

GRIGORY GRABOVOY
The Teaching about God
The Action of God in Infinity
20.03.2004

Hello again
The topic of today's seminar
this is my Teaching about God
The Action of God in Infinity

when I talk about this topic of the seminar
then first of all I foresee that
what for God
Action in Infinite Magnitude
it's the same
as well as Action in finite magnitude

because the universalism of God's Action
that's what it consists of
what is it for Him
what to do in Infinity
or that in some finite system
it's practically the same thing

therefore, based on this
when we learn, for example, to see a given Action
it is clear that a person acting, for example, within the limits of his body, yes
in relation to even any cell
can create an Infinite status for this cell
i.e. practically create
Infinite time and space
development of this cell

if he does it
so he stays alive
only because there is cell action

but here we are primarily considering
and Spiritual status of personality development
so it turns out that when it accumulates in a cell
for example Spiritual status
then we see the Infinite development of the cell
and the Infinite Structure of Cell Action

i.e. in this case

The spirit is as if placed by the Consciousness of man
in a cage

gives the status of Infinite cell development
but this is just a status

in order for the status
translate for example into the structure of Consciousness
and get real Infinite development
the cell needs to organize the whole organism

because well, on a logical level
the cell is as if outside the organism
Infinite time cannot exist
and therefore it turns out that logically it is so
what if there is a cell and only one
then it turns out that the organism exists

in this case we are considering that logical sphere
where we mean that the cell exists
in the body's norm

but when we look at
for example Spiritual status of a person for example
why consider events for example
Well let's assume there is some kind of Infinite Life there
for a person
when a person well let's assume I solved a number of problems there , yes
and he thinks that the following tasks
are as if in his own Eternity

i.e. here is the status of Infinity and Eternity
this is actually a different status
because for God
Eternity is a created structure

keep this in mind
it's a very clear structure
for the Perception of God
His logic is arranged this way
that Eternity is, in general, a created system of Reality
and it is located as if in the external environment
well, as in the system of His Perception

i.e. a person looks at the World
for him it is also the external environment

also for God Eternity is a created construct
but Action in Infinity is a system
that here you can teach a person to act
practically infinite time

i.e. you need to look here
what is methodology
and what is a kind of fixed status of development , so to speak Yes

and it turns out that by comparing these structures
for God
and for a person
we see that the next element of action
here is one that a person undertakes, for example
to create the next element of action in Infinity
this is what he himself understands his own Eternity
in any local event

i.e. even if we assume some event
which does not suit a person at the moment
then he must practically from the point of view of God's Action
learn to make your next development Infinite

and secondly he must understand
that he is Eternal
and therefore it turns out that in any case
any of his events any event
this event is aimed at Eternal development

and therefore a person wants it or does not want it
in reality it still develops in Infinite time
and develops to live in Infinite space
i.e. to live infinitely

so when we look at it like this
structure of own development
then we see what happens
we can practically say for sure
that any event so to speak well, from external Reality, perhaps
or from the inner level of Perception
it means the event that a person encounters
under no circumstances does it concern the restrictions of his life

i.e. any event for a person is like this in any case
that this event does not concern the status of the Eternal development of man

just like for God
Eternity is a created quantity
for a person it is a given value from God
and we get this value
as a rigid structure of what God has already created

and here is the Action of God in Infinity
this casting is obtained by the Eternal construction

in fact, in the structure of human development, for example

and when a person sees this
he understands how God introduced the structure of Eternity
in his own development

when he sees it and understands it
then some processes
related , for example, to organ restoration
with the development of some actions
these processes are generally quite unambiguous and simple

when you understand the process
it becomes quite simple for you
for example, to understand what to do next
i.e. when some process is clear
naturally the next action is logically clear

i.e. a person if he is driving a car
overcomes some crossroads
he understands where to go next
because his action was obviously clear to him
and then we know what to do

is brought up in exactly the same way, in fact
the logic of a person acting
towards Eternal development

considering the Action of God acting
as in relation to Eternity, for example
and in relation to Infinity
in general and in relation to the final value
equally
i.e. when it is clear that God acts practically the same way
in relation to any system

then we see that in order to achieve

for example some kind of there Well in general so to speak, of a developed size
and let's say that the magnitude is finite but infinitely developed
we can define the Action of God in this way
what if we consider
for example, some final action of a person
related well there with a hand movement
or an element of Thinking for example yes

