

GRIGORY GRABOVOY
The Teaching about God
Diagnostic Management of Thinking
23.09.2005

Hello again
the topic of my seminar today
this is my Teaching about God
Diagnostic Management of Thinking

in this topic i show
how to diagnose the structure of thinking
and accordingly it means to work
over the management structure
own structure of thought
to transmit information

and diagnose at the same time
from the point of view of that
as in the structure of the very core of my Teaching
this is the prevention, for example, of a possible global catastrophe
direction to save the world

i.e. for the purpose of Saving the World
how to diagnose then Thinking

so if there is a terrorist plotting there
some adverse effect
Well, in principle, and not only a terrorist
i.e. any person who has it there
some unfavorable thoughts in the future

these systems can be detected
in special event monitoring technology
and special event diagnostic technology

considering that our task is precisely Eternal development
the task is systemic Eternal development

i.e. one must be able to recognize criteria including
well, the criteria there are Reality
including criteria means people's reactions

then in connection with this
namely the diagnostic control system

she is like that

what are you forming
your own structure of Thinking first
and you pass it on then well, sort of like an opponent
or to someone who can commit an unfavorable action

your system of knowledge
through the structure of Thinking namely

i.e. most understandable in this control system
what are you thinking
visualize in a specific area of space-time
in front of a person

and a person perceives this thought
understands
something like that was found there, yes
if there is, let's say, a group of some terrorists there
is going to commit some kind of terrorist attack
and does any of the terrorists understand?
that a possible system of their actions has been discovered
then naturally they abandon this plan yes

i.e. this is the control system
to prevent some situations

or maybe it's not a terrorist, but just some car driving by with a driver
and you see that the situation may be unfavorable
you mean your structure of Thinking
you are taking out
so that he would recognize her
he gets this information
and then it turns out he doesn't get into an accident, etc.

the same applies to the treatment structure
there are no preventions
some possible diseases
there are infectious or organic type of lesions
some injuries and random events, etc.

in this regard, the system means management
it's not quite just in the literal sense , or something
refers to the local diagnostic system of Thinking only
but also naturally enters into the diagnostics of events

as in any control system

there is some kind of inextricable connection between
between for example the structure of Thinking
and events

and therefore the selection of this fraction of the event

it is here in this case as if a special technology
based on the fact that we can recognize Thinking
but will the thought lead to an event?
that's another question

here you already need to understand
means cause and effect

a person can think but not lead to an event

i.e. he can think, for example, in completely different ways
but events for example can be favorable yes

i.e. here it is important to see the management structure
I mean in a particular case
that someone can there well there mentally for example there is swearing there yes let's assume
but man in action is never aggressive against another
will not perform
physically meaning

that's what I mean
that you need to be able to diagnose the event line
as if independent as well

here is the ability to highlight the structure of Thinking
which actually fits together there
with aggressive behavior

or the structure of Thinking
which can lead to a problem
this is exactly the task here
in the control system of these processes
to prevent this from happening
we need to structure events
translate
into a structure separate from, for example, negative Thinking

i.e. he is , for example , a potential aggressor , let's say something like that
maybe somehow, well, some kind of situation can be tracked
to control something there or to calculate something there

but at the same time when we translate the event
to the normal control level
he can't do it even with unfavorable Thinking
and with a seemingly negative status of actions

i.e. the ability to bring the situation into the Norm phase

here another option arises

what if some unfavorable situation arises
for example there is an accident
then there are some motives of the other side, yes

Let's assume the situation is like this
that some "equivalent" well in quotes of course yes
there is an accident yes
and no, from the point of view of the Law there are no guilty ones there

Well then that's how it works
what were the systems of action of the two sides
at the level of Thinking
at the level of management practice

and for us, especially in the conditions of counter-terrorism
in the conditions of real technologies of Eternal development
one must be able to see the true roots of any event

therefore, diagnostics of one's own Thinking as well
diagnostics of one's own motivating type of action yes

here's a thought that comes to a person first
or he doesn't agree with it
or agrees
then there may be consequences from this

not every thought there is even negative
i.e. the person is meant to be "negative"
that some unfavorable information
thought out by man
but at the same time it may not have any adverse consequences

you have to be able to see
the structure of Thinking and the event level

like God does
He has the same structure of Thinking and events

it is often a single level of management

i.e. thought is born in God's control system
and it turns out that here, in principle, the situation is like this
what is it that needs to be divided clearly
what is this God's Thought yes
or event Action
from the point of view of external observation
here in principle it is clearly impossible

therefore in management through Thinking
you also need to find it in your thoughts

in the mind of a person
such levels where it is impossible to separate information
thoughts and actions

so the idea needs to be brought to reality yes
by force of will
to the event
and dock
where in the mind is this event located

i.e. to recognize
it's quite easy to do by the way
in any information system there is any other yes
such a postulate

it means there is an event in the thought

the only question is where the event is

here is the first principle, the principle is kind of axiomatic
in this control system
the system of Thinking must be
Well as if a little higher
as let's say there is a balloon there

and the system of events must be lower in space
well at least a few centimeters
and i.e. the event is more dense yes

man is accustomed to perceive through Consciousness
that the dense event is as if located here
Thinking as if from above
Well , that's basically how it works in the collective Consciousness

So when we go we lower our thoughts
to the event
we basically just follow
according to the structure of the collective Consciousness

although in the space of Thinking you can do whatever you want
if we abstract
from the phase of collective Consciousness
i.e. we work autonomously
then we introduce the reproduction of Thinking
into the collective Consciousness

then you can just take the idea and connect it mechanically
with event space
and then take it into the collective Consciousness

the main thing there is to get it out exactly

so there are two principles of operation
or we work
right in the structure of the collective Consciousness
then we bring it from above as if below and push the thought
and we dock on the lower platform

