

GRIGORY GRABOVOY
The Teaching about God
**Creation of the space of Eternity
and the time of Eternal development**
24.06.2005

Hello again
the topic of my seminar today
this is my Teaching about God

and at this level of management I would like to consider
already the structure of God's Action
when God practically realizes
Well, actually, Your Action
which is felt by the personality of a person

so this topic will be
creation of the space of Eternity and the time of Eternal development

i.e. in this case I would like to show
human action for example
and the Action of God
in conditions for example well, among other things
there is an event management level
this action is often simultaneous

therefore it is necessary to consider here
for example the spectrum of space creation
how the action is still simultaneous
here at the first level of management

in this regard, as in any simultaneous action
must see
how to set management tasks
in this case
what is control action
when control has already been implemented

God has control implemented
before He begins to act

i.e. for God the principle of control is like this
that He works with the implemented system all the time
and therefore for Him
Action is simply expansion and development.

His Personalities

i.e. in fact, to create the space of Eternity
Eternal space
it is necessary that the action
at the same time meant the development of personality
into the management structure
in this area of activity as if in fact

and this means you need to be able to consider
the structure of all external information
i.e. to understand the scope of activity
try to take into account some of the subtleties of this area
and taking into account the already cumulative information
return to initial action

i.e. it looks optically like this
that the person who worked like that
looks first as if at distant information
what happens in the area of the following events

and seeing what's going on there
valid here

because well for God it is a simultaneous Action
a person must actually create a logical
as if a cause-and-effect picture of the action

therefore, consideration of further actions is precisely this
this is the creation of the time of action as such

i.e. time is perceived
and as a local quantity
and just like the value is of course global

therefore the time of Eternal development is implied
as some specific time this time of Eternity yes For example

i.e. time itself "has the characteristic of Eternity"
Well, for logical perception this is a diverse concept

and that's why we're looking at it here
time of simply Eternal development
as such, as if the current coordinate of time, including

and if we consider

property of time in the structure of Eternal development
it turns out that time is the same as the structure of space
and also as a kind of substructure of space
with Eternal development is gradually displaced
into the structure of our current state

i.e. if we look
on Infinite Remote Events
or even very distant ones
for example, many billions of years ahead

then due to the fact that it is like a viewing function
in the current tense
starts to analyze a large number of events
perceive
then time is displaced to the point of action

i.e. the same as God
time exists only at that level
in which the action took place is obtained

and longer God already acts outside of time

because there are a lot of events
i.e. the mass of events is already measured
an event as such without time

and when we start building
this is exactly the second part of this control
this is the time of Eternal development
then we must time line
it seems to stretch out artificially
due to one's own intelligence in Perception

for example for a person
time quite often conventional value
i.e. one person if he is on vacation somewhere
can perceive time at one level of control
if he works a lot
it means he can concentrate it in something else
try to manage to do more events during this time, etc.

i.e. he tries to detail time according to his personal plan

so here is the time management in this coordinate
this is also a personal characteristic
so in both cases

we are dealing with the manifestation of personality ^{yes}
where is the action
Souls
Spirit
Consciousness
physical body

and so to make the body Eternal

because the Soul is Eternal

we must in this case
split the control function
to the level of comparison ^{well as if} corresponding quantities
in this world ^{yes}
i.e. some objects of information

i.e., having determined , ^{for example,} the structure of the development of the Soul
into space
just take this logical point
That's exactly it, by the way, not time but space

and the structure of development
and Eternal life, ^{so to speak,} of the physical body
take the time coordinate of time after all
although this is a dynamic quantity
and it would seem easier to just take and do the opposite
Spread the soul to the level of time

but that's actually the point
main control characteristic
in this aspect it is precisely the Eternity of life

because as soon as we start doing
time structure
correlated with the physical body
then it turns out to be a control level over time
becomes a physical body
that's exactly what we need, ^{yes}

we need Eternal development to be
^{well, reliably in the process of action, yes, accurate, etc.}
reliable
so we need coordinate systems
it is correct to define

i.e. what is Eternal development for a person

in the current tense

that he must have time to do something there
or he can just rest there and do nothing, for example
or he does something very intensely

also, like in analogy with what I said
what personality
personal characteristic of time

then here we see that time begins to generalize

somewhat as if even to disperse
as soon as we get back
to the previous time coordinate

