

GRIGORY GRABOVOY
The Teaching about God
Personal Task Management
07.05.2004

Hello again
the topic of my seminar today
This is my Teaching about God
Personal Task Management

when it comes to management
namely the spectrum of personal tasks
then first of all it is necessary to highlight
such a phase of management
when God is in control
It controls all tasks at the level.

and therefore when the personality, i.e. the person, sees
for example, your own task as God sees it
then it turns out to be the management of a person's personal tasks
this is an opportunity to see
for example, your tasks as God sees them

and based on this
here is the selection actually a spectrum of so to speak personal tasks
in the Macromanagement phase of general management
this is a personal task
a person first of all yes
and at the same time there is the Action of God

i.e. it is clear that any management
this is the Action of God

but if for example we assume we take
and let's assume some phase of management
distant from a person according to his personal tasks
in the future we will assume
We are now considering this phase as a phase of personal action
then we can definitely consider it
what is around this personal action
there is a world created by God
and which is being recreated or developed there
other people
other events
some other levels of information

i.e. the deeper we look, as it were
the structure of one's own Soul
reflecting external events
the more accurately we see personal tasks

as a rule, a person's range of tasks is very simple
i.e. he is a person who understands
What tasks does he have now?
But
or even let him understand exactly

but the situation is like this
that firstly the tasks can change
i.e. a person is walking down the street, the task has changed , yes
made a turn somewhere
goes into the store the task changes again

and it turns out that there are situational tasks
which also influence the fundamental tasks of a person
because he goes into the store
there is some thing in this store
but maybe it changes its control level

i.e. it's not just a thing
and some means a system of external control
let's assume it's from God's side

and at the same time God put the meaning of man's actions into it
i.e. the decision that will come from a person
i.e. the personal task is to make a decision
even in such everyday situations it would seem

so in this regard
it turns out that if a person treats another
there from some complex disease
or acts on the level of Macrosalvation
then he acts very close to God
i.e. he acts in such a way that his contact with God
it's quite straight
and his personal task actually coincides
with the task of God in essence

God made the world this way
that there is still a task of normal life for all people

and it turns out that based on this
when a person heals or saves there
he acts directly in general

and logically at this level
Generally speaking, it's even easier for him in essence
because it acts as if coherently yes
with the level of God's control
and there is a completely unambiguous level
for example there is Macro Salvation
this is also the level of God's Action

so here it is emerging
such a fairly specific plan
when you are in management
precisely personal tasks
then it turns out
what first of all is there for example as such yes
the task itself
and there is management of a range of tasks

i.e. the solution is also a problem in reality
i.e. a solution to some problem or some task
also a task one of the tasks

you can highlight the structure of the task itself
we can highlight the task of solving this problem

so personal task management
implies reaching a solution after all
exactly what a person needs
some problem
specifically for this particular person

and it turns out that when we say "for this particular one"
then here it turns out that we see generally speaking
often another person too
who would like to solve the same problem, for example

Well, for example, a person wanted to get well
any other too if there are any problems
I would like to get well, it doesn't even matter what he's sick with, yes
there is a uniformity of action
i.e. the task is distributed as logically clear
and also according to vertical, so to speak, levels of uniformity

and if we consider, say, horizontal
or some other level
where there is linearity, i.e. prolongation of the task action
it turns out that God created the World like this
what ^{does it mean} to have in the element ^{as} His information of God
as a personal factor of action

where we can highlight our
^{for example,} its own system of action
or one action

and at the same time God shows
what is the personal factor
he is so deeply individual
i.e. at any level of action
there is a depth to your Soul

and when you are ^{for example} from this level
^{for example,} move on to yourself, but ^{as if} to the physical body, ^{yes}
to yourself
then it turns out to be your Soul
almost ^{as if} he thinks at the level of problem solving

i.e. pay attention if we want
^{let's say} we ask a question
where is the thought of the Soul ^{for example} yes
how does the Soul make decisions anyway
because the Soul has complete freedom of action
just like the Spirit ^{of man} by the way
or ^{there is} the Consciousness of man

