

GRIGORY GRABOVOY
The Teaching about God
Creation of Eternity of Development
17.06.2005

The topic of today's seminar
this is my Teaching about God
Creation of Eternity of Development

in this topic i show
how to create the information itself
how to create the structure of Eternity the Eternal life itself
at the management level

therefore, in this topic it is necessary to consider
that management status
that the concept of "Eternal Life" as such
i.e. there is "life" and there is, for example, "Eternal life"
this is an element of creation

First of all, we create information ourselves
in the current tense

and highlighting this information
first of all it implies the status of Eternity

i.e. life has the characteristics of Eternity
as properties of matter so to speak

there is information from some level of management
there is simply information in Perception
and there is exactly that status that we should
properties of information
distribute as a control system including

i.e. it turns out that this is information as such
i.e. we perceive it as information of Eternity
we create the information of Eternity
we create information of Eternal life

and it turns out that your Consciousness creates this information
this is first of all

and we also manage it
besides the fact that this is how we perceive information

but at the same time we create

like God does, for example

It is an element of information creation.

considers it primarily a consequence of Eternal Life

if you think about it

into the structural category of God's creation of the matter of the World

that is what He originally means, i.e. builds Eternal life

and as a consequence it develops

all sort of technological, I guess you could say

chain of the whole world

i.e. in a dynamic World

to determine the exact location of some substance

you need to put it first

a factor that is absolutely unshakable and does not change

and the factor of the system not changing is that

that is the object that does not seem to change

it controls the whole other system

Well, that is, this is exactly the Eternally Living Man

he can rule the whole world

so although it is maximally dynamic

he is absolutely free, etc.

nevertheless, this is a more static level, or something

and much more static

than any Macrosystem

even if she is very good but uncontrollable yes

"uncontrollable" from the point of view of Eternal development

for example, we can assume that there is some kind of Eternal substance there

but the Eternal substance, as far as it is subject

for example, the system of Eternal Development

even if there is primary information of Eternity

Well for example, there is a substance that has existed for billions of years

but some processes are possible in space

there are flashes of all kinds of supernovas, etc.

at least information about these stars, etc.

and this affects the substance

so that means the only criterion for stability or something

in this World of static development
is a specific Eternal life of a specific person

therefore, based on this
based on the tasks up to and including party building

at the level of Eternal development
we can consider that
that the creation of the structure of Eternal life
it is still a real creation
where the information may not yet be initially formalized

i.e. a person carries out some actions yes
any of your actions
and at the same time, he is like a technologist of Eternal development
i.e. he creates Eternal life almost at that moment
when, for example , he doesn't think about the fact that he is creating it

i.e. something happens in a person
somehow it interacts, for example, with the whole Reality
what's going on well as if an unnoticeable creature
this very Vienna of life by the man himself

and that's when we start to feel it and see it yes
i.e. we begin to consider this process as such

because the subject of management itself
In general, he may be quite special after all

because I set the task of creating the Eternity of life
how information
but information is no different from Reality

and therefore here we are already moving from declaring yes
from the ideological status of management
to the system which is implemented at the management level
i.e. your personal human control

i.e. you can personally create this piece of information
therefore all the attributes of the created area
there exists here
border
glow

but when you create Eternal Life
then this information is inseparable from human life
i.e. well how to stop some kind of distribution

in case there is no transmission system nearby

does not stop completely

for example you created the information of Eternal life
if, for example, there is a person nearby who will perceive
this information develops as if by itself
but the spread is slowing down

or even stops in that case

if not for example Well as if some neighboring link
which would support this information

Well for example, it may not necessarily be a person
but the ability to transfer the system to Infinity
this is exactly how to do it
so that the information is not stopped from being disseminated

i.e. the ability to make a locally created system universal

i.e. you made a system of Eternal development
and the main task is
the ability to convey this information

Well for example, like yourself
and to others as well
and at the same time make sure that there is not even a slowdown
not to mention that it would be better if there was no termination, yes
development of this information

but at any level of information systems
something is being created in this world
somehow it is reflected informatively
then it turns out that we have
some development status of this element

i.e. information
exists somewhere
is being implemented somewhere
and then either it remains as an archive yes
information of the past
or somehow it will be implemented further

in the structure of the Eternal development of Eternal life
This information is
in fact the center of any integral with Eternity
events
i.e. an event integrated into Eternity

i.e. there is a level of events that
very clearly connected with Eternity

not all events are the same
it turns out from the point of view of the approach
it all depends on our approach

if you approach it correctly
some kind of sub-integration occurs
there is further integration

and we can reveal in Eternity
systems that are very clearly called Eternal Life
at the level of Perception

therefore, as an axiomatic certain
such a postulating higher level
that when we perceive the structures of Eternal life
these are separate systems
already existing in the information of Eternal development

for example, in essence we are the same information
somehow reproduce
i.e. we perceive

so that there is information
some kind of matching factor is needed
For example there is Eternal development what is it

this is Infinite ^{development}
continuous development, etc.
i.e. there are some words describing this phenomenon

but that's when we move on
to the structure of the Eternal plan
what exactly do we have here anyway
really Eternal control system
then we get into a system where there is Eternity of information
i.e. real Eternity
what we see with our eyes
constantly ^{for example there} in a person's life

and we can see that real Eternity
and the fact that a person, ^{for example, Well,} he wants to get it, yes.
in the further Infinite level
this is the same information

i.e. we must see
what is in the structure of the creation of Eternal life as information
there is a level that exists
and how information
and as a real action

and that's when we start projecting this information
on the current life of a person
by the way, it's quite powerful
mechanism for treating people
and mass recovery
recovery even in that case
if we consider the idea of development ideology

this situation

because if we, for example, are simply ideological
we lay down the task of Eternal life
such as party activities, social activities
just the task of transmitting information there
to any other person
including there different systems can be in the transmission
you can pass it on to a friend
can be easily transferred to any information environment

it turns out that if we consider
this level
as a level
precisely the task of Eternal Life
as a level of some internal idea
in the transmission of text even yes
at least let it be written that Eternal life exists
you just need to learn it and there is one elementary phrase

then already at this level of action
you can get real development
the status of Eternal Life of another person

hence
next level of creation of Eternal life
correct transfer of information
and obtaining this status from another person

i.e. I'm starting to show now
how the information itself is constructed

except for the distribution action
into any information system
precise transmission

and so that the transmission accuracy was
you can use a very short list
outgoing data and some parameters that are evidentiary

i.e. if a person has learned
or even has some evidence of that
what is possible through management
health problems
there to restore at least one cell or health
make the management of some systems technical technological
then this is already a status that one can influence Reality

if it is possible to influence
why can't you influence for example an infinite number of times yes
to Infinity

and it turns out that this is a logical postulate
it paints a pretty clear picture
the following questions are answered yes
for example how to influence