It is precisely this that is important to emphasize here
that the platform is lower

i.e. the event is not taken from above
and from below
because the higher the consequence grows

because everything that is higher is the desire for God
this is already the next yes
i.e. it turns out to be the future time
in thought is higher in the sphere of thought

if we consider for example the thought
as a spheroidal system

and let's say we need to build a verbal background yes
we need to build a word
a person, for example, says words
how can he construct his words
obviously there is no way there just by talking
which he has been taught since childhood

and generally construct words

through information through management

i.e. to construct, for example, your own speech
through the external management structure
with ourselves, so to speak, with our information

then at this moment a person must build
and the structure of Thinking
and speech structure
and the structure of the organism is obtained
simultaneous construction of all information systems

then it turns out that in this case
a structure for action appears
where does he get his action from then?

that's how to build management
then he must have some kind of external thought, as it were Yes

here is some kind of regulating thought

and here the state of the Soul is important
for example, in the treatment of people
very often the state of the Soul is the main thing
something there does not lead to disease
or has some other consequences

that's why I say that it's important to have your own thought in an event
in case of some equivalent possible accident there
which can be
so that it doesn't exist
we need to look at where you agreed to this accident

if a person does not agree with something
it's like this, in practice this doesn't happen

somewhere means it exists
or direct consent
what, it wasn't a complicated accident, they hit the wing, well, okay, yeah
or else or else it could be like this
what is an associative connection , so to speak
at the level of associations

i.e. for example, a tree broke there
well, as a manager who deals with
systemic Eternal development
It's easier to give it an impulse so that it can be restored there

if you don't pay attention
perhaps this accumulates a system of signs
and then somewhere, as if implicitly, the structure accumulates
this kind of small accident

any large systems
well if we for example suppose we are building a verbal phase yes
i.e. we construct our own words

at the moment of action we pronounce the structure of the word there
then it turns out that here
something unfavorable but on a large scale
as a rule, a person sees in advance and long before

and here is the situation
what you need to be able to overcome this system
again the system of my own Thinking

the ability to recognize and remember a certain thought
which could , for example, give a forecast phase

and a person would simply remember this and go around it

pay attention here
what often happens when a person makes a decision
So it happens to him like this
that the list of some associations of structures
which once were
and which had some information content

it is not necessary that something even unfavorable happened
here is the platform of Thinking
these previous events may be
i.e. a person seems to remember all the time
that in the past he was there and there was such and such a plot
Why
why yes the system of constant Thinking

God created the world
where He constantly thinks about it
what well how to proceed further

it turns out that He created the structure for Himself
which, well, practically means , let 's say, reproduces
so the situation
what matters is all the information of the world

all information of the world

i.e. when a person thinks

it also highlights some information

well, how is it considered that he allocates there, then Thinking and

for example, there in the area of the brain there as if

although in fact the thought is derivative

relationships

God and man

at the Infinite level of development there is Human Thinking

i.e. it is an external quantity in general

you can look at it like this

the thought may be completely external here

and for example the phraseological type there

control through speed systems

when the structure of the sound changes to those

well, let's assume the technology of presenting the material over the word Yes

often the main thing is to create a sound form and not a verbal one

for example the mangrove management principle

there mantras go faster than words, let's assume Yes

faster than the logical part

and part of the word can be replaced by a mantra, for example

well in ancient techniques

i.e. it turns out that they are the same

First of all, it means they responded to management

and not on the verbal part

and a manager, he should at least try

keep control like this

so that the verbal part matches

with what happens as if in the logic of events

then it turns out that

the one who acts precisely in the world, yes among people, so to speak

so it turns out that here in this management

it is important to also identify the totality of external Thinking

in relation to the event

all systems of Thinking

here's what's in relation to this event

may be in the structure of people's thinking

as a main characteristic yes

i.e. the following system of Thinking
which even reveals some aggressive systems there
or loyal

and as a rule, these are precisely the facilitating systems, yes
they do not require special identification

here you need to see clearly
that God who created people
which well for example there in Eternal Development
develop consciously

this is done synchronously
and God does not cause, for example, there is an additional there
resource management or something

at that moment when if there is
some other systems there are misunderstandings
this is where the resource is needed

so it turns out that in diagnostics
first structure yes
in diagnostics of Thinking
this is a system of Thinking as if by difference

when all acts favorably
there they develop together
precisely in creative development

it turns out that here it's like
even if we use it there
additional sound forms there are verbal
clarification increase in sound form yes prolongation

i.e. different methods of technology management
so let's say mental and thinking
then we still have normal development
and we don't need to think for long
how others do it
others do the same at very high speed
and in principle why would you monitor or control something there?

we can only see what we need to decide, yes

and here is what word there is what action
we begin to think
and where is the system of some interference in solving this issue
any

and that's when we start to detail the interference there
here we come then
to the structure of the already emerging of these interferences of actions
some resistance

how did they come about
there are stories of their origins, yes
the story there is based on the totality of actions

and here the first sign appears
in the structure of recognition as it were
some aggressive intentions
that the background is like an aggressive negative action
in relation to you there to any other person in principle

it can be reproduced and projected there
into a system of some kind of external aggression
but already as if in a different action

i.e., as if a universal module of an aggressive system
it could be roughly the same

then it turns out that well, like a nuclear reaction
is happening
leads to the explosion

nuclear weapons

just the reproduction of the next phase
which takes into account
primary status first occurrence
like this one Well so let's say such a catalyst
here it is in exact execution
that some kind of spark and then the reaction itself begins

but each subsequent reagent element
it just has a primary level
he himself is basically almost inactive, yes

main force of control
and counter-management, let's say, of this destruction
is in primary action

so to start working in this regard
needs to be excluded
here is the power of this destructive action
where is well as if aggressive intentions of people

so the management task in this case
on diagnostics of Thinking
and the control context of this diagnostic
is the identification of the aggressive status of Thinking

then since we can't man
if he thinks creatively
Naturally, he should not be forced under any circumstances

but if a person does not think creatively
we have the right to influence then
i.e. we have the right to protect people
protect yourself there etc. yes

and therefore means the structure of identification
as if this context of management
is first and foremost to prevent
any impact for example
in the first impulse
well, which would look exactly like
nevertheless, here is a certain component of the impact

here is the first approximation system
to this level of well, some aggression yes
ability to capture an intermediate level
non-contact control level