and the criterion of this action
is a solution to a personal problem
i.e. personal task
it's not really a simple control element
or the element of the World
this is some kind of matrix
around which there is practically ^{no generally} focused
certain control systems
well such
like the action of the Soul ^{for example}
as a task of the Soul ^{yes}
such ^{as} the action of the Spirit or Spiritual action

and when we start to see it

then it turns out that a personal task is the path
which God essentially gives to man
This is when a person feels a truly personal task
This is precisely the path that God gives

and it turns out that when you are on this path
you start developing, for example, your own management system
then you see that any situational actions
which arise when you highlight
it is the spectrum of personal tasks in management

this is what fundamentally concerns you
even some small nuances in management

and at the same time you can often see
what do we suppose some phrases or words
or let's assume verbal actions
they are often not of fundamental importance
because the main thing for you is to achieve control

and here it turns out that you can say different words
for example, you can perform different actions
but the structure of the personal task
She is always quite stable in terms of that
that the problem has not yet been solved
you can say different words there
different actions can be taken
but the problem is not solved
this is, let's assume, some action of the Soul by decision

here you can track it very clearly
action of the Soul
that your Soul always solves your problems

and the reverse mechanism of obtaining knowledge is very clearly visible
i.e. you see it very specifically here
how the Soul solves problems

because God is the one who has all Reality under control
He always decides something, it turns out
logically and even realistically so

therefore God decides precisely with the Soul after all
because by analogy
A person solves problems primarily with his Soul

because that's why I said "because"
because we can make analogies based on that
that the plan is like personal tasks
this is that level of management
which we understand as a need for a solution

in personal tasks, yes, there is a level
well, which kind of carries a certain level of future events
Necessarily
i.e. a person who possesses
for example, predictive capabilities
he can say for sure
anyway, one situation or another will be resolved
and there are no problems

but besides the fact that it can be said this way, it also needs to be solved

it turns out that for those who can predict
in general the situation is simpler
but in essence there are situations that are completely unambiguous
it's clear that everyone will be saved
for example, I can view the future situation
say that it is so
the only question is in what there is an individual path
every person to this Salvation

and when we start to analyze this path
then God shows that general knowledge
for general purposes, so to speak
related, for example, to the tasks of the individual
and a private and individual task
this is what God gives as a state of the Spirit

It is very important to determine this point here
task as a state of the Spirit
and the state of the Spirit solving this problem

i.e. there is always an answer to any problem
for example, if there is even some kind of mathematical problem
I can say from my own experience
I came across it there
I immediately distinguished the fraction of the answer
i.e. it is clearly visible right there on the optics
what let's say is there is a certain hemisphere
and there the answer lies, as it were, in the problem itself

the simplest elementary action

take for example yes given answer and write it down
but it requires a number of actions
to show that the subject is clear yes

but the number of actions is what it is
how a person understands the essence of this process
let's say in mathematics I had to
some special methods because of this
although the answer is clear, I did consider some methods there, yes

but this is not about mathematics
and that on a personal level the same level of decision
naturally there is yes
only in the sense that the problem is in mathematics or somewhere
it has a solution or for example it has no solution

but for a person who has practice in his own life
how exactly, as if, a whole such a guideline of action yes
it turns out that he has first of all an outline
as if in his Perception
what is it personally he as if
in the Action of God it turns out
from the point of view of the Spirit of man
This is where you need to be more careful
in this system of knowledge

i.e. perceive exactly as I say
precisely from the point of view of the Spirit

because here there is a level of control
is a dynamic quantity
Spirit
the man himself
and as if a highly spiritual person
he simply thinks that he solves problems, for example

and if we proceed from the analogy of that
how does God do it for example
then it turns out that God is Active
i.e. the one who is initially watching
precisely in Action
after all, the View of God is still the View of Action

if we consider how God perceives in general
human action

then it turns out that God perceives after all
precisely by the Look of Action

Let's imagine that God has a certain
for example, some kind of static look, yes
which, let's say, is at the level
for example one fixed Action
it is quite difficult for human perception
because God is the manifestation of all phenomena

and when you consider by analogy
your level of control over your tasks
as action control
it turns out that it's just looking at the problem
in general, it is not even advisable in essence
it is necessary to do something to take action
to optimize or something like that the solution to this problem

and here a simple code of conduct arises
at the management level

God at Work
improvements are definitely in order in terms of level
for people, the position of knowledge is first and foremost
It gives the opportunity for a person to act in the same way.

