

GRIGORY GRABOVOY

**Method of Soul Propagation  
into the area of realization of Spirit and Consciousness**

2003

The topic of today's seminar  
this is the introduction and distribution  
The Teachings of Grigori Grabovoi  
about Salvation and harmonious development  
Method of Soul Propagation  
into the area of realization of Spirit and Consciousness

This method consists of  
what are you doing management  
aimed primarily at that factor  
that the Soul is spreading  
for example, in the area of realization of the Spirit  
it comes first of all  
from at least two factors

from the Creator  
the first factor is that  
what is the Soul  
organizing Spirit and organizing Spirit  
when it spreads  
into the realm of the Spirit's realization  
she's actually well as if it were tracking  
its primary task  
according to the primary task of the Soul, generally speaking

those. Soul organizing Spirit  
she actually is in this case  
solves the problem by that  
in what way the Spirit  
including those created by the Soul  
implemented in a specific place

after all, if we proceed from the level of that  
that all elements of Reality  
including those created by the Soul  
then the realization of the Spirit  
this is also an area of information  
which is created by the Soul

but the Spirit is multifaceted and in connection with this  
the level of implementation can be multi-component

i.e. the Spirit can reach  
different elements in the universe  
in different parts of the world  
and including implementation  
some personal private task

that's why it works  
that the Spirit is in many ways intertwined with the Soul  
in terms of simultaneity and taking into account multiple pieces of knowledge  
at once

it's one thing  
to realize some physical goal  
Well let's assume to restore health there  
another thing is that at the moment of implementation  
there may be spiritual experiences of empathy  
there, let's say, the heroes of the movie, etc.

penetrating internal systems  
which intersect in optics  
We work on optics  
in the optics of human perception

and therefore the Soul has a task  
as firstly means being widespread  
into the realm of the Spirit's realization  
control this process  
from the point of view well you could say  
author's supervision of the situation

and secondly, also additionally  
impart properties of independence

after all, the Creator created it in the same way  
He created people  
which can further develop independently

and the presence of the Creator  
as in human action  
and in order to teach a person  
be able to decide independently  
Well, for example, the required number of questions

and therefore by analogy with the Action of the Creator  
The soul acts the same way  
and carries out practically, including  
and therefore control over the spread of the realization of the Spirit  
and plus is involved in this

so that's when we talk about participation  
this is the fundamental knowledge of today's seminar

The soul is also directly involved.  
in the realization of the Spirit in a specific event

i.e. there is a task, for example  
well, for example, there is a conditional  
to spell out some business deal  
which has many components  
there are many businesses and people there

then it turns out that the implementation of this task  
as an impulse coming directly from the Soul  
because the Soul is also interested  
in the realization of the individual's goal  
including the realization of the Spirit

so the realization of the Spirit is considered here  
as if in mechanical optics in this way  
that the realms of the Spirit  
here correspond  
those systems of Reality  
which are included in the fixed systems of space  
i.e. this building specific documents specific people

and therefore if we say  
that a spiritual person  
can lead many people  
then it has exactly this glow  
what is realized in space

and the area of the Soul in this case  
this is the control of the time component  
implementation of the task

and that's why when I look at it  
according to my Teaching on Salvation and harmonious development  
transfer of knowledge  
then the transfer is carried out simultaneously  
both in space and in time

because at any point in space and time  
always exists  
as a presence factor  
and besides the actions of the Soul  
so is the action of the Spirit

therefore we can talk about simultaneity  
well, practically two dedicated systems  
in the concept of the structure of the World  
such as Spirit and Soul  
and in this designate these systems  
as systems are generally mutually remote  
i.e. there are boundary systems

for example space is space  
time is often simple  
mental level of human perception  
some processes

but nevertheless, this is such a seemingly speculative conclusion  
gives very big advantages

what is the sign of man's freedom from the Creator  
, for example, a leaf on a tree swaying  
Well, he just thinks that it's like  
the movement happened for example there in 10 seconds

i.e. he took there, created and invented a watch  
and believes that time is flowing

but when we move on to synthesis  
i.e. when we come to a multitude of events in the World  
we understand that time is really necessary  
in terms of accounting for the movement of electric trains and airplane  
schedules  
and all other processes in general

when we come to that  
why does a person age  
then based on this process  
it is clear that he is getting old first of all because  
that he reacts this way to time

i.e. if a person is aging  
take  
and from this glow of multifactorial events  
to bring out specifically, as it were, into a capsule of Consciousness

where to say that "you know and if you are here  
then you don't age  
because time can be told here  
or Infinitely or originally"  
to give the properties of both Infinity and the beginning  
i.e. well, the property of universality in mental understanding

and a sign of freedom when we are in a logical understanding  
we do this  
the sign of human freedom is already indicated by that  
that he begins to control the process  
i.e. he begins to manage on a Spiritual basis

i.e. logical action  
comes to the Spiritual plane

and Spiritual Administration  
it is most harmonious there  
where multifactorial accounting of Reality is required

Well, for example, a person must live on Earth.  
some big comet shouldn't fall on him  
from the outside space

This is controlled somewhere here  
and it is controlled specifically here  
where the Spirit is the Soul and the logical phase of Consciousness  
this is what is deliberately highlighted like this now <sup>yes</sup>  
a person in the process of his reasoning

after all, at a certain level  
My management system is based on that  
that looking and seeing  
how do management processes occur  
from my personal experience, <sup>for example</sup>  
I describe these processes as follows  
so that they are understandable

essentially I'm just doing a description  
management processes  
from the point of view of interaction  
Well For example there are such systems as  
Human  
controlled event  
and first of all the task here is  
namely, universal Salvation

because it is the most necessary sign of management  
logically it consists of the following  
what to do next second  
we really need to do this  
that at least civilization was not destroyed  
from a global explosion

so it turns out we do it all the time  
some necessary actions  
including the action to implement controls

so that's what I'm talking about now  
this is mostly spoken about  
in the logical phase of Consciousness

i.e. precisely in the structure of Consciousness  
which includes  
the concept of Spirit and Soul  
including Consciousness

i.e. it turns out I took the volume of information  
corresponding to Consciousness  
and spoke those concepts into it  
which generally speaking create Consciousness  
The Soul creates Consciousness with the participation of the Creator

and therefore within the framework of Thinking  
we can model and implement  
processes  
which are not generally fixed  
in the form of specific properties

for example, it is impossible to say in the physical world  
what does it mean you can build on sand  
a stable building if there is no deep foundation

and it turns out to be Consciousness  
you can make any foundation  
i.e. on the basis of any external control  
you can make any of the following controls  
creative type

