

GRIGORY GRABOVOY  
The Teaching about God  
**Creation of Eternal Life from Human Consciousness**  
10.09.2005

Hello again  
the topic of my seminar today  
this is my Teaching about God  
Creation of Eternal Life from Human Consciousness

in this topic i show  
how  
First of all, to organize the structure of life in general  
and create real life  
from the element of Consciousness

i.e. we take an element of some created substance  
element of created space  
and from this element actually some creation  
we create the next element yes

i.e. the primary level is Consciousness  
where we are on the structure of our own Consciousness  
we actually grow life for example there OWN life

so that life may be Eternal  
we make connections like this  
so that the basic management would be based on the structures of the past

then it turns out that we have it all the time  
point in the past  
where Consciousness existed for example human Yes  
and on this element of Consciousness  
we are building the next structure of life

so in this control  
it is important to be able to build a structure of life  
at the local systems level

for example, a person can build there  
structure of life  
in some local authority, for example Yes

or let's assume that the human consciousness remembers  
what is the image of a person

then it turns out that it is possible near this certain matrix  
build a life

i.e. well in fact, as God does  
He is building near a certain famous painting yes

i.e. there is an image of a person  
and life is built at this point  
and at this level of management

so doing like  
we must first consider  
the inner content of life  
in the control space  
or in the space of action

for example, a person has some kind of image  
he needs to recreate it yes yourself at this point  
and then it turns out that in addition to the fact that there is a form  
external form

after all, God creates somehow not only because  
that He just has some form  
He recreates life because there is  
His inner understanding of life

this is the understanding of God  
how does life exist at this point for example

and if you understand this Action  
then it is possible to regenerate almost any human tissue

i.e. just create  
in a specific place a specific organ actually  
i.e. even a specific part of the body, so to speak

and when we for example we make this type of control  
you need to look first  
how does a person actually think?  
at the level of the element of Consciousness

this is very important  
that you can, for example, take and organize with your Soul  
body  
it's like a single impulse and that's it

and it turns out that we can perceive the structure itself

as a one-time action

although we can go deeper  
into the structure of the Soul's action  
but that will be a different technology

and it turns out that there is a one-time impulse here  
no different  
from the technological level of knowledge

in the structure of Consciousness  
this is a logical more control phase  
it turns out that here is precisely the person's memory of that  
that he, *for example*, touched with his Consciousness  
with some element of Reality  
and means , *as it were*, the internal memory of Consciousness itself

that is, Consciousness contains  
some element that means interaction *yes*  
with another system

and that's when the interaction begins  
then a fairly large level arises there  
Well *some kind of* informative data  
where the construction itself has *a kind of* technological perspective  
namely , *for example*, the structure of the body *or* the structure of life

and it turns out that God at creation  
*For example* there are elements of matter  
He must understand very clearly  
any connection  
in dynamics, *yes* in Eternal development  
each element of matter  
with the entire external environment

but here the main element is that  
what God must see  
connection with internal element  
*as if* the very element of Consciousness  
i.e. in fact it is a kind of system  
which works within itself *yes*

i.e. within some autonomous environment  
because the body is designed this way, it is an autonomous environment  
and this environment, *so to speak*, the body exists  
in the structure of some internal parameters

in general the organism is understandable  
but in this case we are talking about  
to be able to create any fabric

i.e. well, well basically, for example, a person wanted to  
and created a body part for himself there, let's say Yes

then it turns out that here the management is like this

that it is enough to have in Consciousness  
some kind of internal memory  
what is the body part in that place  
Well as it should be yes it turns out in some place

and it turns out that since such information exists  
then it is the basis  
in order for this part of the body to be  
Well This applies naturally to the whole organism

but if we know how to build for example  
from Consciousness some one element  
then it is clear that you can build any other  
This is a unified management system

so it turns out that this is the level  
some light yes  
some knowledge  
or even some environment there  
what does the concept of "Human Consciousness" refer to?  
where the body's growth in dynamics occurs, for example

this is precisely the context of this management  
on today's seminar  
to be able to get out of this environment  
grow the structure of life, well, the body for example

and then we see that the concept of "life"  
this is still more of a general universal concept

there is a concept for example there is "universal life" well in general, for example  
what is life locally yes

this is some specific control environment  
and "universal life" is also some kind of information

and here we are, for example, when we start working  
just how exactly with information

