

GRIGORY GRABOVOY
The Teaching about God
Using the Soul's Powers
13.01.2005

Hello again
the topic of my seminar today
this is my Teaching about God
Using the Soul's Powers

in this topic i show
what is the Soul of man
has some other special features
i.e. it can act in addition to what a person does
for example, it owns as if in the first impulse of control
precisely by the action of the Soul

i.e. a person can perceive the optics of the Soul
can use some technologies , so to speak
in the first impulse of action of the Soul

then the human Soul has possibilities
more extended deeper
just like a person, for example
there is a kind of level of primary capabilities
when a person can act simply the first time as if Yes
but he can analyze anything else
and act more deeply, etc.

here in this analogy is precisely with the personality of a person
where the concept of "human personality" includes
other more parameters
there is Consciousness
Spirit etc. yes
the physical body as an element of the Soul, for example , too
this is precisely the application of the deep possibilities of the Soul
in this case, in this topic we need to consider that
that the Soul itself understands its own state
and at the same time it can deepen its own action

i.e. it turns out that the Soul is capable of , as it were, showing greater depth
in order for some action to take place
and in principle, here you can identify
very simple connection for example in control
between the physical body of a person for example Yes
and the action of the Soul

i.e. if we assume means to consider
namely the optical system of action

then the concept, for example, of "the depth of the Soul's action"
is distributed in optics in the form of a specific optical line

i.e. the thing is that

for example, if we consider the management position

I'm literally showing the optics with my hand

how is the development of the optical control line going?

then here it is clear that in order to develop management
from the point of view of the deep possibilities of the Soul

we need to make it so that the entire outside world

i.e. the entire control system, so to speak, is like this

that it is necessary to manage some processes and management too

i.e. besides the fact that it is necessary to manage
some ordinary or situational processes

we also need to manage management processes

there by the outside world

i.e. the external world can be dispersed

to the level of any areas of action there

and each area is somehow controlled yes

some kind of control center

so, in order to manage more control centers

here you can just use it

this is the technology of using the deep capabilities of the Soul

where are the control centers

other control areas

i.e. in fact this is the level of well can you really say more like that?
concentrated management

and that's when I show specifically with my hand

where is it located

then in this case it is very important to look here

where exactly is this optics

i.e. I'm actually showing with my hand

namely geometric points

where this control takes place

this allows us to very simply, let's say, perceive information

Well For example there both verbally and simply due to that

that is, the action of the hand showing these points

in this case, the action of the hand , i.e. control of the body , let 's say
showing these points means action

let's say to do Macro Management

so that there is no global catastrophe

here is the line of action as if deep yes
namely comparable possibilities of the Soul
i.e. the depth of the Soul in information is as follows
that the Soul decides in any case
management information in a positive form

and this is expressed in optics specifically here
and in any case it is a specific glowing point
she is here

and then to manage the control systems
they are located here for example Yes, I show them specifically.
their centers are like luminous points
they look like glowing dots

then this is like a segment of the Soul's controlling action
he begins to move towards these points
the combination begins to occur, a sphere arises
and the result is the physical body of a person
and such a person who is Eternal
not only there in the Infinite level of development
but he is Eternal and in the elements of the past

i.e. it is important to identify here
that here Eternity is manifested in the past
the same properties of Light

i.e. a person so that he was sure of what he did
I did the right management
and that he is like did you do anything among other things?
its own external management
he must clearly set a task of this type
that here is his own management
done for example to some level
this is proper management

and in connection with this
Proper management can be called
management that has
some comparable characteristic

i.e. it turns out that if we consider
past events
and at the same time we take some current event
what happens from the point of view of process stability
a person can say
that yes he did something right in the past
and or all the actions there in general
because in the current time he does there
for example, this is the current action

so it turns out that from the point of view of sustainability
or there is an analysis of the situation that you did the right management
the past is generally speaking often of fundamental importance

and highlighting a fragment of the past
precisely in optical terms
eh, that is, a special task

