

GRIGORY GRABOVOY
The Teaching about God
Dynamic Soul Management
15.01.2005

Hello again
the topic of my seminar today
this is my Teaching about God
Dynamic Soul Management

in this case i am showing
almost management level
where we are looking at exactly that level of Perception
when control occurs
precisely the dynamic state
dynamic level of the Soul

i.e. the Soul is perceived as a dynamic structure
and it is precisely this part of Perception
this part is actually the action of the Soul
management is taking place

because there is also a static action
i.e. you can control the Soul
if for example you enter a static state
and then it turns out that you have, for example , practically
also a certain level of management
where the optical phase is practically unchanged

i.e. you are in a state of almost rest
but management is taking place
this is a completely different control

dynamic control it is like that
what exactly do you see
constant dynamics of one's own Soul
i.e. you are the optical level of the Soul
see and perceive
as the level of precisely light-optical dynamics

and in this control it is very easy to see
how for example is the digital system divided
to the dynamic level or for example the static level

i.e. the numbers can be organized

dynamic component of the Soul
or a dynamic projection of the Soul

or maybe it is so that the numbers have
precisely the static character

this is when we start recognizing numbers like this
then we see that in a static character
numbers at infinite distance
merge with Reality

i.e. logically it is understandable
if we have a number somewhere like this, well here yes
near the physical body
it began to organize
we see static light, i.e. the statics of the Soul

then as soon as the number starts to move away
statics, it's like it just expands
and it turns out that the number begins to dissipate

i.e. keep the number yes unchanged
static number i.e. in general here is the form of the number
Generally speaking, it is possible to say exclusively only
namely mainly for future processes
in a dynamic state of the Soul

and that's why I compare it with statics
i.e. in this lecture statics is like an element of comparison

we have a dynamic world there let's say Yes
as a system for a more sustainable future
because if we want to know
how the future is changing
here are the laws and modifications of the future
and how to manage this future

then we must clearly understand
that all the dynamic connections that exist in the World
so, for example, if I show the structure of the World
like right here next to the physical body
there in the World it is, for example, a specific area of information

it turns out that here in this system
all dynamic connections
they represent the presence of God
precisely as if in a pre-dynamic state of the Soul

i.e. God practically as a man
here it is very clear to highlight
that God is precisely present as a man
is present in that state

after which the dynamics begin

i.e. we can recognize God here
who looks human

and when we see Him
here the dynamics of the Soul begins later
but it turns out that the World
because it is precisely a dynamic system
it's not static after all
then at the moment of the organization of the Soul
The soul had to react
on the external structure and dynamics of the World

it turns out that the dynamic state
this is exactly the deep one, i.e. the root one
a more accurate state from the point of view of knowledge
and the state that corresponds
precisely to the dynamic World

i.e. if we abstractly represent it logically
that the created Soul is some kind of static and that's all
First of all, this can't happen
because even a static element is linked
with all the elements of the external world
and internal
i.e. it's as if there is no static anymore

and when a person perceives
then he develops the system of Perception, this is already development

and it turns out that then he does
the outer world is dynamic

just like God does
It means he Creates events.
because when He perceives
the whole world starts to well how to move around there, so to speak, yes Means

and it turns out that since the dynamics of the external world are like this
by the way, sound is at the level of Perception

the sound is exactly like a rustling, some kind of primary
some distant rustling
a rustling sound that is not heard by the way

i.e. you understand that something is rustling
but you don't perceive it as sound
this is important you can actually see the sound

i.e. in this state you can distinguish sounds
not by the auditory system of perception
and due to the preliminary level of control

i.e. you are in a place where the sound wave will pass
earlier than the wave itself
and you already know what it will be like

then you don't need to hear the sound
you know he'll be there anyway, right?
well, the level of clairvoyance can actually be called that

so and therefore in order to develop by the way here is clairvoyance
especially in the treatment of, for example, complex diseases
you can use this technique

i.e. have time to hear the sound
by means of knowledge
by way of Perception
and also God exists before
He manages to see himself earlier.
than any other phenomenon of Reality