then we see our physical body  
as if from the Infinite Future

because from the Infinite Future  
you can examine any element of Reality  
just need to get out  
into the management structure somewhere in Infinity  
and look at yourself from there

then it turns out that the physical body  
in fact, this is the level of development

some current point of Reality  
into Infinity into the Future  
i.e., as if pulling out the image  
precisely in the structure of Infinite development

i.e. in fact it looks like this on the information  
that the light of the current event seems to be stretched into the future

you are in the future and you start to pull towards yourself  
this light  
physical matter is organized, for example, yes

i.e., for example, to cure using this technology  
disease  
need stretched light  
your image as if it were projected into Infinity  
from the outside just watch and see  
where are some problems  
and these problems are simply removed from management

This is kind of what happens  
control by external observation  
and by the way this is a pretty good level of healing  
in the conditions exactly when you do  
For example there is something fleeting and necessary there  
make management  
which is fast, as it were, in time  
It is in dynamics that changes as if time flows quickly

i.e. it acts as time acts  
control that is indistinguishable from time

if you separate it there  
then it turns out that we are at Infinite distance  
control is not distinguished from time in space

i.e. we have practically the same control time  
as well as time as such, existing precisely in information

i.e. we are increasingly signs of the external environment  
we begin to perceive  
as the structure of one's own Consciousness

then it turns out that based on this  
to build such a management  
Means make it so that your outline is there yes  
of your physical body there  
for example, it was specifically in the information  
it means it was created and aligned

due to the external management structure

you need more  
external objects of information as if to perceive

this is how God made the system local, for example  
i.e. how He received a dense Physical Body

just for all external information objects  
were perceived by Him  
somewhere in the element of Consciousness  
God  
and it turns out that the Physical Body was created  
as a structure that is outside of this information

the simplest technique  
take a look at all the existing information  
how to separate the physical body from here

and the body as if Well it looks like this in the information  
that as if it were from a control point of this type  
it comes out ready-made, yes

i.e. all elements of the World  
contain information about the physical body

then it turns out that we have considered them  
we immediately find ourselves in the physical body

i.e. the body is outside the control phase  
i.e. the body is a control system  
over external information

it's <sup>like</sup> the ideological essence of creation  
you then get the structure of your body  
and the real physical body  
being in this position <sup>yes</sup> from this point of view

but when we look at  
the very element of creating some kind of Reality  
or the element of Consciousness itself

then we should use only this element  
often  
i.e. we can not ask the question  
exit to external control  
we can not put the question like that  
that we should be outside the control system  
i.e. control the control system

Often a person is in conditions  
when he does not set himself such a task  
it just has to be in natural conditions  
have <sup>for example</sup> an Eternal physical body

then it turns out he should be able to  
grow a physical body  
at the right point in space-time

and for this he must be able to  
distribute information throughout the body in such a way  
so that the body <sup>would be like Means Well</sup> if we look at the process like this  
more generally

the body seems to grow in  
into the informational physical Reality  
at this point

i.e. you make management set the task like this  
so that from your element of Consciousness  
the body <sup>seemed</sup> to grow into physical Reality  
at this point  
<sup>as if it were expanding in fact</sup> <sup>yes</sup> in information

and you get that at this point  
your physical body is <sup>for example</sup> Yes

but a person already has it  
i.e. it turns out that the task of management is that

so that from the point of view of Eternal development  
have this mechanism  
how simple the mechanism is practically  
from the point of view there For example Well human health improvement

or there is self-healing  
in cases where a person believes  
that he must restore himself here

it can be for example  
Well there you can even be physically healthy  
Human  
generally healthy in all respects  
but he can, for example, set a task  
for Eternal development he needs some kind of training  
in management

he must be able to clearly understand  
what is he capable of doing yes let's assume in management

then it turns out that he should still be able to work  
with the physical body as well

after all, in the structure of Eternal development one must be able to work  
it's the same with any system  
so that this system is completely under control  
for example, the system of your Consciousness

then it turns out that it should work like this  
so that firstly the physical body well remained healthy yes  
all development parameters were favorable

however, he must be able to manage the system  
i.e. it should , as it were, enter into the internal structure of the system  
and clearly understand  
that he controls the system in any situation

for example how does God do it  
He is always absolutely healthy.  
he has there Eternal development  
but He still controls His Body

i.e. it turns out from what point does He control then  
how does He even create a Body in this case  
what does he need  
Here is the mechanism of its creation, what does it consist of

