

GRIGORY GRABOVOY
The Teaching about God
Precision in the action of universal Salvation
05.11.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Precision in the action of universal Salvation

in this topic i show
how is this concept
"universal Salvation" "Macroaction"
make the concept precisely manageable

i.e. if we consider
at the level of for example there is an Infinite System of the Future for example Yes
or some Macroinformation
such a concept as "universal Salvation" "Salvation of all"
for Human Perception
that is exactly what his personal action consists of
in this information
that's basically what I'm talking about now
the topic of today's lecture

so when will i be now
give this control
try through the structure of Macrosalvation
constantly manage your situations
practically at a continuous level it turns out yes
in continuous mode, so to speak

because any control
it goes through Macrosalvation
through universal Salvation
and Salvation of each individual

so here we need to do it like this
to the accuracy of Thinking according to Macrosalvation
it means that it is the precision of action in this management
all the time at a certain level
Souls
Spirit
Human consciousness

led to that
that a person still acts, including
and according to its particular task

and here is where the task lies
namely the unification of action and control
its task is to achieve a good positive solution
in such a way that control occurs
generally speaking, almost continuously

in this case the problem can be solved
then you move on to the next task, etc.

that's why we need to work it out here
opportunity to work
in the control system almost constantly
for example, I give a lecture for 50 minutes
so you need to solve one problem after another for 50 minutes
in continuous mode so to speak

therefore, in this topic we need to consider the following situation
what if we approach the level logically
where there is precision of action
or locality so to speak actions yes
in the Macrosalvation system

then here it turns out
what exactly are the technologies of Eternal Life
Eternal Development Technologies
they set a task of systematicity before a person

i.e. in any case
a person must, for example, receive and definitely receive
Macro Salvation level
he must live forever in any case, etc.

that's why it turns out
that we come to the level
well, some kind of peculiar ones , as if sometimes felt as barriers, yes
some fixed static actions
when here is the concept of "in any case"
here for future development
There are always some options yes
solutions to some problem

and that's when we talk
that there must still be problems

from the point of view of Macrosalvation
resolved in any case
then we get a system of future development
has only one clear direction of development

i.e. since every person
must be able to save everyone
then at the system level and always in reality
he must do it for sure
therefore he has no other option for future events

and the future is multi-component
and that is why the task of this management
is that remote
and at the same time close to a person
in this case to the human body
to the physical body of a person
control systems
are actually connected into a single ball

i.e. if you look
Well, making such a comparison is a bit schematic
of course it's quite schematic
that there is an octopus moving somewhere in the water
then it turns out that the concentration
for example, you can see the tentacles and so on.
but there is a center of concentration
there is life well where is the concentration of life
and the tentacles are basically a consequence yes

and if you look at an octopus in the water column
it still works out
that a God-created entity, yes, an animal, so to speak
life is created by God, it is like this
that after all there are different communication systems
are brought together in one center yes
some kind of natural constant

we will try now and do it
deduce by analogy
that the multicomponent system of future events
is reduced to one structure of precisely Eternal life
Eternal development

To do this you just need to do this

so that everyone could do this and right away
that's how this topic is set
the task and implementation of this management
everyone who perceives this topic
they should do it right away
be able to

i.e. their soul must open up so much
that for them the future is absolutely certain

future forever they have technology
Eternal development of Eternal life
and at the same time well for example if well let's say someone already has
Well, some situations happen to people, yes.
some biological problems
let's assume there was a death of a person

then it turns out like this
reverse transformation
for example, that's where the resurrection technology is
based on the fact that there are a lot of systems
Well, temporary ones arise here
here's a look at all the generations
then it turns out to be exactly the resurrection, here is the process itself
this is an exit, well, just into the ordinary life of people

then from the point of view of logic here is the process
resurrection system
For example there is a system of universal resurrection
this is the standard of living
Well as if coming from the level where it exists again
only one option for a future event yes
there will be a general resurrection

therefore at a private level
i.e. there is a single resurrection
comes to this level
and in general then a question of this order arises
and how to provide work yes
social systems of these people

so the more of these processes
the more favorable the better the work
for all categories of earthly professions, so to speak
for all management categories