and why exactly, well, how would I say it?  
The somewhat paradoxical situation is that  
that Consciousness is created by the Soul  
nevertheless within Consciousness  
we can work with the Soul

like at first sight kind of paradoxical  
because we are based on fact  
The soul is the foundation  
where of course there is the action of the Creator  
created created that situation  
when the Creator had already created the Soul

but nevertheless work is taking place in the area  
already as if secondary to the primary level

it's all the same, well , in the logic of Reality  
there is some kind of lever coming out of a large building  
and you can take this lever  
and then rotate this building  
and in general do some manipulations  
with the whole building

in logical understanding it is like this  
what i said today  
at the level of modeling the space of Thinking

so that's how it turns out  
what is this level  
where modeling passes into Reality  
allows you to realize Consciousness  
into a material object

i.e. if you think about it  
this is how it happens  
materialization of some element of Reality

for example, there is the materialization of an organ  
restoration of health there  
this is also materialization physically  
in the mechanical understanding of health

it's completely Thinking  
starts to act  
to the realm of physical Reality

and here it exists  
well, some kind of well, moving counterclockwise at the beginning  
this information top  
as if it means a spiral level of information  
to the side

Well, if you look here  
the second important very important principle

for today's seminar  
what's moving towards you  
information  
which moves counterclockwise  
if you look from the right hand side

if you look from the left  
then you see a fixed sphere  
i.e. the point of view changes  
and management and concentration

so taking this sphere  
for example on the left side  
and simply bet on your event  
which you want to implement

there is an event in front of you  
took and placed the sphere  
the event begins to be realized

today is such a seminar  
what I got as a result of reading, well let's say  
lecture part of the material  
where do you work at the same time  
according to the task of universal Salvation according to its task

led to the fact that let's take this  
this sphere  
and we'll just apply it in this part  
i.e. I applied the time interval

and this time is the work of the Soul

i.e. if we start to analyze  
how does the Soul work  
then this is usually connected  
Well, mostly over time

this is how the load is born  
why is the Soul working intensively there  
or does it work easily in difficult times?  
these are the parameters for Perception

first of all at least on  
as I think most people do  
in certain true situations  
it has to do with time

also because the concept of "work"  
it's still some kind of duration

and now if we start  
to leave work  
to the point of action  
it turns out that time can generally be simply stopped  
at this point  
and work simply in a static, i.e. calm state

here at one point fix  
this could be a real point  
she is calm, she is not moving  
but it is known that she is good

She has only one characteristic  
this is a normal control point

you can look through it there  
apply the element of clairvoyance  
you can go to the cinema there through it  
or cure the disease there  
make management  
this is such a positive point  
means information of perception

we just found her  
that's how it happens there are geophysical zones and positive ones  
or some just nice place

here you are, we found this point in management  
and now the next management task  
is just to do it  
so that the light from this point  
it's not chaotic there  
in space in your and Perception  
I was running there  
but generally speaking it was just a light  
for further implementation of your task

i.e. we found the next level  
enhancing primary control if you need it  
which  
besides the fact that the sphere  
where we put the event  
already in control  
and this is the action of the Soul

action of the Soul  
because I give Salvation technologies  
and you are involved in this

plus I add here additionally  
another level of such calm management  
this control point is always there  
the main thing is to remember it  
as soon as you remember you find its place

so I came to the third  
fundamental level in today's seminar  
that remembering i.e. remembering where there is control  
this is and is found in this case  
exactly this point

i.e. the concept of "memory" is included in the concept of "goal"  
i.e. if we go into detail  
how do we set a goal anyway  
we remember the sequence of actions

and for example, if a person speaks  
what does he need to add, for example, clairvoyance  
well, direct vision of some event  
Well for example wants to watch a movie in a New York cinema  
being in Moscow yes  
let's say for example such a desire

at these pictures  
then why isn't man free  
even saving everyone if he has time there  
he can watch this movie or work

so at the same time he still saves  
if he uses the technology of universal salvation  
It is precisely in my Teaching about Salvation and harmonious development

then it turns out that by applying  
technologies of my Teaching on Salvation and harmonious development  
when he watches this same movie  
still saves the nuclear power plant  
anyway, he is there to manage the universal salvation

a problem arises  
how in this plot  
which appears there in the form of a movie yes  
next frame of the film

turn on for tie control for universal salvation  
i.e. the task is generally mechanical

yes let him watch  
but at this moment he must understand  
that he still saves

it turns out to be a load well as if in understanding the load or something  
region  
it still remains the same  
i.e. the intensity of Salvation does not decrease

and that's when we already start from this task  
or maybe they assigned it to each frame  
the task of universal Salvation  
the task of achieving personal goals

when you watch a movie  
then the pictures of clairvoyance open up clearly  
By the way, it's better visible than on the TV screen  
even the best ordinary one  
can be seen better than with physical vision  
if anyone wants to watch

so you can choose the best cinema  
the best movie ever  
and watch

but watch by pinning each frame  
these are precisely the tasks of implementation  
at the same time at the lower level  
it will be Spiritual , i.e. a frame, for example , of a film strip  
lower level physical frame  
this is the realization of the Spiritual plan  
the top one is the realization of the Soul by management  
on the realization of the Spirit

i.e. it is even possible at a mechanical level  
distribute specific parameters  
where is the Soul where is the Spirit  
highlighting the optics of the Soul and Spirit  
in a concrete material aspect

so that's when we move on  
from the material aspect  
to yourself  
then we can see the physical world  
It seems that the physical world is there

we took it and speculatively yes So let's say  
determined  
let this be this  
and this is this yes  
Spirit below Soul for example above

but I always say that it is speculative  
from the point of view that I am constantly completing tasks  
universal salvation  
knowledge transfer tasks

and if I diagnose an airplane or a nuclear power plant there  
I see it specifically and it really is so  
this is the status of Reality

so here is the translation into physical Reality  
it can be done both through the micro level  
i.e. to enter into the detail of the film  
take for example try to look  
what does it consist of  
and see  
that once you entered the molecular level  
there it seems we have worked here the structural state [...]