and from the point of view of the deep or profound possibilities of the Soul
there are deeper ones than just in the first impulse yes For example
the second impulse the third or analytical impulse of the action of the Soul
we can say that here
this is the selection in the optical version
here I am showing exactly the point
specifically in geometry near the human body
this point is the optical action of the Soul

and precisely the past element
i.e. it's not that the Soul intersects there
for example with information from the past yes
this is another line this is the intersection from here
from the physical body here
namely, that the correct action in the past

i.e. you can see yourself
and consider that in this action you did it right
but once you start looking at yourself in the past
you get the first level first
it's still yourself in the current time

i.e. the Soul acts in the same way by analogy with that
how does god work
He first in any of his actions
he sees himself, after all, his Personal Action
for God has realized all the phenomena of Reality
this means that any of his actions go through a level
all the same Self-perception

also to know the deep deep level of the Soul
you need to enter the system when the system is recognizable
i.e. each subsequent action is a recognizable action

and it turns out that the past is still a recognizable system
and a person who remembers elements of the past
this means that he naturally perceives the past as a stable position

because from the point of view of the current moment
some past value past event
where will it go

Well , it was and is, let 's say
it is a stable value in management

and if we need to restore for example
the whole picture of the past
those. Well, to put it simply, we need to remember
some details there in childhood
or when you want to know something about yourself yes
you can just take the element
any element of the past at a very high speed
bring out approximately the same geometric

just a distance into the future
and the past begins to be remembered

i.e. it turns out that it is precisely high speed
manifestations in the future your speed
selected as if in a sample here in the past
gives a memory in the current time

Well for example if someone needs it
so that the memory works in a targeted way or more actively there
this element can be used
and can be used in this way
what if memory is developed to a level
for example, detailing some primary processes of the following, etc.

i.e. in order to cure some complex disease
often very high granularity of control is required
i.e. specifically where which specific molecule is located
what do they look like
and for this you need to constantly remember the next iteration

and it is not necessary to remember it, for example
well, through repeated actions
often you need to remember this instantly

and it turns out that here it is very important
this element is precisely the splash of information
in the Infinite Future

i.e. not even into something specific but in general into the Infinite
then each iteration is obtained
as if a frozen picture is stored in memory

and you don't need to write anything down there or remember it specially
you already remember everything because it is a static past
your actions immediately turn into
into a static picture of past events
but those on whose platform you are building the future structure

so this is precisely the development of the capabilities of the Soul
where is there such a simple postulate
that God gave the Soul all the possibilities from the very beginning

in this case we are considering
this is exactly the concept
that we use this "deep resource of the Soul"
to do Macrosave for example
or act there according to the principle of control in the Infinite level

and this deep resource is practically like this
that we can do it well how to activate
virtually at any time

because this is an in-depth resource
it actually intersects with the Infinite Future
in general the whole World there the whole civilization there the whole Universe

because on a deep level
all phenomena intersect
at the fundamental level of Reality
exactly at one point
at the point where God primarily perceives all Reality
for where He perceives, there He creates
He perceives what He created.
and at this moment He creates

and that's when we start thinking
about this level of Reality
then we understand that we too are just the most deeply
we perceive the resource of our own Soul
when we create
we take part at the point of creation
and not by some speculative way, for example well, that type
what we did is control
and from this moment we believe that we have created
yes at that moment we really created
but we mean something else
that is , it is natural for a person yes
naturally in a normal state

i.e. a person like this, well the physical body of a person yes
as a person as a level of the Soul of a person
almost at the level of the physical body
is also at the point of creation constantly
and of the whole Reality
at the central point of creation

and when a person begins to understand this

he feels a certain burden
actually on your physical body
but at the information level
at the level of information where the physical body is
is located in the center of creation of the World for example

