

GRIGORY GRABOVOY  
The Teaching About God  
**Creating the structure of Eternity**  
16.03.2005

Hello again  
the topic of my seminar today  
this is my Teaching about God  
Creating the structure of Eternity

in this topic i show  
how in case we do management  
for example, in the target management structure  
where is the optical expression  
we can for example in a search engine  
find the structure of Eternity

or we can simply create it for everyone if necessary  
basically at the same control point

i.e. the first search wave  
she often gets into the same level completely  
well, in place and time  
the only difference is that  
that when we do management from ourselves  
then in the search engine we see  
the structure of a kind of self-management of one's own personality

i.e. we expand in search  
your own management system  
i.e., as if we were expanding information about ourselves , yes actually  
about the physical level about your body well up to this

and if we build Eternity  
we are creating the structure  
around which real Eternity is already arising  
then we work more with the external environment

so when we work  
in the technologies of Eternal development  
from a management point of view  
where Eternity is the path actually  
we are building the structure of our own path in information

and in this case we need to subdivide here

as if the personal principle is a search engine  
or external control so to speak

creating structure from the external environment

and if you take for example  
well, some kind of stone in your hands  
and the structure of Eternity seems to flow towards you  
and this feeling, even if it's a small pebble  
having the structure of Eternity  
is preserved and actually renews  
this wave of Eternity from just a feeling

it turns out that if you find  
some other thing  
where this structure is not identified  
Well for example, a person sews something  
and then find Eternity in this needle  
it is, in general, the moving quantity, the needle itself  
because it turns out that it is easier to create a structure here

and this is the control  
well, in terms of intellectual control , so to speak  
where is the choice of decision what level to do  
or it will still be a search engine yes  
you just see where Eternity is and develop according to it

in the information you should in this case  
see yourself  
in the structure of the light optics of Eternity  
that you are inside the system  
then you are Eternally evolving  
after all, we must be able to develop forever  
just like God does  
He makes the impulse of Eternity  
but He knows for sure that He is Eternal and at the same time

i.e. He has knowledge within the system  
knowledge in Himself  
this is the knowledge of the Personality

Well, by and large, personality determines  
your own position  
in this world

and it turns out that then we can say  
so that we can perceive it just as harmoniously

how god makes eternity  
and for example, even in the case of treatment, yes  
For example we are treating someone there  
we need to know for sure that the person will be cured  
for example at the right time

in this case  
it is the creation of the structure of Eternity  
this is a fairly effective value  
time controlled process

because if we can build Eternity  
then in general it 's time control  
this is already enough  
well, it's more of a derivative system of action

for if we build Eternity  
then we are in the structure of time  
must be made as support systems of Eternity

what is Eternity  
it's like Infinite time actually

we have in every element of development  
Infinite time

i.e. every development  
if you look at some wheel there, yes  
time or there events  
it starts to increase  
the further the event is from you

and therefore the volume is external  
this reaction and external light  
it is significantly larger  
from the future than from the current one there  
or even from the past time

the future in this concept is Infinite  
and the past can in principle be considered Infinite  
but only as if speculatively

and the future is really infinite  
from the point of view of differentiation in Consciousness

and it turns out that the external light of the future  
it is much larger in volume

the wheel is getting bigger all the time

if we sort of rolled this little wheel  
then it will be very big in the future

Just imagine a simple task  
the wheel is growing  
how to deal with it yes  
with this light that is going on at the current time

and thus here is the creation of Infinite Time  
i.e. the creation of the very structure of Eternity  
this is a control action  
large dynamic system  
and which begins to act  
once you have decided how to implement this drive

because here it is very important  
level of personal decision  
if in the search engine you just find  
and generally a neutral level  
actions of your personality  
you find the structure of Eternity and just walk along it  
Well, using different technologies, yes.

then here it turns out that it is the decision that matters  
you decide at some point to spin this wheel  
and you start to get this effect  
that with a large number of events  
while ensuring controllability of each individual event  
increases significantly

i.e. due to the fact that there is a large array of light  
starts to push through your private initiative  
in the event line

and it turns out that it is flat  
the so-called basic level  
positional in general and physical  
at the level of the structure of Eternity  
this is a solution to specific problems  
due to the very large amount of information, as if light

i.e. you have a private task  
any there to go to the store for example Yes  
you need to buy something  
maybe you need to definitely

there may be such situations

well, although this may be such a private task  
but it may be related to Salvation

and then it turns out you need it  
so that this large array of light  
projected onto well, fact, well as if on an Eternal thing  
here is the thing itself Eternal local  
and in the Perception of a remote level of reaction of Consciousness , or something  
this thing must be Eternal

i.e. the external Eternal Light  
perceives everything as Eternity

i.e. what we do is we take this light too  
Well as if then We are considering  
from the point of view of living Light  
which acts as a living substance

and here is this level  
he begins to perceive it in his own way  
what do you see with your normal physical vision, yes  
here is a thing that has a private character  
it can become deformed and worn out there

but nevertheless the external environment  
in the same practically material field  
perceives it as an Eternal structure

then in this thing you just have  
and the actual management structure  
i.e. enrichment of the physical body , so to speak  
with this structure of Eternity  
i.e. through things you begin to deduce  
the structure of Eternal development

here, by the way, there is also a fundamental difference  
when we build the structure ourselves  
we kind of pull the structure towards ourselves  
and we do we can do  
its tissue system Eternal  
from the local level of some matter and even from things

