

GRIGORY GRABOVOY
The Teaching about God
Mind Control
27.04.2005

Hello again
the topic of my seminar today
This is my Teaching about God
Mind Control

in this topic i show
how can one control both through Consciousness
i.e. directly the mechanisms of control of Consciousness
in the optical range primarily

and also the management of Consciousness as such
i.e. development of the functions of Consciousness
detailing
deepening of consciousness
to the level of some search engines
or any private definitions, etc.

i.e. detailing for the purpose of developing Consciousness
actually to the required level
to achieve the management objective

and that's why when I show this topic
as a topic of management
what is needed is a phase or fraction of Consciousness
highlight
in the form of an optical quantity immediately

i.e. when we talk about Consciousness
we have to see well for example the sphere of Consciousness
or so to say the spatial coordinate of Consciousness
what we are looking at in space
Consciousness

because there are specific management features
when Consciousness is considered
as a crossing system
with Spiritual level of control
and the level is already the optical level of Consciousness

i.e. Consciousness is visualized as a quantity
which is recognized by Spiritual action

this method is actually a different type of management
there is more control through the Spiritual sphere

i.e. the Spirit aware of Consciousness

in this topic which is now

this is the management of the structure of Consciousness as such

i.e. precisely this information

so the first task

the selection of precisely the information of Consciousness
is the Consciousness of action

i.e. for example how God works

to organize the structure of Consciousness in Myself, for example

He sets the task primarily of differentiation

where is the Action of the Soul of God

and where is there, for example, something like this

flow of information into the structure of Consciousness

this is what Consciousness is for God in general

if you put the task like this

it turns out that He must create a system

similar to what a person has in the first place

because by the sign of Similarity

He must consider the action of human Consciousness.

and already based on the action, build your system

i.e. the difference of the Consciousness of God is that

that It is always active

precisely dynamic

The Light of God Consciousness is always light

Well For example there is some kind of silvery-white bright light

which is actually recognizable by a person

as an action

and when we start working with Consciousness

in terms of the development of the structure of Consciousness

then all you need to do here is just this

so that the Action of God which means happens

in relation to your process

following yes For example
or some action
or simply self-perception of self-perception

God's action must be
not necessarily one to one synchronous
and it should be like this
that your personal action of your Consciousness
this is the value that organizes the World
according to those Laws I mean which you understand

that's what's special about the management here
what you should definitely
the thread of understanding the Laws of the World for example
hold like a thread well as if having
sufficiently deep systems of interaction
you
with information there of the past future

and be able to reveal these systems in this way
so that the earlier control systems that you had were implemented as systems
which you are currently deciding

i.e. when you open
the function of developing one's Consciousness
you have to solve all the earlier problems
and this is the development of the future management structure

here by analogy with how God does it
He has no concept of past or future
He works in the control system all the time.
just a substance, as it were yes Reality

it turns out that in order to determine the context
what is human consciousness in general
for example, for a person
we need to consider the optics of the action
for the past as well as for the future

when the vector is equivalent
here we act with Consciousness
i.e. through Consciousness

if the vector is not equivalent
it can be either a Spiritual action
there the optical magnitude is more sparse

and more fragments of control are moving into the future
or the action of the Soul
there in general, in principle, to a greater extent
the timeless aspect of the action works

i.e. the time interval is reduced
and Consciousness fraction of Consciousness
is captured as a reduction in time
this is when the action of the Soul approaches
time is shortening for Consciousness

and let us suppose that

Well there a person can prepare for exams faster yes For example
some event happened faster

there is an aspect of time acceleration
due to the approach of the fragment of the Soul
to the central level of Consciousness
precisely to the central one
here it is important to highlight in Consciousness
another kind of unique center

Well for example, there is a sphere of Consciousness
as soon as you approach her
another fragment of Consciousness
i.e. you work only with Consciousness
the sphere begins to blur, i.e. to go into Infinity

why for example the Law

Infinite development Infinite life

This is a Law, generally speaking, fully realized by man
in essence

because when approaching
one fragment of Consciousness to another
the other turns into an Infinite quantity
this is the Law of Consciousness development by the way

and to obtain a private value in management

For example there to cure a person from some disease

you just need to display the disease status on everything
due to the fact that it means a healthy level