Well, if you ask yourself the question
as God who is a man
must have time to perceive precisely the Divine actions
He must perceive before the beginning of some phenomenon

so this is the dynamic state of the Soul
this is the level that allows this phenomenon to be studied

because dynamics is like synchronization yes
i.e. the object or some control changes shape
dynamics can in principle change shape in the same way

in Infinite development the state of the Soul is such
that of course there is such a form there

that's why in one there Well for example a specific Soul
a form having a specific volume
all the Infinite information is put in
and because that is the advantage of dynamics
there are all forms of information there
any information in light optics is simply a form often

and as in dynamics in time or space
or by time space
or there are third aspects of Reality
it is possible to form different forms

Infinite number of forms
then from here it is clear why the Soul is Eternal

because these forms are created
Infinite number of times
and can be created as many as you like
the presence of one light-optical form
this is already the Infinite development of the World

why the Soul is indestructible
because the light forms are located
at the level of a kind of instantaneous, i.e. pre-change
to get the Soul, for example
with some other light
harmful to her for example Yes
in terms of destruction it means

so that the physical body is not destructible
properties of the physical body precisely the physical body
they should be the same
but through , as it were, statics, internal, external, etc.

i.e. the difference between, say, the indestructibility of the Soul and
and the physical body as such
although of course the body is also a part of the Soul
but it is precisely the statically manifested part

here's the difference
what is in the dynamic part of the Soul
any external image that comes close to the Soul yes
may have , as it were, its own reflection in the Soul
i.e. well, some kind of mirror, yes
means which reflects the control element
and the negative element
he does not exercise control

in relation to the Soul
i.e. he cannot destroy it

why is god indestructible
because any element It converts
in the system of one's own Consciousness
i.e. He does a similar kind of work
only for God Consciousness Perception
it's the same as for a person
it is precisely the dynamic level of the Soul's action in the future
in this technology

and it turns out that in order to create
multiple-option future

we just need to give shape to the dynamics of the future
namely geometric lines
geometric parameters of one's own Soul
at the time of creation

i.e. to look through the eyes of the Creator
where there is light let's say yes the way to the future

then it turns out that the human body is static
well, as static, i.e. physically manifested
which, for example, cannot instantly change shape
depending on external Reality
it should be like this
so that the whole Reality changes
in relation to the physical body
i.e. the only way out remains for a person

i.e. to live forever
he has all the external information
by analogy with how exactly the Soul is Eternal
it should change in sync with that
how does a person change in information

but man is created in the Image and Likeness of God
and therefore it turns out that any change in information
at God's
it always happens synchronously
with some preliminary Action of God
God Himself creates information
so He is always in sync
in relation to any element of Reality

and it turns out that when we start
to explore this synchronization process as if
how can a person learn to do the same
or where is the natural state of man
where he does the same thing
where is this natural state

it turns out that this is precisely the natural state
in the transition between the local revealed statics of the Soul
into the dynamic form of the Soul
again of the Soul itself
i.e. it is a very clear subject of research
of one's own Soul

and when do we begin to understand this
what else can be there Well, a person can't wish for more, yes
in such a common secular view

like for example to take and be able to
to accurately explore one's own Soul

it is considered very important yes
in such a collective Consciousness
there's nothing really there
especially important or more important
than any other action
essentially no
because any action
is of utmost importance to God from the very beginning

i.e. why does God equalize all events of the World
They are good to him as if they are given clearly in terms of difficulty
precisely because the dynamic manifestation of the Soul
is always in the phase of a kind of pre-action pre-event
but in the future

it's like you see events in the future
which will be before the element of the future
or there will be some event in 10 days
you are looking back along the time axis
and do you know what will happen in 5 days

but you look as if from there
here is the way to look from ten days to five
it is different from here in the direction of five days
it's like riding a train in the opposite direction

and when you start to sort of stretch this vector
you see that he is the vector of the future
it is sunnier it is brighter

for example, ask yourself a question
how the sun was organized
why is it needed at all?
from the point of view of collective Consciousness

Well, it's clear that it's photosynthesis
from the point of view of physical Reality
that's understandable
but why does a person need the sun?

