

GRIGORY GRABOVOY
The Teaching about God
Building Peace with Love
03.11.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Building Peace with Love

in this topic i show
how can one use the information of Love
generally speaking, Love itself
acting with Love or building Love including
build information of the world

for this you can consider
next management process

when we consider
the level of Love or Love itself
in the Infinite distance from man
in the level where the World for example has not yet been created yes
Here, do a simple management practice
i.e. bring out the structure of Love, for example , in front of you
to some level
and fix this glow, for example there for about five seconds

and you will see that the waves start to come
which actually form continents
i.e. it is clear how, for example, Eurasia arises there , etc., etc.
and little by little the sphere of the Earth begins to float in
i.e. the first level of management
if you look from the body's point of view
this is the construction of the Earth

when you start looking at the process
on the reverse line, i.e. you try to understand
like this sphere for example yes or the action of Love
relates to you
then you see yourself
i.e. you see how Love builds you
your physical body

and when you start thinking further

then it turns out that this is the idea itself
think and think further

this is the next person
which is in very close contact with you
at the level of Love

i.e. God created man with Love
and Love is the next person as well

it turns out that the unity of God is in action, yes
with a person
this is actually the creation of Love by man, among other things

i.e. a person is capable of creating
it is the feeling of Love
he is able to create the action of Love

and when you start to see this structure
Well as if, after all, I am again in an infinite distance from myself
then you see it quite closely

Well, if we just set such a schematic task
take and as if reveal or give the properties of Infinity
Love

i.e. for example, the mental front
constantly the information of Love
try to push it further away from yourself, yes

then you see that there is a certain level
which remains near you all the time
but there is a certain level
it's quite warm, that's even how it feels
which is almost always in one place
and you see that people in principle go through this level
they actually walk in Love in the information of Love

i.e. the information itself is Love
i.e. it is possible to detail and understand
that man, generally speaking, is in Love
and in the Love of God
i.e. you can see God's Love
how is external Love after all?

and here it turns out that we can clearly distinguish
where is God's Love
it's like an external Light of Love yes

love is endless but coming to you in the form of Light
and Love of your action
i.e. you can create Love
just concentrating control on everything

although it's not all that simple
because in Love there is external control
as if Light from external objects is like that
that the object itself is generally not visible

i.e. this is precisely the essence of the Love of your action
what do you get Love in information
but from which object does the control come?
it is not differentiated
because Love is always seen in its pure form
the source of love is often unclear ^{yes}
or in general ^{how is he} in general
at the level of the Spirit you perceive
but why is it the source that gives birth to Love
This
or it is not clear ^{how} in principle ^{yes} initially
or does it mean that this needs to be researched for a very long time
to understand, generally speaking, why some object of information
evokes Love ^{yes} or creates Love
from the fact that you relate to him
i.e. you perceive it

This is what I said that is not clear in principle at all
in fact, such phenomena do not exist
in Reality everything can be understood ^{yes}
it just has to be like this in the first level
so that it would be a completely autonomous concept
which exists by itself which is not explained

i.e. you thereby introduce control
that Love is the original existing Reality
which does not need any explanation ^{yes}
it is clear to you
why detail something that is generally clear

and it turns out that when you start
this mechanism ^{is} already in fact
^{how to use it} at the everyday level of management
then it turns out that you see how Love spreads
by management levels, and locally

and this is where the level arises
why do you like this or that information object
here's an example there is a bench, some shaded area
and the movement of your Love is visible
in relation to this object
where the light of Love lies
what level is this bench
and why do you like it

you remember, for example, childhood , yes, a similar picture
do you like this place for example Yes
because there is an association
association is a different time generally speaking
maybe the time of the future

and it turns out that in reality
the root of all phenomena is that
that the future is transformed through Love
projected in the form of material objects

so that we can
for example, managing future processes
make balanced harmonious
we need to see this transformation

i.e. building the future
it's actually like a platform , yes
which in Love looks like this
what if you want to take a step
you must build a platform based on Love
then as if Well, if you imagine a space suit there
First you put on, let 's say, the right boot and then the left one
and you start moving
but when you put on your right boot you only see your foot
i.e. this so-called boot and the outer shell
does not exist
again only you exist