Well, I'm back at the level I said earlier.
control
and the dispersion begins

i.e. time is reproduced because
that we react to our past
and well even if it was there just a minute ago yes
realized in the form of words suppose

then it turns out that based on this
we see some fluctuations in time
i.e. well, well is there something in the substrate of action?
because a person logically invents time, yes

then select the real coordinate
which does not depend on the logic of the process
i.e. time as such, for example Yes

having entered the structure
For example Well, that's not the concept of life
that "the word defines Reality" among other things
then we can highlight in the information
the substrate of time as such

i.e. there is a concept of "information" we speak of
there is a concept called "time"

well what does it mean
Well, there is a change of seasons, etc.
we tie some events to time
we take it and do it logically

if there is a planet where, for example, the conditions are different
it means differently

if such a task is not set somewhere, yes For example
Well, a person shouldn't tie his events
by the time
he may not use such a phenomenon as time

he can only interact and sense
that it changes there
but it might not be him personally
and the structure of the fabric there, etc.
and consider that it is connected with time, for example Yes

i.e. it is more of a logical postulate
this is what happens in the logic of social processes
like in a general context or something

but we just want to highlight
True time is in the information itself

i.e. there is a concept of "time in information"
and we want to isolate from this substrate
what is time as such from God's point of view

God entered such a coordinate
and for example people called it time yes
initially God called it time
He must somehow determine
knowledge transfer system

i.e. well, if we proceed from that
that in this World any concept is connected with that
that God does it first

it turns out that initially
time as such did exist after all
for example there is a different version of events

i.e. there is a substrate of time
in the concept of "management"

on the one hand, logic
on the other hand, time as such
which, as if interacting as some matter, yes
for example with the event system

influences events

i.e. we say this
that even if a person
on some independent territory there
Well for example there is some planet there and there too
one person flies there
he doesn't need to connect his events
over time of interaction yes
for example there with other people

This is a fundamental question by the way

if it doesn't interact
he's the only one there
well, anyway, he interacts there in telepathy, spiritually, etc.
at any distance

there distance doesn't matter

but that's exactly it if it doesn't tie events
then the logical postulate of time expands
i.e. he has more logic in time
like he's breaking away
from the task of often temporary actions as such
connected , for example, with meeting with other people

but as soon as a person appears
or even telepathy
then time is sharply reduced

and that's why when we met
for example with already resurrected people
there is a sharp reduction in time effect
because this is a completely different level of Reality
where is the structure of Eternal development
beyond the first level of resurrection

that's why time is often reduced to such an extent
that it begins to influence space

and this is where it happens
it is precisely the elements of displacement associated with that
what happens is either short meetings
or somehow remotely

but here is the level of a direct meeting , for example

in physical space
this is structure management
precisely the decreasing time

i.e. when time is running out and you need to get it done
at this time to fix and stop this Reality *yes*

i.e. it turns out that the structure of the Eternal space
this is a certain influx of Reality
in the structure of time

if you consider this
well, in the form of some kind of optical model
reminds me of some such
well, let's say a comet-type system, *yes*
that the outer shell of the information space
this is information and space and time

and the inner one is the space itself
which seems to float into the structure of time

and by the way, so that the comet is real, physical
didn't get to Earth
it's enough to change a small one
very spectrum of time interval in the first
in the first front of the movement of this matter

and usually when the comet moves far enough
then here, in principle, time begins to look like matter

and in the optical range
we see as if it were a substance
in fact it is the structure of revealed time

i.e. on a material level it begins to transform
from the moment this value is fixed
is part of the structure of collective Consciousness
and changes

i.e. the external object is modified
here is the first one , *in general*, it is even the main one in many ways
property of the space of Eternal development
spaces of Eternity

that the object is modified
when interacting with it
and is already changing more clearly

than in the general system or something in logical Perception

Yes, we think that it is from interaction
the number of events is increasing
some functions of the object are increased
any

but in this case we can see
this is already material
at the level of physical Reality

and thus we can see quite clearly
the next line of control
what from the future
namely the Infinite Eternal Future
where man is Eternal he develops Eternally
and such a future exists for all humanity
each individual person by the way

so it turns out that the signals that come here
it is precisely at the level of some control structures
these are often signals associated with Eternal development
which are available in the future

certain bars
many are already reaching this state
and they are already in this information

and someone, for example, thinks that it is somewhere far away
then it turns out that if he thinks so
a signal comes to him from the future
and here a probabilistic line of behavior emerges
multi-probability yes

i.e. the future becomes a more mobile quantity

and enter the management
is carried out
through the moving coordinates of some future processes

while that manager
which is already in this information
his future is often quite clearly defined
precisely at a positive level of management
as if Reality even

and it turns out that here

take action often enough
which can be taken in advance
i.e. well there for some days , there for a month and a half, two months, etc.