and it turns out that based on  
from well like these kind of questions or something management  
it is clear that God has a question  
it is often an external issue

i.e. for example, by the way, it's the same for a person  
this is absolutely the same  
there are points of coincidence at the level of a kind of mental action  
at the level of Consciousness

if there is a point of view  
that the body can be transformed there in some way  
due to external influence there  
some kind of disease situation well as if unfavorable yes

that is what happens in the collective Consciousness  
this point of view may be yes it exists

and then the work is already carried out with the segment of Consciousness  
what if this is possible  
then let's work in this direction  
so that this would be impossible

i.e. the body to be Eternal yes  
then what should be done in this case

i.e. with a healthy body there , too  
well who needs to improve their health  
he can simply improve his health in this way

and for healthy people  
even if favorable events occur  
in management  
here is the introduction of management when it is simply excluded  
this form of collective Consciousness so to speak  
where there are some possibilities of influencing the body

this is where the main work turns out to be  
i.e. God actually works with the external environment, it turns out  
with the system of external Consciousness

i.e. He teaches Eternal development  
gives the following knowledge there, etc. Yes  
i.e. It shows the structure of Eternal development  
to each specific person

then this knowledge system becomes more expanded  
and the amount of information decreases

it means exactly that information  
which corresponds to that  
what well there may be some unfavorable system  
in relation to the physical body

but since the body  
Well like usual yes physical element physical there system  
in Reality  
although it may not be quite ordinary  
there is a control that shows that the body is Eternal

i.e. you can go to that control at any level  
and preserve the Eternity of the body

i.e. to actually ensure it  
due to a one-time management  
but this will again be more frequent  
action

Souls  
Spirit for example  
or there Consciousness as well

in this case we are considering  
after all, it is precisely the element of Consciousness

that we calmly and methodically  
due to the fact that we remember or know there  
that the physical body looks like this  
and that's how it should feel, let's say  
we are building a physical body, that means

and based on this criterion  
namely interactions with the collective Consciousness  
as if an exception from the collective Consciousness  
this is the phase as I repeat  
possibilities of influence on the body  
Well as if adverse effects

we are actually looking at the work of God  
i.e. we see the Face of God  
how does he perceive physically at all  
for example how he looks and reacts  
on this information

and when we see the Face

we see the sensory level of His Perception  
and here are the feelings of God  
this is the first division of external Reality  
from His, as it were, physical Person <sup>yes</sup>  
first sense highlighting the structure of sense

where the structure of Consciousness is  
passes  
to the sensory level

and here, by the way, the issue is often resolved  
hobbies of the majority  
as a rule, <sup>for example</sup>, if there are some  
possibly complex diseases in the collective Consciousness  
then there are actually powerful healing mechanisms here  
it is precisely in the structure of the transition of Consciousness  
into some other control system there  
Well as if one state of Consciousness

feelings are also a system of Consciousness  
and here are the internal transitions  
this is a system  
where God allocates structure  
i.e. He takes, <sup>for example</sup>, the mono structure of Consciousness  
and begins to look inside this system  
some transitions

then it turns out when He begins to consider  
It acquires the structure of the Physical Body of a person.

then the first axiom of such management

this is the ability to consider  
the structure of one's own Consciousness  
and due to <sup>the kind of</sup> analytical thinking  
get your own form

<sup>it means</sup> the shape of a person  
this is the result of one's own Thinking  
in this case

and based on this we can receive all the time  
your own form  
due to the fact that we think  
in some specific amount  
at some specific point

i.e. it means thought as a structure  
which seems to pull Reality together  
into the human body

i.e. concentration of thought  
and you acquire  
there is an ordinary physical body for example Yes

and at the same time all the phenomena of the World  
start to concentrate  
around your thought  
i.e. they are drawn into this thought  
this means this is a special nature of Thinking

you need to be able to track your thoughts like this  
so that the phenomena would flow together  
into your thought  
all phenomena of the World  
and not the other way around, let's assume they were spreading out

there is nothing complicated about this  
you just need to use some control  
just take all the phenomena  
Well, well how to reduce it to the structure of Thinking  
to this point there

Thinking is for example there is a spheroidal system  
all phenomena of the World  
Well some information is glowing

take enter  
Over time you will see that these are natural processes.

