GRIGORY GRABOVOY
**The doctrine of the human body**
17.10.2003

Hello again
The topic of today's seminar
This is my Teaching about the human body

when we talk about the human body
then first of all we mean
in general, a phenomenon that is understandable to everyone
both from the point of view of the environment
those. just as a phenomenon
phenomenon of the human body
This is a fairly familiar process for people.

however, when we consider
the acting body
i.e. created by God
and acting for example, yes independently
then we consider the phenomenon of ourselves

i.e. as soon as we enter
own action
then we are at the level of psychology of Perception
at the level of Consciousness
close to the Soul of man
we consider the appearance of ourselves in this World
i.e. our actions are our phenomenon

and at the same time
human body structure
is considered first and foremost
as a structure originally given by God
for human interaction with the World

in this case we are considering
this interaction
as an interaction that is precisely initially directed
to solve personal problems

in this case, the tasks are considered
the tasks are complex after all
and how the tasks of the World

as God's tasks
as well as the tasks of human actions

and in this case the concept of the human body
it is a completely pragmatic structure
for implementation it turns out
as God's tasks
also the tasks of the World
and first of all it follows logically
that and the tasks of God in His Eternal development

so first of all
in the human body we need to consider
precisely Divine connections
i.e. that which is connected with God
that which connects with God

initially the process of birth
and the process of human life development, for example
he is like that
that you, for example, when you encounter the surrounding world
if there are any problems, especially
always consider your movement
as a movement in general within the body
Souls of man

i.e. a person sees the Soul
if he perceives the Soul as healthy
then the body becomes healthy

Here is the Perception of a healthy Soul
this is what guides the body
to Eternal development
with a healthy Soul

Be careful with the wording here
because here one follows from the other
and this can very well have a colossal restorative effect
for example the human body
if in the formulation for example have
Multi-level Perception

and the body is also a multi-level system
when every action is directed
for implementation
It would seem that the system could be simple in general
some elementary action

for example, drink a glass of water
in this case we use the vestibular apparatus
for example the body itself
and participates in it
another external attribute
like a glass of water

if we start thinking about it
and how about from the point of view of the absolute structure of the World
a glass of water exists
in terms of interaction with the human body

Well let's say we add water to a glass
spiritual property
and we will count
that a glass of water is a functioning system
in relation to the human body

then you get a human body
as an active system
takes yes for example with the right hand
glass of water
and then the water itself
perceives the body as an external structure
that it is precisely here that such a term is acceptable
what "takes the human body"

the human body generally takes water
but the water is in the glass
glass was created by man

here begins the structure of the essence of the Supreme Mind
where is human action
this is the action of a higher, so to speak, intellectual system

this is the concept of the highest Reason
in this case it is the Mind that binds
well, as if from above, i.e. at a higher level of management
different systems
in terms of their interaction
from God's point of view, it is

this is the concept I put structure into
precisely as if a control system

and yet God is this
initially the highest natural level

where is the concept of "higher Reason"
this is basically the same consequence
as well as the concept of, for example, the "human body"

therefore the human body
as the realization of the structure of the highest Reason
speaks about that
what does water in a glass perceive
Well, if such a word can be allowed, yes

to the concept of water
man as an external structure
those. spiritualization
or let's assume there is some element of action
from the point of view of water
in a person occurs only then
when the body starts to act

that's why God created human bodies
so that they are manifested and they act
then the level of spirituality comes
i.e. the presence of God in this action

another piece of information
can perceive any other
if there is some action
well at least a statically lying stone
which seems to have no effect
it lies in one place
but this is expressed in this yes when the stone is lying
action

therefore, based on this
we can say that the functions of the human body
these are the functions of knowledge dissemination
as knowledge of the body itself
as well as knowledge in relation to others

and this concentration in the human body
She is actually very multidimensional.
very tightly, as if tied
for the purpose of the body
very clearly implemented
in terms of achieving goals
God first and foremost