so it turns out you exist in Love
exclusively in Love
any element of action in Love leads only to you
external information objects
when turning his gaze towards you
they become undifferentiated
no such boot
there are no boots, there is only you, who is really healthy
Here in action Love can always be seen

health priority

thus building the World with Love
you actually saw the light of Love
Well, having understood some patterns
after all, I have only spoken about a few
there may be more criteria
the laws of management in this area of management

and then you start to see
that when you give Love some Light yes

namely the Light of Love
that's what you call him

so what you called Love is Love
here the word actually turns into action

this is basically unique, often this is the only case
when words immediately turn into deeds
without external action

i.e. if I want to say that I planted a tree
I have to say first then plant yes
and here I said "Love" and the action happens immediately
it works because i said so
nothing more follows from this

and this action gives birth to external Reality

at the same time, Reality may already be detailed
i.e. if in the first case when I showed
that it is possible to bring out the sphere of Love
and for example a planet is being built
then if I said the word
I am building detailing
the word is detailing

and if we want, for example, to destroy the entire planet
by appearances yes
we must actually know
what word matches
as if in the form of Love of the planet actually

because if you listen to the word
then we can hear the rumbles of the planet
i.e. how does the planet speak to us yes For example

how the plant actually speaks to us , etc.
i.e. we can translate into the language of words

word-detail
this still works out from a logical point of view
it's just a fragmentation of the information system
and Perception instead of for example there is knowledge
we perceive with words

please listen to what they say
there are birds, animals, planets , things, etc.
you can just listen to the words if you have time

so when do you start to go into detail?
this structure
then it turns out that the word
this is also a universal contact mechanism
ordinary human word
through the word you can contact any system
at least there with a star

but for this you need to know where the word is contained in the star
and in general how it is actually transformed
into information of a universal type, so to speak Yes

so this transformation is again Love
but already the Love of God and you at the same time
to the word itself

for example, if you really love a word there is "Love" yes
the word "Love"
the action of Love arises
which is directed
as to you so to God
i.e. some third situation arises, let's say yes
some external world which is very distant
and which again has undefined properties

i.e. Love gives birth to a harmonious World
which is not defined at the moment
i.e. actually the future

and we got from the matter of the present yes
the future function in this case
just like any reaction, for example Yes

including nuclear reactions
it gives some future development of the process

so that the nuclear reaction is not dangerous
for a person
so that nuclear fission would not be dangerous for humans
it is necessary to do so that the development of the future
came again to the form of Love

i.e. it is necessary that the form of the event
corresponded to the form of Love

i.e. in principle there is, for example, there
progressive dynamic form of Love
which is perceived as Light or some shades of Light
but if we start to get the shape
or consider the form

then Love acquires the properties of a strict system
and understand right away that the person loves her , for example
it's quite difficult yes

i.e. there are many elements of external Reality
and at the same time say that the person there loves
a distant liner there
he's just a liner
this is where the phenomenon of rupture arises
between man
and external phenomenon

i.e. God loves man
but this does not mean that, for example, a person
must do do whatever he wants
he must live creatively

but if there is a liner sailing peacefully on the sea
he doesn't have one for example there are weapons there for destruction
then a feeling of Love may arise there for the beauty of the liner

if there is a weapon then it is a different form of control
and then we get the meaning of protection
why does the modern world have weapons
so there is for example an aggressive side yes

so here's how to make management
between Perception
i.e. well, to put it simply, the meaning is this

if you love the atomic bomb very much
it won't explode
this is roughly the logic behind the management in this case
but for this you need to love so much
so that there would be a boundary of a kind of abstract level of control

i.e. Love in this case is control in its purest form

i.e. when you work with objects of a non-creative type
then Love is in principle
Well as if, by and large, it is not different
maybe it's the other way around, meaning it has more of a meaning
such deep shades
because you need to know the structure of the bomb
you need to know all the events
and how to make sure this bomb doesn't explode

i.e. it turns out to be quite like that
load-bearing structure
where is Love

but only on Love
is it possible to actually withstand this structure?

