

GRIGORY GRABOVOY
The Teaching about God
Method of managing the global level of Reality
19.05.2004

Hello
the topic of my seminar today
this is my Teaching about God
Method of managing the global level of Reality

In this method, it is necessary to consider first of all
principle
when your Soul is in control
almost all processes of Reality

in connection with this, immediately at the time of today's seminar
you need to tune in to that
that control of all levels of Reality
including distant levels of Reality
this is your personal task
where is your body it is also a level
actually expansions of Reality

i.e. you perceive Reality
as a system that interacts with the body

due to this
level let's assume sensory level of feelings
this is also a control system

i.e. you clearly define
where are the boundaries of, for example, a sensory wave
i.e. "wave of feeling" is an action
and from here you start to practically build your body
as Reality evolves

it turns out that at the center of this control system
there is a level of your physical body
and it turns out that the physical body
this is the level of further management
i.e. the level of creation of future processes

in connection with this on the physical body
we can consider this principle
and where are the elements of the future Reality created?

from the point of view of the physics of body development
physical body

and when do you start
this process is considered
precisely as a management process
then you begin to understand
where your Soul growth occurs
i.e. the transition of your Soul into the physical body
from the point of view of Consciousness
i.e. find this actual nodal point
or control point control area

and then you start to see
that your body interacts with Reality
as if being in this Reality

i.e. in fact, from the point of view of the body you are already
don't perceive the difference, for example
between the level of Macromanagement
or the level of control from the physical body
i.e. the physical body perceives
all signals of the Universe
all signals of the world

and it turns out that when you start
this level of Perception translates into Consciousness for example
then it turns out that Consciousness is that
what is formed under this status
i.e. Consciousness is formed in the same way as the Consciousness of God
is formed under the level of precisely universal action

i.e., in fact, localization even in optical terms
localization of the structure of Consciousness
in this case it is like this
what you see as the focus of all events in the world
in the element where your Consciousness is
interacts with these systems of the World

it turns out that the control principle is actually quite simple
when you consider the system as multi-optical yes
many tricks hit one spot
and this point is your Consciousness
then you begin to understand
how your Consciousness interacts
with all the elements of the World
as God does for example

it is in the action of Macrodevelopment

in this regard, we can consider here
the status of the human body

as a level for example having
well, a certain physical form

due to this

Well let's assume if a person gets up
and then he will spread his arms to the side
then the focus is directed from the chest to Infinity
precisely from the physical body

if he folds his arms
then the focus is directed inside it

and based on this we can see how
even a mental representation of the physical body, for example
let's assume arms are spread apart, i.e. a cross shape
this is the level of interaction with Infinity in fact
with Infinite level of Eternal development

i.e. the construction of future events
this is also included
some elementary action of the physical body

and when we begin to clearly trace here
where does the body build future events?
then future events become already tied
on the very action of the physical body

i.e. here in a state of, for example, rest
you start to define
where your physical body is involved
in the structure of future events

once you have this management structure
you begin to see
i.e. to see a direct connection
future events and the physical body
then you see how God is in the future

because for God
future current yes time or past
this time is one

so on a human level
from the point of view of forming one's Perception
you need to be able to be in the same way
in fact, in the system of future management
but at the same time being aware of the body for example here yes

when you start seeing this control feature
then it is clear that in such a status
you are no longer subject to any kind of let's assume
there is a random scholastic external influence

i.e. you are there all the time
in the zone of permanent concentrated control
while doing some generally speaking everyday chores yes
i.e. without making any special management technologies
only by understanding this process

and when do you start to understand
you see what you understand
i.e. if we take , for example, the hemisphere of the brain
left yes
then go to the right
then just look at the back of the head
what you can see is what you can see
how is your Soul formed at all?
your own body

i.e. the element of creation of you
with your Soul
this is already becoming an open technology for you
i.e. you start to control
the system of one's own Consciousness
and in that regard
where is your own Consciousness
your Soul
create you

at the same time you see future events very clearly then
i.e. the vision of future events is the same Norm
as we suppose there is vision and physical sight in some cases

and when you start to realize
the structure of an inseparable connection
with future events

system as if of Eternal development
then you are faced with a different set of tasks, in fact

i.e. the tasks of Eternal development
where you can perform
a system of seemingly prolonged or infinite control
based on the primary impulse of its birth

i.e. it is enough to be born
and man can live forever
from the point of view of this technology

and when you start thinking
and how, for example, to be born, yes
from God's point of view this question is also worthwhile
for God is the One who recreated Himself
He naturally did it on his own.
according to some criteria
from a human point of view it is also logical

and when we start to find
here is precisely the logical criterion of control
it turns out that the system is precisely for making decisions, so to speak, yes
Primary Creation Level Creation System
This is a personal choice of a person even before his birth