Well how to implement Infinite view

so if we take a fragment of our Consciousness

in the form of ^{some} kind of photon
and near the body we move just the thought actually

if we find the right point
then we can derive an unfavorable structure

because we can hit the nail on the head
which realizes the Infinite magnitude throughout the body
and therefore health ^{at least}

and it turns out that when we look at it this way
By the way, you can consider this
as a healing type technology
and it is quite universal

finding such points is actually not difficult
in people especially in childhood
it happens ^{as if} automatically
they usually perceive it in ^{management}
quite a lot of generalized information
and these points are found and restored ^{yes}

for example, there ^{so} that a person could grow
from the point of view of the structure of Consciousness
he must constantly expand the phase of Consciousness
perceiving oneself as being of greater stature

it turns out to be a load system
he is a person who is growing constantly working with Consciousness

the same thing translation into action into some kind of business
also work with Consciousness
but no longer in relation to the body

because if we consider the action
then in relation to the body the work is perceived
as a complex, holistic and fairly unambiguous work
a person grows ^{for example} Yes

and if we want to understand the same way as God does
It turns out that he actually raised himself
due to its structure of Consciousness
He doesn't use external quantity.

and if we take apart this structure

Human consciousness
it turns out that a person also has such an area
which simply increases it
and this means that the phase of Consciousness is constantly expanding

at some level it expands literally mechanically
so this is what this extension is defined as
due to body growth

when we start to consider
the structure of this growth
we also see that there are aspects there
some such nodal points
well they look like dynamic dots
like some ticks, so to speak, written with a pen, yes
Means something or there with a graphite pencil

they look exactly like this
that when approaching from afar
gray color can be seen
and if we get closer
then the white Infinite color begins

grayscale translation function
into the Endless Well as if a clear value, so to speak

also a fairly important fragment of Consciousness
namely the growing Consciousness
where development is perceived
as a fixed system

for example, to cure some disease
where is the Norm of Events
we need a development system
consider well in the same context
that we can always get the required spectrum of events

i.e. we can consider the spectral level of events
like some stripes of light
and if you perceive this light
at one level there is enough clear glow
there must be a structure of clarity
then we get, for example, clear Consciousness, yes
there is a clairvoyant Consciousness
or expanded-clear Consciousness
Well For example there is a controlling clairvoyance

Consciousness ceases to differ from external Reality

the clearer and more transparent the Consciousness
well, like a kind of lens, so to speak
the more accurately you intersect with the structure of the external
for example in physical Reality

by and large it's clairvoyance here
namely, controlling clairvoyance
which evens things out for the better
this is very well like a super-transparent lens
that's how one can put it
in the optics of Consciousness
which can practically bring events closer there
to the level of sticking of the event itself
to the lens itself
God doesn't have a lens
He has any tool
it is He Himself and His personal Action

and so when we look at
well, some kind of peculiar lens
as a projection function of Consciousness
then the approximation is the same work
as God does
It brings one element to another.
and this element ceases to be different

for example, this is why a person looks like
precisely created by God in the Image and Likeness
similar , for example , physically, yes
the body is the same as God's
in a person

i.e. it turns out that here is precisely the function
well, some kind of combination of information

i.e. when it looks like some kind of sticking
i.e. it is visible where there is a person and where God is
at the level, precisely the central level, by the way, here
development of Consciousness

Consciousness possessing different functions
in the center
there is a development center

there is a center of mass of Consciousness or volume of Consciousness
there is a level of universal Consciousness for example
or is awareness already a different value

i.e. this is when we work with the system of Consciousness
this is how we define it anyway
that's the area we see

and it turns out that when we want to consider
how did god get the first level
there in the form of Himself, for example Yes

then it turns out that there is detailing
i.e. Infinite development of God's Consciousness
that's the point
that any other person has the opportunity
develop your own Consciousness Infinitely
then it turns out that God's direct task is realized

