

GRIGORY GRABOVOY  
Teaching about God  
**Complete restoration by Spiritual vision**  
16.09.2005

Hello  
The topic of today's seminar  
This is my teaching about God  
Complete restoration by Spiritual vision

in this topic i show  
how to use control  
expressed as spiritual vision  
can almost be completely restored  
the structure of external Reality

For this we need to consider  
the structure of the Spirit  
as a capacious, complete structure, *so to speak*, full-fledged  
in terms of implementing the individual's task

ie if a person looks *for example*  
Well *as if* inside myself *yes*  
examines the structure of Spiritual vision  
seems to occupy his entire volume  
ie fills in *well as if* from the inside *yes*

there is such a position, just a point of view

and if this position is moved  
into external reality  
then we get external reality  
also has *a kind of* property of being full of completeness

and it turns out that in the case of structures there  
associated , *for example*, with resurrection  
where it needs to be restored  
any creative system  
we can move  
in fact, its internal position  
an internal, *as if* filled, state of the Spirit  
into external reality

therefore the task of management here is

transition  
from actually this internal  
as if a master state  
into the structure of the external control system

so here first of all we need to consider  
what is it  
this is what is called, so to speak  
"filled state" yes  
this is Spiritual vision in this understanding

because in this understanding  
from the point of view of Eternal Development technologies  
Well, let's call this state "filled" again, yes  
I repeat this expression on purpose  
to kind of even fill in the words yes  
create some capacity in management

and then we get the management structure  
that there is an internal microstructure, so to speak  
this process this state

ie at this level the process is a state  
does not differ from, for example, statics and dynamics

let's say we consider the Perception of God  
when He considers the movement  
when you think about it  
what is movement for God in general, for example

For Him, every value is equal

it turns out that the parameter of movement for God  
perceived as an internal state

ie some property of matter yes  
reflected in external reality  
Well, for a person, movement is dynamics.  
there in space-time for example

and for God this is his, as it were, sensory state  
including well as if a sense of God yes For example

this is where we come to that  
that the expression of God's feeling  
ie a pronounced control system of the sensory level

it becomes clear to the person  
Well, from the point of view of maybe some extrapolation  
ie the person understands this well literally yes

it turns out that  
Well, God and man  
here they understand at the same time  
that sensory state, for example, when man was created  
here is how this phenomenon can be explained

but then a person understands  
when and how God was created it turns out  
how he created himself

here is the intersection point  
if there is one common point of understanding  
then we can understand each other  
well , this is just a normal version of control , yes  
understanding

then it turns out that this is a filled state  
when we look  
for example, on the Spiritual Action of God on the Spirit of God  
then the internal structuring of the Spirit of man  
the internal structure, so to speak Yes

for example, let's consider the "microstructure of the Spirit"  
this is what it is like if we introduce a concept, as it were, abstract  
and we believe that the Spirit is still an Infinite quantity  
but we decided to go into detail  
and look at the micro links there  
what connects literally the neighboring element of the Spirit  
in general, how does it look at the level of neighboring elements  
Well, we approached it like we would with ordinary matter, for example. Yes

then it works out  
what is god's vision  
ie the intersection of the Spiritual as if the view of God  
Here he is looking at that  
what people realize in their lives  
where there is dynamics, the magnitude of the dynamics  
ie the task coincides with vision and with the Action of God

because in this system  
task management goal  
this is also a spiritual state then it turns out

and this is precisely the intersection of all the components  
where does it already match  
and God's task  
and the task of man  
this is like a micro-grain in management

let's say if we look at the world  
why does such a concept exist  
how the "grains" of wheat grow there, etc.

why exactly does grain exist?  
this is the form generally speaking

here's if you consider it  
Well, again, let's approach it somewhat abstractly  
to external reality  
and ask these questions

it turns out that this form is still a form of growth  
and that means the Spirit grows from a point but instantly yes  
this is the Infinite state of Spirit  
this is still instant growth  
you can perceive the situation this way  
as if instantaneous spread  
there is no speed on one side but there is movement

and so from the state well sort of grainy, let's say  
from the grain of the Spirit  
central root of the Spirit  
where the Spirit has no form but has Spiritual content  
unification in action in remote action  
Spirit and man

the action of the Spirit now  
in the future coincides with a distant action  
Means for example the Spirit of God and man

ie the Spirit of God acts as if further

here we can through Spiritual vision  
how to trace see  
what is the Spirit of God  
where is he anyway

and then we begin to see His Movement

here we have moved into the external Reality  
ie transition to external Reality  
it is to see the movement of the Spirit of God

and then it turns out that the Spiritual vision of God  
so we see for example yes

if there is a coincidence, we have  
we have then  
full recovery of any system in principle

for God, for example, there is no concept  
For example there is "biological death"  
there is no concept of "destruction"  
in His personal understanding there  
because he is indestructible

and we see this as if it were True yes  
ie Vision True view  
what does he give to people

it turns out that then it is clear that we simply find  
for example, if we work using this method  
then we find a resurrected man  
because we see where the Spirit of God touches him for example  
where does he set a task for him  
and regardless of time

because God has  
after all, the concept of "time" is excluded  
this is his own production  
and even the concept of "space" is generally excluded  
from the level of a kind of investigative department

He is also the Creator of space.

ie it turns out that He is outside the system  
and therefore everything always exists there, yes

ie here is the system of Eternity that God transmits  
we are already moving on from here  
to the structure of understanding Eternity  
from God  
specifically there personally from God

but then we notice that in reality  
Generally speaking, a person has all of this  
in the soul of a person  
this is how the human soul is arranged, it is structured this way  
that she has all these functions  
specifically well let's even call it something, let's introduce such a term  
it can be entered as "organ of the Soul" for example Yes

it looks like a function of the Soul in some areas

for example God when creating the Soul  
created it as a whole at once  
in his own image and likeness  
and there is no concept of "organic division"  
there is a human physical body in the projection  
but when we consider, for example, the detailing again  
we still want to find out there  
how can one realize the structure of the Soul in action  
so that we have a systemic perception

for example, the general resurrection  
this is a systematic perception

general restoration  
of all creative Reality  
this is also a system and this is just a position of God's position  
at the moment of the very universal Infinite World  
ie it is both a future state and an initial one

for God the initial state  
this is also the Infinite Future

and here we see the movement of matter  
from the level of, as it were, primary management

ie from the grain of a certain  
microstructures  
we see movement  
what is the transfer of knowledge from God to man

ie movement is the transfer of knowledge  
this is some knowledge

and here the real World arises, so to speak Yes  
the usual physical world, let's say, there is the sensory world, etc.

and we see the growth of the structure of this World

for example in social processes

we need to overcome something yes

then it turns out we should consider

all systems of interaction

God

and in fact all people

each individual person

moreover, each of there separate some system

for example from the point of view of there plants

the surrounding world

everything that exists and on equal terms

here from the point of view of equality

how is it possible to have equality in what at all

between a person and the external environment yes

Surrounding Reality

let's assume there is a forest growing there we know it gives there

for example, oxygen is considered, etc.

and then it turns out that we need to consider

system of equality

as a system of , as it were, a Spiritual outlook

Spiritual vision does not allow it there

there to destroy the outer world yes

it turns out that in tasks, for example,

by the way, if we are talking about the task of counter-terrorism

then Spiritual vision the light of the Spirit it does not destroy anyone

no terrorists at all, no one

allows then to be saved

this is technology

Spiritual vision is a technology

if we take control of this technology

We can develop infinitely without destroying

here in the tasks of Eternal development

this is exactly the task

this is the way

light always finds a way yes

just imagine what we have there

well, some kind of closed room

let's say the whole world is a certain space

and there is light there, Spiritual light

the state of light itself is an Infinite quantity

ie penetration into the internal structure  
we immediately enter the external system  
ie the concept of "isolation" is not there

this is the spiritual state of man  
this is his infinite world  
although a person has, for example, a specific form

and an element of self-organization is obtained  
here in Eternal life in Eternal development  
these connections, well, they are kind of quite subtle  
well, it seems like it's like on the Perception of Management

in fact, with a little work  
because it is very hard static  
here Spiritual vision has a specific value  
outgoing  
from actually well as if the inner center of the human body  
physical body of a person

and well, like some grain growing into the Infinite World, yes  
the man himself is the source  
the same Spiritual vision for others  
as a carrier of knowledge, actions, etc.