Well, there are technologies
i.e. it is enough to study the technologies then
there are technologies
Thanks to them, thousands of students have been trained, for example

it's already real with us
in the archives of the Foundation, for example, Grigori Grabovoi
there are quite a lot of applications filled out
There are literally thousands of testimonies
with very powerful results in many ways
in terms of quality management performance
management effectiveness

that specific methodologies can be learned
and often quickly and easily, as it turns out
and get comparable management

it turns out that the transmitted system
can be developed
if we consider the system
as management of any structure

then we are talking about the fact that at a certain level
if a person wants, he can rejuvenate himself, etc.

i.e., logically there are no restrictions
the main thing here is the transmission of the idea ^{yes}
through this phase of logic

i.e., you can talk a lot, ^{for example}, on this topic
you can do management
and can you see the next wave
so which one ^{well I hope} she hasn't come yet
into more distant circles of management
someone might not know at all

and so that in real time to overcome
if a person does not know that they exist
technologies ^{for example yes} Eternal development
that they exist quite pragmatically
many learn very quickly, etc.

and then we can translate
structure ^{as if} for a logical phase
i.e. it is clear that there is logic
what convinces verbally
and what is beyond this information

and here is the next level of development
and establishing information already
created ^{for example from} primary information
as information of Eternal life
this is a uniform transmission
still this information about Eternal life
almost in the Infinite phase

i.e. to the Infinitely Remote Level
which, ^{for example}, we correlate
^{Well there} with the development of a logical management model

i.e. near logic where we transmit logically
but in general the logic is this
what ^{yes} good enough postulate good experience practice
nevertheless he knows ^{well let's say} not so many people
not enough for that
so that it would be universal ^{and} some kind of movement

and it turns out that there are some informational frameworks
which allow to reconstruct the input

another completely equivalent will

i.e. in the World everything has an equal aspect
in the distribution of control
is there negative information there?
what is positive

and on equal status there is the possibility of influence
even with good experience and good results
negative status
which could be completely wrong
or there is an inaccurate point of view any other level

or there specifically directed against
he has on equal levels
the same, as it were, informative nature
and it affects simply by quantitative, as it were, action yes

and it turns out that if we want to overcome
and we need to overcome
quantitative systems in management
the easiest task

translate
representatives
or information of a negative factor
into the structure of further distribution
for example my Teaching
further dissemination of the idea of Eternal Development there

then you need to be able to
in the verbal phase in the phase of analyzing negative information
insert task all the time
namely development towards Eternity
one way or another

because if there is negative information
anyway, she has to stipulate it somehow
what is the negative background around

For example there people are engaged in Eternal development
make some negative background
near this information
in principle, well, in general, there are elementary journalistic methods
which are taught there in the first year of the journalism faculty

and then negative talk seems to take shape

but they still can't remove the essence itself
i.e. something needs to be done negatively

and therefore it turns out that it is the management that has an influence
there should be something like this here
so that as if Well, maybe I should highlight the phase of the main task
regardless of circuit yes

no matter what they say
there is a main task it must be carried out

and use these systems
how are the systems distributed in those circles
where for example people don't read
well if these are social distribution systems and media
anything else there, for example
they can only read some
special angle of information

i.e. use any system for distribution
for example the idea of Eternal Development

and here is the next control factor
he is somewhere in many ways related
with a social factor

the ability to see the development of information of Eternal life
for any or special purposes
or there is a non-special level of influence
on this information

i.e. you enter, as it were, into the Infinite Future
By the way, it's not difficult to do, it's just a task
enter the Infinite Future
you immediately find yourself in a certain control system
I'm showing it like this and it is

sometimes the truth is found
Well, there's about a meter and a half away.
human control

further you encounter positive information
just on everything actually from the Infinite Future

then if there is negativity in understanding
For example there are tasks of Eternal development
then you just take this task in information

and pull towards Eternity
speed up

and the negative phase, it kind of crumbles , yes
and remains in the past

i.e. you are always in control, actually in the future

then the following postulate of control
ability to maintain control information
positive management
in the structure of future events

and that's when you practically start doing it
firstly you can meet with what it means in advance
when you enter in the structure of the future
some information
especially information about Eternal Life
you attract attention

but that's the priority, well as if at a future level of management
in future development technologies
what can you observe
what do you mean the management is going on

and if for example you want well to cover, in fact,
those systems that need to be covered
in management

or tasks should be set
you can already vary
or allow some negativity
or not to allow it there

then it turns out that
why allow any negativity at all
what does it contain that is positive?

here is the next level
Well, it 's precisely in the understanding, I guess
in some ideologies of situation analysis
this is where it's important
in the structure of Eternal life of Eternal development
in the creation of information of Eternal life
make sure that the roots of any analysis
i.e. the identification can be negative systems
they were based again on the structure of Eternal Life

i.e. I show
that Eternal life must penetrate
to all systems
even in those that are critical there
i.e. [...] criticize and are therefore critical
first of all, it seems to work out for ourselves

because the platform of Eternal development
if it is brought under the structure
there is some negative criticism there
it turns out that we then have absolute guarantees of that
that criticism will not affect the systemic structure of the event

i.e. it can somehow vary or something
public opinion
but she can't influence
on the structure of the event entity

by and large no criticism can influence that
what is the task for example there of Eternal development

but when we begin to see
technological execution
for what you can there for example to get caught there, etc.
under external control

then right here, that's exactly it
the structure of the creation of Eternal Life as such
this is the level where you view in detail

what can happen with some level
and take full control

then it is clear that you are at the dynamic level of control
you know that there will be no problems
already in dynamics

i.e. your personal knowledge
this is also the level of construction and creation
namely the information of Eternal life
of Eternal Life itself as such

because it is built on information
it's easier to move on in the already built level

and therefore it turns out that we can

For example well, without doing any construction there
at the current time
to create the structure of Eternal Life ideologically
if we laid it somewhere earlier
i.e. for example there a few years ago
could do this management
in the near future

and it turns out you can be on the platform
which was laid down by you from the very beginning
I just had an idea

and when do you start
or is the idea implemented there yes for example, according to my Teaching

when you start to see
that the platform on which you stand is in control
This is also your personal platform
i.e. you could have done it a long time ago
set such a task for yourself

from a development perspective
Here, pay attention , for example, a child was born there
he has only one task in life and the child

it turns out that he is realizing the task of life
and begins to acquire social systems
from the moment of acquaintance there
with some information for example there is destruction, etc.