Well, if we abstract from the situation, well, everyday life, yes let's say
in relation to the physical body of a person
and consider just such a model
but in the center of the creation of the World in general of all information of Reality
what information action or even maybe pressure
occurs on the physical body of a person

then this fundamental line can be very clearly identified
that in this case the body is focused on
all information Reality

i.e. it is the whole world including the Light of God
begins to act on the physical body of a person
so it turns out that this is still quite a load value, yes

and if we look at human skin
like well the level means some
Means as if an autonomous action of Reality
that here is the skin, that is, a certain boundary value
then it turns out that powerful light acts on the skin

so to compensate for all this Light
a person must have a very powerful internal resource
which gives comparable light yes

but this Light is comparable to the Light of God
The light of God acts on him
and it must act as if from within the physical body
along the line of God's Light
so this is the Soul of man
The soul created by God has a comparable Light

i.e. we clearly define the coordinates of the human Soul
in the center of the Universe
i.e. in the center of the Universe
The soul of a person is located, it turns out
from the point of view of logic and information
it turns out specifically well as if inside the human body

i.e. we define the human body
and we believe that the concept of "inside"
this is the action of the Soul of man again
i.e. we begin to perceive with the Soul

Here, pay attention to this
to say that the Soul is inside the human body
we must perceive truly with the Soul, logically
because the Soul must then clearly determine itself
where is it located
and this means understanding the Soul itself in logic

and it turns out that as soon as we learn ^{yes}
we find options to perceive with the Soul
then any action turns out to be outside the action of something unfavorable
because then any adverse effect
eh, that is, only external information
which can never come true

pay attention, this is happening from that moment
when we realize the position of the body in the information as if Yes
and at the same time we are from the point of view of the usual, as it were
well, everyday or something Perception from the physical body

i.e. in this case the usual everyday Perception of any person
not separated from the deepest fundamental state
Souls of the body ^{there} of the Universe

and this transition, that is, is nothing else
as God's Action in our learning
i.e. we can learn from ourselves, ^{yes}
we can learn from God from other people
and all of this is based on one universal mechanism
which is generally the same for everyone
it is located in the center of the Universe
and Soul
and the physical body of a person

and from here it is very clearly visible
it's like if you hit flint on flint ^{yes}
then a spark arises as Consciousness arises

and from here it is clear that Consciousness is always born
just as the Soul is born with all its possibilities
i.e. in the Consciousness of a person there are always solutions to all questions

to get ^{for example} there is clairvoyant information
or controlling clairvoyance
it is not even necessary to work with the Soul often
it is enough to use this technology
it is enough to use a fragment of Consciousness

Consciousness also contains all the answers

generally speaking, you can go further from here
and say that in any system of Reality
there are always all the answers
it really is
God has given everywhere the Action of universal knowledge

and it turns out that then we are practically
here already in a very free in a very sparse system
i.e. we start working well as if with effort
which are not very strong
i.e. in the sense that these efforts are not difficult
i.e. they are not perceived as a burden

i.e. if all the Light is focused there
and there is some high concentration
which is perceived not as a weight but as a certain force, yes
then we only have to move away and the flint there burns out a flame
move away in terms of development to the level of Consciousness
we already see lightness

and here Consciousness gives easy movements
but in principle it does comparable things
i.e. logical things are done

i.e. it is possible , for example there to materialize the object
by the action of the Soul
but you can take it and logically assemble it there

but here there will already be action of the human body
it won't be hard to do
i.e. there won't be this universal pressure of the whole World there
on the physical body of a person

that's where the pressure is strong
there it turns out that the action of the Soul takes place
through this powerful Light and in the center of the Universe

and here it is as if the investigative level is already rarefied , so to speak
and here you can do it logically

i.e. it turns out that God created a logical phase of development
i.e. this rarefied physical Reality
so that the actions would be simplified in reality

i.e. physical Reality
it is an opportunity to do an action with less resources
and the same action can be considered
as I say, you can materialize it or you can do it with your hands

and then it turns out that this is the transfer of knowledge, for example

means even more Well as if a system of simplification of action
i.e. the more knowledge is transferred
the easier the next action becomes

and it turns out that from this point of view
that's why the human soul is well For example it manifests itself there
at the level of human perception sometimes not often
i.e. a person can say
that he probably sees there quite rarely or something
Perception of the action of the Soul
because it works more
exactly as if in a rarefied region
in the field of logical action
in the area of action of Consciousness

let's say this spark of Consciousness flared up yes
and now it becomes easier and simpler, etc.