it turns out that something

one central action
leads to an overall improvement

on the contrary, the concept is as follows
that a person should not die, etc.
i.e. oncoming traffic is also definitely the same
one person does not die all do not die

i.e. here is the One God who has
Eternal life and Eternal development
He lives at such a systemic level.
that these issues have been resolved at the level of His Consciousness

i.e. He has the technology of Eternal development
because He understands correctly, among other things
a system of unambiguity of future processes

and this is where it comes in
the following principle of this management

that any future process
For example yes Infinitely distant
even for your Consciousness
it is always a process that happens
at a very deep level of the Soul

and such a deep one at that
which is often the Consciousness of a person, for example
is not immediately perceived
how is the level well as if or what manifested yes
these are very distant event systems

and that's when we start to move towards this
then it is clear that distant systems of events
are always static for a person

i.e. it turns out that a person may not die
because he future events are very distant
always has a very deep Soul status
and the Soul is Infinite
The Spirit gives Eternal development
therefore man has a definite future

i.e. by and large
if you compare it with how God develops
how does god work
He is Eternal

and His future is very specific
He still has it
Eternal development
Eternal life

and it turns out that based on this
person by similar component
has , as it were, an internal Mind of the Soul
i.e. he has such a level of development
when you know that in any combination of events
there is some kind of a system there
well which looks like some kind of wall yes
for a certain category of people

that such a system, as it were, of some kind of unambiguity
that some unambiguous action is taking place
following
generally speaking it does not exist for all people

here is the principle
a person is born
and the next life happens
and every person has
next level events
so here it is
a person can think and set for himself
another level of events yes

so that's the action
it was definitely unambiguous
and spread to all
need to be taken into account
what's next The thinking of the following people
this may also be the case
and comparable to your Thinking

i.e. at the same time
you stretch all people into the future yes
and at the same time do it yourself

so here is the action for precise control
through Macrosalvation
this action is necessarily conditioned
as a deep, i.e. profound state of the Soul
and so what you understand

that the Eternal God gives you precisely Eternal life
and in the physical body

and you understand
what exactly is this technology
this is the solution to the problems
there are all people of all professions

i.e. you have an integrated opinion
which carries quite a specific
enlightened information related to that
what is the future
maybe it's not quite remotely appropriate

maybe for someone if it is distant
but nevertheless it exists
i.e. the future is absolutely clear
contains precisely the fact of Macrosalvation

i.e. everyone is saved there, everyone has Eternal development
for this it turns out that
so that this systemic level can be overcome
in the current Reality
we must work out
some personal component personal constant
which would solve our problems
under any combination of events

this is where the next aspect arises
the combination of events must be any
and yet a person must still possess
technologies of Eternal life Eternal development

then it turns out that there is, for example, a concept
some planets of distant galaxies
if we consider some probability value, for example
development of humanity
then it turns out that some kind of comet is possible
logically simple
which could, let's assume, somehow touch the Earth, yes

so a person should already have the ability
and generally speaking people actually have
this ability can be called so
in fact, a necessary quality
for Infinite Development

that it is already possible to collapse this information
as a sign that it will not come true
i.e. there is no such comet
and that's largely why they don't appear
near the Earth

and this is again one of the levels of systematicity, etc.
in fact, you can find a lot of such levels
the main thing is that the person is
in calm, stable management
begins to see
where is this differentiation anyway?
what is personal to him
Macrosalvation

as I said
The macro-saving level has
precisely by certain properties and characteristics
which I have just named

the obligatory surmountability of some situation
necessarily means first of all the factor of immortality
i.e. a person should not die ^{yes}
under no circumstances, etc., etc.

and when do you start
this management structure should be developed
exactly ^{well as if} in the Infinite level of development
then you start to see that here arise
specific technologies that are related
generally speaking with your physical body as well

i.e. to do
precise control through Macrosave
precisely to ensure that everyone is saved
immediately by your single action
needed in Makrozvena i.e. in Macroinformation
in this optics of Macrocontrol
select the structure that corresponds
to solve all the issues after all

that's how you get through the structure of undying ^{yes let's say}
you solve problems favorably for everyone ^{there}
or find jobs there
ensure endless development

provide an additional resource for the development of the Earth
there are places for any number of residents, etc.
then you see that the structure of Eternal development
it is still a personal perception
yours personally