i.e. the human body

This is the structure of multi-link communication systems
where the connection exists
as the interaction of the body with the external environment
as well as the external environment
reacts in a certain way
on the human body
and all processes are resolved inside the body

therefore the body
this is a fairly serious mechanism, so to speak
from the point of view of nature
in terms of information exchange

i.e. this is basically it
and control center
and the source of information
and at the same time it is the level that implements
multi-set
God's tasks
human
Peace
and generally speaking it is concentrated in it
all systems are essentially control

therefore the human body
logically it can already be called a control center
all external and internal processes

hence it follows that the element of Consciousness
which is basically Infinite
or there is an element of Spirit
Souls of man
contains
in terms of management, including in the body

why "including"
because that's what we came to
that this is the control center logically

but if it means
Soul
Spirit
and Consciousness
generally different systems of personality manifestations
are logically contained in the body
then it turns out that the body
a fairly manageable system

once logic leads to the body
Spirit
Soul
Consciousness
and generally speaking the whole external world
i.e. management of the entire system of external Reality

it turns out that logic
which kind of penetrates yes
into the physical body of a person
due to human thinking
builds a person like that
that in the body begin to be realized
processes of the essence of the universe

and from here we can say
what if we want to know
what is the Spirit of the stone there
what is the Spirit of the plant
then it is enough to just logically involve
this Spirit inside the body

and here is the body processing system
this information
will give you direct knowledge
but knowledge is already of the Soul of man

and when you start moving on
as if to rise up the level of body awareness
means Spirit
Souls in action
then come to that
that any elementary action
originally born in the body
in the future it turns into
into the structure of development of precisely Divine thought

i.e. Divine action
where every action is that
what we perceive
like a moving body
developing body
and the body passing into the outer body

i.e. the element of transition of the human body
into the external environment
i.e. for example, there is some kind of metagalaxy, yes

and a person who perceives his body
In a spiritual way
he is at a certain level
stops feeling where his body is
and where is it located
for example the structure of the metagalactic
some kind of, well, let's say, a racing car, yes
or some huge one
for example, the physical body, well let's assume a meteorite
at which this meteorite
may have a tendency
for example, movements towards the body, i.e., for example, there on the Earth

it turns out
that as soon as a person stops differentiating
this structure
he begins to control the meteorite

i.e. in essence he can achieve that
due to this level of body condition
that the meteorite will not fly to Earth
Well let's say the big one is dangerous
and he, with the help of his body
can change its trajectory

for this you just need to go out
on the Spiritual level
into the structure of continuity
human body and external system

the same applies to that
to avoid a nuclear explosion

i.e. when the human body
begins to interact
with the structure let's assume just the core for example yes
some element
or suppose a nuclear reaction
that is the separation of the human body
from the structure of, for example, some nuclear reaction
happens primarily because
that man is divided
in the Image and Likeness of God

those. it is basically divided
from the structure we assume the reaction

if the reaction itself is nuclear
it happens , let's say, in some reactor
or could happen with a nuclear bomb explosion
then it is enough to use it here
basically a different principle
the principle of division of the human body
and external, let's assume, a negative system

and for this purpose, in general, it is used
fairly simple level of control
related to that
what if in case means counteraction
human body
so in relation to the macro body yes
to some huge bolide that can
or a comet that can
fly towards Earth
or towards just the physical body of a person

we use the continuity level

i.e. seemingly distant processes
but nevertheless we use
level of continuity
this is how the world is structured, precisely according to this principle
accumulation of external energy as it were

then here in the case of screening from a nuclear explosion
we use the opposite principle
detachment of the body from the negative source

you can also use this technology
in the treatment of diseases
when is the film adaptation
i.e. a break where there is no disease
the body is where there is no disease
and then we become healthy

i.e. here the principle is based
on the True status of man
where man is created in a unique level
originally by God

