

GRIGORY GRABOVOY
The Teaching about God
Managing meaning
10.12.2004

Hello again
The topic of today's seminar
this is my Teaching about God
Managing meaning

This topic implies that
that the meaning of action is in the dynamics of development
may vary
for example when a person is at the management level
he can, for example, use meaning management
change the coordinate system as it were

well, that is, if the level of meaning
it is a kind of reference point in action
then if we have control technology
as if of a semantic shade
then we can, as it were, support system of these actions
in principle, modify

and then optical projections of action
or there are connections of events
they begin to be manageable
precisely in a subtle, i.e., in a semantic sense, by the way

i.e. the meaning is in different points
he may have
unified property of uniformity
let's assume the meaning of the whole action
to make a person healthy or to cure him completely
in case of some complex problems there

then at any level of management
we have the same meaning
i.e. the line of meaning is prolonged
to the level of, as it were, Infinite action

then it turns out that based on this
we get a kind of closed wheel, yes
like the wheel of Eternity or the structure of Eternal development
where for example is the meaning of Eternal development

this is also a closed system

and it turns out when we enter
meaning management system
then Infinite quantities have the appearance of finite objects
as I explained, well, some kind of closed wheel
having a uniform development system

in this case we can quite as if
introduce the following control system
for example , a person faces a certain task
then he can get into a position, as it were
constant awareness of meaning
i.e., let's say a wheel is spinning or there is some information there
different shades of meaning
and he simply by concentration of will
catches some level
and it is somewhere at the level of increasing volitional concentrations
strengthens and fixes
and that's it and the position is decided

i.e. it is enough to grasp the meaning
to the level of personal will
and you get a solution to the problems

i.e. there is no need to perform control somewhere to the side
your point of view is enough
and the solution to the problem is obtained
because you are fixing this wheel

and the wheel has meaning, it has meaning everywhere
the meaning of life in Eternal development is the same life

therefore, the management of Macroreality
it is enough to make a fixation
one shade of meaning
on the will going to oneself, as if the concentration of the will to oneself

this is what is special about this mechanism
you kind of gain the will of the event
in front of you

i.e. if in normal management
you do the control for example from yourself
in principle, this is also, of course, a generally normal control
it's just vectorially directed towards itself

and this is where we start to think
and how to direct the vector in general
how to form a will that acts around you
but without any effort

i.e. the event took place in the information yes
in the future
you direct the flow of concentration towards yourself
and you get the structure
namely the Infinite level of control

i.e. you get that all events
that happen in the World
they come to you
not even through the optical level of Perception
and in that Reality where the optical phase has not yet been identified

because on a semantic level
the concept of "meaning" may be higher, as it were
it could be a level before optics, so to speak
to the level of Perception
because Perception is formed
also in a semantic shade

it works if you control the meaning
then you must configure Perception
This perception also has a certain meaning.
why do you perceive something

if you, for example, look from God's point of view
reason in this case ?
what is the point of Action anyway
for God
i.e. why did He somehow, in one way or another,
or by any means by
why did he create anything for example

here is the meaning of God's Action, what does it consist of, for example

and then we see that if we put the question this way
then for example what is the meaning of the creation of man
By God means
from God's point of view

so this is exactly the meaning
has the same reciprocal value

i.e. that's the point
that this is the meaning of God's Action
as if the reciprocal value

i.e. for God, the vector is the same as the vector back
it's the same thing

and that's when we
i.e. initially God has
some absolute substance
that his Action is already filled with infinite meaning

from a human point of view
in the projective version it is logically clear

and therefore if, for example, a person concentrates
will to oneself
from a set of events
then he actually builds the World in that Reality
which he perceives

it's very clear here
the structure of the World can change
very hard and fast
i.e. millions or billions of kilometers
can be combined into a single action structure

this is the meaning of Action into Infinity
or the meaning of the action is right in front of you
it is one and the same in the structure of Perception

when we are the axis of meaning
or there vertical if horizontal any
The meaning is infinite number of axes
then we start moving
then we get a reduction in the distance of time

and if we are working on a task
it turns out that the semantic action of the task
often flows into the choice of the next meaning of the action

the original meaning is preserved yes
obtaining the management goal
but as soon as a person enters the management structure
Well as if to say with our whole body yes in logical Perception