for example for healing

Well, generally speaking, any disease in essence
it is necessary to know exactly
that the future is bright and always achievable

i.e. the future that you want to accomplish

For example there is human health there yes
this future is always achievable

so just to be sure
that you have this information
you can just be sure yes For example
and do nothing

and by the way, this can happen
that a person reaches the management level
and makes the management structure mandatory

i.e. inner peace gives him guarantees
he is in a stable control phase
he is in control
he is recovering or is not sick at all
or heals someone

but man always thinks like that
what if there is someone who doesn't know this technology
if he is not sure about something yes
if he has a certain level of feeling
if there is some kind of distant comet looming on the horizon again
then how should he be saved?

if for example it is not only a sign of confidence
but in general this is just a model solution
the person is worried
for example, he must urgently make a decision
how then should he be saved
in this case yes, systematically and necessarily

then a level arises
after all, again, self-knowledge first of all

but then we need to understand how God knows Himself

i.e. this is where we come in
just to a very unique point
in this control technology in this lecture
what we need here is definitely
see the mechanism of self-knowledge
how does God know himself

this is how God knows himself
well, unlike each individual person
what He sees how He is perceived
level of Collective Consciousness
i.e. all people

here is the Perception of all people
integrated ^{yes} in His Thinking
gives how one should perceive oneself
individual person

all requests ^{and} all thoughts that go to God
they practically ^{mean} that
what a person begins to see
the same designs
which God then sees

then he starts to analyze in general
and ask this question
how does He perceive Himself at all
God

when he starts to see it
here are the first rigid structures
absolutely happy future ^{there for example} Yes

i.e. at any age
So it ^{means that} a person can recover ^{there,} get healthy, etc. , yes
i.e. the element of precisely undying
element of Eternal development
begins to be a manifested system

i.e. for him the level
^{let's assume} well some future event
it's the same simple level
how to get to some familiar road and walk along it

i.e. the level that you already know it
but after all
not in terms of perception
that you were in this place and you kind of remember it
this is a slightly different aspect of management

and here is what you know
what to do simply
you go along this line but you know
because you know generally speaking
what does God do in a given situation
even if only locally

for example, knowing what God does in a particular situation
you can always transfer this property
for any situation

at least God solves any situation
then you will solve your particular problem, that's for sure
i.e. the system of associative connections yes

and you start to build this path
even if you have a very large preliminary
some kind of negative experience yes
if the experience is of a completely different kind, etc.

then the movement in this management
this is a movement precisely into the Infinite into Eternal life yes
it is in the Physical Body of all people

and when you start to understand this
that people who are to us
in total, if you collect all the negative experiences of all people
yes, all generations taken together

and consider that there is this certain
Well there is a negative experience as a kind of obstacle yes For example
then overcoming this system must also be mandatory
but maybe all the negative experiences aren't that bad, right?
compared to that
what is there again, it is some kind of Macroenvironment
some other negative impacts

i.e. none at all, generally speaking
negative impact possible future
essentially cannot be compared with an earlier level

For example there humanity will make a concentration
switches to Eternal Development
but at the same time it means previous negative experience
it doesn't matter anymore

i.e. there are other high-quality systems
that allow people to be saved
and at the same time it means Well, it's not necessary at all
process past information

therefore the next criterion
precision of action in Macrosalvation
see
With soul
In Spirit
Consciousness
often with the body
consider
that of the Collective factions of Consciousness
the future management may well be the best
for everyone
no need to process
some kind of negative experience, yes , earlier

and here a lot of criteria arise
in the form of axioms there, including those that say that
what to do Macro management accurately
must see
firstly, all private tasks of all other people by the way
i.e. it is precisely necessary to reach the aspect of a kind of substructure

where you should see
in a particular problem
Salvation of all people

i.e. you need to look
as a person in his personal action yes
does the work that God gave him
and directs people to Eternal Life

this is how it manifests itself
in human feeling
in action
or that he doesn't like a certain situation there, yes

in life in society
and he constantly corrects it

and that's when you start to see
the structure of Infinite Development
as private actions of all people
then you see that your private task
naturally it is resolved and in a good positive way