and it turns out that initially
every person put it in front of him
it's life

because he was born
and the fact of birth is life Infinite

as for example God did there
created Himself and thereby created
Infinite Eternal World

and when we start to compare
and how does it look in a person ?
here is the primary impulse

in principle, by the way, the logic is very similar

Man was born but he was born to live

and it turns out that the impulse is given precisely by Eternal development
the impulse is already there

i.e. the platform is a logical platform
his own life

This is the logic that always motivates
to this platform level

and by the way this internal status

I am specifically showing it here and even kind of researching it
an element of already existing systems of Eternal development

that this is also a fairly strong responsibility of a person
the man was born

he must be responsible for his actions

i.e. he must understand

that this is a high level of responsibility

he was born to live

then why should his life end

i.e. it turns out to be a frivolous attitude
to Reality

and so that the level of responsibility
extend

from the primary level of birth, so to speak, of a person

and since everyone was born

we can very simply, as it were, apply

this structure, this platform

on which the logic is based, so to speak Yes

development of the Eternal life of man

that we don't make up anything there we'll say yes to everything

from the point of view of Eternal development

and not only there we take and build information as such

and this is not the only goal

and not only this is just information

which in general can be naturally achieved through pre-history yes

in the practice of our own actions

and that this is an ideological Law

i.e. this is the level of responsibility

in front of you at the moment of birth

because man in principle
always thinks the same in essence
he always has in his Soul
Well in general, with practically the same amount of knowledge

and responsibility to oneself
occurs in a person then

and by the way a powerful level of overcoming situations
of various kinds, sometimes complex
That's exactly what it is
that the reference points in the elements of childhood
and exit
to the primary structure of creation
those. birth just even

and then the person starts to often
well, like on some kind of spring
very strictly based on the task
which existed in childhood
and a simple question arises

why then, for example, could there be any problems yes
now or there in the future
although in childhood everything was built like that from birth
that everything was favorable

i.e. the question arises for oneself
well, some kind of self -education
or there is some kind of check there
i.e. when does a person pose the question in exactly this way

and by the way, then it reveals very powerfully
this is the level of something peculiar
fields of Eternal development
of such a technological plan
plan that basically comes from
from the physical body of a person

Here is how, for example, the event of Peace can be viewed
well, practically from the point of view of the body and the person

it means a person who is developing
there in physical space
he can differentiate quite easily

which corresponds precisely to the physical development plan

or we are talking about the Eternal life of the physical body
first of all, and

because it is known in advance that the Soul is Eternal anyway

and that's why we are now talking in this department
that knowing that the Soul of man is Eternal
so we must make the physical body Eternal

and are there any coincidences?
in a person's life, yes, supposedly, etc.

and it turns out that the task here is
well , there is some kind of intelligent control
i.e. sometimes you have to increase it
Well or something like a resource of some intelligence
or there is some task in management

and that means it turns out that we have to enter
in those, in general, schemes or systems of personality of one's own first of all
so that any person has enough resources
cope with this task

pay attention here
that you need to go so deep
specifically in the system of managing your tasks
to see there that any person can cope with it

the simplest and most obvious path there
if everyone copes
the situation is resolved

but another question
why does a person need to do that
what should another person do, for example
he has a personal will

then it turns out that the methodological level
well except for example there are postulates of Macrodevelopment
there are some private tasks

which are only personal tasks of a person
No one even has the right to enter there

from the point of view of Macro-creation any
any creative tasks
belong to a person, only he decides them

if there is some other problem going on there
i.e. if some destructive systems are going on
then of course there is a counteraction

but from the point of view of creation
the person is not available for control, management, etc.

and it turns out that based on the task, as it were
well, something like the fastest possible action
for the creation of the implementation of information of Eternal life
we need to understand here
how are your personal tasks
Well, they influence other people from a beneficial point of view
what benefit do they bring to other people yes
it would seem that your private tasks

so here there is a very simple logical leap
in management
for example, how does God solve the problems of personality and God yes

there is the personality of man and God
how does the transition happen with God
on a personal level there
or a general task

here, the transition is very simple
needed at a certain level
Souls
hearts
Human consciousness
keep the Macrosalvation structure all the time
Macromanagement task
at least periodically remembering

then the private problem
this is a solution to specific problems
using this resource

the next period, so to speak, of the development of Eternal life
this application is completely contoured
such a clear localized
information of Eternal life

in your personal file it is so
so that the information affects
just exactly this task, for example there is universal Salvation Macro-help so to speak Yes
to all people
or even to individual people

when you start to extract this information
to the status of Eternity
that's right, in any event, yes
in some specific event

then you see yourself as the Eternal
how does God perceive it, for example?
Your own Eternity

He is sure because He sees
but He knows because He is God yes

and well, here He Himself creates knowledge

and that's when you start to see
the structure of your Eternity
in any action
there in any event
in any kind of informational movement, etc.

then you get
the virtually universal status of your action
actually localizing only well For example there in the physical body yes

your body is doing something
i.e. you somehow physically move somewhere

and it turns out that this is the division
the entire external environment
that means your body too
This is the level that you have chosen yourself

here if you think about it
actually completely often independently

who controls more
he can see that the moment of choice
passed somewhere earlier
and it was you who laid it down
there somewhere in some specific place yes

and when you start walking

according to this well- defined system of events
to the level where you find

For example in general, the status is, so to speak, universal development
status of your personal actions
as the status of Eternal action, i.e. Eternal development
you did it so that you could live there forever
you did it because everything is Eternal
originally Eternal
somewhere in your soul you made a decision

and now you are in this situation yes
somewhere you perceive yourself

Well, as a rule, this is a kind of special level of the situation
it would seem that there is a special interaction technology

in fact, a person is almost all the time
in such a situation
he is a deep root
shouldn't he actually be there?
analyze it some more

because the transition
from Eternal Life to the present time
and an element of some analysis of this situation
this is what Eternal life is after all
inextricably linked with the entire past
with all primary tasks

so this is another one of the postulates of the creation of Eternal life
Eternal life contains all causes and all effects
and how the information is stored there
the whole system of earlier solutions of earlier problems

and when you start to see it
you pay attention
that this whole volume of Eternal life
he with all these tasks

as if it touched once

For example there with your current control time
and starts moving somewhere

i.e. it is actually difficult to stabilize it
there in the current time
That's what makes the volume different, by the way