and by the way you can watch
Laws of the organization of Consciousness
here it is very easy to consider the Laws
By the way, they work exactly how often exactly
just like a physical spark ignites from flint

i.e. Laws of functionality of Consciousness
often correspond to the laws of nature

development of natural phenomena

why for a person
nature is very close, understandable and familiar
because the fundamental Laws of the development of Consciousness
they are such that you can easily see them
what is the initial level of development of Consciousness
it corresponds precisely to the initial level of development of the World
but Consciousness develops in this regard logically and understandably
together with the whole world too

i.e. the entire evolution of the World is embedded in Consciousness
and we can naturally consider
that Consciousness develops according to the same Laws

i.e. the World is Consciousness in this formula of control

and it turns out that you get there
it means a deep state of the Soul
already as if from a rarefied phase
i.e. I am now speaking in ordinary logical language
we need to concentrate
i.e. compress the logical phase
within the limits of your imagination

then it turns out why a person has an imagination thought
to have access to the Soul
at the level of morality ethics
and concepts familiar to humans
it is clear that access to the Soul goes through these concepts yes
through some Perception through Thinking

and it turns out that these are the capabilities of the Soul
implement as a whole
while using them there or constantly in the Eternal development
The Eternal Soul gives constant knowledge to the Eternal Body.

i.e. to make this process continuous
in terms of automated control
i.e. or absolute control over the situation
when a person becomes so accustomed to the state of the Soul
do management all the time
in fact, according to Eternal Development
that it becomes his natural state

i.e. he doesn't need to strain himself there specifically
he doesn't need to suppose there is some special way to find out
the mechanism of action of the Soul in the logical phase of Consciousness
because he moves from Consciousness to the opposite
into your own Soul , i.e. into the structure of the Soul

and the deeper he dives into the structure of the Soul
the less management as such is required
in terms of that , well what about concentration yes

because the deeper he goes
however, it still ends up in a more concentrated area
but it falls precisely in the rarefied fraction of the logical

those. well some float rarefied control phase
which penetrates deeper and deeper into a very dense mass
well it's like some bathyscaphe goes into the depths

but in this bathyscaphe, well, the environment is normal
he is a man, he lives like that, there is air, he does not get tired there
unlike what if what if he was wearing scuba gear
the pressure would increase yes
in a regular wetsuit
or just dived himself

so it turns out that it's the same analogy
that Consciousness Consciousness allows with sufficient simplicity

means getting into the structure of fairly deep systems of the Soul

i.e. a person at the level of Consciousness
can often be found at a very deep level of the Soul
but at the same time he does not perceive this as some kind of pressure
he doesn't perceive it as a burden
i.e. he can perceive it simply as transparency
i.e. understanding the World

therefore the connection of transparent
or so to say, easy to control factions of Consciousness
with the deep position of the Soul
gives a transparent picture of the future , i.e. a sustainable future

if you ask yourself the question how to get a sustainable future
Well there without applying much effort there
This is often necessary
i.e. it means not doing it for a long time ^{yes}
enough for this at this level of application
there are deeper possibilities of the Soul
it means just to connect
for example, practically
normal level of Consciousness with deep level of Soul
literally often mechanically
take and here is a fragment of Consciousness of any
and connect precisely with the deep level of the Soul

deep level of the Soul
by the way this is a specific geometric control point
near the body
I showed it, it's not necessarily there
somewhere there logically it takes a long time to go down
or find some creative ideas there , some new ones
this is optics
take connect this sphere just at least at one point

but there is an element of connection here that is very interesting and important
as soon as you begin the rarefied phase of Consciousness
connect with the deep level of the Soul
or as deep as possible
which is located there at the level of the beginning of the Universe
here is the conversion of the connection this is the physical body of a person