i.e. a person actually chooses for himself
where it should be created
and at the same time he must clearly define
function of all future events

i.e. in a person initially before his birth
there is a level in his personality
which defines it quite precisely and specifically
system of future events

i.e. in this case in order to realize and understand it
Of course, one must be able to manage the whole Reality
to see what the person's next tasks are
when it reaches the full control system

because in any control system
need to know the next level
to be stable, for example, in the current

and when you, for example, do development
towards the technology of Eternal development

and you see that you are getting control
and this management is management towards Eternal development
then you need to ask the question right away
and what will happen next after Eternal development

i.e. the question, well, in terms of logic it doesn't really fit together
as if with a linear and deterministic level
some concepts
nevertheless, the question arises here
at the information level simply
at the level of the Soul

The soul perceives information in a complex manner
like the whole world
i.e. Eternal development and all
it's basically like a constant
this is the final value for the Soul

Infinite Soul
this is also like a single value, so to speak
for God

so from God's point of view
management is a personal factor in choosing a solution
on Eternal Development
i.e. God puts the structure of the Personality of his own
into the system of Eternal development

so when a person develops, for example
towards the Eternal development
from the point of view of technology, for example, the personality of a person
it turns out that personality is defined by this
how she chooses her system of Eternal development

why does personality develop one way or another yes For example
then the question is exactly well as if controlling fate, so to speak, yes
in Macrosense in Macroreality
this is the level of the initial decision of the individual
before creation after all
i.e. in the end it is God's Will that happens

and when do you start
from here, as it were, to model a system of some events
in terms of recognition, is it just recognition?
because in this technology it is enough to know
what you already know
i.e. well, recognize the primary signal

which you had in the bright primary choice

and this is the recognition system that results
this is a system of dynamics and construction of your physical body
i.e. your health is your Norm of events
you recognize in the system as if the current Norm
all the time
what did you do initially
i.e. what did you decide on in general?
before doing something and how to realize yourself
in some action

and here already arises
this is exactly the glow of the Soul
i.e. the light of the Soul from God which is Infinite and Eternal
i.e. you begin to see this light
which is already really directed to everyone

and this is for example there is general health improvement there
universal salvation eternal life
i.e. you begin to see at the optical level
these coordinates
i.e. the light becomes different
it is different in quality and characteristics
as if further prolonged or infinite action

here is a simple , elementary example
if you take and select some piece
well let's say light and just imagine some kind of segment there
and consider that he is Infinite
then we see how your Consciousness is compressed
and forms
For example there is the shape of the head
body
i.e. you start from a sort of finite piece
shape your own body

if we consider that this piece is Infinite
just take such a function and put it into Consciousness
a piece of this world Infinite
then it turns out that you are forming
the structure of the Physical Body of the One God
in your Perception

and it turns out that it is one and the same element
depending on how we tune the function of our Consciousness
shows the system

and general and private management

and in connection with this it turns out that the choice of your solution
for example about birth about Infinite life in Infinite development
as God did it
this is an action originally sent to God

i.e. a person must at some level yes
first consider in general
what's happening
how was this even done in the first place
and here the following parameters are entered
like the vision of the Soul for example
or the hearing of the Soul
i.e. the Soul initially hears

from the sound yes
from the Word of God including
and originally from the Word of God too
and in general from the Word of God

is being formed
from the point of view of human perception
as well as his, as it were, primarily manifested Soul

what both God and man see at the same time

but initially God sees
Its essence in the Soul of man
for she is this and His often Action yes
in terms of choosing a solution, this is what is meant
choice
initially it is of course His Action
but the individual is completely free

here there is a very clear gradation of the choice of solution
when the choice of solution begins
then it turns out that personality
both how it is released and how it is tied more tightly
on the system of Eternal development

freed from as if Is there a personal factor involved?
i.e. the personality "on the contrary" is deified at the level
already strives for God
because complete freedom of decisions complete freedom of choice
it is still an action towards God
God created the Infinite structure of development

and it turns out that this freedom of will is freedom of choice
it is also needed for that
so that a person would be truly disposed towards God
so that he would strive at the expense of , for example , his creative actions
to understand yours correctly is primary
for example, the right path chosen

so here is one like this
quite a simple question in general
how he initially chose correctly yes
before its creation
For example there by the hearing of the Soul

let's assume a simple, trivial question
and did the Soul hear its path and future correctly?
before full implementation

very simple technology arises
so that the Soul would clarify, let's say yes or say
what is really so
there must be a physical body

it is very clearly visible here
growth of the physical body
from the Soul
from the action of the Soul
it is in the Spiritual understanding of this process