he can receive the following
what is the next meaning

that's why he's acting like this now
although this is a subtask
i.e. he certainly remembers and knows the primary task
but in the next task there is also
next meaning of action

it turns out that this way
a person controls the system

Well as if earlier, i.e. logical connections
i.e. he is building up his system of Perception
to the level of complete control
from the primary task to the next

i.e. if we remember
with what meaning did we act in each system
i.e. it is enough in one control
make management and it is done

but there is a control system
where meaning has to be maintained by an effort of will
next action

i.e. and then it turns out that this is a connecting link
i.e. through meaningful action
a person sort of organizes the path
from the event to yourself

Well, if we ask ourselves the question, yes
in universal connection
this means there is always a connection between all objects
but man from God's point of view
he must create all the elements himself

here's how to make it so that from some element of Reality there
take and pull some optical system towards you
i.e. tie it to yourself and bring it to yourself
how to do it
i.e. there must be a meaning to the action
why do we need to bring this system to ourselves

and therefore in this understanding
the meaning of the action is the final
i.e. where the finite value enters the Infinite system

already in the opposite way
and at the same time in Infinite Action

i.e. to cure the disease
the meaning is clear from the start
there are systems that generally speaking do not need a concept
there are no details or meaningful actions
in the structure of the production
It is clear that a person must be healthy

that's why the concept of "treatment" or "healing" is there
this is already a detailing
the meaning of the action in the case of technological application

then it turns out that for Infinite development
such quantities organize
as if it had an independent meaning
there well the existence of elements of Reality

i.e. if a person goes deep into Infinite development
then he begins to see
that the elements of Reality have a natural
some independent meaning of existence
it's obvious
they make sense in themselves, as it were

here is the meaning of the action of some substance or creature there
in the future
Well there's a view there let's assume animal plant
naturally, especially for a person
as if a manager of such a level
here it is always considered as meaning
as if it were autonomous, here in Infinite development yes

but autonomy is always connected
in the total mass of connections
i.e. the meaning of one action of another
is tied precisely to the General Development
precisely to the level of a person's personal local action

i.e. the meaning of a person's personal action
he is always alone
it is somehow autonomous anyway
and the endless mass of information becomes manageable

because when a person

leads to Infinite development
your own meaning
he falls into the structure of something like that
you know , like a spherical level or something
in geometric projection of control
when exactly his action
i.e. the meaning of his action or some kind of a spinning top of meaning
there is always a spinning ball visible in the distance
which regulates this Macrospace

i.e. the meaning of the action regulates very large arrays
simultaneously autonomously as if
and at the same time influencing the entire environment, semantically,
moreover

it is very important that here is the next array
it also makes sense, it makes sense

i.e. the person is not engaged
there is an infinite number of processes
in this case
it works precisely in the structure of semantic connections

a person's personality is needed for, for example, yes
in full manifestation there for example in Infinite Development
because the personality is filled
the meaning of a person's personal connections yes
and all Reality

just as God does it with purpose
all control systems
He Himself gives birth to this meaning.

and so that a person acts
as the level of God's Action
it must also generate meaningful action

and this is the birth of meaningful action
this is already an attraction from the Infinite magnitude
action
here in the final level structure

and the final level structure
this is the existing Reality
and it's not just like, well , or what? as if it is unfolding now
she matured and arose

at the moment of organization of the Soul of man

here we see the meaning of the organization of the Soul
The soul always sees its exact trajectory of development
and at some point we get there
we see a building
but this is the vision and action of the Soul
vision
Perception
action of the Soul
The Bodies of God in the Collective
i.e. God is present here in this way
that God gives knowledge through the development of the Soul

we see that the Soul has evolved here
then we see the path of the Soul
this is where the optical manifestation begins
Before that I said that we can
at the level of semantic actions
reach the optical level

just meaning
this is a conscious recognizable quantity ^{yes}
in a personal context

and when we see this bridge
connecting you
with its initial level of development
^{as if} here in the organization
we can vary
already the initial semantic action
in general relations

i.e. we can do the same as I showed now
management ^{there} of Macro-arrays and Infinites
because every action in Infinity
it curls up ^{into} a kind of wheel

