

GRIGORY GRABOVOY
The Teaching about God
Free management
28.05.2005

Hello again
the topic of my seminar today
this is my Teaching about God
Free management

in this topic i show
how is a person located
in a normal state or something so to speak, the management level
for example, he does not specifically form
some control systems

and here it is implied
what is also the principle of similarity of systems
i.e. when a person is in a state of exactly as if
there is some kind of inner freedom
in interaction with the outside world with external information
then it turns out that it synchronizes the information
to your management status

and when he has an idea, for example, a creative one
or even for example Macrocreative
then it turns out that synchronization is in progress
in all external processes

i.e. this is the level of free state
when he seems to be in control without any special intention
i.e. does not use any volitional systems
but at the same time he himself is internally free
and in general just an ordinary free person
who seems to be doing anything, yes

then this is where synchronization occurs
still in the level of harmonious development of the external world

for example how God created Reality
there is , for example, the level of Reality
which develops in a controlled manner
For example yes in the Will of God
and at the same time we have from the point of view of human logic
level to which you need to react

and which requires volitional control

this is also the principle of complete freedom
maybe even the opposite is true, here we can look at it this way
what does this principle mean of one's own will
which is realized, for example, in some action
Well as if a revealed coordinate system

and when we consider
a more distant system of Reality
there are high-speed processes, as it were, multi-level

and in connection with this the level of management is such
what do we mean
namely absolutely free actions

i.e. we look at the system level in this way
that the system can develop in any way
those. absolutely free

so manage a free system
it is precisely the principle of free management that is needed
where this principle reflects
personal freedom of a person and inner freedom
and also the level of the next action
which we will extend to a free system
which can change, for example, at any moment

those. the system is absolutely free
and manage such a system from the point of view of that
that God, for example, in human perception
takes control
in the logical process of its own Action

then everything that is outside this control logic
which is not considered as such
in the human perception system
this is the principle of complete freedom

i.e. God still controls at the same time
and here is the principle of freedom in management
he organizes from a human point of view
as a line of one's own behavior
where are options possible yes

if in the logical phase there is Earth

and God has the task to do so
so that the Earth will develop forever
what will happen to the Earth in the future

it turns out that based on that

that the future still flows
through the present tense
then we have the revealed part
in management

for God
it's like a constant task, it's logically clear

and from the point of view of the people who are on Earth
should also live forever
then people have a task
any level of management of Infinite development

i.e. the Earth will clearly say how it will develop
in the logical model
from the point of view of the planet Earth

and from a human point of view
a person's personality can have
any free creative choice

i.e. here is the development of man
this is precisely the level of the next Action of God

i.e. God left it especially for Himself
next action
giving complete freedom of personality to a person

and here it turns out that if we are individuals yes
here He gives complete freedom to man gives freedom
then it turns out that we have
for example, by the way, it is a fairly powerful factor in improving people's health
including, for example, a rejuvenation system, etc.

if we have this factor of complete freedom of action
we are considering
as a structure of personality development
for example in a certain there in any direction

that's exactly it if we consider such a position
that in any creative direction

if personality develops
it turns out that then the personality has
just as God lives forever
through some specific control systems
then the personality has these systems

therefore, this is where such a principle is revealed
that free control is free action
this is the principle of the Infinite development of personality
where a person can make any decision
any creative solution
which leads to the next Eternal development

so coming back again
to the subject of control in the form of logic, for example
for a person the logical phase is more revealed
because a person controls how everything turns out
all processes
from the point of view of investigative systems of perception

what does god do too
He is also always in control in this area.

but when we look at this area
then it turns out to be precisely the principle of complete freedom of action
This is accurate information

and when we start to consider
namely the structure of free management
then the principle of decision-making is also considered
at any given time there are no other solutions
i.e. free in plan
non-fixed eg rigid system
means freed from some details
or system-wide management

so free
it's not just the level of personal freedom there
but also as if arbitrary control, so to speak
changing management, etc.