you see that the physical body of a person
it's actually ^{kind of ready}
those. it has actually already been created
this is an important point
in the treatment of complex diseases
It is important to see the created body
not a moment of body organization

what is available through Consciousness
see how the management goes, how it goes, for example
namely a living healthy body but created

life is macro that is, generally an Infinite quantity
and it is enough to see in this Infinity
one segment of life
the body is always alive

i.e. maximally Infinite information
always gives life to the body under any combination of events

this is important that we find a level here
that no matter what events happen around a person
he can always be in space
that he is always alive and well
well, for his health, maybe he needs to work there too
happens there once a year or every 10 years above himself
but nevertheless he is always alive, that means

and if you further deepen the level of the Soul there
then he is always healthy
it's three seconds often time yes
the main thing is to know where

so when you start to see and perceive this space
then you see that here is the Soul in connection with Consciousness, yes
in harmonious connection with the body there
with the tasks of human society
tasks there Macrosalvation
she is maximally harmonious, she is enlightened
and here she basically becomes like this
that this level of external Light yes
which shines in the center of the Universe, it is like this

that you see your own Soul Light
i.e. Light which was created by God
i.e. the Soul is precisely in the state in which it is located
from the level of creation

Well, if we take , for example, the history of human development
here's a child and an adult to tell
let's remember the whole period
he perceives the period of infancy
as some kind of easy period after all
that in front of him is the next life , yes
Infinite life for example

and it turns out that he kind of perceives this period
how is it still a period of some ease

i.e. Well, when he was born, he didn't have a social task in front of him.
his parents took care of him
Well as if some aura of care arises there

so it turns out that here
in the area of exactly that Soul
which compensates for all external light
there is a level of primary care
but this is God's care, that is, the touch of God's hand, yes
Consciousness of God
it is God Himself who, as it were, grows this Soul
i.e. the Creator who creates it

i.e. we see the work of the Creator, the work of God
and not just any ordinary Creator
and really it is God
but acting precisely as the Creator

i.e. why did God give man such a body
and showed him the path of Infinite development
because that's why the Soul of a person understands
Well, first of all, the body, yes, my body
could merge there without separating Eternal number of years
and for God to see this action
in relation to Himself
i.e. God must also see that He cares about Himself
the same thing somehow

i.e. if it is clear that he cares about all people
another person can care about some other person
then God must have something comparable
in Your Perception
He must have something that is
exactly as a human concern yes
human concern but about God

but it turns out that He must create such a system Himself
what is the difference between man and God
God creates everything

and it turns out that a person can also strive to create everything
and in principle create everything that he sets as the goal of management
he can too

but here is where the problem arises
level of new possibilities of the Soul
i.e. deeper ones where the Soul actually shows to God
that way
so you can say that personal road

or there as if that road along which it may already be
well, in fact, it turns out to pass through Consciousness or is it real
God

and this road is such that it is generally shown here
human concern for God

i.e. and this is an appeal to God yes
and then God can give Divine care to man
i.e. a person gives human
God gives the Divine

but when there is an intersection
then new possibilities of the Soul of man and God arise
i.e. in this case up to this point I was saying
that the Soul has colossal, in fact, possibilities
but personal to a person

but when there is mutual - as if an acceptable mutual concern
although from the point of view of well, it turns out , in general , God and man
Here you can consider it like this
that God always takes care of people
He is forced, not that he is forced, but His natural state
it's caring for all people
this is his natural state
and he must find this state in himself, it turns out
from a human point of view

i.e. a person must clearly understand
that this level of care for people is natural for God
for He created people
it turns out it should be manifested
some human qualities

i.e. for what purpose, for example there God is to be man
and how to act as a person

and because then He thereby shows
that He really and truly cares about people
He is also a human being

and it turns out that if we take other phenomena of Reality, yes
there well, animals, etc.
then the manifestations here are as follows
that it may not be connected there Yes
in principle, as if with the creation of as if well, yes, a person

but man cultivates animals there
he can reproduce them as if by another biological means
where God originally created animals
Again God's action yes

but man strives to do something
in a way that is under his control
i.e. it does not replace the work of God
but it works similarly well this is just an example there Yes
development of animal husbandry, etc.