then it turns out that we can see  
control system in this way  
what if for example We make control coming from ourselves  
for a specific task any  
Well, we just perceive the world.  
at the level of Spiritual vision

ie we project our Spiritual vision  
so that the outer world is infinite

then it turns out that the reflected value  
She is also infinite

here is also the same problem  
if you make a beam of infinite light for example yes Means  
as if mentally we even stretch it out so that it doesn't end  
then we thereby form

its own matter is obtained

for example, a ray of light  
we think yes he is infinite  
but how can you see it at all  
we take and sort of pull the tip of the beam

to drag out the endless time  
we must form matter  
here is an element of how God created Himself

ie practically a system of sorts of pulling according to the task  
this is a system of creation

then the question arises  
what is God's task anyway

it is clear that Eternal development  
the creation of Eternal Peace there is clear  
because He Himself is so Eternal

everything must be eternal

and this is how he moved on  
how He moved the structure of His own  
there is no physical matter  
this is the value

this is again a spiritual value  
Spiritual well as if a meeting Spiritual action  
ie where God places before Himself  
that task  
which appears before him at the moment of Action

those. He creates practically  
there is practically  
precisely at the level of distant Spiritual Action  
well, like into infinity  
God creates governance just as man creates it.

here in front  
in front of a person too  
here's an example well, like some elements of Reality  
any business yes  
he understands that he can do it  
but on the other hand

there are some undefined quantities  
there is what the details will look like, etc.  
how will the situation in the world develop in general, for example Yes

and here is a similar action  
It's good when a person is a prognosticator  
he knows he can work there easily

however, when mastering technologies  
predictive i.e. precise control  
the task of practical implementation of the action still remains

and it is in the Infinite level  
God actually gives to Himself  
level of some guarantees  
that people will live there forever  
that all systems will necessarily Eternally evolve

and here is this level  
like sensual there emotional  
or something in general looks like a guarantee yes  
coming from God  
this is what He does the same way a person does

ie in connection with this it turns out that in the World  
there are elements that are completely identical  
ie a person basically succeeds  
very easy to learn  
in this

in this sense, the simplest thing you can learn  
this is the Eternal development  
Because God is Eternal  
and therefore it is actually the easiest to learn

why does it work then  
from the point of view of the management structure  
Well, some dissonance arises, yes

on the one hand, simplicity is quite understandable  
at the level of ideology  
but on the other hand, if you think about it,  
that there one system creates a similar system there  
and one Infinite

then of course the properties are transferred as if without any problems at all

e are naturally transmitted

so here is the transmission level  
this is precisely the freedom of the Spiritual state

on the one hand we have  
absolutely free there is the Infinite Spirit  
we are engaged in management

and on the other hand the level of freedom  
this is the knowledge that a person transmits to God

ie Spiritual vision is like an axiom, so to speak  
must include knowledge that is transmitted to God

to what extent does a person generally know and understand the World?  
that's how much he feels or perceives there  
internal communications

so I introduced such a concept as, for example, "God's emotions" yes  
just that there is a "sensory level"

here is the intersection of management structures  
at a human level there  
there is a sensory context of control

there is a simple question  
can god make me feel the same way  
some event as a person

Well of course maybe yes  
moreover, He is the creator of feeling  
ie this is the only difference  
in freedom of perception  
and in freedom of expression

Creator of your own feeling  
the man is already there on his own

ie the structure of action from a person  
turns into something that he only needs to do  
at least one movement independently  
He can do everything on his own.

The world is a completely free quantity.

and here it turns out that  
well, it's clear why the Spirit was created then, right?  
what exactly is unification in the structure of freedom  
at the level of absolute freedom of free quantities  
gives a clear concept there  
for example, the Infinite Eternal development of physical matter  
ie some specific value

thus spiritual vision invests  
it is precisely the element of fullness, as if the sensation of Perception  
coming from the Spirit  
where the Spirit is expressed  
including, for example, there is a clear boundary of Perception

ie we have in perception  
for example, there is a specific system  
well, in the form of a certain border in principle, yes, even  
here we can consider that here we are the wave of Perception  
we are considering it at some level

and it turns out that it's like a wave  
well, ie like some kind of translucent sphere, for example Yes  
looks like

we think, so we take and look  
that here is a wave of Perception

further into this wave of Perception  
all external images get there  
internal structure

and the system coming from Perception  
as if the reflected system of rays even  
it organizes, among other things, external Reality...

i.e. the boundary of perception  
where Perception is a more general concept  
than for example just well action Spiritual Perception  
this is also the structure of the human Soul  
and the structure of Thinking means

and Spiritual vision  
I was talking about the action of the Spirit after all  
this is the optics of the Spirit  
has such a silvery, capacious color  
that's how one can put it

this particular volume

and Perception is a boundary system

as if between

an element of some kind of conditional even external system  
and internal

and here we are looking at

only interaction between them

and when we look at this interaction

you can see that the action of the human Soul

here is the internal state internal device <sup>yes</sup>

or <sup>so to say</sup> the organs of the human Soul

they are <sup>kind of</sup> reproducing

ie they self-regenerate and self-organize

exactly as God originally intended

tasks of the organization of the world

ie <sup>it means</sup> the Soul is whole and indivisible

but the internal structures look like tasks

ie organs, <sup>for example,</sup> of the Soul

organs, ie some functions of the Soul

this is a solution to future issues

along with the answers to the solution

ie it turns out that in the Soul there exists

well, almost all the information

and the <sup>seemingly</sup> separate systems identified

this is what it looks like

in the form of events

and solutions to these events

ie we come to the conclusion that

what is the original spirit

original level of the soul

and even the physical body of a person

where all questions are resolved

and this system <sup>is like</sup> <sup>yes,</sup> here is the total personality

is located outside of space and time

and here are all the external systems of manifestation

in the form of events there, etc.

this is what a person does initially

but at some initial point he does it together with God

and it turns out that his personal events

this is that action

which he being in the Infinite state yes

in the structure of the Eternity of life for example

and even, let's say, in the structure of absolutely real Eternal life

this is a state

having understood which

a person is clearly in the system of Eternal development

ie at this moment he is Eternal

at this moment, for example, there are resurrection technologies

can almost be instantaneous, etc.

I'm here too

especially in the structure of the general resurrection

the ability to resurrect almost instantly

from each person this is a necessary quantity

then it turns out that the element is, for example, a meeting

it is an element of the natural state

when everyone is alive

ie the concept of "meeting" is not a question there

in Infinite Time

and approaches the point where a person wants

for example, from what do means of communication arises, for example , communications  
in the form in which they exist now, yes

Well For example, we will consider

there is a technogenic principle of human development

but the structure of the general resurrection

this is also general information

we need to know about this fact

therefore, for example, it is more appropriate for example there is cell phone service there  
yes

here's if you add it up

the structure of God's task

and the structure of human development

everything matches

ie there is nothing that does not coincide with the Action of God

it is the universality of information

any element of development leads to structure  
namely Eternal life Eternal development

the more concentrated  
more likely, complete information  
the more accurate the development goes  
from the point of view of the Divine path

so we came to this  
what is the level of transition to the external system  
This  
as an internal <sup>yes</sup> Spiritual level  
and the level coming from <sup>for example there are</sup> the boundaries of Perception  
from the Perception of the inner level of the Soul of a person  
from the device even <sup>yes let's say so</sup>  
from <sup>means Well as if</sup> actions  
aimed at considering  
so the microstructure <sup>so to speak of</sup> the Spirit  
connect adjacent elements i.e.

we just did the action  
and got some consequences  
we didn't even go into detail

ie I am specifically showing some concepts  
at the level of somewhere concept  
at that level  
that the beginning of the action leads to the desired value

you just have to try to get out  
into the microstructure of the Spirit  
we get into the whole structure of Reality  
at very high speeds, etc.