there is such an element in thought  
all phenomena of the World  
but for example we can not notice or we can notice  
this segment

in this case, we need to pay attention to it  
concentrate again yes

but the concentration has a more prolonged nature  
and through concentration you organize  
your own physical body

it turns out that God, having perceived external Reality  
acquired a Physical Body

Well in this form if in the direct understanding

i.e. It was enough for him  
one impulse to output to control  
any impulse  
He receives the Eternal Physical Body immediately

so based on this we practically have to be here  
This is where we need to think through this element  
how did God do it for example there  
from a single impulse to get it

the thing is that here if we consider  
there is a human life  
as an element well prolonged yes by time  
for example, Eternal development is always there  
prove  
that Eternal development is a systemic level  
which does not depend on circumstances  
i.e. this is a person's skill in fact

Eternal life is the ability of a person to live forever

and the skill must be confirmed by something, yes

in this case it turns out that we are talking about  
that a person finds this skill  
and even in a completely favorable situation  
This skill develops

i.e. in fact, he must clearly understand

what does it create  
For example Yes like life itself  
there as the structure itself there let's assume the physical body including

and understand that the controllability of this system is such  
what does he really do?  
the man himself

as possible without affecting the system  
make sure you do it  
life already exists yes in a person

there is a collective Consciousness  
and due to the fact that many people start working  
for example, according to the technologies of Eternal Development

as a consequence, man naturally becomes more and more Eternal  
if he doesn't even do anything

and in this case the task is that  
to develop your own structure in skill  
let everyone know how, for example  
but you need to be able to do it yourself  
doesn't matter

because for example to hope  
that the external structure of the collective Consciousness  
will bring out well maybe she'll spend the first billion years there  
so to speak figuratively  
and then yes

i.e. a person must be able to clearly understand  
what does he personally do  
and here is precisely a clear understanding  
personal aspect of the action

i.e. in impulse  
the derived personal aspect of the action  
God brought it to that  
that God in a single impulse became Eternal

i.e. this understanding in any seemingly random impulse  
all entities of the situation completely  
but understanding is not in the impulse itself  
and understanding in the structure is as if more universal

i.e. any completely generalized system yes Peace  
contains complete knowledge of all information

Well, well from the point of view of God Consciousness

i.e. God does not necessarily get knowledge there  
Infinitely from somewhere  
after all, God knows everything anyway

as if he doesn't need to draw anything  
how does he manage to do this without taking anything  
maintain full control  
i.e. to know everything

but only at the expense of  
the first simplest element  
when the background level of Consciousness is as if

Well a value that does not indicate any special knowledge  
has all knowledge deep down  
and God understands it  
i.e. it means the structure of understanding  
from a human point of view  
this looks like understanding

For God it looks like just creating information  
into the structure of one's own Self-Development

i.e. He can also turn towards Himself  
create any information  
i.e. there is even a concept of "understanding"  
does not look like a human being in the literal sense

it turns out that He creates this structure for Himself  
earlier development system

and for human understanding  
this is the structure of understanding

it turns out that based on that  
so that a person has  
and with God  
there were identical structures of Perception  
Well, yes in the structure of knowledge  
the element is  
ability to understand  
as if by an external feeling  
external understanding  
i.e. without affecting the essence of phenomena

i.e. the ability to understand everything without analyzing the system

then we mean to deduce  
this level of management is kind of beyond  
Means Well some local object yes  
somewhere in Infinity

and we see that in this case  
that's exactly the structure organizations

namely, an autonomous physical body  
it consists of the following  
so that the external is this Infinite understanding  
somewhere in a completely external area  
would contain a clear structure of information

about your physical body  
or any other person there  
what do you do for example  
or all people at once

i.e. skill in any abstract information  
which is understandable but which is not necessary to understand there  
For example there to put things in order  
Everything is clear to you anyway, right? in this area

in any information there is a level that is always understandable  
even if there is something there Well not clear in general  
there is still something completely clear  
in this area

and here is the highlighting of aspects of understanding  
which contain information about the physical body  
this is another element

i.e. the next axiomatic level  
building your physical body  
due to the elements of Consciousness

this is Consciousness  
Consciousness that does not contain explicitly  
construction system  
but in the depths of which  
there is knowledge about your physical body

here you got it again  
Well some kind of compression wave yes  
around your physical body  
next level of the world  
your physical body gives you, etc.