Well, here's what's interesting
God's task arises
which is a task for Himself

i.e. He created it as a task
because He could create not as a task
and for example, as a certain fixed value means

and this is what happens when we look at Consciousness
then there is closeness in approaches yes
with what God does
It is precisely in the fact that God specifically set the task
the spread of Consciousness in fact and the development of Consciousness
in terms of spreading God Consciousness
for example, on the universal Reality there

it turns out that when we
through the structure of, for example, universal Reality
we enter the system of collective Consciousness
for example, here is the connection
in action for example God Consciousness
and when a person reacts to the Consciousness of God
he sees some fragment

in the collective Consciousness
we see a very clearly identified value

where is the person who perceives the Consciousness of God
creates an autonomous level of Consciousness
actually in a collective sense

i.e. here it turns out that we can very clearly identify
in the structure of collective Consciousness
actions of specific people

this is also one of the characteristics of the action
means through Consciousness
in the control system
development of Consciousness
management of personal Consciousness

i.e. in fact, Consciousness can be
so developed so controlled
as much as you need it

virtually no restrictions
a person does not have the means to work with Consciousness

i.e. he can be distracted
with some tasks or problems
but nevertheless the status of the Eternal physical body
exactly the real status
allows you to always see
that Consciousness is always controlled to such an extent
how much does a person need it

and we can determine
what is the structure of interaction
Consciousness
and a person
and the series of events
it is always defined by a very precise position

i.e. what a person needs in general
for a person to be realized
in terms of well as if there were more strategic events in life

i.e. Consciousness of interaction
Well let's say with the Reality system
more determines the dynamics of human actions
but from the point of view, as I said, of strategic events

although the prognostic system

more developed in the structure of the human Soul

nevertheless, the Soul almost continuously determines
the whole path of development
from ^{there} the current time to the future and to the past
but Consciousness is precisely a strategic plan

and it turns out that when we start to implement
It would seem that this is enough
^{well} often a multi-contact quantity like Consciousness
i.e. it is information that constantly interacts
with many other areas

and here is precisely the strategic plan
this is what a person has to do a lot of work
before he ^{well} ^{there} will be something implemented in the future ^{yes}

i.e. he perceives it through Consciousness
how sometimes such a rather capacious work

but for God to create the concept of "work" at all ^{yes}
He needed to create some kind of model.
which one ^{well} how would you characterize the state of work

because if God does something
He may call it work, he may not call it work.
He needs to create this phenomenon again.
which is called in human Perception
for example, **work**

and it turns out that when we start looking forward
and ^{for example} there is a certain ^{well} a person can get tired
fatigue from work

and we begin to think that this is a phenomenon
why was it created
i.e. why would a person get tired, ^{for example?}

^{so} based on this we begin to see
that this is the task of collecting information
this is the task of actually interacting with information

if there is an element of fatigue
it means there was some action, ^{for example} Yes

Well, maybe it's so that there was no action

the man was watching some light show
but nevertheless he got tired for example

it means he might just be tired
from some thoughts, from one thought, etc.

and here is the action array
some information some interaction
this is the criterion of interaction

here from the point of view of abstract systems of Perception
fatigue i.e. sensory level
it's just what happened
some movement some information processing
some kind of information shift

and here's to avoid fatigue
you can simply not accept the array
do not take on

for example in the rejuvenation system
if you go through large arrays
then you can not call the action, for example, some kind of work
it may even be a complex action

and pass between arrays
only due to external perception
through the function of Consciousness

i.e. to be aware
what arrays you will encounter in advance
when you are aware of arrays in advance
that you will have to overcome
you then get less tired or don't get tired

and it turns out if we start
from the point of view of Consciousness to perceive
why did God create this or that system of human perception

then just as I showed by analogy with that
what fatigue
it's just processing some information
this is interaction
it's some kind of diagnostic system
which characterizes the amount of information
from the point of view of previous experience

but often a person has to decide
much more in terms of the Macrosystem
for example , he doesn't have time to get tired
because maybe I didn't pay attention
and did a colossal job

and from the point of view of action
any human action
just like God does
it is quite equivalent