I don't do any detailing  
because the task is to get  
full external control  
due to the understanding of the element <sup>and</sup> action

ie in fact I brought it to the usual  
<sup>Well, in general, in everyday terms, let's say</sup>  
Human perceptions ultimately  
where in this perception  
Well , in short, that's what I said.

Of course I just said  
about some part of this point of view

but nevertheless in this part  
we have a mechanism  
already complete , for example, recovery system  
any object of information  
well including the resurrection of a person, for example  
including the restoration of any creative system, etc.

because this is the situation  
that here the fullness of action is based on that  
what is the difference of action

ie different systems of action  
different systems of interaction  
and we can fully take into account  
that they have some properties

and here we can already quite easily introduce  
its own properties  
which is what a person always does  
this is a sensory level  
emotional  
level of action, etc.

It is only worth introducing the concept of that here  
for example, how a person should understand himself  
some action  
ie how should he, for example, consider  
concepts such as "the emotional level of God" for example  
how to understand the structure of God's Thought in general  
at an ordinary level in ordinary life  
well, that is, in a normal state

a person needs to understand and do that  
what does god do for example yes  
from the point of view of human resurrection  
from the point of view of Eternal development

and at the same time he is doing something  
he is going about his normal life  
he has his usual affairs  
he is in this normal state  
should technologically do the same

ie he must also live forever, be able to resurrect, etc.

and it turns out that the management task  
in this case, with Spiritual vision  
see the same vision in others  
as if collective management is also important  
what others do

ie instant transmission of information  
someone has achieved control  
it turns out that he has a very good practical status  
Well there is simultaneous action

and if we have control for example  
aimed at the fact that the control is Infinite  
ie we act infinitely  
some movements are happening  
which form the structure of the external environment

ie one-time elements of external control  
related to freedom of activity  
there are external elements of Reality

then the formation of the external world  
has exactly that status  
that there is complete freedom of action  
ie Infinite magnitude of action  
it is due to the fact that  
that we have the status of what is happening  
as a status expressed in the presence of an arbitrary element there  
i.e. free quantity

and we see the reverse formation of the Spiritual system

example, here's what's different there  
well, there is some kind of machine level there, a machine, yes  
where all forms are rigid

and for example if we consider  
how is perception going  
in general, the element of the machine's reaction  
to the external environment

these are also linear processes  
reflected in the structure of the machine fabric  
there is metal, let's assume , and that's it

for a person everything can change instantly  
and it has a completely different system  
ie against the background of a completely single control system  
ie we begin to manage on the Spiritual level  
everything is going well everything is going well endlessly

and at the same time the status of Infinity  
expressed by an elementary action  
physical reality

the man did something yes  
something happened that is not included  
in the concept of there "linear" concept of management

this is the aspect of Spiritual action  
what events can happen  
which seem to have no logical basis  
it would seem there  
do not have any cause-and-effect basis, etc.

then we start to get into trouble  
into the structure of the True Reality

For example, God recreated Himself  
what was the cause and effect structure anyway  
in this matter, if you think about it

ie how is he even there  
what did he justify  
because his next justification  
this is his own reproduction  
ownThinking

then we  
we get into the structure  
precisely the real position of this World

for example, there we are in this hall  
this is an absolute state well so let's say Mira including yes  
as well as the state of one person

and then we begin to see  
all connections of this hall  
ie all human connections  
when we understand it

then the person begins  
have controlling clairvoyance  
because it is located  
as if in the control center inside oneself  
it is precisely in this certain grain of Spiritual vision  
ie Spiritual vision is Infinite  
you can see everything around  
For example there you don't have to look with your eyes  
see what's going on behind there and everywhere yes

Ie well, just normal vision  
where everything is visible as if with the eyes

then a transition occurs  
Let's assume in Perception  
how to make the element of Perception  
for example there was this one  
that we could see the technology of the transition

that's why it's very important here to sort of synchronize  
when a person sees with his sight  
this is still the most familiar, understandable and reliable yes  
counts

this is exactly the level of Spiritual vision  
For example there you need to look around in volumetric form

then it turns out  
what can we have here for example  
ie how to connect the known vision  
well, which a person is used to  
with spiritual vision

because in the recovery system  
that's exactly what we're talking about  
that with such a vision  
the entire external system of the World yes  
everything that a person perceives  
becomes Eternal

that's exactly what you're deducing technologically  
into the structure of the external world  
Eternal development  
coming from the Eternal state of your Spirit

then it turns out that there should be  
clear communication systems

For example there is a man looking  
on some object of information  
in Spiritual vision  
it should look exactly the same

but that's one thing to realize

For example there is the whole area  
here is this hall there to look at all the surrounding areas  
and see everything at once

it's another thing to look with your eyes  
ie physical vision seems to expand

ie we are kind of mentally expanding  
physical vision  
although in fact when going into management  
it turns out that it expands due to management

For example well in aviation practice  
I often use this technique  
I take and look at the entire aviation field there  
no matter how many planes there are there, there are dozens of them, for example  
I take it there, let's say I see everything at once, yes

or take some region  
and try to see everything at once  
here is an element to see everything at once  
at what point  
how does it actually work out that this is a concept

after all, vision has such a large amount of information  
does not process in humans  
at the level of physical vision  
a person must see something specific here

then it turns out he should  
as if not to see something specific  
but I understand yes

ie when approaching the information object  
he must understand at a certain Spiritual level  
what's happening to the region

and this is one of the reasons for God's organization  
So  
in His personal action  
He comes to the level  
where the undetected system of Reality

ie on the one hand He forms the whole Reality  
on the other hand he puts a position  
where the system of Reality is not  
not detected  
ie well, there's nothing there, but it 's considered  
there is no vacuum space created there  
if we consider that vacuum this applies  
to the structure there is no dense matter there  
and for example we think  
that the structure of Reality is, as it were, sparse

although there is another point of view  
it is one of the types of matter  
and has certain functions  
Well, in principle they are equal to the same  
like any other matter

that's why we're talking about that  
that God seems to be deliberately introducing a system  
absence of any value

it means that God has such a function  
we found it out now yes  
when approaching His Action  
then it turns out that He has a function, the absence of death, for example

we logically calculated this function  
Well as if they had discovered and seen  
but let's use apply do the same  
absence of death absence of destruction system

then it turns out when approaching  
for any event  
we do not find any destruction

with the development of such vision in any situation  
we don't discover that death exists, for example

so then it turns out that when mastering yes  
mastering, so to speak, such technologies

here are two meanings of the word, different transcription  
mastery is said differently  
they fit  
the word has an extension to the sound A yes  
the first sound of the alphabet for example

then it turns out that if we  
we have this type of control  
then we see how the words should be put together  
in general, how should it look like, let's assume there is an article in the press yes  
what should television look like there  
what should be the transmissions  
which direct  
this is exactly what Infinite Development is for

ie we get a whole symptom complex there  
there are symptoms

ie external reaction  
and a complex of reactions  
what should be

ie a whole mechanism of knowledge based on that  
that we work as if all the time  
on some external quantity  
at a level that can't even be detected

after all, God thinks and works often in the same way  
a quantity that is not detected  
external observation as if Yes

Here's how to understand  
He is the Creator of everything  
how can His primary Action be discovered  
each action is next  
ie we often find ourselves in such a situation

but it turns out that God must also create for Himself  
some situation which means it looks like

it turns out he enters  
the structure of some random variable  
and perceives it this way  
how do people perceive  
ie accepts people's point of view

and then it turns out that everything fits together for Him  
ie He through this random variable  
to regulate processes in the World begins in this way  
so that a person learns to do it himself

then it becomes completely clear  
that for example the action coming from a person  
God really needs it  
ie he is also, in principle, interested in this in many ways  
for example from the point of view of Infinite development  
as well as in His own actions there  
so that they are identical

because it works  
that the task is ongoing  
as if from God  
and from a person  
in relation to well as if to an external quantity  
as we said external quantity  
it may have an undefined value  
there is  
where is the initial action of God  
but it doesn't seem to be visualized  
we can't even determine its place in space  
we see it but the location is not defined

so this structure can be perceived  
only with its physical matter by the way

ie the properties of physical matter  
why does she have to be Eternal  
This is a perfectly accurate coordinate system.  
which is defined as itself  
this matter  
because it is in some place

which means that at the same time it is  
means of indication, ie Perception

those. Eternity system  
going through the Spiritual structure  
and passing  
this system through physical matter  
forms matter themselves

ie for example if we want and we can want

when we are engaged in technologies of Eternal development  
and in many cases this needs to be done  
just how technologically there is for saving people

let us consider how the Eternal Spirit  
passing through physical matter  
Forms It Eternal

