next level exists
I am announcing completely new knowledge here for the first time
in the form of specifically new ones
because this is something that needs to be addressed

that once the Soul is created by the Creator
at the time of its creation
She can set tasks for herself right away, generally speaking

i.e. here is the light of the Creator and the light of the Soul
which is exactly like that
just for example there at some point
The Creator created the Soul
The light is at first indistinguishable

but partly knowing the light of the Creator in the form of tasks
The soul sets its own tasks
often they are , well, for example, some, maybe in the details
in some ways they may vary
but in essence they are always the same
this is Eternal development, etc.

and that's why it turns out
that at the time when you were organizing
i.e. from the beginning of the organization of the Soul
you already have differentiation
the one that you lay down for yourself as light
as the light of realization of one's own Soul
light of realization of own events

and then it turns out that you have practically

their own tasks
in essence, you have your own tasks of course
that you set for yourself
and you solve them

but in the concept of "own tasks"
includes logically simple substantiated tasks
just the usual logic of development

there is now a possibility of global destruction
logically we need to make it so that it doesn't exist

and therefore it turns out that many tasks
which are supplied
they are, as it were, automatically formed by that
what already exists and is being implemented there for example on Earth

then it turns out that we have a number of tasks
as already existing
and the row that was set initially

this is when the tasks coincide
and which are aimed at the task
namely the general development of universal Salvation
then we see that the Soul of the Creator is that Soul
which is our Soul
i.e. well, personally with your Soul

and that's when you have this light
already perceive as stable
By the way, it is absolutely stable light

those. The soul is specifically in you
your Soul it has the power of the Creator in fact
which can be fully implemented there
some even private event
not to mention the macro event
macro event by the way at this level
this issue has already been resolved in principle

100% of this is not happening here
no global catastrophe
this is the level we are at now
here at today's seminar

i.e. here we are talking about detailing

about not having it
like someone even for example
there may be a private negative event
if possible, profile it

and that's when we talk about that
that we are on these big information pillars
and the Soul can generally "catch on", well, in quotes
for some elementary event

Well Let's say someone really likes fishing
he has it in his head that he needs to go fishing
and for example this event is not necessary
maybe someone likes flowers yes
and he needs to buy this particular flower somewhere
or take it there at all

and here is some private event
maybe it is important enough for the Soul
because he is this option
contains a lot of concepts

here fishing can personify a whole range of things
a whole array of basic concepts for the Soul
This flower can be associated with specific events
which in essence are
events that are fundamental for the Soul

then it turns out that by simply following the task
why at this moment
The soul sets such tasks
can you please there For example at least there is information there
give this flower at least at the information level
or somehow implement or plan fishing
and that's all

and it turns out that you are sort of detaching the Soul
from macro array
which is exactly that pillar
which may have held the implementation
some kind of event that you generally need

and you are all already saved
you saved everyone
you are at this moment
in a completely technologically advanced state

Well as if at the management level
where you are completely unavailable
for some negative process
not to mention that there is some kind of global catastrophe there

and that's when you perceive on the Spiritual level
such a postulate is in fact
i.e. you reach such a state
then you see what the state actually is
it really is what I am talking about now

that no disaster occurs
just because it doesn't happen
Well as if a repetition in fact
but in reality this is a state
including your own condition

if this is translated
to the level of counteraction to diseases, let's say
then getting into this state is healing
and quite powerful

this is a pretty strong restorative level
which is generally natural
he also walks freely
just as the Creator created you
i.e. there is no tension there, for example, there is no concept
some kind of "intelligent control"
and there is simply that it is natural

and when you are at such a restorative level
Well how about you visit
often it lasts for a long time, sometimes for months, years, etc.
i.e. in principle, then you can even often do it there
to work for many years and not really have any rest by the way