then you can enter there  
and get out here

and it turns out that the impulse can be Consciousness  
specifically for human recovery  
enter there into some leaf of the plant  
can be seen anywhere in the world  
with regenerative properties

why exactly like that  
because there must be a principle of free will  
i.e. to treat a person you need to go out to him  
from the point of view that he received this signal

for example, you definitely need to cure  
nuclear power plant operator or shift leader  
so that he presses exactly that switch  
and he may have never been to a hospital at all  
in general, the treatment is perceived  
Well, I'm against any treatment at all, yes  
Yes, he has such a Consciousness that he is against any treatment  
comes from the fact that well, maximally against such a task

how to enter a signal to such a person  
so that he, of his own free will,  
agreed to accept treatment  
for example the nuclear power plant was saved  
there millions of lives could be saved

and in such a way that we, as I have just shown,  
we can enter into one area  
and see where it receives the signal  
in information  
and the signal carries out its recovery process  
why for example does it not happen in principle

often to prevent a catastrophe from happening  
quite simply at the intercellular level  
introduce a small optical chip , as it were, all

due to the fact that it begins  
in one small place, as if the tissues were being pushed apart  
in another place the fabric begins to narrow  
normal mechanical effect  
but in optics it works very effectively

to relieve a stroke mentally  
You can even separate two cells on your little finger  
and large vessels can quickly contract

so it turns out it means  
to orient this person  
for that so that he moves all this  
create your own freedom  
you can't force him

this is what is special about the situation  
that even to save millions of people  
a man on whom the lives of millions of people depend  
millions of people  
in a specific place he is still absolutely free  
may do may not do for example

and we have no choice  
we must move from principle to complete freedom  
make him accept and do it  
i.e. so that he doesn't faint there, etc.

therefore this is the principle of exit  
as if from the other side

with unexpected there enter through the story base there  
or through some pleasant plot, a pleasant picture

this is such an element  
what is placed next to this person  
this plot  
and the plot is considered  
from the point of view of forecasting future events

this is the logical phase of Consciousness at the first level  
then Soul  
then the Spirit  
three-layer construction  
and precisely from the bottom up

and when the Spirit is already the Soul located in the middle  
like this kind of peculiar kind of "pie" in quotes  
it is such that through it, by directing a signal to it  
it is possible through the image of the Spirit  
here just output the task itself  
where to put the signal for this person  
which will save the nuclear power plant

and already the Spirit will, as it were, disperse the signal to the Soul  
and a specific design will mature in the Soul  
absolutely accurate  
right here in your own Soul  
absolutely exactly as you need to do it  
being here

i.e. what is the first question  
where to light up a signal near a physical body for example Yes  
in the area of the right hemisphere of the brain  
there at the back there on the side of the back of the head  
first level

the second element should be brought up 10 centimeters higher

the third element is brought into the Soul area  
take just a total of [...] geometric systems

and the fourth element  
bring this person down  
that's exactly how to sum it up  
the plot of the best movie of his childhood  
All

he accepts this plot, he likes it  
especially since he then begins to see  
that it is connected with the Salvation of all  
the vessel is compressed evenly  
he doesn't faint  
the toggle switch is released in time  
there is no nuclear explosion

By the way, this is a completely real situation of the forecast type  
which I explained

therefore in management up to  
full level of compliance  
Well as the Action of the Creator  
where everyone is absolutely free  
we have to find systems  
which allow a person  
receive the signal yourself

at the same time, we do not artificially impose a signal  
We are still behind the scenes  
that we are talking about saving the nuclear power plant

and he himself is located on the territory of the station itself  
he has in his soul from the Creator  
and the structure of Eternal life  
he is he in general Well, there should be this signal right away  
as if coming from the Soul  
combine with what is here

he understands that this needs to be done

i.e. we just show the way  
and that's why we choose this path, it goes by itself

and when we set the plot  
we just make it so there is quick access  
to this level of information

our task if there is one second left there  
to have time for this whole construction in a second  
do in one impulse  
and he must accept it and not fall there, for example

so it turns out that the management task  
is often super fast access  
which is based on a very detailed principle

well, the one I just talked about  
about some level of detail  
and very detailed technology  
establishing a management structure

and then of course that concept is needed  
which is called clear vision  
clear clairvoyance  
and not even any physical elements  
and precise clairvoyance in the field of control systems

and here well they worked well the same thing  
you can learn more over a long period of time  
to look through clairvoyance  
on some design as standard  
or you can even learn to watch movies

but in the dynamics of control  
for the Salvation of the whole World, especially  
where systems can change constantly  
and aggressive type systems  
which specifically change the controls

we need to figure out where the signal is coming from  
change of control  
and as if besides that  
the concept of "technology diffusion"  
and also the concept of "aggressive"  
it's quite unique  
in the sense that the task of the technologist who works  
exactly according to my system of Salvation and harmonious development  
according to my Teaching on Salvation and harmonious development

the task of such a student is to  
to teach the aggressive system  
that there is no point in this system  
for example, to behave like this

i.e. it turns out that educational work still needs to be carried out  
some kind of propaganda  
you have to manage to do all this in an array of information  
do some more work on training  
on the other hand, which does not understand but interferes

or it is due to a certain level of development there  
tries to pursue its interests, it would seem, locally

but when you look deeper  
then it is clear that any action is absolutely reasonable

i.e. the action is so-called "random" there  
this is an action if you dig deeper  
always based on some supporting structures  
generally speaking, counter vectors

i.e. you need to save the nuclear power plant  
the counter vector organizes a series of events  
which, well, for example, can hinder yes

so that there is no such obstacle  
This includes the technology of passage  
of this counter vector of the information level

after all, there were some prerequisites  
so that an explosion could be possible there yes  
or so that let's say a plane could possibly fall

therefore these prerequisites  
they are like [...] the level of light yes  
let's say even light perception  
There is always a level beyond  
i.e. until this wave of construction disbands

but it was somehow formed [...]  
Well, there are different theories there.  
the point is not even where it was often formed from  
in terms of well, there was some other situation  
may be disbanded to create a different situation  
there is no permanent management

and so it is necessary at all this level of management  
it's the same as if it were from the past [...]  
where there are a lot of levels of control there yes  
develops in different situations  
completely different control system

you need to be able to use all these systems  
how to tie it to yourself  
and still be in this state  
that constantly regenerate itself

i.e. not to get tired because that is the task of a person  
who studies according to my Teaching  
about Salvation and harmonious development

this is the achievement of Eternal creative development  
including in your physical body

therefore he must be able to  
still have to restore myself  
don't just concentrate  
in one direction or the other and then after <sup>that yes</sup>  
If possible, it is better to recover immediately

and a rather complex task arises  
relating <sup>in general</sup> to the task of management in essence

because if declaring is not even just declaring  
and I say that a person must develop forever  
and so soon subconsciously  
then it really should be like this

we can't say, <sup>for example</sup>, "yes, that would be desirable  
Now, <sup>for example</sup>, people will learn  
and then later we, <sup>for example</sup> Well, I'm exaggerating of course  
we move on to the fact that some element  
we will study the technologies of Eternal development"

but if we don't do this implementation now  
then that would be a <sup>completely</sup> different question

