

GRIGORY GRABOVOY
The Teaching about God
Management of fundamental processes
15.02.2005

Hello again
Today's seminar topic
this is my Teaching about God
Management of fundamental processes

In this topic I show how
for example, a fundamental process of some kind
which we consider fundamental, for example
make it like a control system for example
i.e. to manage at the level of the fundamental Laws of the World

and also use external control
in order to make the process fundamental, generally speaking
i.e. any process
just bring it to a fundamental level

and in this aspect of management
we immediately solve the problem of integrated management
because any process that is given
precisely to the fundamental level
it becomes more stable in control

and it turns out that in this case
we already get a comparable problem
from a beginner's point of view yes
because the initial level is always there
at the fundamental level

because there is such a principle here
what if we consider
level of control , for example, coming from God
then there is a level of initial action yes

and if we consider
deeper level of initial action
any initial action
then we can consider the presence of God's Action
how is the level well as if the primary beginning, so to speak

i.e. the person who makes the decision

and if this is the initial solution

precisely a creative solution

for example, how does he think

well, the beginning of some action, yes

then it turns out that, in fact, the management level itself

he keeps moving towards the person

the more initial action

for a person

the closer actually to the human body yes

if we proceed from

from the most primary level for a person

then the primary level is generally

his physical body for example Yes

then there is his Soul, etc.

then he already sees God

and here we can see

in fact, this is how he sees God, for example, yes

how

i.e. the more initial the action for a person

in every case it works out

the closer he is

to the Action of God

and to the Perception of God

and it turns out that it is management that is fundamental

and the management of these processes is fundamental

this is the level when a person tries to reach

just like God does

he tries to embrace all elements of Reality

from the point of view of their implementation in their Perception

because for God the fundamental level

this is the level when He perceives

everything as controlled i.e. personal action

this is how god recognizes the fundamental level

when He considers

process from a human point of view

He just takes action on everything.

as a personal action

and that's when a person begins
take action personally
then the level of the fundamental management plan
here is the point
that he is, i.e. a person

brings in virtually the entire scope of management
as if to myself, i.e. to the initial level yes

and it turns out that for that
so that the process really covers all phenomena
well or there is the maximum number of phenomena of Reality
in order to obtain some comparable solutions

Well For example there is God who lives forever
then a person should not die
so he should live forever too yes
comparison of fundamental plans
their understanding

it turns out that due to understanding
this angle of Reality
we do the same tightening
for example, bringing information
that person
who is to be resurrected or who has already been resurrected
to God's information
well, there is a certain element of sticking together and pulling towards God

i.e. if a person pulls control towards himself
then when there is a pull towards God
then there he already becomes alive in the light of God yes
i.e. he is already resurrected

i.e. here
here is the level of comparison
fundamental
and actions
leads to the fact that the action also becomes fundamental
i.e. there is order
a certain kind of fundamental action

i.e. not every action can be attributed
to the category of fundamental management processes

because there are investigative ones, there are fast-moving ones
there are reagent systems

reagents can also be fundamental
but then a person must know it
the reagent control system is not always fundamental

i.e. the person is somewhere
he can do some management
but it could just be a control context
but it may not be there
for example in the fundamental system of the World
at this moment ^{yes}
his Soul may be located
in the investigative management system

however, the control may well work
but it is precisely the management of fundamental processes
implies
that you are deliberately taking control away
precisely at the fundamental level
where there are fundamental Laws of the World
which in principle actually they practically do not change

i.e. there are systems that do not
do not depend on human Consciousness
and they ^{seem} to exist more rigidly than the body ^{there}
^{well, let's assume} some even known human body movements, ^{yes}
the same ones or ^{there is} gravity, etc.