when outputting at current time
he tries to move somewhere on the optics all the time

this action itself is very peculiar

and a sign of well as if a special level of management
that a person can react to these movements
namely the information of Eternal life

i.e. the movements occur
for a certain reason, quite special in general
The law of development
namely the information of Eternal life

and the Law is quite simple
Eternal life with development
it definitely gives such a connection yes
at the level of contact with information
that any object
which interacts with this information
begins to possess these properties

for example , there God created man in the Image and Likeness
and man has these properties by
in all its essence
i.e. he is also Eternal, yes, if he wants to do it there

and when we begin to see
this is the movement in contact
for example with objects with some objects of information
it turns out that we see development
well, some streams of information systems of Eternity
when interacting with the information of Eternity
with any structural information

i.e. we can very clearly recognize here
where is the structure of Eternity
interacts with some substance yes
with some information
where the investigative system is already underway

and here is one of the same postulates
what is the structure of Eternity
Eternal life itself
perceived as an infinite quantity
i.e. we see that it is Eternal
because there are elements of Infinity

what is the difference anyway
there are concepts of "life" and "Eternal life"
in that the element of this glow of the structure of Eternal life
he is Infinite
we understand that this is Infinity

and here is the development of my understanding
to the level of Infinity
i.e. identifying these signals that we understand
we don't need to do anything else
by distribution factor

where the investigative element is
there may be some specific time
i.e. Infinite for some time

it just allows us to identify
a very powerful control system
where is the understanding that the World is Eternal that people are Eternal
that it is possible to create Eternal life
this is the most powerful control
which allows to solve
often a whole complex of problems

because in the Eternal level of development
as a rule there are fewer problems by the way
Ideally they should be absent
and they are absent at certain levels of development
personalities

so now make management precisely by understanding
i.e. you understand where the information of Eternal life is
and this is the solution to the problem
i.e. understanding as a power factor of management
I'll manage it with you

and in the future when you start doing management
and you understand some element of the action
and any person always understands something
if you focus all the time
it is the structure of understanding
on the structure of Eternal life

then it turns out that you have
well, as a kind of projection

namely the structure of Eternal development
and the element of understanding is the element of action

and then if you translate that not only understanding
and in general any Perception
this is an element of the action of Eternal development
then you see how the body strives quite intensively
and realizes Eternal development

everything related to the body
aimed at the Eternal development of the body

when you come to this situation
in knowledge in understanding
then the next element of the creation of Eternal life
is what you start to see
why some processes for example Yes
in the physical body of a person
in activities
Well, they do
to some kind of automated processes
which exist as if by themselves

in fact, from the point of view of this technology
which I am showing today
this is the level that says that
what is the physical body
which perceives the structure of Eternity
on yourself
he just sees that the structure works effectively

i.e. Perception first comes from the Soul of a person
and then to the physical body
and a normal status of seemingly calm management arises
that's all

i.e. the body well let's say reasonable yes such if we introduce the term
body perceiving Reality
as a system that can be controlled

at a certain level there is a certain intelligence of the body
the body interacts with Reality
and control occurs

by the way this is often a very common condition

for a person
initially, as a rule, it does not present any difficulties

and here is the task of management
i.e. take control of the management yes
make it localized there
i.e. to consider some personal tasks
there are the tasks of the body of the Spirit
this is generally a fairly simple task

and the main thing is to do the management calmly
here is one of the aspects of the creation of Eternal Life
this is quite often a calm management

we can very clearly distinguish the following status here
what is such a level
as some kind of concept of "super calmness"

i.e. we received information so to speak
after all, I just gave information
some knowledge
which say that all external Reality
this is what contributes to Eternal development
We came to this more logically
in analytics and the structure of the World it turns out

when we start to see these processes
how are the processes well as if again subintegral
i.e. more than the processes of unification
and transfers of associations, etc.

then it turns out that a person
Well here if we even use sound systems
with a change in the control system, so to speak
i.e. if we take and change the concept
replacing letters and words there
then the concept remains fixed, please note

i.e. or we can assume
have two meanings in one word
then the meaning that was originally there remains
in this state yes
in a state of greater peace, greater awareness
in a state of knowledge, so to speak, precisely conscious knowledge

there is a possibility to just know
and is it possible to know knowing all the causes and effects

if you need it
then at least at the first level of Perception

because you can know more there
then you'll have to waste time
to the next level
from where and what comes next

and here at some level
a person perceives everything completely on its merits
and the physical body
and for example there with Soul
In Spirit
Consciousness

and this is the level we get
Well as if some calm knowledge
this is the level that allows
practically control the situation
at any level of management , perhaps?

where is external knowledge external knowledge
this is, in fact, Eternal Life itself
it is precisely in transcription, well, restructuring, as it were
at some level of the internal entrance
as if into the physical body of a person

i.e. as such
after all, life is also a kind of subject of information
and when you start to see
that all you did
well, in a certain calm state

by this I mean
what could be the emotional state
but the Macro Calm factor is meant
at this level
information must be stable, steady, calm

this is some kind of super calmness
which can simply be informative calm
you can be there
there in some emotional state it doesn't matter
namely information in peace

and here is the transition to your physical body
this level of management
this is still a factor that allows
cope with any situation in the current time
exactly in the current time
and at the same time gradually withdraw control
there well for example in Infinite Future

i.e. identifying the current time in essence
for a person
this is still often the main characteristic of management

because from the point of view of analyzing the situation
a person can think in a forecast even
and here's what will happen there and there
specifically with him for example
or with some other control situation

and then it turns out that it is being considered

after all, it's always the current time
even in the forecast

and the main task of management
from the point of view of future events
to make it so that in the current time of those future events
everything was fine there

i.e. selection of the object and spectrum
exactly, well, actually, in general let's say something like this
that we determine the current time
as the most significant thing or something
in terms of control over this time

because in the current time
we have all the systems
which should be normal yes
we have all the tasks for standardization