i.e. the action that leads to that
that at every level of action you learn
when approaching, for example, yes to the task
leads to that
that you have experience solving this problem
even before the task itself is achieved

i.e. it is a very simple mechanism
when you don't yet know the essence of the task as such, yes
but you can already solve it

in management this is an important level of approach to the task
because you never know, maybe the task is complicated, right?
or suddenly there is a task that requires a mandatory solution

then it turns out that you should come here
with a ready-made solution mechanism
to the formulation of the problem

and it turns out that a person has the same need
as with the action coming from God

create as in fact the governing Action of God
create a preliminary solution level for the problem
before the task itself is formed

therefore here on a personal level
a person must participate in the formation of the task
by and large, a person always participates
in forming their own tasks
and what's more, he originally
the main range of tasks actually knows

when organizing a person, it is laid down
quite clearly for his Consciousness
what should he do

in Infinite Development
it's actually an infinite amount of things to do

and when you consider
the level of , like, local tasks of some kind , well, for some period, yes
then from the point of view of Infinite tasks, naturally they are solved
here you just need to perceive
the light of precisely the Infinite tasks

that you need to solve
and it turns out the final tasks are naturally solved

so the first element of the action
it is the ease of solving the problem
from the point of view of the Infinite level of information development

and when do you receive for example
namely Infinite action
then it turns out that you can get
well, like some kind of finite value
as a quantity already initially decided

well, i.e. reflected light
from the Infinite Event Phase
if Infinite phase
this is, for example, some kind of even very large one
but the final sphere

then it turns out when you consider it at all
you are overexposing it
i.e. to look at it first, as if to perceive it, yes
to shine with your Consciousness

it turns out to be possible to see
this is also work
to be able to perceive this is also a kind of initial action

and it turns out that based on this
we may well know
for example, now acting at the management level
at the current time ^{yes}
we highlight the tasks of the whole world, so to speak, ^{yes}
and at the same time we very clearly identify it right away
what tasks are related to ours
i.e. i.e. with personal tasks of a specific person, for example

here it is clear that the tasks can be very different
i.e. we can consider your personal tasks
Now
as tasks that are generally connected with some distant ones
quite often, as if in random order
affairs
for example, there in Tyumen to improve the environmental situation

why for example should I be doing it ^{there now in} Tyumen
but when I consider the level of personal tasks
I'm starting to understand further
Why

because if I lay down the control level now
and all the participants of the seminars
at the current time now
will be able to make management in Tyumen
it is clear that in the future we can come
for example, to the level of fuel, ^{let's say}
where the resource is not consumed

i.e. this is an Infinite level of information

if we start to develop further
it is clear that some tasks have a logical nature
and some have information ^{there, for example}
in this case in Tyumen
this is how predictive systems can be set up
and see why this is so

but there are still tasks coming from God
i.e. God has the right to place before man
always generally speaking any task in essence

but as a rule He puts
and He always actually puts
achievable tasks

and when we want to understand how to solve them
these are exactly the tasks
then tasks take the form of events

i.e. all external events
like the other side of the comic
this is the revealed level of God
precisely given in the form of knowledge

i.e. if you ask the question
in general, how does God write, for example, yes, a task
as we suppose at school
then it's enough to just consider
the back side of this cone
i.e. look at these events
Well, let's assume it's the same Tyumen , but it doesn't matter
Moscow or any other city in the world
any other galaxy at all

and with all this we see
His handwriting
i.e. we begin to see
how does he even move his hand

when, despite all this, we finally
for example, there, like on a piece of paper there
there in the cage for a first grader yes
or is it not important for the tenth grade
just on a regular piece of paper
we begin to see the text of God yes
then we see that this sheet is essentially the text of God
there is some kind of event there
some forest, some action there
this is the text of God
It is simply given to us in the form of events.
and the personal task is the ability to manage these processes

and when we start for example
Well, let's assume we're moving the structure
very specific
i.e. for example, let God take and for example write yes there

that's exactly it
then there is a level
that God He really He will write
but can write by means of that
that you receive knowledge and write with your own hand