Well , like before, for example there at the beginning, let's say, of perestroika
there were systems like, let's say well karate training
there were contact and non-contact yes

non-contact is actually a kind of sport
what could it lead to?
just to the meaning well there is general physical training
and the fact that there is such a thing as karate yes let's assume

so here it is approximately the same
how would the control principle occur
what is non-contact type
we fix our own position

i.e. non-contact type is the main thing to designate it ^{yes}
how can you not get in touch with this management

the main thing needs to be clearly formulated
where exactly is your position

and that's when you start to see your position
you see that you are not in contact
it's you

here is the ability to control your own information
from the point of view of control over one's personal situation

so the first method of control
the ability to control one's own situation
in a favorable level of events
i.e. as if constantly taking control, ^{well, actually, by yourself, yes}
into a continuous action system

then you get the outer side
^{as if} he doesn't even see
can't recognize you from the information

and it turns out that you ^{well so} at the event level
the outside side doesn't have time to do anything

Well , for example, you are walking down the street ^{Yes}
so you work with this technology
to react to you
need to have informative contact
if there is an aggressive side

if there is no contact you pass
there is no aggression towards you anymore

Means Well, it's like a high-speed ^{control} system.
related to technology ^{as if} situational
i.e. you are forced to go and you have to work like that ^{yes}

there is a profiling type control
you first look forward at the structure

Now I am putting it before the managers
who work according to my Teaching before my students
before the party level of government

systematic control over the region
the absence of destruction there and in the level of control

and in connection with this the manager
he must understand this absolutely clearly
all situations that can lead to some problem yes

i.e. he can't have a situation
which he may not take into account, it turns out

in connection with this, well, if some external rocket flies
then it is usually visible there, for example there might be
20 years in advance what
that something is happening there
i.e. exactly such a global thing there yes
precisely from the point of view of military operations

that's why there are clearly no military actions in the forecast
so that in the territory there in the next 20 years
some kind of rocket was flying

then look at this forecast
you can improve it, increase it to Infinity and that's it
Our task is to make sure that this never happens again
so it will be yes

conducted control and recorded
and keep control at the point of achievement

then the next level of detection
aggressive type of thinking
there is no structure of universal Eternal development

like this line
where we stretch into Infinity and hold
that everything is fine
he denies this line

i.e. it works the other way around so that this doesn't happen, for example, yes
or because he is not educated, for example Yes
or there is character, etc.

it means if the character is more complex
because then you have to work situationally
We often don't have time to develop character

among managers
then you have to work with the event part

i.e. the part of events that he can make negative
in counter management such a representative
so we need to take this part of the events away from him
under your control

i.e. it is more like intellectual work
Well, the game there is more like this, some kind of intellectual one
where you need to be able to withdraw

but of course this is not a game at all, there are specific events going on there
but nevertheless it's like well, sort of
maybe there is more chess game there
skill in a real system
adjust the control to your task

and still, chess is a game, i.e., it is still just a game
in this case we need to understand
what is management

For example, I diagnose an airplane there
and this is real, this is not speculation, yes
i.e. it is certainly not a game there and cannot be compared
with the concept of "game"

but there are game options
in the system of achievement, then, of some tasks yes
there is game theory in mathematics, etc.

i.e. there is a kind of playing out of some options
like a record playing
it's not a game but it's kind of called "losing" yes

pay attention here
that in control technology for example there is the word "os"
if together yes pronounce

then the transition of the structure "c"
into the inner center of the letter "o"
as if it starts to close the letter "s" at high speed
i.e. we have a prolonged sound "o" yes

i.e. accumulation i.e. taking control
taking energy is called yes, etc.

and before it was called that we can consonants

include for example in the structure of vowel sounds yes
then it turns out that we hear more
outer space
i.e. the sound of silence
sound of outer space
it is considered more of a vowel than a consonant
this is the voice of space
but agreement of space is also possible

translation into Russian as if phonetic
in the semantic understanding

outer space may agree
but in principle the voice is always heard
it's like an objective factor

and then it turns out that we are the same voice of events
we can hear some level of events

i.e. what does the event lead to
possibly aggressive side

i.e. what did we do in this case
we have extended the event phase possibly negative

i.e. we have moved on to the structure of its analytics
its root systems
and we begin to see what is happening yes

as soon as we begin to see
the event is delayed

in principle, any event can be delayed
but definitely negative

and you can also look at the positive event there first

and now this system has begun
that the impulse of the event does not reach you
you study it, analyze it
and keep it as if at the level of external control

and here is the next level of recognition , so to speak
aggressive yes control phase counter control
this is an attempt to drop at super speed

events in your direction

i.e. the impulse goes in your direction faster
structure of external Thinking
is recognized as a system
which ^{kind of} prevents the analysis from being completed
to the level ^{of sorts} what about your actions

not everyone always has time to analyze and control there
the system of Thinking so that there would not be, ^{for example,} a nuclear power
plant explosion, ^{yes}

but if we are talking about an explosion
then time will have to be found
need to find

and there aren't that many such systems
this means you need to be able to prepare in advance
to this control system

as well as, ^{for example,} to the treatment system
how to make a person always healthy ^{let's say} Yes

and the task of Eternal development
he should ideally always be healthy

i.e. skill regardless of the number of events
still make sure that people are absolutely healthy
so that no one wants it ^{and} no matter where it happens

so it works out
that the projective system ^{is like}
accumulation of external events
should be like this at such a moment
what is in the control phase
a person always falls within the Health Norm

i.e. at the level of Thinking
he's always ^{kind of} carried out there, ^{yeah}
structure of the physical body

because Thinking is an action of the Soul
like a reproduction of even the Soul
means revealed in space-time
and the body as part of the Soul