i.e. such as compression elements  
you can type as much as you want in principle yes  
analyzing further and further there

because that's where God created His Physical Body

further when we already have enough there For example  
there is an infinite number of such elements  
we are moving on to that

what besides the fact that we compress information there  
and we get, for example, our own physical body

i.e. then we are no longer dependent, yes it turns out  
from the physical body  
we can just assemble it  
due to simply external information  
starting from any external system

i.e. this is basically it Well, it looks like a favorable one, let's say so system  
what is an external system  
and you can always assemble your own physical body

but there is a rather serious point here  
in management  
that we can't, for example, get out of the point  
namely the structural point of one's own physical body  
as if to consider that we can always collect  
due to external information

because the main support  
for the Eternal life of man  
is that the physical body lives forever

and the further  
the more favorable the situation should be  
i.e. more stable control

skill increases  
means less chance of that  
that the physical body will have some problems, etc.

and it turns out that exiting control is like counting  
what we will do in case of any problems there  
we can do this due to external information  
get together  
it's getting smaller and smaller

the more a person develops  
the more it relies on  
as if on my physical body after all

the task of internal self-government is again at hand  
based on fact alone  
contours of the physical body of one's own

and here the next element appears  
where are you in your own physical body  
build a very clear level

Well in fact, as if yes  
in the structure of your Consciousness

those. take it and separate it  
the physical body of a person for example Yes  
from the external environment there  
here is the one that touches  
i.e. this is well as a rule air yes  
if it floats it is water etc.

i.e. the ability to draw your own image  
it looks like you're just sort of separating  
the structure of the image in Reality  
from well some level of intersection with the external environment

and by the way, characteristic at a hidden level  
the sound exists  
as if a layer of the external environment  
how the cellophane peels off  
detaches from the physical body, for example

i.e. you build yourself yes in fact, you are building quietly

and that's when we start to proceed from that  
and where do you get the resource?  
how can you build yourself inside yourself yes it turns out

but still here you can build within yourself  
i.e. you work as if outside of yourself  
at the level of perception there yes  
at the level there is action  
but the real work happens inside  
and you look at yourself

i.e. it is obtained in this technology  
it is important to see inside yourself  
himself  
and clearly see how the separation is going  
image means  
from the external environment

here is one of the technologies of Eternal development of Eternal life  
when the element of Consciousness is built like this  
that you have mastered the technology of highlighting your own image

in reality it's not even just that

it doesn't actually look like this  
as just a selection  
in reality this is a specific creation of an image

i.e. at any moment you create  
own structure of one's own organism

then it turns out that in principle, having worked with such technology  
or there passing it on yes to a certain number of people  
you see that by the way the more you transmit  
the more effectively you will work with it yourself

you see that this is really it  
there is a structure in the management information  
not some kind of speculative structure  
namely in management  
as for real processes

what can be built  
own structure of the physical body in this way

and why did I start with local elements  
the body must always be perceived as a whole  
nevertheless, you are starting to build  
separate the body structure at a local level

there when a person is born  
it means he is born not all at once but all at once  
in parts it means the body appears

so it turns out that this is the principle of interaction  
here of course the situation is not the same as in childbirth  
but nevertheless this is the highlighting of the body structure

working with a specific element  
which is needed for example  
or to improve health there yes  
or for example enter there  
in the structure of the training management plan  
you must be able to create this element

and here is the next element, if you look  
what does god do next  
then at this level you can  
from the physical body  
see God in Action then  
from the physical body

i.e. so that your physical body well For example there with the eyes yes  
perceived the Action of God  
i.e. you were able to see with physical vision  
the signal reaches the physical vision

can be considered often  
that the signal there is just memory or there is Thinking  
and in this case the signal reaches the physical vision

and through physical vision it is restored  
the whole organism then by the way means

and here you can see  
why when considering for example Yes God  
from the point of view there let's assume one glance  
can you see a person  
Well just the physical body of a person  
and that's all yes

and on the other side you can see Infinity here

because the incoming signal  
he is also Infinite once you see God

and it turns out that Perception goes, for example there is an Infinite level  
signal coming through physical vision  
hits the Soul of a person straight away

i.e. the structure of Consciousness in this case is arranged like this  
what does it mean the soul of a person is contained  
as a level that is perceived through Consciousness

it is information  
i.e. the View of God coming through physical vision  
which enters the Soul of a person  
and now the connection is clearly perceived at the level of Consciousness

i.e. a very specific level is formulated  
questions and answers in words

for example What needs to be done there  
where do words in the form of questions come from?  
Well, if you think about it  
each type of words there can be taken from the situation yes  
but in general this is where the level of questions came from

after all, God, for example, knows everything

then it turns out by analogy

A person shouldn't have it either

Well, there are no questions as such , in a direct sense, I suppose understanding yes

by Likeness

a person must find questions for himself somewhere

he must create

an area that is kind of unknown

or is it not controlled there ? it turns out that means

and that's how everything in the world is created

even this area must somehow be created by man

at some level

For example , what is the difference between man and God?