therefore God has a place
where a person is safe
anywhere

i.e. this place is with God

and when you realize it
then your body enters the security structure
and then you start working
already towards Eternal development

but the very concept of the body
naturally in the Eternal construction
acquires precisely the level of spirituality
in general, including external interaction structures
with the material Spiritual world

i.e. if you find
this area is with God
where your body is safe
you have immediate chances
means to know the Eternal development almost immediately

in general, this horizon is immediately visible there
what is Eternal development for the human body

this is very specific information
it is located on a distant horizon, as it were
and reminds me of that level
when you are a person looking at for example a distant horizon
he perceives a certain infinite mass of information

it's actually quite simple
a person understands that there is an Infinite Horizon

the same
being in the structure of God
giving a specific place
the human body
you can perceive all the information
about Eternal development immediately

then it turns out that spiritualization
this is, in general, a necessary factor
in the human body

i.e. the Spirit is present in the human body because
that the body can develop infinitely

and it turns out that when you understand this
then you see the Spirit not only as a personal Spirit, for example , yes

well, for example, yours
or the Spirit given by God initially
as if from a primary point
transmission of the Spiritual component
as if the Spirit coming from God simply

but you see that the Spirit is, in general, a consequence
including Eternal development

for the human body
Spirit is the consequence of Infinite future development
as all of humanity
and generally speaking one person

so it turns out that when we
for example, we want to understand and sort things out
in a complex system of connections between physical bodies
well let's assume there in the reincarnation nature
in the hereditary system
let's assume in the system of family ties
then we get
that your personal body already contains all the information
as a near level

but basically your body contains
all information
about any person
about all the connections of this person
with the whole outside world

in essence this happens because
that God gave this knowledge initially to everyone
so that a person can navigate this World
from the point of view of all previous experience
any person

and in this case it turns out
that any person is completely understandable
to any other person
from the point of view of Infinite connections

and here the shape of a person has a certain significance
i.e. to determine
a person's closest family ties
it is enough to consider the form

logically it is indeed so

the relatives there look alike

but we can say here
what if we want to consider
as if an absolute picture of the World
then what we are talking about here is that
what is the shape of a person
embedded in its so-called control systems
speaks about that
that in form it is possible almost immediately
define there let's assume there is a related level there
can you determine how
a person understands some system there, etc.

and it turns out that this is how it is in my opinion
The doctrine of the human body
spreading knowledge about Salvation
it happens already because
what are unified forms
saying that a person lives in the present moment

i.e. basically all the people are there
they are all essentially the same
at least in external forms

and therefore at this moment
a person lives and is healthy , for example
that means he can live infinitely

this knowledge is given to the body
as a system of seemingly unconditional actions
i.e. the person does not pay attention to what he is doing
Well, it's natural for him

note that I have deduced for the body
how exactly is natural knowledge

and when do you start using
for example, the structure of natural knowledge
then you get that the human body
this is a certain personal factor
in the structure of your, as it were, internal development

i.e. for the individual
the body is
and the main element yes
like a supporting platform

but at the same time this is a factor of self-awareness

how else can a person understand himself
if for example he does not have a physical body

so that we can talk completely calmly
for example about resurrection technologies
complete restoration of any matter, etc.
that's in terms of Eternal development
then the element of awareness means oneself
this is an element of the resurrection of another, generally speaking
first of all

Well, the thing is that the concept of "resurrection technology to oneself"
when a person did not die
they can only be directed
to the recovery system
well, something like that let's assume yes recovery complexes

therefore, we can talk about a real resurrection
it is possible only in relation to another person

and when you look at this system
then it is enough to restore only
the structure of self-awareness of the body

and as soon as you have this structure
in Consciousness you restore
Generally speaking, a person then begins
collect body
according to the form of your Consciousness

hence
considering for example
the body as a form of Consciousness in this case
you see that the indestructibility of Consciousness
as structures of the external world
leads to the Eternity of the body