Ie it touches there

then we have a constant Infinite mechanism  
reproduction of one's own physical matter

in fact, not even reproduction  
but simply standardization in the status of Eternity

and then such an element arises  
here is the grain of the Spirit and the level coming from you  
such a bright, such a full silvery glow  
silvery-white so to speak

this is what affects the outside world  
what were we talking about

and that the coming external level of the Spirit  
as if the external World level is Spiritual  
Well , in the ancient tribes there  
there were Spiritual systems of Perception there the spirit of the forest etc. yes  
that's how they perceived these well as if these optical elements

so it turns out that the external systems that are going  
as soon as we see God at work  
and they match  
ie we see the organization of these systems

then the going element passes  
through our physical matter  
making it at the points of contact of the Eternal  
precisely technologically

all external information is obtained  
in contact with the human body  
there touching you  
Makes your bodies eternal

and further Eternity spreads naturally

those. as if monolithically  
the same way as personality is structured  
one  
The Eternal Body Creates the Eternal Reality  
naturally

not because we need her there  
touch with your fingers and look there  
tree as it is Eternal or what happens to it

and because it means everything is natural  
it is Eternal because your Spirit is Eternal  
and you see the mechanisms of, as it were, the creation of self-recreation  
ie the primary state of God is actually

and that's when you start to enter into this state there  
I understand it  
then all existing Reality  
instantly becomes eternal  
processes of complete restoration are taking place  
and it's as if nothing changes

it's just at the level of Perception  
as if nothing had changed

Now I suggest that we do what needs to be done  
such management taking into account what has been said now  
and try to achieve all your goals  
especially necessary during full recovery  
we will achieve it anyway

ie you need to do it with this action  
how not to change the existing Reality  
Well as if not at all

because Spirit is the original level of Reality  
at the point of God's initial state  
I will work with you  
we are working

when you work like this  
try to do it this way  
so that the level well these are enough after all  
there should be clear such concepts  
what is an indefinite quantity for God

God working in indefinite magnitude  
always creates  
He gives only life there happiness freedom endless development

ie any derivative of this Action  
it's a creative, well, some kind of constant , yes  
concept constant all at once  
both concept and action

and there are other concepts of course  
where reality does not exist  
because for example there is a system there  
some kind of destruction, let's assume, in action  
ie, for example, this is the element that needs to be excluded  
possible destruction

lack of information or destruction  
it's a completely different concept

and due to the fact that we work at the level of Macro-creation  
we can then cut off the very concept there, for example  
"death of man"  
the very concept of some "random chaotic events"  
given that any event is favorable  
Maybe  
what a person wants creatively

that is, precisely by excluding the possibility of destruction as such  
we are beginning to discover the possibility of approaching  
some problem in advance then  
systems of precise prognostication of action  
at the moment of action

and as soon as we leave  
into the structure of such a plan of Spiritual Administration  
what do we have for example  
the level, so to speak, of Infinite development is such  
what we are looking at the system so that we need  
highlight some predictive systems yes  
which are possibly destructive there

select them in advance  
not give them the opportunity to realize themselves  
in a destructive way

we must act as God acts

initially  
at the point of primary creation

for example, just now you did the practice and tried  
without changing the outside world there  
bring to the Eternal position  
and it turned out that from the point of view of logic  
naturally there is an element of this happening  
The world exists and it develops.

to prove that it will be forever  
we must take into account the level of management technologically  
in the presence of any kind of chance

ie a person must master the technique  
when he guarantees control  
for any unfavorable eventuality

that's what it is well, in the list of some other favorable ones  
it may not even need control

and here is where the element arises  
on the one hand it is necessary  
For example means not to let an accident happen  
Well, I don't think it's possible to visualize  
again, the God Action technology helps here  
when the element is invisible and controllable

and on the other hand control or let's say development  
these favorable coincidences  
what in general well like life events  
or simply even as a task of life

this is what is on the second level  
God set before Himself  
as a task of self-creation  
His personal development task

ie He is on some level  
I did set the tasks from the start  
He created them as if in the future tense.

so we come to the structure of that  
that the future tense is a completely definite quantity  
containing absolutely clearly identified events  
but having, as it were, a variation yes

ie it turns out that the future tense contains  
more events  
this means the number of constructed values is much greater

On the one side  
the future is considered to be less certain there  
well for those who maybe are not very  
predictive capabilities have developed  
for a number of reasons  
does not want or contemplates the internal state more  
understands the Spiritual through internal reflection

ie prognostication is also a kind of human wish  
he wants to do it, ... for example, he doesn't do it

but for the technological level  
it is precisely the provision there  
universal Reality of Infinite development  
the future must be known for sure

and here is this projection  
internal state of Spiritual vision  
into external reality  
in this system  
this is what requires understanding the device  
here is this fragment of the future tense

everything should be much more precise there  
much more detailed, even  
for some one event to happen  
it still needs to be built

at the level of well so to speak, a common concept  
which exists in Perception  
to build something  
first you need some kind of thing there, for example there are building materials, etc.  
create elements calculate

and so and so this is actually kind of painstaking work  
all the time happens in the future

i.e. God created  
this very management structure  
it turns out that from the point of view of the universality of matter  
created an element where a person has the right

Infinite choice  
Well, it turns out to be completely Infinite  
from the point of view of any level of Thinking

then how can you create so many control options

I mean it's infinite  
not only there in physical action  
somewhere there a person can go or go  
he can produce any size

and that's when we start walking  
via Macrocreative necessarily  
level of Thinking and management  
we see that this is precisely the reverse signal  
it is formed at the intersection point  
For example there is no creative impulse of man  
from the point of view of Macrothinking  
to the level of his own knowledge of his own magnitude

ie internal state  
internal organization of matter  
ie we come to the conclusion that  
that Spiritual vision is connected for example with Thinking  
organizes the Eternal physical body

you just need to position it correctly  
namely the Spiritual level  
in the structure of thought

a thought that comes to you for example  
passes through such an Infinite Spirit

ie it's not just there anymore  
you have made management into external Reality  
and from what is there  
and the sensory reality  
not only there is physical any at all

from the fact that here is an element of external Reality  
any object of information let's say  
information as such becomes Eternal  
you become Eternal

but here the question is different  
the question here is what exactly in Thinking is already possible

without entering the external management structure  
to become a person Eternal  
because he sort of folds it correctly  
thought and spirit of man in movement towards itself

ie the reverse action of thought  
the inverse property of thought  
for example , there is the concept of "karma", etc.  
ie what exists from the action yes

and when we start to explore this level  
at the level of Macrosalvation  
For example, I have the karma of Salvation where it is  
for Salvation you can instantly make control  
For example so that there is no global problem there  
and it shouldn't matter there  
what existed up to this point  
we definitely need to save it, yes

ie the ability to overcome any situation

this is the level of information filtering  
to you in action  
the ability to act so that it was such  
that you will definitely implement this Macro management yes  
there is Macro-salvation or Macro-creation

this level is exactly what allows you to see  
that this is the grain of the Spirit  
where the Spirit grows inside the physical body  
can be in real time  
in the same exact condition  
in the external event system

ie it is a kind of filter or a gateway  
but this is conditional  
it's just like a grain of some Truth there  
which is like this Spiritual outlook  
exists in these events  
Well, on optics it looks like this  
here comes the optical phase of events  
here comes the flow of Thought to you  
and here this grain appears