only then there is no pressure on the human body
he works with Love and understands
that the bomb won't explode
not because he is there let's assume he unscrewed some nut
and because that's how things turned out and the bomb definitely doesn't
explode
there are no such events leading to an explosion

here you can participate in that management
in the social, there in the political, etc. in the global
so that this bomb would be launched into orbit somewhere
so that it never hits a person

why didn't you get in?
it is being restructured somehow there
or will be used as nuclear fuel, etc.
i.e. many control outputs of some destructive system

and when do you start to see
that you also work with this means of Love
then it is clear that the construction of the World is adequate
physical Reality
this is an action of Love

i.e. Love, in fact, in this case, one can say so
as if it replaces physical action

and here it becomes clear
that the most intensive control can be obtained
if you manage events
through the structure of Love
but in fact Love

then it turns out that you may not have to
Well For example there to call on the phone
so that the car arrives somewhere on time
it is enough to make management
and there won't be any traffic jams she'll arrive

i.e. there is a physical action
you can call, you can make an escort there for this car
or you can just do the action with Love
i.e. the correspondence of action in the action of Love
and for example in physical action
it can often happen that there is no difference

i.e. if we do for example
just control in optics let's assume Yes

some neutral impulse
then the difference is visible
there is an impulse
there is action
and there is some kind of control
or there the goal is at least somehow differentiated
in the optics of Perception

in this case for an external observer
action Love is often not recognized
this is natural control
the same as God does

it's just that God always does the general management
and in a particular case, if a person even does local management
then he still does the same action
as an action of God actually yes
precise action means
from the point of view of the logic of Infinite development

because any finite form
it leads to the localization of the action of Love

it turns out that Love is always
it is precisely the Infinite Action

and when you start to see
this is the level or status of Infinite Action
then it turns out that you see
that the creation of Love as such
generally speaking, an action accessible to a person

i.e. if we set the following task
we need to create the World with Love
but then first you need to create Love

and it turns out that the action of a person to create Love
this is the Light that it emits
Light coming from a person
this is Love in this case

i.e. that he perceived it for the first time
at your level of Perception
what he first perceived as Light
in general in the form of some action
this is love

so man is also an expression of God's Love
in principle to myself first of all by the way

and that's when God looks at it
management next
i.e. God loves Himself more when a person is happy
I'm happier

therefore and based on this
this is how a person is removed from the free development
this is the Will of God sent down by Love
already a man to God

i.e. a person becomes more free
and at the same time, as if closer to God
the more he loves God in this case

and then it turns out
this is the level of Love that he creates
Well as if by his own glow and his human body
it is often even the first impulse of human perception
this is love

this is exactly the very first property
which is perceived by a person as information
this is definitely a rule Love

i.e. a person
first level of information
always perceives Love

so it turns out that Love is Infinite
it can in principle be recreated by humans
in the form of, for example, a primary level, yes

then the selection of the object's characteristics
knowing this property of the external impulse of the primary
a fairly simple quantity

i.e. it is always possible to determine
what is behind the object
what are the action pictures
i.e. what is the object of the action

Well as if a man were to conceive

if it is a natural disaster

what will be there

won't there be some kind of collapse there if these are mountains yes

will there be an earthquake, etc.

i.e. elements of Reality
become very recognizable
as if not even simply recognizable
and they become very clear

but they become, in principle, recognizable, including

i.e. it turns out that in order for in this case
cure, for example, a disease
you just need to look, well let's say it this way
the so-called shell of Love
which is always in contact with health status
in some action

and this shell of Love is like some kind of external shell
which always accompanies any information objects
so it just shows
what does a person actually need to be healthy

i.e. the characteristic of Love does not show
not even what needs to be done

there in the form of some mechanical actions
and it shows what a person needs

and it is enough to concentrate only on this
and Love itself begins to level a person

i.e. when you look at a person's Love
there to himself
or the presence of Love in his level of Reality
Well, you activate and somehow motivate even Love
to the next action

i.e. Love behaves like a rational system
substance
i.e. it is enough for you as if from the side of an external observer
look at the problem
and Love begins to even out
By the way, you can do body plastic surgery this way
i.e. even change the shape there
restore organs shape of organs
to build up lost organs very harmoniously