because there are a lot of people
solve problems
and they solve them

if we take the total number of people
total number of existing tasks
then it turns out to be almost one hundred percent
people solve their problems almost
compared to the fact that you have one private
which you need to do yes

it means that the system is found
in the system of views
on the collective action of people
it means people are their collective action
do as God does
Your single action towards all people

i.e. we kind of look
from the inside yes
this area of management

and it turns out
what to do
For example there is instant healing
to declare your private task as if
and make it active enough

for another Perception
for Perception there For example
in the sphere of Collective Consciousness

and it turns out that here
this is the Infinite Future
it's coming
as your personal action

i.e. negative events still don't affect you

because you found the mechanism of connections
and in general they found it logical in many ways
I'm showing you more logical control now
at the level of the logical phase of Consciousness that
after all, it is logical when God is One
makes one control
and it is Macro-creative
in its basic meaning
for this is the Action of God

and people of course solve private problems
because the mechanism for solving problems of all people
he is very huge
it is enough just to recognize this internal system yes

so it turns out to be one of the Laws
precise control by Macrosave
this is to consider the integrated experience
and the actions of all people to solve their problems
because there are already very powerful connections with God there
many go directly with God
and work directly in real time

it turns out you are attractive
very powerful help system yes
from the system of solutions
not just even some information
and the solution

the only question here is
be able to process information correctly
i.e. to highlight
what corresponds to the solution of your problem

for example consider the Action of God
there are a lot of phenomena in the world
He as a Person must highlight
that which corresponds to His current task
private in principle

for example, to ensure the Eternal development of people

and it turns out that He must recognize
some specific signals yes
God
which allow Him
being there at a certain level of Thinking

the same as for example there well, similar to this
how a person thinks
or the same frequency of Thinking
how does a person do it yes
not even how he thinks
how does it work from God's point of view

because God gave him
business action
to a person

and it turns out
what we see here quite clearly
that this is exactly the Action of God
it is aimed at teaching us after all
i.e. we see
i.e. teach each person
that his Thinking, i.e. precisely this systemic Thinking
overcoming some a-systemic or systemic problems
this is what He teaches and shows
what if His private task
which is definitely resolved
and He acts, for example, in the Personality of a person

why is it clear here
that God is also a man, yes, and that too
from the point of view of Macromanagement
but He is exclusively human
from the point of view of man and Himself

because the interaction mechanisms
and the mechanisms for the development of future events there
interactions with future events for example
and the development of future events
or interaction in general as such
here are different objects of Reality
They are the same for God
in terms of precisely Infinite Eternal development
like a human

i.e. if we consider
in what way is man most similar to God

in terms of its action, yes

then they are exactly identical
there in the movement of the hand there is Thinking, etc.

precisely from the point of view of Eternal development

logically, ^{in general,} it's understandable
that the maximum status has been identified here
closeness to God
when a person develops forever

but there is still some difference
i.e. God has Eternal development
when a person has already learned to develop eternally
what is the difference and should I look for it?

so here is the next level
this is that ^{there} is no need to search for differences
you just need to be at the level of Eternal development
and try to understand that Eternal development
this is a solution to everyone's problems

when you understand it socially
a very powerful level arises
practically Infinite life of all

i.e. those people who even ^{well as if} they didn't mean it
or they didn't want to do it ^{there}
they receive Eternal development

because that's how i said it
you can work constantly and search all the time
accuracy ^{for example} Yes
in Macro Access
in Macro Management
in the universal Salvation

but this is to ensure accuracy
this is an analysis of possible values
what is there to work with anyway ?
and how to work

and when the system acquires
^{well} at least the identified species
because we started with that
that there is some general information about the Salvation of all
can we work with her
just like with information
and it will work one hundred percent

the question is not even that, the question is

how to ensure accuracy of work
in this formulation of the problem
universal salvation
where a person can guarantee
that he did it for sure
in its linear or particular action

and here to evaluate the action
or consider, for example, its action
so that he could be sure that he did it
in private action
well, it doesn't look like it
for some large amount of information
or let's say a haystack
which a person can lift very large
and say that he finally raised it

but if it's really big
this haystack
then how will he guarantee
what well For example there, he will cope with this haystack in one go
this is the guarantee of a person
what should he be sure of