Well suppose the talisman principle yes  
why is the situation often fixed  
it works for some kind of extended period of time

for example now a good talisman as if Well, it counts  
that it really works, apparently, one can assume so  
from the point of view of this ideology  
that in the future the talisman which recorded  
information of Eternity now  
information about the status of a certain event and favorable  
he starts working somewhere here

and it turns out that from this position  
Well, in this case we are not talking about a talisman  
and about the system that must be implemented without fail

therefore we must understand the structure in principle

how this thing is controlled  
in fact it is really very huge  
Lighting system  
but how is it managed to our advantage?  
there for health, for events, etc.

it turns out that we must be absolutely clear  
differentiate the following approach  
that control of any  
including a very large array  
it turns out exactly the information  
when it's in dynamics

i.e. when dynamic information is some  
a large mass of information  
it means it somehow touches you  
we must control this element

and once we have worked out this approach  
well the mass may not necessarily be revealed  
it could just be some kind of Infinity  
which touches you  
which is what happens to a person all the time  
he is constantly in contact with some Infinite environment  
visually at least

if he looked at the sky there  
or thinks that he is this external air circuit  
and everything else is Infinity  
then a person is generally in these conditions  
and from the point of view of logic  
here is the management of these processes

it's still a familiar process  
at a certain level of the human Soul

after all, God who created Reality  
He created a contour but with Reality  
He created a level  
where Reality flows into the structure of a person's personality

i.e. if God looks at, for example, the whole Reality  
He sees  
and Reality  
and Personality at the same time  
i.e. there is a level for Him  
where is Personality and Reality  
these are the conditions well like these are the actions  
that often only the tasks of the individual are visible there

so that God can determine what a person needs  
He just needs to look  
on any element of Reality  
and He immediately knows about the level of the task

i.e. this is a transition, or something like a flow into Reality  
if it is considered as an Eternal quantity  
it means precisely individuals  
for God this is, in general, a very harmonious task of Eternal development

i.e. God contributes to every Action  
personal Eternal development of man

and if we start this outline of God  
see  
this is God's control  
it turns out that we are this level of Eternity  
we make it so that we bring it there already  
the personal element of each person

i.e. well for example your personal level of control  
which allows you to identify  
its own substance  
with a macro perspective or a personal perspective there  
in some events

you start to see  
that any rarefied environment  
Well, it would seem to be a domestic environment

she is Eternity  
because you work ideologically for this  
i.e. you bring the management structure  
to their own, so to speak, concepts  
and Eternity becomes invisible

and here is the first factor of control  
Infinite environment  
this is the invisibility of the control mechanism

this is how the structure of the microworld is held there

Well, in principle it's clear  
that there is no external big lever yes  
but nevertheless, the microworld still exists  
and the molecules do not disintegrate

i.e. there is some external concentration  
as if unnoticeable yes  
from the point of view of Spiritual knowledge

which holds the structure  
in the conditions of precisely the practical Norm

and it turns out that if we want to understand  
like any dense substance, it means it is controlled yes  
from the point of view of the structure of external Reality

it turns out that this level of management is precisely  
this is, in principle, a certain mechanism after all  
but it is not noticeable for example there physical vision

and then it turns out that this is a dense substance  
For example there is a table surface with a certain thickness yes  
just means well the top panel of the table  
if we take there a square centimeter of this panel  
it turns out that we can then, for example, consider  
if you think about this system

what does this square centimeter collect?  
from the point of view of information, let's say so  
consider this pressure of external light

then it turns out logically yes  
that imperceptible external light  
it "becomes more powerful" actually more powerful than the substance  
the substance does not fly apart