here we already have
management of the collective phase of Consciousness
i.e. if there is some problem
associated with the actions of many people
and these actions are such that they can be ^{well} there are problems ^{there}
perhaps there may be such an option here
what are the actions of these people
they may ^{well} be somehow incorrectly manifested

then it's enough to go out
into the semantic level of a kind of root action
here in the phase of collective Consciousness
having seen the beginning of the actual development of the action of the Soul

i.e. Soul
in fact, it always has a Macro meaning
i.e. here is the concept as such
"development of a certain set of knowledge"
this concept is here it is simply visible
as a dynamic property of the Soul
but at the same time the development of knowledge or a set of knowledge
is often not the meaning of the Soul's action
there are direct tasks for the Soul

for example, the trajectory of the development of the Soul
here is a person who should appear
at such and such a time in such and such a place
and the Soul perceives this, here is its direct vision, yes

and what will he do there, man?
gain knowledge here or there for example, not to gain knowledge
what will he do

often it is not always the task of the Soul as it were

because the tasks of the Soul
have the meaning of direct Action of God
tasks of the Soul
these are mainly tasks set by God
at the initial level of Soul creation

i.e. the Soul is already created at the highest possible level
there is a concept of a "set of knowledge"
this is a fairly arbitrary value

the set of knowledge is the level of action of the Soul
here is knowledge as an action of the Soul

i.e. the Soul in the semantic aspect
acting creates knowledge for a person
so in this case it is clear
that the Soul is a generator of knowledge
for the person himself

and therefore a person is still an autonomous system

God created everyone free
it is enough to consider
optical level of development of the Soul into the future
and you get the knowledge that is in front of you

well, i.e. seeing yourself initially yes
from the Consciousness of God
seeing how the optics of the Soul develops
already manifested by God
here you can clearly see a very important point, by the way
it is the optical phase of the Soul that is developed by God

i.e. the meaning of God's Action
in relation to you it is already immediately clear
this is how it is clear in the history of information development
what if you see something initially
so it was created by someone yes

and we differentiate very clearly and simply
lines created by god

and therefore we are very simple on them
Well how can we walk or look at them
You just have to look at them, the knowledge is already there

therefore a person can never be
in a space devoid of orientation

i.e. a person always perceives meaningfully
everything that happens

moreover, he has any mechanisms
to solve problems
there are a lot of semantic systems
if one semantic system does not work
fast at least yes in this system
change the semantic axis

there is some kind of tough task, yes
it needs to be solved, it's kind of complicated
change the task

you need to go somewhere, that's the point of the actions
First you need to look around
walk a little mentally or in reality

but the meaning is the same everywhere

if you solved this problem
then the semantic aspect of your experience
is being thrown over
to solve Macro problems yes
unified communications

therefore meaning solves problems
as if in the context of any of your development
this is how the knowledge of the Soul is born

i.e. you see how the Soul transmits
You get knowledge, right?
as if well, let's say to the physical body
considering the body in this case
such as the level of realization of the Soul
it is precisely in general connections yes
physical there
general connections
we see that there is a concept
it's not just "information connections" there
there are physical universal connections

from the point of view that the World is structured by analogy, yes
and just as God is Eternal
gives life to the Eternal Man
then we are already in the information
we can mentally connect
any system with any other
there are no problems in principle

take some star's information there too
civilizations there Yes For example
take and compress, for example, with the level of development of the Earth
mentally what problems

No problem
it turns out that on a physical level
there should be the same development system
and in the semantic version this is a very useful property
then it turns out on a physical level
a person must achieve any system physically

i.e. if there is some distant galaxy
so in principle he should actually achieve it
even over time

and therefore
the meaning of development
is thrown into some space there
some ships are being built there, etc.
outer space is being explored

i.e. civilization develops in the semantic aspect
not just because a person wanted to , for example
there to fly into space
and because there are laws of development of physical matter
and these laws form themselves, generally speaking
attributes and aspects of physical matter

i.e. why, for example, the first flight into space
it is some kind of spaceship on a rocket carrier
because the linear development system
there is motor transport, let's assume yes
this is again a consequence of material development
to the next system
well, in a different form

then it turns out that air is like a system, well like some kind of there
as a knowledge bearer yes
as a bearer of knowledge already coming from God
i.e. air was created by God
for example, if we consider this situation
this is also a material environment
but which reproduces, for example , human life
provides solutions to problems for the human Soul