Well, it's a private decision.
he can take some big mechanism
who will grab this haystack and, for example, take it away
on the tractor platform, for example, some private solution
another solution is possible, etc.
it can load a large truck onto the platform
and take this haystack for example

and this action is very big
but you need a truck
a preliminary private decision is needed
those. login yes

so this is precisely the task of management
is the organization of the entrance to the Macrosystem

and not of arbitrary entry
which ensures that this information
this is a huge amount of information
is being implemented
and again it turns out the person gets caught
into the system of private tasks
he should know what to do

how do you know what mechanism will collapse this task
in the direction of a positive solution
that the World will not be destroyed
that universal Salvation will come

and this is where it comes in
it is precisely the criterion of the distant future
which is in the Soul of every person
moreover in the body in the physical body

that's why the human physical body
in fact Eternal
each cell has such a status
and this can be proven by the way
even at the level of physiological parameters
if we consider the cell
in the dynamics of development, well, in microseconds
then it is possible to identify structures
when a cell emits Light

and it turns out that at some level
Well, if we introduce detectors, yes
at this point we will set it to microseconds
we will see that the radiation of this Light
there is a structure of human Eternity

over time if a person forgets it
this system
then it turns out that he is well there can be acquired
some problems

so here is the Infinite Future
realized in man
i.e. Infinite development
after all, all natural phenomena are logically connected , yes
all phenomena of the world are connected with each other
means Infinite Eternal development
has a direct connection with a person

this is a postulate, generally speaking
which I generally talk about all the time
at least I mention it often

and it turns out that since all phenomena are connected
it means that somewhere people cross paths
with its own Eternal development

and this intersection is "somewhere"
First of all, this is the physical body of a person
at least yes, it 's clear right away

and then it turns out
there is an action of all people directed towards that
so that the single impulse of God
i.e. what God perceives
as its own singular impulse
make it a universal action of all people

Generally speaking this is
elementary system of knowledge transfer
do as God does
and get what in general action
people do the right thing yes
system overflow

By the way, this is how the human cellular system is structured
here is the glow happening
when a person gives away knowledge by the way
It's not even like he's getting something from somewhere there
but the cell glows when knowledge is given

and what about the knowledge that by the way
not always only the knowledge of a given person
and he often takes it away
it depends on the level of the breadth of the Soul
properties of Spiritual development there Yes
breadth of Spirit, etc.

Often a person also takes
and it absolutely definitely means it takes
solution to some problem
in the Collective Consciousness
and passes it on to another person
through the cellular composition mainly

i.e. the cell is a powerful level
systemic transfer of knowledge
in continuous time
why did i talk about today's lecture
work continuously
then it will be immediately completely clear
how does the transfer process happen

and then you can understand it completely
where did you get the integrated solution for example
Well, not all life events exist in advance, right?
there are some earthquakes, landslides, etc.

so for the Collective Consciousness
the greater the Collective Consciousness

act the same way God acts
i.e. the more people are trained
and they know how to do it
from the point of view of Eternal Development technologies
more and more accurately future events
become controllable

i.e. the future becomes completely transparent
for those people who know for sure
that development is Eternal

i.e. it is enough for a person to simply find out about it
and he sees his own, for example, there, the Infinite Future

it turns out that it is enough to know
this is already a decision
knowledge is decision
from the point of view of this technology

therefore the main element of precise control
Well, that's what people mostly do
what have I come to now
This is a normal action for everyone

knowledge of that
which firstly can be easily done through Macrosaving
this is already sustainable management
at least have this thought yes

secondly, if he is a person who sees
sphere Macrosphere
the sphere of universal Salvation
and through it, as if just to walk, touch it yes
then solve specific problems
this is already a more serious level
this is already technological and revealing the sphere

further on there may be completely different systems
there in the numerical series is the level of Macrosalvation

as if sewn in a row, etc.

and a person comes to that
that everything he does is very harmonious
Macroregulation is, of course, connected with it in principle
because he is connected with the whole world in any case

so this is the management that leads to that
that a person will definitely recover there, yes
he necessarily lives Forever, etc.

this is management
for a person is that
to see
this is the precise transmission mechanism
or from the Macro level to a particular task
yes to man
to solve his particular problem
or just some kind of your own invention
but exactly exactly

here is where the man is
accurately conveys to another person
knowledge of Macro Salvation
it is about Eternal development
where is this system, what does it consist of, etc.

