

GRIGORY GRABOVOY
The Doctrine of the Spirit
22.08.2003

Hello again
the topic of today's seminar is my Teaching on the Spirit

and if we consider the comparison
for example with other sections of the Teaching
that is the structure of my Teaching about the Spirit
First of all, it considers
simultaneous action
this is the Spirit of the Creator of the One God
and also the Spirit of man

i.e. the level of their primarily combined action
because in the concept of the Spirit
firstly, there is no such clear division
it is impossible to carry out instantly at the level of Consciousness

and therefore the first level of my Teaching about the Spirit
first of all it implies
it is the consideration of processes
joint action
Spirit of the Creator
and the Spirit of man

at the same time the Spirit of the Creator is also
and the Spirit of the Physical Body of the One God

in this case when i say
about the Physical Body of the One God
I consider His Spirit
are not expressed in humans
in the form of, for example, hearing processes
of vision
olfactory
well, touch, etc.
all these well as if the processes are largely sensory in nature
they are united in the concept of the Physical Body of the One God
who thinks for example yes with your Soul

that's if we start to consider
Thinking process
and we also want to perceive some sensation, for example

as if we were in the place where it is located
Well there at a distance of 100 kilometers
touch the ice there yes with the fingers of the right hand
such a task

that is a task closer to God
like His Physical Body
in this case it reacts
He begins to think with his Soul
and it turns out that for Him the difference is in touch
here and there does not exist
so He can be both here and there

and by the way this is a very powerful mechanism
how practically well like teleportation there
transfer to the organ
which one well there somehow destroyed there in any place

this is a specific technology
i.e. it turns out as soon as we consider
action of the Spirit
we get technology

and here is the Physical Body of the One God
acts as a canon
and that canon where the Soul is the area of Thinking
The physical body of the One God

and moreover it means
His Soul is in this area
and at the same time, as if at the same time, this area is created

so when we want to understand
Well for example, how is the process of Thinking different
different from that
what if we say we think it over or we think yes

and the word "think" well there suppose d y "du"
this is a word that also means the first two letters
from the word Soul
in a person

and when we start to analyze
well, connection
words yes
thoughts
and actions

it turns out that the area of the Spirit of God and man
is in the physical body
embodied as an action of the Soul

is such a space in life
where the action of the Soul is the physical body

and when we come to this action
then we get that the whole well as if the surrounding world
becomes spiritual because
that our physical body for example
is present in this place

and when we start for example
Well how to spread your influence
into the area of some specific management

i.e. we need to implement
For example there is a cure
or event management
then it turns out
that the Action of the Physical Body of the One God
and the action of the Spirit of man
it's the same thing in this place

Please note that I
the area, for example, of the Physical Body of the One God, yes
and the realm of the Spirit of man
it means he didn't divide it strictly on purpose

i.e. if you listen again now
Well, this section is from the initial lecture.
I didn't introduce such obvious concepts of divisions here

Moreover, I showed it with words
just the trajectory of the Soul's movement
uniting the Spirit of God and the Spirit of man

in fact I showed this by the action of the Soul
but at the same time I said in words

i.e. the word is expressed in the action of the Soul
and when we consider, for example,
this process
then we see that well there is a spiritual word yes
this word carries for example there is the Light of God
there is a prayer or appeal to God for healing

for the actions of inner prayer yes
individual prayer

so it turns out that this is an inseparable connection with God
where is God giving
The Spirit of God the Giver
united well For example there
with the Spirit of a man asking
and therefore acting towards God
he asks God if he, for example , turns to God

it turns out that the Physical Body of the One God
pay attention here back
here I used the wave principle somewhere
or what about information transfer ?

approaching the Physical Body of the One God
at the level of the Spirit
leads to spiritualization
where the subject of spiritualization
or final or intermediate level of action
is some object of information