and when the physical body is already realized
then you can always, as it were Well there is a correlation, let's assume yes
there is always some next action you can take
towards Eternal development
i.e. the physical body is a necessity for development
and in fact, in a certain sense, the growth of the Soul
from a human point of view

for from God's point of view
it turns out that God is always
has an Infinite Soul
and for Him the Soul was originally created
in all future manifestations
it is practically on the same level

and when you start combining
that's the level of development yes

and the level is exactly like Infinite statics
from God's point of view
then you see that this is the process of childbirth
human development process
this is what you are originally
at least they wanted to manage
from the point of view of their own destiny of own intentions

and then you come to yourself
where are you manifested
as a structure interacting with God
where are you well For example there you talk with God
where do you communicate with Him

i.e. you begin to see the Light that God sends you
by his Word, i.e. by the Word of God

and it turns out that then you can naturally
see very clearly
because God creates precisely the creative status of development
where can you for example improve your health, yes
in some specific place
in this place
in one way or another
or for example let's say just doing some action

i.e. you start to see where it is
here is the action of God
according to the Eternal and universal Eternal development

and at the same time there are very clear transitions
where is your personal Eternal development
and where is the universal

when you start to see
these are the transitions
that's already
Well, the transition is basically on a physical level
it looks purely like a light-optical one in general
you can even measure it with external parameters
for example, some kind of objectified video cameras
let's say digital with special settings, etc.

and these systems are visible around a person
where a person begins to generally move on to that
that he regularly makes certain decisions

and that's when these decisions are correlated
Well, it's logically clear
that everyone is constantly making decisions

but here in this case we are talking about that
that this decision is elective
i.e. the correct choice of a solution is an action
or co-directional
with your own personal primary choice
before God organized your personality for example
maybe it still doesn't fit together
here with the initial tasks of the personality

Well, a simple example
the man decided to build a large multi-storey building there
and such is life that he does something else yes
let's assume he's digging a canal for that
Well, if we consider this process
from the point of view of the person's personality
there is some water flowing there and it is completely unclear
why and where does it flow for this person

then it turns out like this
Well, I took such completely different examples
then it turns out that the personality is forced
for example, build this channel
and initially what was visible to the individual
in the form of a large multi-storey building, and yes

and how can one person build a multi-story building
i.e. also a question

nevertheless there are individuals
which naturally are the majority of them
initially a person sets himself
An infinite number of tasks
i.e. in principle a person is capable of solving
any task on the merits

but then it turns out that here he is forced
then turn to yourself standing there as if
at the primary choice level

i.e. here the situation can be shifted
only by turning, as it were, initially to oneself
to the level of its own creation

in human manifestation
i.e. in the Perception of humanity so to speak

and here it is already very clearly visible
what is the choice of solutions
it is a direct and complete connection with all humanity

that's why he chose this house yes
this particular person
it's clear that it's multi-story
because other people will also build this house
Well, I'm speaking conditionally of course, or specifically, including

and when you start to see
to prevent an explosion at the nuclear power plant
how can building a house lead to this
the one you initially chose

if you are building a channel
then reorient the control system
but only initially
to the level of creating one 's own personality
as God does

when you are already building this channel then
then no problem
please put it into the control system
construction of this house
but already at the level of a kind of technological choice of solutions

and here a connection with the personal factor arises yes
it is precisely the factor associated with Macroreality
and your factor where you interact constantly with God

i.e. you see that during the construction of this house
how are the systems of Macro-creation manifested
i.e. how to lay, say, a brick, yes
so that there would be no explosion of a nuclear power plant, for example
even if it is remote and on another continent, etc.

i.e. you begin to see the structure of things
in terms of their even optical expression

i.e. Perception increases to the level

when it is absolutely clear
there are contours, for example, of bricks, some stripes
where can I take it, push it a little to the side
and there won't be a nuclear power plant explosion, for example, from your point
of view

but this point of view is often sufficient
because as if leaving
namely fundamental, so to speak, information
in one place
she is often the center of the world
precisely in action

and therefore, for example, in the treatment of diseases
are some particularly complicated ones there
Well let's say which may be considered incurable
from the point of view of the orthodox system of governance
medicine so to speak
and it turns out that here often
electivity of this nature
this is the task of constructing each cell in general

then it turns out that we are forced here
such processes are here
about which process I have just told
as in general about a linear process about one yes
we have to choose these decisions here
constantly
which means we must significantly
increase the speed of learning
speed of information recognition

and the main information is exactly that
that when a person understands exactly
and sets the task of Eternal development

it is from here that he gets the main
as if a code of information
the main charter of management, yes let's say so

i.e. rigid control systems
which are not even often expressed in words
namely, understandable to man

and it turns out that when you are already from here
as if you were transferring control information to yourself

then here you can see that your management
this is practically your action, but the action is Infinite
and to get technology for example to increase speed