Well, it's kind of a bit complicated
it is precisely in the control of the distribution of information
the design would seem to be yes

and i.e. I show through the air
that air is also knowledge yes it turns out
given by God from God's point of view
for Him everything is knowledge
the air there are molecules of the planet, etc.

so when a person moves towards this
with the meaning of, for example, its Eternal development
then he clearly gets a very clear coordinate axis
where there is meaning there is universal development yes
where is its personal meaning

here is his personal meaning

he has to do something now
this is the axis that separates the general meaning

but as soon as he starts to move closer
to the concept of "universal meaning"
the axis is sort of leveled out and the person himself is the result

i.e. general development
First of all, the person himself needs it
i.e. he sees it visually
He sees that the universal Eternal development
it is he himself, as if in real movement
precisely into the Infinite Future

then it turns out that the Infinite Future
i.e. man sends himself into Infinity
and Infinity is controlled by man himself
which is due to the optical glow
is located here

then it turns out
what is clear is why God created optical manifestation
optics gives or element of perception yes
gives for example a level of visualization
and the level of one's own development

i.e. a person creates it himself
practically its Infinite Future
in this case there in general as if in an intravariant apparently
i.e. as if in an internal version

not an extravariant but an intravariant
i.e. he kind of approaches the system from the inside
or what about your future development?

it turns out that if we take
some let's assume as if extra, i.e. external option
or does extra still make sense
as if the level of extrapolative control yes
or is extra the highest level yes
i.e. connection with some higher environment

here it turns out that we see
what external control
or intrapolative management

they are connected in the structure
again this well as if a logical communication system

i.e. we see that the development system is such
what if a person had some systems of implementation yes
for example, it happens that in reincarnations there are levels of realization
then any system is revealed in its entirety

right here
if from the point of view of the Buddhist theory of reincarnation
we consider , for example, semantic systems
why do we need reincarnations for example
here we can see aspects of personality realization
in all its manifestations

i.e. as soon as a person is located
at a certain level there is a kind of next reincarnation
from the point of view of the Buddhist system
then he has such a level of development here
that at a higher reincarnation
for example, it can regulate
previous phases of development
i.e. they are practically connected with him all the time yes
in real time

the same God
God all reincarnations of all people yes
like, in a Buddhist version or something
embodiments of the collective Consciousness there

then it turns out that here for God
it all comes down to the development of His Personality
from the point of view of the development of these people

i.e. God sees how it turns out
meaningful development of One's Action in the development of people
i.e. God Himself creates meaning
which is generally understandable to a person

it is clear that logically man is created by God
understands that his development is also God's task, yes
i.e. God has a normal one, in general it turns out yes
human task
human development
in meaningful Action

then we begin to see
where exactly is the fabric of the Soul, let's say
this is exactly the structure of the Soul
forms, as it were, the following space

for example, we look there
to some planet in the galaxy
and we perceive the meaning of existence of this system
remote for example

but in the treatment of a disease, for example
we try to regulate all the time
those. our task is really
normalize the following system
here is the one that is located
at the level of let's assume some action yes

here for example is an action
beyond the action level there is Infinite Life

then it turns out that this is Infinite life
comes to you again

that's how, how on the semantic level
development of optical systems, for example
and that is the meaning of Eternal life
what are you living now

therefore this is the wheel of Infinite life
definitely you well at least it touches you

i.e. there is a level that always exists
like a feedback system coming to you
i.e. a single life already means Infinite life

and when you start to realize this level yes
well, some slogan that God reproduced there
for universal knowledge

then it turns out that God has well let's say ability
It is clear that God has any ability

in this case, it is precisely human ability , so to speak
translate into words
systems of action development systems

i.e. so that a person correctly understands some system
enough in the social environment
some kind of slogan word insert into management
put it correctly in the optics
and the control is accomplished

for example, the word "idea" mobilizes a person to do so
that he creates ideas

if we put the word "Peace"
then the person is oriented towards the World , yes , of course

the same action here is the word shown here
and as if Macroinformation

for example, the World could be the World in general
not just the world
as a calm and development of civilization or society
and just the World in general
i.e. the third meaning, etc.