so here is the sun
this is precisely the trajectory of this return path
i.e. it is a train that goes from there to here
but the Sun logically carries rays
and photosynthesis occurs, oxygen occurs

i.e. it really seems to shine from the future
in logic so well or something like this abstract comparable logic
you can call it that

and when do we start
these phenomena of Reality are as if converted into technologies
for example, a person must live in any situation
no matter how hot the star is, yes

a person should not depend
from some kind of collapse there are black holes
Well supposedly known in physics, etc.

but man must live forever
what do black holes have to do with it then?
or is there some kind of Infinite space
what needs to be done then
so that no element of external space
did not affect the person

and then he just has to create everything for himself
typical fragments of the future

i.e. for example the sun and the planet photosynthesis food
or if he learned to feed there at the expense of Thinking
this means it is a different type of food, etc.

and it turns out that well there is a logical system
she is in Infinite development
what does it mean to eat your own well construction
or something that he visualized as food

Well, it turns out that, imagine, God has a task
God created everything
what does he eat then

It turns out that he eats, which means he is practically an element
which He reproduced
i.e. in all the details in general and in all the connections of the World
that then for God food is obtained

and it turns out that this is an observation
as if collecting information
and synchronization with what people do
i.e. in fact it is like information processing
i.e., as if a similar action

here God does a similar action
what people do
for Him it is called, for example, nutrition
He took and for example there he said to himself
let it be food
He can eat it
because people eat

so that people learn to go around there, for example Yes
some destructive power supply systems there
well, like the destruction of animals, etc.
they must have something to do
comparable action with God

once God makes comparable
in relation to a person
this means that the reverse action is also comparable

and it turns out that in the root sense
after all, food is for God
it's still, by and large, in human terms
it's still food

i.e. God begins not to separate Himself from man
thanks to the fact that He introduces an element
well, some kind of third one , yes
connection with an external quantity
so that's when we
Well, with such an element as food

and when we look at this
here we see the manifestation of the statics of the Soul
and dynamics is the ability to build that future
where for example the sun is not hot there
where we can have a structure for future development

a person can be where the sun is
or there is some kind of star, etc.
nothing can be forbidden to him there for example to be
and he will definitely not be destroyed there

i.e. it turns out that the creation of this system
it is like this
what are the elements
that's why God, for example, had to create such a system
that even when He produces such an element as food
nothing is destroyed

and because the person who gets there
well, to some super-remote systems
it may not collapse either
which are ultra-remote systems
Well it could be a physical space.
maybe it's just a very distant time

but then he will have to come
approximately in the same state
that God who eats but He created everything
a somewhat unusual system of Reality, generally speaking
growing wheat there, after all.
for myself personally

there is for Him
any element of Reality is His Consciousness
and His creation
and His, as it were, function of Consciousness
then it turns out that He then eats yes
I raise this question again

so for a person it is the same state
it is precisely the dynamic system of the Soul
which recognizes simultaneously
and the Action of God
and action when human development
practically the same
that he will not demand anything for himself

he creates everything himself
i.e. bit by bit or in powerful impulses
i.e. from somewhere within himself he creates everything
even what he actually eats yes

and then it turns out there should be
some compensatory mechanisms
if a person has not yet learned to create there in a direct form
and what does he feed on there, I suppose?
or he's on vacation somewhere, for example

then there must be some very powerful transition systems
that at the moment of eating there
the same thing is organized somewhere in the right place
as if he doesn't touch anything
in this Reality
nowhere at all
he reproduces everything himself

then the question arises how does he do it at all

and it's exactly here again
maximum stress factor

maximum action
namely the dynamic level of the Soul
shows
that he does it specifically with his Soul

and that's why the Soul is Eternal
because He performs the Eternal action
any local final action in this case
is revealed as an action precisely Eternal

and when you start to see these positions
lines of Eternity in the Soul
you start to see
that a person can collect the Soul there the information of the Soul

as if together
there to merge with the level of God's Action
but at the same time, he clearly understands
that he is precisely an independent person

this is how to convey the concept to a person
that he is an independent person
only again through the dynamics of the Soul

because if it's static static light
static light intersects with other light
then you get a ligament line

and now there is only one static system
turn on
here the concept of "freedom" rests
in linear transmission of information
and this is already a connection, yes

i.e. it is still not a complete freedom of Perception
that's why i started this lecture
namely the dynamic system of the Soul
and in comparison with statics

and then to make statics a system
which does not limit freedom
we have to here it turns out we can quite well
consider in the Soul in the dynamics of the Soul
static element

clear light
but light consists of something

Means there are more elementary systems of particles and nodes , blocks, etc.