Well there for itself as if it were necessary

a person can set a task
just health restoration
even when he is healthy
he doesn't necessarily have to be sick

or simply treating any other person

then it turns out that there is an increase in speed
it's like a confiscation

Well, at the optics level, let's say yes

it is visible so there is some block of information glowing
some light

you are removed from the Infinite phase
and as God does, just bring it in
as if into the structure of his personal decision

i.e. the main thing here is to convert
this is the external Infinite, as it were, control
that you personally think so and you can do so

and when you do it
then Infinite number of connections
exactly as I said, the Macro Universe, i.e. the whole World
the whole universe
exactly all the management so let's say yes
you could even say so
what is the global governance system
and not just the whole universe

then you start this system
output
to the level of its action
i.e. conversion of a kind of mechanical system
in the optical expression of Eternity

i.e. a block is taken
is removed from the system as if of Eternity
but Eternity doesn't become any less because of this
Eternity is Eternity
i.e. it is a problem-free characteristic

and when do you take from there

you don't take anything from anywhere

so is God

He creates and has created and will create

but He doesn't take anything anywhere

This is His personal internal status

He understands Reality in such a simple way.

and when you start to see

then God gives you the knowledge that you direct

precisely on Infinite development

but it already turns out from the level

own decision

own development

i.e. your decision now

coincides with that

what have you decided up to the moment so to speak yes up to the time

when did god decide to create your personality

and when else did you make a decision before this moment

i.e. an even earlier moment

and here arises

here is another aspect of complete human freedom

i.e. man is designed that way

that the principle of personal freedom is a timeless principle

this is an analogy with how God is structured

and when you begin to understand this structure

then it is clear that Infinite development

in fact, it is often a simple technology

You already have it, but many people may just need it

Well how to add a control system

and then you begin to live in the system of Eternity

because Eternity

this is your Soul

the state of your Soul

You just have to expand it around yourself

and this light that is already coming from you

he also restores you, he also heals others, etc. yes

improves events plans events

and here is the important element

what is event planning

i.e. decision making system

why exactly if we abstract

from the deep roots of the action
and proceed from the fact that there is simply some event

here we begin to reason, for example, in everyday terms
when we consider that at the everyday level
we don't need to analyze at all
here are some deep roots of the action
but nevertheless the action must be comparative
it must be compared with that
and act the same way
as well as deep management
this is the peculiarity of God's Action
in the system of Macrocontrol

for God governs all equally
and He controls any process like this
as if it were
or something like that for example there is a macro complex process yes
or let's assume a simple process

and this is the level
as if abstraction from the complexity of the tasks
this is a transition in human understanding
to the level of day-to-day management

i.e. from this point of view
everyday, so to speak, some kind of behavior in everyday life
household management
management of household items for example
this is often a monotonous control
but in essence it is always like that

i.e. doing something in everyday life
the person still participates in Macromanagement
because even because any manifestation of any thing
this is an expression of the Macrostructure of the World

and when you start to feel these lines
exactly feel
sense of movement yes
a sense of linear movement in Infinity
where Infinity is linear
Infinity Line

here you start to highlight these lines

and then the music started there is universality yes

for example Infinity as a string
pulled one string, then another, then a third, etc.
and Endless Melody

i.e. sound is an expression of Infinity
in linear Perception
Primary Linear Perception

God also perceives you primarily on a universal level
He gives it out later
precisely the Infinite characteristic in understanding

i.e. in this case
a person having, let's say, a physical body
which means capable of developing forever
already in logical understanding
can evolve to Infinite Development

i.e. initially given
and the fact that he can come to that on his own later on
what you achieve on your own through personal practice

and when you start to dock here
at the same canonical level
well, like a tuning fork
that the original action is still an action
which was the same as you making the decision
and it was accepted correctly before your personality was created

and every next action
This is an action of Rescue under Macromanagement
those. your development
you see that God is then next to you
He is specifically here
and you see that in this case learning is quite simple
you just need to look at your actions
from the position of their understanding
because God understands them, for example

or as another person understands
which has achieved da Macroregulation
or he reached the control system

here in this technology
my Teaching is spreading quite quickly

in that regard

that a person is simply an understanding observer
even for the correct actions of others
he sees why they made the initial decision

i.e. closeness to God in this case is conditioned by the fact
what a person sees as decision making
before the creation of personality as such
i.e. this is still before the level of general structuring of the Soul
when the Soul of a person is expressed
how exactly is the Infinite Action of God
in general development

and then it turns out
that man sees the Action of God from the beginning
i.e. what exactly moved Him means God
for the creation of, for example, this Soul

and here it turns out
what a person sees as his primary action
primary expression
it is in the Action of God