For example there is a man for God
For a person, this is what the person does himself, yes
what is he doing with his hands
or there let's say he's thinking about something

here I am just starting to introduce the first divisions
the difference between man and God
in this case, at the level of spiritual knowledge
and in my Teaching about the Spirit in that

what well for example I say this
Let's look at the Teachings of Grigori Grabovoi
about the Spirit

then here if I say
Let's look at the Teachings of Grigori Grabovoi
about the Soul for example
well, I would say in words Yes, I separate the concepts of Spirit and Soul

speaking about what, for example , I took there Well, that's a concept
which exist yes
brought them out there in the optical range
and he said that for example the optics of the Soul are such and such
and she is a Spirit, for example it has those characteristics, for example

there is more mobility

or the Soul is more stationary and glows

For example there in bright blue

when you look at Infinity there

and the Spirit if you look at Infinity with the Spirit
it glows pink

i.e. these are completely obvious and universal
for all characteristics

and when i want to share

Spirit of God

and the Spirit of man

then first of all I have to make a division

in relation to what can I divide

and so I made the first division

this is division in action

in action where the product of human activity

is his intellectual or physical labor

or any other ^{yes} but person

but a product of God's activity

may be a person

and when you consider

this is the concept of "maybe" ^{yes}

i.e. it ^{could} be a tree , a plant, etc.

then we come for the first time

For example there to the submolecular level

the concept of "can" is well as if some kind of chaotic spectrum

there is no molecular movement of gas there

or broader aspects there if we take the Universe

then the visible laws are known there at the optical level

but more distant Laws

if we look at it from a distance

comparable , for example, to the distances between stars there

as if in the optical range

then the movements there may be similar to Brownian ones

well, that is, completely chaotic movements often

and when you consider

that macrobodies by their movements

coincide ^{there} with microbodies

in terms of Perception, ^{as if} Macroperception
you see that God created a system and a completely unambiguous one
in the context of seemingly completely chaotic processes

this system somehow ^{yes}
from the point of view ^{of} logical perception
is in equilibrium

Well , I'm not speaking in physical language.
and from the point of view of human perception
it is balanced
there is space there are some movements of matter
which we perceive as stable

then it turns out that gravity, ^{for example, Yes}
shaping human movement on Earth
this is the unification point
The spirit of man
and God
but outside the material level of the Earth

i.e. the united Spirit

Well let's assume there is the stratosphere if you take it
at a distance of 500 kilometers
it's more than the stratosphere

take a point and look from there
then we see
that gravity is generated in this place
in this place are united
The spirit of man and God

and when you consider this

Well let's assume we'll look at some processes there
how are the rings of the different planets ^{and} the surrounding ones
in general, the distant levels of the Solar System
That Well take Saturn's ring ^{for example}
or consider some ^{elements} of a planetary type
near Jupiter ^{for example}

then it turns out that on some planets
we observe that there is a visualization of the outer contour
in material terms

and if we, ^{for example,} want to understand

Well there how can you use this knowledge
because for now I am only to a greater extent

I observe Reality

but the management is that
that the use of this is that
what when you want to cure a person
then it is enough to just consider
and where is the Spirit of God near the human body ?
Means Well let's say it doesn't touch properly
with a person
where it is not united with it yes

And I'm not talking about the aura
and no, well, about some kind of energy fields
we are talking about the specifically expressed optics of the Spirit
what builds a man

and here in the likeness of the rings of Saturn
i.e. if you make the control of this type that
so that some piece of matter doesn't fly off from Saturn
towards the Earth
enough to influence mentally
on his ring outer ring
and then Saturn will definitely be safe for example there are Earths

this is how this connection is found
in interaction volume
where the Spirit turns into physical matter
it turns into physical matter

here is my section and my structure of the Doctrine of the Spirit
she's next for that reason alone
that the element of transformation is quite fast
and in general it often happens that instantaneous processes
we see how rigidly material

if we consider
let's assume there is a table there
then the table
this is also an instantaneous process for God

i.e. God at every moment
everything is created virtually anew

and that's why it turns out
that for Him this process is instantaneous
and we see it as stationary

i.e. it turns out that you just have to go out
to the level of God's organization

for example, there you can watch with the Physical Body and with your own eyes
then we get strictly material processes

therefore when we want to say
and how then to create your own body ^{yes}
on a spiritual basis

then it turns out that the opposite principle exists here
just look from the area
where the Spirit of God and the Spirit of man are united
then the inverse structure is created
i.e. the physical body of a person