then in Thinking the structure of the body also exists
but in full form

i.e. if we consider

where is the border of Thinking
where is the structure of thought near the physical body

then in principle the thought, *for example, about yourself, yes*
She moves towards the person very quickly.
touches and goes into Infinity

and the thought, *for example, about the external world*
it is the opposite, a thought that takes hold of a person

i.e. man is developed into Infinity
The world towards man
Well , well , you can even recognize it like that
Vectoriality of Thinking
how does optics relate to the physical body at all

i.e. through some level of management
can be seen
that even with correct Thinking
for example, without even using the management structure there
for example, there in some fundamental phase
you can, *for example, improve your health*

i.e. it's enough to look
as the thought goes *yes*
how does she react to the body

there are usually 2-3 actions
there might have been some warmth going through the body

this is *not* always a sign of warmth
this is like a sign of action, *yes for example there*
but in principle it is often a sign of warmth

that's exactly why the heat passed
so you have aligned the management of this level *yes*
due to the structure of Thinking

so you can think, *so*
well, bringing the physical body to the norm, *for example*
at this moment

as soon as we enter
into this system of Thinking in any case

i.e. so that it would happen in any case
we must bring Thinking
to some center of Thinking
where does it mean that any of our Thinking leads to the Norm

and here is the next factor of recognition
some aggressive action yes

Moreover, aggression can be of different types
maybe it's absolutely harmless to health by the way
it could be an influence
on a specific structure of events simply

but nevertheless we believe that this is counter-control
and it is still aggressive
we highlight the phase of aggressive management

so here is the next system of differentiation
that pulling to the center of the sphere
where all thoughts are useful to you as if Yes
improve health, are useful for others
here it happens with some interference
then we can find out
where is the interference coming from

the first element that comes
Well for example, there is some kind of event-based construction there, yes
Well, this is generally clear, this is a background level of events, many

but here in the events
in events if someone acts intentionally
it's clearly visible
that it was done on purpose
and this is what their structure of Thinking looks like
like like well, in the form of sectors like this

on the visualization it is visible as a sequence of numbers
which by the way even increases and suddenly stops
you can even reach digital perception

i.e. the numbers go up there, they increase 1 2 there 8 and so on.
but suddenly once
and the numbers , well as if they cease at the point of origin
here is the aggressive impulse of Thinking

found for example yes the structure of Thinking

we looked immediately at what this could lead to
for example, there is an aggressive thought there
the man was short of some money
here you go pay in the store
he thought of something and went, it's not dangerous, yes

then we need to keep an eye on him
why does it send a negative impulse

give him an education
here's where it goes right before the point
give him an education

he wants to take it, he wants to, no, in principle
but you did your thing
they gave me an education that was not necessary
You have to treat a person in such a way that he lives forever

If you didn't like something, then teach me
why for example well, to mentally offend someone, etc.
let alone the words suppose

and then we begin
in this way act interact with people

i.e. in the conditions of, for example, counter-terrorism
in conditions when a person must systemically
live forever

provided that you can know
someone is just in a hurry there
he doesn't understand or he sees some of the following events
and tries to get you into the system of his control there
we need to recognize what he wants

and agree only if
if you understand clearly
that you have a favorable level of events

and this clear understanding is another level
where there is a level of awareness of all sources of Thinking

who, why and for what reason thinks this way
that there might be some kind of order for the situation
Well, we just paid for the order

or some kind of avenger appeared there

anything else

well, some kind of fixed systems

which in principle as later already

when you manage, take a look

this is basically one level of events

what is random level

for example, a person, as if by accident, supposedly gets sick, yes

and because of something one-time

that there is a structure of revenge of some so-called, etc., etc.

disband all systems

it's absolutely possible the same way

i.e. you should not think under any circumstances

what if there is revenge or some kind of order there

or some kind of, you know, systematically, as it were, formalized event

that it is more complicated than there random

this is not actually true

for a manager everything is completely uniform

and you will see for yourself

because what difference does it make to God

let it take a thousand years to build there

some kind of conspiracy there

for God it's the same

single Action at the moment of implementation yes

this possible implementation of events

and what what as if just an organized event

for God it's the same thing

so in management it's also the same thing

disband some thousand-year-old conspiracy there

also in principle easy

how to prevent there suddenly accidentally possible

which may occur random event

so in the system of Thinking

the main thing for stabilizing any control yes

this is equivalence universality

i.e. we introduce into the sphere of Thinking

the structure of the image well Norma yes

where we have the same rays in all directions

whatever happens

switch periodically at least
to a neutral point of view
i.e. to evaluate neutrally
i.e. beneficial for everyone

and get used to the idea
well, there is some kind of negative side, let's say, yes
if it exists
then in principle in relation to her
you also need to have an even attitude

which and his same this side and some other there
if it is negatively manifested
will also lead to Eternal development

also to Eternal Life

i.e. the concern is just the same, perhaps
this is what might be the only difference
that this side will have to give more impetus
Well as if more or less a power level of information
will have to apply

because the displacement there is simply higher
and purely geometrically, as in the deformations of the material there, yes
information there is also like a system of matter

it just takes more to level out
well, some kind of tension or energy and that's all
often it's not much more

at the management level
if you give there Well, to that ally who helps you
He usually takes useful information
immediately implements
This is almost not visible in the controls

i.e. the useful phase in management is underway
Well, as you can see if you take a look
naturally everything is easy to see
everything is very easy and simple and there are no concentrations
not needed so to speak

because in concentration there is also unnecessary information
because when we do concentration
we kind of transfer the concentration
the necessary phase of collective Consciousness

we fill it with our idea as if

and this idea begins to prevail
we are seeking control

and everything happens in the system
including the collective Consciousness
Well, naturally there is the Consciousness of God
which also includes the phase of collective Consciousness

and it turns out in every system of collective Consciousness
God's consciousness is present
as well as the reason
and consequence

i.e. primary organization
still there is a phase of God

and the consequence there exists in the form of a reproduction of the action

and so we come already
to action through the Thought of God
through the structure of the Divine

in action there is
Action of God
and Human Thinking
Human thinking
comes into contact with the Action of God
at the level of a sort of primary
and as if the final impulse into Infinity

i.e. the primary impulse passed yes
in the Thought of God
you can clearly see the light axis there, let's assume Yes
and it is final but into Infinity