so to get such a block
you have to be exceptional
that's exactly it, only by a person
only the shape of the human body
as a subject of management yes
as a subject of research or as a field of research
maybe it means to show static
in the dynamic level of development of Reality

i.e. to see a static element inside your Soul
at an infinite distance as if from oneself
from Perception

then we begin to see
that the Soul is very deep Infinitely
i.e. we are not actually getting closer
to hell For example there if there consider there
the deepest position of the Soul
when we move towards it we can generally see
that she is approaching
but we can't get close to her

because here there is a reverse action
almost to the one I mentioned
that here He is God eating
but at the same time He eats His own
i.e. It turns out that he doesn't eat anything
It doesn't change anything in this Reality.

and here we get this reverse movement
the so-called train coming here
he creates the future
optimal future by the way
just because you understand this process
what is at Infinite distance
your Soul is necessarily dynamic
because the more information
the more dynamic the system

at Infinite distance the Soul enters into systems
enough connections means
and these systems are such that you see
Well there, if we speak like that, there is already a level of comparison
it's like a whole railway station, lots of trains
i.e. there arise very stormy mixtures of different information
and these mixings of information are like this
that the object of information itself begins to manifest itself

here a train begins to appear, and there are people on the train, there are goods,
etc.
and you start to see there for example rails, etc.

i.e. you start through one element
perceive everything around
i.e. if the rail is visible
so apparently logic appears in the person
that could be a train nearby

such associated ones arise

signs of knowledge of Reality

i.e. a person perceives one thing and sees everything else

and this is what is called global clairvoyance

when a person in principle, when Perceiving any object
sees everything around this object

but this is actually a skill, as it were

gather yourself in this Reality

i.e. the external world is somehow projected ^{yes}

and this is all a vision

this is the man himself

i.e. a person is actually a state , so to speak

which in the general system of Reality

allows you to see and perceive almost everything

if only allocated

one object of information

any moreover

and here it is absolutely clear

that is why God is in everything

that the selection of one element of information

allows us to ^{actually} determine a certain state of God even
as a human being

Well, as I said, it is a person

this is still from the point of view of Perception

in this case, certain

well, from the point of view of an external observer

some kind of state, ^{yes}

what does it ^{mean} to have this state

just concentrate

and you have clear control

your entire physical body

i.e. you understand that with one thought

you control the health of the body then

you control the future of the body

and basically just one thought

practically an element that is indestructible

and so it turns out

and the physical body is indestructible at this moment ^{yes}

^{then} it turns out to be enough

create at the information level

certain systems that are like that
what does God ^{mean} as the Creator of ^{all} Reality
when dealing with some element of Reality
than He first perceives Reality then

this is how He created everything
When he approaches this element
He must be approaching somehow.
but since He is the Creator of all Reality
that's what happens when you approach
He sees the entry level again

so here it is
this is the initial level
this is the human condition
it is in the Eternal development

i.e. the initial level is that level
which allows a person
from the Perception of the external like this ^{and} like a state
a person is a state
it is ^{there that} the universal state of God
when does it mean that God perceives Infinite Reality
move on to a personal state

i.e. a person perceives himself as a person
and here it turns out that personality
it's just a person's self-perception
i.e. as soon as a person perceives himself
this is already a personality

but then it turns out he sees clearly
any dynamics of your Soul
in the creative processes ^{there} of the whole World
there are Macro micro-creative processes

i.e. he begins to see that his Soul
this is a level that you can take ^{for example}
and make it more enlightened ^{there}
due to simple optical action
well, that is , like they wash some elements there
so in the physical world ^{yes}

the same ^{as if to} take and enlighten the Soul with light
and make it cleaner

i.e. it can be taken ^{at a generally} elementary level

so to speak, such a mechanical action
due to light optics
cleanse your own Soul
in the dynamic phase of the development of the Soul ^{yes}

i.e. ^{well} if we consider it that way, like the Soul
She can't have any special blemishes
God gave Eternal development
laid the foundation for the technology of Eternal Development of the Soul

and here it turns out that He also gave
Soul purification mechanism using light optics

and it turns out that in order to solve
some complex problem
^{well, which, for example, puts a strain on the Soul}
This technology can be used practically
^{Well how to brighten the Soul}
make it more transparent clean