let's assume that thought is considered
this is one thought, maybe
i.e. you can highlight a fragment of thought
and say that the idea is that it is, so to speak, final

what can we think of
some one specific phenomenon

and when we consider this phenomenon, for example,
as Thinking
then that's exactly how we say the end of thought
this is what comes next

i.e. what was the idea for?
from God's point of view this is the next action
i.e. God gives any action in this way
what the next action is

then it turns out quite clear
what to give the status of Infinity in the final action
this is the creation of a certain Reality
for the next action

i.e. ensuring the action of the following
it is not necessarily a future action
this action can be in the current time
but the main thing is that it is next

and it turns out that when you consider
development status thus
then you need to create some kind of external space
in relation to action

i.e. it is necessary to consider first of all
yourself and how to do the action
aimed at identifying
own action status
i.e. to see how it happens in general
your personal action

i.e. what do you work as ?

for example with your Soul

In Spirit

or Consciousness

and identifying this element

allows you to create space around

i.e. in fact you are acting in the same way

how does god work in infinity

you reveal, as it were, the Eternal external space

i.e. the element of identification is exactly like that

what is outer space

in relation to , for example, the impulse of action

this space must have the status of Eternity

i.e. here's how to determine, for example

that this status is the status of Eternity

and for this you just need to select

in a fragment of external space

your own image

or your own level but Eternal

i.e. you can understand Eternity

only by its Eternal level of Perception

and when you see

your own level of Eternity

then you immediately understand

that you have identified the structure of practical management

where are you in Eternal development

i.e. you create yourself as Eternal

i.e. you are Eternal yes

Eternal man yes

or Eternal personality

and when you look at it further

then any level of some kind of problem

For example there in the body

or any level of problem in events

This level is quite easy to solve

in what sense

that you can only see by looking at yourself

in this system of Eternity

as if external to the event
make your health Norm

i.e. for this you just need to concentrate in general
or just consider it in your Perception
the element that needs to be restored

then you can see
that there are quite a lot of concepts in this life
already generally formed concepts

i.e. if you act, for example, in the current time
then many of your events
can touch upon quite distant layers of the past

example, to cure some disease now
you can turn it this way
as if the spectrum of events of their personal yes

at your personal level of organizing the World
that in the past a lot of some events will emerge around you
in general, you can say that there are such
that you had not noticed before
although you, let's assume, maybe, so to speak, did not pay attention
but on the other hand this type of events
you can just form it like this

as a control you can do this action
i.e. to make management aimed at that
that you are forming precisely in the external spectrum
in the structure of Eternity
some events
you start in the physical world
to identify a random variable

i.e. some events that seem random
there is a meeting with an old friend
or some very special actions
there is a certain timbre of Eternal development here

i.e. the structure of Eternity is determined by that
that sometimes you meet a person
well, just meeting, yes like an ordinary person
but sometimes you feel
that there is a completely different perspective of events here

and when you start to decipher it

that's exactly the glow of Eternity, yes
what is behind your impulse of events

it turns out that the geometric value of these actions
it is very simple
there is an action , for example, by the Spirit and Soul or Consciousness
here is a specific optical action
that which is outside the action where you are identified
in the structure of one's own Eternal development
simple optics

and when the next level comes to you
not necessarily a person
it could be some other event
but first of all it is seen in a person
in the next person who has this spark of Eternity
carrying the spark of Eternity
but to you
and those who follow the path exactly that way
which is called, so to speak, God

i.e. the path given to him by God
you see his path to Eternity

when you perceive it
you perceive on a deep Spiritual aspect
i.e. this person is for you, for example I like it there
you are spiritually close immediately
although this may be often
sometimes a stranger by the way

i.e. this level is like an external level of recognition
that a person perceives correctly
the structure of Eternity

and then it turns out that when you find
Well, let's say such a system of adaptation to action
such a system of the following development
you see that this is all that follows in life

i.e. God created man for that
so that all the following is ensured
the next level of development of God Himself
next level of action

and when you are on this point of view for example God

come out
then it turns out that in this value ^{yes}
Action of God
The Infinite level is a deeply Spiritual level
for a person

that is why the Spirit of man is Infinite
because the spiritual level of a person is deep
creates events

A spiritual person is a highly creative person
creates complex , multidimensional events
these are works of art ^{yes}
maybe it's some kind of computer program, etc.