The Macro level is going on all the time
a must for any person
Well, it 's just that not everyone accepts it, right?
who doesn't do this
they think that a private action is taking place

but in the system of common connections
anyway, the person acts
to some Macroregulation center

and it turns out that any of his actions
basically has the same system
Well, is there no reverse action?
what does he actually do as a person or what does he not do
level well let's say there are fatigue loads
it is actually always the same

and that's when we start to analyze
this component is, as it were, in management

by the way, this decision means a lot to many people
well, management technologies, perhaps ?
where there are systems for healing almost all diseases

where are the overload phases
are being evaluated
precisely from the point of view of information processing

i.e. considering the disease
as a system of precisely the lack of stabilization
when Perception here is this load some and some information
perceives as a quantity that modifies
tissue or information structure

then we can trace it very clearly
even consider some kind of such map
an optical map that clearly characterizes
that there are enough areas there, well, comparable
there with the concept of "fatigue" or "information processing"
these areas are dispersed
and the person comes to Norm

it turns out that for the structure of Eternal development
it is necessary for a person to be able to regulate
as soon as possible if possible
so maybe even this knowledge
should be often before a person is born

when he must understand very clearly
as in the information system
here he is born a man or there before birth
so the system of perception is like this
that this is some very concentrated light at first yes
and even when he is born he sees the light

and now he must find a very precise coordinate
where in this world generally speaking where in this mass of light
he must therefore bring it out
Well For example there is a Spiritual position of management
i.e. where he should consider his own Spirit

after all, the first level is usually Spiritual
this is super speed
and only then is the element of interaction carried out
with the Consciousness faction

and it turns out that the person immediately gets into
into the system of management tasks

in the structure of already Consciousness

because the more accurately it fits in Consciousness
to the structure of light
example , it will be it's healthier there
or if he is healthy then he has more favorable
there will be events around it, etc.
some policy of beneficial action

because in fact near newborn children
there is always a special, very enhanced policy

Well as if which event line
actually defines it more favorably
than that of an ordinary person

Well For example there after a year already
when you are already more than a year old
there the load is already changing more
is translated into the Perception system

and it turns out that here if we begin to see
the shift going ?
this vector of interaction of the structure of Consciousness

then we can consider it in advance
one of the positions, for example, the position of the Soul
what was there before the conception of man

The soul was originally created by God
naturally navigates the world
as a level, in fact, the same work in a certain space
where are there light-optical lines and Perceptions

so the difference is that before conception
The soul reacts and creates light on its own

it means after conception when the Soul is already determined and with the body
it turns out that more arises there
collective level of management
i.e. collective light
we start to see other people yes
then we start interacting

and it turns out
that although the Soul already sees at its own level
at the level of non-contact before conception

Here we need to distinguish, by the way
the level of the Soul of a person who was not born
this is a Soul of another type of person who will live
i.e. it is the Soul that is originally
does not have a limiting factor in body development

for example there are Souls of the Departed yes
but this is a different type of management
it's a completely different structure
related to the history of tissue development

so and by the way why is still clear
what from the point of view of logic
a person can always have a normal physical body
because the Soul is precisely the information of the body
always has an unchanging context

i.e. specifically one area of the Soul
which, by the way, is characterized to a greater extent
as a realm of manifested Consciousness
from other people's point of view

this level is the level
which corresponds completely
the physical body of a person

and if, for example, before conception this fragment exists
at the moment of conception when a person lives
he is always the same

then it turns out that logically if this form does not change
and know where it is
the body becomes Eternal

and in principle how to find it
from time to time it is quite possible even
for the structure of there health improvement
you just need to consider the Soul of the person there
your own Soul
as a structure that defines
for example, the development of the physical body
through your personal Consciousness

The soul can be like a level acting
on you yes
but which you do not visualize with the Spirit

because the Spirit is the next dimension
this is how the derivative of the Soul actually is

and if we see action
but we don't know the initial principle
how is the whole world structured
from the point of view of this, it's like yes level

there is always some initial action, as it were
and where does it start?
who pumps this ? Where does this pump even exist?
this this Reality and where does it even move from
People don't always think about it

and it turns out that if we fix this position
all that means we have well as if in automatic mode
Eternal development or something?
what all people have generally speaking

why do i say that technologies of Eternal development
these are fairly simple organically embedded
even in the human body technology

there is nothing new in logic there
for example when I describe a system
I just describe it often

i.e. well in some cases I enter
I do management, I create areas
which are becoming more well what about fast technologies
development is underway

and generally speaking often it's just been a long time
exists from the beginning
since the initial organization of the human body
it exists in man

and here are the areas of intersection
where is the Eternal development
i.e. the structure of Consciousness that determines Eternal development
and Infinite development of the Soul Infinite status of the Soul
in the human body it is always the same point