when you start to consider
such a kind of connection to events
then it is clear that in principle, basically, God is essentially
that's exactly in Infinite Development
is always in a state of free action

i.e. He is not burdened there constantly, as it turns out
absolutely well there are some specific concerns
because for God everything is one concern

i.e. any element of Reality
has equal grounds
to control this element

that's why it turns out
that the principle of free management
freedom of governance coming from God

this is basically the only principle
which is kind of visualized
in the form of, let's say, strictly manifested matter
this is a systemically manifested matter

if we consider a principle of a different nature
it turns out that matter begins to have
a chaotic action, as it were, in Perception

because in this case
there is a simple as if Well what is the control perimeter ?
such that if we have Infinite development
and we start to enter some element
to the action level
what the element is trying to do
how to organize the level of feedback

and a chaotic movement arises, i.e.
because the next level
it has infinite development

and the vector that you perceive
and your vector for example Yes
it is, for example, the only and correct one
which was sent to you

and other vectors that are here
from the point of view of external observers
in other Perceptions
these vectors are already developing differently
transforming
through the space of Perception of other people
or other objects of information

it turns out that you only need to make a volitional control

then there is an infinite number of actions

so it turns out God had only one option ^{yes}
development of Reality the most accurate
which would show
what you need to have Infinite number of actions
to get the only correct option
which comes as a level of complete freedom
from the control object

and it comes to light
as a sign of freedom of action of the object itself

i.e. it turns out that in this case we have

the right decision

because in other cases
if we, ^{for example,} limited the control system
so initially something ^{yes}
would not give, ^{for example,} signs of complete freedom
in management

then it would turn out that this is the inverse vector
would be very tough and would contain
limited number of feedback connections

and then it would have worked out
that we would ^{basically be} in Infinite Control
^{well, in fact,} it turns out that it is impossible to work out
practically impossible after a certain time
to work out
Infinite Control Resource

because Infinite control
it is always the development of any other frequent option
which sometimes didn't meet at all
as if in the history of management

and therefore here there ^{is a kind of} sign of freedom
This is a necessary action in management
for Eternal development

so when we look at
the system of Eternal development
as a system of, ^{so to speak,} free actions
at every moment of time

then a fairly simple task arises
consider
how are they related to each other yes
on the basis of free actions

from the point of view of creative management
we see that there is a spectrum of creativity
develops
namely the level of the mandatory management plan

when any creative action
For example Means Well how to develop the following options
which through Macro-creation
for example they give
the next version of creation, etc.
i.e., as if a streak of favorable development is visible

in the conditions that exist
it is an absolutely free coordinate system

but absolutely free
this is when they are absolutely creative
ideally

and it turns out that we have from this level
all the time some kind of creation

i.e. initially God created the World
which really had a level of Macro-creation
by this simple sign
precisely freedom of action

but as soon as, for example, a person starts doing
well, some kind of internal control there
or for example consider
its own status as the status of Infinite Action
and transform well for example, not exactly
i.e. not according to the tasks of Eternal development
and for local tasks

like something is emerging , well, it looks like this
as some kind of swirl of information

i.e. just a line in the form of a compressed DNA system
which has an unstable position at the end

i.e. well, some kind of spiral that is also compressed
and in the end we have
unstable multicomponent coordinate system

i.e. any action can be modified
when approaching this system

and therefore if we already have such a system
well then as if the education of such a person consists of that
to show

i.e. impose a matrix
namely, free management as much as possible
or there is a semi-free, i.e. ideally Macro-creative

this matrix is like a kind of spiral imposed
and the system of building the human body is arranged in the same way
external information

i.e. if we want to consider
like this external information system

builds , for example, the matter of man
then here it is clear that it is precisely external information
this is always a canonical sign of management

i.e., for example, we decided to consider the external space
what is the information
which is involved in the construction of the human body
well, besides food, etc.

it turns out that this external information
although it can be converted into food
look
how does food exist in this part and what does it mean

then it is clear that this is an imposition
all the time canonized absolutely free systems
which were originally created by God
as a system of freedom of action

so it turns out that the imposition is on this level
constant approach
to freedom of personal action there
precisely from God's point of view
so this is the canonical level of development
namely the Eternal body of man

and you can see how these peculiar spirals are there
enter the structure of human matter
and the tissue system is formed

in this part you can see
food, for example, is involved in the formation
where do these controls exist?
for a specific person
when a person, for example, has not yet been born, etc.