and when you start analyzing here
structure of the next action
for ^{example}, to get some kind of glow there
enter the structure of managing clairvoyance
Quite often enough to bring out ^{well} as if some kind of aura
i.e. to create a glow around the head
and you see the structure of external events
towards you

then you see all future events

pay attention here
to this peculiar formula, ^{as it were, yes}
expressions of thought
it is when you see yourself from the outside
in this element ^{for example} the glow of Eternity ^{yes}
some kind of halo ^{over} your head
then you see your future events
but where do you see
deep in your Soul
where you can control

it turns out that deep in the Soul there is
often the only level of development of events

God also perceives many situations in the same way
only in a single level
why many events
are being implemented in a very concrete way
as a rule, these are favorable events

and when you look for example
why are favorable events like background events yes
some favorable situations happen, well and good

but from the point of view of the organization of the World
any event occurs as a system of equal actions

and that's why it turns out
that basically the world is arranged in a favorable way
i.e. a lot of favorable information specifically about the Norms let's say so
that is the bulk of the world's information

and it turns out that when you want, for example, to restore your health
or make some events favorable for you there
just use this array of information for everything

i.e. you see a very simple pattern
large amount of information
often it is enough to simply deduce
Well, let's say into the local control system

i.e. well in the control system
there are very simple principles
which are formally expressed in that
that the larger the array of information you use
the easier it is to get the final action
which you need

but when you consider
it's like a large array of information
so as not to be distracted, for example there
let's assume that there is some formal version of the presentation
in the form of, let's say, some formal expressions
like there are formulas
it is enough to see in yourself practically a projection
in general, these complex quantities

i.e. when you look deep inside yourself
where the action of the Soul is located yes
where your Soul writes as if with your pen
let's call this control structure
then you see what's inside yourself
you always write correctly

if anyone asks themselves this question
in general, according to the Truth, as if it were deep
is there such an action

when at the moment he thinks
that this is wrong
Human

from a logical point of view, yes, for example, this is possible
but from the point of view of action
he always acts unambiguously
one single action is the right thing yes
like, well, maybe often it's in quotes
but from the point of view of the current time
this action is being performed
it means it is conditioned
some kind of correctness of the design of the World

I mean first of all of course
creative level of action
because the level is not creative
is described by a completely different system of Reality
where we are considering exactly, well, more about that
that is the Action of God
in this case we are considering precisely the Action of God
and there is no system of non-creation there

so in this case this design
This is exactly what is being considered
what a man creates

and when can you watch it
then it is clear that there is access in principle

to ensure the development of this design
it is unlimited
the further you enter the system of creation
the more sustainable your own development

and it turns out that God created
it is the construction of the Infinite World
and finite elements
equally
in order to ensure endless development
as Infinite quantity
from the point of view of human perception
i.e. laid down the technologies
in any system of human development

i.e. a person can perceive in this way

single access element
extremely careful here
Here I showed exactly that
that the only action of man
the only action of God
match
precisely in the Macro-creative Infinite sense

those. here is the Macro Rescue system
this is a system that is well
as if a generator for any subsequent action
to create the next management space
but at the expense of itself, so to speak
due to the system of collective Consciousness

when the collective Consciousness
or the Consciousness of all people
the will of all people is concentrated
we get a kind of optical effect already
on the Spiritual structure of man

i.e. the human spirit is united yes
with the Spirit of another person
there is such a concept as "unification of the Spirit"

and then it turns out
that this intersection, i.e. cohesion
draws a clear structure for example there are enterprises there
after all, an enterprise is the work of an enterprise
this is also a kind of cohesion
teamwork or functioning
generally speaking, social processes on Earth
these are also elements of cohesion

and if among these elements arise
as if some external ones
maybe even so to say destructive systems
and sometimes just restorative systems
it turns out that we can quite easily see it here
what is such a concept as "destruction"
this is a concept coming from outside
from the system well for example, which has not been studied
the process there of Eternal development yes

and the desire to study
Well let's assume if we take it there
let's say, for example, a kitten was born

and there he is still, as it were, very small
it's kind of hitting the corners
he doesn't know how to navigate yeah
in the system of the physical World

the same thing when a person
I haven't studied the system for example yes Eternal development
then it can, as it were, carry some kind of destruction
but in reality it is simply a lack of knowledge

when you want to present these levels of knowledge to him
the same way you do with a kitten
you for example there you can pet him yes
or direct it to the path there with your own hand

for example, you can also consider
Well as if the question of learning anything there in the physical World

but for God
for God the process is for example a person
and the process of, for example, the kitten's actions
Generally speaking, it's the same process