That's the whole point, that every element of the Teaching  
directly connected to each other

and we can't here  
<sup>for example</sup>, to separate something, to downplay something  
each <sup>generally speaking</sup> has an equivalent level of management  
as well as preventing a possible global catastrophe  
this is one of the tasks  
but it should neither be exaggerated nor underestimated

this is generally the level of information from the Creator  
each element of information is equal

so that's when we do management  
try now  
precisely in <sup>fact in general</sup>, the task of universal Salvation  
try to do it this way now  
so that your management is very clearly demonstrated  
precisely in a technological version

i.e. make a sample consisting of three spheres

so the first sphere is right in front of you  
this is the sphere of your Consciousness, for example, whatever is more  
convenient for you  
there must be a sphere of the Soul  
and the sphere must be the realization of the Spirit

so here is the realized Consciousness  
this is control over the spread of the Soul and Spirit  
the realized Spirit is a generalized factor  
i.e., generally speaking, this is a realized Spirit  
may have its own implementation coordinates

i.e. the Spirit is free, he can  
if we talk in terms of life, yes, in terms of implementation, so to speak  
i.e. the Spirit is always realized, including it is realized  
Well as if in a design that is in everyday Consciousness  
or there at a certain level of Consciousness  
refers to the level of , well , so-called matter  
there we assume direct there are no stones there

and here is the implementation at a live level  
it is in the collective Consciousness that this is what spiritualizes  
what makes life truly Infinite level  
and at the same level comes from the Spirit  
the final element of the physical world  
and that's why it's exactly  
from the point of view of today's technology

that's why when we talk about Spiritual realization  
we must understand here  
that we are talking about a more general process  
rather than implementation there only for the purpose of management

The spirit can be realized  
there is a goal being fulfilled  
but the associations about the goal are different  
or it is inner freedom  
or well, because the issue was resolved , yes

the element arose at some point  
which at least means now  
and there is no need to do this

then it turns out that the principle of this  
well, what about inner freedom?  
he is also a state, there is also a realization  
but as if the Spirit in himself

here's the goal of management  
the issue was resolved, well, it was resolved  
it's good there yes for you let him decide

but the Spirit works as an absolutely living system  
where is his connection with the Creator  
it is also a contact  
often this is generally speaking a constant contact with the Creator

therefore it turns out that the system of realization of the Spirit  
this is a more general system  
as well as of course the Infinite system  
this is a system of realization of the Soul  
Soul [...] The infinite system is absolutely  
i.e. in any system the Infinite property of the Soul  
the manifestation of the Soul is

Thus, we have identified three areas  
the most, well, sort of familiar in this regard  
level of logical logical phase of Consciousness

and when you take these spheres  
set yourself  
try to do the following control

Here in front of you are the three spheres I named  
closest to you is best  
the sphere of Consciousness, for example, with a radius of 15 centimeters

then the sphere of Spirit  
such a silvery white color  
they can all be approximately the same color

the logical phase of Consciousness can be  
more with a golden hue

further on there is the third level of the sphere  
this means the sphere of the Soul

try to stabilize  
i.e. to see stabilized  
so that they do not intersect if possible  
and if possible, as stable as possible  
on the same level

then start approaching

to solve your problem

according to my Teaching on Salvation and harmonious development  
when I perceived this point of control  
it is already included there  
action towards universal Salvation

and therefore highlight your task spheres to u  
well just a sphere  
and start to spend inside means

as if by the diameters of these spheres  
first through the logical phase of Consciousness  
and the realization of Consciousness  
implementation

then the realization of the Spirit

and then the sphere of distribution of the Soul

start conducting  
from one to the second to the third system  
i.e. almost as if mechanically  
from one sphere  
in the second in the third  
and at the exit you should get a solution to the problem

Now you start practicing  
I will work with you

this is work with your questions  
and also work, including with the task of universal Salvation  
within these spheres

First, work on your own particular task

then, as if, well, to strengthen the conceptual tasks  
carry out the task of universal salvation  
the same exact same sphere  
the same segment as yours  
your private task

and solve this problem further

start working  
I will work with you

work quickly if possible

try to make a comparison while working  
what to work on a private task  
practically the same  
that according to the task of universal Salvation

i.e. there must be a universal system  
because you are just on everything  
draw one small sphere  
inside the big spheres

they are simply informed in this way  
as I just said  
because they are brought to this harmonization

so we got our task  
you should see the solution clearly  
that the sphere that came out was small  
it is no longer that sphere, which means it is a solution  
transformed

next level universal salvation  
the exact same thought is indistinguishable  
you just know that it relates  
with universal salvation  
that's all

started to conduct turned allocated  
freed up a little space yes  
well, some kind of order  
your first sphere lies there  
you take the second sphere  
here they are two identical

in the first level your task is solved  
in the second, the task of universal Salvation

look, balance the light  
color from small sphere  
first and second  
and from the second to the first  
it's the same

i.e. get to the point where they are not different

brought them together  
everything went into a strong glow  
here are these three spheres

a very strong glow appeared which stands

and any action you take will work  
private  
this is an act of universal salvation

when are you by the way  
through the light of this knowledge  
come to yourself  
you see that this is really so  
that it is absolutely clear

if you translate the point of view there  
and look from the connected spheres  
then it is clear that you  
this is the Creator's Action for universal Salvation  
it becomes absolutely clear  
light and clarity

and when you achieve this  
you have a very strong control mechanism  
associated with the direct control method

i.e. now it is enough to just carry out the thought  
as if on an inclined plane <sup>yes</sup>  
up to this point where these spheres merged and everything

and at this point adjust the controls  
i.e. set tasks for restoration there  
information transfer tasks  
and work exactly at this point

plus it's a stable position  
where you have already worked everywhere <sup>well there</sup> [...] method  
and you have an external information system  
in this case it does not bother you

i.e. absolutely rigid  
optical absolute system  
By the way, it is more stable  
than there are billion-year-old mountains <sup>for example</sup>  
on physical Reality  
because this system cannot be changed  
this is your own design

so that's the advantage of having your own design  
that own design

cannot be changed by external

therefore what a person does in Thinking  
this is the rigidity of such a property  
that she is generally close  
to the absolute system of the world order in general

and you can use this moment in this way  
in order to know for sure  
that you will always achieve control

for example I said yes there is a counter vector  
for example, the case of the rescue of the nuclear power station there  
but the counter vector is only for the sake of it  
one static information

it is enough to do the second action  
and counter vector [...]