Means Well, that's what we're starting from  
from the principles of equality of information objects  
it turns out that something must be mechanically stronger  
for this micro level to exist yes

and this is the micro level that results  
This is not even physics in the usual sense, by the way  
I use the structure of logic  
currently under management

the Spiritual structure thinks, for example  
to cure a disease there, for example  
if there are dense masses there  
a person has some kind of tumor -like systems

it turns out we just need external optics  
how to deconcentrate

and it turns out based on this  
if we reduce the concentration of control  
then we just have to identify the mechanism as if  
this one is so unnoticeable

here it can only be called schematically  
because you can always see any Reality  
the main thing is to know which side to look at it from, yes  
here is a prism  
from different points of view  
different sizes are visible in the crystal

the same thing here, depending on how you look at it  
in logic or there Spiritually  
then you can find an approach to management

so here we see  
that's the connection  
this one well as if of an unnoticeable size with a microsystem  
this is a transition of the microsystem  
as if in a broader quality  
for another Perception

i.e. the human body  
actually perceives on the same level  
micro-size  
and on the other it perceives  
The infinite property of this quantity

and it turns out that  
well, i.e. an infinite beam of light of some kind

and to create Eternity here for example Yes  
I decided that the table, for example, would not break for a long time  
took and fixed a couple of molecules here  
I simply strengthened it with this light

then the outline, generally speaking, really starts right away  
the intense glow increases  
Well as if the field structures are increasing  
and properties in the structure of the space of this object  
or a table for example  
are increasing  
from the point of view of security, etc., etc.

i.e. the area of events is formed informatively  
which are more favorable  
for long-term use of the table for example  
i.e. this can be done in relation to any thing

but if we want for example  
as a diagnostic system  
put one molecule on the shoe

and then based on that  
criteria receive signal  
that nothing is happening  
with the person who wears these shoes  
then we can do it

it is enough to activate one molecule  
in terms of difference  
here is a generalized structure of some flows , yes  
which forms the microsystem

we take and lift the molecule a little  
informatively simple  
as if it were some kind of indicator

if an external event occurs  
i.e. the line of events is pressing on this molecule  
which exists  
and which already after your intervention  
i.e. you mark your own action

at a normal level  
you're nothing as if you do nothing with the concept of "Eternity"  
you just take and work on one value

as soon as another value  
and Eternity begins to press as if  
what you did was lift the molecule

and here is the difference between the screens  
the event structure is visible  
i.e. you can watch  
where is the Norm of Events  
where is the Health Standard

and if something gets damaged well there are shoes  
or does it arise at all?  
some kind of irregular phase  
in relation to the level at which you worked  
then you can perceive it much faster  
manage this system almost immediately

because God is constantly watching  
actually helps people  
normalize towards Eternity  
your life  
and He often uses it for this purpose  
Well there is one marker level  
i.e. one signal

i.e. in fact, He understands everything at any point

and now if we start  
Now we need to bring this system to ourselves  
Well how to tighten this understanding yes  
to the level of the physical body there

it turns out that we already really  
in real time  
there we treat the disease only due to the fact  
that we this line this beam actually speaking  
as if the position of the body  
body  
i.e. the body's information passes into the light level of the body  
and you, due to the knowledge of your own body, actually  
make control directly to the cellular level

i.e. this way you can treat directly by working specifically  
without well as if I had no idea  
"more of an informative environment , perhaps "

it turns out that you directly feel it  
see how you work with cells  
as if there Well, with my hands, actually  
as if it were an extension of your body  
direct work

so that's it  
the structure is actually like rays of Eternity  
because structurally Eternity contains within itself  
the entire volume of information

if your body information  
this is some area " A" for example Yes  
then the information you are approaching  
contains everything related to your body  
i.e. there are places where there is no difference at all  
the signal arrives almost instantly  
to the level of action

and you work as if directly  
well, that is, without an indirect value

the only difference is  
there is no element of external space  
so that the table there would be Eternal  
it is necessary that any signal passes through it as if without touching it

and this is where the next level of control comes in  
that at the next structural, as it were, axiomatic level  
there is a need to construct a value  
which is as if transparent, it is invisible  
from the point of view of external signals

and then the value does n't wear out, yes  
any level of management external  
it passes through the revealed value  
and the optical value  
there is a human body or some action  
any object of physical or informational Reality  
while maintaining  
form

target  
and develops in the primary plane

then it turns out that the main thing here  
we need to consider the primary level  
what is laid down as a program or development task

and in the primary plan  
for a person you need to look  
when man was created by God  
He, too, was created by God in Eternity.