i.e. those events are visible
which can always be modified
for a certain period of time

such a manager has very clearly visible
interaction parameters
time - space
he makes the line of action Eternal
and that's all

here is a segment of time, a segment of space
he makes the Eternal level
then the following event occurs
naturally you can shift it
well at least improve
as far as it becomes acceptable
for example for further development

i.e. not all events are necessary
It is imperative to completely restructure
for the best

it happens that an event even if it is kind of partly negative
or even if it is negative for example Yes
then you can just on the whole background of management
reduce structure for example
if it's very negative there
at least make it there well there is not much negative there

at least so that the event does not have a radical impact
on the line of human development means

and if there is time then
well, that's normal physical time
then you can generally restructure the event and make it negative

it's just that a person chooses for himself
but at least some very problematic events
he must always be able to restructure

in the structure of Eternal development
a person should even a local event

if possible, in the first level of development of Eternity
well, those that may not even be very problematic
be able to regulate from a distance, yes, let's say
in advance

and in the long term when he works out the ideology
already systemic management of Eternity
he must be able to manage any event
at your own discretion

naturally then he chooses
because he is the ideologist of Eternal development
always chooses help there apparently in this matter yes
to yourself
to others
and here the whole Reality becomes controllable
from the point of view of the logic of decision making

then the next level of management
in the construction of the space of precisely Eternal development
in the space of Eternity
i.e. what is meant is the property of space Eternal

this is the ability to choose
dynamic solution
which depends only on you
i.e. in dynamics you choose that aspect
which you have complete control over

like God for example yes controls all Reality
He knows exactly, i.e. His knowledge is Actions
and therefore He controls precisely, i.e. everything is controlled by Him

and for the practitioner who acts
as God works
it must turn out that he will work out
a completely unambiguous line of development
any dynamic system to Infinity

i.e. it is taken there as some infinite quantity
he should, as it were, with the very first impulse
get a virtually sustainable effect right away
i.e. this is some kind of special task
reminiscent of some kind of training even

i.e. the person goes out specifically

for all Infinite development
in Perception
and looks for some kind of dynamic system
which is definitely realized in a positive sense

It is easiest to do this if a person sees yes
controlling clairvoyance
there is a Spiritual vision
i.e. we need to have time to develop the Spirit so much
so that the Spirit
there is the Soul of man
or even the glow of the often physical body of a person
so that these optical elements were further than the event

this means the third level of construction of the space of Eternity
i.e. Eternal space in fact
this is the presence of an external point of control over the event

i.e. the spread of one's Spiritual action
to an even higher order even faster than
than even the infinite quantity
than even Infinite can be like that
Well as if in a direct sense
speed

and what could be higher than Infinite speed

means the existence of some phenomenon
before the action begins
of the action that is associated with Infinite Speed

so it turns out that it's the same as God does

He always exists, yes, at any point.

this means we need to study the internal properties of the Soul of God
understand how He exists in that phenomenon
which is like Well, it's connected with neighboring phenomena

everything is very simple here, it's just in logic
it turns out that God actually kind of extrapolates and develops
Your own Essence into space

Here he is, for example well it exists there in the Physical Body
He has neighboring cells yes
Well, normal ones, ordinary ones, like those of a human, for example

and these cells exist
and in that case yes if He does something

Well for example, a person does something
but the organism exists as if independently of its actions
often let's say so a person can think yes to himself

and this certain system of pre-existence
those. pre-action actually
related to the human body
translates the structure of Eternal space
into the human body
from the point of view of the Eternal, namely the development of man
Eternal standard of living i.e. Eternal life

then next level
formation of the Eternal space itself
this is the flow of formed space
not in the form of space there already in the form of information
into the human body
and then the organism becomes Eternal

so it works out
that the formed physical Reality
must generate some information

Well, for example, there is a person eating fruit
it uses the material substrate of the planet's information yes For example
Well, in this sense, nutrition is an information exchange, yes.
with the external world system