it is no different from what is inside you  
ie your inner grain of Spirit yes

but at the same time your Spiritual so to speak grain  
becomes wider Infinite  
immediately becomes  
and Infinite  
and simultaneously located in the human body

and there it is in the Infinitely Remote Level  
i.e. a similar system appears  
God created man  
a person can create  
a completely similar Spiritual system

but it turns out that at the level of the Spirit  
a person can create such a grain at the event level  
so he can also set tasks  
as God sets before man

and then see the system  
own creation of own knowledge

ie where should a person then, for example, get knowledge?  
about there own creation  
about your own level of action

just here is knowledge  
well let 's say fundamental technological knowledge  
in general for example there are independent of the goal

a person just needs to figure out the situation  
he must clearly understand  
fundamental mechanism of the state  
there is no organism and he himself  
Reality in general

such a simple task  
here before doing something  
you need to first realize what's happening  
as if in a certain  
Well, that's not even the point here  
what is the expression as in "in full measure"  
it's not really suitable here  
because every management is still a point of view

control is done on support systems  
current level of management or methodology

but nevertheless it is precisely the fullness  
from the point of view of the obligatory nature of the decision of Eternal  
Development

and that's when we start  
to do exactly this action  
we see that these are the grains of Truth  
Spiritual search, so to speak  
where i said  
God sets tasks for Himself and solves them  
or not designating or designating in front of people

here we see that there are so many grains of the Spirit  
their Infinite number in the external Reality

ie it turns out that the Spirit begins to perceive  
your Infinite status  
and perceive  
that all this is going to him

ie a huge amount of his own information  
and at the level it looks just like grains  
a small even such golden glow at first begins

therefore everything is very simple  
any other person  
has  
in fact, the same possibility of Eternal development  
because the state of the Spirit  
in this system well as if an information environment  
means Spiritual action of other people

ie we understand what is happening  
just like I said, look at the region and understand  
without revealing the structure in detail

we don't need specifically any leaf of each plant  
look  
we understand yes at some level of Spiritual action

then it turns out that if even more so  
we are talking about a person  
and not about protecting one plant there  
although for God the task is often the same  
protection of the entire creative Reality

but first of all, still a person  
because it is man who is created in the Image and Likeness

then it turns out that we can  
this "first line" should be brought to that  
that a person should protect then everything else

God gives knowledge to man  
a person can do more on his own

then it turns out based on this  
primary level of gaining knowledge about God  
For example there in the church in the mosques  
Well , at those levels where there is an orthodox system of religion  
or simply with a sincere internal appeal of a person  
or there is a methodology of concentration there  
just in the system of knowledge  
the level of circulation is such  
that it is precisely the Infinite component that is perceived  
everything is infinite

and let's say the relationship with God  
attitude towards God  
this is Infinitely fast action  
from a person  
directed towards God

that's why he communicates as if even internally  
Well, first of all, with yourself  
at a certain level of access yes  
looks at his tasks first  
then his thought goes directly to God

ie the level of personal wealth  
it's like some kind of internal thing or something  
self-diagnostic action  
where the structure of the internal level for example  
any element of external Reality  
speaks about your condition

and that's when you come to this  
that's natural  
the primary state of God is known to you

all external states  
all external reality

this is the primary state of God  
ie for him it is all familiar  
ie a feeling of familiarity of the action  
those. everything is known

not even at the level of the Spirit and Soul of man  
and at the level of logic  
at the level of perception

ie a subtle level of Perception  
which is not visualized  
passes through the structure of the human heart  
and a person perceives with his heart, for example Yes

he understands  
the heart works like the mind, for example  
like a brain at the level of process logic

and when do you start  
Well, it is generally accepted that, for example, the brain works there  
responsible for some processes there, etc. yes  
there the heart is a function of some organs  
known as if biologically

but when you start to see  
that another organ is working at the functional level  
well, how is it in general like any other  
well, already there in extrapolation

then we get that the element of Self-creation by God  
Myself  
in an element, like something like a projection  
it is in principle again quite simple

For Him, everything is connected at a certain point  
according to the task of the whole Reality  
including himself

then it is clear that the projection part  
makes it eternal  
ie in any event He sees the status of His Eternity

we will enter into this same structure  
Just like I said  
the structure of the Spirit is revealed in an external event  
the same way

through Spiritual vision again

after all, the detailing of the Spirit is also Spiritual vision  
the ability to discern the action of the Spirit  
as if to disperse at the level of primary concepts  
there are the following  
it's still a vision

we are solving completely obvious problems  
there are absolutely pragmatic tasks in everyday life  
besides the fact that they need to be solved, that means  
Well, just kind of socially

this is precisely the Spiritual solution  
will make the Eternal World easy

and then it turns out that from that  
that there is a student <sup>there</sup> working according to my Teaching  
becomes Eternal  
and in certain management situations  
he is the Eternal  
if he doesn't go out there, <sup>then</sup> from this control  
then it's just an absolute guarantee <sup>there</sup> Well, let's say one hundred percent  
how can one express oneself here  
full guarantee that at this moment he is Eternal

that's how it gets the output structure  
into the structure <sup>of such</sup> management  
begins to understand what such conditions are associated with

here the need for a transition arises  
so that any other state is precisely the state  
was also Eternal and did not depend on the state as such

here is God who created the structures of Reality  
He can't depend on the state <sup>there</sup>.  
Well how can I even <sup>say</sup> it myself there  
you could say that

ie It should be obtained  
from a management point of view  
Always Eternal  
whatever happens in this world <sup>yes</sup>  
or there in Himself

ie it turns out that the structure of Eternity

this is a structure, well it is so universal  
that the system of these primary events  
there are grains of the Spirit  
Souls of action yeah  
and the primary level of the Soul  
all elements of personality  
this is the level that is actually based  
on the Eternity system

ie the reference point of all phenomena  
this is Eternity

Well, we have now come to this conclusion, in many ways, analytically  
through there Spiritual vision including

and it turns out that it means when nature itself  
ie the result is building material  
this is Eternity

then it turns out  
Well, I said it figuratively of course  
then it turns out that  
why then do phenomena still occur  
how to prevent them in general  
from the point of view of, well , negative phenomena  
some processes

and I think that management should be like this  
so that's good there let's assume preventive maintenance of some systems  
there is external reality  
the usual social systems there  
was done so in management  
so that there are some distant events directly there  
ended up in the structure of complete control

when we, for example, some events  
we begin to consider  
as the structure of external vision and the vision of God, for example  
External Action of God  
or there are external events

we must understand that God cannot have  
negative events towards you  
ie His True Action is always creative  
there it is macro-creative  
and of course in the personal aspect it is creative

and the personal aspect is what you yourself want  
it is in the Eternal Infinite development  
i.e. identifying the target  
own Eternal Infinite development

then for example there is a man somewhere resting, he has time  
and so he decided to take a look  
Well that means for some future events  
which in some way, for example, he perceives  
in the form of a certain feeling yes

favorable events there a person may be pleased  
he perceives some pleasant signals

so this is some kind of background value  
looks whitish in such a color scattered level  
this is the level where the Spirit works for a person  
future events are constantly being built  
in a positive direction for a person

a person just needs to recognize it  
the work of one's own Spirit  
where the Spirit actually seems to correlate coincides  
with the action of the Spirit of God

and here it turns out that all external events  
which exist for example yes in the infinite future  
they are therefore structured in management in this way  
that we get the required value  
at the moment when we act  
and we get , as it were, a problem of a given quantity

that's why God made random events yes  
to a person  
so that there is a task of action that must arise  
from the fact that a person does something