i.e. God's actions here can be anything
but they are always constructive towards you

so as not to make a mistake
we must always see the overall creativity
and the absolute creativity of God's Action
towards you

when you see this you don't even have to take it
like written, let's say, assignments , well, relatively speaking
it is enough to be there all the time
in contact with God
at the level of a deep state of the Soul

then any disease there, for example, is curable
any action is surmountable
because you always understand
that the task of the Personality of God
and your task for example
it coincides in this particular action

and when you enter into such a level of harmony
then it turns out that you have a level of your own development
which allows you
to know God
to know the Action of God

but already in logical action

i.e. you don't have to enter the Soul level, for example
there in terms of contact there is another person

The soul of another person
it is an absolutely independent value, so to speak
it is a completely independent world often
and with all this you can quite well
make correlated, so to speak, control systems
there according to Macrosalvation or according to your tasks
just like God does

there are so many different people in the world, not only people but

animals there are some information objects ^{there}
these information objects contain other sub-objects, etc.

and when we consider that
what's in the information objects
there is a level of action back to you
i.e. there is a level of , as it were, the next knowledge
towards you

then here we can clearly see that God created it this way
here is the level of freedom ^{and} system
what is the task of each system
it doesn't touch in terms of ^{there being} any opposition in reality
another task

i.e. the World is the World of free elements of Reality
not only is man absolutely free ^{there}
there must be in this world
but also any other element
must also be absolutely free
in terms of Divine manifestation of action
generally speaking, in essence

it turns out when in essence
this is when the element is generally aware
what is the principle of his freedom here
and from God
God already sees that he is free

and so it is enough ^{to} develop it
the level ^{of} development of this element
to the Vision of God ^{so to speak}
before the vision of God
for the tasks of this element ^{of} Reality

then it is clear that it can be stopped
^{for example,} an explosion in a nuclear reactor

i.e. when you see
it is precisely the creative Action of God
and direct ^{there} let's assume a nuclear reaction along this flow
this is still information
this is a specific control space
then the explosion does not occur
^{For example, there} is no nuclear bomb explosion ^{there}
including it doesn't really matter

it is possible to overcome a possible global catastrophe

and in principle overcome generally speaking
in one action
because it is still your personal task

it is the personal task of every person to do so
so that there would not even be, if possible
some local catastrophe
not to mention the global one

and so when you start translating
a circle of common control or something
in the circle of personal tasks, for example, local management
then here the question is only generally speaking of time

i.e. in fact, if you do it
very big time management yes
then of course you can get some control, let's say
which would disband
some even local disasters

but then the question arises
that's exactly it, is this task only for your personality?
and what does it look like

if this is not only your personal task
how does it look on information for example yes
then you are still actually there before God
are still obliged to give control
if you suddenly noticed this situation yes

so in order to disband the local catastrophe there
collective management is needed first and foremost
although if you work a lot
and you can personally disband
it may not necessarily be a lot
took control

and there is no local catastrophe

and if you ask the question
why do local disasters happen anyway?
or some diseases are happening there among people
which is also often no less of a problem there
or some problematic events
maybe you even know something that is not physical there

sensory of some kind or informational plan

and how can you make it so that you can do it here too
solve all problems at once

i.e. it turns out that the person is in a situation
when, in conditions of still ^{generally} possible global destruction,
a person is forced to solve problems of counteraction
i.e. it is imperative to prevent this from happening
happens quite often ^{in general}
like a strong pressure of information ^{or something}
a lot of management needs to be spent
on this factor of Reality

but when we talk
^{Well,} the concept of "spending" is a relative thing.
nevertheless, it is still an action
because in this action you are still mastering technologies
and you say that it is just "wasted"
so it's still impossible to say for sure here
this is exactly what it is in the direct sense
a waste of time or resources, ^{so to speak}
in fact this is life this is development this is management
and thanks to this the world develops
that's exactly at the Macro level

and when you move on to your personal task
come
it turns out that the person is
in conditions of the need for a solution
such ^{as} the level of Macrocontrol
as well as actions on personal tasks
and often the action is completely individual
there is some problem and it ^{needs} to be dealt with