then it turns out that if we consider
the mechanism of creating a word before its organization
i.e. the semantic level of word creation
why was the word created
what's the point
what is the meaning of the creation of the word "Peace"
why was the world named with the word "World" for example Yes

Means Well let's assume we can take this word and turn it around
Well let's assume how to read it backwards
or use letters there somehow
arrange them in different orders, etc.
but with all this the word "Peace" means to a person
exactly for example right there let's assume two values of the World

but in the word "Peace" there is also the word "miro" yes
there is a "measure of everything"
and there is also, let's assume, that which streams myrrh and "myrrh"
i.e. but "The world is sharpening" let's assume

i.e. we can create through words
Well For example there is the following logical
i.e. "the chiseled World" and so on.

the same thing if we have a structure of life

then as soon as we start
consider the concept of "life"
in the structure of information in Infinite Development
then we are the same as well let's assume as an example of the word's work
we can calculate by analogy
that life has multiple manifestations

and if there is any problem
then there is the option that there is no problem
logically it exists and by the way it really does exist
This is the most powerful control system
move to a semantic management structure
where there is no problem

and that's when you realize inside that there are no problems
she decides
By the way, this often happens to a large number of people
mainly for some
especially in mass-social processes
This is a powerful mechanism for solving the problem

it is there that there is a kind of semantic control system
when a person is inside himself
decides with a certain meaning for himself
that there is no problem

or at least he is convinced
that the meaning of this action is in this
in something specific

as soon as he at least records the situation
there is a change happening around him
well, some kind of control systems
and by the way, all over the world

here is work with sense controls
this is exactly working with information from the entire world at once
where for example the meaning of Eternal development
is for example often a single action

if a person has done a single action
then he can just calculate logically
so if it happened
then there is a point in doing it forever

i.e. it makes more sense to do this for an Eternal number of years
more problems can be solved

i.e. you can set up some logical schemes for yourself
and within the framework of logical schemes
develop a management system
these are already practically inaccessible to external influence
systems

and what's more, a logical element
which you played once
it has the property of exit
again to external information
namely the semantic management of Reality

it turns out that the paradigm of the World is yes
no matter how she changes
but the person made some meaningful decision
or accepted with the meaning of some there
the next finite or Infinite action
and it turns out that the stability is quite high
in some cases the stability is almost absolute

and when you bring the controls
to the level of absolute stability
then for example it could be
instant cure of disease
there may be an instant solution to the problem
that even the question itself does not exist if it is problematic

pay attention here
in this technology it is possible to output
from the circle of as if conversion yes

there to pull out from this wheel as if
well, developments
exactly to get rid of the problem completely

i.e. if the problem has such a position
that it doesn't make sense to you
i.e. then you can reorient
that the problem does not exist
because it has no semantic aspect
in this case

or doesn't have one at all
such as destruction destruction
it doesn't make any sense at all, this is how this action is

in relation to for example there to any object

and just as we start to approach
to such action here in awareness

it turns out that, for example, the system of any destruction
there including organic plan yes
this is what is not included in the concept of "meaningful action"
from the initially set level

i.e. the primary embedded level
Endless life destruction there and so on.
we have as if Well, this is the management position
that based on this, how would we actually do the management?
to Infinite Development

and in general when for example the system for example Yes
There is such a thing as endless development
that we are the next as if meaning and action
we bring to ourselves

i.e. why do any phenomena occur at all
what is their meaning
for example, there is a linear logical phenomenon, yes
suddenly it will kind of fall into some chaotic area yes For example

it's just that there is a calm development of the situation
kind of disposition arises
this is the meaning of such a manifestation in a person's life

i.e. a person comes to that
that he needs to get his bearings
in a situation based on the primary meaning
and try to understand or make control there
why do you have for example
the structure of precisely Infinite development

and from the chaotic sense , yes
get the meaning of Infinite development

i.e. if a person is in some action
how to make any of his actions
was sent
to a kind of infinite development
how can this be done

and it turns out that in this case

there is a primary meaning
which kind of moves a person forward
and here is a person who makes a conscious decision
Well, it's exactly like a prolonged solution
Of course, any person makes a decision consciously

but when considering that any kind of management
goes like a meaningful yes
for example, some action took place, here is a linear process
why did god make and create
for example, a nonlinear process, some chaotic action