as a rule
it is either human thinking
or it is the space near the physical body of a person
there are not so many values , you can sort through them there
literally on the fingers so to speak
no more than ten magnitudes by the way
in some cases exactly ten

and when you start looking at them
For example there 9 8 there 7
7 is already the transition value
from a discrete static quantity
there in the Macroregion, etc.

i.e. you can then see
how do you organize numbers anyway
control system

and you begin to see that all the connections of the World
it is there, well, it's not just that the number itself organizes

you are just perceiving the number
normalize your reaction
and influence the outside world

i.e. you see
how is Perception organized
You build your own perception

and when you start to see
what from the future well as if from a very distant future yes
the system of one's Perception is derived
you always know
that Consciousness can always be controlled

i.e. the level beyond control practically does not exist
for personality

at a certain level
this is generally a constant, this is absolute knowledge
that man always controls the whole system

that's enough to this point
Well, it's in the heart area in the Infinite level.
where a man's heart is always right
i.e. where a person is always alive

this is a combination
current space
and the future
the God Cloth is kind of built in here
from the point of view of human perception
when a person understands this
he can also treat his fabric the same way

and you begin to see that all future development
absolutely predetermined by God
how exactly is Eternal development
there is the person himself, for example
in general, everyone, yes
including God

and you see that here is the transmission
of this Light there of this information there
For example there are birds and animals
this is also a human task

i.e. when a person becomes Eternal

he has Eternal development
providing this system is still there
accurately and thoroughly for everyone

i.e. there is some animal ^{yes}
even the plant world
how to guarantee
what animal that runs in this plant world
it does not injure itself and will not be destroyed

so here is the guarantee system
this is the approach of the outer world
to the person himself
and not some kind of mechanical one
and this is the formation of Perception
this is the formation of Consciousness
formation of the human Soul
that he is sure of it

and here is the confidence of the Soul
this is the main action to ensure
control precision through Macrosaving

i.e. when you are confident in your Soul
what are you doing Macrosave ^{yes}
you achieve Macrosalvation in this action
and then you get a private solution to the problems

but when you do it
this doesn't mean that you are ^{well} as if some kind of optics of the Soul
^{perform} some special action

The soul also has the property that
Firstly, its action may not be considered
Consciousness
i.e. the Soul did
and see the speeds there are very high
to translate it into Consciousness, you still need to take a closer look, ^{yes}
this is how this optics is developing

but when the action is already done by the Soul, it is finished
It is clear that man is practically invulnerable
He understands all possible connections.
he can restructure some events ^{there}
which he sees

you just have to think about it and try to understand

that some events may have been very far away

that there was some informative data
which concern a person at an earlier time ^{yes}
or ^{are} we talking about some future processes?

but at an earlier time
there was also a Macro level
there was a level of Macro-salvation of the World
if there are any events
there may even have been some negative implications there
as events that we need to prevent , for example
and make a ^{normal} level of management

then collecting together
all systems
we come to that
that yes, man absolutely controls Reality
it is enough for him to simply realize this

in terms of even some control systems

Here is an implementation of some control systems
why do i say that it is enough
Often a person doesn't get much ^{there}
data management according to my Teaching
he becomes absolutely confident
what difference does it make
if this happens then it can be transferred
to any other system ^{and} to any other development

and this is precisely the structure of Eternal Life
Eternal development is achievable here
because there is at least a preliminary
primary management practice

and therefore approaching the system of Macrosalvation
why is it often possible to do management right away
without exercising ^{control} over the region itself

because the approach
and the Light from the sphere of Macrosalvation
from the sphere of universal Salvation
this is also the Light of actions
and the Light of the solution to the issue

after all, you are the one solving the issue

it is precisely in fact in the action of universal Salvation

therefore, the approach to this system
this is a platform, let's say, an organizing substance
in order for your action to be organized
just as you need it
i.e. this is a solution to your particular problem

therefore the solution to your particular problem
general creative
from the point of view of universal Salvation
as if in ideology yes
even if you remember it and put it in

this is really the only way
which in itself is simply the only one
because you use this matter to construct events
sphere of universal salvation
she looks at you and shines yes
and you go along it and make private management

so it is often not necessary to do it there
in a literal mechanical sense
control
that for example the sphere of universal Salvation yes
then comes, let's say, some private sphere
then there are more general systems

and often it is necessary to take immediate action
For example a nuclear power plant could explode there
a person often does not have time
take there first to put the sphere of universal Salvation
then somehow process it, then go to the nuclear power plant, etc.