i.e. these systems are in space
as systems external to man
and denote a sign of complete freedom of action

i.e. they are recognized this way
and by the way, they have a spiral shape not only there
there are many different forms
but then there is an external action

and here it turns out that, for example, the DNA system
the system is deeper, there is still a pre-molecular level
in a person
the system of the light plan or something implementation

this is a sign of the absolute freedom of the world itself

and when we start to consider
this is the initial level
Well like a light level and a light base, so to speak
information basis of human actions

then we see clearly
that a person can always be identified
in any space
precisely on the basis of freedom of action

i.e. a person from another person
as if not separated by space
wherever you are
another person
you can always understand his place
from the point of view of helping him

this is a sign of absolutely complete freedom
in its internal level of action

and therefore any other investigative systems

they are always located as if below
as if in a more rarefied place or something let's say so
in the control space

and therefore, for example, to help a person
can't interfere
no information there buildings
no information, no technology, nothing else

i.e. if you work for example
with someone at a distance
or you can work on yourself there
it is clear that there is no spatial environment there
it can't interfere with this
because man is generally separated
precisely the sign of absolute actual freedom
in management

and it's like some kind of beacon yes
which clearly allows the transmission of assistance
and then he can take
or often may not accept, for example
if he doesn't want yes

and then it turns out that for a person to accept help
which is necessary for him, for example

Well, from the point of view of professional activity, for example
of lives there depend on it

then here again we need to not impose
on the principles of complete freedom
put information into those empty cells
which he will definitely accept

i.e. in the search level which says that
that it is these cells that he will accept

i.e. it turns out that you must identify
in his system of Perception
that he will definitely accept yes
i.e. to consider all systems of its connections

and since all individuals are equal
i.e. no one is allowed to interfere with the information
if it's not related
for example with Salvation or for example there by Macrosalvation

it turns out that the only criterion
is
orient him towards the task of Salvation

and therefore find his task
where is it located
how does he perceive her at all
how what

as a daily action
such as there is some text there
or just some thought there in childhood, etc.

i.e. there is simply an entry level
in the control task at the logic level
because it is Macromanagement that is freedom of management

and then already through this level
which a person has ever taken
the perimeter of mandatory action is introduced
For example there is salvation, well, some kind of nuclear power plant there, etc.

and when we start showing
what is the sign of freedom of management
this is a natural level
which is acceptable to a person
in the transmission of information

then this is actually where it is located
very strong educational level
which works
and in the conditions of education there
when it comes to treating people
in conditions there is simply education for the transfer of knowledge

i.e. a level that is absolutely free
for a person

information is transferred there on a mechanical level
i.e. just in the form of something like well, some kind of glow of energy level
and the person receives and transmits
here you can see the level of Infinite gears by the way

and considering that man is absolutely free
and it is as if he is outside the material space

in this regard in management

then you can see that people
in fact, every person
is located in Macromir

and it interacts precisely with Macrosystems
as an absolutely free system, so to speak

and that's why he doesn't have ^{any} problems
with Infinity of development
in his system
Infinite development is already possible because of this
that he actually interacts alone
with Infinite Peace

and the concept of what he has there
there won't be enough space for people to develop, etc.
these are ^{rather} naive points of view
from the point of view of the logic of the development of civilization
Here

because with a sufficiently large number of people
the possibility of use arises
the following material resources
as a direct Law

as if matter from a person is always present
at the same distance
in the internal management system

Well, it's a sign of internal freedom of action
a person is always in the policy of freedom
and wherever he is
management up to the material level is always the same

i.e. you can have many billions there
^{that means} there is population growth there
in a short period of time
and space will be
that's exactly what it takes

because the internal level
it is strictly transferred to the physical

and therefore from the point of view of freedom of management
space will always appear here
well, right up to some technical systems
who are exploring other planets there
including the implementation of the development of the planet itself
increase in material mass, etc.

i.e. here you can follow
how the level of inner freedom reacts
to the material level

and then you can very clearly see
for example, positions on improving the health of a person or humanity

because the criteria are very clearly defined here
for everyone at once first
because the level of a person's internal freedom
By the way, this is a criterion level that is quite familiar to everyone
from the position of, for example, childhood
primarily when perceived by people

and then this is already the level of internal action
based on that
that any action goes through the free will of a person
in the grand scheme of things

that's why it turns out
that the person is familiar enough with this concept
and it is precisely the polis that is, as it were, the internal space of freedom
this is a criterion that is the same

so practically we can
this sameness, some kind of direct one, moreover
transfer to the level of matter control

knowing where this certain policy is there
looks like some kind of sphere that is expanding
freedom of action

we can see which one to use
Well like a light lever
to move into physical Reality
and make management for another