It is clear that people are born  
but from God's point of view  
He created all people initially.  
by some criterion of knowledge of its own  
or there are actions from a human point of view

and there is a certain field where people well so let's say they live  
they have their own development  
own level of action as it were  
in terms of intelligence there  
in terms of , so to speak, the universal Macromind  
there are such concepts of "reason"  
some kind of relationship systems

i.e. we actually get there  
into the system of relationships of all people  
one with each  
or is there each one with one

and here time no longer matters  
a person can read a book from earlier centuries  
there to think about some future

and so we find ourselves in some kind of quintessence  
as if a product of Thinking  
and God  
and as a consequence means the understanding of God by man

those. God has thought through  
and the person understands that God was thinking in this place

and when we begin the Thinking of God  
analyze  
from the point of view of dynamics

then here it turns out

Well, it is precisely the knowledge of the dynamics of action

then it turns out that God thinks like this

so that it is understandable to a person

His final knowledge

i.e. God can also provide

some preliminary phases

just like a person does

and and give a result for example yes

it means that God is also a man

it turns out that there is one here

it is the level of contact

what needs to be done so that God can create the World there

and showed concentration of control

and how can I make it more understandable and more structured?

and how to make each element of the World

was clear in its creation

for a person

This is exactly what is needed for this

vector of Eternity

i.e. to give it precisely to Eternity

and define a vector type for Eternity

i.e. set a specific direction

where Eternity is evolving

in your understanding

for example we want there

Well, let's suppose we build something in management

and decided to create the structure of Eternity

at least one element

then we should know

from the point of view of ours

well of your body

a person or just a body as a person let's say there

there may be such a term

as simply a "generalized human body"

so where is Eternity here then?

generally speaking it is determined

where is she heading

what are the main processes of this Eternity  
they're disbanding something there  
they are, well, negative for example  
or they may just be spreading  
like some kind of light

we still have to  
some dynamics some vectoriality  
define for this concept

and when we start already from the point of view  
This is what I just said in the lecture  
consider  
already dynamic - as if a vector type  
i.e. we are already beginning to see that there is vectority  
i.e. to collect an image

then here it turns out  
what is the main control element  
already at this level  
is the collection of the image

i.e. you start  
some abstract, as if at the level of association  
image to collect  
which already says that you have built Eternity  
and in Eternity you develop  
i.e. you don't touch the object itself  
which you built

and thus it turns out  
since you don't touch the object, it doesn't touch you  
well or it doesn't touch any elements of information

what is the structure of Eternity  
that when one object comes into contact with another  
you don't seem to leave the action  
God sees everything and knows everything and helps.  
but at the same time He is not there that often, yes  
physically moves

and it turns out that here is a control element like this  
what does this controllability of a large array mean?  
again what I said  
large array control  
due to the fact that neighboring actions are not announced

each other in relation to each other

then it arises

this is the level of some kind of surprise  
some quantity which is unknown there

why does surprise even exist  
from the point of view of this technology

and because the quantity was indefinite  
such a property such a vector must exist  
well, in general in the information space

after all, logically, God could have simply created Reality  
and distribute everything there literally by the hour according to the tasks  
What difference does it make to Him?

but here from the point of view  
it is precisely the tasks of management that are personalities  
when a man does the same thing that God does  
at least from the point of view of Eternal development  
mechanisms are needed

and surprise is some indefinite quantity  
it turns out that it looks like this  
how is the control system anyway

and if we start to analyze then  
Here's how to cure a disease, for example  
which, in general, from the point of view of creative Eternal development  
it's still well sometimes or almost always  
for a certain class of diseases  
this is an unexpected value  
and in principle  
kind of unexpected yes

so for those who have developed prognostics  
he can either do something or not do something  
wait until there are signs  
Well, when the signs of the disease start to appear somehow  
even if it is a completely harmless disease  
anyway, he has to fight it somehow, yes

and it arises  
he needs to do something and he has some

it may not even necessarily be a disease  
he may generally always be healthy  
there are some events there

and this element of some kind of surprise  
there is artificially brought  
if he does nothing  
the man is there  
thinks that it will all go easier there without management

or he just gets it as an unexpected value  
who does not do prognostics

then it turns out that the situation here is exactly  
it is precisely in the structure of Eternity's management  
there is a very powerful mechanism here  
understanding, as it were, the root system of this surprise  
i.e. derivation of this root  
into the structure of expected values

what is god waiting for  
here is the question

then it turns out if we output  
this is a structure in the structure of waiting for God  
and God knows what He is waiting for  
He is the awareness of man  
i.e. we must understand the structure like this  
to bring a solution and show that we  
not because something happened there by chance  
we just understand how to manage this process

then it turns out  
God understands the next path of development  
and here is the next path where God already gives  
's easier for a person to step on it, yes

and but here is this next path  
Generally speaking, it always exists  
i.e. it is always easier for a person to attack  
on the structure created by God initially

and now if he begins to understand this  
then it merges into one  
there is the Spirit  
Soul  
Consciousness

the physical body becomes Eternal  
in his Spiritual development

i.e. each element of knowledge  
this is the Eternity of the body  
everything as if in the piggy bank of the Eternity of the body  
given those data or even given the condition  
that the body is always Eternal at this moment

i.e. such as it were  
continuous information exchange mechanism  
action  
Eternal body  
a man without action does not exist