Well, I don't mean to rest, maybe
specifically for a management position
somewhere not to set the task of rest in management

because the concept of "rest in management"
you still need to maintain control over the external situation
so when you visit here
it is there where the Creator organizes you as a whole there Yes
in conjunction with events with goals

then you see that your goals are indistinguishable
they are inseparable from the purposes of the Creator

you are going your own way
but this path is also the path of the Creator
The Creator is always there
and in you
and around
and in every action
therefore this is also the path of the Creator
and the way of the one God

i.e. you must see Him very close
or as He helps you

i.e. this is where God helps

and He at all
because He is everywhere
then here is the concept of "help"
what you saw only yes
there in some difficult situations
people say that "God helped there or somewhere else"

in fact, God is always with them
and He's just just on everything
at some level it shows itself yes
gives a level of Perception
By the way, he sees the person at this moment in a completely realistic way

and therefore it turns out that we have that path
which if well let's assume we abstract from the opinion of atheists
or for example those who have other points of view And

then we basically see it quite clearly
the path to God as a path of action
and for the universal Salvation

if well proceed
from the point of view of let's say atheists
then in that system
for example, God's action is concentrated
apparently to a greater extent as in the system already implemented
i.e. in the realized world

and it turns out that if we want to find God

in any system
we can actually find it in principle
as if at any scientific level
in any particular denomination, etc.

so the question, for example, is that
what if we want to move
as the Eternal God does
and moreover, we set ourselves these development tasks

then here the question is really only
in our personal will
i.e. in the will of our own Soul

and here when I said that the Creator determines
namely your Soul personally
you see yourself personally and your circle is revealed personally

I generally spoke about that level
when the Creator ^{yes}
well, like a kind of packet information
what is personally yours

but when you look
what is personally yours
you see that yours personally is inseparable in essence
with what is most necessary for everyone

i.e. this is the most personal thing
which, generally speaking, is what everyone needs the most

It is clear that it is as personal as possible
this is so that there is no global destruction of the planet
this is also, in general, personal to everyone
and as personal as possible

but it is perceived more calmly
because the situation is that everyone works here
in the same direction in principle
basically everyone works

everyone understands that one way or another
everyone is working in that direction
so that there is no global destruction

and the question arises how do they work

how does it work well for example the person who is there
can push buttons on possible nuclear wars
how does it work in the direction
so that there is no global destruction yes
if he has a situation , let's say
what if this is the president yes
then the question arises
what if there is information about a possible invasion
he feels the need to somehow react
either press the button or don't press it

and here is the situation in action and in decision making
is based more on the personal Spirit
i.e. on the personal status of the person making the decision

and that's what the higher the personal status is
in terms of self-management
i.e. without buttons, without technology, namely personal control
the safer the planet is already now

i.e. when you can align the controls
well, to do it at the expense of just like a personal Spirit, actually
personal status
then the more you seem to satisfy
that package of information that information
to that Spiritual state
which was transmitted by the Creator
God is the One God

and here I have already moved on to that
what you need to be able to interact with
and in fact with the Spirit of the Creator of the One God

i.e. as I said, according to the postulate
we can also come to the concept of the Spirit of God
then we know quite well what the concept of the Spirit of God means
this is a more declared concept
more familiar with this condition
as a Spiritual action yes
fulfillment of prayers
performing some rituals
as a Spiritual or co-Spiritual action

and when we want interaction with the Soul in a fragment
highlight interaction with the Spirit of God
then the Spirit of God is perceived as joy

that's when you see the joy in it
you should see here exactly the optics
optical expression of the very Spirit of God
and the Spirit of God is located somewhat further away
but at the same time deeper
rather than direct actions of the Soul of God

here when you consider
Well for example phraseology which I have just put
in a consistent manner
so generally speaking I'm putting it here
interaction technology

as soon as you
through interaction with the Soul of the One God
then you start looking at that
how does the Spirit act in the Soul
then first of all you perceive the Spirit
which shows as if from the side of the Perception of the Spirit
The soul of God again

i.e. you can look at it from a different angle
but it can be the other way around too
The Soul of God showing His Spirit

then the next way
this action is still through the Soul of God

it means to act as the Soul of God acts

and when we go higher actually in information
just in ourselves, just "above" we use this word if
then you see that every person
here in every human cell
present naturally Action of God
how did god make this cell for example

then it's quite easy to see it
how can I even make this cell again

and then it turns out that the Soul is knowing
already your Soul
because she interacted with the Soul of God
she got the knowledge she can do it quite well
moreover, it can be conveyed quite easily

even more simply
because it was created by the One Creator
they are all actually completely
Well, essentially they are the same
in terms of the action of the Soul in terms of the structure of the Soul
that's exactly the original one

it is later that different types are acquired
due to social processes there, etc.