i.e. external Consciousness
the whole outside world
it always exists

therefore if you exit
through for example the heart level of Spiritual knowledge
on this information
do you understand that the outer Infinite World

this is your infinity
it is inextricably linked
as in the structure
Here for example, to prevent a fall there
some kind of comet or a huge bolide

and when, for example, you understand this
then the structure of your development
becomes calm and stable
i.e. the body begins to function
already according to the Laws of a reasonable level
in which in this concept of "reasonable level"
contains the reason for your action
and the mind of the outer world

and you begin to understand
what is the outside world
he essentially has both
the same level of rational development
according to God's tasks
i.e. before each element of the World
the same level of Eternal development is worth it

so the mechanism of interaction in general
quite simple
if you want to have a habitat for wild animals
was not destroyed or developed there
and each animal lived in its own natural environment
and at the same time would attain the level of rationality
in terms of interaction with the human body, for example

then you should in this case
just make a similar level the same
how do you do it when you stop for example
some external phenomenon that is unfavorable for you

you must pass this information
to an animal
for example, well, there on the spine, yes , if it's a mammal

if it's a reptile
somewhere it is already closer to the limbs of a mammal

and when you kind of look
for example, it is necessary to analyze the animal world

if you want to pass on knowledge

for example, to increase intelligence
then you make simple light control
towards the body there let's assume an animal
directing the light beam
to the level of the spine for a mammal

and at the same time there is a light flow
back as if into the external environment
the level of intelligence increases
and you can treat animals by the way

i.e. directing light from your body
just in the right part of the animal's body
you are treating an animal

and for the reptile
there, well, it's like for cold-blooded animals
you direct through the limbs
but in general, by analogy, how it is done
for a mammal it's all the same
i.e. what is closer to you

i.e. for example the shape is the same
as for the spine of a mammal
but the direction may be to the limbs

and in fact when you get to know this element
you see that you don't care at all
where to direct the primary level
from the point of view of increasing the intelligence of the body
external well for example an animal

why am i talking about an animal
and analyzed two specific cases , for example
is it a mammal or a reptile

then you see the difference in that
that the primary actions seem to be different
and the next steps are generally of no importance

further on in the second act
you don't care at all
where to direct control

you can direct your beam
on any surface of the body
after all, it's the bodies

and not near this animal

and the reflected signal into the external environment
increases the level of intelligence
i.e. a person begins to understand an animal
and already enter into telepathy
in general, in the structure of the same contact
as with a person in a verbal sense

pay attention here
level of telepathy
level of Thinking
equalizes any structure of information

By the way, this is a very strong development system
human telepathic abilities
ability to translate the system
any object of information
to the level of desire for contact with a person
and at the same time this level is like this
that you begin to understand any system in general

i.e. the body begins to perceive information correctly
any system
from the table there, the sky, for example, and any other Reality
and you can enter into telepathic contact
in the same way as with a person
in words

those. human body telepathy
this is a word for a person
in translation, well, the formula is very simple

as soon as you begin to understand this formula
you see what the word means to a person
but it was originally created for man
and the outside world
as well as for other systems

then for the human body
the word denotes a specific action
directed , for example, at the sound receptors there
i.e. a person has systems of word perception
there are sound vibrations for example

and when you already start to analyze
why the word for example yes

does not work unambiguously
there on wild animals
Well for example, a word can act
there are supposedly dogs and cats there
less often on cats

then here you see
that the level of rationality in general is yes let's say bodies
from the point of view of the human body
it is different
because the closer the animal is to a person
the more reasonable it is from a human point of view

but considering man as a control system
for seemingly inert systems and external Reality
we can say
what does close to a person mean
they generally start to develop like this
that they even begin to understand words
Well, let's assume the dog understands commands.

if you start analyzing
this structure
then here we get the following
why can't we destroy it, for example?
just wild nature let's say
because if you leave the structure
only as if cultivated development
Well as if development of the related
with the unfree state of animals
there are trained dogs and cats, etc.