because man is  
there is an action there is always  
even the primary factor in its creation

it turns out that man is Eternal from the very beginning  
here we are  
to a circuit that is autonomous in principle  
Eternity of man

and here in the structure of Eternity  
this is the first value  
which near the structure gives real Eternity

well "structure"  
this is still a concept that is often informational  
some light levels  
and what to do with them later  
that's exactly the real factuality , yes  
the real substance of Eternity so to speak  
Here we have identified this substance in its pure form  
there it glows and has some volume, yes

well, in some ancient texts  
for example, identifying such a substance from something  
and for example you could drink and eat there  
and then man acquired, as it were, these properties of Eternity  
he became Eternal here

if we proceed from that  
Well , that 's not how it's written there  
what is this physical substance for example

but we, for example, are in management

and what could be much stronger?  
what is the physical substance there

because as far as we know from the descriptions  
if you look at this information in part  
then something needed to be limited there  
be somewhere specific  
i.e. the substance was tied up  
specific regions where it was received  
i.e. some kind of restrictions  
which a person shouldn't have anyway

from a management point of view  
he must always be Eternal  
wherever he wanted to go yes  
wherever he wants to be

so here is the work through the structure of Consciousness  
it's still better quality  
more like appropriate  
precisely corresponding to God's task  
characteristic

it turns out that we must clearly understand here  
that the detection of the substance  
it may even be material

i.e. we can take it there  
a piece of apple to saturate with information  
and the apple will have  
indeed, with external control there is digital  
there's a glow right there  
a piece there won't smolder there, etc., etc.  
This can be done even with some food products

and how does it turn out that we have  
really some substance

but with all that  
so that a person can truly live forever  
due to just Consciousness  
he must modulate all the time  
this structure in the system of Consciousness

here he reproduced the substance in Consciousness  
and what to do with it next  
well if he got distracted  
it kind of went into the information system  
Of course there is some benefit there, you can improve your health there

something else  
but we are talking about real Eternal development  
so we must think not just  
about recovery which is basically the minimum  
the most necessary for any person  
there is a norm of events in principle  
also the minimum in fact in this system

and it turns out that when large arrays  
again in the collective Consciousness  
where are unstable processes  
there is a possibility of a global war, etc.

we are starting to regulate  
these are the big processes  
due to docking systems, as it were  
i.e. we actually have  
again the problem of managing large arrays  
but of a different quality

not management there of some Eternal processes  
and the management is simply some kind of chaotic processes  
surprise systems and so-called  
systemically expressed  
may be in the array of possible negative effects  
maybe it won't happen

but the world is big enough  
you never know, some comet might fly in somewhere

and it turns out that we have to  
be able to manage the system in essence again  
we must see  
the starting point of the creation of a phenomenon of some kind

but at the moment of man's creation  
this phenomenon was not negative for a person

i.e. we must understand  
how to balance the world

from the point of view of the initial idea of God  
namely Eternal life Eternal development

He himself is the Eternal  
This means that the idea has been laid down and it has actually been implemented  
in us

it turns out that we can do it quite well  
how god does

He transfers actions to a person  
a person can pass it on to another person there  
Well, he conveys the actions.  
in general to all objects of Reality

it turns out that based on this  
we can quite easily work it out here  
well, some kind of program of one's own Eternal development

that a person decided somehow  
Well, it's a simple task  
some student yes  
he's taking a long time to decide something there  
here he has a task  
to master everything  
you just need an Eternal number of years

for example, we admit such a thought yes  
because there are a lot of texts there  
or he is interested in some science

so he took it and created for himself a kind of front of Eternity  
he went and came up with it for himself  
Well, for a housewife it's a lot of work , etc.  
you can come up with something in the mental sphere  
for the ideologist there is a traveler  
this is an infinite number of journeys

let's take this for example  
it means some element created by man  
as if by the thought of a person and by the person himself  
and we begin to analyze  
what is needed then is just practically  
to create it really

in this area  
from the point of view of today's seminar lecture

when you work at the same time  
this is already the level of seminary management

you start  
Now, let's work through the situation at the same time  
here we got this substance on Consciousness  
what to do with it now yes

it turns out that we have to make a substance  
Well, first of all, again, it's like invisible  
because this is the principle of independence

and there is even such a principle here  
as non-accountability of objects to each other  
i.e. objects exist as if by themselves