a person creates this area for himself

which is the area of uncertainty it turns out

and based on this we in order to be more similar there yes

To God

or there are ideally similar ones

We should implement this area less in management

i.e. the area that relates

to the system of indefinite coordinates

there where well the situation is not quite clear

should become smaller

and then be excluded from management altogether

in some cases

or it shouldn't be there at all, for example Yes

then it turns out that when you start

this area should be taken out of the control level, as it were

in the structure we assume there is Eternal development

then in Eternal development it's all the same

any area then becomes manifest

at some point of control it becomes controllable

i.e. it turns out to be just a technology

if you have time

you can take a look at this area

how its glow from this area spreads into the future

and at any point have an element of knowledge  
over this area  
where something seems to be unclear

i.e. a person also has an exit mechanism  
in full control  
but this just takes time  
on which he can spend well your Consciousness yes  
to concentrate or not to concentrate

i.e. it turns out time as a structure of choice in the decision  
a person Consciousness he devotes to this or does not devote to it

own Consciousness  
Consciousness as an element of application to something

well it's not really philosophy in this case  
in this case  
it is visible directly in the control it looks like

that you can choose the structure with your Consciousness  
and whether it should be attached to it somehow or not  
This is where the primary level of choice arises  
what did god do  
why did he create man  
Why

He also had a choice, for example

and here at the first point of application  
He decided to create a human being.  
i.e. to actually highlight your own Image

from God's point of view  
He identified a structure that should develop yes  
i.e. He created a system of certain uncertainties

and so that God would have something similar  
well what a person has in common with the uncertainty system  
Here

because in the construction of the physical body  
It is important to highlight this aspect here  
what can affect the body and exclude it

i.e. everything should be clear and definite  
On the one side

from all sides in general  
even in many cases

it turns out that God has this element connected  
with the following system of human development

Well, with God everything is determined anyway, <sup>yes</sup>  
but it is precisely the development of man in the future  
because after all, man was created in the Image and Likeness

it is precisely its development in the future  
where he achieves complete control  
for God it looks like  
as a system of uncertainty in the past

i.e. in the current time  
He doesn't have it  
but He can create for Himself in the past  
due to human development

in Infinite Development  
anyway, a person achieves  
already an ideal level of management  
i.e. it becomes completely independent from the external <sup>environment</sup>

and it turns out that then God has decided the issue in the future  
that's exactly integration, <sup>yes</sup> let's say by body structure

Well further, God has the task of further knowledge  
to create other matter there, etc.

and here is the level of allocation <sup>yes it turns out</sup> a person  
image of a person  
it looks like it's in real time  
in real time  
the physical body arises  
due to the interaction of the Image of God and man  
due to their <sup>mutual</sup> views it turns out

although a person may not look towards God  
not necessarily visible  
but if he watches he just understands it faster  
and faster becomes more Eternal <sup>yes</sup>

or there absolutely Eternal if he endures  
there <sup>for example</sup> is management <sup>well</sup> for some time

sufficient for Eternal development

for example, you can do it there within a minute  
look at God correctly  
and Eternity is ensured  
due to the fact that it is interaction  
when implementing such a system, there is a problem

i.e. this is what it looks like again  
it looks like a level of squeezing out information  
physical body of a person

but this is not a simple form of extrusion, as it were  
namely, what is God  
there is a man  
and here they are together in the information  
and a mutual action, yes  
interaction of God and man

and mutual action in relation to  
to something  
or to someone in general  
leads to that  
that they have exactly this Image  
The image of God and the image of man

and here is the difference in images  
i.e. each person has his own image  
allows you to see the structure of Infinite development

here is any difference  
this is the Infinite path of the entire external World

so it turns out that  
i.e. well differences in appearance, etc. Yes

so it turns out that the entire outside world  
from this point of view  
develops towards man and God  
when they interact

and an ideal level of control  
over the entire outer world  
is control over one's own physical body then

that's why it's especially important to continue studying  
control over the body

because in this case we can actually control  
external Reality

so it turns out that we will say this  
we control the physical body more and more precisely  
when we control the outside world more