and then it turns out that together with the food structure
there for example there was some fruit growing and interacting there
with all levels of the World
World events changed
and they act on any element, yes

on any plant for example

if some fruit is eaten
means the total system of events
is reflected
in the information exchange system

logically, something needs to be disrupted in the information environment
fruit even if it sprouts 5 minutes
this is an infinite number of events actually

because at a certain level of information
the number of events becomes Infinite
because space is infinite

even in a second the events there are already Infinite
as soon as the grain, for example, sprouted yes

and get something out of there
from this level of management
and also use it by, as it were, processing the management yes
to the action level
this is actually a special task

and God decided it this way
what He did the seasons for example
show that it is possible to change the system yes

then it turns out that we can say
yes we can change the system
but how did God do it

He made that system
the change of seasons is aimed at life

so if we take and eat some fruit there
in this case we are considering
structure of direction for life
in their actions
It is clear that this is necessary for human life

but if for general life
precisely the aspect of universality

then it turns out as soon as we consider
processing element
any information of thought there
it doesn't even matter what the essence is
to the level of Infinite development for all

then we get the next level of construction already
and the space of the Eternal
and the time of Eternal development
time seems to flow out of space

here you can even see that it sort of flows in general there
touches space and flows further
in an independent environment

there is a concept called "river of time"
here you can see by the way what it looks like
exactly like water, let's say like a river

and at the same time this is the course of time
if you look at how it is defined
here is a river, it is clear, there is always a question
and where does this river flow?
here's where you can actually feel it, yes For example

then it turns out that this is exactly the channel
is located first of all by the way
in the space of human Thinking
i.e. it's not even a physical space

and when we start to consider
this is the movement of this river
then we see that the channel in principle has
some kind of cylindrical system

although if you get closer
well, for example, with a view of clairvoyance, so to speak
you can clearly see the waves boiling
i.e. time is just like a substance

and here, for example, you can take and catch
for example, fish and some Eternal

so it turns out that but that's the peculiarity
actually, let's say this fish of Eternity
what if you catch her
it's still the same there
this is the peculiarity of this river and the property of this time

and it turns out that the structure of interaction
with this system
if you go deeper it should be like this
what is Eternal Time
and time comes from minus Infinity yes

i.e. it is plus - minus Infinity
it means that your action is embedded in time itself

and it turns out that no matter what you do
in this system

you are there all the time
in the system well as if still its own management
i.e. you are in a closed system
your action was originally programmed into the system

which means you are kind of from the outside environment
you can take it
only dynamic characteristics
i.e. you can perceive only the liquid phase
well, like moisture, yes let's say so

and for example that's why it's a river
because in this system
everything external looks like movement

as I said
by the way it's very simple, well, you can see it and even feel it
because from minus Infinity there to plus Infinity
the whole system is kind of autonomous

and whatever you do
it turns out you come to the same thing
i.e. you have already been here

for example, who has developed clairvoyance
if he looks at himself ahead for a long time
to your events
then after some time he may even get bored
he always seems to see the same thing, yes

so it turns out he can determine how
structure of time for yourself
as some kind of external movement everything
everything is static but there is some movement

he either makes it up
or he watches with his eyes
just because it moves

Well, for example, my practical experience is personal
shows
what when i am all the time
well, even on production issues often
I looked ahead at the planes and so on, some situations

then he came and everything was the same
right down to some small scratch on this plane, etc.

then it seems to arise Well, that's the situation
if you even especially note the time there and put it down
what at such and such a time there in this place
there will be such and such an object

for example I take a watch
I'm looking at exactly this object at this time
exactly like this exactly exactly like this

i.e. it turns out that
although a long time has already passed there

At first I even did it like that
I wrote out, for example, a certain plan map
and just put down what would happen at what time
where will I be for example Yes

and came yes
this is where human free will exists
i.e. when you can come once just to check yes For example

Yes, it all matches down to the smallest details.
that at such and such a time such a person
it will turn like this
at such and such an angle

that's what happens

and it turns out that since these phenomena
Well, let's say they match perfectly
of man arises

i.e. then I can say so
I wrote to myself but I might not go there

i.e. in fact I'm just on everything
Well, I painted it myself and I'm checking this area, yes let's say
and that's all

and here it turns out
that God is already in the form of a Person
gives knowledge of Eternity
individuals by change of decision