so it turns out that we can deal
with a certain absolute level of control, ^{as it were}
but at the same time very close
at the level of logic at the level of Consciousness
there is always a level
when a person can
it is precisely to realize the fundamental level
by one's own will

i.e. it can be any dynamic process
make fundamental
i.e., to actually create the properties of fundamental management
for any aspect of management

here is ^{roughly} the analogy
if there is some color of action ^{and} some flashlight ^{there}
then we can bring everything else closer to this color
but having put a filter ^{yes} some

and it turns out that we can do it quite well

any process means which for example Well we need it
make fundamental in action
but still it won't mean
here is a very strict management disposition
that the process is fundamental from the start

just as God originally exists
and you can only approach Him yes

therefore, based on this, we can clearly determine
what is it for a person anyway

Well basically a fundamental level
i.e. how does he perceive it at all?

here is the element of Perception
how does a person differentiate
this fundamental level of management

i.e. what he considers fundamental for himself there
and how he kind of well, it makes some kind of selection
i.e. what is the implementation tool
as he generally understands

Well, initially in the Soul of a person
there is an absolute awareness of the fundamental level
i.e. the person is basically there
generally speaking in any situation

here's if you ask a question
and immediately look at yourself yes
as an answer
it is clear that a person is always there
at the fundamental level of management
for God created it in the center of all information
and in fact, it is not taken out of control from there

then the question arises
how he somehow gets into Consciousness
in investigative systems yes

i.e. if it is initially always located
at a fundamental level
it can't be otherwise
he was created by God, so he was created
precisely in the fundamental center of the Universe

and here is the concept of "investigative systems"
this is precisely a system of interaction and relationships

i.e. the more a person gets involved
into the interaction system
the more he falls into the investigative system, as it were

because if you consider that there is some space
Well For example there is an uninhabited island there
and a man lives there
he always thinks that around him
everything is very serious
The world is very intense

and he perceives everything all the time
as a system of fundamental action
i.e. he is close in his Perception to that
what is there initially yes

but then why ? let's put it this way
so abstractly if you approach it
why did god create people together yes
and not on separate islands

so based on the process
Well, first of all, there is a sexual characteristic of the development of humanity .

but there is still a factor here
that the creation of investigative systems
this is also a creation
it's basically the same there
or at least for a certain series of actions
as God does and creates

i.e. the investigative system of human action
built on the same principle
as a fundamental system coming from God
Action of God

it turns out that any investigative action of a person
i.e. some event
interaction with another person
there or even with the external environment
i.e. even on a desert island
he is still forced to end up in the investigative system
Human

doing something yes

all this is built on signs on the structures of action
as God does

i.e. any action can be correlated with this
and in such a direct vector, so to speak, version
God's action is original

and as soon as we start
recognize this system of Reality
then yes, really any element then
may have properties of fundamental action

then a significant number of tasks are simplified
for example there is for example there is a person's health condition
fundamental action person is healthy for example

investigative there is the next action
the person has some problems

we just need some kind of willpower
bring it out
for example, in the fundamental control system
and he gets better

i.e. we actually seem to be deducing
in the normalization of it itself in the form of action
here it is very important even in the form of an axiom
we need to perceive that
that a person is also an action
Action of God

i.e. in this context of management
so that its management is fundamental yes
i.e. you made him healthy
here you need to look at what
and not like some kind of dependent action there
not some kind of management where a person is
it is only acting under the influence of God
but still, it is more in the logical understanding, yes
Action of God
at the same time, he is completely independent

but when we look at a person
as an Action of God
we are just withdrawing

to the level of fundamental management
it's pretty clear here

and when we start to consider
I still talk more now
on the applied aspect of fundamental management

when we start to consider
still True
well, that is, the fundamental level coming from the Soul
where there is no movement at all
but everything is perceived
at the level of fundamental knowledge

then it turns out that we find the level
comparable to the Soul

for example why the Soul of another person
has a fundamental level
Well there there is a sense of camaraderie there, some deep friendship

or some kind of internal action
in relation to a person
when the other realizes
it is the fundamental action
fundamental level of another person

by the way, here in the resurrection systems
is always considered
fundamental level
Perceptions of another person