and here it turns out
that is precisely the selection, ^{so to speak, yes}
a circle ^{or} a spectrum of tasks
based on a calm, precisely static state of the Soul
where the problems have already been solved
but often decided by God

your task is simply to understand, i.e. to see
where did he decide them in general in what place in space
and how
and just go through these levels
and that's all

you just need to go through
by the level where God passed
and then they decide
because the decision has already been given by God

and when you enter such a state
then you already get intellectual
i.e. educational, so to speak, with an element of education
and very much such a combined education
When
Spirit
Soul
body
Consciousness
in general, all elements of personality
get the necessary practice in action

here you begin to see that the action has been completed
you didn't just get some solution to the problem
and you already have the fullness of your action
that you got experience yes For example
or some control over your body
you got the mind, reason, personality
in general, any elements of your Reality

i.e. you understood what this action is
what did you get
harmonious so to speak yes Perception of one's action

then it turns out that you were
in the level of your own personal harmony

and when you learn to perceive
any action as a level of personal harmony yes
that any personal task has its solution
this is also a level of personal harmony in general

because if the task is difficult
or is it somehow connected
with overcoming some negative events
then we are talking about the fact that we first need to decide

and then already
or perceive

or for example not pay attention yes

and an already solved problem, for example with negative systems
but it is not necessary to perceive it
that she even existed

i.e. the question here is that the negative aspect in the decision
then it should be disbanded

i.e. information in the past should decrease like this
when solving personal problems where there is a negative aspect
it is necessary that over time
the task is like the negative connotation is constantly decreasing

that's what God does too
He keeps magnifying events.
by reducing the negative status of the event

i.e. gives more and more knowledge
if possible, solutions to the following events
it turns out that the negative aspect always tends to zero

and when you look at this element
again, how about the level anyway
still harmony but in terms of solution yes
that the negative aspect begins to disappear
then we get a very specific criterion for action
where exactly is the welfare or well-being, so to speak, yes
but also prosperity
this is a level that is comparable
with the level of God's Action

when is God's personal task
this is to teach people for example
or to give knowledge there to animals or to the whole World
by the way the world is organized in general

then the self-organization of the World occurs
in the conditions of the next Action of God
i.e. the following task is before God
His personal actions in management

i.e. God naturally chose His path
Infinite level of solutions
and so His next task
this is actually the essence
your education even more
i.e. your knowledge is even greater

and He creates for this purpose
for example the following Reality
essentially so that a person could say for example exactly
that he already has the possibility of Eternal development

how can a person say that
then they open up before God
more, as it were, significant horizons in management
from the point of view of human perception and views

then a person can do for example
some absolutely there Infinite elements in action yes
at the same time, Infinity often rests against it
again in household systems in fact

i.e. this is the everyday level of manifestation
he will always exist in Infinite action

there is a physical body
there is a level of tasks
and it turns out that the everyday level is always there

and when a person has the opportunity
in Infinite Development
solve household and some systems
in your behavior and actions
he understands God already in terms of Macromanifestation

i.e. he can see with his physical sight
The Physical Body of the One God

and when, for example, he realizes this
he clearly understands that he is truly created
in the Image and Likeness of God

and all that remains is just as if
master the mechanism of God's Action

then it turns out that a person's personal tasks
and for all of humanity this is what it is
how to get knowledge from god
which may have the same status
i.e. well for example, there in the Physical Body of a person
or Man transmits knowledge yes

then it turns out that when you are already detailing

you start thinking that's when you ^{there} at school
or earlier childhood ^{there} preschool time
or after finishing school, ^{for example,} in youth

for those who have already ^{sort of} overcome this level
^{so} they solved problems
then you see what, ^{for example,} is on the tip of the pen
but on the other hand
here is a pen, or a ballpoint pen
on the other hand there is a ball ^{like} this
glowing sphere
where is the knowledge coming from God

i.e. in any element of information
there is knowledge coming from God

and if you look at how much you moved your hand ^{there}
and how long did you drive according to the level written by God?
then it is clear that God wrote for you
then you will be able to see any, ^{well,} inaccuracy
in his notes
at any time school ^{for example} yes

and this is a colossal experience of mastering that
what a person should do in the future is this
i.e. what needs to be done so that you work more accurately in the future

take it as I just suggested
diagnose all your actions
and look where there was ^{an} inaccuracy
from your point of view now ^{yes}

then come to that
what is the action of the current time
and then it wasn't, ^{for example,} an inaccuracy
it was your action

and feel the connection between that
that this state ^{and} the state of God
it may be identical in terms of ^{something}
what a person should understand
what is God's essence
from a human point of view
there are no errors