therefore the first element
creation of the human physical body
in the realm of the Spirit
is the area of unification
The Spirit of God and the Spirit of man

by this I mean the One God
having a Single Physical Body

because we can consider the issue
as God the Creator of ^{all} things
but consider
what does the level of Perception through Consciousness ^{mean}
then we get
what ^{does it mean} Human consciousness can generalize

i.e. a person perceives on a Spiritual basis
many elements
in Spirit all elements can be united

if in Consciousness you perceive
^{Well for example} each element as private

it turns out that on the Spiritual level
you can perceive all the elements
by one Spiritual message ^{as if} from the outside World

and indeed the Spiritual state
approximately equivalent
in relation to
to all objects of Reality
in a moment of calm truth

but when you start reacting to something
The spirit ^{begins} to have some ^{kind} of fluctuations in movement
goes to an emotional level ^{yes}
and here you begin to feel the body for the first time

i.e. if you are at rest
then the body ^{does} not interact with the dense
^{it means} precisely on the dense, as it were, area of Perception

and you start to feel the body
when the Spirit ^{seems} to shine through the body from within
but already your Soul

i.e. the body begins to be created at this moment
where you look

therefore the physical body
this is the action of the Soul
in the field of development

those. ^{like} a projection of the Soul
through the Spiritual system of knowledge and aspiration
to the outside world

and then you know very clearly how it works
i.e. each organ begins to be an organ
as autonomous
and also an organ emanating from one point

i.e. all nodal systems
are tied to the Soul on the Eternal structure

and in this case I showed you
mechanism for creating the human physical body
through the action of the Spirit
for the development of this World
^{well,} that is, in the same way as God the One Creator acts

and when I started saying this I started with that
that I looked at the process after all
how does a person perceive God

that he can perceive Him as the Creator
but not necessarily only in the One ^{and} Physical Body

and in connection with this we get the following

what the Spirit allows

Well how to extrapolate Perception

i.e. to give God different meanings

as in a Single Physical Body

so God is omnipresent

but a person does not necessarily see it

there there as a specific person

but for man to see God

as a specific person

he should, on the contrary, pull himself together and see God
through the eyes of God himself

for this he can consider

Well let's say such an element as the eyes of God yes

what are the physical eyes of God for man

Well, first of all, it's the same thing

because the Physical Body of God is identical

just to the ordinary physical body of a person

Well, it just can in this regard

ideologically more perfect

in terms of how it would be more humane, yes

the Creator himself must have the maximum level

Well as if some kind of reference level

and therefore it turns out that this is the concept of "standard"

this is what you see and perceive, among other things

and with the eyes of the physical body

but you want it to be given optimal properties

I'm now switching to a more complex system again

because now I'm again well as if I were passing on more knowledge

through the comparative system

those. suppose the word light

gives the following knowledge yes

and when you see the situation for example in this way

that this is the reference system

i.e. the system of views, the system of Thinking , as it were

the system of which you perceive as

well what would you like to do

here is the subject of view

Well, let's look at the garden there

you need to water the flowers there, do you think so?

then you took it
as by sight
so is the action from the Soul
you looked with your eyes first

and here is the connection
actions of sight and Soul
sight and Spirit
or Soul and Spirit
gives birth to human activity
conditioned by the fact that God
this is exactly how this activity is assigned
for His own development

and so that a person, for example, does not make a mistake
Well I didn't get sick there For example Yes
and realized his management his goal
then God gives him a construction of the vision of Himself
and already through the eyes of a man

and I already bring to the fact that human eyes
who see the Physical Body of the One God
they are built on a Spiritual foundation

i.e. you can see with the Spirit
The Physical Body of the One God

and it turns out that here when you look with the Spirit
then your eyes see at any distance the same way
as if you were looking with your physical eyes