then we get
that approaching the body
occurs through the voluntary participation of a person

but what if we just have wild nature
where there is an approach to the human body
based on the so-called choice of free choice of animals
although this may not be entirely clear logically
how can an animal make a choice

but from the point of view of the Creator
the animal makes some choice
it somehow lives there in its habitat

that animal's body

this is a form that carries, as it were, the structure of choice

if we consider all positions in the universe
then we will see that the wild nature
this is that information
which generally speaking holds back
with its overall neutrality yes
non-participation there, let's say, in the social processes of humanity
holds back the possibility of well for example there is a nuclear war
or there is bacteriological warfare

bacteriologically it's very simple
if, for example , bacteriological weapons are used
if there are many wild animals there
then in principle there could be such an opinion
what should not be used yes in this place

i.e. it is enough to count
that there is one animal body or there are many bodies
may be delayed
use of bacteriological weapons
so animals influence
with its neutrality
i.e. as if by non-participation
in human social systems

I picked it up here on purpose
such a complex concept
interaction
bodies for example there is an animal there
bodies of stone yes
human body
to reflect the status that the human body
it is essentially a transmitter of knowledge

i.e. knowledge coming from the human body
they are absolutely equivalent
that goes from a man to a dog that is tamed yes
that go from man to the wild world

and when do we begin to understand this
then we see that the difference is only in that
from God's point of view
that the dog made a choice to be near the person
it's her personal choice
and the wild animal made a choice
be there in the habitat

then the whole external system
the entire external system
this is also a system of free choice
as if in relation to the human body

when we talk about that
I wish we could get closer
with some kind of advanced civilization
least some form of life
at some great distance
then first of all we must understand
rendezvous system

aliens flew in from somewhere, let's say
and everything is fine there, yes, the rapprochement happened
but from a management point of view
through the human body
it must be a resource of the body itself
if we want to know something
interaction structure
bodies
and bodies

telepathically or clairvoyantly
you can look anywhere
and see, in general, any design
which actually exists
at any distance

but when you want to make sure
you have to get closer with your body and touch something
there to pinch off a piece of rock
or look at it through a microscope

hence
criterion of precision in management
is still the human body

and then the element of approximation
this is an element of tolerance

This is why the dog decided to live near a person
Well, somehow she decided to live
she lives
from God's point of view
because God regulates everything

based on the principles of free will from the very beginning

if we, for example, begin to study this process
from the point of view of control through the human body
then we begin to know the World like this
that the World becomes knowable
because there is a human body there

i.e. therefore the World is completely knowable
for the human body

when we already have this structure
then generally speaking a cure for any disease
or is there Eternal Life
in a healthy human body
this is a structure of just about everything
understanding the connections of the outside world
and the human body

i.e. as soon as you understand this connection
from the point of view of close friendly interaction
with the human body
the body begins to develop forever
and it begins to develop
in a completely independent level
i.e. then there is no need to make any effort
for example, through special concentrations of Consciousness

i.e. for this it is enough only
define external level connections
i.e. the external world
and the physical body
but to determine correctly

and the correct definition
this is the fulfillment of God's tasks
each element of information
i.e. every body

and here it arises
main concentration for action
i.e. the main system and task of management

because every element
between the physical body of a person
and any other body
it is an independent element

i.e. any element of air
any element
seemingly artificially reproduced system

and we come to that
that in order to carry out interaction
we actually need to come to some kind of agreement
with completely free systems
that surround the human physical body

and these free systems
freedom is originally in that
that God alone created them free
begin to interact just as freely
with any other system

i.e. a system arises
well, as if in fact Infinite degrees of freedom
in each local system
at every point even

and this is the level of Infinite degrees of freedom
this is God present
including in the body of an active person
according to God's tasks

when you understand this structure
you see that your body is eternal
because it sees God
in all its manifestations