The world still has a stable form of development
and one atom, ^{for example} , does not pile up on another

and this so-called "inaccuracy" is what results
which you painted
this is your personal action
it is like an action of knowing the handwriting of God there
according to your tasks

i.e. it turns out that somewhere there you were striving for that
to make the management right
you can't say that you were wrong at all

and then you start to see from here
and how did God teach you then?
that's how

from the difference between there and this level
which is as if between the path, so to speak, written by God
and how did you do it
you can see that it is not a difference
and there is unification through words and through actions

i.e. you through some manifestation of your personal
i.e., showing yourself in the same way as you show yourself, for example
you are essentially evolving in the level of unity with God
and in any transcription of events

when do you start to understand this
you can see from here
your personal level of action
see in general where God tells you
for example, near you, yes, but not in the form of maybe some words
and in the form of action
in the form of, for example, understanding in the form of the action of your Soul

because the action of your Soul
this is also a conversation with God in essence
after all, if God writes, for example, yes
's say here we can say
what if God can write there with a pen yes
or conditionally there by light
then you can before God
writing with the Soul is not necessarily writing with a pen

and from this it turns out that the Soul, for example, is yours
can do the job generally speaking
the one that God makes
when he sets you tasks

but she can set tasks for the surrounding world

i.e. for example, how can trees develop there?

how to develop, let's say, animals , etc.

i.e. the determining role of human action

why does a person have more degrees of freedom

because it turns out that here

when you do management for example

then you can write with your Soul specifically for others

and others begin to perceive your handwriting

it is also clear how you perceive God's handwriting

i.e. Soul

this is the level of transfer of uniform knowledge

for another world

i.e. the level of access to all systems of Reality in essence

and when you do that

you see that other elements of Reality

there are animals, let's assume, etc.

they perceive the Action of God but through you

i.e. it turns out that you should be an example in essence

i.e. how to act

and in general how other systems of the World should develop

this is also one of the personal tasks of a person in general

i.e. there are universal human tasks as such

related to humans

and when you start for example

from here we assume well to do such control

that you get an understanding of that

how to form at all

some let's say some element of information yes

how to develop it

then it turns out that you can

this element of information is some

fully develop to the level, let's say, of Eternal development

or there are contacts of Eternal knowledge

or even to Eternal knowledge

only because you do it yourself and strive for it

i.e. your personal experience your personal movement

this is the level of knowledge, generally speaking

for the rest of the world

i.e. if you want to develop Infinitely and Eternally
for example, with a minimum of effort, let's say yes
i.e. without investing, for example, any
from the point of view of an outside observer, let's say yes
some strong resource or without spending a lot of time, etc.
that in principle it should be like that
there is no need to do anything there very often
Is there much to invest in management?
some large number of control systems
to pledge or to invest something specifically
in management

in the form of an area of information or a volume of information

it turns out that here you can get
quite comparable development for example
if you choose a kind of peculiar path
Well, let's say it's an easy development

i.e., for example, you got tired there, right?
you have your own personal tasks
but in Eternal development it still always exists even theoretically
level that fatigue is possible

then it turns out you have to go out
to the level of easy tasks easily solved tasks

it turns out that the problems are easily solved
Well look how God does it
from the point of view of personal task management