then he understands it turns out
the root of all your problems is actually
why is it in some cases tied to that
that he is there for example, building a canal

but that means God once had certain tasks, yes
at a certain level of development

and even if he chooses the primary solution
Well, the channel is of course conditional, it's related to that story
that he perceived the house for example
and is currently building a canal

then it turns out that when you start
synchronize
i.e. to pull these events into one
then you see that God can change this system quite well

i.e. God has the power to do so
so that you understand the Action of God
were able to modify the system so
as if she was like that from the beginning

i.e. you see
and God's Action God's Tasks
before your creation , for example
and then you see that when you chose

you could well, for example
Well, more emphasis should be placed on the personal task
but at the same time there are still God's tasks

and when you start thinking then
and in general, what did you choose then?
i.e. the personality has not yet been created
i.e. there are only levels of manifestation of the Soul
for example yes the hearing of the Soul
it means the Soul perceives the sound of God
but the sound of the Word is also a creation

and it turns out that you start
enter into communion with God
you see your continuity
i.e. indivisibility in fact with God in essence
in essence freedom and actions

this doesn't mean that you are somehow enslaved there
are you somehow too conventionally well there are stuck there yes
to some information of God
this is wrong

for everything is God
that's understandable
in the Action of Infinite Development
but in this case your personality
this is the essence of God's Action

i.e. solidarity with God in that
what is Eternal development
and that means this is your need

i.e. a conscious choice of the system of Eternal development

so it turns out you chose
from the point of view of Eternity
Eternity in the future you still exist
it means you have already chosen in each of your next actions

logically this task is very simple right away
in this case it is understood as very simple

it is clear that in the future you exist
the signal gets into any structure of the past
no problem and you make a decision calmly

but here is precisely the main task
as in the current tense

i.e. understanding the current time
so that the current time determines all connections with the Macroverse

after all, when a person has something incorruptible, for example yes Eternal body
the tasks are completely different
here we are talking about what to recognize
and be able to apply the principles of these tasks
already now

and when you start to see it
then the perspective of the tasks is exactly how it unfolds
ability to combine
both past and future events
in order for the current time to be as long as possible
or Macro Manager
controlling all processes of the Universe

only then is a person already firmly unambiguous
he is confident and forever confident
that he controls all processes
from some unknown corner of the Universe
some particle will not arrive
which can be harmful there yes let's assume

and then it means you already see
that the interaction is precisely at the Macro level
with all the elements of Reality
it's just your personality
but in ordinary everyday life, as it were well, conditionally yes , in action, or something
while performing their usual duties there, etc.

once you have fixed such a control system
then it becomes clear that the normal state
well, so-called yes, ordinary
where there are no special technological principles
or special systems there or something like control through Consciousness
naturally there is no talk of anything there
no trance states
because i always say

that needs to be managed through logic

and then you start to see
that this state is very ambiguous it is ambiguous
the same with God in a simple state
God rules calmly
He doesn't often make special efforts.
maybe only in personal contexts
and then, as a rule, when we are talking about some individual person

and at the Macro level
God always keeps the principle
namely the structures of Macromanagement
i.e. in relation to seemingly unambiguous control

and it turns out that there is one very difficult principle here
for example, maybe yes, there is some probability
we assume a nuclear power plant explosion
God in this case He makes generally simple management
there is a very small nuance here

but if we are talking about
it's just a subtle nuance
pay attention here
if we are talking about a person as such and about one person
it turns out that the management here is like this
that God often gives maximum effort
and the efforts are comparable to those
when God created Himself

because personality for God
this is a completely unique level
there is only one person there

and when you start to see this work of God
then the whole Universe becomes understandable
from the point of view of interaction
The Personality of God
human personality
all other actions are already investigative
these are actions aimed at the co-development of individuals
God and man

and when do you start?
so, well, in this management plan, we must act
do it this way

so that now at the moment for example yes this understanding

i.e., go to the Personality of God
look how God gives knowledge for example
and at the same time you can see quite well
that your personal action i.e. any
your specific practical tasks
and your tasks are understandable in this case
and can be solved simultaneously

here is a very specific option
when there is a simultaneous solution to problems
what is of colossal importance in this control technology

and when you do this for example
try to solve
in action it is precisely the relationship with God
in action
when your soul
directed and interacts with the Soul of God

at the same time the whole Universe is like some kind of combination
or Macrospeed of events
this is an external but very understandable system