why is it often the task of saving everyone  
they often restructure the signal very simply  
Firstly, there is the strongest resistance from everyone  
i.e. the vectoriality of all  
is aimed at combating this problem  
high

and secondly, if we develop such an element of vision  
then this is the vector that can resist  
some kind of destruction  
he is static  
you took it and recorded it  
Well, you saw it in your Perception  
It's better not to record at all

i.e. the first sign of control  
immediately control so that this does not happen  
immediately the first impulse

but if it is fixed  
i.e. they started to figure it out  
why was such a design created at all?  
where did it come from

then that's enough  
reference point of the counter vector  
just bring a small element of light  
and he's all

it's worth him changing his position  
the whole structure will collapse  
how to hold it from glass if it's on one point  
large glass structure

or you can also call it sandy  
Well, sand is a more stable system there

and here it turns out that the light is a counter-vector  
very flexible restructuring

pay attention to what it means  
these are the so-called counter systems  
who organize  
well some event systems  
about them  
in fact it is very unstable  
because they are rigidly fixed

you can think, well, there, at Infinite speed  
and bypass Infinite Speed  
one static system  
it is logically clear that this is possible, generally speaking, elementary  
the main thing is which side to approach

This can be said to be all there is, yes  
there is a table, for example  
and there is a mechanism moving at speed  
above the speed of light yes  
mechanisms Infinite set

the question is  
and how to overcome this area  
turn out to be well let's say in that place  
somewhere around there, five kilometers  
or ten, as many as you like, it can be every one meter, yes  
at a point faster than a chair that is moving there  
maybe it can be placed on some kind of cart on a roller

of course you can  
i.e. this is approximately the same level of task  
another question is the main thing is not to hit the table itself

if we develop technologies  
means to bring to the level of vision  
where is this table anyway What

then it turns out that you just need to go around the table and that's it even [...]

the following question arises  
so as not to go into detail and not to ask questions  
this is how developed this technology is  
that you must definitely see the table  
and how can one see at all?  
Well, there can be different types

so the following problem arises here  
be in the next place instantly  
regardless of the number of tables of technologies of this precise type yes  
i.e. these are generalized technologies further

next level seminar  
instant access technologies  
which are not built on the principle of detailing  
as I have just shown  
and taking into account sometimes very complex structures

and is built on the principle of instant achievement  
at the right point

so here is the technology of Soul distribution  
in the area of the meaning of the realization of the Spirit and the realization of  
Consciousness  
is built on the fact that Consciousness is simply nothing  
the point of Consciousness is precisely the sphere of Consciousness  
is immediately thrown out or appears there  
at the point of the task  
but a little further away

i.e. you know internally  
what you should choose a little further  
so at the existing level of tasks

after all, the task may be external  
for example, you are driving in some area  
where is it possible to clean up the ecological situation there  
make her normal  
but this may not be your task  
You didn't come there, you organized it yourself , actually  
therefore, all the more [...]

i.e. external task

and therefore the problem arises  
still make instant control often  
then there is a task background or some kind of glow  
thrown a little further away

and as soon as there is contact  
the solution occurs as this type of electrical discharge  
so here is the solution  
must be contained in the distribution of the Soul

i.e. the method of dissemination of the Soul  
consists in the fact that  
that of realized Consciousness  
already in the task for example Rescue  
The soul spreads

i.e. this distribution refers to the mechanism of action  
as if some kind of ray of the plane of the Soul  
and what exactly does the beam look like?  
and here is what is flat in nature  
extends to the level of the task itself  
and the Spirit  
Making the Spirit Spiritual  
i.e. the Spirit already works as a principle of spiritualization

transfers [...] knowledge into the structure itself  
knowledge of the Norm  
as if irradiates actually makes the learning process

and you have to do it like this  
There is one subtlety in this technology  
that the Spirit must teach this design faster  
than the almost instantaneous impulse of the Soul  
will reach the system of this level of tasks

to cleanse the ecological system  
i.e. to restore the oxygen level there  
it turns out that it needs to be done this way  
so that the impulse of the Soul comes back to Normal

that's when you start thinking about it  
you see how your own Soul is organized

i.e. you see how the space of Thinking is arranged there  
where do you think this matter how it is arranged

here you can see it

where we first set a single-line problem  
what is behind the area of the geometric area  
This task must be accomplished  
we need to restore the oxygen level in some city

here it is, a specific mechanical action  
shown by finger

throw in the level of Consciousness  
just a step further  
corresponding tasks of Consciousness  
and from this step comes the action of the Soul  
and the realization of the Spirit should be like this  
that by this time, *generally speaking*, Norma should be here

i.e. super fast impulse of the Soul  
must come to that  
that the Spirit has already corrected the situation

and that's when you start working  
on implementation  
*for example, this well, structural level*  
I draw attention to the fact that if you implement, *for example,*  
*well, to prevent a nuclear explosion*  
in a nuclear reactor

then this mechanism is often there  
there is only one possible  
with super fast reactions  
faster than the speed of thinking even  
than the speed of observation

because in the collective Consciousness there are such principles  
the speed of observation of some physical  
or microprocess

and then further into the collective Consciousness  
there is no concept of "speed"  
you need to be able to act faster  
than the existing system of collective Consciousness  
i.e. to build up

and this principle is built on that  
that you are simultaneously growing your system  
i.e. you make a design  
which grows your own Thinking  
to the area you need

and then you work under control, too  
with the system of your Thinking  
if you want it

i.e. as soon as you enter the control system  
for what is where you think  
you also create a space of Thinking  
simultaneously

then it turns out  
when you reach this point of Consciousness  
then you just see yourself in reality <sup>yes</sup>  
in a calm state

you're just calm  
and everything around strives for a favorable level of implementation

this is where I got to that  
is the normalized system of the physical body connected  
control towards Norma  
behind physical and spiritual processes

and at the same time the technology is implemented  
in the form of a specific design  
which is in this form  
allows, by the way, to slow down the nuclear reaction

if <sup>we assume</sup> the speed of propagation of the Soul  
in the middle of this segment  
here is the structure of Consciousness  
it is the Spirit who decided the question

if you take and distribute decide to fix  
then at this moment the atomic reaction can be stopped

if you do it inside a nuclear reactor

you only have to stop one element  
<sup>Well,</sup> there are reactor implementations there  
is it possible to make a nuclear bomb not explode

that's why this is, by the way, a very specific tool  
to prevent a nuclear bomb explosion

to launch them somewhere  
can you use this element

so that it doesn't explode even if it falls down

so here is the mechanism  
it is precisely the control mechanism of this system  
consists in the fact that  
that when you work for the system  
for example, your level of Spirit, Soul and Consciousness  
then you should see here  
what are actually irresistible systems  
do not exist in Reality

because when you start from this point of view  
then you see that it all depends on [...]