Well, some of it can even be called resistance  
or there is simply a resource there, labor that needs to be applied  
not even resistance if

and then it appears right here  
the level of understanding of God in general  
why does such a Reality happen

because first he is free

so he had to create  
in Spiritual action  
in Spiritual vision  
some sense of resistance

here from God's point of view  
It turns out that he has no resistance  
here's from the point of view of logic  
He is the Creator of everything  
including the concept of "resistance to action"  
or there is knowledge

and it turns out that it would be like a person  
He must create for himself  
Infinity system  
where is there any action  
which means, for example,  
as a system of labor or overcoming

it turns out that if we, for example, proceed from this  
then a person can enter into this concept  
and without achieving resistance  
very, well, in general, significant management  
sometimes completely fundamental  
without spending the structure of some kind of force or something  
additional strength  
or without using the concept of "force" there at all

i.e. the free Infinite Spirit  
and he is active he is doing yes

Spiritual vision  
it's precisely vision  
the same way the eyes perceive

ie at a certain level  
we see that this vision can be seen quite clearly  
open  
Ie to see absolutely everything

in principle it is one of the elements  
well enough I think powerful clairvoyance manager  
and one that gives precise coordinates  
and such clairvoyance where we can see  
detailing future events as they are built

we can see the goals of God's task  
the action becomes more understandable  
if, for example, you take a closer look at another person  
Well, it's completely clear that there are some actions  
he is doing something  
but we don't enter the inner world, right?

often even if there is some kind of conversation there  
there are certain limits there  
what a person either says to himself  
or it is some hidden component

what is macrocreative  
can only be his personal

then it turns out that this is an element level of action  
those. interactions relationships yes  
we see this element in this way  
that based on the task that we have before us  
we can deduce this problem  
at the moment of detection of the action

ie God himself turns out to have created people in advance  
or there at the same time creating people  
together with Himself  
He created Action for Himself  
ie that Action is what God needs to do  
at this moment

then if we suppose to think about it  
what difference does it make then?  
there between god and man

and a person needs to do something  
and God needs to do something  
in principle, as if it were the same thing often  
from the point of view of information transfer there

it turns out that the task is in transmission and perception yes

but people do that too  
as I said, it is not necessary at all  
for someone to fully open up there  
there are people who store some personal information there  
well, creative ones, but secrets for example Yes

it turns out that this is the transfer of information  
maybe there is a full one, maybe there is a target one  
Well, that's clear to everyone  
the only question is that their specific actions  
also coincides with what God does

Well, what is the concept of "secret"?  
maybe it's not the unknown quantity that's being sought there

from the point of view of Salvation technology  
I always say this  
we need to save as many as possible, distribute knowledge, etc.

but there are some personal actions  
which a person may not want to distract even others

and here is a natural property  
this is good as if of unknown magnitude  
what a person stores in the form of an action  
in the form of its own action  
there he might be somewhere alone for some time  
and this is his personal action  
for example, no one knows about this

but no one will force him to talk about it, yes  
there was a man walking somewhere near the newspaper kiosk there  
this is his personal action  
he thinks that there is no need to tell everyone about it

here are the elements that are connected  
with the personal level of a person  
I'm just explaining it this way  
that we are talking about completely simple levels  
which only the person himself has

then it turns out that a person can also be there  
at the point of the primary state  
where Perception of the external system  
it concerns only him

and this is again the primary state of God  
only because it comes from external Reality  
and everything was created by God  
this means he directly sees God and His  
His Actions  
in ordinary everyday life, well, what is it called

For example there "everyday life" and ordinary life

ie we came to the conclusion that  
that the elements of the Spiritual outlook  
Spiritual vision in everyday life  
allow a person to have his own personal status  
what does he understand in everyday life  
that he is Eternal  
because some action is happening

ie its understanding by the ordinary  
Well, if you can say so, there is an ordinary person there  
all people are equal, I think so

ie here it turns out  
it is his element of Perception  
this is his personal Eternity  
ie he understands it at a certain level

another question is he is any person  
does it use or does not use  
We learn there how to apply it, yes  
either develop there or increase there  
to the level of systematic technologies

but this happens to any person

ie such a system of knowledge  
exactly according to my Teaching  
it's very simple I think somehow  
if we look at it as a whole  
very easily conveyed  
at the level of there technologies of ideas constructions  
there For example You can stick a magnetic sticker there in bulk  
and then consider the Eternal development of this situation

but a house that is under control  
or there is a person who self-diagnoses himself  
and creates Eternal Life for himself  
he can do this all the time  
from one action

well, let's say there is a concept of "patent"  
can be considered  
personal thought of a person  
what does it mean also like well there action

according to a similar patent as technologies like there  
patent technology that is written there

the thought is the same yes  
if it is new there and has the property of novelty

but then the management is like this  
what is in the future for every person  
there is a docking with known unknown concepts  
at the level of event construction so  
what I took there, let's assume there is a patent  
you can stick a sticker  
make sure there is no terrorist attack there, etc. yes  
protect human life  
or make his resurrection there

the question is that there are technologies that are expressed  
there with some letters there and so on.

but there is precisely the real state of a person  
where a person in ordinary life does the same thing  
and in principle he can, well kind of the same thing

he will provide for himself in the future life  
then this knowledge is included

why do I say that all these stickers and other devices  
it's just like a training system  
a person will still do everything himself

he himself will see the whole Reality  
to control myself completely  
this is the main task of Spiritual development

The spirit that sees The spirit that accurately diagnoses  
accurately defining positions in this World  
at the level of complete freedom

ie Infinite life Eternal life  
as an element of the technology of spiritual development of man  
in this case, this is how one can put it  
in the form of some kind of control formula

and then when we start to consider  
here in ordinary everyday life  
Again I use the term "everyday"

in fact, it's just a matter of  
about the unique life of each person here  
and the one who, wherever he may be  
there was no city there for example metro many people  
but the uniqueness of each is expressed in this  
that they are all Eternal  
given their personal status there  
or the town there is small  
or is it some small village for example Yes

pay attention here  
the inner level of a person, as it were  
sometimes it perceives more, sometimes there is less space there  
but Perception varies from person to person  
this is already an Infinite level

here if you perceive  
people, for example yes and not the outer space  
then everything turns out the same everywhere  
precisely from the point of view of the incoming flow of information

pay attention this is a specific technology  
as if training Spiritual vision  
development of Spiritual vision of Infinity

you can be there  
there in a cramped subway car for example Yes  
you can be somewhere there in the village there in the field  
there is a small city there, big  
if we consider external space  
this is one

Ie space touches man  
and a person seems to be sometimes  
in straitened circumstances

ie it goes as if externally as if squeezing a person out  
to the point of its location  
we perceive space  
and as if through space we press on ourselves it turns out

from this point of view  
if you look at the person closest to you in the metro, yes  
then the structure of space disappears  
The world becomes Infinite there again

ie this is the level

by doing so you make man Infinite  
and then at the same time  
at the same time, by the way, you kind of expand the space

i.e. a specific mechanism

Well for example, it is clear that when making a person or creating  
having created man as the Infinite Eternal means  
and transferring this knowledge to the level of logic  
because a person is free and must master it  
God thus creates the Infinite World.

and with my personal perception as well  
but already at a human level

and if that's what happens there  
and so it happens  
then it is clear that this is already guaranteed  
that any other element  
can also be developed systematically

for man was created in the Image and Likeness  
when he perceives it like that  
when he becomes the Infinite Eternal  
then all investigative systems are clear  
all well systems are like a different level, more basic  
They can naturally be Eternal  
but after that, when the Eternal Man

and when we start to consider  
development system  
Well, in this case I mean  
truly eternal

there are some elements of matter there  
and that's why when we look at development in general  
from the point of view of Eternity

here we must understand that the concept of "real Eternity" is such  
that only a person who lives forever can provide it  
who constantly reacts to information

so we can say that there is some kind of stone in space  
there somewhere in the universe  
and he can exist there for an eternal number of years

but if there is no external active control  
We have no guarantee that it won't break somewhere.  
this stone

this means the task is in external active management  
the person has exactly that status  
that being, *for example* , Eternal, he ensures Eternity  
and any other system

so it turns out one, ie the next task of God  
which He actually decided for Himself  
this is the task of the Eternal Control of Information  
through personal development  
ie people who are also Eternal

ie the task of developing the Eternal Man  
actually caused it in the first place  
Well as if *let's say* the beginning of God's self-organization is obtained

and the structure of a person, *for example* , in this case  
of course identical then coincides in Infinity  
with a level of, *as it were*, primary Thinking  
the primary task of God

then the Eternal Man is the primary task of God

what he determined initially  
and for myself  
and for a person  
and what caused the existence of His own task

ie God's task is hidden in the personality of man

that's exactly what we're talking about  
how can He even take and formulate *it for Himself*  
how God's task  
He Himself is the producer of all Reality.