God has no concept of "ending"
there is something that goes into Infinity
but this is the end of this impulse for a person

so the person sees it turns out
projective part of all elements
but the Infinite elements are essentially

and here is the contact
of this ray

and the Infinite Phase
some such angle _{yes}

that means where it is happening
Management through structured Thinking
there you just need to conduct your thoughts like this
so that the thought touches
with the event
event phase
beam
and with the Thought of God and the information of God
at their junction

those. your idea on transferring some kind of knowledge
i.e. God considered
but you are the same
God has gone through this phase of governance before.

and you basically do the same
work that is precisely creative

when God already did it in front of you anyway
He showed the way

it may not be entirely identical for Perception
but these are different pictures that are perceived differently, _{yes}
even with physical vision

this means there is a different structure of logical thinking
but even the same paintings can be different
immediately perceived from optical points of view

that's why god did
and you can perceive the system differently

but God thinks , let's say, in all systems
i.e. figuratively at the level of the figure of Thinking, _{yes}
structures of the form of Thinking
at the level _{of} the structure of action
it turns out that _{not} everything is so simple there
how is the view of the painting _{there}

although the picture is not a flat system either
naturally there is the Soul of the artist
manifested in Infinity
in Infinite Life in Infinite Action
in Infinite life in the physical body

really from the start

and those who show this structure

then the paintings become Eternal yes

i.e. people have been looking at them for thousands of millions of years

this is the structure of Eternal development

open Soul of the artist in Infinity

where he actually understands

what can he collect for example yes the structure of the body of the Eternal

but due to the collective phase of Consciousness

well maybe he doesn't want to do it or

or doesn't even know that it needs to be done

i.e. formally it turns out to be Eternal paintings

well known there as the structure of the reproduction of Eternity

very famous just paintings

which have been in museums for centuries, for example

we can say that there is some kind of radiation from them

going in relation to the artist

this is the structure that in principle

if the artist knew

that for example there is Eternal development as a system

level yes

then he could simply be Eternally at the same time

i.e. to live

as well as a work of art there

as in general everything that is created by man

and is located in the structure of space-time

for example a built house

and if this is translated into a phrase into a word yes

and from the word see the structure of Thinking

word reproduced

and move on to the physical body

then it turns out that it is enough to look through this mechanism

God's way to you

it turns out

consider the transition of this glow

God bless you

then you see everything

your own Eternal body systemic Eternal body

i.e. it does not depend on circumstances
whatever happens to your physical body Eternally

and here is one of the criteria
this level of management ^{yes} Thinking actually
also consists in the fact that
that you are this state this understanding
make the structure favorable
without even entering into the structure of counterarguments there

i.e. the analytics are like this
that you do not diagnose in the direct sense ^{yes}
Well as if some counterparty some environment

and simply because you yourself , well as if you were pouring yourself there
the structure of the very Action of God in the Eternal development
and this Light just ^{sort of} squeezes out everything unfavorable
i.e. it takes you out of phase with your control level

so that's when he takes them out of the control phase
then in principle further it is normal
typical for most ^{people}
normal state as they think it is ^{like} this
Well as if many do not consider the state to be governing
, everything goes by itself and goes, ^{yes}

but in fact, as I showed here you can see
which is a very powerful management principle
where the physical body docks
and the information of God's Thought in fact
this is ^{generally} a very powerful status of the physical body

if, ^{for example,} you understand it thoroughly there
and understand
where does this impulse come to you
from which side
where do you touch

then any action is possible
bring it to the level of Eternity of development
understanding what you are dealing with
this is Eternity
this is the Eternity of development

touching something at the right point
or understanding the structure of internal connections

there they took a spoon in their hands
but they extended the thought to the center, there, let's assume, metal and
somewhere
and recorded
this is already eternity

a little further it is already just Thinking

and here is the ability to , as it were, make the structure of Eternity
in interaction
i.e. to work with any system and see Eternity
well at least there periodically
it's not always possible to do it there once a month there once a day

if some diseases are being treated
You can even do it daily, it is often recommended

i.e. the ability to derive the structure of interaction
on the context of Eternal development

then it is clear that on the way from God to you
when god gives you structure
and you perceive it as a kind of ray of Light yes
hope there is love and faith in God

but here is where the mismatch occurs
when the level starts to reproduce itself
somewhere further to be reproduced
or it doesn't exactly reach you along the corridor
look again

what level of aggression is shown here then

because if the obstacle comes from God
then this is probably macro-aggression already
not only to you for example Yes

but considering that you work and are engaged
Saving the whole world
that may not be profitable
what are you improving there
then we need to trace the source through the Macrosystem

so the next level of recognition so to speak
recognition of some aggression, moreover, at the Macro level
this is what the Light comes from God
it naturally reaches you in any case

of course there are no questions

it just means that attempts are being made here

how to bring in some of my own information

Well for example, unfavorable, let's say

It is clear that there is always a ban

to promote some aggressive ideas

but nevertheless, here is the skill of some individuals

do something to even it out

some positive ideas

this is already aggression in general, and so on.

and here here you need to see

how does all this come together

here in the World in Macro-creation in the original World

systemic destructions arose

we come to that

how do they even arise then?