Well let's say a person is driving at high speed
the wind is blowing somewhere there and some events are happening
but he understands that this is a good, normal event
Well, the wind is blowing , well, that's how it should be

but he understands that it exists
i.e. the level of understanding
The spirit that is created by understanding
creation of the Spirit
creation is taking place
you see the creation of your own Spirit
from the point of view of that level again
where you make decisions about your identity

and at this level
now make management according to your tasks

you are considering creating your own Spirit
and you are already in control there

the management here is fundamentally completely different
because that's what we're talking about

that man has the technology of Eternal development in this case
we are talking about future processes and for many about current ones

so when we start talking here
this is the level of management where you
in fact, you have your own future events
which, in general, you choose yourself, yes
you are back in the decision making system

so now make the control from here
I will work with you

specifically for your personal tasks
tasks of the Soul to a greater extent

and now go to the control system of this kind
what if for example we are considering
for example, the child's actions yes
Here is the child's consciousness, it is developing
but a child is at any age
he controls the same way
and often essentially due to the fact that
what exactly does he mean well in general, it's small , yes
such practical experience
i.e. the essence of management is that
that he immediately sees the combination of the choice of solution
and what he initially took as a decision

i.e. we are talking about that
is somehow fresher in the child's memory
what happened before he was born

but that means the task is this
that it is enough to restore the memory structure
Well , to put it simply, remember to pay attention to this
and take to remember
because you can always remember everything

and when you start to see it
then you see that the child's action is also comparable
i.e. your development is such that every moment of yours
including the age when you were children
this is, generally speaking, the same fairly concentrated
control system

and apparently naturally everyone can remember
in my life
some kind of, well, let's say, events
when I had to strain myself
It would seem that it is not clear at all why
i.e. some ordinary things
and suddenly some colossal tension

these are the task lines
the task lines are always the same
God always sets the same tasks
in front of a person regardless of age

and it turns out when you start to see
where did you solve your problems as a child
i.e. you begin to see how you solved
you come to that
Quite a few people can see it right away
what exactly is technological so to speak relations

in general it can be called
that these are actually management technologies
originally given by God to your personality

these technologies are actually always the same
For many people they hardly change at all

and when you start to see why
so it turns out that it is quite correct and proper there
systems for resolving certain event situations were laid down

and based on this you can pass on knowledge
For example there for any children
that means any generally speaking levels of information
to any adults
or in Infinite Time
just because you kind of highlight
these are the power lines of tasks

i.e. God puts well in optical terms
this is the task at any age
a person decides it
and for some time, well, some kind of state similar to rest
and then decides again, etc.

and it turns out
that this is the system of Eternal development

Well, there is some cyclicity, yes let's say so
here it is already manifested from the very beginning
i.e. it turns out that a person in principle is essentially
I don't even really take a break from this task

i.e. the concept of the so-called "rest" in this case
it's just there for everything
that a person is, as it were, in everyday affairs, in some of his affairs
Well, he thinks that at one time or another
For example there he is resting and somewhere there physically
or he just has a vacation

but in fact, if we look at the situation
that God is always creating He is always doing yes
some specific task, very concrete
the task of Eternal development is realized

then it turns out that a person also has a comparable factor
this is a system for solving problems regardless of age
and the task is to transmit information
any system
for any age
and including in Infinite Development
there is a special technological factor here
which I haven't talked about before
this is the transfer of information to Eternal development

i.e. a person, for example, can
well let's say treat there cure
for example, incurable diseases
some kind of real-time control systems yes
or let's assume to manage the system of strategic events of perspective

but when we talk about that
that he must transmit information to Eternal Development
this is generally a special task

because the concept of "Eternal development"
this is really about Eternal development

then it turns out that he should
First of all, understand it absolutely clearly
and what is Eternal development for him personally
logically clear
well, how simple is it Eternal number of events

but as I just explained

there is a constant choice of solutions
and constant work on self-development in fact

and here we get the Eternal number of events
this is also a choice of solution
but now
precisely on Eternal development

after all, initially a person still chooses
some kind of development of its own
he knows that he is originally Eternal

hence
to transmit information to Eternity
it turns out that we can do it from this Eternity
how to get control now
if we can convey there as if the correct one
your management level
i.e. the level of your already set tasks

and it turns out that it is a personal task
has the factor of Eternal Solution
she enters Eternity somewhere and the same private task

but here we are talking specifically about the technology of translation
Well as if the optics of Thinking yes
i.e. optical phase control
into the structure of the Macro level
or superconcentration of information of the energy of Eternity

i.e. this is a problem , let's say, at the level of matter densities
it reminds me of this one, that there is a certain stone
you can take some kind of needle there
and somewhere in the stone there enter information
and at the level precisely that the density is very high

because the task is not to destroy the stone
we need to understand how we can convey information
if we don't want to pierce with a needle, for example
stone

then it turns out
Well , first of all, it's often impossible with a needle, yes
as in the case of exactly this task

and it turns out that when you set such a task

you need to take action then
in relation to the stone
Why is it needed at all?
why do you need a solution to this problem