when we look there well development
some plants cultivated by man
when we consider all these concepts
then we can see that a person in principle
with one movement of the Soul, understanding of the Soul
can realize all the processes of Reality
where he cultivates, as it were, the development of the World in controlled ways
For example there is vegetation and animal life
development of the geographical environment there, etc.

i.e. it turns out that the person has
here is a specific one, exactly in geometry in optics
it looks like this exact line
splash of golden information
first from afar and closer silvery
which actually gives an immediate understanding of all processes

i.e. a person at the management level always knows
what will happen in his future
from the point of view of what he knows
what will happen as if in distant systems of Reality

i.e. if you ask a person there in 100 years
will there be tuesday yes
it will be Tuesday or Monday or Sunday

it turns out that a person has a concept
which is completely known in advance
so, accumulating what I have said here now
we can say that the Soul always has
a certain set of knowledge
which is arranged similarly to what I just described

i.e. i.e. there are systems of exact knowledge
there are systems of logical knowledge

there are accumulation systems of some control centers

and so in order to be able to take over the central control , as it were
well, some kind of root of the Soul , so to speak
then we get this root
it needs to be visualized it needs to be brought closer
it needs to be considered so that this root functions optimally

i.e. and this is on the physical level, often this is the action of the heart

i.e. when you start to see
as an ideological level of the Soul
begins to come down to some point in the body there
to the inner level
i.e. we look at the Light of the Soul which compensates
all external Light
and we see that this Light is turning
in the semantic level, it is precisely in the heart which is Eternal

those. on information
i.e. we see the information of the Eternal Heart
and we start to get closer to her to look

here in the depth of this information
in the depths of the Soul, yes
so the heart too, it works all the time
but the heart can't work outside the body

it turns out that we are beginning to understand the body
i.e. we begin to remember
a system for creating your own organism
means to remember with the Soul
remember how God did it
how we interacted with Him yes
primary level

and then it turns out that for us it's already gradually there
there are no closed topics left or there are no closed topics left immediately
i.e. we immediately understand that we know everything

as soon as we understand it
we see that this is the deep level of the Soul
it is implemented precisely from the point of view of Macrocontrol
and at the first level
control over control areas
and it is important to be aware of this
control over control areas
and your future is guaranteed
as a positive development

because as soon as a person understands
that he controls precisely the areas of management yes

then he immediately does this instantly
as if a throw into the future
events
both past and present time are captured

but it's static

i.e. an exit, as it were, into the future
here well as if guaranteed by that
what does it mean here that we have
in fact, it's just a very rapid development of information
and have control over the control areas

so if you look at it
today's lecture for example in this way
what does it mean you can consider
geometric arrangement yes
concepts of this lecture
as a seminar action there
to participate in the management of events
there is a future past
and see that the configuration of the information is as follows
that there are the most diverse interweavings of information
for example, one level, second, third

then in the end we just get
the physical body of a person his personal tasks
which are concentrated in the form of Thinking there
there are specific actions of the physical body

and we get what all these mean
intersecting areas they are like this
that we have very clear actions for everyone
this is the physical body of a person again , etc.

and it turns out that God arranged the World in this way
that any actions, for example, are the most difficult
there the most, perhaps, in the conceptual apparatus
they are difficult there, so they can be achieved in one go, at least yes
you need to think through the situation several times to achieve them, etc.
they lead to the fact that a person still has an action
just on a normal physical level

and this physical level should be like this
that in general it turns out to be transformed
still in the concept of "action of the Soul "
namely the deep action of the Soul

i.e. it turns out that he should be practically an ordinary person
it is necessary to have this return channel
well, that's exactly what I started with when I set the task

i.e. deep, maximally strong action of the Soul

must constantly intersect with the everyday level of a person
with the normal state of a person

and here is this intersection
that is, everything external that is perceived by a person
World

i.e. if you ask yourself this question
this is how each person individually
perceives the outside world
Well **those.** yes there are the same letters there are the same objects
i.e. it is considered that every person
some universal things are perceived in the same way in principle

but is it really *so*, for example? Yes
does every person perceive
even a flat surface is the same