i.e. the other person is perceived
as an absolute harmonious entity
here is the person who is resurrected , for example
i.e. it is always perceived
at a fundamental level, in essence

because it exists
Well as if the most important value
as for myself
and for the one who resurrects him

and it turns out that based on the control system
also by the way when treating a complex serious disease yes
another person is perceived
on a serious, on a sort of deep, serious level

when in Perception it is introduced
in this situation
as if in this state
then the treatment is intensive

for example, you can make control there
instantly including cure
by simple technology yes
optical control technology level

but it is precisely to shift the whole Reality there in management
to receive precisely the fundamentalism of management
here it is already necessary
your personal fundamental action
where you touch the depths of your own Soul

and in connection with this, this situation
coming from the depths of the Soul yes
when a person does work
the deepest level of the Soul , so to speak
and in essence with his whole personality

he begins to realize
what is the level for him well as we say fundamentalism as such

i.e. what in the world exists in this
as a level of the real or inner World yes
as a level not only there what he himself perceives
and the level of the World in general
the world works in principle

when he begins to realize this
he begins to understand
what is between the outside world
i.e. there is some kind of World event
he sees it and differentiates it
in the form of some light there
even this is not a physical event
and the information yes
which can also be a physical event

but here is the transition from the event to the Soul
such that there is no transition space there

i.e. as soon as he begins to realize

what is the Soul and this event
is on the same level of space yes

although he clearly understands that it is not inside his Soul
it's just a monotonous space
he falls into the structure that here is the following axiom
what space
Souls
and external Reality
when it's the same
then we have a fundamental level of management
initially

i.e. man was created fundamentally by God
in the space of, say, some fundamental control
begins to realize this space

i.e. in fact, by and large
this space is generally preceding
even to the level of Soul creation
this same person yes

why can a person know around him
that means more than he can see there physically, yes For example

because it can be located
here in this space Consciousness
to the level of Soul creation

The soul was created by God and it was, in general, created originally
from the beginning of time
i.e. it is like another level of space

but there is a physical space , yes
which well it is perceived
as a space, as if geometric, so to speak

there is a temporary space
and this is like geometric

and here is the geometric space
which existed
until like well, the initial active one
level of existence of the Soul
Soul organizations yes

to the level of organization of the Soul as such

and here any element of Reality

any element of Reality

it has a uniform system well like vibrations

i.e. the same primary information comes from it

any element of Reality can be placed here

and get the same glow

the same level of Perception

to the level of the Soul Spirit of Consciousness

this is the fundamental level of the human Soul

means the one who perceives the World

it is precisely from a fundamental perspective

i.e. this is generally speaking for most people

this is a natural state

which is put into every action of theirs

i.e. the person turns out to live

in the structure to its own level , so to speak

creations in action

Well, a person really does try to predict

and perceives it in a certain way

your future

and it turns out that a person is always there

at the level of essentially anticipating the next action

why is the world so huge, for example ?

but it still doesn't fall apart

i.e. some connections allow us to maintain this world

in the conditions of the design that is perceived by people

such as there is a physical structure

because a person is always there

at the level of anticipation of the event

and in fact, unless he doesn't make it somewhere in time

i.e. attention is distracted

then something happens ahead

there for example, something unfavorable may happen

but according to this control structure

well, from the point of view of the fundamental Law of the World
by universality and fundamental action
and the actions of God and man at the same time
we see that there is here
that's how it is, it may be a bit unusual , yes
for Perception
design
but it exists
in the form of a very specific Law of Information Distribution

and moreover this Law is in force
and in the physical body of a person inside

i.e. if we consider the interaction
Well, it's such a simple principle
the man decided to think
and that means looking inside yourself, yes
how does it work anyway

how should he go then
in the internal control structure yes
i.e. how he should get inside himself, as it were
through the elements of Consciousness

it turns out that he can get in
if he doesn't seem to see any boundaries for his Consciousness
i.e. he can know himself exactly
if it overcomes the internal system
there is a physical system
and ends up in a kind of uniform system