First of all, of course, well, there is no doubt  
we must always do something to prevent global destruction  
at least

but when you achieve this  
then it turns out that your personal level of management  
this is the definition of the amount of your Consciousness  
and is an action

so you have some volume there, for example [...] sphere ball  
and we say that "this is a sphere  
"Kunolovoe is an event of the whole world"

then solving a regular school problem  
for example, in terms of consumption, let's assume this volume  
through one area yes  
well, through some hole there  
where does the volume start to flow out from there  
let's assume it's some kind of steam and gas of light

then we look  
and what is the task?  
what is needed as well let's say a school problem statement  
make your personal influence  
was close to one

then it turns out that you control all processes  
the entire management level

then this volume is kurnulevoy  
it still starts to leak  
from a small hole [...]  
he well how to flow out mechanically I said "flow out"

in fact, the event begins to uncontrollably  
to be realized  
and then this volume is still [...] well there  
steam still needs to be caught, etc.

i.e. it turns out  
that the task of managing all events in the World  
is that you are in this technology

first we have to do this task  
so that the system doesn't crash  
at least record it

you fixed it  
and how else to enter it yes  
we recorded it from the outside

so here is the level of fixation in this case  
according to this technology, the topic is defined  
that when you put this system  
well, for example, how is a biomechanical system built , say  
human cellular levels he is like this  
that the cells do not intersect  
they don't fall on each other for some reason

if we are on  
it is clear that there is a concept of "physics" there  
and some processes associated with atoms, molecules, etc.

but if we abstract from the concept of "atoms" and "molecules"  
why don't the cells stick together there ?

here if you go deeper  
then you can see that between the cells  
there is an element of the space of Thinking  
It happens that a person often thinks at the intercellular level

and when, for example, he thinks from the outside  
he builds his cells  
i.e. he thinks not only there outside the physical body  
he thinks inside the physical body

and often, well, especially among athletes  
a lot of some decisions  
the body is perceived as a thought  
solid concentrated thought

i.e. the difference between body and thought  
in this case, the athlete has a generally clear  
middle

often helping athletes to first think through  
then do it organically

so that's when we  
well, not only athletes by the way  
when we talk about action  
due to the mechanisms of his Thinking  
then here is the transition to the inner sphere  
this is just a transition  
where we do not touch these areas

we took all the events of the world  
inside this sphere they put  
Thinking, by the way  
and to go inside  
It turns out that there is a very simple mechanism here

somewhere near the border of this sphere  
concentrate Consciousness point of Consciousness  
well how to organize some kind of platform

but by chance how did we [...] so that the sphere wouldn't burst  
right next to  
just look at your physical body  
from there

as soon as you look  
you will find yourself inside  
because the physical body is also inside

so here is the access mechanism  
only the physical body with this technology

because the Spirit in this case  
Well For example as if yes [...] the outer boundary of the sphere  
for example, this is just how it is

I say "for example" because I'm trying to separate  
i.e. don't concentrate too much  
well, so that Perception doesn't get tired

then I can say further  
that each element of this pair

this is an action through the Soul

and here is the logic  
logic is in touch with Reality  
namely the physical body

i.e. you think where you take into account  
acceptor logic system  
this is your body  
you can see your fingers  
see yourself and perceive

but when you see  
there and when do you perceive  
also Soul  
Spirit  
Consciousness  
this sphere is instantly transferred to you  
and you generally need to work in this way  
so that you actually have  
this structure is intact  
and you look when you can there  
talk somewhere do something

i.e. you always have to be able to work  
in the space of Thinking  
even if there are distractions  
i.e. there are some walks going on there  
you can ride in transport and even talk there  
but this structure needs to be held tightly  
i.e. you must be able to work virtually constantly

and therefore it turns out that if, for example,  
you do the management as if  
Well, in some conditional moments yes  
then when you return to this control  
it should be in the same place

we must take into account that even here is an internal line  
which is constantly in control  
for example at one point  
not necessarily [...] millimeters there is a distance there  
to the sphere

but we must understand that nothing is stopping this area  
you really did think of part of it yes  
some kind of design

It's better to return to it when you want  
now there and in a year or whenever it is convenient for you

the important thing is that no one can take it away  
it's a mechanical principle

everything happens inside the Soul  
All

and so it turns out that when you work  
I said there is such an option that inside the Soul  
that you work simultaneously in this technology  
with creation  
as a supporting structure  
i.e. where do you think in the space of Thinking  
and where the action takes place

so you found yourself inside  
are you here at the same time yes  
i.e. inside you see that in this way inside here

so that's when the realization comes  
what well there you are inside and of the same height yes  
log in to this system you are there

it's not like there's some kind of compressed element there  
like in some kind of ball  
inside you are the same  
if you go inside it's you again  
Consciousness

and here is where you come from yourself  
again to that self which is in all the events of the World  
then you go through this wall  
without breaking its sphere walls

this sphere is already there around  
at the same time here yes  
i.e. we created a space of Thinking  
where do they exist  
all external Reality  
and the created Reality  
and they are indistinguishable

so this is how when you implement  
desire on this principle  
there is health restoration, for example

then it is possible inside the sphere  
restore such a brake  
and only when health is restored  
if you get for example there physical level yes  
you reveal here

watch Infinite Stream from top to bottom  
per person  
which also does not violate the boundaries of the sphere

because how can he break it  
all events of the world  
logic works very well here  
it folds the beam element  
no matter how it goes up  
all the same, all the events of the World are inside the sphere  
he starts to roll them up [...] beam

and it turns out that we do not cross borders  
we work simultaneously in the Infinite system

therefore this is the nodal level  
which allowed us to set the tasks in this way  
this is just a level of modeling  
i.e. logical level

i.e. it turns out on a logical level  
compress into one point  
distribute correctly in space  
we can immediately change to Reality

you just don't need to cut it into everything  
among themselves  
And  
external space  
in this case

as soon as I said  
the word immediately appeared stopped at you  
that you went directly to management

that's why when, for example, such management takes place  
then here it is enough to correlate it with the task  
what is clear is that the task is internal, it is clear  
A person doesn't need a nuclear power plant to explode