You just have to go to control, for example, like this
that you actually all the time as if with your inner eye yes
in fact it is just Spiritual vision
look at the structure of Love near the organ
and Love begins to align the organ

and why does this happen?
because
first of all you have the same thing
there is a canonical system in the collective Consciousness
some Norma yes

and Love is universal
you just need to select the Perception faction
some difference
and you start rationing
i.e. you start to treat
just because you are looking at this place
and you know where exactly Love is, for example

i.e. control of external Reality is obtained
towards you
this is basically your internal action
it would seem ordinary yes

but you act with Love without calling it that
you're just watching
but in reality you are acting
a very concentrated form of Love

this is the universal Love of God
God's love for everyone is actually shown like this
that it is so concentrated, like this
Well something in Perception
its concentration is so great
what do you actually get in general Well, logically
a value that has no information content as such

well, some kind of magnitude of action
or the general value yes
expressed in action
and this is also the Action of God

and this value can be informed as you wish
i.e. it is enough for you at the level of Thinking
bring to health status
and you get health from another person for example

Well, you can also work on yourself
the difference will be that then you have to look at yourself
and here's what yes for example, look at yourself
Well, basically the same thing
you will see that you are no different from others

and the management methods you apply to others
why do i say that the more a person practices
all the better for him
he increases his skill all the time in management

here then the question arises
why just Love by itself

all the time it doesn't straighten out to the norm

in fact, she straightens out to the norm

but this is why God gives knowledge
yes to everyone
and in general it's the same
because every person should have status
namely Divine Eternal development

i.e. well he should be healthy
he must master the technology ^{there}
namely the Eternal Infinite development
he must know where it is
this knowledge system ^{yes} this control system

often it is very simple knowledge
for ^{example}, now I am giving knowledge, it is not complicated in essence
just need it
pay attention to something
at some point
and when you know this, control occurs

this is ^{basically} the whole difference
between just Thinking ^{there}
or control ^{yes} For example

and when you start moving this one
^{well} actually ^{it's like} a level
optical level of self love
you are already calming down and coming to a calm Norm of Love

i.e. made management ^{for example} they cured him ^{there}
or made the management in Infinite development
by the way, here is Love
make management in Infinite development
very simple because for Love
what is there Infinity
what is this here
it is basically one value

vector of Love in Infinity
here it is expressed at one level
this is God's Love
to you
and you love God in unconditional action

i.e. man essentially loves God
and refers to His Action as an action of teaching

in general, a priori, i.e. before experience
but not everyone differentiates
this is the action of Love

and when do you start
this is precisely the action of Love to differentiate
as an external quantity

as some kind of, let's say, intelligent substance

although in fact all phenomena of the World can be called
by the action of Reason and by reasonable actions
Well, there are concepts such as "universal Reason" and so on .
in this case this is the concept I am talking about
it is not connected with the concept of something like "Higher Mind"
or some other "mind"

in this case we are talking about
that there is universality
in the equality of objects of information before God

if a person has perceived some element himself
this element becomes equal

i.e. it is enough for a person to perceive something
before God
and man and element become equal

and this equality sign is obtained
also spreads Love
because only on Love
such a spread of Reality is possible

and therefore here is the construction of the World
this is Thinking through Love
This is a well-known axiom
in this case I simply brought it out
more like logical and in terms

and it turns out that when you start managing
Well, maybe not always and for everyone, yes, this axiom is clear
and why is it needed for example there to remember
then here you can
it is not necessary to remember exactly
it can be implemented technologically

i.e. it is enough to select the Love fraction
i.e. the glow of Love
in the form of an unconditional context of action

i.e. at Infinite distance
you perceive it simply as information
but on the Spiritual level
at body level

there is the Spirit
Consciousness
in general, concentration of one's entire personality
do you understand that this is Love
but at the same time you perceive it simply as a glow

that's the difference
between the concept i.e.
by what you understand
and what is the object of information in reality
i.e. what do you perceive and how

and then you can see very clearly
your whole system
Thinking
Perceptions
physical action

to see there in two hours in a hundred years
what will be the movement of your physical body, etc.