i.e. he shouldn't see the difference
between the starting level and information
as I said
to the fundamental level
any information structure can be translated
and it will have the same glow action system yes

i.e. there will be the same primary information
with a difference in action
this is also a somewhat unusual perception
i.e. we understand that the system is different
but we perceive the same information

i.e. how to have clairvoyance for example

so either control knowledge yes

It turns out that you have to be in any state , yes
it turns out that in essence it can be the same thing
but receive different information from objects

this is the characteristic of this space
some objects in a fundamental sense
are perceived
as knowledge
their action
or knowledge about these subjects
we are talking about, for example, there about some event-related subjects

and the only difference is that
that the person is different
perceived
as the dynamics of life development
like another information system, but of the same type
i.e. it is perceived as a complete information system

that's the difference in this case of human perception
or some event or object
man is exactly what is new
this is life
a person is perceived as life

and when, for example, you consider in this system
well then what for a person for example yes
relationship
Human
Human
there is a fundamental level

it's very simple fundamental level
this is Infinity Eternal life of man
this is a fundamental level

i.e. for a person there is only one level
there as if real fundamentalism of Perception
this is his Eternal Life

and when we for example Well, we want to compare
what does this give us yes
First of all, it is immediately clear that a person must live forever

and here it turns out that the comparison
as if external elements of Reality
with what happens in the future for example
with other elements of Reality
i.e. there with the same ones that are external there
or with human action
in terms of precisely Infinite development
shows that a person develops life
to any other structure

i.e. he kind of humanizes
he acts in principle the same way as God acts
God who created man created
so it increases it yes
Well it means that in a natural way
people develop and reproduce, etc.

i.e. it turns out that we can here, for example, very clearly yes
in the technologies of Eternal development
to set a certain gradation
where is well as if external artificial development
Well For example there is cloning or some similar technologies
because cloning
this is not the only development technology
similar systems

there are naturally in the future they may appear
other technologies
there are optical-visual ones with body reproduction , etc.
simply put, the optical environment there creates a body yes
By the way, it is a more intensive technology
and closer to the real image of a person

therefore, in the conditions of Infinite development
a person must be able to endure
your own status well kind of like yes

because he was originally created by God
it cannot lose its own structure
Moreover, he must constantly manage all systems.

for example, if cloning is very developed
then you can do it, millions of people can do it
for example, it is possible to clone
in a short time yes there literally in years

and maybe even shorter with the development of technology
then how will the interaction system be distributed

man yes

and for example a clone yes

so with all this in mind

the clone should have the same equal rights

like a person

but how much for example This means that people have guarantees

that clones will not separate as a species, let's assume

and they will not take external control yes

after all, a person has the same development

as originally given by God

that's why there is

it's all the same to a person

there is always a need for control

behind any system

well, basically including there yes, the development of the person himself

and then it turns out based on this

this is the space of fundamental action, yes

this is a kind of dividing line

between external systems it doesn't matter what they are

For example there is some kind of alien possible action and so on and so forth.

although the higher the development of civilization

the fewer problems there are from civilization

but nevertheless a person must always

take control over any system

whatever this system is there in terms of development yes

because the highly developed system is external

still more loyal

and the contact system here is simplified

i.e. control is achieved by

that the goals are peaceful yes

at the external system

and in humans

and when we start to analyze, for example

this gradation

such as Well, let's say it's a simple question
how to preserve the human species in an unaltered state
that's how he was there for millions of years
subject to the evolution of various techno-cybernetic systems
some methods of influencing the human cellular structure
some systems, for example, mutational ones, yes
as a result of nuclear explosions there

then a system arises here, well in general, identification
exactly these gradation systems

i.e. in Infinite development
a person must understand and see very clearly
where is there a gradation between it
i.e. how can one recognize another person in general
in Infinite Development

because in Infinite development there is a possibility
Well as if any evolutionary development including