so any of his movements
this is the level of universal Salvation, among other things

when he comes to this
Human
as a practice or there by listening
my lecture materials
which is also a practice right away

here it turns out that you see the control like this
what a person begins to perceive

that it is constantly in the control system

and this is the level of regulation

The spirit of man perceives

the level of one's state as the level of control

and this is a very important practice

then he clearly understands

what well for example a simple example from ordinary yes systems

are some everyday things there in many ways

if you do the same thing for a very long time

then you still get the result

and here

i.e. if you invest a lot of resources

into one task

and here it turns out

you are always in the control system

to manage there so that the nuclear power plant does not explode

it takes for example one second yes

or is there a millisecond, well, just a moment

and you are in the control system all the time

then it turns out that naturally you are already sure

what will you decide anyway

some particular situation

and not because you are just sure there

Well, let's say that purely theoretically Yes

and because you have technologically advanced

to this level of management

how often I show it to you

when you are technologically on it

No problem

you are enough at this level

solve two or three events there , anyhow

and he can sometimes at least 10 years there 25 years

still need to practice statics in a stable form

i.e. it's enough for you then

often this level is simply fixed

all control went instantly

and where do you know exactly?

that the future good future is guaranteed

and when you are at this level of management
come in
these are ^{generally} the same as it seems
as fairly soft quantities
but we are talking about that
that management must be accomplished
under any combination of events

and it turns out that ^{well}, it's better of course
so that these events are of a private nature
more favorable

that's why I asked the question
that Macromanagement is best done
controlling private events
i.e. a private approach

because if there is at least one private event
it is inadequate ^{to} the level of Macrosalvation
in terms of speed ^{yes}
if some negativity slips through
in terms of the big Macrosystem ^{there}
then what is the principle and meaning of this Macrosystem

because the management is according to my Teaching
it is still access and universal Salvation

i.e., everyone should receive
your status Norms and harmony after all

if somewhere it is not taken into account
so the question is in the principle of management
in fact, it has not been resolved ^{even} in principle

can be solved for everyone
but if there is at least one person left
which does not receive such control
so the system generally speaking
is not functional as such even

and that's why this is exactly the accounting of all of them
so that it would be extended to everyone

what is exactly Macrosalvation
this is also a basic private control element ^{yes}
exactly
but this is the task of the Soul

i.e. the movement and action of the Spirit of man

so here is the distant Spirit
for the systemic nature of a certain problematic level ^{yes}
i.e. we need to overcome, ^{for example,} a situation
which is systemically concentrated
and we know about her that she may ^{well} be negative
She's kind of ^{like} that
it is not always overcome ^{right} away
or it happens that ^{for example} they consider
that it is not overcome at all
but we still have to overcome it
for systemic Eternal development

then we have to do it this way
so that the Spirit who already knows this system ^{yes}
which I have now laid out on a logical level
was further simply on all mechanically optically
further
some problem

and when we ^{already} learn and can see
fraction of the trained Spirit
for the problem
i.e. in the next level of the future
This means that we guarantee ourselves its solution

on the Spiritual level
and the Spiritual aspect of the solution
it is often generally speaking very important
often it is the main one in the management of a sustainable plan

although it is comparable
with a logical level of knowledge
for this technique because in this technique
any aspect needs to be managed
it doesn't matter which one
logical
by way of rest ^{there} , etc., etc.