the only thing is that it periodically appears on the human body
moves
sometimes it is located near the body, near the skin
but she never moves there
Well let's assume there are more than five meters
from a person
i.e. it is constantly located
near the physical body of a person or inside

so as a rule this is the level
somewhere corresponding to the level under the human skin

if you think about it
how does a person react for example
it means that there is skin, for example Yes
and under the skin there are some internal organs

there is some kind of internal connector here
some kind of glow of a different type yes
skin determines the condition of not only the difference
well, that is, some kind of protective system
in relation to the outside world

but the skin also determines the joint
with the internal system of a person
with internal organs

and here is the internal position
this is light coming from a certain subcutaneous layer

then this point starts to grow it starts to move
and by the way, the human regeneration system is based
on the movement of this area of information of this faction
it looks like a glowing point
In principle, it is possible to grow organs through it

then you just need to know, well, by the type of acupuncture it means
where to display it in the structure of Perception
this point

i.e. it just needs to be moved there according to a certain scheme
the scheme turns out to be very simple
she's just there for everyone
projection system of the whole organism
to a specific organ

even by the way of a mechanical type
i.e. you can look at the organism from above , for example
on the projection of this organ
see which areas are shaded
if for example there was strong lighting of all organs
and draw the main concentrations

that's where there is more concentration
more body mass yes
a period is put and that's it

this is done by such a person due to his experience there
in some way it may even be empirical
or maybe it's even possible to do it
through the empirics of external Perception
i.e. to be able to even work with sound

for example, if we want to work and find a point yes
but we need to mean Well for example, exactly yes, there by trial and error

if we take a word for example we use
the word that is created in that case
if we know the technology of creating organs
or a person yes For example there at all

if for example "N" the letter "N" yes
and then we have the letter "Pi"
well "Pi" is just something you can perceive it as
like some irrational number

means irrational number
this is where there is no specific boundary

there is no such thing as absolute accuracy, but it works out

if we consider the position
precisely the empirical level of management
then our control occurs more precisely through this word

if we say "structures of the experiential path" there
i.e. well, you can't conduct an experiment in management
must be done immediately
and the experienced path is
either accumulated experience or experience of action

but in experience there is the letter "O"
i.e. this is what corresponds to zero yes
i.e. the primary stop of action

so when you work
at the level of cultivation, it means tissue
Be sure to be careful with your words

here in the structure of management through Consciousness
this is of fundamental importance
and how the words are pronounced

i.e. how they are displayed how they are displayed

for example "Pi" is a fast sound

and it is like a discontinuous type , i.e. a discrete type, etc.

i.e. it is necessary, if possible, to even work with sound, speech, etc.

and when you start to consider for example
that the function of Consciousness is in detailing
has quite a lot of those coordinates in general
which are already clear

i.e. it is clear that the number "Pi" is an imprecise value
any person knows
so working through exactly this value
we can make any action precise
i.e. any of our actions will not be wrong

but in terms of management it means
if you need to grow an organ there or just improve its health
where you need to even restore the cell exactly
often here is a system of approaching action
this is a very important coordinate

and here is the following axiom in action
precisely the central level of Consciousness
so personal
let's say the universal Consciousness of a specific person

that the approach to the system of the center of Consciousness
there must always be an exact value

those. the person is very clearly aware
your own Consciousness
when he controls it perfectly correctly
path of approach
he knows that he hit the target exactly and controls

i.e. on target
in fact, the goal in this case is
center of personal consciousness
when you get to this center
then the events of the World become more stable
or absolutely stable

i.e. a fairly bright light appears

there's this ^{silvery} -white glow there
which characterizes ^{in general}
often even on a physical level
how does the glow structure arise
visible in some cases

and to compensate for it ^{yes}
it wouldn't be noticeable ^{or something}
so as not to distract other people's attention

here it is necessary even at work
with the central area of Consciousness
it is necessary to do so
so that this glow would be ^{more} uniform
^{as if} to reflect on the inner walls of the sphere of Consciousness
already ^{as if in} the investigative sphere

it turns out that you build the investigative sphere yourself
i.e. to balance the central light
you built a sphere
i.e. you have built a series of events

and here you can see it very clearly
why some particular event
is happening near you