Now I told you
about the most powerful principle of controlled clairvoyance
managing clairvoyance managed by you
i.e. you are in control
with its optical system, i.e. yes Perception
and this is the same and controlled clairvoyance

that's why it turns out
that when you act for example on a Spiritual basis
but through the tissue system
you do almost the same thing
how does the Physical Body of the One God

you are also organizing the physical body

and at the same moment you control the Spirit
at a distance of Infinite systems

for the Spirit there is no concept of "spreading" there often
there is no concept of even "development"
The spirit at one point is already an Infinite system

if you with your vision with your mind's vision
look at your Spirit
you immediately see Infinity

therefore Eternal life
here from the point of view of my Teaching about the Spirit
it is to consider your Spirit first of all yes

elementary action
just look at your Spirit
you will see the mechanism of Eternity

and when you look at your Spirit for example
in front of you
i.e. here it is in front of you
Well for example, I took a look there and into this area of the Spirit

then I see that at the level of Spiritual Administration
there is a very powerful contact there
with external systems any objective yes
i.e. they become more mobile
more there as if controlled
but besides man
a person in Spirit always remains the same

and when we want to see well there
the line of Spirit and man
how developed is he there, is he disposed towards you
By the way, the system of Spiritual diagnostics is very simple
luminous direct beam
this is so there is a positive and good understanding

if you perceive the beam as scanning
this means the person wants to understand yes

so that he understands, just record it
and you say basically the same thing

i.e. when you work
you have mastered the technique of Spiritual Management

Well, you can talk . there let's say not very many
but the effect will be comparable
because you work with technology very quickly
namely interactions on a Spiritual basis

and this, by the way, is a colossal level of knowledge transfer
that's according to my Teaching
just these Spiritual lines are enough
they are perfectly even by the way
and practically do not move in space

it's like a connection between
as a connection between one person and another

and when you, well , in this kind of big world, don't want to get lost
wherever you are in some galaxy
in the perspective of human development
then it is enough to simply turn it on
this is the Spiritual Lantern
and immediately a person very close will be visible
which can be located at any great distance
i.e. the Spirit allows one to get closer to a person
just as in Reality as God is here

so it turns out that the image of a person
for Spiritual vision
it is God who is here
that is, led by God yes
Spirit is usually a level
which is led personally by God

and when you start to consider
such a concept as the Soul
then the Soul is a Macrosystem
from the point of view of the Spiritual level
which originally exists
while the Spirit
after all, it is a derivative system from the Soul

and it turns out that the Spirit and the Soul are what unite
in terms of, for example, the human physical body
and the Physical Body of God
Spirit suppose God
The spirit of man
Soul of God
and the Soul of man
this is if we look at the process in more detail here

then it turns out that well as if to take
two reflective screens
between them there For example let the light evolve
and it gradually seems to be reflected
from one level for example to another
but at some point
the light should go out there in principle yes
then this is according to the laws of physics

but the Spirit does not go out, it is a light that does not go out

and one can consider the Spirit as a derivative
i.e. God created for contact with man
at the same time this contact is like this
what happens
that God created Spirit as an external Reality

Well for example, there is the Holy Spirit, which means at the same time
he is this one for example there is the Holy Spirit
or there is the Spirit of man
i.e. as if at the same time
an object external to a person
is his purely internal and individual

Here these characteristics of the Spirit are very interesting
even the optics of the Spirit
i.e. it is perceived
how often completely independent of man
segment as if an external level

if the Soul is as if densely located yes
inside the physical body
and in principle is well as if to say so
hard level of the physical body

then the Spirit is more like air
in relation to the physical body
in human action
in relation to God

and that's why when we say that a person is spiritual
it means he is close to God
God created this air
Yes, God created the Spirit as well

but the Spirit reflected from man
this is his personal Spirit

i.e. I want to find it here together with you
when you look and now you hear
that the Spirit who touched the man
he is looking for an entrance to it

i.e. there is Spiritual knowledge
if a person allows this Spiritual knowledge to reach him
then he gets that love
which is knowledge about the Love of God means

and that God loves
God loves everything
but when he gives Love
specifically yours and specifically to you
then this is your path

i.e. when you see that the Spirit of God is seeking entry into you
then this is the first level of Eternal life
the same as God

i.e. there is a fundamental difference here
for example, you can ask a question
that man is very technologically there
there I learned to restore myself completely
at the expense of Consciousness, as it were, to control Reality