and when you start to see
what Thinking
physical body
your personality status
these are actually inseparable quantities
then it turns out that you understand
that the World is quite firmly structured

i.e. the personality of a person is so monolithic
what if something happens to a person
that's basically it
from God's point of view, this is actually nonsense
i.e. according to the level of Spiritual Perception

here is God having a human body
perceives this as complete nonsense
there is some problem with the person, for example Yes

and based on this it turns out that there is enough here
Well, as God says, it's very simple
here there is a small level of logical knowledge
there is simply information on everything
make it any creative

because the source is yes

Eternal Glow of Love
and then the information is actually knowledge
the person himself appoints
whatever he says is what he will perceive
this information yes

Well, this is the level that the future Reality depends on a person

and when we begin to see
that depends on each individual person
well, as if actually his level of Reality
then this level is that if one person saves the World
then the World, generally speaking, is saved

because he proves it before God
that he had learned this knowledge
and saved the world
then there is no problem
God shows how

Well how to do something further yes

in the concept of "Salvation" in fact
we are talking about the Eternal harmonious development there
and if there is a precedent where it is necessary
the word "Salvation" is used specifically
then it is used

but if we are talking about the need to act
for example at the level of Infinite development yes
that you just need to act harmoniously on everything
then when nothing threatens
then we are simply talking about Eternal development

and here is the structure of Eternal development
it is like a potential quantity
has an element of some kind of possible threat, yes
which may not exist

so here in the structure of Love
Salvation structure
i.e. the concept of an "external threat" of some "external action"
this structure is like it moves very far away
and often becomes weightless yes

For example, there are nuclear weapons
but the action is so remote that it won't explode
although there are many nuclear weapons

this is what the person himself does
he himself pushes back the structure
beyond their level of control
as if localizes the harmony of Love in the structure
that the world is not destroyed

i.e. man actually holds the World himself
although he himself created it
element there for example, yes to the nuclear destruction of the world
and now I myself am forced to concentrate more and more

i.e. it actually turns out
he should love more even logically now yes
he himself must concentrate the Will of Love
he must increase the management structure of Love
so that the World would more accurately hold together
in the control phase
there was no such global nuclear explosion

now the question arises
how to create logical solution in social systems
so that what was created in Love
Well, what did people create this for?
by some logical actions
the development of civilization there for example
nuclear weapons chemical bacteriological
there might be some kind of integrated weapon there
for global destruction

and now the question arises
how can one logically reach a political agreement there ?
to put it somewhere into orbit yes

well, from the point of view of the reflection of some hypothetical comet
one of the projects in which by the way I have been for quite a long time
working in TashKBM developed a platform
withdraw [...] to the existing platform
there are even calculation methods
withdraw all weapons

if theoretically some comet exists
then direct it only to her
in case of orientation to the Earth
use as fuel for reactors
and that's all

then there is nothing left on Earth
not a single means of global destruction

to put this project into action, for example
Well, from the point of view of this technology, yes
building the world with love
here it is enough to concentrate Love very strongly
in order for a political solution to emerge

i.e. it turns out to be a political decision in this case
this is such a concentration of Love
which overcomes the structure of destruction
further distancing
but already on a physical scale

why did i bring it out on the first level
namely a physical quantity
because the Law of Inference is exactly like that
removal but already on a physical scale
those. this means it turns out that this is a completely solvable project
logically all people will of course immediately vote "for"
no doubt yes if we make the referendum global

and it turns out that based on this
we see what Love actually means
gives Infinite precise there correct action of thought

here is the most important moment of today's lecture
i.e. if we learn yes
and as I said, you can learn in principle, even in an elementary way
having understood the structure of all these transitions of glows
in general, in principle, the approach itself

we will learn to think like this
that every action has a controlled level
next development
i.e. we will derive these Laws as I have shown now
one of the Laws