i.e. not even in that sense
that it was you who organized everything

here in the system of Consciousness
it is still more of an investigative management system

but here's exactly why it happens
from the point of view of the logic of the primary ^{there is a} primary connection
from where the event grows ^{as if}
and the systems of the primary growth of this event

are very clearly shown here
these are the systems of controlling clairvoyance
where you can see the people who are participating
in management
and i.e. they can be either opponents or comrades
as a rule, systems appear first
who resist

i.e. management analysis in that
that those who help
they already help, this is uniform light

the whole world is arranged on the level of a positive plan
God helps
He ^{well} He doesn't always show himself to people ^{there}
in Physical ^{and} Appearance
He can't always walk there and shake hands
with everyone
i.e. here it turns out
what exactly is light acting naturally
is a natural level

what is good is natural
Eternal development is built
at the natural level of control
and this light is immediately universal

i.e. the norm is universal

but here is precisely the structure of some resistance
this is the primary level that looks like
precisely as a system of resistance
some people there ^{for example} or one person

but when you start looking further
^{for example why}
then as a rule he asks for something, ^{for example,} some kind of help

and not all those asking for help
are putting up resistance

many help on the contrary the main amount
there, out of a million, maybe one resists
thinking he was resisting
in fact, it's still the same in the grand scheme of things
asks for help

on it anyway
by the way ^{well} in general at that level
that when we look at the structure, ^{as it were}
acting ^{as if} from above ^{yes}
then we get the path of action

i.e. we get ^{as if}

and external Perception
and a dynamic system
i.e. he still turns through God, yes

if any person has direct access to God
so if he resists and thinks
that he is ^{some} kind of criminal
then it still has circulation structures somewhere
on Macro-creation

this is when we begin
this level ^{well} how to extend to this plan
the person is clear that he will not be dangerous
not even necessarily a person
there any event will not be dangerous

i.e. I have now shown the structures of expansion of Consciousness
to the level of safety of action, ^{well}, any action

and here you can see by the way
that the action of your own Consciousness
it is always absolutely safe
in the structure exactly ^{well} any norms yes

and if, ^{for example}, a task is set by ^{some people}
who can set tasks of destruction ^{there}
negative development plan
then we see that the function of Consciousness begins to narrow

i.e. this is not a natural level of Consciousness
it's ^{like} an external Consciousness
Consciousness ^{as if of} other people

and the more destructive systems
the more fragments of external control
for this purpose ^{yes}
another Consciousness another faction of Consciousness

i.e. a more monolithic Consciousness
absolutely monolithic is absolutely ^{not} like a good level ^{yes}
this is a level ^{of} absolute kindness

after all, the Consciousness of God that does Macro-creation
this is also a completely monolithic level
and one of them

this is the difference of God Consciousness
and in principle, proximity to human Consciousness
exactly the person who does good

and it turns out that at the level of Infinite action
there in general often in action in the very
often the difference is not even visible visually through optics

i.e. it turns out that everything is possible
with spiritual knowledge there is clairvoyance
where God acts
and where does a person act?
if a person acts correctly

and after all, God's task is
no differences in investigative systems
i.e. God must teach man for Eternal development
particulars i.e. subtle systems of Consciousness
which, for example, exist in humans
Well let's assume as Consciousness of private action

those. a person needs to be there
Well let's assume there smart or somehow educated
or widely developed in some issues
there are technical or any other

he can take for example from the point of view of this
to highlight some area in management
let's say detail it to the level of the primary signal
and get all the information at once first
then you will definitely get everything that concerns
this area
but already at an exhaustive level

and here, pay attention that, in general, any person
who even briefly studies some volume
it's still at the root level
in the structure of the fundamental value of this concept

i.e. if a student studies the subject fluently
he is forced on the Spiritual level
somehow we still have to find the fundamental structure

otherwise he then information
in general, practically, well, he doesn't receive it in full measure
or he doesn't get anything there at all

and is forced to compensate by some other means yes

i.e. it turns out that this concept means
well, some compensation yes
another level of management
or management around the fundamental environment
This is the system that, generally speaking,
of course it is possible
but it requires a fairly large resource from a person

i.e. it turns out, by and large,
every person is at the root of Consciousness
he has so many, well, his own abilities
to solve any problem