in each specific action

and that's when we start to see

that they are often based, for example

from the discrepancies between one and another element yes

interpersonal context

i.e. everything is going fine

one person did not understand the other

problems begin

i.e. it turns out that the first level is a kind of misunderstanding

some kind of misunderstanding

at the normal logical control level

for example in the primary phase

well when a person didn't recognize it exactly

there is the Action of God

what did God want to tell him

he got angles that distracted him yes

from the level of Eternity to the other side

this is precisely the structure of regulation

it is the ability to understand

at the level of interaction of all people

i.e. to understand people through transmission, including them
Salvation structures

i.e. it is not necessary to enter into their often internal tasks
although sometimes it needs to be done means

but nevertheless when you give
Macro Salvation perspective
then in principle there are no problems

if there is another environment
let's assume there is some kind of energy-information there
radioactive environment yes
that is precisely the level of counteraction
Well, let's just say that
not at the level of human control systems there
and it turns out that we, well, from a human point of view
everything there is achievable from a management point of view

Of course a person does everything, yes
here it turns out that it is precisely the ability to deduce
structure of mutual understanding
primarily between people
then , in general, in some kind of such interaction synchronously
maybe like "in mutual understanding" and in quotes
with any level of information
with any information object

and when a person enters this system
then here it basically becomes
Well, it's completely free there
he basically doesn't obey anyone there
He's not particularly present in front of anyone, let alone particularly so
he just does his own thing and that's it

what he does is his personal status already
he does it already of his own free will
and it is important to see the structure of your own desire

and the influence influence on the initial level of this structure
i.e. we consider our desires
exactly when it arose

a man went out to the store for example Yes
here is the impact on the initial level

this is often a sign of strategic aggression, i.e.
i.e. someone is planning something in the future, maybe far away
influence personality
or there to the city to the settlement, etc.

i.e. the ability to identify at the initial stage

so it turns out that they are some kind of their own
well, good thoughts and desires
a person must be able to somehow store somewhere

why are there talismans in some places
where a person remembers , as if specially stored
some personal data there in the form of things

because it's like some markers there
well, it's like some kind of, let's say, symptom levels
what if there is some powerful influence
original earlier
then they strategically hold the person
in the phase of control, i.e. he controls the situation

he has something expensive there
he holds it somewhere near his heart yes For example
carries somewhere there nearby

and it turns out that this is the level
which is both initial and Infinite

and this is this skill
ability to identify
influence already further to Infinity
Now that's a special task
which is related to that
that it is not because there is some aggressor there For example
and he is harmful there, well, let's say tactically

and because any aggression
any kind of impact even
on the event line of a person beyond his will there
these are still possible future influences
on a person in terms of precisely Eternal development

after all, from the point of view of the logic of the development of the Eternal
there Eternal development is also the will of man after all

and if for example we well let's say we do the management precisely

and you need to do it absolutely precisely
then we must show
that is why it is impossible to influence the will
the creative will of man
because Eternal development is also a sign of his will
properties of the will and its desires its volitional decision

so it turns out that here we see very clearly
does it mean in Infinite Distance yes , on time
a sign of aggression it should decrease
as some kind of external quantity

and when we start to see it
we are beginning to recognize it specifically
Thinking technique means
provided that this Thinking is no longer dangerous to us

because the person who sees what we recognize
understands that we provide him with this person
Endless path of development

i.e. that's why it is absolutely necessary to set it as the first task
Eternal development for all
then he gets a positive level from you

and it happens like this
that even at the information level sometimes
there are even some microseconds there
that positive knowledge can spread so quickly
that he is already moving along a creative channel of events
and in fact you trained him in a matter of microseconds
by transferring this impulse

and it looks like everything is fine
and it was before

and these are the super-fast elements
this is something that you actually do not influence
so it turns out that a person makes a decision
I myself am still just very fast yes

without influencing the World in some way

put the World into structure
namely, Eternal creative development

when you already install in such a system

this position
here are attempts to shift this position
specifically at the level of space I show
this is where the control is
somewhere around 50 centimeters from the physical body, for example Yes
there may be a meter sometimes, etc.

and so here are attempts to shift
this stabilization is already being achieved, as it were
well, in fact, it's like the next circle of counter-control
in relation to you
here you have brought it to stabilization
and for example counter-control begins

then it turns out that we are already talking about here
usually about a group of people
here are clear symptoms when there is an aggressive thought
influences a person in a group

and then it turns out that you can recalculate the quantity there
it's not even necessary that these are people by the way
there is a group of some objects of crocodiles, let's assume Yes

what's not clear with you is there's some kind of thicket there's grass and forest
how to understand how many aggressive systems there may be
there are predators, crocodiles, etc.

in principle, a person should survive in any case
even if he goes somewhere through the jungle or something

i.e. it turns out that it is precisely visualization in Thinking
physical factor
this is the basic level of counting these supposedly possible crocodiles
conditionally crocodiles, well, some aggressive systems

maybe there are some harmful gases there
and generally any harmful systems

then we need to make it so that Thinking
Thinking
inside the thought the object was perceived as follows
how is he in real life

i.e. at the level of Thinking
you perceive the object i.e. you look

Perception for example there with Soul yes

I perceive there is a dictaphone there yes For example
this is one level of Perception

I can perceive the consequence there
Spreading the word through a dictaphone
is already a different management environment

I can see what word interests me, yes
in the Infinite of some information
and found the word there for example there is the word "God" and his Action
for Salvation for example Eternal development
where exactly
what kind of people exactly is one aspect
it's just information but it is implemented
in the form of action is translated into action

but the action is the same dictaphone
but there is also a human level which is Infinite
you can't take a person there
and make some kind of autonomous system
this is the Infinite level

You can only eat what is harmful to humans
bring to the autonomous structure in contact here

it turns out to be exactly this selection
Well what phases of harm or some kind of design
some aggressive crocodile
this is what is on the material and mental level
matches

for example, I diagnose some kind of defect in an airplane
or are they transporting that crocodile again ?
maybe he is harmful, he is in a cage, maybe he is not harmful then
but i can diagnose it
suddenly he can spin and get out, yes theoretically yes
recognize and foresee such an accident

then it turns out that you need to control
so that the cage doesn't open

so it turns out that based on this
I clearly see that he is alone because the action is one
opening of the cell is possible

but if there are three of them
that here can lead to that there

that three crocodiles can crawl out , three, etc.