The law for example is this removal yes
from the sphere of primary action by Love

it turns out that it is absolutely clear that we can guarantee
that then the World is absolutely stable

i.e. any action of Thinking that leads
to the next already intensified action
expressed in the improvement of Reality
then there is no problem

By the way, this is the most powerful mechanism for healing a person, for
example Yes
tissue restoration there

solutions to some problems
related to man or to humanity as a whole

for this you just need to synchronize
your Thinking
with the action of Love

and it's better if you build it anyway
the structure of Love independently nevertheless
although this often seems paradoxical or difficult
or for example Well, that's the question
why build love there, it already exists

such a question can theoretically exist of course
but then how to understand
mechanism of development of existing formulas of Love

because in order to understand the World as a whole
i.e. the development of some element of Reality of something else altogether
it is necessary to at least model the management structure
well at least something similar
or understand the mechanism of the device of this system, etc.

Well let's assume there is a plane flying there
but before that birds were flying
in the end they figured it out
that there are some processes
that's exactly the development of aircraft

it turns out that it is necessary well how to build
at a similar level
it was not necessarily a bird that could be used to launch a boomerang, etc.

and it turns out that when we want
to know something like this
and the World is built by the Love of God
then we must still form Love
to highlight in your Consciousness

in relation to an external object
to correctly know the external Reality
how aggressive or non-aggressive is she

so there is a property of Reality
be absolutely non-aggressive
depending on which side you enter the control from

if we highlight that form of Love
when the external element is non-aggressive
then we build a non-aggressive Reality

i.e. often our construction consists of
that we just choose the right position yes
and we move along this position

in some cases we choose
maybe some kind of confrontation or some tough actions
but then we must understand
why are we doing this

i.e. the concepts are so rigid
what could it be that they don't bring
there will be some negative consequences
as a rule, we are talking about that
what can a person perceive as a harsh action
but there are no negative consequences
for other parties
if he acts with Love at this point

i.e. he acts in principle with confidence and specificity
Well, let's say nuclear weapons can't be detonated, that's clear.
i.e. from the enemy's point of view this is a harsh action

but when the action is produced by Love
then the supporters of nuclear weapons
there are no problems with this
they have advantages on the contrary
Right
it gives some of the following knowledge
that allow people to be saved
which for example there somehow they initiated or are developing
this is a nuclear weapon

and it turns out that based on this we can clearly say
that any well as if a dangerous potential object
can be taken under control

even if in principled actions
you act ^{there} with the sphere of Love, the line of Love
and yet you still build it yourself

why do i say that you need to be able to build
this glow of Love is still independent

i.e. how do you know that you built it at all?
this system of the glow of Love

you need to clearly define
that you built this glow yourself
i.e. this knowledge is actually about you

you know it's yours you know you built it
and this is how you built it
By the way, this is a question from a completely different area
in this control system

because Love is again in construction
in fact, she is like this
what can you say yes here you built
because you saw the glow
which generally speaking exists
but this is your glow of Love

so that's when God created the world
and at the same time he created you
often even before the creation of the elements of the World
then it turns out that this is that form
on which your Consciousness was actually based
you meet yourself at an earlier level of development
where the world was absolutely controlled
from God's point of view

and it turns out that from here it is clear
that the Love you built
This is essentially a divine act
towards you
this is your path in essence
you look at your path and see that it is the path of Love

then it turns out that you ^{well} as if you are not doing anything, ^{yes}
i.e. God is in one place
He controls the whole of Reality.
but he doesn't specifically tighten nuts or wind up the wind, ^{right ?}

i.e. this state is exactly as if it is that level
which God does for everyone
but He also gives universal knowledge to Himself
who are equal to Him as well as to everyone else

and that's when we catch this action, i.e. we understand
what is this what does this element look like
we understand that God is the same personality of a person
just as the individual in general has the power and in general the right
and what's more, he will definitely learn
Action of God
any personality

i.e. from the point of view of personality
there are no real barriers
for precisely Infinite development