here with the body of a person with his own body
can be seen
the absolute full manifestation of God
for you personally
and generally speaking for everyone
this is the unique ability of the body
because it's like a kind of focusing system
all knowledge comes there

and when you, for example , understand this structure
then you see that your task
determined , in general, by you yourself
at the moment when you got the body
well at the moment of conception of further development

therefore your free choice
this is the human body your body

when you understand this structure
management issues become very clear
from the point of view of knowledge transfer

i.e. you know what needs to be done
to transmit knowledge at all
i.e. what action to do there with your hand
what word to say
i.e. the body begins to function harmoniously
in terms of God's tasks

when this harmony from above is visible to you
any processes that arise before you
complex processes and such requiring management
maybe there are some negative perturbations there
somewhere on the information yes

you very calmly take all this under the control system
just as if putting the body on display
to the information flow
coming from God
where you act according to God's tasks

when you understand it internally
when you know it with your body
any problems you face can be solved

and your practice shows
that they can be solved Infinite time
it all depends on that
what are you on the information
bring your body into contact with God
here in principle you do it
into the process of your Thinking

therefore it turns out
what if Thinking
plays such an essential role for the body
then you can consider it here
Thinking as a structure of body control
but reproduced by the body itself

i.e. the body is also a controlled environment
and the body is also a control center

when do you come to this understanding
do you understand how it is tripled
The Physical Body of the One God

it turns out that each element
by analogy with the fact that Infinite degree of freedom
this is the Physical Body of God
located, for example, near the physical body of a person
then we are considering in this case
the structure of both the external and internal worlds

when we look at it here
development system and such
what do you want
well, for example, through knowledge of the human physical body
make specific management
then many methodological systems arise here
very simple ones that are available to you initially
already because you own your body
you move, do actions, etc.

and here are simple technically simple control systems
consist of the following
that through certain concentrations on the body
on your body yes
in principle on the body of any person
it is possible to develop a structure for body regeneration
i.e. restoration of the body in the process of activity
and also restoration of the body
for example there in the profiling situation
i.e. to prepare the body for some situations

To do this, you need to consider a simple principle
which I just said
in terms of organizing, for example, precisely that Perception
when you see God near the body
i.e. you see God with your whole body

the technique here is as follows
you should use for example your right hand there yes

consider the movement of events on the left hand

very simple
for example left hand
you can take something with your left hand , let's say

I can take, let's say, some object
move this object there with your left hand
but at the same time the control action
I can lay it through my right hand consciously

i.e. if the main number of actions
a person does something because he simply does it
and it is so
and he doesn't have to think about it

then as soon as you start to think
you see the flow system
from the management structure
from one part of the body to another

and that's when you did such an action
you feel your body healthy
and it becomes healthy
because you did the management
in relation to the body

i.e. any control in relation to the body
this is the health of the body
but control due to the structure of Consciousness
due to the structure of Thinking

here you start to see
what is your soul
it is a structure that forms the body
including formative

when do you cross over
no, it means this particular structure
do you understand
that the Soul first of all requires realization
often a very specific task

i.e. here are the specific tasks that are being addressed
in seemingly completely private actions of the body
pour a cup of tea there
this may be the task of the Soul

quite serious in that sense
what if you pour tea in a second
then at least the planet is not destroyed
You pour somewhere, right?
on the planet you stand

therefore here is the elementary action of the body
for the Soul this is often a Macro task

and it turns out that from your point of view
actions from the Soul
do you often act like this
that the maximum concentration of the Soul's action
is it elementary or is it complicated ?
any action of the body in general

the body is the maximum concentration
in action Souls
Always

i.e. for the Soul this generally works out
quite concentrated
Well, in general, it 's a maximally concentrated system
in the structure of the Soul itself

and it turns out that when you start
to act means from the body
Do you understand what kind of load your Soul has?
when it implements the body's tasks