and in general, since initially God is One
and in the Image and Likeness everything turns out
have the same level
in terms of the universal Salvation
I'm not talking about private tasks there

then it turns out to transfer knowledge
no problem at all
i.e. and see that somewhere something is wrong
i.e. there is no problem to level out health either

moreover, it turns out
Only a person who knows should do it
this so to speak technology
to appear somewhere in society
and the standardization will come as if according to it
if he has this information

so do it this way
now management

you have your own tasks
so you took it and combined it
let's assume a cylinder on the right and a body on the left

either a cylinder or a sphere in short
one common level of management
in the form of a sphere, let's assume, it's not even necessary

formulated the general level of management
and they did so
so that from what you achieve the right management
all others who are here
or then watch the video there
or study these, for example, seminar materials
they also recover instantly

first of all, at least
to Norma there for example physiological
secondly, in general, it decides, among other things
and their private tasks
through the system of mandatory Macrosalvation

in this seminar Macrosalvation
should be added specifically often

so do this management because
why should i add
because well we kind of correlate here
with the task of the Creator God the One

so do this action as if canonizing it
because you did the right thing
and they did it
and according to my Teaching on Salvation and harmonious development
knowledge immediately spreads to all levels correctly

so do such management
I will work with you

at the time of control
try not to deviate from the specific goal
saturate the management goal that is in front of you
state as if informational
i.e. the technological state of one's own Soul

i.e. let your Soul
penetrate the control target
i.e. the penetrating state of the goal
then the goal is it can't go anywhere anymore yes
it is fixed

this is the concept of "target fixation"
when you already know for sure
that she is in one specific place at least
and that's all
and you work with her

the question is what to work with
how to work for example with some purpose
where is this goal for example if we consider the position
namely interaction with the Soul of the Creator

so when we talk about the actions of the Creator
then the goal if we talk about human development
then the goal is specific

This is, for example, the physical body of a person
which is fully manifested there by thoughts, actions, deeds, etc.
some kind of event-based constructions

and when we talk about the information goal
therefore we must do the same as the Creator does
in relation to a person

fix
i.e. to feed us with the Soul
the state of the Soul is the goal
for example , here in the area near the heart

then we see that this is an infinitely fast movement
as if inside when the Soul is inside the physical body
i.e. there is a very intensive interaction
with the image you set
as with you personally actually
as with the infinite content of information in general
well you contain an infinite level of information

by the way, in this case it is clearly visible
at the level of right somewhere in the middle of the chest
access opens there approximately
where it is completely clear that the person is composed
precisely from the infinite level of information

the first level of access to one's own Soul

and when you see this for example
then the light of your own Soul saturates the goal

once the target is fixed
it starts to sort of dissolve
in your event level which is closer to the body
and it turns out that it is solved

those. here is the solution to the goal
it's when you see the end result
own normal physiologically healthy body

and when you perceive it
it turns out that the saturation of the external goal
state of the Soul

and moreover, the state is directed
first of all for the universal salvation
creation
harmonious development there
for example Eternal life
it is possible to formulate it clearly

you will see by the way that the formulation of Eternal life
It also restores the body very strongly
and moreover, it normalizes events
here the concept is simply the formulation already restores

and when, for example, you start to look at that in general
if you want to like
for example, you are not tired and decided to watch
and how the Soul saturates
this is exactly how one is saturated with the Soul
target

then you see that the concept of "fatigue"
By the way, it's not there at all in this level

i.e. you are at the level
where it constantly exists
this is exactly the Eternal dynamic action
and you see that at this level
the body can practically be like this
that it can actually function forever
and at the same time the event area around this body
like she creates

this event area
it is this construction of the event area
as if it is created due to that
that the external world is according to the mechanics of movement
when you look from this place
it kind of closes up here
well, two vertical horizons
right left closed
an event happened

and when you look like that
then you see through the eyes of the Creator
with your eyes, and you also see as the One God sees
here in your specific action