For Him, any Action can be, for example, super-light
depending on how he looks yes
for this action
depending on how he perceives it
for He can have His own Perception

so you can also just change Perception
perceive future tasks as easy tasks, for example
To do this you just need to go to everything
to the light action phase
i.e. well as if not a tense or such a light action
and calmly develop in this direction
i.e. without spending, for example, a resource in the same way that you spent it
at the level of depth of knowledge yes

but in essence this is also the depth of knowledge

ability to vary the task
the ability to move between difficult and easy
between simple and some or complicated

and it turns out that based on this
you gain a level of mobility
which is actually characteristic of God
i.e. He can move there depending on his personal Will
change tasks change control there
either rest or work hard, let's say

but here comes the problem
the next such peculiar aspect then
that he is good enough this aspect is natural

what do you start to see then
where tasks come to you
i.e. where they come to you to your personality

you then begin to see this kind of path
this is how tasks generally come to you

because that's how everything in the world works
what does each system have
including by the way in your tasks
there is a way to you

you strive for God
means any object of information
may also be aiming for you

and then it turns out that you, for example, vary the system like this
some person called you
do you want to meet you have no time let's assume yes
he is somehow drawn to you, you know it
he can call, he can set a meeting place, etc.
or you set a meeting place

but for example the path that is precisely on physical Reality
this person or some event is going on
this is the way when you are in control
Well, it's easier with a person, yes, it's much easier with a person
can we call you
here is the level of ease similar level
a level similar to God always gives ease
in management systems

i.e. you can in principle
well, by making the management around it favorable
but be sure that the person will be able to come
and in this place let's assume yes some
well which is the meeting place
either assigned by him or by you

so God makes appointments like this and does it like this
i.e. He is, firstly, everywhere and everywhere
but at the same time
He can set a specific meeting place.
but with yourself as for example with an individual yes
and in such a way that you will understand it
that this is God

then you can implement this meeting
in terms of , for example, my personal development

in terms of the achievement of some action of the manager, let's assume
Can you pass this knowledge on to everyone?

then it turns out that when you transmit
you do it for everyone but for yourself too
through their result

it turns out that other people get results
this is your action and from here you decide
his personal task of Eternal development

i.e. Eternal development is a level
when after all everyone knows the system of Eternal development
then that knowledge comes to you
who should give the following people yes

then it turns out that God really always has many tasks
He always gives the next level
although one level has already been completed

and at the same time His level of development is as follows
even more stable
in terms of human perception

so when you form your Perception
on an easy task
for example you should see
that the task should be made easier by your action after all

but by the action of the Soul, for example

i.e. what is relief is also your action
this is what the Soul essentially is when it has solved the problem
you give her freedom to decide
freedom in action decisions

so you can see
action of the Soul
according to the tasks that come to you
i.e. the tasks are visible as a kind of corridor
well, for example, similar to some kind of queue in light optics
that there are some capsules there, there are tasks
like capsules like droplets of water like white dew let's say
and the tasks are somehow very calmly waiting and moving

By the way, you need to pay attention
what does this have to do with the events there yes
this doesn't apply to people
People are always infinite

i.e. here is the concept of "queue of people"
in Perception God does not exist

there is a queue of event tasks
i.e. there are some places, some kind of buildings , let's say yes
and they appear in the form of these spheres

further you already see
how do people manage these systems
at the management level as God does

i.e. God controls buildings
but he doesn't necessarily spin there yes
some mechanical systems
not He [...] people can build

the question is that He gave the right knowledge to people

it turns out that
you can any other information object
develop through precise action
giving sentience to another object
any atom or molecule there , etc.

and the main thing here is how to give it rationality

there is a scope of action there is also the sphere of development of the atom, yes
management is done as if in its Infinite development
and that's all

then we get elements of the external world
the same atoms
begin to have an Eternal structure of development

but by doing so you also make your atoms Eternal
it turns out

everything is connected
learn to make mentally at least one atom, for example, Eternal
then it turns out that such an atom in you is already Eternal

and from this it follows that here is the principle of Eternity in action yes
in solving personal problems
By God
human
all elements of Reality
this is the principle that gives
as if some canonical form in solving problems

i.e. it's like some kind of lighthouse or let's say a large pillar of light
which is visible everywhere and always

i.e. any object of information
this peculiar pillar of light
generally speaking, he perceives it the same way

and this is the knowledge of God
i.e. the Action of God in providing this knowledge

and from here you can always know
how another object of information perceives

those. if you need to understand
how does the stone react there, for example, there is a ship there, yes

put a stone on the shore
select special conditions
and try to understand

then we need this light of universal action
consider well as if near myself

it's very easy to see
it's always there, you just have to find it
it's like some door opens and he's there