i.e. any level that comes from you
from your personality

from your physical body
from you
for example your Thinking
even from the realization, yes
from Perception
this level should be the control one
overcoming the system in real time

i.e. often means you don't have the opportunity
for example, building something takes a very long time
For example there to recognize a certain system first
often have to be done without recognition

and then you still have to provide
guarantee
Eternal development
to yourself
civilizations
in general, to the whole world, for example

and then it turns out
that there is the following factor here

undeclared systems
to be surmountable
i.e. if we take all the most unfavorable situations, yes
in general the whole world as a whole
and consider that this is a very big problem
then this does not mean that the next situation will be the same yes
well, it's a little less complicated there
or in a million years there won't be a need to face
with some other situation

and so as not to have to sort through everything there
don't analyze a huge amount of information
there is a past there
or control
a huge number of future processes
all you need is just
reach the level of naturalness
when even an unpredictable situation
controlled becomes
and it must be controlled
by you personally

i.e. there is an aspect here
when we exactly achieve Macro Management
i.e. we are not engaged in sorting through situations there
when you see your personality factor
that you personally do this
How do you personally look at it?
with the gaze of the ruler there
there Well how would you take personal responsibility
for Macrosystem for example there is the whole world

and then this postulate of personal responsibility
he might be there Well, at the beginning it looks a bit tense
there from the outside at least
that man took responsibility for the whole world
and so he pulls it yes For example

at the same time it is true
Really World
The world is not exploding
he sees all these streams
which he pulls over to himself there
well, how is it going on there, at the level of this kind of hard worker
who works very hard
it may not look very similar yes
i.e. it's not a barge hauler on the Volga after all
it's not exactly like that
because this mechanism is completely natural

and if you look from this side
it seems like it's difficult, yes It's pretty tough there
from a logical point of view
but a person is in this system all the time
he constantly pulls control over the Universe
he constantly carries out
some kind of action of regulation

and at the same time he often does not feel any fatigue
i.e. there shouldn't be a feeling of fatigue often
even if some Macrotasks are completed very quickly

so there is a certain level of naturalness yes
and this level of naturalness
this is just a conversation or contact so to speak
or inner Spiritual understanding of God
or even an internal conversation with God

i.e. everything is there by itself
It's not hard for God, even though there are millions of worlds there
He is the One Creator. What difference does it make to Him?
He perceives His creation
just as we perceive
my thought including this

and if we perceive thought
it may be weighted or heavy there
there may be incomparably more severe
than physical labor

if there well maybe even a single thought
can be heavy
mean something bad

and then it turns out that we can clearly say
which is analogous to how God perceives the World
and for a person it can often be Thinking
enough in the form of Thinking
lay down the correct postulate

so here is the postulate of Macrosalvation
does the same thing
makes real Macrosalvation
optical control level
focuses on your thought
but you don't get tired

i.e. this is external control yes
you control the external signal
you are simply laying down the ideology of management here
through Macrosalvation and all
but for this it is often enough sometimes
speak once to do it

For example there in my Teaching
Macrosalvation is universal Salvation is a postulate
any action goes through this

through this level of system management

so it's enough to work
for example, according to the Teachings of Grigori Grabovoi
it is clear that the postulate of Macrosalvation is embedded there

it is enough to perceive
one time your task for yourself personally
and every next action
this is also an action through Macrosalvation

and therefore one after all
here is the overall dynamic level of control
is the originally formulated postulate

watch once remember
and then it happens
because Thinking is already that level
which does not put pressure on you and makes it easier for you to work, etc.

nevertheless
detailing approaching the spheres of Macrosalvation
mandatory solution to situations
as I said
these are the details that allow you to identify
that Macrosalvation is an accessible quantity

and you can approach it in different ways
you can just go through specific tasks
which I'm not saying that you should take on yourself
a whole stack of huge information
and what to do with it ^{yes}

as it turned out, as I just showed
any approach to this information
this is already Macrosalvation
this is your path and you follow it

and therefore sustainable management
mandatory management
mandatory implementation
good level of management
mandatory achievement of Eternal development
and in the physical body ^{of a person}
ensuring the best future ^{there}
this is the level that implies
that any of your private actions
has all

tasks
opportunities
there are Macrosaving functions

universal salvation
and Salvation ^{there} for each individual

for this you just need to
make such target management
and realize this
and this is often simply enough

and here's about this lecture
that's generally enough
what to do with this data ^{yes}
do in this state
in the state of Macrosalvation
in the task of Saving All
and that's all

and it is being implemented
and your personal action
then it is carried out
^{Means Well, first of all, definitely} ^{yes}
secondly, with the help of all other people

This concludes today's seminar.

Thank you very much for your attention