then for me the task does not change
I only have one cage for them anyway

so the fact is that your task does not change
under no circumstances external counterparties
kind of negative, and of a type

i.e. whatever the external system may be
complicated there so-called excessively some kind of negative
it should make no difference to you in principle
here in management

any number of aggressive systems
can be held by one specific action
the main thing is where to put it and put this action

so this action needs to be put there
where your Soul connects
with the starting point of Infinite Time
in the future

i.e. in the future there are points where time begins
as an infinite quantity at once

Well , that is, the person got used to it
what is the cause and effect system
and in analytics they generally shine
what exactly are they called
and look closer like the letter O

i.e. you can find it through the letter O, it is not zero
zero crossed out ^{yes} Well, when they write there
when they write ^{well} programmers write and cross out the zero
[...]

and ^{it} turns out that based on this
find the starting point
and all the time at once Infinitely

then the sign is the following
at one control point where time ^{is as if} fixed
you only transfer the action to yourself
when all events are favorable

well , that is, negative events are taken away

because you hit the mark in time
where the structure of Eternity is systemic
this is a property of this time

i.e. you start working
in the spatio-temporal environment
as if you enter this environment

Well, for example, a person swims in the sea there, yes
he begins to interact with the environment
this is a completely different technology
it is an interaction with this environment

i.e. you are in this in this system
as if nothing is brought to you yourself , well as if external yes
but simply begin to interact with this environment
enter this environment, recognize it, perceive it, etc.

then it turns out that you
Well as if you are saturated with this environment, it turns out that in fact
it's just some kind of saturation
with this light of Eternal time
and that's all

then it turns out that you have clearly defined
that counter precisely the possible there well stupid interaction
against it, well, in principle it can also be harmless
as well as individual events

considering that for God, as I said, it makes no difference
what just now
The main thing is what the consequences are
maybe there were just fuses there, they could work yes
but it seems
and something quite small could have been in the works for thousands of years

this is where the difference lies
in the system of possible harm yes
possible harm can be for example the same

and so it turns out that for the purpose there are exceptions there
the maximum harm that can be caused
there for example there is a person there
like biological well serious impact
or even decay there

if this situation is excluded
then in principle any other situation
already next i.e. it is already the third in level

means control system
is an exception
well there for example there the concept of "death" is completely excluded

in this case, this should not be done by fixation
for example, death is excluded Yes
sometimes it is possible

but it's better to do it in such a way that it doesn't exist
how high are the control speeds
that it simply doesn't exist
she doesn't enter the control phase at all

then it turns out we are
we don't care about quantity anymore
well, such aggressive systems and opponents [...]
because they still can't cause any real harm
in the phase of your Eternal development

i.e. a quick exit into the future
rapid construction of future events favorable
and the external system does not
Well like such an aggressive possible type

maybe not even aggressive
to mean anything
well make it so that you have a real problem

because the main system
in the phase of collective Consciousness
there are a lot of negative elements going on yes
in Reality
and it is necessary that
firstly, to align so that this does not happen, the task is

secondly, you still need to do it this way
to be able to achieve first of all
that some kind of exactly well I call it "real" as if
something that can really pose a problem to you
so that it reaches you

i.e. this needs to be completely eliminated from management

it turns out that here, as I have already shown
some phases of detection
structures of aggressive thinking yes

It's not just Thinking that's important here
but also situational things
count the number of possible aggressors there
how many of these elements are possible again yes

so as I said in the account I transferred to the protection structure
counting is defense counting well defending

there are even some comparable sound forms here

and you see here a very fine line arises
well from the point of view of the language of language control systems
account to defend means
i.e. we only use this system of approvals

if we agree yes to protection
i.e. we decided that we agree to protect
then external there is the publicity of the external World and the voice
he is in the conciliatory phase
he also moves to the structure of this fine line
not a direct comparison of words but
but in accordance with the idea of the Spirit and the idea of the soul

and that's when we start the idea of the Spirit of the Soul
introduce into this system of actions
then everything matches

this is where harmony comes in
which is called , well, in principle , a force factor
whoever wanted to express something unfavorable
and if someone wants you to divide it like that
so that he would need it
well in general your friends who help you relatives family

and here it turns out that when there is another coincidence, yes
all these control elements in the creative phase
then we see that any negative system is like some kind of trails
These systems are very far from humans.
as a rule initially

i.e. you see that the management background is unfavorable
for a person
he is very far from human events in general

and in principle if here
where did that even come from
that some unfavorable events
reach the person

if we consider the comet there as a kind of comet tail
who can't catch up with this very comet
then all external space
if you look at space like that, yes
this is exactly the system
where any number of events can be
to derive as a system of fixations in space

that's why a person perceives a large space
he supposes as if at birth
he has a huge space at first
why, for example, didn't God make it so that man
I would take birth and perceive a small space there
it anyway
from this point of view there is a large space

because in a large space
here is the answer to this question next in today's lecture
according to today's methodology
namely the systemic level of favorable development

that in a large space it is always possible
suspend some events, consider and resolve the issue
Always
large large amount of information
it is always an opportunity to solve the problem

i.e. everything is connected in this World
and therefore a person perceives the big precisely

so who has it for example
Well let's assume there are vision defects let's assume yes with hearing

there is a concept of "inner world"
and through the inner world he can restore
Perception of the external world
Always

i.e. a person always has a self-regeneration mechanism
there is self-healing, etc.