i.e. God is equally suitable
such as there to the animal and to the person
in principle, God reacts the same way
on Himself

and it turns out that when you, for example, want to understand
does this process of Perception of God happen
then there exists, so to speak, an instantaneous Infinite quantity
which unites all phenomena of Reality
Well as if some kind of whirlwind and such a super-fast one

and here is this whirlwind
this is the organization of life in Infinite development

i.e. for a person it is perceived
like some kind of powerful spiral
and if we take
we enter this spiral at any point yes
we can open and unpack the system
America is visible there, for example yes Russia
it is possible to make prognoses

in general any system can be recognized this way
due to the fact that we are in this kind of vortex system of life development

exactly why vortex
because it is this system it shows that
that in general there are some undefined systems in development
that's why it looks exactly like a vortex system
i.e. the system can be random variables including

and it turns out that the random variable
this is God's organization of the elements of development
both man and God's actions
precisely at the Infinite level of development
i.e. chance is an element of the Infinity of God's Action
i.e. projective element

we see a random variable
because God acts simultaneously
and of course
and it turns out to be Infinite
in any Action element
that's why we see a random variable

but if we just ask the question here
and how, for example, can we isolate this random variable ?
and how to understand its next development

Well for example, a lot of planes take off
as among all the planes
highlight the one where there are potential problems
and still have time to react yes
i.e. to give some information

for example then it turns out
Well, if there is a contract there are no problems.
according to the agreement, yes, some level of aircraft is diagnosed
controlling clairvoyance develops there
and some preliminary conclusion is made

but here is precisely the revelation
as if there were structures of random variables there
even under the terms of the contract
consists in the fact that
what do you look at first
and how does God see any event in any way?
i.e. there is basically no other option

you just need to see that situation
exactly which will happen yes or may happen

i.e. it is expressed in that
that it is precisely the discreteness of the final action
is transferred to Infinite magnitude
and it's very easy to see
as if on a sphere you can place certain points

here is the branching of the event system
God set the event and shows it to you
you can kind of implement it
do you know what this event is
you either go for it
and then the next level of action unfolds
or you can modify it
if you for example Well, you have a remote control system.

and any person can do this in general
that having this system
well it will become a reality
he has the fact that he is, in many ways , even one could say so
somewhere you can often apply this term to yourself
how "pleasant" yes so to speak, without reacting to any systems
so he kind of spares himself and considers
that there is no need to react to any systems
and it turns out that here he kind of allows it
some events that are unnecessary to him

i.e. in essence, a person controls the system in essence
but for a number of reasons he doesn't do anything yes
or does not have time to do it on a physical level
for example , he understands at the controls that this needs to be done
i.e. he
there are harbingers for example there are diseases there
it would be possible to get treatment
but at this moment he is busy with something he is doing
he just doesn't have time
he understands that he can get sick
however, there is a lot there yes, some reasons
he just doesn't have time

and ultimately seeing God's care for him
he sees that this is like a minor illness
and doesn't pay attention yes For example

but if we make an element of prevention here
i.e. take and saturate with impulse at the desired point
Well, there 's a train going along the rails
just collapse the arrow _{yes}
another level arises next

here is the final action _{yes}
It would seem that there is a system of problems
how to get out _{yes}
if there is a nuclear power plant explosion being prepared there
Well, let's say some terrorists
then it turns out that this is already a _{generally} prepared _{system}

and if, _{for example}, there are no means of influence there
i.e. the event is undefined
it turns out the only problem is that
to save the terrorists
somehow introduce information that they do not die
then _{the} nuclear power plant is not destroyed

how to make it so that they _{do} n't blow up the nuclear power plant
this means they need to be given the structure of Eternal development
their plan of events will be disbanded
and naturally they won't have the opportunity
as if it turns out that at the management level it can explode
because they just have a change of events here
and _{in general} , in many ways, even the paradigm _{of Perception} will change
other tasks will arise
and then it is quite possible that they will understand
that the nuclear power plant will still affect them too
it is still a global system of emission _{of} radiation, etc.