and man was originally created by God
it should not change
on the contrary, the world around him should be like this
to its unchanging structure
it developed as an external system

and it turns out that here
it is the fundamental management plan
This is a person's personal perception

i.e. God perceives all people
immediately and simultaneously
at the same time, everyone is a separate person for Him, yes
He sees knowledge transmitted to a specific person.
and every person for Him
absolutely unique
absolutely well let's say respected or deeply respected

and at the same time He sees this very fullness
or something like this, some kind of harmony
in relation to the individual
and the personality has harmony in relation to God
i.e. It differentiates a person

it turns out according to the principle well as if Macrorespect so to speak
by and large

i.e. how to express the structure of respect
this means that you can respect him as much as possible
you need to know it completely ^{yes}
Well, let's say technologically

and therefore, based on this
this is precisely the ability to know
everything about man in action ^{yes}
this is a guarantee of its ^{eternal} development
as a species of unchanging species
well, as a subject, let's say, of Reality

and it turns out that based on this
one person should know absolutely everything about another
then for a person this is a fundamental level
not in terms of ^{there} Thinking not even in terms of its action
because there are ethical standards of control ^{there}

and in terms of everything about a person as such
i.e. on the one hand it is common knowledge
Well, fundamental knowledge about man in general, ^{yes}
on the other hand, these are still personal characteristics

and how is it possible, ^{for example,} without controlling ^{there}
moving physically ^{yes}
where is it located
without controlling Thinking
but to know everything about it

the same principle
as in the fundamental level of space
where there is action before the active action of the Soul ^{yes}
human
that all information has the same meaning

i.e. you understand what I'm talking about
but you don't differentiate the object

i.e. you have the same information
which speaks of a certain action , one of them
or just perceive this control space
but you don't have to differentiate
where the person went, what he thinks, etc.
you already know everything

like God, for example, knows everything about everything
it doesn't mean he's there every molecule
keeps in mind and studies
He just knows yes
knowledge is a universal criterion
fundamental management is obtained
that means distributed
Well, there is action in the structure
a person there
humanity
God

and in each case knowledge has a vector structure
it is transmitted, for example, from God to man
and it's all completely visible

if you learn in its pure form in this regard
in fundamental management
consider how knowledge flows
very clearly visible
where is god
what does he look like there
where does He go, etc.
and how He imparts knowledge to people

those. here is knowledge as the texture of action yes
Well for example, if we are conducting an analysis of some event
how is information distributed and as such

in this case, information is knowledge
what we can find out what can be transmitted
not all information is knowledge
maybe just some kind of Perception of information

there is knowledge
Well, this is, in principle, of course, knowledge as such
that there is some kind of optical system

I mean knowledge in its entirety
knowing where inside the system
there is knowledge about any other system

i.e. what is, for example, True knowledge
if you put the question like this
this is a very simple task to answer in principle
to this question

in every element of knowledge
there is an answer to any other question

then it turns out that a person is immersed
like into this certain river there
or there you can express it figuratively or it means there is a lake there
It doesn't matter but knowledge
in a certain volume
but it is close in consistency to the structure of water
here again you can bring your Perception closer
to the structure of analogies

i.e. for example, the movement is similar to water
but it's not water yes
the flows are the same, it moves the same way
but this knowledge is in your Perception

Well, you can make it in the form of fire, for example . Yes
or there in the form of some elements , earth , air , etc.