Well, there are some long-term tasks, third tasks.
but from the point of view
namely the allocation of the phase of the current time
like phases well there overcontrol
some kind of mandatory positive management

here is this task
in the structure of the creation of Eternal life

it is decided by what you highlight
current time factor
actually a life line
there your own other people
so that this line initially, even at the first viewing
she was Infinite

here is the factor of the rigidity of the control
along the development line
this is the factor of Infinity in the current time

i.e. what are we doing
we take an infinite amount of information
and squeeze
into the structure of current time

then yes we guarantee
that a person lives calmly forever
he has no problems
because we have an infinite number of events
in the current tense

and among the Infinite quality of events
can you highlight the most suitable ones ^{yes}
the most stable from the point of view of Eternal development

by the way, one of the aspects, ^{for example}, is the treatment of people
^{we can assume that} work will be carried out even on digital series
when work is carried out in the regions
for some specific diseases of people

it is precisely this factor ^{of substitution} and ^{some} kind of problem
the fact that we begin to concentrate information
at the current time

and we get from the point of view of this concentration
what we are beginning to see
that Infinite amount of information
which is concentrated at the current time
has certain properties
which, ^{for example}, in the case of a person's illness
if you are treating someone
immediately manifest themselves as a system
which ^{means} with quite a lot of complexity
falls into the current time

after all, God originally created man
completely free, healthy, happy, etc.
and therefore here is the penetration into the information of the current time
some negative status
originally by God, this penetration is as if reflected

i.e. current time information
maximally protected
for external control so to speak

and therefore it turns out that we can identify here
a fairly clear pattern
that this is exactly Eternal Life
is often based on the structure of the current time

and this structure must be manifested in this way
what you should see
what is the maximum amount of time yes
in Eternal Life
for example in the first iteration of control
when you look into the Infinite Future
what is exactly in the current time
where is a small element of this time
represents the entire Infinite Future

because from the point of view of logic
it's easier to manage this way
because then we see
in fact, a very simple system of action
that we take an infinite number of events of any kind
and this means that these events allow
Well in general, to realize your desires there
and the more of these events
more choice to realize desires

i.e. An infinite amount of time
It would be better if it was closer in terms of control
it's more expedient this way
By the way, this is how the first level of world governance is structured
management there health management by Macrocreation

from the point of view of Eternal development
i.e. from the point of view of Eternal life
accumulation of Eternal life in the current time
it's quite an effective tool
management as such

i.e. it is enough to derive the idea of management
and then this accumulating part
accumulated control system or something
she will develop management quite clearly herself
in the Infinite Future

i.e. the system acts like some kind of living organism , yes
information works as a life system
which can take place there
there are own decisions, own actions
yes this information

so from here we have a logical status
if a small area is all Infinite development
and basically everything is in the current time yes
in this control system
you can put it like this

then it's clear why God
ideologically created man completely free

because with complete freedom you can control
and small local systems
and the local system can be
all the Infinite Futures are like that

you can see it in this technology

i.e. there are no random elements there
there are no small ones or big ones
each element has its own
functions properties purpose

and in connection with this it turns out
which we can very well see here, for example
what is the status for example, Infinite Development
from Infinity to the present time
and this status, even if it is small

then we can vary
with all the seemingly infinite life
i.e. the structure of Eternal life
the very information of Eternal life
some small small in optical expression
element
which interacts with Infinite Time

so it turns out that it's not difficult to manage
that's even logical
i.e. there is a volume of information
which is called Eternal life of man for example

although it is possible to make information
there are lives there, well, other creatures, yes
Eternal life of animals, plants, etc.

and then we start to look
how to manage this information
It turns out it's not difficult
it is enough to enter the structure of future events
while considering the current time
as the main element of the manifestation of Reality

and everything and management of the entire system
becomes very flexible and mobile
you can this structure of Eternal life
technologically lay down
into any control system
i.e. in any aspect of management

you can see how
so we can consider , for example,
the system there of the Infinite Future in this case

i.e. we can consider
what is the Infinite Future

and by the way, a person, as a rule, is always an Infinite Future
controls at a certain level

this is the most natural state of man
as I said it in a logical understanding
this is a compressed state of the Infinite Future
for the person himself

and here are some internal systems of Perception
especially there at school age, for example
in youth and childhood

we can see
what exactly is the structure of Infinite Development
forms some kind of attitude of a person

shapes his character yes often

and depending on how he perceives it
this is the Infinite Future

i.e. it turns out that depending on just that
that a person can make decisions independently
what future does he need

i.e. rely on the structure of the Soul at a higher level yes
we see it very clearly
that's where everything is determined
only by the level of knowledge

i.e. it is enough for him to know
that he wants to live there forever, for example
and helping others is one perspective
if not, then it's some other angle, a third one, etc.

and it turns out that if we see
this system of control as a universal system
then we must clearly understand
that Eternal life is that status
which overcomes the system, for example, there is destruction there, yes
a system of some destructive level of control

Here's an example of why you can say
that a person who began to master technology
Eternal life in management
Firstly, it is much more protected.

because it turns out that he is
firstly, he already seems to think in other categories
and he is forced to be technologically

in a more secure control space

i.e. in fact, such a person is not afraid at all
there are some physical actions there
or there are diseases there that are essentially not scary, real, etc.

and then he starts to take control
exactly in that status which does not allow for normalization

why is a certain disease not dangerous , etc.
and because he has the resource
a tool for overcoming

even if there was something the person didn't pay attention to
then there is always an opportunity to level out the situation, to normalize
not to mention that
that it is always possible ^{here} even by strengthening
there is a double triple level of control
^{means} to make management
due to some factor in advance

for example, you can control that
that you can say the same phrase twice ^{yes}
means the same word
using management to enhance aspects of management

for example, you can consider it earlier
their own management systems in advance

and ^{for example} the same management of the political party DRUGG
^{for example}, I did it there many years ago, among other things

i.e. I was looking at future events
Now I can see clearly
that these events are beginning to be realized
i.e. they occur as information systems
but I was looking at future events there
and that's it and it happens
therefore the DRUGG party will not have any real problems there

from the point of view of disseminating the Teaching
from the point of view ^{of well like} here are technologies
and people there won't have any real problems either

from the point of view that volunteers work
there are students for the dissemination of the Teaching
when I first began to spread the Teaching
I have already considered all possible options for development work

By the way, I looked at some of them for a long time
^{Well} For example ^{there for} several minutes I went into detail

many can be watched there for up to half an hour or more ^{yes}
systems
it's quite a long time
in relation to that
^{for example}, diagnostics of a fleet of 70 aircraft
it's milliseconds of time there

and if
and all the connections of these planes are there
and if you watch for half an hour
this is a colossal amount of information
you can take it there and watch it for a hundred years
for the whole system

and so try to see
all connections here in Eternal life you need to be able to
see real connections

here for the creation of Eternal life in information
because, for example, it has already been created by you in an informative way
you have to be able to see
where are these moving ones, these golden ones
shades of information
where they are in the structure of Eternal development

for example, I cited my own experience there
even in diagnostics of the same airplanes where people fly
and the responsibility is just as complete for any person