and in many ways why nuclear power plants don't blow up _{yes}
in the presence of a large number of nuclear power plants
because it concerns the same possible ones , so _{to speak}
initiators of the explosion _{yes}

and that's why this is the consequence
acting from the system itself, _{as it were}, leads to that
well , basically, basically
Now let's say the nuclear power plant is fine from this point of view

and so that, _{for example}, there would still be no nuclear power plants
and there were simply some other systems _{or something}
more environmentally friendly

for this you just need to do _{everything} to develop _{there}

other energy systems for example Yes
but at the same time, we must keep in mind
that any level is possible
for example, the level of influence on a person
yes, from the point of view of Eternal development there in the Macro sense
if there is a nuclear power plant explosion there it leads to that
that millions of people could be affected
or there for example, there may be an impact at all
to the whole world as a whole

then it turns out
that God creates the elements of Infinite development
somehow anyway
makes these developmental elements temporary
but He does it for a reason
why did god make it so that nuclear power plants exist yes

and from the point of view of the Personality of God
here we can show that by giving Eternal development to all people
there will be no possibility to blow up the nuclear power plant
because it is the Eternal development
exactly what is going on, as it were from the point of view of the glow of Eternity
gives exactly a different spectrum of events
well the first thought is that it will affect the initiator himself , etc. yes

when we look at this position
it turns out that many seem to have such logical schemes
or random patterns they are like that
that in fact they are arranged quite rigidly
from the point of view of the Infinite, as it were, level of the World
Infinite level of world revelation
before the gaze of God

i.e. God looks at the World
He reveals it at this moment.

if for example human vision works the same way
i.e. you are looking at some process
and you regulate it immediately
you look at the person there you heal yes

then this level of view is the level of action yes
it will also be practically infinite
if you can direct your action
to the Infinite Level of God's Action

i.e. you should see that

what God sends you in advance

in the form of some, ^{let's assume,} elements of the following development
and see as an Infinite quantity
for God and for you
she is the same in Perception
and God
and in your Perception

i.e. when you begin to catch and see this element
you understand that any element of the World
has the ability and in fact not just the ability
he is the Eternal
especially a person

i.e. you see the Eternity of man

then you see that the other person is very stable
i.e. for this you may need somewhere
maybe he could even use a little help in some way
and then he gets better ^{there}
or is he, ^{for example there} he helps others

this is the technology of dissemination of my Teaching
it just consists of that
that when the revelation of the Action of God in Infinity
you see the Infinity of man
then the technology transfer is happening because
that you realized this phenomenon

only the awareness of this phenomenon
allows others to impart that knowledge
that they will begin to spread my Teaching
already at the level of specific actions

here, right here, there is a clear status of that
what is the management level
the level of your Consciousness
and then the action begins
at the level ^{it seems} to be just an application
i.e. at the level of actually that
that a person simply implements, ^{for example,} your understanding

this is how god works
how does the work of His Consciousness take place in this regard
His Perception
and the person understands and acts

after all, God often does not say ^{yes}
you must understand it yourself

especially if you are somewhere in the forest
and you are at that level
what don't you say on the phone
and just walking alone

then it turns out you have to make decisions yourself
even if there are a lot of people
you still make essentially independent decisions

and it turns out that when you consider ^{it this way}
^{what about the control system ?}
it turns out that God gives you almost ^{as if to Himself}
knowledge
i.e. the finite knowledge of the Infinite status

the only difference is that God understands
all Infinite status of knowledge
and you, ^{for example,} can understand immediately
if you see how God Himself works
how does he even perceive it
or not want to be ^{there well,} i.e. you are busy

in principle, there is ^{nothing} else here
here is the concept that a person ^{there} cannot understand
or is he ^{there} ^{as if} he has no abilities
there is no such concept here at all

because the element is very simple
Infinite action and finite
here is the border between the two systems
this is, ^{in general,} the implementation of human actions

and when you look at this border
this is the same subject of Thinking ^{yes}
it is the Infinite quantity expressed in thought
how to turn an object into a thought
how does a person even think?
about some distant objects
this is how this process happens if you think about it

it turns out that he is the one who is unfolding
some element of the world ^{yes}

at some level of your space of Perception

just like God does
the difference is
what God immediately does Reality
and can in principle do the same as a person

i.e. it is not necessary to spin it
physical status of Reality
To God

so it turns out that God is acting here
and as a person
and like God
in terms of Perception and Infinite space

then it turns out that the action is actually
only the Infinite is possible
because any next action and any thought
that's how they are designed
that thought contacts
with some infinite quantities
with space with time
and in any case if you could think at least once
you have entered the Infinite Contact Environment
then you have already created for yourself
this is the space of the next Infinite system of development
you just have to find it
in his system of Thinking