i.e. we can consider that air contains knowledge
but at the same time we have knowledge yes
and the air is reproduced from here

then the question arises
what is primary
knowledge itself
or for example a material object

knowledge as a structure that carries an object
or maybe the object itself and the fire, for example

but by and large
we can this knowledge matrix
take and remove from space
there is air, fire, earth or water
and we see that the water begins, for example Yes
first of all, as if to seep through
or spill there

i.e. we can remove the matrix structure
from any system
but at the same time we see how some kind of system
it seems to be starting to disband

this is a sign of the dissolution of negative events

ability to extract matrix structure
in this case the events are disbanded
but the outer space
it still remains unchanged
i.e. the space of the fundamental management plan

and when you start to see the controls like this
what well Actually, we need concrete results.
we need to get control
Well, because you somehow listen to it there
because you have some specific tasks

then it turns out that this is work in the investigative system
also has the following fundamental feature
that the investigation is still the solution to the problem

i.e. if the beginning of some problem
Well so we have recorded it
then a solution must still exist
in the investigative plan

and then the question arises
how to make an investigative plan fundamental
so that the solution i.e. the solution to the problem
was all the time
in the space of fundamental action

i.e. in this case a favorable decision
affects the whole Reality
and the world is better because of it

i.e. then we should be able to
the following investigative system
It is necessary to bring it as if
at a special level of management
bring into fundamental action

then it turns out that we have this
just the level of fundamentalism
at the level
initial there
current
and the final action

but when we put it all together
into a uniform space yes

by and large in Infinite Action
the beginning closes with the final action

i.e. it turns out that the person again
before the action begins
he sees the ending
Well, he can of course guess or through clairvoyance
see the ending

but how can I make it so that the end of the action, so to speak
it was very rigidly fixed, as it were
on the person himself

i.e. in fact, God before he does an action
He knows exactly how the action will end.

it's the same principle
etc. arises
and the initial action hits
into such a structure
that the final action is at least visible

so this action can be performed
in conditions when we have a level practically like this
what is your personal initial space of action
has the same properties
what is the space of finite action

the easiest option
Human
what is he now
Human
that he is there in a second or there in a million years he is the same

basically the shape of a person
always contains a union
initial and final action

and in principle, a person reproduces himself
action for yourself
myself for example yes, he comes up with it
or some tasks arise around it
and he is the one who decides

i.e. everything is at the information level
is decided within a specific person

who takes part in some action

then a person
from the point of view of such an analysis of the situation
there is this most absolute
space so to speak yes management
the man himself
inside which at the information level
there are quite a lot of systems going on

i.e. all actions take place inside a person
by and large

all informative actions

so it works out
there **point of view** For example
well, the same process of resurrection, yes

the point is that a person is just for nothing
begins to perceive himself again as a whole
and then he is alive

and any process as if well, some kind of disease, so to speak
this is again also a process of a person's internal state
first of all for himself
because in this case it becomes
just like God in the World
It acts as if well, in the singular

as soon as a person realizes
that all processes are located
within his understanding or action
i.e. well as if he realizes his own uniqueness yes
although of course he understands at this moment
that people and various management systems
this is also, strictly speaking, well the same
equivalent systems yes at least

but it is precisely the awareness of the autonomy of action
this is by analogy with how God works
this is a level that immediately allows
in general, let 's say, understand
The thinking of God is precisely in the Infinite development

i.e. God who is One and Only
and He wants to somehow realize something

so that God would understand at all
from the point of view of human logic
that He is alone

It is clear that God understands everything anyway
but here's how He should understand it on a human level

He must then take all the phenomena of Reality
how to introduce inside
its management system
Well as if in myself yes
then He will understand that He is the only one, let's say
does all the management

and based on this, a nuance then arises
and how about let's assume some things
which are expressed incorrectly
in the control space
there are some disasters, etc.

the thing is that in this case
this means that there is a principle of prolonged action
to the next system

i.e. well for example, one autonomous system where everything is fine
the man controls everything
he needs to make contact, let's say
with the following system
Well For example there is something to say to another person
pass on a word or something

this is where it comes up
already external control space
and here the will of the other person already matters
i.e. how actively it is expressed
and compared with its action
i.e. in principle, it is easier for God in this regard
He is alone
He wanted to make the management
and that's all

for a person it is necessary to coordinate, interact, etc., etc.
and everything will depend on that
what power is there behind the other person ?
or behind another system, not necessarily a person

and it turns out that based on this
God gave everyone the same will after all
equal freedom of action
the question is only in the level of action
Well or something technological
or anticipating some negative action