i.e. another can be saved by inner vision
it turns out that my own situation

if you see the situation

for example from the point of view of well there are those Laws
which you have mastered in management

for example, according to my Teaching
you can master many different methodologies there
in management

then it turns out
by simply concentrating the information of the methodologies
at the internal level
as if in that beam that comes from you
to the level of, as it were, developing spaces
some kind of transitional system

where we see the expansion of space
increase in information

then it is enough to concentrate
how to transfer automatically to another person
you don't need to take any technology
transfer to his control space
there he will accept or not accept, for example

so there is another question here
that often people need to be saved
they understand it naturally on an internal level
but in general it is often necessary to transfer knowledge in any case
i.e. in any case it is necessary to save

and it turns out that this is the level
internal level of similarity
it allows you to do it as if synchronously

i.e. the person synchronizes
with a better level of Perception

i.e. at the level of all information
he still sees
that the impulse that is directed towards it
it is the best, for example, if your management is correct

he chooses it
because at the level of similar systems
he simply chooses as the best system

well, "perceptions" so to speak
receives the best signal

and then it turns out you don't translate the signal
but just do it in your own space

as if personal internal freedom of action

here the main criterion should be clearly expressed
that this is your personal freedom
i.e. precisely a free feeling
a feeling of freedom of action there

and the most important thing is that it is kind of correct and unique
well liberation
from some long-term level maybe
Well like even concentrations for example

i.e. there is a level
when you need to concentrate on doing management
and this is also your personal choice, i.e. your freedom
revealed in the structure of a specific action
with specific information

but if you don't do it
then you still have to manage

the method that I am describing and showing today
this is precisely management in conditions
when do you mean Well, first of all, reach the level of freedom
as a level of personal action
and you recognize this system, in general it is familiar to you

and it is also a level that allows you to adapt
this mechanism for control
at the moment when you do not use technology
For example you relax there, etc.

so it turns out that
i.e. you don't work as if on a logical model
but the work still happens

and then it turns out that you have to keep
only internal concentration
as if once remembering there that the task there is Macrosalvation
then it should be implemented
Well, I mean once there during some period of time

and keeping this feeling as if on logic yes
transferring control
into some kind of concentration of inner freedom
you are in control
because you are at the level of just free action
Well as if you remember that this is your internal status
implies this action , for example
towards Eternal development
and you are forever evolving

i.e. it is your personal choice
once you did it
and he actually holds control

at this point you can
even if you don't concentrate specifically
then you still exercise control
on the principle of similar systems

i.e. you pass on your sign of similarity i.e. what you do

as God does
It has its own management status.
and passes it on to others
because He implements the system
as if at the same time
and from myself

i.e. at the same time
because other systems are similar there are people i.e.
they develop by freely accepting information
and someone follows God's tasks immediately, and someone later, etc.

but nevertheless He implements it
the principle is the same for everyone
and yet He shows
i.e. God shows Action immediately
i.e. Action, for example , my directed at everyone
if it is identified by one person
anyway, it is recognized by everyone one way or another

it takes just one person to understand
all people will understand anyway

from God's point of view, He already understands everything
then people will understand everything anyway

from the point of view of Eternal development

because God, well, thinks like a human being
and understanding the system
of course he understands that people
everyone will understand everything in time anyway

and here is the system of freedom of knowledge transfer
freedom of transmission as if a signal carrying information

i.e. a very important sign
which needs to be cultivated at all
i.e. to introduce into the public, as it were, collegial Consciousness
collective consciousness

and it turns out that, for example, there is collegiality
it means that it is more professionally oriented, etc.

and when we start to act
right here with that level
how to achieve the level of complete freedom
retaining a sign of real freedom
not legal for example yes only

and in general, here we enter the signal
a person begins to realize
is saved

and at the same time, with all this, it should look and be
not just look and be
as God does
this is the complete freedom of this person
his personal choice

then it turns out that in the conditions of the Salvation system
for example, he wanted to save himself there
or he thought that it was not necessary, for example

and yet if a person was saved there
and stayed there exactly there Well, let's say it's directed
towards Eternal Life
at the same time, he seems not to know the details and technologies of the
Teaching

then here it turns out
that we have the principle of precisely complete freedom of choice
in conditions as if well, you could say an external signal

which is not initially considered a signal
as if the person himself
i.e. it is like an external signal
we give information that there is Eternal development
we give some documents on logic, etc.
so which ones are well as if as a fact yes
he is faced with the fact that such a thing exists

then it turns out how to do it like this
would be a kind of "imposed" signal
Well, in quotes, this word is even a bit of a stretch
"imposed"

because a person has it anyway
this sign

we just kind of recognized this system
we are trying to present this system as it were
as his internal system
i.e. to open your internal resources
but it is still an external signal nonetheless

then the question arises
as God does
why can he find that way
which even with the help of
there God helps people and saves them
but nevertheless it is God's help
This is the help that is appreciated
as free help, i.e. it is not an imposition

and because God originally created man
naturally thinks about his Eternal development
He has the right to help.
He created it. He helps it.