Now you will learn to see
as the One God sees your actions
and you will see the essence of those things
who are coming towards you
here in this design

once you see the essence of things
you can control it

i.e. it is enough to send
there may even be a mental signal
seemingly ordinary
why is Thinking often perceived in humans
as a system that controls from the beginning
well, with an event structure

because well, how can it be even without explanations
because here is the interaction
with external events
according to this system it is management

and that's when you already move on
to the level where all phenomena are equal
and for the Creator-God the One
all phenomena are equal
in fact, in essence
where He is simply in the Image and Likeness
identified people and assigned them the task
this is precisely the understanding and improvement of the structure of the
World

then here is improvement to improve
giving the next action
this is already more of a task
as independent personal development

when I talked about God
spiritually transmitted to the personality
then here is the concept of the Consciousness of the One God
The consciousness that is contained in that
what do you realize first of all you realize

i.e. keep in mind especially look at this important point
and keep this in mind for the future
this construction should be exactly in this phrase

keep her in mind

i.e. exactly in the area you mean
you have to keep that in mind there

means to see how
Your consciousness
interacts
with the Consciousness of the Creator

here is your Consciousness
this is also the Creator
here is the concept of Consciousness as here
in general, it seems like it even sounds surprising, yes

everyone has their own personal Consciousness
but the further we move into the area of action
the closer we come together
with the Macro level of the Creator

i.e. at the logical phase
here is the person closest
to the task of universal Salvation

and it turns out that when you act
through the concept of Consciousness
namely Consciousness, for example, personal
then the Consciousness of the Creator
this is your personal Consciousness

so what will we saturate Consciousness with ?
That's how it will be in general from now on
and initially it was not created by the Creator

and it turns out that if we saturate
there for example, the tasks of Eternal development
then this is how we will develop forever

and here, by the way, when I did this design
just showed
I showed it again through again
interaction with the Soul of the Creator
i.e. this is a view through the Soul of the Creator of the One God

and the concept of "looking through the Soul of the One God"
This is, in fact, an elementary concept

everything was created by the One God
so just look into the hall yes
so it is possible to look through the Soul of the One God
there to look at some element of development
there is one God, of course
i.e. it's not difficult in general, but it's based on logic

and I showed that the presence of this action yes
why is the Creator giving now
completely straight there
here the One God shows
that direct knowledge is needed
by the One God directly
or you can say that there too

because many people have such knowledge
in a varying degree

so it turns out that here for the universal Salvation
we need to unite quite closely
but it turned out that the unification was pledged
in the concept of Consciousness
Consciousness considered
through interaction with the Soul of the Creator of the One God

when we look
to interact with the Soul of the Creator
a person for example yes man creates
then here it's completely elementary
everyone can read and write here it's clear
that Consciousness in many aspects is generally of the same type

and moreover it can be formulated as follows
what if he set a task there
build institutes for Eternal Life there
in general there are no problems, it is possible to completely saturate with
technologies
and create these technologies
within the framework of a sort of collegial Consciousness

i.e. everything depends only on the formulation of the task

and in principle, well, if you consider
the background of the various directions there
including there let's assume the directions of revolutionary transformations
then it's just worth it

as soon as some transformation occurs
set tasks
People just do these tasks
therefore, having set the tasks of Eternal life
people will just actually implement them
in fact, it's not that difficult in terms of implementation
in essence

because a person is capable, generally speaking
implement any system

and therefore if you set a task before him
Eternal development
and it will continue to develop forever

so in terms of tasks, exactly
here it is simply worth everything else and at my level
it is precisely the Teachings of Salvation and Harmonious Development
ability to present technology including
as well as the task, i.e. the formulated task
in terms of collegial action

i.e. the tasks of Eternal development
the task of creating harmonious development
prevention of a possible global catastrophe, etc.

the concept of "preventing a possible global catastrophe"
it is still somewhat local in nature
because there are still internal systems
Well like nuclear or chemical or bacteriological weapons

over time it will no longer pose a threat to humanity
then it will be compensated by an external system
and only the task of Eternal development will remain
where is the concept of "catastrophe"
this will be a rather conditional concept, this is in the forecast

so well the world there is very developed
but when there is control
at least the primary level of space there
then in fact the task there is different
there is a task of Eternal development
from the point of view of the possible reaction of the external environment
and maybe it could be
Well there let's assume negative positive

and here is the concept of "further"
4already comes down to the concept of "opportunity"
if we follow precisely God's task of Eternal development
then there can be only one possibility
Eternal Creator created development
i.e. there is no other possibility as such, just a negative one