if he does not consider the fundamental level
he just spends even more resources to solve it
solve the same problem

i.e. the function of Consciousness is distributed in such a way
what does it mean we have in fact
well, some kind of Law of connection in development
fundamental quantity of Consciousness
and investigative systems

this is what is called "fundamental"
the main action is fundamental
what we consider, for example, the goal of management

and the investigative system
well, what may not be in line with the goal at the moment
but in the next moment there the investigative may be the goal yes

i.e. we must determine it ourselves
what are we well then we define
as a fundamental level first of all

and that's when we define here
what is the fundamental level
Here the following axiom is absolutely clearly visible
and further the Law of Development of Consciousness

what's in Consciousness
definition of the value from the point of view of the task of the individual
where is the outgoing structure
from the physical body of a person for example

as a mandatory structure

so here in Consciousness
we see Eternity
as a materially manifested quantity

This is a very important Law when we
we see the dependence of the physical body's obligation
in the action of Consciousness
i.e. we see as from the physical body
just go specific there for example rays or glow

and here this value is even more characterized
as an action of the physical body
informational action

i.e. the physical body begins to exert
some kind of volitional informative action
on the control system

and in this case we can say
that this is the next level of Consciousness
which we can consider yes
your own there in optics
he already has some kind of development system
where the systems of Eternal development of the physical body are laid down

i.e. if we participate in the physical level yes
physical body
in management processes
then accordingly, since the management processes
are connected with the systems of Eternal development
then the physical body becomes
Well, you could say it's more appropriate there
to its primary status of Eternity

so when work in Consciousness occurs
one thing at the level of the Spiritual Administration
which is also important
there are endless processes of development of the physical body
or Soul

in Consciousness when you work
You can see it here
as in the Consciousness faction
it is felt perceived

human physical body

and by the way there is quite a bit there
such management practices
as it immediately becomes completely clear
what can be completely controlled
own physical body
in the structure of physical development, i.e. any events

and it's just a question of time
either you pay attention to something and spend time on it
or you don't pay attention

same thing what's the difference
we are talking about any other body of any other person

and here is the general system that is at the level of the Soul
where Consciousness intersects with the Spirit and the Soul of man
such a point of intersection
all people have exactly the same anyway
the status of interaction between body and Consciousness

i.e. intersection
Infinite Soul
with Consciousness
and the body is already an infinite quantity

i.e. at a certain level people glow
as Infinite Level systems
and this glow is completely clearly optical

here is the status of the collective Consciousness where it is already visible
and the body
and the optical glow coming out well as if from the body itself

and in fact if we are approaching
to the physical body
then we see that near the body yes
as vertical type of radiation
well more similar ones for example often
on a system like the northern lights, for example
these are the frontal systems
usually silver level
more vertical systems

but when we get closer to the human body

in this system
we see how the body is built in real time

i.e. in this control system
already through the collective Consciousness
from a distance it is a fixed human body
and closer we see the construction of the body

i.e. it turns out
that one person looks at another person
when he sees a fixed body
from the greatest possible distance
from the point of view of one's Consciousness

but God created man
He took it in immediately the first time.
as the most distant image
and it turns out to be as close as possible

and to perceive the closest possible image
this is a person's self-perception

and Perception by another person
this is the most distant image

and so that we could know
well what happens to the other person yes
how events happen
we must examine ourselves
at the most remote level

i.e. to examine a fragment of your Consciousness
at maximum distance
this is the controlling clairvoyance
in fact, well, in the direct sense

so this is the Law that I just showed
it is very easy to withdraw practically

that means putting down some action card
and deleting
approaching
image
you can see it very clearly
what exactly, well, some kind of sometimes paradoxical
the quantity arises

that the further the image of a person moves away
in the distance
from any fragment of Consciousness
the more you see the speed of removal
the more precise and obvious
you perceive a person
and by the way, a person has fewer problems

what is meant here is that control is taking place
on the level of how God does it
This does not mean physical removal
it's just like the fraction of Consciousness is stretched

the greater the structure of Consciousness
we invest
between the element of action and the person
the more help is transferred to a person

logically it is clear
a person begins to see differently
a longer beam of Consciousness
and Consciousness is still knowledge, yes
Co-consciousness, i.e. a certain jointness of knowledge
well, for example, in such a system of understanding

then it turns out that based on this
we can this beam
for example, it is not necessary to delete it
how did god make man to be

and Infinitely distant
and immediately close to Him
how could he do that like that how did you manage to do it?