so, but from a human point of view, therefore
and if we follow the analogy
Well, maybe a little bit closer
to this process

need to find some element
where would you help a person before the event
Means well, which is realized in a person
in which you, for example, should now help

and he must accept you in this event

to

it turns out that you have to

Well how to introduce a time axis

and consider all his actions before the event

be on time

to be in time means that he will receive at least one of your signals

and as soon as he accepts

This action is due to the fact that

that since you have already helped before, you do the same

then the signal is not imposed

now yes For example

then the first element

so of course there is a second element

take and pass

at the internal level of similarity

as if it were its own state

and to campaign actually

at the level of some kind of internal agitation

what is such a state, for example, there are such tasks

and drag your own control

from the point of view of this process

but there is still a tug of war going on here

when you give the initial signal

and here I did it on purpose

comparison of two cases

that you are entering an earlier event

and he accepts

well what if for example he doesn't accept yes

i.e. how to quickly find those events

where did he receive the signal

especially since the events have already taken place

so it turns out that you need to do it like this

so that the axis of past time yes

i.e. the past is the future, the present

all this resulted in some kind of unified picture of the World

for God everything is the same there

He is the Creator of all processes there.

including past processes

it turns out that He is the Creator of human logic
as the Creator of current elements of some events

but from the point of view of God who knows everything
for Him the past is the same element
like the current or the future

so it turns out that we are moving on
from a human point of view
that the past which God created
He was creating then
and now he doesn't seem to work there, right?
from a logical point of view
but from God's point of view He still works there

then we have this transitional option
we just logically connect themes
that since the past is some information

then for God it is relevant as if at that moment
when He was there and when He was in the future at the same time yes
as if by Perception Consciousness

and it turns out for God the level of Self-Expression
this is the current time of all people

i.e. God can be in the Physical Body
in the current time of all people

and it turns out that this one
as if concentrating on His Physical Body
this is a structure of some kind of adhesion
some approach of events
into one integrated system

where there is no longer any concept of some kind of "lack of freedom of
action"
because God is already here
it turns out that any action is the same
means free

and when do you start
let's assume that we will act with this logic
then it turns out that it is precisely a question of faith and faith in God
the question of faith in Eternal development
through the Action of God

through studying for example there are technologies of God
This means it allows a person to quickly get oriented in management
through inner faith

and here is the education of faith
again we are talking about instantaneous remote processes
i.e. it is not necessary to study something there for a long time
because that's what we're talking about
that we must save everyone anyway

he knows the technologies there well
or maybe he doesn't know at all
on Eternal Development

and it turns out that then we have
this is the level of the system task or something
that we must do so without violating his freedom of action
it means to convey the entire aspect of knowledge anyway
which concerns Eternal development
I keep talking about this all the time now

and here is the level of some kind of integration
what I say is at the level of words
and there is another level where you can talk
For example Well like listening to some kind of conversation
some level of action or something
from the point of view of collective Consciousness

i.e. it is easy to perceive information

for example how information gives birth to the word yes
well, that is, external Reality
gives birth to some word
in Human Perception

if we start translating information
to the level of logic
then in ordinary Thinking a person simply perceives
he doesn't perceive for example there are sound waves
but simply perceives information

is it possible to translate the information for example
well, at a certain level of words

naturally you can

because everything can be translated into words
and listen, for example, to some kind of sound action
but it's a waste of time if we listen through sound

i.e. you can read for example there in a word yes
but it turns out that you take the True information
first translate into a word somewhere
then reads the word

and it turns out to be the simplest option
perceive not a sound there is not a word
i.e. this is like a controlling clairvoyance
and see Reality
Just
see Reality
and immediately control Reality

as God does
He himself is the Creator of the word
why would he need to make control through words, for example