and eventually he comes to this
what we see in the internal system of a person
at some internal, sufficiently powerful wave point
at that point where the entire external world moves

she is somewhere at that stage
the man begins to enter
this is immediately a projection of the World and the heart
the heart arises this is the World for example Yes
such a direct , as it were, energetic connection

the heart of course the heart on a physical level
but it is precisely the impulse of the heart that moves the World
Well, it's like a very schematic ideology
but this is the first time a person perceives it this way

then it moves to the cells, etc.
every cell moves the world yes
it kind of recreates and creates it

and here you are
into a system of such super-powerful concentration
and here is the control point
you always know that you will change the control system
Always

here you have a pole of absolutely clear
safe there phase of Thinking management
i.e. you can easily do the control in this phase

then it turns out that having considered everything that is external
everything that does not correspond, for example
it could be anything then
aggressive even yes for example, systems of Thinking

you understand that you will gradually displace them
to give them some kind of educational program
i.e. you understand that they are not dangerous for you
It is important to understand this from the start
that they are in a controlled system
since you came to this situation that I spoke about
the system of a certain pole sometimes even
it is more than a pole of infinite levels of problems

i.e. this is Perception
Correct Perception of Infinity

this is your personal development
Eternal development is your personal development

and here we come to the point
what is the system technique
i.e. for each manager
the ability to clearly see detail
it's just a derivative
which may or may not be needed

i.e. if everything is favorable anyway
why look behind every tree there
what's happening

but if not favorable
there you need to look maybe at the atom of each tree
and ^{how} to choose the system of all connections
you need to understand absolutely everything at this moment

and ^{as if} when we start this system as a volitional one
so we took it and decided there [...] with our eyes [...] ^{yes}
in fact it is a clear understanding at this point
as I said at the point of sort of displacement between
in a favorable direction ^{yes}
some point of control of the World , so to speak

you look and everything is clear to you
just like you watch movies there ^{and} TV there
i.e. everything is clear

and at this point of common universal understanding
the status of favorability for all is already being recorded

so that I can understand everything at once absolutely
you should see
which is understandable from that point of view
where everything is favorable for everyone
you are moving everything in this direction

It is simply impossible to sit neutrally and understand in principle
you just need to help
Only by helping can one understand everything

then it turns out precisely through the structure of Macrosalvation
through Macrohelp ^{yes} it works

and then it turns out to be for any aggressive side
you can always provide
the necessary management for its Infinite development

and then if he has already crossed over
into the structure of Infinite Development
then he becomes the creative side
i.e. then it becomes the one who goes the same way
towards creation
and all this is already, in general, a person who works there normally, yes
Lives forever, etc.

and it turns out that based on this
in this control system that I showed today
as a seminar practice already there
you can make management by personal tasks like this
to transmit to all systems
this is the Macro-creative ^{Eternal} action
on Eternal Development

and show that here is the identification
is of an exclusively nature

providing that this side
return to normal life
just for Eternal development
two main factors

when you do these actions
then in principle by the way it is very useful here
for the treatment of the disease too
aggressive phase of the disease
Well, it is output by control
and it is done in such a way that the disease is excluded

after all, a disease is a certain symptom complex
which is not specific there, it is not needed by the body
as if it should not exist in the body system

so you just enter
and for the body it is understandable
there is no disease but that is the goal

after all, it is precisely some not- so -exact correspondence there to the Norm
this is the disease ^{yes}
it turns out that you have nothing negative there
something like what you don't do for illness

diseases as such this information
there is none either

what is disease information
it's just a structure of some kind of disturbances in the body

so in this case I think
that information about the disease is some kind of aggressive system
then in principle it is just the norm
just bringing a person back to normal ^{yes}
corresponds to his level of Eternal life there
does not lead to us being there
they did something unfavorable there
with such a concept as "disease"

We didn't even touch on the ^{concept}
we brought human perception to the norm
and the concept itself was excluded and that's it

the same in the management structure
We naturally do not bring anything harmful to anyone
we just give it to the person
The norm of his Eternal development
and that's all

and based on this we must then
of course control the structure
precisely at the diagnostic level
transferring the knowledge of Eternal development to any system
and Thinking
and action
and the skill is in today's lecture
I do see where the combination goes
Actions and Thinking

there is a certain mechanism there
which shows that there is a combination
which leads to the action I mentioned
where is the control point practically
all ^{levels} of management
there from the point of view of the whole world
where Thinking and action intersect at such points

then you get a constant Macro control impulse

but in principle he can be calm

even if he doesn't go into detail yes as if resting
but he understands very precisely what is happening
and nothing unfavorable happens to him

that's why in today's technology
I would still like to draw attention to one thing
it allows a person to diagnose the system accurately
including some motives there
precisely if they are unfavorable
other people

if they are favorable and constructive for all
this doesn't fit into this technology at all
because technology
does not allow control Thinking means which for example
Well, a person who doesn't need help

if he needs help
then such a thought may be in this technology [...]
Well as if recognized

for example, a person is swimming in the sea, it's dangerous for him there, yes
and he wants to swim further
he doesn't seem to be aggressive
he is dangerous, it turns out his situation is dangerous
this idea can be heard in this technology

and stop it in time

but he will think that he wants to swim further
and in the events you see that a big wave appeared there
or something else possible, etc.

so it turns out that with this technology
can be recognized
only that which leads to the Salvation of man
means nothing else can be recognized by this technology
it is forbidden

i.e. it is necessary to clearly keep in mind
that I gave recognition technology yes
Systems of Thinking
but only to save a person
including the one that is there for example
Well, maybe he is aggressive

Well, he is given the status of Eternal Development

just training as I said maybe it will take a little longer
and that's not necessarily by the way

maybe people just don't know
are in such a situation that they simply don't know
that such knowledge exists, i.e.

i.e. transfer of information
as if at high speed
often directs them to a favorable path

although there are not always very stable systems
who are constantly fighting there
as representatives of some so-called evil
Well, that's a different story
this is a system of already longer-term connections
in the control system

they usually become harmless
physically suppose there
you can interact with them there and treat them
this is already actually true
more is obtained systematically
this is the volume of opinions, etc.

in this case, according to the technology that I just gave
we are talking about the fact that a person in real conditions
wherever he is
can view
structure of Thinking
events

and make the right decision
to be in the structure of Eternal development
myself
and give this structure to everyone at once

this is the main goal of today's seminar

This is where I end today's seminar.

Thank you very much for your attention
try to practice more