when you look at it means the Soul
through your body
with the whole body
then you look the same
how do you look at god

i.e. you watch your movements
here are the Spiritual Movements
passing through your body
exactly as you perceive it
with the whole body of God

and here you see very clearly
that the Spirit is organizing
there is also a Spirit coming from the body

i.e. spirituality associated with the body

why for example many practices
well, sort of cultivating
structure of body development
Here are the saints for example

or if let's consider the process
namely the development of the body according to the Spiritual sign
then the body actually begins to radiate
in control range

i.e. in the range of exactly that light
which is the light of control

the body itself

i.e. a body that is developed
according to the Laws of Eternal Development
or is developing
it starts to radiate itself
this is, in general, a beneficial action
to the outside world
and the outside world respectively
synchronously begins to develop
towards better development there

when you look at this technique for example
as a system of certain physical actions
this is generally good
because the Spirit, yes, he participates
in the control of physical processes

but when you look at the action it is
as a structure for the development of Consciousness
as a structure of control through Consciousness
then you see that Eternal development
it is often the body's action of realizing the fact
as if at the level of one's own Consciousness

i.e. the body as an external source
as a tool for studying Consciousness

here a somewhat paradoxical situation arises
in terms of the fact that Consciousness would seem to be yes
this is still often perceived
as an external quantity
through which the body is studied, let's say
or some other value

but from the point of view of my Teaching about the Human Body
the body is an independent control system
in Perception
and with the body you can study your own Consciousness

and when you start asking the question
and how to study your own Consciousness
for your own benefit
how to apply

It's enough to just go out here
to the level of abstraction, as it were
i.e. you enter the body
into the structure of God's Action
logical level of Consciousness

but in the Action of God
and the body and Consciousness are organized simultaneously
where there is True Action of God
there is no difference between the body and Consciousness
in time of organization

and when you find this element logically
you see very clearly
where is the body
where is Consciousness

and then by means of Spiritual action
you can connect body and consciousness
and it turns out
because Consciousness is an Eternal construct
because she is bigger
as a management information system

since it is an Eternal construction
and you are squeezing Consciousness with the body
you actually give the body the status of Eternal Development
by analogy as God does
and make Eternal constructions
With soul

The soul is not only Eternal but also an Infinite system
created originally by God

then it turns out your body is naturally Eternal
moreover, it is multi-reserve Eternal

i.e. you have levels of management
which you have through the physical body of a person
and which show
that your physical body is Eternal

levels of management
is located only on the whole
in your own physical body

if we start looking for such systems
in the form of specific points
or some specific chakras or such types of concepts
then we always move on
to the seemingly logical
i.e. to specific acceptor points
which have a generally limited system
for some action

Well for example, a hundred years
if you concentrate on one point
information from one point can develop over a hundred years yes
and can in principle be quite favorable

well what if Eternal development
then it turns out that information should be constantly
be initiated by the body

i.e. on the contrary, to come from the body
i.e. the body is an energy generator
information generator
the generator is basically the World, so to speak, yes

and then we come to an analogy
to the Physical Body of the One God
where He also created everything at once
and it turns out in real time and also creates yes
how does an ordinary person participate in the process of creation
all elements of Reality

and here it turns out that the opposite action
in relation to a person
i.e. if we want
consider the pragmatic meaning
let's assume there are cures for specific diseases

here it turns out that we must
see the human body
as a body going to God
going exactly along the road of Eternity
i.e. going into Eternity
in terms of the Eternal existence of the body itself

then it turns out that here we find
that the body can develop
only in the presence of Consciousness
only in the presence of the Soul
Spirit
and generally speaking all personality characteristics
exactly that person
who is a sane person
in terms of social aspects

i.e. there are aspects of "thou shalt not kill"
there are aspects of the Eternal , for example, harmonious development, etc.