You can also control through words if you have time

and so it turns out
that the control is direct and instantaneous
synchronous with God
this is a direct, completely free
and generally speaking without any additional grounds
entrance into another person's structure or something
approaching its structure precisely in assistance, i.e.

in understanding the task
For example there is salvation for all
and when a person simply assists
he does it himself
no one is forcing him

and then it turns out
what is this integration of free systems
in assistance
before the manifestation of events to the verbal level means

and this is where human participation comes in
in the structure of the organization of the word itself
a word meaning a certain expression a certain phenomenon

i.e. I translated it just for that

what is level
which means absolute freedom
because other concepts have not yet been developed

but before any concepts
what exists
only an element of freedom is obtained

because there is no concept yet
This condition can be determined
as a state of absolute freedom

and this is what happens when we start to enter
in this ^{well} some kind of management ^{so to speak}
then it does exist there
this is an integrated space
where by the way it is clearly visible in this

in this environment
that the past is organized in exactly the same way
like ^{future} tense or current tense

why, ^{for example}, is an absolute forecast possible

because the Laws of Information Development
very tightly controlled system

one of the signs of control is ^{the} cross-shaped form
where is the past system ^{for example there} on the left side
creates a cross-shaped level there immediately
which concerns the present and future tense

^{for example} in the cross the left part
if we compare it with past events
right future
then here is the intersection, ^{well}, the central region
there are current events
^{well}, it's like a schematic control system

you can convert an object into any shape
and get the same distribution system
around basically any object

the object itself ^{and} the physical level
there is a physical cross a physical object

this is the current time

and ^{as if} its projection parts
past and future

how can God control at all
all time systems
Well for example, having the object itself

It is enough for him to only perceive objects
it turns out ^{to be like} a reverse impulse
He created
then it is enough for Him to perceive
and development is being monitored

i.e. it turns out that God may not even interfere
^{like this, close up, yeah}
into some kind of matter control system
because Perception
with precisely free development
gives both the whole past and the whole future
at the same time gives freedom of development

He perceives
They turn to Him
and they receive from their own treatment
People

and only when it is really necessary there
somewhere it can be added to the system
knowledge
then it turns out that this is the root control
adding knowledge
not by imposing it there
namely knowledge

and that's when you pass on information as knowledge
i.e. you formalize this information as knowledge
then there are no restrictions on freedom of access

knowledge is simply perceived as a sign of benefit
and are perceived
in a completely free state of personality

here pay attention to the Perception of knowledge
namely the access channel
as a rule, ^{well,} 95 percent and more, often mostly under 100
this is absolute freedom

i.e. for example a person can
some knowledge is not to be perceived
but if he perceives then he perceives himself

simple logical postulate
it's not someone else who perceives it
and he himself
this means he expressed some free thought, etc.

i.e. it turns out that we are in this space
which is not defined as such
in the pre-space of action it means

and here is the pre-space of action
when we start to form
for example some kind of signal
then you need to immediately form knowledge

and it turns out at the level of God's Action
the initial level is knowledge

for example why does a person need the past
i.e. well the model of the World is like this

that God was free to create a structure
for example from the point of view
Well like a different system of action or something

i.e. a person who is there all the time
in a system of complete control over the past
and can, for example, modify the system there as he wants
i.e. changing the structure of the World

i.e. God, for example, could have introduced such a model
but the past is an element of fixed knowledge

and here is the reference point of knowledge
which seems to denote a system of development
This is an information transmission system
to the next system
as a system of free controls

and now the next system will be determined
and correlates in accordance with that
what knowledge was in the past
accumulation of knowledge is called

and it turns out that the accumulation of knowledge
this is precisely the principle of free development
where some knowledge from the past is taken into account
and the system of future development is being implemented there

therefore, an absolute forecast is of course possible
because the connections are knowledge
i.e. optical quantities in general
they are quite basic

in the optics of knowledge, that's exactly it
have a very clearly defined shape

i.e. this is precisely the form of these elements
which relate to the knowledge system
has the form
in many ways such canonized canonical figures

and the light that passes through the current time
very clear understandable
what form will it have in the future

at this level there is of course a logic to the process yes
logical knowledge that speaks
about the feasibility of some project

For example, a person decided to drive a car
to some place
it is logical that he will have enough gasoline for example yes and so on.