but until a person is here he will not be identical
in terms of absolute identity
just like God
i.e. created in the Spirit of God
then he still won't be there
for example, I am guaranteed to be sure of that
well , he can live there for example Yes
are more than a billion years there
but for example a billion years plus a second
this is what will happen to a person next

and to answer this question
that he will also live on
to ensure that man is Eternal
and it really is so
because we know all the systems of the world
and we know how God does it

then here exists
only close contact with God

where God is allowed
not only in the Soul of a person
through his Spirit and physical body
but man also understands
how to create and recreate your Spirit

and when you look at it like that
I used a phrase like "allowed"
and because God gives complete freedom

a person has the right to admit Him
through for example Spirit yes
maybe through the physical body
through there Soul

and so that a person does not get sick
he just needs to let God through all systems

and when for example God is allowed
by the will of man
then the person becomes indistinguishable in action
from the Action of God

and this is the difference in action
leads to that
that the physical body of a person becomes identical
to the Physical Body of the One God
in the plan of Eternal development in action

I use the word "in action" all the time
because a person's action can be targeted

at that moment as the difference of God
that God always acts simultaneously in everything

and so that a person, for example, was brought closer
to this Divine level
that's exactly what I always set the task of saving everyone
there is prevention there well so first of all yes
there for example, a global possible catastrophe

when you do it
at a spiritual level, so to speak
carry out this action

then this effect still has an effect
already a comprehensive level of management

because the Spirit is
at a fairly close level of knowledge

i.e. the knowledge of the Spirit is logical yes
here's if you look

for example, how does he think well there is a man's right leg
here is a man walking forward
is it possible to ask a question
and why did she step here with her right foot?
based on the level that each element
has its own phase of implementation in the World

then it turns out that it's the right leg
thinks at the level of the Spirit of man
and at such a level
where the Spirit touches
with the Spirit well For example there is soil and earth there
or there if it's a soil path there
or asphalt etc. if it is asphalt

i.e. after all, in ancient times
there were quite a lot of plots used there
in legends there are interactions with spirits
contact interaction systems

why for example Spiritual level
it would seem so Spirit
this is not a material system
nevertheless contacts with an incomprehensible environment
They always say that there are spirits there

i.e. generally accepted in the collective Consciousness
that the Spirit is a more manifest contact system
Well as if with incomprehensible quantities
where there is a junction of different knowledge systems

it turns out that the Spirit is, as it were, on the edge
some permanent potentially very powerful knowledge

and this is the level of knowledge
this is where God is very detailed and in detail
teaches a person

i.e. It is originally there at the birth of a person
teaches
like him for example develop your own cell there
after there is the first level of conception

how can he take his first breath ^{there}
immediately after birth ^{there, etc.}

and when you follow this moment
then Spiritual training
i.e. how God taught a specific person
first levels of action ^{yes}

then the principle of free will is that
that a person is still in intrauterine development
he has the right
in different ways ^{for example Well how to} get nutrition
i.e. regulate the process independently

he is already free from the start anyway
although it would seem that it is still there
at the intrauterine level

Moreover, it even has the ability to regulate
their activities
and ^{how to} somehow direct the mother's movements ^{there,} regulate them
^{as if} the level of the external World, etc.

and at the same time
from the point of view of equality ^{of all objects of information}
from this postulate
it turns out that a person from the moment of conception
has the same amount of freedom
although it is in the intrauterine world ^{and in the form}
"in the form of" from the point of view of external observation
i.e. he himself is an ordinary person, but he looks like this

and it turns out that here, ^{it means,} there must exist
mechanisms
which would lead to the fact that
that there is a very physically developed person ^{there}
very smart
or ^{someone} with more knowledge
or a child
or just a person who was conceived ^{there, yes}
they must have the same control outputs
external Reality

so these are the exits
they are based on construction
^{as if} the next Reality
primarily its cellular system

your level well like the closest one, let's say, to myself, yes

"to yourself" means at the level that here

who are we then

who am i

for example, if you ask a person a question

then the concept of "to oneself" is in this case

in my Teaching about the Spirit

looks like the maximum concentration of the Spirit

for example there in the person's personality yes

including in the physical body

because a person can find himself

not only there in the physical body

Well there in his creativity in his work

it turns out when a person is

in intrauterine development

then the task there is survival

the task of developing its future events

this is his creative contribution there

it turns out that there is maximum freedom

it's in personal realization

i.e. a person can sit or realize himself in a cave

or there in any other form in society

and it turns out that here he really feels freedom

from their Spiritual manifestations

what he perceives as Spiritual knowledge

so if we go further, then before birth

man also has this freedom

before conception

The spirit is an infinite quantity.