but from a human point of view  
he just formulated it  
in each individual person

then naturally it's understandable  
that man cannot be anything but Eternal

it's already like Well as if it fundamentally contradicts  
actually the essence of man is initially so yes  
Divine essence of man

then it turns out that we know  
this is exactly the level of management  
came into this, well, ordinary Reality  
ordinary, so to speak, if I may say so in quotes  
unique really every person  
which has  
well, just a huge number of possibilities  
any, and precisely creative ones

I think every person has  
An endless number of possibilities

further  
because firstly the Infinite amount of Thinking  
just exists

and then the control element begins  
which is already technologically  
technologically develops Spiritual vision  
at the level of absolutely precise technologies  
into the structure of any human behavior

ie technological methods  
become absolutely precise absolutely precisely visible  
all Laws of information distribution  
how does optical or information interaction go

for example, among people  
there in the control system  
how does the level happen for example there are macro actions  
or there is a local action

and we begin to see the system  
as good as physical vision  
but with spiritual vision  
and understanding

ie Spiritual vision  
this is an element of understanding that is located  
and in man  
and is in action, as it were, outside of man, so to speak  
in the external system of the World

but is always found in another person  
ie this is what is important here  
that when something goes well for a person  
then it turns out that all the other people are happy for him  
you can find such a control system

God created it so that means this is the concept  
there is "universal joy" "universal Salvation"

For example there in the general resurrection  
there is also an element of general joy  
the element of universality is the level  
where the Spiritual links of people coincide

and so it turns out that well for example, if you look at it there  
there are party tasks there are FRIENDS for example there  
tasks of Eternal development

and not just the problem but the solution  
realization of the Eternal development of Eternal life  
this is the level of unification

Well, for example, in terms of target and mental development factors

from each person's point of view  
he is still Eternal, he has it  
ie for him this is actually quite normal

me for example there in the task of precisely Eternal development  
I don't consider anything unusual at all  
from this point of view  
from the point of view of both God's tasks  
in relation to a person for example

and when we start to consider  
there is also ideology here  
I.e. we took in this case  
as if they penetrated into the system of ordinary human life  
we look at and see technologies  
we see the distribution  
visions of how it happens  
this is already the construction of an exact Reality  
pay attention here  
Perception  
this is already an exact guaranteed Reality  
Accurate Perception  
this is an exact guaranteed favorable Reality

nothing needs to be done, it works out <sup>yes</sup>  
thing is to understand exactly what is happening

and this concept predetermines the Norm of events  
precisely in a good context  
and understanding

and that's when you use such control  
from the point of view of Spiritual development  
Now let's make such an element  
I will work with you  
we look at the management and understand  
what's happening  
this is good governance

then it turns out that we are in the system of Perception  
we practically don't change anything  
just understanding all the external processes  
we create Eternity  
because we act as God does  
He also understands naturally  
it turns out that we work in sync

so let's work through understanding  
where technology is expressed in that  
what do you begin to perceive  
elements of communication of the world  
Well as if from an analytical point of view

I will work with you

It is advisable to set your own goals  
in the form of understanding the process too  
task as understanding of the process

and so let 's say this in addition  
to embrace another reality  
when a person, <sup>for example,</sup> is there in a dream, he is sleeping  
what does he <sup>understand</sup> then?  
he's resting or somehow distracted, he's watching TV there

it means that the processes are natural  
and here to make a concentrated effort  
it turns out to be Macrocontrol

because at the moment of understanding  
a person actually takes on the solution of the World's issues  
generally speaking about myself

why am i saying  
here is every person  
should be able to save the whole world there  
this is normal this is the primary task

as we looked today  
everything is built on the structure of Eternity  
then the task of Macrosalvation  
this is a task, well, as an element of the action in general  
ie in this situation a person simply finds himself

and this is the task of understanding  
this is still a very strong concentration in management

well, some kind of concentration of all the realities of the World  
which is expressed  
just in the ordinary human perception

ie this is the grain of the Spirit, yes  
which is located  
in the system of external Perception  
in events  
it seems to hold all the structures of the World on itself

strong spirit yes  
strong vision  
strong spiritual action

and it turns out that we are thus strengthening  
ie technologically improving the Spirit  
to the level of solving any situations there  
we are just coming to that  
what is on the Spiritual level  
we always understand that we will overcome  
any situation is in any case negative

because the grain of the Spirit is in the external system  
scans as if information of the future  
in addition, this is the construction of the future, yes  
as I said, there is a lot of work being done there

and almost instant signal

man understands the internal structure of the Spirit  
ie if we don't lose this thread  
at least we are considering it  
in some kind of complex critical situations  
there for example there are other people situations  
when there is a need to save it is better to  
we need to get to the point so that this doesn't happen, yes  
so that a person doesn't even encounter it  
some level of problems

or we are considering it for ourselves  
some position of instantaneous shift of events  
then this is the point that allows you to work  
absolutely clearly in the control space  
this is the Spiritual line of vision  
and allows you to build events like this  
what to take into account, for example, there are construction details  
there are some personal levels there

consider  
why did this or that event ever happen  
ie to consider the details  
from the point of view of what is happening there now, for example  
well, some situation it becomes like that  
what we see there is constant improvement yes  
More and more people are engaged in Eternal Development technologies

you can constantly receive it there  
level of improvements, etc.

well, in general in Eternal development  
It should get better each time  
here there is such a positional control system

this should at least be done  
to a person

and here the question of detail arises  
why did negative events happen at some point in time  
what is the reason  
when you have more strength, well, let's call it "strength"  
but in reality there is technology and knowledge  
so we need to film what happened there too  
ie to introduce into the Norm yes

ie you end up shifting all the time into your future

the problem that needed to be solved was in the past  
as you saw it

if you got anything there  
Well, the consequences of the actions are negative.  
they need to be leveled out  
your action to the Norm at that time

for God originally created man to live forever  
not injured etc. happy there *yes*

for example, it turns out based on this  
we are *like well*, "forced" if such a word can be used  
since we are following the technology  
bring all this to the same level

so we have periodically in the future  
some echoes *as if from the past*  
Well, here is a concept that exists again  
there in the theory of "karma"  
that some situation is being thrown out  
we have to overcome it there, *let's assume Yes*

maybe to a lesser extent  
it is being put into control there in the future

and so that in the design of future events  
the past ones, *for example*, were somehow negative  
Well, maybe not exactly negative  
there may be a situation of knowledge there  
they are not necessarily negative

perhaps the person didn't have any negativity  
but he will want to reconsider *something*  
turning to the past

from the point of view of Spiritual vision  
This is a special technology

The spirit seeing The spirit maturing there  
these are future events

pay attention here  
that the Spirit perceives structure to a greater extent  
there is a rapid development of future events  
this is exactly the kind of intensive development

and a favorable one at that

and now if we begin the Spiritual outlook  
direct to the structure of the past  
then this is a memory there For example Yes

let's assume some concepts are introduced there  
what talk about that  
that we must then in a special way  
how to orient them how to send them away yes  
here is the structure

this is where the reference happens  
no spiritual message, so to speak, even

ie there is a spiritual message  
we took it, sent it, forwarded it there  
into the structure of the past

and he comes back from there  
as if updated and with new knowledge  
from the same event

but that means he is somewhere in the past  
drew the structure of the future

ie we begin to see  
distribution structure of the Spiritual level of management

well let's say the emotional level  
if I may express myself this way I think  
Your spirit

ie Spirit as a component of personality  
and in such a way that you can see  
the structure of his condition  
Well For example there is something like that  
that it refers to a person's emotional state

but the Spirit and the bearer of emotions  
for example, you can say about the physical body specifically  
there about organs about movement

the same can be said about the Spirit  
well and about the Soul  
about any other Reality