Well, if you think about it
how does a person change his mind

he has the opportunity to see everything
this is the structure of time
when it is completely the same type
Means well, that is, time can always be used
to confirm the events of space it turns out

if you translate this into logic what I said
to check the events there by time

I walked around the space later
and looked at the plane there
or to some other systems of the outside world

it turns out that here the level means precisely actions
that the personal factor
as if it were floating over a person in this sense

i.e. one can see that God is a Person
and any phenomenon that matures before you
this is a personal factor of manifestation of the Action of God

and when you start interacting
with the Personality of God
then naturally it becomes clear to you
why does this happen in this world yes

i.e. why can you see everything around you
and why is this normal in principle
and over time a person gets used to it
but not in terms of testing, but in terms of everyday life

i.e. then you kind of get used to it
and move on to the structure of ordinary life
Well is it like this and that a person sees everything, yes
I already have all the events from childhood there, for example
I saw the forecast down to the smallest detail

but nevertheless when I wrote it down in the protocol
and I was convinced that it was one to one, for example Yes

on the one hand it means it worked
that is the most basic question
it's like a question again to that
what if i choose a solution
I don't go to this place yeah
I wrote it down but I'm not going there, I chose another solution

then what's the difference
I can look the other way at this moment

and again everything will coincide yes that's how it turns out

and that means here is precisely the structure
to a greater degree the revelation of the Personality of God
in this system

i.e. here is precisely a dialogue with God
for another person
that's what he sees in that he sees some kind of plot yes

here the structure is floating there
some physical information yes
there he goes somewhere
Well as if an influx of information actually

if we switch to a wave system
then there are microsystems, well as if micromolecular waves
and any dense matter
this is some light some information yes

and this is the level of interweaving
with action information
with the substrate as if of the True controlling action

it turns out that at the root of this phenomenon
the Soul of man is still located
where the fundamental is concentrated
central system of action
some central level of control

and that's when a person begins to see
this central level of control
i.e. to see that he can control the system
he can bring it closer and control it at that moment
for example there by remote systems

for example, he needs to do some healing for someone, yes
he took over this management
and that's all
the person got healthier another

can anyone use it on
on myself

if the person there is completely healthy, for example
and well or there absolutely healthy yes
then he can change events etc.

i.e. being at the central point of control
through interaction

human personality
The Personality of God
and a person knows the World completely unambiguously
i.e. he sees the future yes in this case

i.e. I just showed it
that as soon as there is personal interaction
a person can see and recognize the future

Well, maybe it's not necessary to go into such detail there
maybe it depends on practice

For example, I've been watching it there all the time since childhood
but no, I didn't write any protocols
for example I gained experience there
Well, that's how I think, for example

and this is like
or I've always been able to do it like that, yes
and actually it's not even a question of someone's skills
after all, I am giving a universal system
and I know that any person can be
in these same development systems

and it turns out that for a person
the question is not really that
to see something or to analyze something

the question is still to achieve Eternal development yes
for myself
and for others
here, if you have a certain level of knowledge

God is Eternal, so the question is
as the Personality of God
Means Well there let's say it has such technologies yes
how it is eternally developing for example

i.e. it turns out that here He must
God must have some methods to implement

since He is also a Man
He must generalize some systems of knowledge there, know, etc.

and it turns out that here it is just
here is the transfer of maximum knowledge
as from person to person
from God to man

it turns out that here
an element of the inner essence of God
means that God created the development of man
precisely due to the structure of birth
well, yes, another one for example a person

i.e. when a child is born
it turns out that the total participation of people
parents of the child in action
begins to affect the duration of the action
on time itself as such

and the logical time is the same
over time, as if informational
True yes so let's say with the time that God gives
here is the beginning of birth, this is the time given by God

and it turns out that in this sense we begin to see
that the beginning of the birth of a child
this is a sign from God

so it turns out that
Well, since the child was born
means beginner level
it has an infinite development system
that means there is a comparable level somewhere
i.e. his Eternal life of this child

and when we start to analyze
event structure
and we begin to find ourselves already, as it were, logically yes
in this system of connections

it turns out that we can quite clearly
divide then
it means that there is Infinite time in Perception
and how in this time