and that's all
you stand on this space and go
Well for example if you remember
as you walk across some bridge
then you first imagine it in your mind
and then you go across this bridge
and what difference does it make where, for example Well or what? there is data about
that
that it was not you who deployed this bridge at this moment

for example, if you take and install a digital camera
and you, let's suppose, thought
if also with the digital red spectrum shaded there
as if at a lower frequency level
then it turns out that when you think
the bridge becomes lighter

when you want to walk on it
this objective factor can even be recorded

i.e. you kind of increase the structure of Reality
of this bridge
although at this moment they may be thinking
Well there are a lot of people there yes

and it turns out to be distinguished
your own fragment of Thinking is very simple

take at the same time to remove the bridge
but if a lot of people walk
then it's not very differentiated
if well, like approximately a constant number of people
how a platoon walks back and forth across the bridge
you can highlight your own fragment of glow
objectively at the level of sorts yes digital technologies

it turns out that your element of presence
at this level
is perceived by you through means
well, some kind of objective control

let's think about how these tools are arranged
why do they even allow it
as if to reflect the element of Thinking
Yes, God gives external technical systems, as it were.
to understand them

and when you start to analyze it
you see how God creates a technical system
i.e. what He wanted to see as technology, for example Yes
in your next development

and then it is possible to build technical systems like this
which would have an Eternal development status
i.e. the Eternals would be together with people

Well for example, technically this is expressed in the fact that
that they carry the structure of Eternal action
there the recording contains information on Eternal development
sound recording etc.

and when you start to move on to structure
Well in general it's quite simple

Eternal system

that means for example there is a voice recorder there, it is protected
and it can't be broken for example Yes

thus setting the task
moving to some technological cycles
in Reality

there how to make the production of the plant there be like that
that nothing can be destroyed yes
you can only develop it

Well kind of an ideal task in general

from the point of view of yes For example there are physicists and mathematicians

but nevertheless, if we pose the problem this way
and see how God gives knowledge
on this process
it turns out that all processes must be managed
creative thinking of man

and then it's quite simple
a man working there in production
Well, he doesn't walk around the building with a sledgehammer and hit it
properly
so it turns out that at least there is no problem anymore
and so on and so forth.

but when all the processes penetrate into the essence of the phenomenon, yes
it's the same as I said
where is the data that it was not you who opened this bridge
at the moment yes

then there is data here
that a person reveals this production
at the moment
when he understands with his soul
as if the Soul of production

then it turns out that there is a Soul
or so to say, what can be called the Soul
in the structure of external information objects
i.e. the external space is spiritualized
there is a Soul as if of an external system
Well , there was Soul of the Forest, there were such concepts
and they really exist, pride , etc.

i.e. especially in ancient civilizations
these elements have been very well researched
and they were able to cover great distances
having a system of control of external Reality there

when you log in to this system for example
now the control there is remote
some technical system
it is often extremely necessary in general
because to make sure that, for example, some satellite doesn't fall
on which nuclear safety depends there
Often a person needs to do it himself

and then it turns out that he should control the satellite
almost the same way he runs it there let's assume with a hand movement

and in this case, penetration into the system
where you are practically inseparable from the outside world

i.e. the external world is a continuation of you
and you can make the management very specific
that it is just as easy to perform an action
for example how to make a hand movement there
and take a switch there with your hand and turn it off

it is also possible, for example, using the same principle
manage external Reality
i.e. technology in today's lecture
it allows you to see the control system like this
that the World becomes inseparable
i.e. the external system of events is an inseparable system

i.e. I just did that
that transferred control to the level of Consciousness
into the structure of an external event

what I first highlighted was the spectrum of action yes
your personal event
and construction of an external event
this is again your action that turns out
but in the structure of Infinity
where you and the world are inseparable

it turns out for a person
build the Eternal structure
it's easy to find a control system
where you and the world are inseparable

logically it is very easy to do this
a very small amount of information is taken
and a very large mass
and the small mass is simply lost ^{yes}
there is no ^{such thing as it}
from the point of view of external perception

why does god see everyone almost the same ^{yes}
because there is a huge level of information
and information of each
she is practically at His level of Perception
i.e. He formed his own level in this way

and then He can naturally help everyone
He is inseparable from them.