Infinite knowledge
and this field of Love begins to open up
the grass begins to bloom there on that Earth
which was originally built
fill with water because it is a form of Love
but already expressed in relation to you
in approximate form

how to touch love
well, take water with your hand for example , etc. yes

i.e. a person should not just love
he must feel love
the first action of the physical body
action with water
why so much water

translate for example into the structure of Love
and you will get that in each ton there are thousands of tons of water
or in very large quantities
there is one small, as it were, crystal of Consciousness
which holds all the water because this crystal
there is your love for water for example

i.e. your Love for some element of the World
exists objectively and independently of you by the way
Well, of course she's not entirely independent.
but you can just find it
in this element

and you can see why Love
Such huge masses of water can be held
just one spark of Love

and because initially she was alone
this is this spark
i.e. one light is united ^{yes}
it is ^{as if} small but at the same time universal

it's clear why everything in the world is connected
and the Micro level is connected to the Macro level
because Love has no levels of transition
in the human consciousness
Consciousness can manifest any control systems
into any Reality
control any Reality
because this substance itself
this is love
the substance of Consciousness, if one can put it that way

and it turns out that this Consciousness
Well for example, I enter this wording
let's say we want to consider
such a concept as "the substance of Consciousness"
here we define what is Love

and from here we start moving
in a more general sense it is of course understandable
that everything is expressed in Love
but in Consciousness it is Love itself

i.e. the measure of Love is an element of the external World
and in order to understand ^{what} the access criteria are
we need to make the element of the external world comparable

i.e. a small element of Consciousness
must match
to the great element of the World ^{there is the ocean} ^{yes}
to understand that the ocean exists
or somehow perceive it
it is necessary to somehow translate it into Consciousness and to realize it
somehow

so the human body is designed like this
what is this element
and Perceptions

and awareness

i.e. this is a very flexible level in general
in fact, the Actions of God

i.e. it is an element of generally speaking continuous knowledge
and complete knowledge, precise knowledge
as if deep intellectual knowledge can be called so

i.e. a very deep level of the Mind yes
is located in the body
or matches the body

in fact the body is
and the expression of the Mind at this level of Perception
and by the way, the Mind of God is also included

and when you start to see it
you understand that then of course the world is controllable
human body
and external Reality
these are similar systems
from the point of view of the development of Love into Infinity

that's why a person always sees Love
as if in the Infinite level
i.e. far from yourself yes
and strives for Love all the time

aspiration because he is on the path to Love
he just sees the way
which is also Love
that's why it creates the feeling
that he always strives for Love
although he is already in it for real

but he is in Love which he himself built, among other things
but strives for the one that is
element of the new event

and when you start to see
structure of the new event
then you get the presence of these spheres of the future
are some static elements there for example yes absolutely static
i.e. which do not change at all absolutely
the so-called future

and you see then you are already confident
in that you will definitely achieve
some level of management
this level is necessarily carried out
for example, I know for sure that there will be no global destruction
Of course, this requires some more work
but it still won't be there

then the question arises ^{yes}
why work so hard
but the thing is that we think logically
and there are still threats of destruction ^{there,} such as nuclear ones
and they generally have a probability of triggering
the concept of "probabilistically" makes you work quickly
in general this is just a normal adequate reaction

i.e. we do everything we can , but it doesn't matter
although we, ^{for example,} know for sure that there will be no global destruction
and
but my goal now is to show that local destruction
shouldn't be either
then we'll have to work it turns out
Well, maybe it's not so stressful, let's say, but still a lot
or faster, ^{yes,} to enlighten everyone faster

and it turns out that then
this is precisely the level of ^{external} control
well, there ^{are} some enemies ^{there} For example
some kind of resistance systems of one kind or another
it is not necessarily expressed in the first impulse
that this is precisely some kind of aggressive system, etc.

these systems are moving to a controlled plan
even if they are very aggressive there
^{there} for example, nuclear weapons will definitely not explode, etc., etc.