this is just a direct example yes
i.e. there is a linear process
why is nonlinearity needed in solving the problem
because the linear semantic action is revealed
it's like a one-way action
which has only one axis of development
and it turns out that we don't have an external control system, yes
behind the situation

if we have a system of external control
then it is still some kind of introduction from the outside world
Well as if in information or in action

so that we would have a kind of development technology
from the point of view of external control
transfer to current process
then we actually have to clearly understand here
that God created all Reality
where there is an external meaning to His Action yes there For example

but the Action of God is always shown to man as if Yes
for example, in a certain manifestation of an external value
i.e. if you look at Reality and say
what for what for example there are houses there and in large numbers
Well, for example , why would a person need one ? let's put it this way
from the point of view of action
performs certain actions

then it turns out that it is precisely the external one
semantic aspect of the development of Reality
always contains the action of man in Infinity
precisely in Infinity

i.e. when a person develops infinitely
he can always comprehend the previous action yes
why did it happen well as if "in hindsight" yes

and then it turns out that there is only one way out for a person
it is precisely in the so- called chaotic processes
namely to live infinitely
then he can understand with the development of time
well, as it often happens with people there
that some certain processes

were happening at that moment
because for example Well let's say the next development was like this

and he kind of did it "after the fact"
or something, it starts to take control over itself
right now already

i.e. a person only needs to ask himself the meaning
namely, Infinite development
how it seems to instantly start to take control away
for yourself from your future development

i.e. it develops exactly then
because he sees his future

and based on this it turns out
what then, in principle, for example
there is treatment of diseases in other people by the way
This is a really powerful healing system
the ability to see your own path
in Infinite Development

then it is clear that you see exactly your path yes
walking along it exactly
do you have some kind of
a canonical system of connections or something
and if a person has any disease
then it is enough for him to perceive your signal
he is recovering
for this you can transfer the technology to him
show how you walk, etc.

and it turns out that the meaning of the action
as if another person
that you start to see
control system in this way

what does it mean as if from well or what of the future Eternal development
do you see why God created people exactly like this
that they should reproduce for example
what should they
Well for example, biologically yes

why should they have
each one has his own complete free will
because the meaning of God's Action
it's all about overall development
and informational
and material

i.e. a person must actually be able to achieve
for example or Consciousness
or materially
any elements where comparable systems operate

i.e. if he achieves it with his Consciousness
what is a molecule
there he looks through a microscope, let's assume that
or there clairvoyance yes
then materially formally, or even actually, let's say
those systems that exist materially
a person should be able to achieve them if they want to

i.e. information and material systems
they start to close in

also for God
God can be at any point of information yes
as if mentally informational
He can actually be
in any system of Reality physically

then we get a physical system of Reality
this is a system of reproduction of semantic movement
God and man at the same time

i.e. the meaning of the movement of God and man
this is the comprehension of the whole Reality
control of all Reality

but then the meaning of control that is transmitted to a person
he is the same
Man must control all Reality

so that means to work well how to act similarly to that
what God showed him

as soon as a person begins to control the whole Reality
God has the following tasks
tasks to teach a person to create Reality
due to mental action there yes
volitional action

as soon as a person learns to create Reality there
or he already learned there
the task of personal comprehension of God arises
precisely in the direct context
God is a man
i.e. man knows God directly

and then it turns out
human personality
The Personality of God
reach the level of interaction
human interaction by the way

i.e. human development
it has a development meaning
towards the Action of God

initially in prayers i have now shown
there this growth of prayer or turning to God
he's just passing the level
and material
and informational

i.e. a material person, yes, physically [...]
addresses God at a level that is, as it were, informational
but in the structure of Thinking
he can do sense management
forming a thought

here is the idea, this is the system
the root system in general here are the Thoughts
i.e. thought control system yes
for example, the structure of Consciousness
and the root system of Thinking is the meaning, among other things

and so when we want
thought

for example, to disband or to organize physically
at the level

as if information processes just yes
we must succeed in fixing the semantic system
under each level of Thinking

i.e. maybe even under one fundamental principle
towards the side of control
and then we get a coherent system

i.e. here are some thoughts yes
several development systems
By the way, I'm showing you a very simple one right now
as if mechanical, even mechanized there
because there are problems there
mutual movements of thoughts
system