there is an infinite space

i.e. we perceive the future

well, in the first impulse of Perception

more like Infinite Time

in this case, when we look from the point of birth

and then it turns out

what does time mean as a controlled variable

in this case we can make control

in principle, any time

we can solve our problems by working only with time

excluding events from time

or there increasing events in time

often without recording the event itself

and just say that at this time

only such events happen

but we define the time spectrum

then it turns out that based on such management

we can see very clearly

where, for example, in the resources of the human body

there is a certain generator, so to speak, of time

namely Eternal time

because Eternal time from a human point of view yes

can only be in the person himself

i.e. only in this way can he be sure that he is Eternal

when it generates the time structure itself

means the time of Eternal development of Eternal life

is located in the person himself

and of course there is even cellular generation

system generation of this process so to speak

when a person begins to recognize

process generation locations

then in principle he can instantly transfer knowledge

maybe thereby making a person different

Well, actually it looks like this

that the other becomes, as it were, instantly Eternal

here a path appears before him

and then he chooses the person

does he go this way or not, for example

God did it that way He did it Eternal development
but unlike human action
God gave more than one way
and God knows that man will be Eternal

i.e. when a person knows it
then he can help someone else
go this way

i.e. generation of Eternal time
i.e. the time of Eternity is the time of Eternal development
something that is generated by man
is given out as a system of often unambiguous knowledge

i.e. well for example, to recognize some kind of plane there
that he has no problems there or does he have some problems
this is usually a completely unambiguous event

and the ability to clearly present this information there
to others yes
so that they have time to master it
it's still like one series of events

Well , there the future is multi-variant
a man if he knows the future
reveals events
but we still have to prove that the event will happen

and if it is spontaneous, as if chaotic
not related to external causes
but the object still needs to be saved

then the next element of the action
time of Eternity
it is the ability to organize events
not related to current time

that's why there is a gap between man and space
and other objects
there is some space

i.e. why did God create the world like this
what the world well as if not connected with Him
with some physical strings

and because this is exactly where it comes to light
discreteness in event form

we must be able to translate the system
into the structure of action
i.e. we can control the system yes

those. development is embedded in that
that the system may not be connected
with the current time in a logical way
or even nothing at all

and it turns out that
Well for example, some object hits the plane, yes
but now he is located a hundred kilometers away, for example

and know that this line exists
it is possible only if we are the time of that event

at the level of logic
let's move it here, it turns out yes

and then we also need to be able to recognize space
what is the space of action
Well, I mean, I'm going into detail now.
the system of controlling clairvoyance in fact
Spiritual vision in essence
how does this happen in the logic of the process so to speak

the physical space should be the same
how a person looks like there
on any object of Reality
with physical eyes
and he is absolutely convinced that yes, that is how it is

and how to climb in for example
into the internal structure of some parts there
then we need to consider this
as at some level of the aggregate stand yes

i.e. there are a lot of seemingly incoming events
different levels
physical space
there is a stand space, etc.

so it works out
that the next level of development of the time of Eternity

this is integration, i.e. unification of spatial forms

different spaces should be at one point
well, i.e. unified to recognize
action of the future

and then it turns out what it means in this position
time is like an element that actually denotes
vaulting space into a certain drain

i.e. space flows to some point, it turns out
so that it is manageable ^{yes}
so that there is knowledge about this space
what in space what events will happen

and so it is
then it's clear why God ^{created} the world like ^{that}
that He Himself as the One Creator and Maker
exists at one point

because from this point of view

to control events ^{yes}
all spaces and forms must flow into one point

and therefore it turns out that there are, ^{for example,} religious people there
all ^{means} fundamental belief systems
built on an appeal to God
to the Unified Level

because it is right and it is so
spatial forms
wherever people are
they transmit the form to the United
Well, He is also the Source at the same time
He is their Creator, not just stock

i.e. in fact, the person himself organizes the action
it turns out that this is the logic

since they transfer the action to the Source
then the following action is obtained
this is a human action

So God provided an opportunity
next action
as open actions

i.e. it is an open system

for example, I walk and see the same thing
but what I, for example, looked at before and wrote down on the sheet

but nevertheless it comes from me
well some light
which is just like any personality, yes
which means that it forms some other information
besides what I wrote there

I myself have at least already passed through this place
I do something, right?