if you see
that the continuation of Love of space ^{let's say} near the body
so there is a level of Love
and ^{for example} this level near the body
so if this space is a continuation
is your sustainable future
which is naturally stable

if you even took it in

in this case, Perception is enough
this is already a sustainable future

if in something it starts well as if it were not convenient for you
you can see right away what it is
immediately instantly
i.e. this is a powerful level of selection
as if some possibly negative event
and regulation then
either logical or control methods yes

well, logically, if there is some kind of collapse somewhere there
on the mountain top
and you see that there is no point in climbing this peak at all
at the moment
logical method yes

then it's management if you really need to get involved there
then at least strengthen the controls first and get through

so here too it turns out that we are closing the system in this way
It's not necessarily a mountain peak, of course, but it's clear that it's a peak
it can be any system
everyone understands this perfectly well
any system is personal, there is a criterion, event, etc.

and even if it scrolls 10 times yes
there for example, after 10 years, an event starts to spin around in your mind
it means that this event is spinning in front of you for some reason

and pay attention that this very thing is like a spinner , yes
Well like a plate carrier on which it rotates
this is love

i.e. information of Salvation information of overcoming
comes through Love
why events become harmless
because there is an intermediate environment

and accordingly what is there Well let's assume there spend time there
or be very afraid of some situation
better
or waste time worrying
it's better to do management all the time yes

and a certain level of calm arises
which will definitely lead you to the goal of Macrosalvation
there is a personal level
well, Norms or Salvation

and it turns out that in essence the person is
in very hard in very autonomous inaccessible
that's essentially inaccessible
for external negative influence
some system

in the system in principle of its own Consciousness
that's exactly the level of Consciousness
it means where a person understands what Love is
and how does Love work at all
it is in the construction of the World

and then you just have to be there by the way
at this level at least there are a few seconds
you gain a very powerful stability there
for your projects
from the point of view of health restoration, yes
healing yourself and others even
who are just nearby at this moment

i.e. at this moment it is enough to enter
to a stable level
and everyone is healthy all around
you don't have to have someone there often
to be treated there specifically
or highlight some negative statuses
in order to restore them
people heal themselves, for example

and this, well, maybe from the outside it is perceived
like some kind of glow
or there may be some kind of field that differentiates
in fact, this is how I show it in this system
this is the spread of your Love
into the structure of the external world
where do you transfer knowledge in general

you know
a person sees it
all people are great at the management level
let's say this management actually sees

they just see
and this knowledge is simply taken
that's all

i.e. if there is a carpenter chopping something or doing something there
another person can see and do
that's all, the mechanism is very simple

it is enough for you to know
others already know
because they can watch

and moreover because they are here at all
in the same system here and
or well, it doesn't matter what you got on the train and went
and on the train there are also people, they travel with you
that's all
they may not even necessarily be aware of it
or concentrate there etc. yes

this train is kind of unique, yes
platform
everything that is created in front of the train
this is the universal Love of God

that's if we want to understand
and where is this Universal Love anyway?
show us this segment

then it turns out to be Universal Love
this is where we see at the same time
and development
and building the World
here comes the train and here is what is happening at this moment
in front of him there appears at one point yes

but we understand that this is a carrier level
i.e. we don't need to watch these rails unwind there
suddenly appear
we can see some distant world there
there is the periphery

but in this place it is Universal Love
this is love well as if it were very concentrated
in fact, we understand that it gives birth to Reality

For example yes before this train

but we don't necessarily have to understand it logically there
watch how these rails are built
and here is where the transition is very important

if we see here how Reality is built
and it's very easy to see
then we can turn all the processes back on
related to the construction of nuclear weapons
Well, of course they won't look like there are nuclear weapons there.
there it becomes , for example well, something else
then a political decision arises
we are putting it into orbit
we make the world safe and sustainable

i.e. it's enough to look
where is the Universal Love of God
builds our physical Reality
and in the same way, how does it happen at the same time
Well For example there is human action

therefore in this management
try when building
its management system
With love
to see precisely the Universal Love of God
and when docking, get the strongest possible control
and at any level of tasks
often this control is instantaneous

Thank you very much for your attention

This concludes today's seminar.