that as soon as you put the control
on the structure as if the following yes

i.e. you get the management goal
all other thoughts are concentrated, for example , there too, yes as if
but there are thoughts of a different type
which seem to define some other actions
there are household thirds, as if insignificant

but if you see
the structure of the organization of Thinking
and you put the meaning of the action well For example there according to the
Macrotask

i.e. you concentrate as if yes at the next level
then all thoughts begin to shine in one direction

and then in the substructure of any thought
the meaning of your main action is born
i.e. you mobilize your entire personality
to organize that Reality
that you need to deal with
and in principle it turns out that
or which needs to be managed in this way
so that harmonious action can take place in Reality

often harmonious action
this is quite a specific and strong-willed long-term management

and based on this you start as if here
it is precisely to see that the merger is taking place
words and thoughts
i.e. for example, the thought that gives birth to a word is like this
that the word begins to close in on itself in thought

i.e. the word is shortened in pronunciation even
the speed of pronunciation of the word accelerates
at least at the level of Thinking
This can often be traced physically

i.e. you can say there, for example , a piece of a word
and others understand everything
i.e. as if communication through optics
telepathic communication
here is an element of telepathy
acceleration of the word as if a reverse fence of the word
towards the person

this is how I explained it
there is a concentration of will from external objects

in this case if you concentrate
glow from thought
in one direction of action
you can convey information without words without sound even
in telepathy

then it turns out that the meaning of this action
is
transfer of information
and the information is transmitted

God does the same thing by the way
He only directs His some effort
and this effort is realized

i.e., to accomplish something, for example
make control there
often it is enough to concentrate
some kind of internal or external level
on some task
and the task is accomplished
because you transmit information correctly without interference

often implementation
this is the transmission of semantic information
i.e. you only need to convince the control object
what does he need there yes For example
and control is carried out

i.e. why am I saying this?
it is necessary to do it through Macrosaving
Macro salvation is needed by everyone

as soon as the object of control is no matter what it is
treatment of the disease
or any action at all
begins to recognize the Macro meaning of your action
he allows himself to solve this problem
but on the basis of free will and of himself

and it turns out that God also created the task
it turns out Macrosalvation for everyone yes
Macrodevelopment there Infinite development
so that people are simultaneously in complete freedom of will
could move towards Eternal development

i.e. the task of Eternal development is movement

i.e. this is the way
this is actually the level of the Eternal development itself
in conditions of human interaction

this is in a logical, as it were, semantic understanding
I just applied the meaning to everything
some kind of analytical
of this process

and from this we can see the meaning
then detailed action
why is there a person somewhere in the kitchen
there is some kind of saucepan standing there
why does potato exist
and why is the water pouring in this case

we immediately begin to see
that there is a water supply
This is a diagnostic system
that's when we get deeper

in the meaning of the action and the word "meaning" itself ^{yes}
we begin to predict and we begin to see
future events

i.e. the meaning in the meaning there is a third meaning
this is the same development of events
and the meaning of actions is often linear

here the prognostic system is greatly simplified
if you are this semantic branch ^{as if Yes}
hold it in your hands and pull it towards you

For example there is a plane taking off ^{there}
Well, there aren't many meanings to the actions there.
there is takeoff, flight and landing, everything
he shouldn't fall ^{yes}
main meaning

you are pulling these systems onto yourself
^{as if} you start to spin the semantic wheel
this thread ^{and axis}
there and how it looks like a tree
more like a palm tree
it is precisely in the structure of information

there is such a thing as "the palm of primacy" ^{right}
forward go forward there

information that lies ahead
she really does look like
to the level of this tree geometrically

and when you start looking for this information
and pull towards you
then you see that information becomes manageable
i.e. you can influence the future
Here
based on the meaning of the primary action

after all, the main task of management
having laid down the action after all
get controllability of the next value ^{yes}
in the future this value or in the past
it doesn't matter where
or in the current tense

and it turns out that here from the point of view of management
there it is

some kind of national economic plan, let's assume, is big

how can I track it anyway ?

in the conditions of a market economy, for example

it is enough to determine the meaning of one person in general

he needs to have goods and food

and Eternal life all

the whole economy starts to be transparent at once

because the next action

it's clear what this plant should do now

and what else to build

the meaning of the action is the person himself

why do these factories exist at all then, etc.