here, generally speaking, there is no need to set a goal  
just a fragment going on  
so you're somewhere eating, for example, there's a train, there's a plane,  
and watch the scenery  
suddenly some environmental problem arises  
you are just on the whole right side here is displayed  
there is a glow on the right here

as soon as some task is problematic  
it's just that the optics start to move as if

some kind of thing starts to click off, well, in quotes of course  
there is some kind of toggle switch there  
by the way, at that connection level you can't hear anything at all

and from here the light begins to come  
which simply normalizes the situation for everyone  
because you have this Norm laid down by the Creator  
you don't even need to concentrate on this

and therefore, since it is precisely that Norma  
that you should be healthy  
must be there in some ecological environment  
be  
there we assume an object  
on some polluting properties of the environment

it turns out that if you act in exactly this way  
then this level is a transition to the level from the Creator  
in fact, that's exactly the level of who you are  
it is a transition of reagent type of implementation

you are going somewhere, you are realizing yourself  
you are precisely in the implementation of the event structure

so that's when i say  
we want today's seminar to highlight it  
Spirit  
Soul  
and Consciousness  
and showed the realization of Spirit and Consciousness

then in this aspect of the implementation of the event plan  
where your action is also implementation  
by essence and connection to there world levels of connections  
you are still connected at the information level  
with all [...]

also for personal purposes  
it comes down to the fact that it is from the Creator  
the main thing here is just about everything  
see how the transition actually happened

as soon as it happened  
you have received colossal colossal knowledge  
what the Creator shows  
as soon as I go through it now  
on the Creator's line  
there is absolutely clear technology there  
which I just mentioned

the same elements  
everything is absolutely clear what to do first  
at least write it down to the millisecond

which control to display first  
for example, I [...] for a long time  
a certain design  
a specific element

but generally speaking they just exist  
because here I explained why they exist  
everything is always from the Creator  
especially when the task is to save everyone

and when will you decide  
their own tasks  
try in this particular design  
on the task of saving all  
do it this way  
to have your own events implemented  
you have learned to implement more and more

You are doing better and better  
your event  
through the system of universal Salvation  
try to make them overexposed  
so that everyone can see  
not just so that they would just implement it so well

and here is the transmission mechanism  
that is why, according to my Teaching on Salvation and harmonious  
development  
we must act like the Creator

because this is the exact path that does not need

For example on Well let's assume in some  
here are associative analysis systems

First of all, the Creator created everything  
secondly, acting this way is correct for logic  
because the Creator created those who created all  
of course it shows  
and His Action is already correct  
it already exists

here is an element that His actions are correct  
this shows that we are pragmatists  
we act as the Creator acts  
because we see it and we are in it  
as if a state inside a sphere

thus translating means your events  
in this goal of action from the Creator  
precisely to act as the Creator

there is a stream of glow [...] and acting  
applying or there old tasks inside  
you can solve it with just a stream of light  
exactly the one I just talked about

the light comes from you  
act as the Creator  
and you act like this  
and we can simply deduce our tasks  
any for example want to learn clairvoyance  
they just put thought in control there  
for the salvation of all

want to solve personal problems  
i.e. the solution is simply a light flux  
so linear [...] planar  
like a plane

and it was you who highlighted the planes  
as if by light of the photon level  
acting as the Creator does  
put

the issue is starting to be resolved for another reason  
that at the level of the Spirit and just explanations

The spirit acts freely  
and he immediately adopts the knowledge  
a person solves your problems  
being at the same time both with you and on [...]

this is the Spiritual level of solving your questions  
on [...]

and for the methodological system  
taken in this case  
level of distribution of the Soul  
just spreading

i.e. this is, in general, a level that speaks of that  
what is there if we take the action of the Soul  
this should already be structuring

and the distribution is generally minimal  
i.e. the minimal action of the Soul  
universal Salvation can be achieved

it's like Well there let's say an incomparably small part  
the main system of what the Soul is capable of at all

and it turns out that knowing this, realizing this  
it is possible to realize resources of the Soul in this way  
that you can always find a level  
and self-healing from this property  
and the level of recovery of all others  
and the level of mandatory Salvation of all

because well adding several times  
adding forward in time  
this is action  
you can see what's really going on  
resource is not only Infinite  
it's also increasing

because each of your personal experiences  
it's always an improvement in position  
skill is always better

each next level  
it should always be an improvement

another question is what if you decide  
are very big, colossal questions there

in front of you  
then you have to for some time  
with some information to rewind  
so much work appears [...]

so you came to this seminar  
to existence  
proving not just the existence  
but also in a certain form [...]  
given the three levels of implementation  
because this control system  
can be implemented at least in that  
to solve your problems  
you have definitely achieved universal Salvation

and also in general in order for you to receive  
it turns out that the system, generally speaking Well like this type  
what should you have here  
the principle of personal action as a principle of development  
so what does the principle of development mean ?  
external elements of Reality

then just here  
If possible, try to do it here  
Let's practice right away

so that the external elements of Reality  
they can also be controlled  
from what you do your management

i.e. from the fact that  
This training consists of  
that the external elements of Reality  
they control what you implement

the light of your control as a transfer of knowledge  
moves to another element  
and they are controlled in a way that is favorable to them  
side  
and for you

here as a certain level  
today's knowledge  
management consists of  
what else do you do  
your own management  
you can still do this task

also do the same and generally speaking external control  
any external element of Reality

so work right now when i say  
so that all external elements, for example, according to the objectives of the hall  
in the state we are in now  
the issue is being resolved  
and see how the light of the solution is transmitted  
back to you  
from what another has mastered and passed on to you even more [...]

because if another person has mastered  
this light  
he looked at the technology  
Of course he will pass it on in an enhanced version

look where this amplification occurs here  
what element exactly characterizes  
as a reinforcing element

and in connection with this  
try to make the management like this  
to filter this gain

i.e. why exactly amplification  
where is the source of amplification

logically clear  
technology transferred for example to solve the problem  
realized to a certain extent  
or is it definitely implemented there?

and when a person achieves control there  
then he still seems to be growing there  
a certain delta related to that  
that he realized at the time  
in general, quite effective  
some earlier systems

moreover at the human level  
there may be a connection  
with all the other people who are somewhere too  
in general with all elements in Reality

so you come again  
to all elements of Reality  
the light is coming at you again

and in connection with this you get  
in general Well, I think practically  
next level and this type  
that already from an external event  
you get action  
how to act from the Creator

i.e. you get this element of action  
and of this kind  
what is this light  
act act as the Creator  
knowledge already comes from any external element

because now I said it in relation to you  
and the light coming from you is action  
act as the Creator

when you pass on the light of learning  
and it comes to you intensely  
this already comes from the external environment