and it turns out that since I am there
I made the decision myself
and I myself am looking at this leaflet
and it all matches
so I do it

and it turns out I come
to the full control system
from a logical point of view, it is still control

i.e. the ability to get the same thing
it's all the same control

and from the point of view
Well For example there are systems of Spiritual development
if a person has been studying for a long time
practice of Spiritual insight there
he can count
that it was simply the Spirit that enlightened the events
and they, for example, coincided yes

but it's still management
it is still a human factor

and this is where the unification happens
personal context of time yes For example
personal context of action
and God and man

and here we begin to see
what is physical space

this is an element that carries within itself

Well so let's say **some property**

even so to say, a **specific component of living quantity**

i.e. the space begins to come to life yes let's say so

and as soon as we bring in

this value into the structure of space

that's when the Eternity of space

well it starts to be fixed on life as such

i.e. space is a consequence of life

and when we start to develop to this level

your yes **Consciousness**

then at the point of an already **developed wave of Consciousness**

where we see the incoming

i.e. **developing space**

we see that this is all our life

which is coming to us

with the help of there etc.

why is there life for example on the planet yes

where there are people

if for example you take and send a person there

to that planet where there are no signs

Well as if a **biological form of life** , so to speak

then after some time the form of a person

will start to create these signs

and it turns out that we see a person

also as a kind of receiver, so to speak yes to life

i.e. the external system is life for a person

if we recognize in this information system

what a person needs

then he can live, in fact, **renewing**

completely resource of this in the distant future

full resource renewal system

any planet of any civilization

in general, **any management**

because what happens there is the same as what God does

He created the world

but He's got some kind of electric batteries there
it doesn't feed it

and it turns out
that based on the system, for example, resource renewal
at the expense of knowledge
by highlighting the structure of life
in Eternal space and Eternal time
By the way, you can heal, and at any distance
quite a lot of people
sometimes a very large number even in different regions
if the point is correctly moved control

i.e. here it's just like this
Well let's say in the orientation system of various systems
so let 's take a hydrocompass there
or let's take it in air navigation
special navigation systems are used
who very accurately search for the point yes Means

and as soon as this point hits
into the system there are actions of various projections
then the point begins to be realized
for the whole system
and the plane for example and space, etc.

Well, as a rule, it is sometimes complex
sometimes some simplified system

and it turns out that we
now especially due to electronic means

due to radio waves there
there are scans of external objects
we can see that if we start at this point
search
here's the type
well, some kind of balanced state of matter

then after some time we see
that the point itself begins
produce space
here is space as such

i.e. we begin to see
that space exists in its pure form

and then
then we get to the same platform, well, practically yes

this is how God works
He is the Eternal Number of Years
is on the platform
virtually timeless in essence

and in this technology you can at least
there to step on the same platform for some time
and then the controllability of the World
becomes almost complete
from the point of view of the logic of knowledge, so to speak

i.e. you can know any system
it's not like there's a road there
it may have an effect and the asphalt there will improve
it just doesn't need to be done logically

but the system of knowledge simply opens up
absolute as if type yes
or close to the type of absolute knowledge

i.e. you can learn any system
if so then there are limitations in Eternal development
you don't have it then

then everything depends again on the goal
well, I mean, why did you end up there?

there, well, you can be there and think it over
how to improve tree growth in general for example Yes
well, okay, we improved the tree's growth, and then what , etc.

and then the situation is like this
what when you go there
with the thought there with the idea or let's say even the task
maybe this is not an idea but just a task of Eternal development

because it is considered that this is the idea of Eternal development
it's like something artificial
in fact, man is originally Eternal
he just has to implement this task

the idea as such exists in that
that God is Eternal

even this is not an idea, but rather a practice of the World Order , so to speak

if you analyze the world fundamentally
then the basic Laws are almost all even
can be deduced from the structure of Eternal development

so that means a person comes there
with this very task
and this is a rather pragmatic value
as if the event is so simple in general in understanding

what does it give to a person yes For example
how will he realize himself there

so that's when he sets the task of development
already in front of the same plant
about which I said as in the example there
it is possible to improve the life of the plant

but if he sets a task
any object of information
it is in the Eternal development of this object

then in fact it solves any problem at its root
including their own

i.e. it turns out that to the root well or something more precise yes it turns out I came to
the solution of my problems
at that point
where does a person generally do for all objects of information
makes the structure of Eternal development