^{Well there there is such a phrase as "a person of pure Soul" for example Yes}

but here there is another meaning
i.e. a person of pure Soul
i.e. from a pure Soul a person ^{appears}
^{well, that is, the physical body of a person}

here is the control
because there is a person here
this is the result of a pure Soul
^{as if there is one meaning of "pure Soul man"}
meaning coming from a person

but it's exactly the opposite meaning, ^{yes}
coming from the future here
this is where a person with a "pure Soul" comes from
pure Soul man ^{yes} i.e. the opposite action

and it turns out that here we get such a factor
that it is enough to be able to ^{well how to} cleanse the Soul
precisely in a dynamic state

in this case the method allows
to cleanse the Soul
in dynamic manifestation

this does not mean that the Soul there is dirty

or it might be dirty with something on a person's body
mean anything in general
cleanse the Soul
this doesn't mean that he is a bad person there at all

it's just that the concept of "color" is a load
which is given to the Soul
to overcome some situation

for example, there are background situations , there is a possible explosion of a
nuclear power plant
this is a very black spot
which is from the Infinite Future
comes to a local point
it's like a very dense local spot, a dot even

and it's still pressure on the Soul
which takes responsibility in fact
organize Norma
then it needs to be cleaned
by cleansing your Soul you save the nuclear power plant
i.e. but you are not a bad person there , for example

i.e. this technology is just for the whole purification
in order to achieve control

but the concept of "bad" or "good" in the moral sense
it's a different concept
this is when it is reproduced from the heart
this is the parametric axis
where there is a parameter "bad - good"
but this is an internal component of the Soul
you can't just erase it here, just like that Yes
with one mechanical technique
because it is a very large communication system

therefore, at the dynamic level of the Soul
manifested property of adaptation of the Soul
to the solution of the issue
i.e., as if enlightenment of the Soul
mechanically clean it there

there is also a solution to internal moral issues
from the point of view of society, yes
For example there the criminals have a different type of Soul
but this is something completely different

here's what needs to be fixed here
he must correct the criminal

it turns out to be a whole conglomerate of various connections

because at the moment of an ungodly action
that means he acted in sync
and the lines were tied
he has a lot of things to fix

when action in the future control action
this is one
he man quickly cleaned up
optical phase of the dynamic level of the Soul
did the action got control

but from the point of view as such
purification of the Soul
First of all, it is precisely the conscience of a person
which is an indicator of some kind of purity
i.e. the conscience that is manifested as the Divine conscience
Well, this is a well-known technology of self-cleaning there .
by deep feature

i.e., to put it simply, it's better not to do it
some problematic actions
so as not to waste the person's time later
it turns out to be precisely deep cleaning

and then is it always possible to clean in these cases
this is always the question that a person has
if he did something completely negative
action

i.e. it turns out that this is just the question
he talks about that
what's better is to not commit a negative action
and in the dynamics of the action of the Soul it is quite clearly visible
what about the parameters there on the social level yes
some personal
distributed
these systems are like a violation of connections
in front of society

i.e., simply put, the most optimal option
to a person there logically even here in this technology
it becomes clear there

not to be there for example, there is some kind of negative yes
human
there is no need to be a criminal, not to destroy, etc.

because then there is this level of purity of management
it will be distributed only to the future system
he doesn't need to deal with restoring past situations
which means that a person is actually a fragment of himself
it turns out that all the time is in the future

and in the future once it is located
it means that he has
so at least in the present tense
he always has good events
i.e. he is alive and well

and here we get there logically
in that phase of management
that it is only worth not having some kind of results for a person
aggravating some very problematic situations
in the future
or be able to somehow deconcentrate them
there to clean by compensatory means
i.e. to do a lot of good, etc.