I'm specifically repeating that, for example , there is a lot of waste there  
some postulating elements  
while adding one or two additional words there

so that's when i add the next word  
element in the constitutional version  
he doesn't change  
he is moving towards that in the form of management  
that as I said this is an instant access system  
why is it often necessary to add in the phraseological system  
for example some thought  
to achieve instant action

variety of actions  
or some kind of correction of actions  
this is also instantaneous

that's why God develops multifactorially  
so many worlds for example yes external  
many different directions of development

because it is  
the principle of instantaneous achievement of action  
from the Creator this principle it means  
that the Creator created a diverse World

to achieve your goal instantly

This is, in general, a logical transition  
what i just said  
although for example it is also easy to know

and when you get to that  
so the implementation has been achieved , well , in what time frame, yes  
your action by creating something  
there is also the path of the Creator

and that's why I actually came here now  
at the logical level  
i.e. I don't , well , in this case  
I didn't use any special systems  
I didn't use any charts there  
even formulas of their information [...]

although at the same time I knew it  
i.e. it turns out that knowledge and intelligence are not compatible  
in terms of information transfer

here is according to my Teaching on Salvation and harmonious development  
I'm just showing you  
especially in the Predictive Management section  
where is the knowledge that comes from the future  
and the controlled cause of knowledge  
i.e. knowledge of how to make the future  
more optimally controlled

how can this system be  
translate into a structure that is basically like this  
that some knowledge is imposed  
at the current moment in time  
and we get this design  
what is the next development like  
Firstly, it is controllable.  
and secondly, it is also like this  
because according to the Creator's tasks  
it should be like this in this place

so to make it better yes  
there is a principle of prayer  
there to turn to the Creator now

and there is to act as the Creator  
well, it's a kind of prayer in action, so to speak, yes

this is also the direct work of the Creator  
i.e. the actions are not necessarily <sup>physical</sup>  
mentally you mentally if you work  
work in the control system  
where thought is one of the control systems

and at the same time the light of this event  
linearly coming at you  
and you get a very rigid already fixed  
the event you need

because you, <sup>for example</sup>, are in the section of my Teaching  
about Salvation and harmonious development  
Predictive management  
you did it because you work, generally speaking  
in this system it is precisely in predictive management

then it turns out that if you work there  
<sup>for example</sup> in another section of the Teaching  
just take the areas [...] section of the Teachings  
Healthcare

then you can see what works here  
control complex  
while in the forecast this is the same action  
can be done by simply impulse  
reverse phase pulse  
there is already a normal impulse there

so it turns out that if you remind  
about the section of my Teaching  
about Salvation and harmonious development  
then the section itself is simply formed  
boundary control systems  
which <sup>is</sup> convenient for someone to work in this system  
to someone else <sup>yes</sup>  
maybe it's easier for a person to work in the healthcare system  
all the more familiar [...]

and here is the unification of these systems  
at the level of action as the Creator  
then we get with such a combination  
the general level of such a concept  
that having educated the Spirit of man  
on any system generally speaking

The spirit becomes universal  
capable of acting in any direction  
and act already at the expense of your light

i.e. the Spirit acting as the Creator  
because he has that level  
that it can be in any state generally speaking  
even of such a Spiritual level  
the condition can often be different

so the next system  
put your event in front of you  
it is at this level of the Spirit

where is the light of the Spirit  
and your mind  
and generally speaking you can see how others help you  
is there too  
decides your level of goal

i.e. you realize the goal in the Spiritual light

should immediately receive a subtle development in essence  
and the specific one is very  
so thin very intelligent so let's say  
your inner workings system

only you want to see  
where do you work, well, maximally intellectually  
the concept of "intelligence" is worth  
there let's assume such a solution to some issues

then you can see that it is in this place  
where the Spirit acting decides the question

for projection onto Consciousness  
this looks like high intelligence

and then you can go again  
from the point of view of well let's say it this way [...]  
she works  
switched to the structure of the physical body

looked inside  
saw that the Soul is organizing  
body  
By the way, it is very clearly visible here

The soul constantly organizes the body

and many questions  
because when we ask ourselves the question  
how do people get sick anyway

because he behaves somehow  
many questions are generally solved by intellect  
the glow of the intellectual phase here  
and how  
when you see how the body is organized  
you see how they organize  
and the external event immediately  
organically with the development of the body

then here you can find [...]  
which allows you to simply focus your attention on it  
in the logical phase  
and have all the time  
restorative principle of operation of work  
i.e. now I'm telling you  
you work

and are there mechanisms for continuous improvement ?  
Well let's say the state of the physical body  
moment of this

just if you use them  
just put the question like that  
Often people even know how to do it, but they don't have time  
they think that we will do it  
some number of times  
and then everything is still fine there now

At some point they start to take care of their health, well ,  
This especially applies to rescuers  
they often don't think about themselves

but if we assume it anyway  
proceed from the fundamental task  
my Teaching on Salvation and Harmonious Development  
Man must still recreate himself

and such action is of course better on time [...]  
That's why [...]

This action allows self-healing

just by the fact that you kind of feel it , kind of see it  
this stream coming to you  
but at the same time you can work calmly

i.e. from the intellectual phase  
manifestations of the Spirit actually [...] Souls  
and the light of the Soul already illuminates your next actions

and when the light of the Soul illuminates  
you often act very quickly  
not burdensome because the Soul is the one who creates you  
logical [...]

your Soul creates  
of course if the Soul illuminates  
you are at any point you are already generated  
in general, with my own Soul

and at the same time you don't even specifically use technology  
i.e. it is enough to spread your Soul

thus spreading the light of the Soul  
into the structure  
where is the logical phase of Consciousness  
realized in Spirit  
there is already a third crossing there  
allows you to work, well, let's say, in a good way  
physical health level  
at a good level of events  
seeming to do it on purpose

it's just enough to come to it from this side

Thus  
you set this control in front of you  
my task now  
first of all, its task

then the hall sphere now  
who is here here is the sphere  
those who don't know the video recording will read the recording  
in the form of lecture material  
where later on, while still making the author's edition [...]

and then on to all levels  
universal system  
and even those who are at the moment

doesn't read the materials there  
but how they should also be saved  
i.e. [...] all the information

and make this control  
through this principle  
the principle of intellectual realization of the Spiritual phase  
already next [...]

try to do as I say  
The spiritual phase is realized  
and you have

lecture management do it quickly  
i.e. do it quickly anyway

that's when they did it

This concludes today's seminar.

thank you for your attention