this is who thinks creatively and develops
that's the opportunity to gain knowledge
still more is given
really in essence in any case

and he only has it
Well, the task of the organization is generally greater than that of others, even
people
so that they can participate
in the process there Macro management Macro creation

so when I talk, for example, about universal Salvation
then in principle it is specific
one specific control space
i.e. it is always the same thing by the way

and when this space begins to be realized
precisely within oneself yes
as if inside oneself
we understand that yes, here is Macrosalvation
it is coming there, it will definitely come, etc.
i.e. we guarantee this process
but only if it is a continuous space

and by the way it doesn't even look like that
Well, it's not really like that specifically
like in mathematics there are some autonomous areas

in this case i am talking about spaces
which exist objectively
they can be measured there
enlighten them with digital systems , etc.
by some methods of objectification
this is what exists in this world

and here I am simply explaining the logic
what is inside the autonomous process
can be explained

what we are really dealing with is
what exactly is an autonomous region
allows you to control processes
both around it and inside it yes

i.e. why is God One and He is One
because then we know for sure
that the picture of the world is stable
and the World will develop infinitely

because if we had
differentiated there some other different picture
then we wouldn't have considered it then
autonomous precisely
as if a self-sufficient level of management
for all systems of Reality

and here the main question arises
with knowledge with the ability to manage there
as if in different situations
autonomously or there may be non-autonomous
there in connection with other systems

is the fundamental level anyway
in all sorts of positions of manifestations
to deduce as some kind of pragmatic
completely pragmatic level
or management tool

so if we are talking about management
precisely as such
what is the management tool
is a fundamental level
i.e. the level is precisely fundamental
it as a tool

then here you can deduce such a position
that the fundamental level is essentially like this
what can we make of it
any other control structure
but as if investigative yes

i.e. we can do it
leave it the same in the fundamental management plan
but how to move in space
move the control optics as if

i.e. to perform some action
which implements the system

so that's when we start moving
as if mentally there by an effort of will
then the implementation occurs
precisely again in a unified space
where all properties of space are equal

i.e. the action happens like this
what exactly is God's influence
Action of God

and when you start to see
management process
coming for example from the Action of God
then we see that this is it
the so-called universal control space
from the point of view of action fundamentalism

this is action
which initially begins and comes from God
logically it is clear
but we can see how it happens
in this control system

i.e. as the action of the hand there or the Body of God there
or the Thought of God reproduces
specific unified space

it turns out that all the movement is external, yes
there is movement
this is still the Action and movement of God, yes
in relation to a person it turns out

i.e. man perceives the Action of God
and at the same time he practically perceives
Well is he engaged in self-construction ?
as if looking at God
here at the information level

i.e. for him every element of Reality
he differentiated quite clearly
he can look at God
see His internal structure and external
and a person is engaged in principle in self-construction

i.e. how does he do it
he's just at this level of management
acquires properties
interactions with the same type of space

so that some system interacts with another
some mechanisms of interaction are needed
if the mechanism of another system is universal
i.e. it does not differ for any combination of events
then a person begins to acquire the properties of this system

and here is the structure of the human body
occurs at the interaction level
with one absolutely static system
through which through which
there is God immediately

and that's when we did this
Well, we named her ^{there for example} such a term
I entered as "through which" ^{yes} through this system

i.e. this is the system
precisely the universal space
under any combination of events
functions that have the same properties, etc.