if she has Infinite Access

almost any system can be used

a child in the womb

he is often more free

than when he starts walking

someone starts to restrict him there

because it is his natural environment

and he likes it

and it turns out that this is an earlier environment
The Infinite Property of the Spirit
shows
that there is a single source in the Spirit
where a person is practically on his ^{own}
Well as if on a collective Perception
inseparable from God
and he sees himself as an individual quantity, as it were
well already in the area of the Soul of God
where the Spirit of God is born

and here such a powerful glow appears
and you can see
The Physical Body of the One God
with my own eyes
you just have to enter this very point

as soon as you saw
The Physical Body of the One God
you understand right away
how to develop your Spirit according to God's ^{command}
according to its goals and objectives

It's not like he's telling you to do it.
there must be something there
or somehow implement something within the framework of a strict program

the task is quite simple
everyone should have
Well there is equal maximum development free etc. ^{yes}
not to be destroyed

therefore here the principle of the task is connected with that
where is the Spirit ^{for example yes} man
takes on tasks for himself
i.e. where he sets tasks and how he implements them
For example there is the task of universal salvation

It is clear that a person needs this
well as a logical postulate ^{yes}
and if we proceed from that
what if this is not a logical postulate
where is this knowledge located
which ^{are not} formed as knowledge of the mission

i.e. the person is initially ready for this

and goes
and therefore this knowledge is precisely the mission
what is known as if before logical knowledge yes
mission is spiritual too environment is spiritual system

and therefore it turns out that this knowledge
this is the Spirit that originally came into contact with God
but at that moment when man sent him to God

and when you have this knowledge from this point of Reality
do you have
you see all Reality exactly like this
how is it organized in essence
in essence, the Spiritual Organization

i.e. all these stars of the galaxy, etc.
and often this situation is like this
that you understand that well, absolutely , everything is manageable
then the person becomes well as if at that moment
lonely
i.e. he understands that well, how it works here
an element of the effect of the loneliness of the Spirit

The Spirit is all-controlling and all-encompassing
in this case it turns into
into the physical body of a person
which already controls the whole Reality

here is the element of transformation that occurs then
when you clearly saw it as if
that the system is not just somehow amenable to control, yes
there to influence some star on the plant
all this is clearly evident

namely when you first saw
that the action of the Spirit is limitless
and comes from your physical body

i.e. transformation
that is, the transition of the Spirit into the physical body
this is your comprehension
controllability of external Reality

i.e. the Spirit can pass
into the physical body it turns out

I showed it by the way
a very specific path of transition

and when you realize this
do you understand how it works
The Physical Body of the One God

then you can understand
as the Physical Body of the One God
like the eyes of the Physical eyes of the One God
see people

or understand that firstly
it is completely indistinguishable from your Perception
i.e. you also absolutely see

therefore any knowledge as well as optical
it can be transmitted due to optics or vision
for example Spiritual vision

The spirit can perceive immediately
and see the Truth at once

therefore Spiritual transmission can be instantaneous
and at the same time absolutely accessible to everyone
regardless of languages, education systems, etc.