God  
He is on his own  
He is not in front of his own separate part  
this is not reported  
this is a monolithic Personality

and how does the human body exist  
it exists and lives and develops  
so there is no such concept there  
that the dependence of one hand on the other yes  
direct dependence  
or one cell from another

i.e. here is the principle  
freedom of action of any information object  
it applies generally speaking to all elements  
Well, except for special situations  
when you need to do push-ups on the horizontal bar with both hands  
or something not necessarily exactly this yes

so it turns out that if we  
so we start doing management in this way  
that we need this Eternity  
really feel firstly

the first feeling is that there is a wave, yes  
came and you see that you are there this wave  
you created this wave structurally  
received the first branched system , so to speak  
i.e. well, a real object of Eternity

the real Light of Eternity  
which is, for example, the substance of Eternity  
or let's say the mechanism of Eternity, you could say so

why did i start talking today  
precisely about the structural system of Eternity

because "structure" is often a mechanism  
which is not necessary  
in the form of a substance there of some Light  
highlighted  
and this is a specific mechanism

and now if we get a mechanism  
on yourself

then we understand that any objects  
surmountable  
in terms of Eternity  
anyway any phenomenon any action  
it can still be overcome in a positive way

this is the next level  
as if on a personal level  
where does it mean personality shows a person shows  
that he understands what God gives and shows him

i.e. then it turns out that he  
not just has a level of personal plan there Eternity  
He begins to see the level  
that he will definitely master it  
He begins to understand what he has  
Generally speaking, the path to mastering the system is very long  
he just has to do it

and considering that he can do it at the same time  
diagnose the time of classes  
he understands that he will master it

here is the next element in the structure  
and in this so-called substance of Eternity  
this is level well as if by personal initiative

example, if you take and look  
where does initiative come from anyway ?  
or there is Eternity of action  
it's all the same from some space of time

initiative is the desire to do something  
so with the environment of action at least  
a person comes into contact with information

and if it interacts  
and it interacts in any case  
with all Reality  
then it turns out that he is in contact with Eternity somewhere  
in any action  
where does he at least show some initiative?

and that's how it happened  
a person already proactively decides to live forever  
this is already the next level  
he decided there for example to live forever

then here it already begins  
implementation of real mechanisms  
as if managerial naturally managerial

i.e. he can live forever anyway  
basically without initiative  
just lives and that's it Eternally

but as soon as he starts to do the management  
then it already arises  
precisely the controlled level  
realization of the structure of Eternity

and here you can really build  
and structure  
and substance  
and your own path  
this is the main task  
create your own path  
in the structure of these control structures

we can build a huge light structure there  
it is eternal  
trace every cell  
that light optics act on the cell  
the man is walking, he has nothing negative with him  
does not happen  
he develops these elements for himself

but we can behind this design  
while we are building it  
and where is the path itself, where are the events themselves, *yes*

we should basically identify  
structure of own events  
to comprehend our own task

here we enter a large glowing temple  
and we stand there  
and what to do in this temple  
where is the food, where is the store, etc.

i.e. we must actually live there

and it turns out that here is the identification  
task structures  
in the context of construction  
external controlled variable  
this is already eternity

transferred to the tissue structure  
for example in the heart

i.e. we transferred the built system  
when we set our goals

God set His task  
He has a body  
well, from the point of view of external perception  
Eternal  
God is already Eternal  
but so that everyone understands that He is Eternal  
He set a task for example there is Eternal Development

and when you see the structure like this  
as I just described  
in terms of approximation *yes*  
to this substance we say Eternity

then it's clear here  
that any generally natural state of a person  
has a mechanism  
where to build  
namely the structure of Eternity  
and the substance is quite simple

you can only build for example there  
there by the way with a physical look

there is a technology for building Eternity  
just by physical sight

for example you can look at well there  
means somehow  
just by physical sight  
and here it's like distributing simply  
and here is the mechanical quantity

take and mentally distribute  
where is the left eye looking  
where and how does the right eye work

if the right one is spread  
to Infinite magnitude  
and the left one to make a local system  
just take and narrow the concentration

so I just went and imagined it  
what from the left eye's point of view  
Well for example, there is a beam here  
and here is the Infinite quantity

junction of the beam and the Infinite magnitude  
this is already the first molecule of Eternity

and it has a molecular appearance  
you can watch directly  
how does the control system work there

you can set the spectrum  
you can see the Infinite Light there etc.

and now if you get out of here  
Infinite Light  
here it shines you are always in Eternity

after all, what is this anyway, what kind of state is this  
Eternal Man

he is in this environment actually  
informational yes  
light-optical environment

at the level of one's own Perception first of all

he must personally diagnose and control  
what's there

Well, like a man riding in a tank  
there he clearly understands that he is in a tank  
and he has all the life support systems, he is protected

this is about the same condition  
he must clearly understand that he is  
precisely in the real Eternal environment

any sign that does not correspond to this  
there is a possibility of illness <sup>there</sup>  
maybe just be completely healthy  
then these are already some theoretical signs

possible event  
which can disrupt this state <sup>yes</sup>

then it turns out that the identification of the event line  
a very important quantity in this concept