and it turns out that then when a person
or he's just such a bright person
he has no problems at all
this is the segment that is in the future
this is a very clear path
including the physical body of a person

here, in contrast to the concept of "pre-action"
i.e. actions before the event
it is the action itself within the event
is a guarantee that the body is eternal

i.e. information about the body is transferred
into this structure of the future
where is the bright Soul
actually stores the image of the human physical body
inside yourself

so it turns out that the physical body
can be considered as a level that is located

inside the Soul of man

if you look at it in light optics
like some kind of steam of this white color area
then inside there is a healthy physically Eternal body
which is not threatened under any circumstances

because it is the Soul
here is in the future
and a person sees his body there

here I showed a specific way of control
dynamic level of the Soul
you can see yourself in the future
clearly guarantee
that you won't have any problems, that's for sure
there you are alive you can see that you are healthy
you have optimal events there
then we need to work on events, etc.

i.e. here is the dynamic action of the Soul
this is the level of creation
precisely the sustainability of such a static future

and through the dynamic level of the Soul
the future is visible quite transparently
like static
and often this is just one line of the future
the best possible line

because the dynamic system of the Soul
it allows from different points of view
means to consider all phenomena of Reality
and make choose the most optimal path yes

because if you measure with a static system, so to speak Yes
then you need to measure one part first
then reform and take readings

and the dynamic system of the Soul which is Eternal
which is in Infinite development
anyway, at some point she already knew everything

i.e. the Soul made a kind of actual freeze
all control systems

and it turned out that this is the only best way
which you see through
precisely through the dynamic projection of the Soul
on your Consciousness

hence the identification of dynamics in action
Soul speakers in action
This is often a necessary element.
to create a sustainable future

and by the way, how can one recognize information at all?
what is stable what is unstable for example Yes
just optically

the dynamic function allows you to clearly highlight this
what is static is static
just some kind of glowing line

and dynamics is a very fast movement of the Soul
in Perception
and then it is clear that the dynamic action of the Soul
gives a person the only correct path

so that a person understands that he did the right thing
it must go into a dynamic state
he should see at least
at least the initial movement of the Soul
i.e. to be able to recognize
it is the dynamic light of the Soul

but there are a lot of advantages here
dynamic light of the Soul
The soul has an infinite speed of information transfer
it means the disease won't stick , that 's also convenient

for example, during some infectious diseases
like the flu, there are mass epidemics there
it is important to concentrate very much and be able to use
namely the dynamic level
when illnesses need to cling to something
if there is constant dynamics then the person does not get sick

or if a person, for example, gets tired
or there to work a lot there without getting tired, etc.
you can also use the dynamic level

but then which is projected onto the physical body

i.e. you are doing a very simple thing

for example there is a lot of work there and you won't get tired

perceive on optics

dynamic function of the Soul

and just watch how it is projected

on the physical body

All

the physical body does not get tired

because there is an element of similarity

but the Soul doesn't get tired in any case

She is Eternal, she has no fatigue parameters.

and so this is the projection

gives you a more resilient body

or exceptionally hardy there

related to that

that your body performs those tasks

which are needed in the information

there is a possibility there is, so you can eat

no, then you are working, etc.

i.e. the body begins to function

as a system it's just more or less complete

synchronized

with the state and action of the Soul

in general, with the element of Eternity, actually yes

it turns out that we enter inside the Soul

and we see that this is an element of simply Eternity

it means the body is most synchronized

understands most

in information it is precisely Eternity

i.e. the body first of all recognizes and understands

namely Eternity

physical body

because after all, as I explained

The soul is closest yes

in the system of Perception

to the body

i.e. when a person begins to perceive something

he sees first of all a clear boundary
of your own Soul

but often this path is passed very quickly
and immediately Reality is perceived
but he actually looks inside his Soul

if you ask God there
how does he even see Reality there
so He sees inside Himself
He is also the Creator of all information.
it means He sees as if inside a certain area
which He Himself created
He can't, well logically He's like
for God such a structure simply does not exist
"inside" there "outside"
these are such human concepts, yes