but why does such a space exist
because God is the original giver of impulse

He is the Eternal and gives, ^{for example,} Eternal development.
It is of course such a universal space.
from Himself necessarily conveys

because they arise from God
all phenomena of Reality
so this is space
must contain all the phenomena of Reality

and therefore
it is clear that in contact with God
and God Himself determines
all phenomena of Reality
space constantly ^{seems to initiate} ^{yes}
creates these phenomena

but man is free
it can't be created by some space ^{there}

it is not clear ^{what} kind and where it was taken from

so it turns out that a person can
when space is clear from God
when space passes to man
then you need to define the properties

a person can interact
with such space
if he ^{well} as if absolutely protected
i.e. it is part of this space
he is indistinguishable, he is the same, ^{yes}, it is his environment
she is not dangerous for him

then it turns out
that a person is engaged in self-construction ^{yes}
^{as if} always in the primary Action of God
at the initial level of the case ^{yes}
at the initial level of action
in principle at a fundamental level

here we finally came to that
that man is at the center of the Universe
at a fundamental level
and this level constantly exists

and only investigative systems
again, I will repeat what I said here on this topic
they are perceived
as systems of output from the fundamental level

and therefore, strictly speaking
static is the position ^{of} a person as such
in the space of action
it becomes clear
when a person perceives God

that's when he thinks, thinks and is
in fundamental space

and this is the Perception of the Personality of God
like ^{well} Infinite level ^{yes}
this is ^{well} first of all it is for a person
in principle, in fact, it happens that it is easy
it doesn't necessarily mean it's difficult or that you have to work hard

but there is such a thing here

Well like it 's right for Perception

level

which is necessary

well, to perceive or to which it is necessary to follow

what is the level of human perception here

should be like this

in greater detail

that he must clearly understand

what is the object that he perceives

all other people perceive it the same way

and that's when he begins to understand this

it turns out that its fundamental level

already well as if it is based and located

at the level of other people's actions

at the level of their Perception

at the level of their desire there Yes

at the level of their free will

and then it turns out to be very clearly visible

as any object of Reality

is built on the collective Consciousness of people

it's clearly visible

in the personal phase you can take and consider

as in the collective Consciousness

for example, the action is shown

some region

is some level of management there

or even some group of people

and it turns out that when

you are considering it this way here

control

you can see it here

what is at the fundamental level of management

any level of collective Consciousness

can be used or applied there

for example for creative Eternal development

so that you take

and in fact through some layer of management

you get into any other area

i.e. we are dealing with a certain center then
through which you can exit
to any other control system
which contacts this center on its own initiative

and then it turns out that this system can be controlled
i.e. it can be avoided practically
Well, in essence, any conflict
if we can align the system
at the level of the initial actions again

i.e. to transfer the system to action
i.e. into space as I said
people are in space
before the action begins
active action of the Soul in the physical body
and it turns out that then the conflict will already be dissolved yes
This is especially an important system methodology
in the case when it comes to
well, about the possible nuclear threat there, etc.

i.e. ability means to consider
action before the primary plan
i.e. fundamental level
you are where the action has not been completed
and you are always in control

i.e. in the applied sense
fundamentalism in management processes
this is the ability to sort of pre-manage
the ability to organize an action before it is performed
and the ability to control the action
Well as if an event
keep on the pulse yes
ability to attract an event
at the required structural level
closer to your level of management

and thus the fundamental plan of management
this is a unification
Human perceptions at a fundamental level
and at the same time the fundamental Action of God
for a person

i.e. a person must recognize this action
in everything
for any Action of God

This is a fundamental action by the way for a person

then it turns out
that it is also a recognition system
which means more efficient management as well
for a person

those. recognition system
how God gives technology
fundamental management plan
in any of His actions
in any phenomenon ^{yes}
this means in any phenomenon of the World, generally speaking

i.e. this is a fundamental awareness
all process connections
this is generally speaking a finding
at the level of the fundamental plan
and this is actually universal harmony
this is the fastest action possible
and this is ^{generally} thought and action
in this case it is precisely of a creative nature
this is often the case and it happens that it is always the same

i.e. you can put the thought ^{there} Eternal development
at this moment he lives forever

and it can be guaranteed
that when he is at such a level
he can make his own level
and a guarantee that then he can live forever

this is his internal guarantee
this is also a macro level of management
Macro access

for this you just need to know how
make personal perception fundamental

This is where I end today's seminar.

Thank you very much for your attention