and if the event does not correspond to this phenomenon  
any  
then it turns out that  
<sup>let's say</sup> this state

a person is forced to be distracted by this  
and quite seriously

for this state  
the informative value is as follows  
that you need to clearly know the consequences of any event

and that's what it turns out to be  
the next criterion for constructing Eternity  
this structure <sup>is sort of a</sup> criteria structure

i.e. you should at least know  
event criterion  
i.e. it is important to clearly understand what will come out of the event

and know the criterion  
as a rule, you will definitely have to know

that's exactly the level of precise knowledge <sup>yes</sup>

you enter the system of precise knowledge

means precise knowledge of an event  
or how to manage an event  
you can call it that

because the events are different  
We are managers, we need to manage

exact knowledge  
this is the criterion of a kind of concentrated Eternity  
expressed in fact  
in action  
in information  
in knowledge  
this is a generalized value  
which allows a person to move spiritually  
at a natural level

he doesn't need it  
some optical models to screw up there yes  
a large amount on yourself  
it is enough for him to know  
what to do now

and when here  
this is how a person is  
for example, he begins to perceive Eternity  
then he starts  
Firstly, to help others more intensively

i.e. from him then Eternity seems to shine as knowledge

i.e. he doesn't even hide it anymore  
because in Eternity there is no concept of "obstacles"  
knowledge that a person has  
it is instantly transmitted at the level of everything  
what do others understand and what is this knowledge

at the level of just not even glowing  
at the level of knowledge  
knowledge has the characteristics of a kind of speculative quantity

what a person thinks and knows  
immediately clear to others  
from the point of view of Eternal development

Well, that's not specific  
some kind of internal personal plan of Thinking  
namely the mechanism of Eternity

this is what people know more about  
mechanism of eternity  
it is easier for them to transfer knowledge to each other

and that's when a person looks  
into external Reality  
and for example, if this is how I explained it  
there the left eye is, for example, a concentrated beam  
and the right one is the Macrosystem

then this is the case if we look  
to some ordinary environment there  
where there are no people, for example

but if we look at a person  
then Eternity already exists  
that's the difference

there is no need to do optical concentrations there  
no need means concentrate  
there is a left eye right  
somehow I spend time on this

the person is already the source of that information  
where Eternity is contained  
in full and in harmonious form

and if we see, for example, the spread  
that's because nothing can be taken away, yes

i.e. the Eternal Man  
but there is no "piece of Eternity" there  
it is basically impossible to convey there  
this is knowledge

and this is this state  
when a person sees the structure of another's knowledge  
in Eternal development  
then in principle this is the magnitude of the Infinite World

i.e. the Infinite World  
The world naturally contains all knowledge  
including there for example, the general resurrection

this case it is already simply logically clear

that since a person has all the knowledge  
but naturally people ask such a question  
and he must clearly decide what to do

so in this in this system  
the concept of "general resurrection"  
it's just an element of logical action

or is there an element of Eternal development  
this is again the logic of primary desire  
God and man

and here the difference clearly emerges  
between action and desire  
God and man

i.e. a person  
although he sees that he may be there  
you'll have to work hard yes  
I can't say it's difficult  
but a large number of events so to speak

and that's when the press of a large number of events  
takes you out of Norma  
in this state  
have already transferred the cycle of Eternity to yourselves  
i.e. they completely closed the control to themselves

i.e. super high array  
i.e. an extremely high concentration of all future events  
and at that moment you calmly do something  
there you eat ice cream, go for a walk

and that's when you realize it you see yes  
then your autonomous system  
Well , I said it like I was "in a tank"  
in this case you don't need to be in a tank  
you are completely free, you are harmonious  
and at this moment you are Eternal  
i.e. you are not different from others in any way, to put it simply  
those who haven't mastered this technology yet

and that's when you start

understand this system  
i.e. well, extend to others

then it is clear that you are Eternal  
it is possible by that  
how do you pass the structure to others?  
here the criterion will be like this

your light that goes  
or your knowledge that goes to others  
and others begin to have this light  
means that you  
hold the structure of Eternity  
Well as if in the right measure and in the right concentration