He is a spirit at any level.
where he is united with the Spirit of God
it is the same for everyone

i.e. here are the differences in Spiritual knowledge
People don't have it anymore

for Spiritual knowledge
truly Spiritual close to God
it always does not destroy
it is always aimed at good goals

they do not clearly share these positions
there according to the social national environment there, etc.

it follows that the Physical Body of the One God
which well there came into the physical world of man
in order to save humanity
it must first of all be very understandable
i.e. not to differ from a person in the Spiritual plane

but a person has different systems of perception
different spiritual levels yes

it turns out to act the same way as it acts
The Physical Body of the One God
you need to be able to
within the framework of different systemic levels of different people
to be united on a spiritual level
in terms of that, after all
so that people can unite and act together
regardless of private interests

well at least together in that
so that it doesn't happen
global destruction of civilization and the World

and it turns out that in order for this effect to occur
was absolutely clear and unambiguous
and at the same time you would be able to highlight this, well, technologically

i.e. for example a living person
in a completely different social environment
having completely different principles there
in terms of everyday issues, yes

and the person who well for example, he wants to
that the one I said about as the first
could save just as effectively
there civilization as he for example learned another
what do you need for this then?

then by analogy with the Physical Body of the One God
you just need to come to this person
and be able to interact yes
at the level
different systemic, as it were, social parameters

that's how it works here
that interaction is on a Spiritual basis
this can often be the case
the only way of interaction as such

i.e. Spiritual unity
because if the languages are different there
it turns out that it is easier to communicate spiritually
than languages

and this communication is often more complete
than there is a language environment

and then it turns out that they exist
absolutely clear elements absolutely unambiguous

i.e. although the Spirit is a system of Perception
Endless and often moving
not having
some local location
in the elements of Perception
in action in a specific for example Macrosalvation

although in Macrosalvation to a greater extent
The spirit has a very stable position.

then here it turns out
what are absolutely rigid elements
which allow to clearly convey
knowledge regardless of the language environment
regardless of social environment
and these elements are arranged as
simply elements of the human physical body

so, for example, to transfer knowledge instantly
at for example Infinite distance yes
you don't know where the person is
it's enough just by an effort of will there
how to mentally illuminate on a Spiritual basis
right hand

i.e. to transmit knowledge from the whole right hand
and that includes the forearm, elbow and shoulder

and when you move on the first element
the second one is almost instantaneous
including shoulder
i.e. the entire right hand that transmits Spiritual knowledge
just do a practical element
show your right hand
and pass from the right hand to the left
the knowledge you want

i.e. you don't have to think or imagine anything
it's easy enough to count

that's the glow of the right hand

this is a transmission
there in the left hand of the knowledge that you want to convey

Well let's assume you have
individual control system
I am also passing it on to you
and individual ones, as if not even in words, yes
and you can pass on some knowledge to each other
it's easiest to transfer by uniting
Well, there are even systems for shaking hands, but people have them

and it turns out that it's a handshake
this is Spiritual
although this would seem to be an acceptable everyday action
and no matter how often attention is paid to it as a Spiritual

but they shake hands with a spiritual disposition
If it is not located, then they do not shake hands
again yes the Spiritual aspect intervenes
as if into a social type of behavior

and it turns out that knowledge can be transferred
As I said, you can go to the Infinite System

if the system for example Well as if such
that the person is near you and you see him
that's enough well as if to imagine in one's mind
that you just took it on there as if with the palms of the hands

i.e. the right hand
as if mentally there hugs the palm of the left hand
and at the same time your knowledge grows before you
the ones you would like to have there for example Saved the World
so that they harmonize events

well, some level close to the level there for example nirvana
but in conversation
Well, there is such a thing as a "heart-to-heart talk" yes

and when you look at it like a heartfelt conversation
has , for example, the property of Spirituality
then you see that this is the contact of your hands

i.e. with the palm of your right hand
touch for example yes to the palm of the left hand
and at the same time

Well let's assume there is such a gesture
when the palms touch there
and man raises them to the sky
in terms of turning to God, for example

he often does it intuitively, yes
but this is a Spiritual action

and when we look at
True, it has already been forced a bit
without means well, some details there
look at the details carefully yourself

how to make a person
Well, I had direct constant contact with God.
on a spiritual basis

due to the fact that he can
to be physically completely free
i.e. it can move in different ways

so here the key point is that
that the Physical Body of the One God
which is completely free
and at the same time there are no parameters limiting it
in principle there is not even space and time
this Body is located as if inside Itself

i.e. His Body and all external events
which He created
God
it's still a closed area
from the point of view of human logic