and then, as it were, a logical action
i.e. the growth of the structure of one's own Spirit
solves the issue
namely central control for stone

i.e. the Spirit determines the place of a given stone
as if in the control system
but already on the logic of interaction with God

i.e. your action is an interaction with God
direct
any action

and when you start to understand this system
then it turns out that you are transmitting
into the system of Eternal development always
because you do the management practically from yourself
but at the same time God is with as if with a high level of control
with high technological level of management
when He apparently even controls with effort

and here is the technological control of God
visible as a personal characteristic of a person

i.e. you see in your Perception
Well, let's say God is a hard worker, so let's say yes
He makes sure that the information is yours.
got hit
into the information of Eternity

and you begin to see that this arose because
that you highlighted Spiritual status
you didn't set the task, for example, well like directly yes
take and pierce the stone there, even with a drill, let's say

namely, they set the task of the meaning of this action
God's point of view, for example
well, knowledge of the structure of stone for example

then it turns out that you are already acting

at the level of Perception
This is how your personal perception is formed
on any action

and when you see that the Perception of Eternity
This is quite a stressful work of God, generally speaking
from a human point of view
you begin to perceive the Personality of God
exactly that Person
who made the decision in the first place
about its creation and Eternal development

and here then it turns out to be a personal factor
It is quite clear to you what God does

i.e. in this case he is doing a normal job
the only difference can be in this case is that
at the personal level
that He sets the task at home
He will actually build a house

but here you kind of have to try
then just act in sync with everything
or just kind of learn from experience, yes
may even stand aside and watch
but it's better to do the work together

and when do you start
for example, perform this action

then it turns out that you begin to see
where God is manifested in your action
and how does He help you at all
here in a specific action
i.e. completely there in some everyday action even
it could absolutely be reusable
a familiar action has been committed

and when you see this action
Action of God
i.e. how does He help you at all?

It would seem why should I help you ?
elementary action there
you know how to drink water you know how to drink tea
the only difference is that the water can be cold

i.e. the difference in Perception is that tea is mostly hot

and if ^{let's say} you start thinking
about the action as such
here in repeated action
then you see the Soul of God
A soul directed precisely at that
to help you in all your affairs

when you begin to realize this structure of God
it turns out that your stress ^{is generally} often
or ^{is it} a normal action?
this is the work of the Soul of God
towards you

i.e. the severity of the action is often the work of the Soul of God
towards you
and often it is absolutely clear that this is all

and when you see
then it turns out that you see that God is doing something
generally speaking often even sometimes ^{there for example} for you
a certain job

then you need to master it and do it ^{further}
i.e. to understand

when do you start to understand this
then it is clear that any logical action
^{for example} do it like this
so that there is no ^{such thing as} there are terrorist attacks in the center of Moscow
in large buildings where there are a lot of people
then you have to do the work for these people

i.e. you should see
where do they go what do they do
and ^{how to} shift the information
i.e. to really influence Reality

or the plane takes off
so that the dispatcher has time to make a decision
means to make him make the right ^{decision}

i.e. Reality is controllable in human understanding
your action is work often for others in this case

and when you start to see

that you should then have all the more ^{so}
some ^{for example,} higher or colossal technological advancement
then the question arises again
that it is necessary to increase the speed of perception and control

and here it turns out that people set themselves
Macrotasks

^{for example,} to build again to the same house ^{yes}
multi-storey building
because they see that their action
there should be more redundancy

and when you start to understand this
it is clear that the primary perception of a person
always unchanged

i.e. initially God gave man
clear view clear perception
He is always absolutely clear and correct
chooses for himself the primary path of Eternal development

therefore it turns out that this is the concept
^{well,} the so-called "possible correction"
or bringing to the next Norm ^{yes}
actions initially defined by you
this is the action of co-development with God in essence

God who gives Eternal development
you just take everything and act by analogy

and in this case here is the action by analogy
those. system of knowledge of the Action of God
this is precisely your special task
which, ^{generally speaking,} is of course necessary
for a permanent solution
precisely for Eternal development

and here you understand
that you are to Eternal development
come yourself anyway

i.e. I just showed the element
where God showed ^{yes} God revealed to the control level
but in principle I'm already showing it here
where you act yourself

for this you need to realize it works

the weight of the tasks of the Soul of all people in essence
I mean the Macroverse
from the point of view of human understanding
actions of people
and how hard it is for them, for example, often
in terms of the action of the Soul

and it turns out that the weight
this is the emergence and movement towards the Light
i.e. that's exactly what is meant
no, not in some place For example there is "bad" yes
conditionally, even in quotes, understanding
namely, the heaviness in the expression of light
that Perception of the Light of God
this is a certain pressure on the Soul of a person