He's just all right, if you think about it logically
this line of development means this ray
which expands the image yes
from a fragment of God's Consciousness
He just rounded it off.

i.e. made an instantaneous emission
it's not even an image of a person anymore
and the physical body of man himself
here

this is why a person is born, for example
why such a mechanism was created
one person well comes out of another person it turns out

i.e. it's not just an approximate image
and in general the internal image is like
and at the level of internal Perception
He combined two points in himself
and it turns out that the process of childbirth arose

i.e. and as if we want
there is a lot to cure there if you need some problems
which may be related to the genetic level
under conditions of radiation exposure
possible mutation levels for example sometimes

then this mechanism can be implemented very clearly
and often just in seconds
if we have these lines of exit to God
points of infinite distance and approach
we draw how the structure of human birth

and it turns out that this is also God 's action
Divine action

why, for example, the Orthodox Church
protects precisely
well not only orthodox, fundamental religions in general
it is the process of childbirth and not cloning, yes
more protected

because it is precisely here that it is manifested
the structure of the organization that comes from God

for example, in the optical principle we can consider
in case of cloning
what will this system look like then

how how then
here is the approach of a man yes
Here is the investigative system implemented
and at that level
and attached as if to the primary level
well, the cell carrier for example

then it turns out that there is an approach

there must be an approximation of two images at once
this is the carrier of the primary cell
and for example a clone yes

then it turns out that
considering that the world is developing like this
that at the birth of a person by any means
he should have equal rights anyway
Human

so it turns out that we should see here
that in order to act as God acts, for example
level of manifestation for example well, a person
who is close to God
it must be at the same time
who is actually the carrier of this cell

i.e. the cell carrier must clearly know
the entire system of human creation
only in this case it will be somewhere close
to the process of natural childbirth there
at the information level
at the level of the ideology of Peace

but the world is stable when the control system
it actually corresponds to the primary system
i.e., precisely according to God's plan for fundamental development
Eternal
one specific person

and it turns out that this is the level
if we are talking about the cloning system
which can possibly develop
as a comparable level

not necessarily cloning
there are a lot of other development systems
for example, you can introduce a development system from there energy image, etc.

the only question is
what is the process of creating the Soul
and how is the Soul brought to a person, for example , yes
i.e. this interaction still goes directly with God

and this level of interaction is what it really is
by and large it means Well, I could have created it

different forms of reproduction of people there increase in numbers
but all the time this traditional form is preserved yes
birth of a person

so it turns out that this is what
this is the narrow level of birth of development
this is also a form of Consciousness that is quite fixed
she's practically well let's say it doesn't change
there over a very long period of time yes
in the development of civilization

it turns out that based on this
if we start to analyze
this very substance
i.e. the natural substance of human development

then it can be very clearly identified
all special cases of development
one common area of Consciousness

and generally speaking it is very clear here
to predict in advance
what could be happening
this is like a predictive function

but for this we must
Well, I considered one of the options.
here's an example there are births

we must consider in this faction
as a kind of strip of information
consider all the connections of your Consciousness
with all Reality

and look at some things
which do not change
for example, body shape, etc.

and having considered some control system
as a generalized
you can find absolutely all connections

then any private management that you do for example
it fits perfectly
into your individual development plan
and in the interaction scheme

individual level of Consciousness
with all Reality

i.e. you see yourself

in general, at a calm level of control

where there is no tension there is no tension

nevertheless you always do the management

definitely logically let's say ^{yes}

you can do it without rushing, adjust the time, etc.

All the time here by the way to regulate
often very quickly and easily

and that's why when you work

although with an abstract sphere of Consciousness

still try to work on private levels

considering the whole volume

what corresponds to Consciousness in general

then the management will be effective

and correspond precisely to the task of Eternal Management

and at such a level

as a controlled Eternal development

because in Eternal development

when there is control

that means that development can really be conveyed like this

to all

in the form of management knowledge, etc.

This is where I end today's seminar.

Thank you very much for your attention