I'm there I'm not saying that you need to go there  
namely to teach a lot of people for example Yes  
or walking along the sidewalk as if  
Well, to spontaneously send this light to someone  
well from your glow of your knowledge

there it is enough to make sure there once  
and you have enough there for a long time, for a month, two or three  
that you have this Light

at the same time you can train a million there  
or you can do something else

but of course it's better to teach  
this is exactly training, transfer of knowledge  
not necessarily explicit there in words  
namely, here is Light  
namely, to take and transmit the Light of Eternity  
means to people well, which are somewhere  
maybe to some people  
who are just not familiar  
but you see that this is what needs to be conveyed

and pay attention that your body  
periodically if you observe yourself  
these are the waves of Eternity that are transmitted

and the body works  
as a system of initiative of the body itself

it's a somewhat unusual condition  
for a person  
apparently when he starts to look closely  
that the body periodically radiates Eternity  
and as if conveys to others  
as some information some  
or as some kind of help

and when will you learn to see  
this is the work of the body  
then you will learn, well, like some kind of expander  
learn to see  
how then to regulate this process

i.e. you for example Well, you're walking somewhere in the forest there  
or just walking  
or in any system  
you start to see interaction  
physical body for example Yes

and practically see  
that the body can be well for example like this  
what do you see as the defining factors of the body

i.e. you need to see  
what your body needs to do for example  
to do some kind of management there  
at Infinity  
i.e. specifically to the physical body

and when for example you see this control factor  
as if in a general plan and in the Infinite  
then you can see that the body  
i.e. Soul  
Spirit  
Consciousness  
perceives Infinity often as Light means

and this Light is basically like this  
what are you starting to see  
as if the cause of any phenomenon that concerns you

i.e. as soon as you begin to see this reason  
any phenomenon  
then in principle you already determine  
reaction mechanism yes

of its own external environment

because God  
He sees all phenomena.  
and all phenomena touch Him as if spontaneously

we understand that  
that God is concerned with everything that happens in the world  
and He is like a man  
at a certain level it is perceived

and in general he knows how to do it practically  
due to there private opinion  
manage all phenomena of Reality

so what's the big difference there?  
to a person  
if he moves to such a position  
and at least the management that concerns it  
begins to perceive  
then this is a very powerful control mechanism  
built precisely on the structure  
when your external knowledge is actually Yes  
which is as if contained in the outer cells  
where do you structure Eternity

this knowledge is passed on to you  
the path is defined  
level of certain management  
and you get this control  
as a system of protected knowledge

because if knowledge is somewhere  
outside well as if you physical body so to speak  
then only you know  
in what cell or information point  
it is

and when external knowledge  
structured for Eternity  
your own  
means it gives you control at the current time  
i.e. you receive this Light  
then it is clear that your future always exists

and that's when you start

here is this texture of the future  
consider  
as the structure of one's own knowledge precisely  
that this is precisely the knowledge you have accumulated

this is precisely the importance of obtaining knowledge  
that knowledge is a quantity  
Well, first of all, she is Eternal in herself

secondly when they are yours  
you always get precise coordinate assistance  
even if there are some problems  
between your <sup>desire</sup> to act  
or is there a task to act  
and <sup>as if by</sup> implementation  
there are <sup>some there then</sup> things that get in the way <sup>there</sup> Yes  
implement quickly

that's exactly the structure of knowledge  
this is what helps you  
i.e. you help yourself

for example, as God does  
who can help God

He must first help Himself.  
He must provide for himself.  
structure  
in fact, <sup>as if</sup> from Himself

Well , if you look at it like that  
God's position in governance  
or especially Eternity  
wherever he goes  
He must perceive  
Your own signal

but God organizes  
also the position of human perception  
i.e. it means He must create  
the structure of Eternity is like this  
so that the external Perception is exactly like this  
that He perceives precisely His signal

for example, for God it's all the same  
It is not necessary that He should perceive His signal  
He can reconfigure the system <sup>there</sup>.

and at the level of intermediate actions <sup>there</sup>  
consider that this is some kind of third signal

but God is responsible for all signals  
any signal is received by Him  
for us it is clear <sup>yes</sup>

and it turns out that if so  
as soon as we cross over already  
to the nodal such basic level of control  
that when we perceive all the signals  
as the structure of one's own Eternity  
i.e. one's own Eternal development

i.e. we see ourselves  
that we have learned this process  
Just  
by the way, from here there is real knowledge  
then that's it  
the entire external system  
the entire external information system  
she becomes completely controllable

i.e. you start  
Well <sup>how would</sup> your information start  
from the Infinite magnitude there are creations  
you  
God originally

and here you see a structure like this  
what exactly is the ability to react  
Spiritually first of all  
exactly Spiritual state of the Soul  
to signals  
this is already the management of Eternity  
where Eternity is already, although it is structurally built  
it already exists materially

i.e. you are Eternal  
because you react very accurately  
to an external system

and the exact reaction  
this is the state of Eternity, among other things

because it's always exactly the same  
when a person reacts accurately  
he means he reacts in such a way that he  
as if it were necessary to correct the situation

or he regulates it somehow

so in this technique  
the main thing is to achieve accuracy  
in the understanding of Eternity  
in understanding the external signal

and you already have  
practical mechanism for the realization of Eternity  
for myself personally  
and for everyone around

Thank you very much for your attention

I have finished today's seminar for today