I'm looking through all the events
and then I just find myself in that time
where these events take place
that's all

i.e. the movement of this plane occurs
through even in the forecast phase
a forecast for a month, for example
everything that I'm viewing is happening yes

it turns out you can do the same by looking at events
and here the element of control stability
is like a presence in that element of life

that's how Eternal Life is different
apparently from the concept of "ordinary life"
what is the element of presence of you

and now and then

this is how god does it
He is present now and then, yes.

here to expand in Consciousness

element of presence or co-presence
and then just come back to it all

at the logical level it looks like some kind of long conversation
for example, there you diagnosed
some kind of vehicle
a month ahead

Well , for example, they found some problem there

and when the problem starts to be realized
it reminds me of what you started talking about
and so you are constantly in dialogue with this system
and so gradually you come to that
that we still need to somehow come to an agreement or talk it over
so that this problem does not exist

Well there you write some kind of defect and fix it

that's why there is an element of conversational action here
an element of communication, an element of interaction even
where there are no words sometimes

Well, there really aren't any words here
just diagnostics are taking place
but it is precisely the internal interaction
with control system
if it's not a person but just some kind of technical system

and if there are still people there, that's a saturated level of management
and here is this level
this is an interaction of different forms
it turns out that there is even Consciousness
i.e. you know one thing
external system there is something else

but when you perceive
external signal as a live signal
this is how life is in general, yes
when people converse as a form of life

for example, two people talking or three or ten
as much as you like
it is a certain form of life
this is a certain level of interaction

by the way, in the current time it is very clearly revealed
for example the form of Eternal life yes
Eternal life itself

when you start to get into control
to this level
that everything external can be considered
as an element of Eternal life ^{yes}
even if it is some part of external information

this is where it all comes up
another one of the Laws of Management
for the creation of Eternal Life
at some level
here we need to act in a clear geometric way

for example, there at a distance of 5 centimeters
from for example there is a management level
here you control at a distance of 20
25 there 20 centimeters from you ^{yes}
in some area

further at a distance of 5 centimeters
you are simply building some kind of control front
i.e. you put a certain wave that denotes
that when information passes
through this informational level, ^{so to speak}
this information is the structure of Eternal life

i.e. you can look a little further here
on any information object
there is a mountain there, some kind of technical object
technological cycle even

and that's when the information comes to you
it must be information of the Eternal life

it turns out that you actually ^{well as if} forced ^{or something} let's say so
in management
invest in the development of this information
the meaning of life ^{yes}
life turns out from God's point of view
life for a person

here is a deep logical law by the way
why did god create man
and why exactly in ^{His} own Likeness

because going through the structure of the task

for a person

The world becomes as if expanded, more alive there

and when we start here before this first level

where it should be, for example, already the Living World, so to speak Yes

containing somewhere in itself the structure of Eternal life

it turns out that we inform him

First of all, as I said

this flow of information

secondly we find in this World

that area where the information of Eternal life is generally
contains

i.e. not only did we create it ourselves, for example, yes

this information

we took and brought to the point of the whole real World

our own information

but they were not brought about by some kind of mechanical action

not even an optical level

but simply because we understood the Law correctly

how external information should be brought into contact

you

each person individually

to create just information of Eternal life

i.e. the task is quite simple

the production was known

we just got a solution

and then when we start to look at it there

for example, management is already management

let's assume going into Infinite time

i.e. we must show further

what can we spread

not only there for myself

there are millions of other people there

even billions or Infinite time

we still have to be able to show

that our status does not depend

from the system of external events it turns out

and that's when we see

dissemination of information of Eternity
from Infinity to you

and from you towards Infinity
i.e. some kind of collective action

because when information spreads
from an external system
we already show the point of the World right away
where this information is contained as if

i.e. we have actually in this World
like some kind of unfilled cell
when we enter the information of Eternity there

I do this for example
you see when it starts working
but it begins to influence the whole world

and the World at a certain level
by the way, from the first angle
this is when it flares up like a torch
he immediately becomes Eternal
that's exactly it, the Eternally Living

and again, the Eternal Living is the same person
life is initially a kind of outgoing glow
some level of a person

and it turns out that based on this
we begin to see
that when the structure for example of Eternal life of Eternal development
begins to develop peripherally
This is where it is very important to see
how is development going
this life at the local level yes

for example, any representative of the animal world yes
flora fauna
i.e. we can see
how it is distributed from the one you created
it turns out models of Eternal Life
i.e. your information of Eternal life
how does the world spread in general

i.e. at what point in the past do you find yourself
where exactly is your work

here is a big building built
The world , then, let's call it some kind of construction, yes
even if it's a large building

you naturally took part
at all levels of space and time
but at some level you did something more

what have you done more
where are you identified more or less individually
where is your specific work in building this World

and that's when you start working
with this system of Eternal life
you see clearly
what point of the world did you influence
to get now what is now
or get it in the future
the management status there is better, etc.

and that's when you start to see
Well as if entry points actually yes
into the structure of the past
then in principle it works out
you do the same as God does
He is in control
and past , present and future tenses

and in this case, the management of past time
it's just like a management task
relating to that
what are you starting to watch
how the structure of Eternal life is realized
it's your structure
in relation to something
namely to the representative for example there is the animal world, etc.

i.e. you start with a task that is logically very simple
consider
where is the Eternal Life you created
spreads to other creatures

when do you start
Well, I mean besides humans

because it is basically clear to a person anyway
and when information is transmitted to a person
it loses its contour almost instantly

i.e., like a transmission channel between people
from the point of view of this technology
he is actually located
or infinitely far or it is not visualized

i.e. a person perceives information of Eternal life
almost instantly leaving no traces there
because he is also an Eternal Man
these are similar systems

and that's exactly what is meant
well some kind of animal world some kind of creatures
which do not apply for example there to the person

it works out there
that because the information has to adapt
you can see this transmission line
for a while in optics

but as soon as another creature
reacted instantly
that the structure of Eternity is transmitted to him
adapts to this
naturally begins to prolong
then the glow also gradually dissipates into information

and the only difference is that
that the transmission of the structure of Eternity in information
Well for example, there in the animal world
or let's assume there is a level of Infinite development
any other systems
this is the level of information
quite tough and stays for a long time
as the level of the completed action
i.e. human actions are visible there

then in relation to a person
the action is almost over
only expression of will
i.e. only the will of choice of another person
maybe I can still notice something from the tracks yes
actions in information

i.e. there are levels
which are practically not visualized
for example God works but He works like this
what well let's say traces of His Actions so let's say yes or how His Actions
it is often the same action of the World

and this integration with the fact that it is not so noticeable
so it turns out that God
He's not like that as if it doesn't always have to show something there yes
or write as text

it turns out that this is precisely the integration of something invisible
but it means "simultaneously existing
i.e. maximally revealed"
in the social system there is such a multidimensional concept
action of the task there Eternal development

that which is God's Action
by analogy, a person should also see
which areas quickly dissipate without leaving a trace
which are more fixed

and this is precisely the transfer to another person
fast transfer of information

therefore Eternal life exists
in the structure of knowledge transfer
to another person

here we found the information space
we have determined this point of the world

and when we start to analyze
then logically it is understandable
transmission of knowledge from generation to generation
the presence of some knowledge on the development of societies
societies of societies of earlier historical civilizations there
this is some accumulated experience, etc.