Well the same control system  
how we solve problems more accurately through Macrosalvation  
this means that we control the physical body more precisely  
as if without even setting this task yes it turns out

i.e. it is clear that everyone has a body  
and it seems like it's not even necessary  
there is constant management work  
but here the training in management is precisely that  
here you can use a word like "training"  
there is general control" to apply

although this is not training in the direct sense as such  
namely, simply practical activity in management  
where you get your own physical body

solving the problems of the outside world

and here the only moment that exists is this  
that as soon as you start to decide  
tasks of the outside world  
then the world has different forms, different systems

Have you noticed that when there are a lot of things to do, for example  
structure of Thinking  
tries to choose there instantly  
some kind of universality  
i.e. to obtain some average coefficient firstly

if a person does all the work for example Yes  
and the physical body endures  
Well let's say ninety percent of the world's events are there  
and then the load begins

then here is the ability to take control  
in one current coordinate  
this is once again one of the management tasks  
or there are manifestations of the physical body  
in the management and information structure

because in this case we are still talking about that  
to be in control  
the physical body was correctly perceived  
manifested itself

and the exact position of the physical body  
in relation to  
to all phenomena of Reality this is also control

precise element of Consciousness  
at some point  
this is already implemented control

so it turns out that the next control element  
as if the third axiom in this control system  
is that  
that we draw the element of Consciousness in this way  
that somehow we put it in control like this  
that it determines the structure of the entire external world  
and the physical body at the same time

i.e. the next level  
it is actually a kind of reference level  
Well some light element of light  
which relates to the concept of "Consciousness"

is there an element of your Consciousness

is introduced somehow  
into the structure of all connections of the World  
and so you get  
as one's own physical body  
due to the ray of light from this segment  
and that's how you get the whole outside world

i.e. concentration occurs in that  
that you have placed it correctly  
control segment at some control point  
and you get just the opposite kind of glow  
and you get the Norm due to this

This is by the way a pretty strong control element  
related to what you show to many people  
how to do it right away

when you are only concerned with yourself directly  
then your work is often closer

to your information  
and people see it can be conveyed  
but this requires some effort yes special

and if you do management  
from any actual impulse  
but the most intensive management  
if you have placed the Consciousness element correctly  
into the structure of a certain task

and the World began to transform  
that you set up the controls correctly

and then you got a glow in your direction  
then you get a natural physical body  
which is related to the implementation  
generally speaking, any control systems  
all over the world

i.e. you receive it in its natural sense  
just like an ordinary person lives, yes

i.e. he participates in the system of the Universe  
he has certain actions  
and his physical body has  
Well normal , kind of neutral or something for Perception  
character

i.e. he thinks that this is how it should be  
Everything is fine  
additional that needs to be done here

and so that this training system  
It's actually a control system  
already define it this way  
so that you have not just a natural level there yes  
Perceptions of the physical body

and would also have a structure for further construction  
of your own physical body  
or there Well any other person is possible  
at the level of the natural plane of Perception

i.e. at the usual level of collective Consciousness  
the physical body exists  
you perceive any other person

there for example, you act with your physical body

and with all this you can build up  
control system further  
i.e. to make exits specifically into the structure of Eternal Management

this is how the human physical body differs  
at the level of sensations even <sup>yes</sup>  
in information when you work

when you work in a structure <sup>like</sup> Eternity  
or when you work  
just at the level of some, let's say, one-time tasks

right here, <sup>right here</sup> there are tasks <sup>there for</sup> development  
there is a long <sup>yes</sup> or even Infinite  
but where do you set local tasks

this is the difference  
in Eternal development it is immediately clear here  
that the physical body must precisely self-regulate

i.e. you must be able to inside the physical body  
find images there some elements  
which would allow him to do it on his own  
namely to go in the structure of Eternal development

i.e. the transition from the element of Consciousness to the physical body  
where the physical body is precisely Eternally developing itself  
only because it is inside the physical body  
there are such mechanisms

i.e. no effort is needed, specifically efforts  
apply  
i.e. you can consider  
the physical body thus  
that there is a resource there

but at the same time, <sup>for example there Well</sup> simple element <sup>yes</sup>  
it is clear that the physical body  
in general, as in the structure of general overall management  
demonstrated by that  
that a person there can pronounce some words  
starting there from childhood  
starts to pronounce, etc., etc.