and it turns out that we are working with Spiritual vision  
and into the past and into the future  
and it is mainly the glow that goes into the future  
of this spiritual vision  
process, well, some level of action

we see that the physical body  
is actually located  
at the level of well so let's say it's enough, in general, you can say it like that  
as a comfortable level of action

ie so that the action is comfortable and endless  
not tiring a person necessary for a person  
so that there is an element of necessity for a person  
of its action  
well, except for some necessary actions  
can still analyze, for example  
his personal action was so necessary

not because it is needed in the case even  
but for him personally  
his soul is there  
his personality

and so that there is harmonization  
any action  
but this is still the technology of Eternal development  
from what the person is going through there  
thinks that something is not needed, something is wrong  
some disproportions and imbalances do arise  
and instability in management yes  
instability may be there in the following actions

here is an element of developing absolute stability  
like God  
Everything is stable with him  
but he also empathizes there  
He can also think, experience and perceive.  
how is any other person

it turns out that if we consider  
this is exactly the concept  
what is in the action itself  
we must clearly express exactly that  
that through the Spiritual aspect we must have

basically just an ordinary human personality  
and such that

and at such a level  
which is understandable to absolutely everyone  
this level of Perception should be like this

ie the level of action of the Spirit  
provides structure for the individual's actions  
by analogy with the fact that it provides such an action  
as God does  
in a normal situation  
God does the same as any other person  
and this lack of distinction  
this is a system of transmission of Eternal knowledge in general  
even from an idea just from an idea

For example there the man set the task as  
simply the mental task of Eternal development  
and this is precisely the intellectual task  
he just remembers her yes For example  
or I once installed it there and solved it there  
for example, I used my technology

and then in a normal situation  
this idea can be quickly transmitted to all people  
in that case, as quickly as possible  
although in general it will always be transmitted  
to all people  
from such a person

but that's exactly when he understands  
what is the normal state of people  
This is, generally speaking, completely unique  
same condition as well how shall we take it  
to some unusual ones  
to some kind of enlightened states

and it's at this level when he sees people like that  
what is there, well, let's say, you can perceive it that way  
that these are some kind of tense strings of Reality, yes  
intense, highly spiritual, bright Reality

every person he is a bright personality he is unique  
and by the way, here's about the controls  
when it comes to, for example, the resurrection of a person

or all people  
it is the level of brightness of personality  
that each personality has there  
such a personal one  
such a unique Macro-brightness for the whole world, so to speak

this is what gives you the opportunity to see  
what is there for example there is a level of universal resurrection  
nevertheless, it singles out each individual separately  
in this kind of simultaneous action

and then it is clear that someone from these levels  
can come earlier yes  
someone is resurrected early  
nevertheless, this is a process of resurrection universal  
as a sign of the process of resurrection  
it turns out that if we start acting this way  
even there are those who were resurrected at different times  
or some positive actions of people  
which were made at different times

resurrection factor as a level of positivism for example Yes  
so they are uniting  
in the structure of such a brightly expressed action

then we see that this is happening  
where is God  
as if in fact it is God's work God's work  
ie God did it

and here is our coincidence  
well, it 's just that when a person does something  
coincidence of our work  
For example there is every member of the DRUGG party  
by task  
there is not a party member there but one who wants to live forever  
it's like a coincidence of all these elements  
if these are party members, he just gets it done faster there  
the technology is always the same

and it's like, well , sort of like  
it turns out to be like political classes that a person is obliged to  
there is a routine study  
That's why he quickly took it and learned it  
became the Ever-Living One there, became able to resurrect there, etc.

when we start talking  
about individuals  
these people still have such knowledge  
and the ability to do so  
so that their action would also be Divine  
here in Thinking, *yes*, to be able to transmit information

ie the method of transmitting information  
and this is again Spiritual vision  
Spiritual vision as a means of transmitting information

then we get  
that this is integrated  
the integrated value is actually  
this is God's work, ie God Himself did it

and that's when we come to this  
that any creative  
there is a normal human condition  
this is the action of God himself  
then understanding becomes universal  
as if for each local action

on the one hand, complete independence of the individual  
because man did it  
at the level of control of coincidences with the Action of God

i.e. God always teaches  
and any human action is always free

this is integration that leads to understanding  
to a precise understanding of the process

and as soon as we fix this precise understanding  
we see  
that with any form of Thinking  
at any level of information *yes*  
this means that a person can always find a solution for himself  
precisely for the Infinite Eternal development  
there as if by myself  
but often first of all he thinks about others, that is,

and here it turns out  
what is the first priority *as it were* what is the action  
directed by others  
as I showed according to God's task

it is precisely by first setting the task before others  
You  
well, given the uniqueness of a person's personality  
He did self-recreation  
God

it turns out that based on this  
means action for others  
it is precisely the general action <sup>yes</sup>  
the concept of "universal Eternal life"  
this is a technological element  
which relates specifically to Spiritual vision  
exactly the one that transforms the World  
into the structure of precisely Eternal development

where is Eternal life  
and all creative processes are absolutely recoverable

ie it is also universal  
and in general it often happens initially  
it is a single level of resurrection  
this is the restoration of all creative elements  
in society as such

all creative ideas begin to be realized  
it is also a level of complete personal freedom  
for their implementation in the general, *as it were*, global development  
throughout the history of mankind

and it turns out that then we see  
all the macro-creative ideas of God  
which passed through each individual personality

and since the level of equality exists  
then they equalize these systems

ie the ideas that were brought up there  
to the system of Eternal development  
they become like this  
that any other idea of any other person  
she has the same status

and here is such a combination of ideas  
at the level of Divine Thinking  
at the level of movement according to God's task  
gives a calm, *let 's say* systematic

well, it's completely secured, so to speak, with guarantees  
ordinary life of a person there

this is exactly the Eternal development of man

ie in the system of the ordinary World ie  
well, without feeling any special sensations there  
just going about my normal life  
man is eternal

for this he needs yes  
periodically show this spiritual vision  
and I even say it quite often  
periodic manifestation  
in some special moments

God doesn't create certain elements for nothing.  
but apart from the negative ones of course or the sharply negative ones  
God does not create everything in the first place  
that would infringe on human interests there  
here it is more precisely the task of the person

but it is precisely by showing this kind of vision  
I think it can be achieved  
already as if such a dynamic confidence  
that man has Eternal development

it is already possible to achieve that  
so that a person having such a state of Spirit  
knew and understood that he was completely  
well, in general, in this state he is Eternal

he has all the technology  
for complete restoration of any matter  
there is not only yourself or someone close to you  
everyone in general

and then we already have  
based on individual freedom means  
this is precisely the Eternal development of man  
and in such a completely ordinary understanding of this World

well, that is, technologically there are two or three impulses per day  
according to my understanding, either in a month or in 10 years, it depends on  
who you ask  
exactly like these according to Eternal development

and that's all

and Eternal development is guaranteed there  
not only a person but all people

This is where it is important to be able to see  
what does this technology look like  
as a technology that is inextricably linked  
with the normal state of a person

Well, we need guarantees  
that in the normal state, ie in any state  
Eternal Man

and already translating, as it were, and expanding this technology  
for any state and as if bringing an explanation  
that's it  
we already have it then  
what a person really overcomes  
any situation  
and indeed he is Eternal because he

Well, first of all, it's better not to allow it  
some kind of problem  
but he is convinced of it  
because he was clearly faced with it  
what is he overcame  
he has experience and he knows that he will overcome

this is the main characteristic  
generally speaking, Eternal development  
when there is no task of any checks there  
there won't be any checks anyway  
Well, a person can be there for a billion years  
as I have already said there many times  
live through  
and what next yes

this is exactly what we need confidence for  
what a person in a normal situation guarantees  
Eternal life  
to yourself and others  
and Eternal development

and this is what I consider a system

very much so, such unambiguous guarantees  
that with the development of Spiritual vision  
the structure there, let's say, external, so to speak  
internal control system  
even the inner reality  
We have such guarantees

This is where I end today's seminar.

Thank you very much for your attention