and it turns out that it is the transmission
from person to person
this is the information carrier

by the way, the most stable
for God the maximum form of stability
this is what the person himself does

and when his personal initiative is fully demonstrated
there one hundred percent
and therefore towards Eternal development
so he does the same as God does

i.e. where there are rigid systems
other levels of Reality
which, for example, are not called "human" there, yes
and the transmission of information there is fixed
and this information is manifested
you can see what the man did
here you go, the entrance to the structure

and from the point of view of control logic
it turns out that this is how to pragmatically convey this knowledge
i.e. to show that we can't use this knowledge
systematically and quite simply
transmit

we should see here
that these are the contours of other systems
it is also a kind of platform for the transfer of knowledge
often it is the platform that determines
just configuration path transmission

i.e. why did a person need it there
for example, there is all physical Reality
here God created Himself and created all Reality
but then it turns out that initially it doesn't matter to God
that there is a vacuum or some other environment

then it turns out to be creating in the Image and Likeness
human
He had to define some kind of system of the World.
i.e. how the World should look like in general

that's where you can see the actions of a person more harshly
well in relation to other creatures
so here
or objects of information not only creatures
this is exactly where the manifested World was needed
to show control transfer technologies

i.e. you can see
why was one or another species of animal created, for example Yes

i.e. why well For example there we will take control
for example, there is a white hare there in winter and with white skin
and there is a lynx then

and we want to consider
why the communication system was created this way
why exactly this form
why is this hare here for example there in the forest yes
in 10-15 years i.e. why

when we start to consider
Well in general so let's say the answer
and the answer always exists
i.e. you can set a task and always get an answer

then this is precisely the level of priority of the World
that you can always get an answer

this is precisely the next factor of existence
information of Eternal life
which is located in some specific place or something
the general volume of knowledge
where there are always some answers

Well as if the space of answers
which means positive ones by the way
first of all answers
that help you solve the problem
which exist simply as if abstractly

and when we begin to see
what, well, like some kind of postulated level
that there is an answer
then logically it is also understandable
because Eternal life must contain
implementation technologies are a must

i.e. there should always be answers to any questions
"any" because Eternal development
it's clear there is an infinite number of questions
and generally speaking to any current question

and here is the creation of some such
means the internal essence in management

when we start to see the system this way
that creating answers to questions for example
this is still your job

i.e. it turns out that the answers to the questions
you must also form yourself

this is where control comes in
well, some level of Reality
some state and your personal
as a level of well, not a random action

i.e. you come to that
that you can control any movement
there are bodies there
any movement of some situations personally with you
absolutely exactly as you need
just why do you manage anyway
that's another question
often it is connected with the people around you

or, for example, it's just a task like this
that you have to do a lot a lot to save
and that's why the management is exactly like this

and go out like this
into the structure as a fundamental aspect in general
and as in the usual aspect of Eternal life
that management is absolutely individual and universal

and this control is located at a very simple level
transfer of information to any being yes
this is one level of optics
and transmission to other people
it's almost like unnoticeable information

and here is the interaction of the noticeable part and the imperceptible one
and there is precise management of your tasks
in general, even there with your physical body, etc.

Now make such control
I will work with you

in principle it is management
in fact it is not complicated at all
the main thing here is to understand this kind of geometric scheme
what you need is just the same as God does

He is present in all actions.
but He doesn't write on the posters there ^{what} needs to be done

so even if He wrote
then these are cryptogenic posters and not a permanent record

that's why here
it turns out that the situation here is like this
what needs to be seen very clearly
where exactly is the status of the information transfer
to all external systems
generally transmitted to humans
almost instantly and naturally

from one person to another
information leaves almost no trace
it is in this regard that the management of Eternal life

and here is the structure that transfers to the general plan
very clearly manifested

so how do you convey it more accurately?
into structural systems

where is the element, where is the person, this is already the general level
it means transfer to the universal system
this is a transfer often to a specific person

and when we begin to see
that universal Salvation
this is the salvation of one often specific person
and when we start to see it
at the level of simply combining information

for example **we** say
what needs to be done is an element of universal Salvation
and then it turns out that it is this element
this is the life saved there
some specific person

or just help or healing there
well, in general, some positive action
in relation to a person

I'm specially equalizing
elements there of life-saving help
because the impulse is universal

you should on any impulse
at least ensure human life
and for Eternal development
She should be happy, healthy, etc.

and that's when we start
already move to remote systems
from the structure of the action
structures of Consciousness, let's say even of a human being

i.e. there is a structure of Consciousness
there is something that exists for example Yes
outside the human consciousness system
this is logically possible

we can consider that, for example, some area
although in fact the universal system is in Consciousness
but for example, we think that Consciousness is developing
we take and observe

Eternal life is spreading
the element of Consciousness controls
and here's what's behind this system
as if what is external yes

so that's when you go out

into this external system
Well, you take it at speed and watch
one process
and enter the external system

it turns out that it is the same life
and the same Consciousness but
i.e. your own element of Consciousness
expressed to a certain extent

well just if you see here
it as a local system

then here it is that which contains Consciousness itself

for example, how God supports Himself
in information
He should also have dynamic information.
and external information
to personify with oneself

and it turns out that it's exactly the same here

autonomous development system
and Eternal life develops
but it is contained in the same structure
i.e. information carrier
absolutely identical to that
what is the action of information

looks unusual at first
but you can get used to it pretty quickly
and calmly improve the control mechanism

i.e. a distinctive meaning aspect
information of Eternal life
is that as soon as we enter
in the information element
we get the first sign of information
then it is clear that it is contained in the same element
i.e. it is a part of it

according to the Macroconnections system this is indeed so
but we are talking about the dynamic part
about what we personally discover