so here is the human consciousness
this is what the Spirit perceives
from the point of view of the Spirit
Human consciousness
this is what the Spirit perceives as a closed system
i.e. Consciousness, as it were, artificially introduces it
into a closed system
and it turns out to be Consciousness itself

i.e. the principle
primary action
gets itself
from its action practically

i.e. God who created Reality
He created for others as if in an autonomous system
Myself
i.e. He created the entire absolute Reality
and at the same time He is, as it were, individual
for others
as a general
as well as individual

and this is, by the way, a very powerful healing mechanism
which can remove any virus from the body
simply due to this point of view

if you look at it this way
viruses are immediately visible and separated
from the healthy part of a person
and this is Norma

i.e. Norm within the system
inside God
inside a person
it is not located somewhere outside

this is evident on a spiritual basis
what is there Love
as a normalizing level of striving for God
also for example Soul
developing towards Love and God

because the development of the Soul is only possible
towards Love and God
and in all other systems it is more structured
it practically does not develop

initially she is always alone, as it were, yes
and that means the Spirit just allows it
combine
developing Soul, i.e. movement towards God
namely, for example, in the physical body of a person
and the tasks of God are the tasks of man

because as i said
I am now talking about the area of unification
level of the Spirit of the One God
having moreover a Single Physical Body
and the area turns out to be human

and when you look here
Here is ^{an example of} today's lecture course
as a course, well , as a seminar training
you had an action well For example there work with the right hand yes

then you take a closer look at the interaction
^{for example, their organs there let's assume} the system
and you will see that all seemingly autonomous systems
that you have in your body
they fit quite clearly
here in this, well , practically the system of my Teaching about the Spirit

where the Spirit organizes, ^{as it were,} the final organs
i.e. it organizes the movement of blood ^{there}
is movement ^{there for example} hearts
translating them
to the Infinite Region
dense and ^{seemingly} continuous contact with God
And one and the same

i.e. it turns out that ^{as if Well} optically it looks like this
that the closure of light inward
at the level of the Spirit
causes the glow to occur
to the level of practically ^{the} Macrosystem

and every level
it turns out he sees God and interacts with God

i.e. ^{as a mechanism for transmitting information}
as from your, ^{as it were,} internal level of concentration
i.e. you unite on a Spiritual basis
The spirit is a self-sufficient system
he is in the image of the Physical Body of God
in the likeness of the Physical Body of God
it starts ^{to close inward}
thereby creating and transmitting knowledge ^{yes}
to yourself about your Reality

and in many ways it recreates
and controls the external Reality
due to this

what does this glow ^{mean} of the Spirit
methodologically expressed in that
what is he at the same time

and unites and opens at the same time
gives a very powerful control system

and at the same time this control system is such
that you can manage in this way ^{well} quite simply
it's enough to just take
some external information object
what do you want to get
there to heal or make control
translate

as if inside the physical body
where the Spirit is located
i.e. not the physical body itself
and where is the physical body where the Spirit is

and then at the same time
this control object to see outside
where God is

then you will get absolutely precise control
which in ^{fact} can be so stable
that this will already be the Reality that does not need to be changed

i.e. in the World everything will turn out like this
as if it should be like that
originally from God

although you are getting it
in Spiritual contact with God this was achieved

so when you achieve
at the level of contact with God
those. on actually Spiritual ^{yes}
at the highest spiritual level
then often events seem completely natural to you
and that you achieved it like this
well , it seems like it should be like that
and that the World was like this from the beginning

in fact you are at this moment
changed virtually all the information
in the World
changed all connections

therefore the Spirit
Spiritual Management
This is the most natural system of control

for human realization

when information

about , for example, some negative phenomena

it simply disappears from the structure of the World

and then it is not even recorded there

i.e. at the next diagnostics

it may not exist there

but by the way this is the most powerful principle of healing

and normal harmonious management of events

straightaway

which includes, among other things, the prevention of global catastrophes,
etc.

so I think that this is something that needs to be taken into account especially
here

here in my Teaching about the Spirit

to consider precisely this fundamental question

that the management is completely comparable

with that level

how God does it in action

This concludes today's seminar.

thank you for your attention