there is still one more possibility left
Again, Eternally develop
as God shows
i.e. God brings it closer

i.e. the more we develop
it's getting closer exactly at this level
One God

and when we can do an action for example
for the universal Salvation independently

why do i say that it is quite possible
because this should be too
that each person is one person
must be able to save everyone

what is this this is just for everything
connection of a further task
with the stamp level which is located here

that's why it turns out
that when we talk about universal Salvation
then it's a more dynamic environment yes
for example, universal Salvation is the Salvation of all yes

those. the dynamics are actually like this
what you should see
what a more dynamic environment
more different systems more seemingly contradictory points of view
are connecting
in the Single impulse of one rescuer there
who can save everyone

just like the whole outside world
can be considered
through precisely the level of universal Salvation
i.e. any event can be considered
through the level that in each event

there is a specific technology for the salvation of all

i.e. you see that in each specific event
you can choose how in general in this event
the Salvation system was implemented

well, in fact, to be able to know, i.e. to be able to learn
in each specific event
see exactly this element

in principle, you can see any other element
let's suppose to see
what if for example you make a structure of Salvation
still quite often the load system

and let's assume that we maintain the Salvation system
that's exactly at the level of action , yes
this is often not always according to the characteristics
well, for example, it can take a long time , yes , often it needs to be done instantly
so that there is no additional load there

and therefore if you for example do it this way
then this one person for example
he can save everyone
because that's what happens there
that the Creator created everything at once
He does it pretty quickly.
and it also includes what is said about the following times
it turns out that there is no load there at all
try to work in this case without putting stress on it

here is Consciousness
where the Consciousness of the Creator of the One God is manifested
there are a lot of technologies related to that
that you can act almost instantly
and without loading in terms of, let's assume , events
i.e. in terms of physiological , i.e. without getting tired, etc.

so when you work
on technologies of interaction with the Creator
here we need to work more carefully with such a plan
what needs to be additionally monitored
exactly as a load base

and to try means to understand
that's one thing let's assume let the Creator act

i.e. He can act quickly
another thing is that you first have to learn

and often the "learn" element is an instant action
to learn quickly over a large volume
often you need to act almost instantly

so if you for example Well, we set a goal
namely Macromanagement
and you need to do some kind of Macro management
let local type yes
some typhoon so that it doesn't destroy the building
on some continent

deal with all the typhoon information and every building
it's long enough
and a single such instantaneous impulse
it can easily stop a typhoon

i.e. if you go here
to technologies of knowledge
then these are practically instantaneous unified actions
i.e., no matter how small the action seems
but it can lead to the fact that you can receive
let's assume instant recovery there
let's assume instant mastery of the Creator's actions

i.e. here is the principle of instantaneity
which I have already spoken about before
he is useful here even from the point of view of
to interact well how to keep up yes
interact
with the Soul of the Creator of the One God

and then by the way it will be clear
what is the principle of instantaneity
it simultaneously transmits
instant knowledge
and instantly you receive from others

i.e. here in my Teaching about Salvation and harmonious development
there is such a technology
as an instant transfer of knowledge to everyone
and at the same time collegial instant action
i.e. as if without agreement
they did it and everything seemed to go without saying

this principle is also timeless
because the concept of "moment"
often it is outside of time

and so when you practice
according to the technologies that I am giving today, having considered
and with whom we worked together today

try the principle of this instantaneity
use so that there is no
well some kind of tiring system
and if possible, reach that level
where did I say that there is no fatigue at all
if you work from the level I mentioned
here in today's seminar

i.e. you can just get to it
and actually work on it
without experiencing any fatigue

although with this technology
you can move quite large tasks
and generally speaking we can come to the conclusion that
so that there are private disasters there
and even minor negative elements
were not realized

and try to work more collegially
i.e. to put more emphasis on the task in collective management
then you will see the interaction
well among ourselves
there let's assume how the Creator is in general
sets the task of interaction
with each other, etc.

so today's seminar is technological
more focused on that
so that it is exactly as possible
make management
more collegial more synchronous

and because
because everyone sees how the Creator works
then the actions are more simultaneous
are happening

or even simultaneous

This concludes today's seminar.

thank you for your attention