but nevertheless from a human point of view
how can He see from the outside if He created
He created something that He should be in.
inside this
inside the sphere already created yes
some level of matter

and then it becomes clear
why does it exist in the system space
they don't stick together, yes, there are atoms and molecules there

because every system
has a contour like a policy external like security or something
from the point of view of the effect on the system
because every element of action
should be located as if inside
some more general system

and when we start to analyze this level
then it turns out that it is just that
dynamic action of the Soul
creates such a static sphere of the future in fact
which contains everything
down to the details as if Well so let's say tested by God
messengers of God
elements of action

a person can basically do just about anything
Well, there is an element of action and some information there

he can put his hand there like in a glove
i.e. he should simply be able to in space
act correctly

but a person has control there
all these optical elements are often unnecessary
and it must be in some one impulse
be able to do it

because if there is something there
Enhanced Control Clairvoyance
and here you need to spend some seconds of time
to synchronize your action
and how your action will be reflected in the future, for example, yes

and here it turns out there must be a level
who does this all the time
i.e. a person constantly interacts
with his future and realizes it

so this level is a transition
from human skin as if from an external view
into the internal system

if you ask yourself the question
the human foot arranged exactly like that there
there are veins and circulatory systems, etc.

but with this understanding
transition of the dynamic level of the Soul
into body statics yes
and through the physical body
precisely in the static phase of the Soul
this is a clear structure of the internal organs of a person

and then it's completely clear
is a bloodstream there
near there for example bone tissue
from the knee there For example and below
if we consider this issue
then it turns out that
Well For example there to the heel yes

and it turns out that if we start
see question on body organization
it turns out that this body is generally designed like this

so that this dynamic level of the Soul
constantly transmitted knowledge from God to the body in fact

i.e. it turns out that here we have
this is ^{generally} the level of management
when God is in constant time
controls the human body
i.e. we see this path

and when we begin to see this path
^{Well as if} the path is practically ^{there} Infinitely distant
for Consciousness
we begin to see that God is transmitting specific knowledge
the physical body almost constantly
and when we begin to see this process
then we basically see here
that at every level of development
God holds every element of Reality
almost ^{as if} in my Consciousness
i.e. this is the form of His Consciousness

and we begin to see
these are the paths of development of this form

i.e. we see that the body is Eternal
because it has such a constant connection

and we just need to see this connection
then it is clear that the body is not subject to
no level of modification
because the Consciousness of God
it is not subject to destruction and annihilation

and then when you start to see this line
that the physical body is also an element of God's Consciousness
and from a human point of view
the same as human consciousness
i.e. actually human Consciousness

then you take full control
physical level your physical body
precisely consciously

and not through ^{any} complex manipulations
or ^{there} are searches for some complex systems
I just showed where God creates the body
one capture of information is ^{enough}

and then it is clear that you already have an Eternal body
because here are manifested
all elements in one particular case

and then it turns out that you are in control
your physical body
through the Physical Body of God

i.e. why is the Physical Body of God needed?
why should god have a human body

because then
this level of control is very clear
a person compares himself internally
with the Physical Body of God
and there are no problems
he is recovering ^{there yes}
in difficult situations, ^{for example,} an element of Rescue occurs
he begins to do a person in principle
some actions that are comparable to that
as God does

i.e. there are a lot of elements here that indicate that
what exactly is the physical body of a person
must be with God
so that all people will be saved

and here is another fact that everyone is saved
because they are, by and large
it is knowledge and actions that are recognized
from the human body

and to tell a person
what he ^{perceives}
here's how the action goes
as if to the depths of our Soul ^{we will say yes} , anywhere on the body
then the person is absolutely clear
lets knowledge from a person through

if ^{we assume} there is some other knowledge ^{there Yes}
from some other level of management
then it turns out that here
in general, the penetration of knowledge will of course be
but it will not be complete
this is penetration
because ^{well, you can, for example}
let's say to perceive elements of Reality ^{there and some}

well, which ones for example there a person perceives
due to its own system of Perception

he analyzes, he perceives knowledge
but he receives knowledge from the outside world
and as if concentrates them in itself
i.e. he makes , well, in short, a dense body
from the point of view of control logic
your own
due to the fact that external Reality
it kind of brings it inside yeah