i.e. it turns out to be revealing

let's assume the structure of the semantic action

we can build an integrated economy there

it doesn't matter what countries or states are there

take the Eternal Man

that's all

next to it is located

the whole system of development of civilization

and based on future development processes

it turns out that the action is meaningful

there is a logical action, so to speak

fairly integrated system

from the point of view of some scientific systems

let's assume that science becomes controlled here

there is some kind of formal scientific mechanism

again aimed at human life

and that's all

i.e. the goal and Reality in general

is only human life

i.e. everything exists around human life

in civilization yes in this case

so but when do we start this

how to comprehend comprehend

we can well there using
different configurations of this word
see from different positions
"to comprehend" is somewhere here optics
"to comprehend" from this side
is it possible to change the ending somehow yes

but the meaning of the action is
as if in the form of a vertical, let's assume, control axis yes
time axis

i.e. in the sense of action
time axis
has a clear geometric configuration
and for example, you can take time in principle like that
rearrange blocks

you have a favorable event yes
in the past
took it and put it in their future
mechanism of achievement
i.e. you can increase your experience
and as if based on this
logically it is clear
a person is always guided by that
that basically he's well as if it compares
still with the same old experience
your next steps

that's why this axis is meaningful
it can be extended because
it can be built up in this way
that it is not necessary to take something there mechanically
and pull it out and put it forward, yes
something as if taking away so that the system would be

It doesn't really look like a pyramid
and how is the row of cylinders
cylinders

but in principle sometimes it changes configuration
but it is not always a rigid pyramid
here there is always a difference from the pyramid
although from a higher level
so the output of information is still like that
that it is quite specifically manifested
as a system of information flow

so when do you see
this is the stock of information, i.e. the lines that go
then you see how a person lives forever
which stands on top
regulates its systems
for example, an optical level

this man is very clear
actually in control of the situation
because it has for example there is the meaning of Eternal development
in your body

then you very clearly find his cell
where is the cell that initially started developing it
towards Eternity
just a material cell
look at yourself and find it in yourself

and then it turns out you already have
the most powerful healing resource, so to speak
which or a healing resource yes
from the point of view of Infinite development
which already basically takes you to the cellular level
if you have one such cell
then you are Eternal

i.e. it is basically impossible to get to you
at least from a disease point of view

and so that the picture of events there would be favorable
well add two more cells of this type there
well, well, to some other places so that they are there

after all, God's cellular composition is like that
that He concentrates information on himself, as it were

cellular distribution
He does it in analogy with how He sees a person.

the same thing happens to a person
the main thing is that the cells don't stick together
i.e. He should simply distribute these cells

i.e. there is a system of information distribution

why the world is multifaceted and diverse

because the meaning of the action
he is not in a single impulse
and diverse
and at the cellular level it is clearly visible

by placing at least three such cells
that means your event area is also defined
at least in events
you begin to experience a beneficial effect

and then having a sense of action there
there is "Health Norm" and "Event Norm"
which is what we mainly do in management
so "The norm there is personal goals" yes
there is a goal of a creative type

because in this case it is clearly visible
that it is only creative goals
have infinite development
where there is creation there is Eternal development

then the meaning of action is in creation
i.e. it still turns out to be something like this
as if a popular educational system
directed towards creation

here you have set up the control system forward
and you see that you are Eternal yes you are an Eternal man
have a fairly simple structure

i.e. the knowledge of the Soul is provided
i.e. you have Infinite development
because if you look there for you
you still have the same Eternal life there
you get into the structure of Eternal development
and it turns out that the meaning
current any natural action
this is Eternal development
and that's all

once you reach that meaning
you get into stability
which God showed you initially
to your Soul
you enter into the knowledge of your own Soul

then you are really in Eternal development

and as soon as you take such a position
it is just a real position
this is real life
then all events begin to develop favorably
as if or by themselves
in fact it is your control system

when working with this system
try to make external events like this
so that the meaning of your action
and the meaning of the events' implementation
coincided
then the control will be more coherent and more effective

and try to quickly pass on knowledge to others
who will receive

because the meaning of the action is still
is the transfer of knowledge
and quite effective and fast
in this case
possible transfer of knowledge

This concludes today's seminar.

Thank you very much for your attention