i.e. we can identify this element
and send by the way
in solving almost any problem

because as soon as it appears in the system
element of Eternal life
you always have a way you always have a choice
this is already colossally important, yes, if you have a choice
then there are no special problems anymore

and here is the identification in the management structure
when you see your own life
some elements of life development
in any situation
this allows us to make a very favorable conclusion
a certain level

that it is enough to consider systematically
in each case
your manifestation in Infinite development
and then you start to see

a very simple aspect of your own future

that any projective system is something in the future
any of your actions

Well of course I mean creative ones

because they are not creative
they do not lead to use at all
this type of construction
there is apparently something fundamentally different there

but that's not the point
we are talking about the fact that through Macro-creation
there can be no other type than creation

and so we can see clearly
what is it is quite transparent calm
your future

how can one say with confidence
that there will be no problems with the person
that everything will still develop favorably

or you can just project it
all his events on his real future

there are completely static things
which still don't change
depend on the collective Consciousness
people need it
so it will come true yes

these are like macrostatic forecasts
Moreover, these situations are acceptable for everyone

but if it's your personal situation
they are completely individual
do you want to go there for a vacation sometime?
and now you need to look at the line literally there in 2-3 days
or there is some period

you project the system of all your connections
for these days
How do you build it? It works out yes
and you form your own, so to speak, private future

but when you do it through Macro control
your private future is not quite private anymore
You as a technologist are needed by other people
look who needs help

then you instantly enter the Macrocontrol scheme
into the control circuit of all systems

the same thing when you mean you work at the Macro level
you work with a personal task

i.e. it turns out that the Macrosystem
well, some kind of reverse level
contains your private tasks

just like in the structure of Eternal Life
private task
contained as if in itself yes
in the form of space
in the form of a data carrier

this is when you start the Eternal Life technologies
distribute
to any other management layer
for example, get Macrocontrol
the entrance must be as if from inside the system

i.e. to save
Well as if a function of similarity
through a private task
i.e. having oneself as Eternal yes
through its structure of Eternal development
you are moving into the Macro Management structure

and then as an example you simply give

that your Eternal development is the usual Norm
well, for example , the one you are used to or are getting used to

as soon as you get used to it
By the way, do you have
quite a serious level of that Reality
what is your normal state

and when you are in this normal state
you start to act
then many processes are resolved as if by themselves

are often solved accurately at very high speed
and most importantly on the accuracy of your personality

i.e. you see
that you work or act, live, so to speak
in the fullness of his personality

so here is the organization of Eternal Life
using this method
precisely aimed at one's own Consciousness
on one's own action
even to some extent of addiction
to this state
this is precisely the full realization of personality

and then the person is actually located
really at a safe level
well maybe there all the time is healthy yes
really healthy so to speak

and he basically understands it quite clearly
that he can influence any situation if he wants
if there is not much time to devote to something

and depending on his will
he is holding control quite steadily now
i.e. he understands now that he lives forever

here is another aspect
creation of information of Eternal life
through the logical phase to get Eternity really
i.e. to enter into the state of Eternal development of Eternal life

then it turns out that the information created
through logic
through Spiritual action
through understanding the World
projected onto you

and you have
although it may be a bit unusual at first
but then you get used to it
and this becomes a normal level of management

and then already at some kind of everyday level
simply implemented as an information system
and that's all

and do you live a normal, calm, rhythmic life, let's say?
measured life
there, well, for the sake of harmony of development
such processes need to be implemented
quiet life
in any development situations yes

Of course you influence for the better
but try to go out periodically
for calm management

and then it turns out
what information is being converted there
in Reality
it is transferable you can teach many

a form of external stability is already emerging

and by the way, external training, as it were
transmission to an external system
training people
namely the technologies of Eternal Life
by the way this is the fastest learning

if you look here
how knowledge is transmitted
can be transmitted locally through some systems
and there may be some slowdown
because these are private systems

and Eternal life
it is still a deep fundamental system
therefore the transfer of information occurs faster

you can even compare
for example, you can just do the management
providing assistance
even through the Macrosystem
or maybe through the technologies of Eternal development

then it turns out that you are
in the essence of development information
in the essence of the structure, as if even of one's own personality

and there is no longer any difference even at a certain level

that this is reproduced information
or is this information that was originally given by God

you have reached your original level
and just be in Eternal development
and that's all

because you are originally Eternal

i.e. you have connected
the control phase produced
at the level of who you really are

then it turns out that you have no problems at all
you just do your own thing then
in the usual order , I guess

but it turns out that it does affect
in terms of what you do Eternal
the world around us
you convey maximum knowledge

and accordingly from the point of view of management
Of course you do the most precise control then
sometimes even the only accurate one
in this state at this level of control

then management it is in general often
precisely the only accurate one

by the way, good option
to find the exact path
what should you do next time

Well, remember, come in or something
into the original structure of Eternal development
and you will see
what is precision control now
what should be done now yes For example

so that's what I would like to do
so that you can pay special attention
what is the accuracy
this is still your personal characteristic

you can still choose and make a decision
it's not that clear there

that you received some kind of signal of accuracy
and that's all yes

and considering that you are acting
still completely free
you must take control of this level too

and there again is the structure of precisely that Eternal life
that comes from you
that you radiate
well which you are
this is control again
which gives you a completely normal level
there is no freedom of will, freedom of action

and in fact you are acting in the same way again
but already managing even the processes of precision
i.e. again it is complete independence and complete freedom, etc.

and having learned to manage, for example , this technology
Well as if I even got used to it a little there
and spreading it around

you can already develop
in a dynamic, ever-evolving world
and this World in principle begins
by the way, somehow already at the level of remote control systems
interact with you
give all new development systems there
by the way, in this case they won't be tense in any way

i.e. it is clear that the quality level is high
even the management is different
there for example there may not be any fatigue at all there, etc., etc.

i.e. there are many there
some such individual characteristics
which are manifested by the personality itself

and when you start implementing this system
just try to pass it on to others more
then you will get more active control
i.e. more focused management

and your control will already be like this
that is exactly what is being solved
the spread of this technology yes

dissemination of this knowledge

so try to solve these tasks

solve as comprehensively as possible

always taking into account that the task of disseminating knowledge

always exists

and this task must be completed

i.e. with precise ultra-precise control

always help on some level from others

and try as hard as possible

at the first opportunity

to convey knowledge about Eternal development as widely as possible

This is, by the way, the fundamental system of Eternal development

and the formation of the information of Eternal life too

Thank you very much for your attention

This is where I end today's seminar.