and it is clear that all these aspects
this is a need
and generally speaking the structure of the body's life
aimed at
well, for the development of culture and civilization there
where the body can be the embodiment of culture
For example there is painting based on the contours of the body
body based
this is often the Eternal structure in Perception

i.e. such paintings some portraits exist forever
and moreover in terms of Perception
interest in them is increasing

those. body reflection
gives constant aspiration to other people
look
although it would seem that this is basically just a body drawn
and yet it exists here
some inner meaning of the body
through which God is visible
i.e. the body personified by God yes

and when do you start
see this structure yourself
in any person
you start to heal it
i.e. create favorable events for him

when you see the original meaning
creation of the body by God
you see that the body is created for that
so that you have Eternal development for yourself
here in the body

it is absolutely clear that we are talking about you

when we talk about the body
it's about you
about your body
there are no other opinions here yes
completely obvious structures

God created the external Reality for you
for your body
including of course
but initially it was due to the personal factor
He did it to you and did it to you

this is where you start comparing these systems
then you get
a fairly specific level of management

based on that
that God created you
simultaneously laid the structure of the body's development
and the Physical Body of God
body and Consciousness
as a structure for universal development
i.e. these phenomena must be completely in essence
understandable to everyone

and when you start watching
and where are these concepts?
i.e. where is the concept associated with that
how to normalize for example
there is some function of the body
how to make the body develop forever
and had a normal development

then here the first principle of the Soul of man arises
that is, the Soul as the expediency of development
physical body of a person

and when you start to see
what is the task of the Soul
This is the development of the human body, among other things

then it becomes clear to you
to develop the outer world
to the level of harmony
with the physical body of a person

you need to do this
so that the projection is actually your Soul
on the structure of the external world
would develop the outside world
to the level of favorable interaction there

i.e. wild animals would stop biting there
they would develop in their own area and not interfere with anyone

and here the structure arises
so-called soft or polysemantic worlds

i.e. over time, just like the human body
as if developing yes
building there means a development system
through the structure of the development of the Soul
i.e. cities and certain habitats arise

also wildlife has habitats
may arise through a kind of release
namely their fragments in the structure of Consciousness

i.e. a person seeing this structure
begins to perceive their Consciousness
how Consciousness is not aggressive

as soon as a person begins to understand this
i.e. finds as if a sign of kindness in fact yes
in a beast in the wild there or in any system
then this system also becomes kind to him
i.e. she cannot destroy it

this is the original Love of God
and the Good of God
in relation to all people
leads to this, among other things
that man cannot destroy God

because He is in that system
that interaction with Him
follows the line of Love and Goodness only
but there is no destruction system there

and when you by analogy with this
from your body
do the same action
you will see that this way you can stop

aggression there are packs of dogs there

it is possible to make it so that some physical body yes
it didn't reach you, etc.
i.e. to protect oneself from some external elements
protect yourself from some internal problems
information quality including

because when you perceive information
you often perceive it
as if inside the human body
or at least coming from within

and when you see these systems quite transparently
i.e. you see, for example, how it interacts
information
with body
at what point
where the interaction takes place
for example, control information, i.e., management of the future
and information from the past
where for the past means there is a control system
from the human body yes

for example, you ask such questions and find
you can lay it out very clearly
let's assume in time
the structure of any disease in general

where did it come from
how to cure it
how to solve an event etc.

the control mechanism in this case
as a projection mechanism
is the human body

those. if you shift
onto the system as if of internal projection
this is understanding
here is an internal projection from the human body
this is understanding

if external projection
it is actually like a Light control system
coming from the body
Light coming from the body

from the creation of the human body by God
this is the universal governing Light

It would seem that nothing could be simpler
it's enough to go out
to the True initial radiation from God
and that's all
any problems are solved immediately
as soon as they get to you at this point

you just have to look through the body in this way
not just a body
and over there
where initially all bodies were created by God
from the starting point

then this Light solves all your problems
by the path of the Divine Light
coming from you

This concludes today's seminar.

Thank you very much for your attention