and then in principle it is enough to know
that the car is in good working order and there is enough fuel

when we talk
about such as some kind of Macro- level processes
then here it turns out to be enough for an element of logic
take the idea of action

for example why is the idea of Eternal development there
will be implemented in any case
i.e. it will happen no matter what situations develop

because there is a system that works
at the level of completely clear fixed systems

i.e. for material systems

this is for example Well as if feasibility
from the point of view of physical levels of action
for ideological
it's like well here if here
from the correct position of Perception
there are other positions there
"correctness" from the point of view of accelerated development, so to speak

you can see it here
what exactly is an ideological platform
it creates an opportunity
exactly like this, accelerated development
and is the criterion of reliability
some information, i.e. the ideology itself

and often the person who is
there for example there in the Macro-creative ideology
He is always calm in principle, everything is clear to him
because he still creates, as if he has nothing to fear, yes

i.e. it turns out like this
this level is also understandable at the level of logic
because creation is still mostly protected
by states, etc.

and whatever the acts of creation
still have more seemingly stable systems
or even absolutely stable
from the point of view of that

that no matter what systems are formed
near acts of creation
all the same, acts of creation will be manifested and stabilized
one way or another

and that's why it turns out
that this is precisely the ideological platform
in action
often it is like a canonical principle of free actions
as if in a distant Reality, i.e. in Infinite development

it turns out that in order for us to have
Endless development for all
i.e. bring it to everyone's attention
first you need to work it out
general position of Macro-creation
or even local creation

in the form of specifically identified actions

for example, according to my Teaching
a person can personally participate in any process
there are personal collective collegial public
by way of Consciousness
or by personal action

it turns out that he is here
acquiring signs of complete freedom
starts working
more in the ideological aspect

i.e. becomes more stable, more calm
and gets more results
because it just works
precisely at the collective level of management
where there are many for example yes, managers of this type

and when do we start
Well, this is already a sign of this freedom of action
spread to everyone there everywhere
we see that often the elements of correct actions
begin to be translated into the structure of material systems

i.e. at the level of receiving information by people, for example
these could be texts in books
not only texts that relate to technologies
and there may be artistic texts there
there is poetry, for example, etc.

so here you have to see

that it is possible to influence the structure of collective Consciousness
how to prepare the system for Eternal development
due to the fact that you are signs of freedom
impose
to the material level of information delivery

and in any information
you can insert the control like this
so that these signs are manifested
and for example another negative connotation
it was not manifested in the collective Consciousness

for this it is very simple in general it can be done
showing that there is a positive message behind the information

worth Infinite development
just by shining a light on this line for people

and as if from here we see
what do people mean
they start to react in this way in principle
that after seeing this information
they usually start walking
for this positive information
as if not perceiving the negative
at the level of, as it were, deep structures of the Soul

i.e. at the level of logic they can perceive
but at the level of the Soul there is already rejection
because they don't perceive the negative side as such
because they saw
the positive side of Infinite development

i.e. therefore the ability to highlight in any information
creative status
This is a special technology based on that
that you have freedom of action
apply to material objects

and this freedom of action is such
that you are just looking at
some material object
books there are some kind of material carriers of information
you can even use it there
influence on any information
which you receive

from anywhere at all
i.e. either it is the media or it is a person there
information of individuals

then you can take it
and having imposed on the level of the received information
signs of complete freedom of action
and showing the line of Eternal development
get constructive actions from her anyway
precisely for the task of Eternal development

and precisely in the collective Consciousness
it is precisely this management status that will be laid down

and so we can clearly say here

what is the sign of freedom
as the most easily transmitted trait
as the most easily mastered

because when free information is transmitted
another person perceives it
how information is still quick to master

because it's the easiest option
criterion as it were or what about authenticity?
or the accuracy of the information
or reliability
that it is the person himself who transmits this information
this is his personal free state

and such information is captured
exactly as information
which in fact really is
criterion and information of action
for another person
for other all people often

because she is basically Well, it is differentiated somehow
that no one forced the person there, for example, in the first place
he did it himself

when a person does it himself
it means it uses all the resources of its own development
he uses all the resource
in fact the development of civilization

and these are its control points, so to speak
they are such that processing is underway
not because he knows one thing
or there as a professional, even a very good one
in a particular area

because all his systems

what are actions in Reality
processed the information
and he betrayed her with a free level

then it turns out that there is no influence
no one really has any influence on him
although in principle he can take it into account there
these or those points of view