Well, in fact, you can say right away
that it can have different angles
two people cannot perceive from one place
from one geometric place perceives only one
the eyes of a person are located
only in one geometric place
it means it's still a different person at the same moment
still perceives it differently
this is already the first difference

and then it turns out that in essence - that
even if a person looks at the same Reality
he can single out some different designs for himself
if we are not talking about hard physical objects at all
then the values there are completely different
often they are completely different

and it turns out that God created
means the perception of a person is individual
in order for the unique status of the Soul to be yes
how exactly is that Soul that is located
well, like in the center of the entire Universe
so that this unique status would be like this
what a person practically sees
well, let's practically say so
action of one's own yes
the action of the Soul in Infinite development

and basically you see
that this is the unique status of the Soul
he is such that you see that the World is the external World
it is layered on the Soul in different ways

which is located in the center of the Universe

i.e., in fact, every person perceives it this way
how the Soul perceives it at the moment of its organization
because in the center of the Universe

The soul is located
must be present at the time of organization
i.e. creation

and later she well in general it starts
All in all well how to develop together with the information of the world
but nevertheless, the information is from the point of view of logic, yes
this is information from the past
and this information still practically concerns
of the entire subsequent development of the Soul

i.e. it turns out that if, for example, a person wants
Well how to ask the question logically
when for example his Soul was created yes For example
then in principle he can even determine the time of creation of the Soul
from the point of view of comparing the perceptions of different people

i.e. the Perception of the Soul of a person is sufficient
at the moment of the Universe it means to consider
as a specific picture of the World
from another person
then a certain specific time is revealed
Well, let's call it the time of the creation of the Soul

and you can consider
provided that at a certain level
all Souls are generally created as if at one moment for God

but then the question arises
what is the difference
i.e. the difference in the system of Perception in the system of information volume

and it turns out that every Soul
she has equal rights to development
and generally speaking, initially from God an equal volume yes

but here it is precisely the action that is the personal choice of a person
consists in the fact that
that he perceives Reality in one way or another
i.e. he can perceive Reality in principle as he wants
God perceives as He wants

and this is the level of Perception
when a person chooses the element of Perception
i.e. a person forms his own perception

and it turns out that this is the level of Perception
eh, that is, the level which is practically in general like this
that a person himself actually forms an element of self-awareness there
how is he perceived there how does he perceive

and here the following arise
dynamic possibilities of the Soul
in dynamic development
that a person can in principle completely control
the entire system of the Universe only because
that it kind of helps the perception of another person
For example there to develop forever

then when he does that
then the other person is basically completely free there
is developing quite calmly
For example there in Infinite Development
and at the same time the person who helps to do it
has a certain very stable path
because in Infinite development in Infinite development
all people will have Infinite it turns out logically
amount of knowledge

and in principle, if Infinity is developed
to the ideal level of Perception as if in logic simply
any knowledge will become known to man
i.e. the elements of Perception will align yes

God took the whole world once
and people start [...]
Well as if here is the very approach
they begin to approach the Perception of God

then it turns out that they start to draw
its own, as it were, more or less unified level of Perception
although they are still different because of this
i.e. they still become, on the contrary, more individual
because more Infinite amount of information
gives some more extended version of them
location point in information

i.e. if we take two large areas of information
then a person inside them somewhere may be yes
and if the area is increased in Infinite time
that means a person has more opportunities

although from the point of view of human perception
it means he becomes more similar to other people
Perception
but in terms of possibilities, they become wider

and here it turns out
which is exactly the ideal level of this action
is the physical body of a person

i.e. at a certain norm and some average norm
well the parameters of the human physical body

everyone's capabilities are different
and the elements of Perception are different

i.e. it turns out that the physical body
this is still the level of this technology
which allows us to actually say so
what is the physical body of a person
that is, in the perception of God
from the point of view of Infinite development

i.e. God perceives the World in this way

and it turns out that
because I have singled out precisely the Infinite quantity
a very huge size where there are more opportunities
and a more static form unified yes
in Perception