This is related to the function of human Consciousness

if we abstract from the concept of "Consciousness"  
separate Consciousness from the physical body  
and let the physical body itself speak  
i.e. no element of Consciousness is introduced  
but it's just the body that works

the body as such has Eternal development  
if we, for example, do not consider such concepts  
as "Consciousness"  
then the body should work exactly the same way yes  
have full functionality  
have Consciousness  
have a Soul  
there is the Spirit  
i.e. all the attributes that are required for a person

and here we get the inseparability of one system from another yes  
On the one side

Means but we can show that at any of the levels  
we have Eternal development  
and the Eternal of the physical body

i.e. in this case, the transition to work  
only through the physical body  
leads to the physical body  
acquires universal status again

i.e. you can form a thought and a word  
first in the Soul or in Consciousness  
then transfer through the physical body

then the physical body is autonomous

it is perceived as an ordinary body  
and has an autonomous status in information

but if the reproduction of these same words there  
comes from the physical body  
then the physical body acquires  
the structure of universality in information

i.e. very simple  
time Infinite outer world  
then if the physical body  
reproduces the analogy for information

it becomes infinite it turns out  
in self-perception

then the task of man  
to come to the usual level of body perception  
the body is still a local system  
and be able to control this system as a local one  
then you need to make a reverse level  
again, as if to assemble the structure of the physical body  
in the structure of Infinite development

where every future event  
contains all the information about the physical body

i.e. the body transmits information there to the external environment  
becoming Infinite in information  
can't be lost there For example Yes or is it transformed there  
because each element contains  
all information about the body  
i.e. there is no gap  
between Infinite information and the physical body

thus we come to the Law of Here is the connection  
Bodies of God  
and external information  
where He also has no gap with God

and that means change Well as if of internal content  
change in the status of the physical body

i.e. change in the event structure  
due to Thinking yes  
God provides for , let's say, some event  
but there is some kind of complexity here  
in human perception there must apparently be  
although a person still perceives it the same way  
how God perceives

all future events  
God does it himself  
so if He does it somewhere ahead  
in this case

and the person perceives  
just as God perceives  
from the point of view of Thinking

it turns out that all the phenomena of the World  
crossed with him  
through the physical body yes

i.e. why does God need a Physical Body  
so that all physical phenomena are primarily of the World  
bring into an equal system of interaction

then the next control  
this is the principle of equality in interaction

as soon as you cross over  
into a structure of equal treatment  
you are going back into the structure  
precisely in the structure of the local action of the physical body

where through the physical body they act there [...]  
Well for example, we can even have the Souls of other people here  
you can see how they work

i.e. here it is very important not  
directly there through the body  
and transmit information  
you can accept something or not accept something

and here is the structure of the language  
has a different meaning  
you can see the structure of colloquial speech there  
where fragments of words have a different meaning

i.e. now this meaning is one  
there, having reduced the management structure  
by cutting out some intermediate words there Yes  
or there are common, generally accepted expressions  
you have a more concentrated form of control  
i.e. a different control sound  
while maintaining the physical body the same

i.e. it turns out to be one of the management criteria  
is the ability to understand with the body

information of the future  
even if the information is compressed

Here, try listening to this for example there in the Infinite Future  
somewhere ahead, at least 10 years ahead, yes  
some offer

it compresses and some of the sounds fall out

but the physical body

here it should be perceived the same way and there

i.e. the ability to listen with the body

ability to work with the body

this is another aspect of the construction of the physical body

through the structure of your Consciousness

i.e. any elements that are reflected in Consciousness

realizes your physical body

this way you acquire

here is an opportunity to work through this technology

with some kind of plasticity of the body yes

i.e. you work so that any external elements

a certain form there is the norm of the body

Eternal development of the body

are tuned precisely into the structure of Infinite Life

and then adding some elements there

namely, the special Eternal development

you can see events

which need to be considered in advance somehow

take into account places

This is actually quite a powerful controlling clairvoyance

because the ability to work with the physical body

this is a powerful, including predictive, management

so try to do it in this system

Predictive management, precisely

then it turns out that you are from the element of Consciousness

always create a physical body for yourself

this is where the main control element is

skill through thinking

through predictive characteristics

have your own physical body

or any other person there

it is in the Eternal development

This is where I end today's seminar.