but when transmitting information
when a person receives and understands
what is free level information

he understands that he is here
in fact, the entire experience of a particular individual
and this is actually a whole world, yes
this is a whole system of Infinite development

and by the way when do you work
for example, there in the treatment of diseases
or for example there under the systems
when a meeting with a resurrected person is necessary there

here is the principle of action
Well, that's exactly why I'm here, after all how would I deduce the levels
where some specific, precise action is needed

here is the level of complete freedom of action
how is the transmission system well as if some kind of experience
and not only often his own
there is even other people's experience

because take here
Well, should I perceive accurate information?
as a rule, it is still the same support
in the right positions

there are textbook authors
they somehow have to process it themselves
information

and that's when a person transmits, for example, actions
it turns out that these actions are as follows
that in all cases as I said
in the case of, for example, treating other people
or there when meeting with the resurrected

this is exactly what concerns a person
in the structure of some kind of help to him, yes

at the same time, I cited criteria that are, generally speaking, completely different
there the treatment is just an ordinary living person

and a meeting with the resurrected
in this case it is revealed as help to him

the same as in the case of treatment

and so here we get the criterion of assistance
which is based
on the powerful systems of Perception of all people there
this is the path that actually takes shape
because other people's perception
also projects a certain path
in the collective Consciousness

there is also their personal experience ^{yes}
and there is, ^{for example,} a system in the collective Consciousness
which denotes specific processes

i.e. either it is a cure
in case of meeting with the resurrected
this is a specific system ^{for example} the development of different personalities
which often ^{for example} they may not be active there
to deal with this process
or not to do it at all , ^{for example}

i.e. not all people are engaged
there is some special level of control there
but in the Soul everyone has the opportunity
bring about the resurrection
technology is generally always available to any person

it's just here because of free will
a person may not be involved in some process
but to carry precisely the system of Macro-creation
and through the sign of freedom to transmit information

and so it turns out that when you work with people
try to achieve this level ^{of complete freedom of action}
transfer
into the structure of the organization of the next event
already logical, ^{as if of a logical ,} investigative type

having carried out a projection of , ^{as it were,} freedom of action
to a specific management plan

i.e. you are projecting
to some local level
the control that is in front of you

and from here you begin ^{to build the future}
again on signs of spread

namely free impulses

and so the identification means exactly this

as if free control

self-developing management

i.e. well how can you call it "free floating"

some segment of information

you start to see

what is the management structure

begins to develop according to certain Laws

here is to know the Law of development in its entirety

can be considered only

free status of information development

and when you start to see this level

let's assume that development begins

the development of the information structure begins , as it were

then at first it starts by the way

it's exactly like this in structure

spiral

there is a vortex

develop information

and at some point at a certain level

you see exactly the image of a person

such a physical image of a person

where you can consider

for example, action from oneself

how do you act

i.e. how your information is reflected

Well as if on other information

and see any other person

well , also for example it's transparent there

as you see with your physical eyes

and then it turns out that at a certain level

People

Well, let's say it's Spiritual telepathy

or there is a transfer of information

from one human body to another

this level exists

as the level of precisely universal action

i.e. you see one specific person
and therefore helping him alone
if you are there to treat one person
even by the way when you help yourself

then you already have that
that according to the principle of freedom of action and freedom of impulse
you transfer everything at once
into all systems of collective Consciousness

i.e. it is very important to see this aspect

when you work even for one person
in fact, you accumulate experience for all people
and the main thing is that other people understand this experience
and adopted

this is how they can adopt it , for example
it can be unconditional i.e. implicit
at the level of management there are simply Macroprocesses

and often more useful sometimes and sometimes much more useful
convey it in words
your actions your experience

then it turns out that you are a sign of freedom of management
you are already spreading it to everyone, for example , verbally

so at the root level of today's seminar
control which is called free
is expressed in the transfer of knowledge to a specific person
and the practical ability to disseminate this knowledge
for everyone

and then you actually get
colossally accurate, in totality, or something yes events

peripheral event accounting

and most importantly very stable management
because you yourself are simply
Well as if in a free state of control precisely

and this is even, in general, a certain level of state

moreover as I said even when you are not in control

this state helps to do management
when you are resting etc.

thus practice
with this level of free control
allows you to do like Macro control
as well as private management
simultaneously
and get your precise personal control

Thank you very much for your attention

This concludes today's seminar.