and then when you do the same
then build an external system
a very specific practical example

make it so that some external satellite
accidentally fall to Earth ^{there, did I?}
and there was no nuclear disaster

all you need for this is just
compress satellite information so much ^{yes}
in your Perception
so that it is insignificant in relation to you

and when you, ^{for example}, just by mental action
this information was compressed
the satellite is already controlled by you
not at the level of maybe ^{some} software blocks
but at least you can quite count
and by the way you can even follow
what is your personal action
leads to greater redundancy of this satellite

or if there is some kind of avalanche ^{yes}
make this avalanche very small
in your level of Perception towards you
i.e. compress on the Spiritual level
^{for example, into some kind of} cellular system there 's some blade of grass ^{there}
or into some crystal
into some atom of the avalanche itself

enter
and thus stop it, fix it
so that she doesn't come down from the mountains, etc.

i.e. you can do the management
in general, a simple action of sorts of optical
it turns out that this concept is closer to the mechanical concept
as an optical lever
i.e. a large optical sphere
it's just putting pressure on the little one
No problem

and when you, for example, start exploring from here
the process of the next Action of God
i.e. why does God give you knowledge like this
that they get used to it so easily
i.e. what problems are there
you take and accumulate knowledge
where is the creative search anyway ?
knowledge is acquired do management there avalanche did not descend
somewhere yes

but there is a very simple element here
and at the same time, as if complex

combination of Infinite and finite quantity
when you do here the avalanche did not come down
but where is the evidence that she had to get off somewhere

it's one thing if she's already gone
you stopped her there is a possible emergency situation
you made the control it all fixed yes
it's clear and understandable

and when it comes to
about the properties of collective Consciousness
where the Consciousness of each is manifested
and in the Consciousness of each there are those mechanisms
which I just mentioned

it means the person is constantly working
on the normalization of external Reality
constantly as if reveals the following structure of the World

then it turns out here
he just creates the Norm of this avalanche

with its seemingly unconditional level of development

i.e. it turns out that you have a structure of your own development
and it is enough to study it as God sees you
then you get more or less exactly
often a very specific development system
already my own but with God's help

i.e. well if there is a driving instructor there
wants to teach you how to drive a car faster
he tries to understand you
do you perceive reality

and it turns out that well, there are some norms, rules, etc.
but if you want to understand what He wants there Yes
enter His Consciousness look at yourself yes
through His Consciousness

You can also see the structure of your own development
looking at what God wants in general and what he wants to teach
so, in essence, He wants to teach
work in the system of collective Consciousness calmly

i.e. Laws of development of collective Consciousness
they are established by God
they are developed just as freely by man
which is also the Action of God

for the true freedom of human action
this is the Action of God in essence
why does God need man to act absolutely freely

and when you start to study this process, for example
then we get this element of Infinite Action
this is essentially an element of this
what do you find there let's say
all my relatives, friends, comrades there
all the people of the world in general
in that system how they save Reality

i.e. it is completely clear how they recreate it at all
or organize some other creative yes Worlds of construction
i.e. you can see in this action
personal status of each
as if without violating this status

i.e. you take only that information

it turns out here in this case that the other person wants to give you
You won't get any other information here

this is the level where the transmission of natural information takes place
from another person
for his Infinite action is expressed
in the final concrete impulse
i.e. here, as it were, the inverse value arises

any Infinite human action
shows you the creative impulse
for to build Infinity is creation
this is construction, this is not destruction

and it turns out that when you look like that
you can identify
looking at myself by the way
what's the difference, you can look at yourself like that too
what do you give yourself for example there to heal yourself
This is a powerful self-healing system, the most powerful

i.e. entering this space
you just look at everything as impulse
which you kind of throw away
from the Infinite proper action
and simply direct it in the structure of Consciousness
on yourself on the physical body at the desired point

and pay attention to any impulse of action
Well, this is the fastest way to restore your vision.
because you can practically see it there
as on the physical level of Reality
i.e. first as if with the eyes yes
through the eyes of the Soul, Spirit and Consciousness
there how do the eyes come out so united yes
in Human Perception

and when you start doing this action
then you can have any pragmatist orthodox there
which, for example, does not do this action
or he thinks, for example
well in this case
from the point of view of, for example, the mechanism of Eternal development
in general from the point of view of the simple Reality of life

it turns out that he is more orthodox
already at the current time
when global destruction is possible ^{yes}
the orthodox in Perception is the one
who actually works
it is in the technologies of Eternal development

because ^{well, it's} "orthodox"
this is considered ^{to be} a more canonical phase
close to the needs ^{of} the real world
or more tested
but at a more proven level
is a level that takes into account more and more connections