I just take and transfer the model to the physical world
and then I say Infinite Perception of information
God was able to mean to highlight
in the form of a human physical body

means the physical body of a person
this is a certain focus of all information

and based on this time it's a focus
Well as if the geometric parameters of the body are such
what is that physical focus
and therefore the entire external Light of the entire World
this is not a load light
because it is the natural focus of the whole world

and it turns out that then it is clear that the center of the World
a person is a whole world, it immediately becomes clear
and then it is clear that any action is controlled
i.e. all elements fall within the concentration limits
into focus

and then it's clear that this is it
it is the deep state of the Soul
This is, first of all, control over the physical body of a person

i.e., that is, when all the resources of the Soul are concentrated on that
so that the body would be Eternal , i.e. healthy Eternal ^{yes}
the body developed favorably, etc.

thus God actually decides
the task of Infinite development
which originally exists in Himself

i.e. It turns out to be more natural

i.e. He begins to see people ^{there} caring about Himself
but at the same time it is His own manifestation
People are His own manifestation, that's how it turns out

i.e. He is inseparable from people
Well, at least it's clear
he is an ordinary person ^{yes}

but on the other hand there is a level here
well, that's ^{it like} Macrocontrol
it is shown here very simply
anyone can do it, it works

in this case we started with that
that we ^{got} a human body in this technology
as a body already created

i.e. we immediately get into the structure
where there is a certain niche right away the body
and here the Infinite any glow gives life
i.e. life in man is initially Infinite

now what if we want to consider
and what does it look like anyway ? Physical Body of God
then it's absolutely clear
just like the human body
because it is also in focus
naturally it is in the focus of the entire Universe
so this is a human body
Body of God

and it turns out that we are here from a person ^{yes}
i.e. having considered God's point of view
from man came to that
that the Physical Body of God is the same as that of man
and if so, then it turns out that there is some kind of combination at the information
level, ^{yes}
The bodies of God and the bodies of man
so at a single point of the Universe there is such a thing

that a person in principle often does not need there
well, some special manipulations to do events
to know the essence of God and His technologies
there according to Eternal development

it is enough just to understand correctly
your place in management
right now here
understand correctly where you are doing the control from
and correctly understand what technology
at the moment it is better to apply

and it turns out that here we have
exactly that concept

what exactly is knowledge that decides
this is exactly the Eternal development of man

i.e. it is enough to know and you have it in principle
quite specific Eternal development
it is enough just to know
where are you at the information level
at the level of a kind of deep position
deep awareness of your Soul are

and this is often the concentration of the Soul
this is such knowledge
it's just you see
how your soul concentrates
she enters into the depths of self-knowledge
she she becomes deep
She is the Soul who fundamentally understands the World

when you have this fundamental understanding
you already know for sure
that any event of yours will naturally be favorable
implemented for you

i.e. this is such knowledge
that this knowledge already allows
your events will be realized favorably

because the concentration of your Soul is according to its capabilities
well here it is that and naturally all other events
for you it becomes a settled question

i.e. actually even reflected and consequential light
already solves the issues of your optimal development
not to mention that you can
generally use the resource of the Soul
then you will solve everything even more

i.e. this technology allows
precisely due to the enormous resource of the Soul's possibilities
know
that you will naturally solve all your issues

therefore it is clear that Eternal development
including Eternal Development
this is a completely achievable value
not only this
then in general any level of manifestation of Eternal development
creative plan
always achievable

This is where I end today's seminar.

Thank you very much for your attention