and then from the point of view of the stone one can perceive the ship
it's just that the ship is too small for a stone
but there are stones the basic structure of stones
perceives any object in the river in general
the same way as he perceives, for example, some object
the governing action of the Soul of man

i.e. the Soul can create a stone

and it turns out that when the Soul can create a stone
or the Soul can create any element of Reality
you begin to understand
how did God create Reality anyway
according to the uniform action of the Eternal development

i.e. in this case I just laid it out
mechanism of stone creation yes
By God

i.e. the stone should perceive it in the same way
how does he perceive
for example, the action of the human Soul

you can take the plant
but the plant can perceive the same ship in the same form
just for a stone, for example, a ship is very small
and for a tree it is very big
much more than it really is yes

human action normalizes everything
puts everything in its place
human control action
this is the Norm of all Reality

and from the point of view of the Spirit
you can see how the tree perceives

or how another person perceives
some event

here you can determine the fundamental level of a person
and any other system, so to speak, yes

a person always perceives
firstly individually
and secondly, as God perceives it
personal events of a person

i.e. a person always perceives
from the point of view of their personal future events
essentially personal events of the future
always influence a person

and if we want to see
do all people perceive it the same way?
it's the same ship there yes
then physically yes they can take pictures
and in general it turns out the same for everyone

but here is the time of Perception for example by the Soul
time of Spiritual Perception
it's always a different time
i.e. you can see how it works
action configuration
The spirit of man
or Souls
to the level of salvation of this ship

i.e. each person has, generally speaking
its own mechanism for maintaining this ship yes
so that it doesn't sink there, let's say yes, i.e. on the water

and then it turns out we go out
on the colossal resource of human knowledge
example, this is why a person should live forever, even logically
because the resource is increasing
and often there is only one person with such knowledge
it is sometimes enough to save an entire civilization there, for example

because this kind of peculiar level exists
where time turns into space of action so let's say yes
and their knowledge is already close to God
i.e. a person showing the way to God
he is also close

then having already passed yes it turns out in a human way
no problem you solve all the controls
those that a given person can and knows

as soon as you reach the level of Macrosalvation
when there are already a large number of people
this can do
then it turns out that you are completely solving your personal problems
i.e. you are already absolutely sure
that you will definitely solve your personal problems
because people are somehow more serious and solve situations

i.e. the logic is that it is precisely human knowledge
the level starts playing
namely the universal achievement of each person
his personal task

Well, it's not exactly similar of course
on the option of a kind of communist society
where all the goods are somehow distributed
and flow in a continuous stream yes
based on preliminary educational data

the question here is completely different
that here everyone is just individual
can choose personal management
based on this technology
when he begins to see
where the tasks of another person are realized
from the point of view of this person's movement
to God after all

i.e. it is unlike the usual version of , let's say, communism
or other social systems, yes, in this regard, of a similar type
in this case we are still talking about the same thing
about personality

about a person who strives for God after all

and when you start to see it
then you start to see
that others can only see those tasks
which the individual exhibits for public view
only those methods and ways yes
which the individual has mastered for the common good

but when you do the action through Macrosalvation
you always do for the common good

it turns out that a certain action

you always show as an action for others
Necessarily
so does God He always shows
what is there for others
but for Him this display is so convex, so to speak
so huge
that the whole external world is for man
this is the Action of God
both for others and of course for Him yes

but for others it shows much more
whole worlds

and from here it follows
to manage the system stably yes or there Forever
and what is stable is what is stable is necessarily Eternal
much more needs to be done for others
so that it turns out well to solve for example there
private personal task

for example God wanted to go to the store there
then he must what
build the world yes
create a store
create a social society

that's basically it as if it were a conditional task, in fact it is a personal one
but in principle that's how it is
to create something you need to create a whole world in essence
in management and in solving personal problems
and the World must be comparable with the real World
then your personal tasks are actually solved

with this technology
try to practice like this
so that solving personal problems is mandatory

because it is very important
This is precisely the point of today's lecture and seminar
where else do you practice yourself?
as a seminary administration
that personal problems must be solved

Well, naturally it should be creative
that's understandable yes
but nevertheless it must be resolved

and here is the structure
it is precisely the organization of such a World
as the World created by God
then the solution will definitely happen

This concludes today's seminar.

thank you for your attention