but this is the movement of objects of external Reality
through Perception
it's some kind of movement

and how can I make it so that a person doesn't receive it?
no movement but received knowledge
he must see another person

i.e. he must receive knowledge
from the physical body of a person
and from one that is completely off to the side
not your own

and get something like a physical body
means it gives control
not by transferring information there
but it just functions somehow

when a person looks at such a body
he becomes healthy
he understands that this is how it should be done
but he understands simply because he looks
no exchange of so -called energy
does not happen

i.e. in this case the person learns himself
for example looking at the Physical Body of God
but in fact on the physical body of a person
he starts doing just about everything
well, some synchronous actions
and then on the basis that the dynamic action of the Soul is such
that the Soul is practically always oriented
for the next action here in Reality

i.e. to the action as if Infinite

i.e. to the action that is directed
as if on the peripheral
as if the action and development of Reality
i.e. on the action well in the end such
where is God in his essence
here for a person

i.e. a person is constantly in any action
seeks the essence of God's action

even take for example there are atheists there
they are still there in the scientific part
conduct fundamental research

i.e. where God, as it were, fixes the statics of the Soul
i.e. a person begins to see
static system of the Soul

i.e. you just need to fix something
so it's some kind of static
because God created everything
for a person it is the statics of the Soul

and it turns out that this is the static phase of the Soul
this is a system, well, on which it is sort of laid
some system of knowledge
so that knowledge is static and does not diverge
you just need to know how to use it
statics of the Soul and dynamics

i.e. see the light of static
and separate from the light of the dynamics of the Soul

i.e. the light of the dynamics of the Soul
For example there it is purple-blue some kind of blue yes
light shades mostly

and static is a bright silvery light

and when do you start
Well, this is one example.
be able to separate the static action of the Soul
from for example dynamic
then you see this at the level of information junction
statics and dynamics
virtually all solutions are found
from the point of view of treating a person there

you can for example take it here somehow
and well in general, by some simple action or something
take and cure
only by this level of detection of the border
between statics and dynamics

and you just have to take this level
and how to bring it into the system
well, some kind of state or some kind of condition that you don't like
and you immediately become a healthy person

i.e. it turns out that this is a fairly powerful element
after all, there is a healing process there

and by the way a powerful control element
very distant events of the future

well, that is, if you look, for example , 100 years ahead
and from a hundred years for example move here
then it is definitely possible to provide 50 years there
very stable development there
with the right interaction
there in 50 years
with all the elements of Reality

i.e. you just need to be able to do everything
all elements of Reality
correctly as if to fix yes at that time

and it turns out that here is the simplest element
this is such a level
that you are at very high speed
from yourself and moving from yourself
from here to the future we say

select static static element
silver glow
and look what's moving there
from a hundred years here
in the form of for example there is blue color

and as soon as these elements intersect
at the point you selected
you receive your Eternal physical body

but in general, in fact, this is information

for the whole person
humanity
and then it's completely clear to you
where to place the controls
Now

i.e. your beacon your action parameter
is precisely your Eternal development
and technologically embodied
in the form of the dynamics of the Soul
which interacts
with any static phase

here it is not even only ^{there} Souls
any system of Reality at all
^{there is} some event as an object

then your control is naturally accomplished
in the most optimal way, the fastest way
because you clearly identified
geometric place
where the event should be located
in relation to you in control optics

and at the same time you own a mechanism that is inaccessible
for ^{well} as if counteraction
precisely the dynamic level of the Soul

therefore you are doing it absolutely steadily
^{as if} absolute control in fact
which in any case is done exactly

here it may be sooner or later
but it is definitely done
Here you can even speed up time
by means of the dynamics of the Soul again

i.e. take the time parameter
and how to put it on the platform
time structure
and just move it closer to the body
then you can adjust the time
it is the time of the event ^{yes}
implementation of the target event

and here by the way from the point of view of Macrosalvation
It's very simple, these elements are visible
how the technology works the same
what about Macrosalvation
that to any action

this is the universality of God manifesting itself

This is where I end today's seminar.

Thank you very much for your attention