logically it is so
the more a person gives to the whole world
well, the maximum of creative knowledge
manifested in his Consciousness
the more benefit he receives from the whole world

well it doesn't look right by the way
as a reverse action
it's just knowledge of the world system

another element of Reality he can save
but that doesn't mean you did it there
and you don't need this in principle
to a person

you just need to live forever
teach to live forever
so it turns out to be a training in Eternal life
i.e. the transmission of information about Eternal life
this is an element of time again yes
we need to transmit more information within some time

and it turns out that, for example,
do some kind of healing there , yes
or solve some event level
we need to see
that we transmit the structure of information in time
and it turns out that we ourselves create the form of time
in this action

because when we transmit
we are thinking about something
in terms of the trajectory of information transfer
are there any geometric lines

after all, a person if he is there
Well there he bathes in the river and swims
or he took a bucket of water and carried it to another place

why am i talking about water
it is a comparable substance yes

then this is also a certain time movement
i.e. if water is perceived as time
then the movement of this water transfer
it's a whole group of events

by the way, here it is possible to see exactly
how is it going well as if a chaotic action in events

transport of this system over some distance
there if it is necessary to carry out this system yes
this is a completely different action
of water there in your hand

and it turns out that in order to correct the situation here
need Infinite time
to change the situation
from the point of view of systemic events of the past
or some one-time events of the past

if you shifted the structure of time aspects

i.e. your Thinking
your action
and you even with the prolongation of events in favor of ^{yes}
do not consider all systems

i.e. here it is always necessary to consider
all systems

for example, it is taken from the river of time
two buckets of time
Well, two pieces of some sort ^{are} pulled out

and we want to see
and what are the properties of this system?
i.e. where is space and time anyway?
what is it based on

why doesn't this river flow somewhere there ?
why doesn't water spill
well like in space ^{for example} if there are no shores

so you can study the properties very easily
take two separate objects
and see
that the chaotic level of events
comes from interaction
two Eternal objects ^{well as if} chaotic

i.e. the level of events
which may prompt further analysis
necessary in that regard
what a person understands
that in principle he even needs to develop Eternally

i.e. the element of necessity arises
from the level of previous events

and the preceding event is very simple
a person appeared once
he was also in the previous event
All

so it turns out that he has it
the need for Eternal development

it's just me actually being here
in general, I'm looking at some specific values
and I'm already showing it as conclusions

so everyone in their own life
can see specific events
and see that at certain levels
It would seem that such small events are not common at all
but of course there are such
that the person is trying to help someone there
the task of Eternal development arises
exactly the task

and it is usually expressed and personified
specifically by specific individuals
specific events

this is when the event task starts
Well, there it will be visualized and revealed
then the following property of Eternal space arises
and the time of Eternal development

what from the point of view of the past in general
some aspects of the past, etc.
this is a very stable system
which allows you to see
that having overcome some event at least once
well which one do you like
can be considered as a complex event
or maybe something ambiguous
or an unusual event
and you were able to get your result

there is a very systematic conclusion
that you can always get
desired creative result

so the space of time, so to speak, is Eternal
and the Eternal space itself as such
physical means including
it means precisely in the characteristic of Eternity

it is the ability to view events in this way
what can we learn from one fact
that you have overcome something at least once in the past
any person has overcome

he was born yes, there is already some kind of overcoming considered

and then it turns out that it is always systematic
achieves Infinite Eternal development

so I just described it so to speak
some properties
namely the spaces of Eternal development
the space of the Eternal actually as such

time of Eternal development
and integrated, i.e. united these two phenomena
showed that in essence a person always has
the possibility of systemic Eternal development

although I am in general well, at a certain speed , so to speak
often even big
Now I showed some processes quickly on purpose
so that words and processes often coincide in management

and therefore it turns out that here
although words should of course convey
and its management system role

but nevertheless when control is carried out
there is a level of coincidence between word and action
word means action
that's why I said and did some things quickly

can I watch this calmly?
as there is a layer of time
does the space layer work , for example?

and then receive system control
where a person will definitely have it happen
that is creative
what does he want
and just by the way in Eternal development

i.e. a person lives Eternally at this moment
and I am absolutely sure that in the future he will live forever

i.e. this is the aspect of this management
clearly revealed
it can be implemented

This is where I end today's seminar.

Thank you very much for your attention