and in this case it turns out to be "orthodox"
This is of course such a concept
there are orthodox people ^{there} from physics ^{and} from some science
in this case I meant precisely the narrow orthodox
and if you try to convince them, ^{for example}
that such a phenomenon exists
then the easiest thing to do is to give them
implement this design yourself

let them see
^{Well how} similar it is
into a certain big drop and a small one
the big drop is the Infinite World
and a small drop
this is the level that is being transformed
this is when a person creates the Infinite World
a small drop is his personal impulse of creation
but already a concrete final thing

what is he doing at this moment
sings something, paints a picture, ^{yes} For example
or he works in production
or is he treating himself or someone else ^{there?}

or is he at all at this moment
specifically and logically sets the task of Saving the World
which by the way is clear
here at this level
Saving the World
it's just a Reality that is closer to a person
i.e. here is the Salvation of the World in this design
this is the closest thing to a person at first

and this warms his heart from the very beginning
and it turns out that in this design
the person is very clearly convinced
that through the salvation of the world
i.e. you need to do the management through yourself

and when do you do
well, even knowing this formulation of the problem once
for example, a person walked by chance
I heard a recording, for example, in some window
what needs to be done there first Saving the World
maybe he wasn't involved in technologies there, let's say Salvation
but the phrase heard still works
for all his following events
i.e. it is as if it was specifically said with the words yes
she acts

God also created words
so that the person who takes part
in the creation of words
after all, what does a person do?
he's always well there often at least
when he needs to say words
i.e. he constantly creates them

if we consider this process, for example
why does he create them
Well, the person has some things to do
but in essence he constructs
this is the local final impulse
i.e. a sound that can be considered
as an Infinite quantity in photon terms
from the point of view of physical processes
gives birth to the final word
and the final further action

i.e. influence on social processes

why social processes are structured this way
right now
and just study the sphere of Infinity
the one I was talking about
like a teardrop shape
what does Infinite Development mean

or let's call it like an hourglass

where one is as if so to speak, a conical base
more developed
i.e. asymmetrical hourglass
but time flows the same in all systems

and when you, for example, want to understand this structure
you begin to understand internally
i.e. you mentally begin
as if trying to stretch this little sphere
up to a large size

those. your Consciousness
starts working logically right away
like a large amount of sand
will flow into a small sphere
Consciousness tries to normalize the system there and then
and then there are no problems

look at your Consciousness, what is it doing?
where does the impulse come from
how is the glow going
how is it generally arranged in this design

and then you will be able to see it quite simply
in case of health problem
bringing as if extrapolatively yes to itself
how your Consciousness works
maybe there are no problems there
just adjust it a little bit somewhere
the system of the Norm of your Consciousness

and when you start thinking abstractly
that yes, it is possible that it exists
such a process of Reality
the one I just talked about
it really exists since i mentioned it
you can even say that, for example

and it turns out that
Moreover, its application is practically
leads to a specific result
so it also acts on Reality
then it exists all the more
action element

those. practice show
precisely the element of action
practice and action
and then you see what's in this hourglass
you can make different designs
at the level of Thinking

i.e. the World is formed in Thinking in this way
that you get the control system in this way
that the design of Thinking
allows you to create any World

i.e. it turns out to be enough
i.e. how to create a lot of structures
managing Thinking
and the World can be created by anyone
precisely, of course, in the creative aspect of development

it's just proven at that level
that after some amount of time
the mass of your action the mass of words as if yes, a lot of control
becomes adequate to the level
let's assume further action on the merits
i.e. you get the level of already implemented
due to the sheer amount of knowledge
management and knowledge

and therefore it is extremely important to be
at the level of control knowledge

and when you, for example , consider this process
you see that for example there I give there
some large number of lectures
I often give a lot on one topic specifically
just to increase the number
in terms of information volume
and the action will happen by itself

knowledge of the Infinite status
gives specific
this one here well like a small and teardrop shape
small action

but which in form becomes your personal event
when two forms they are balanced
logic translates your event that you need

and that's what it is
it is precisely the most powerful system of knowledge practically
where does it turn out that God, for example, creates external events, yes
He can create
as a sound form of an event
as a form of reaction to an event
and can also create events
just with your Consciousness just with your Perception

and this is precisely where the control element lies
where is Infinite Action
exactly gets to the final
and the final is realized
and it must be constructive

It is advisable to practice more on this lecture

This concludes today's seminar.

Thank you very much for your attention