and to see the Light of the True God
you need to have a concentrated Soul
like in an optical version or something
namely its own light but already going to God
and comparable to that
to perceive the True Light of God

then it turns out that the concept of "gravity"
or let's say the concept of "labor of the Soul" in this case
"the work of the Soul" can be called that
This is a universal and at the same time personal work

there is a clear division here
a person sees himself and sees universal tasks
when he sees how the Soul of man works
how his soul works
and how the Souls of all people work For example
towards Eternal development

i.e. this is very important
Well, in general, it's quite an important point
in terms of what I said
that it is possible to separate the personal and general tasks

so this is the division
what do you personally do
what is your soul doing
to help other people, everyone, by the way

then it turns out that you see again
a personal option after all

just as God is man
you can also pass on knowledge to other people

i.e. in this case you work technologically in the same way
i.e. you then concentrate the light on yourself
and show that you can do this and that
some kind of management
and people around you perceive you as a person
can act the same way

and then it turns out
your action
so it can teach for example there are almost all of them
when you master it professionally, for example
some kind of control system

then it is clear that when you
for example, you set up the control system like this
what do you need to learn for example
Well, let's not just assume everyone, but also in Eternity
i.e. to solve the problem of Eternal development for others

then it turns out that the light of your Soul should be like this
that from the fact that the light of your Soul
spreads into Eternity
other Souls can also perceive
for example, the same
i.e. the same level as God gave them according to their events

i.e. then it turns out that it is not necessary to interfere
in people's events
because there is a principle of non-interference
it is enough just to illuminate with the light of your Soul
the knowing Soul
and then people will decide everything themselves with their light

i.e. in this case we are talking about
about the light of human factor action
different light
next level light
Light of Infinite Development

where the light of the Soul of man already carries this universal light
in its action even in the local
but already of Infinite development

then you get this kind of light
it forms the body after all
which has the functions of Infinite Development
i.e. a body that can always be restored
it is always possible, it turns out, first of all
the task is to prevent any
if possible, even small negative ones
there are events that have a negative impact
but it would be desirable at least
some complex events
do not allow in the first place

i.e. a natural, logical, calm path of development

i.e. the concept of precisely "calm"
as if to express "a calm path of development"
in this case it is also a management level

because it often means reaching a level of calm management
this is in conditions when a person hears
what's happening in the world
some there let's even assume local disasters
all this affects the structure of his Soul

and here we develop a structure of calm in management
this is a special task
where he must first participate in some way
here, even at very high speed, in that
so that there are no special problems in general
for all of humanity
or there in local situations
if there is information about some disasters, etc.
and only then reach the level of calm management

so it turns out that when a person chose
the primary decision is made for yourself
or so to speak, there is even a level before choosing a solution
where a person perceives himself
as if listening to himself
he put his own personality in such a way
so that the individual is able to solve these problems

for God created Himself
and He will solve all the problems of precisely Eternal development

it means that the personality was building itself

initially to the factor of its own creation
and here it turns out that
awareness of one's own personality
this is the Action of God

i.e. it turns out that you hear with your ears
because God
with the ears of God in fact
well, in a figurative sense
yourself initially

and here it turns out that this kind of universal sound yes
the sound of universal development of universal so to speak happiness
that which concerns specifically positive levels of development
this is what is created
and you and God at the same time
and there is often no difference

i.e. your action is the same as God does

then you see that the choice of solution
it is also a choice and a decision of God
at the same time as yours

then you don't need to stay there for long somehow
let's say to correlate the situation
It is enough for you to understand here

what action for example in the Infinite level
this is still your personal action
consciously chosen
but God also chose

Well in general, let 's say, like in a normal team
the choice of solution does not contradict other members of the team

and it turns out that this is what is entered here
on a human level it means a principle in management

and when you start this management
to realize already as if inside oneself
in relation to its sensory level
then it turns out that you know for sure
that you are in control of any situation at the current time

i.e. you see and have multiple reserves of action

in this case it turns out that it is precisely multi-reserve
this is the factor that allows you to act
as if from the future actually
and that future where the future is actually located
on a global level
at the level of connection with the past

i.e. the system there is so concentrated
so let's say knowledge and information
what is the future and the past
is in one area of Perception

then it turns out that you come to yourself
you are already forming yourself as God created Himself
where time already has only one value
Well, one point and the current control system

but God had a special task
in the current time do so
so as not to simply create yourself there
but at the same time create a sustainable world
and at the same time still infinitely manage
given by the World

which means that this is a different value in general
from the point of view of human perception

in this state a person must
clearly understand and represent
what he wants and what needs to be done

and this is the task of simultaneous Perception
what he wants and what needs to be done
at this moment
This is a task that God has decided for Himself

and when do you start solving this problem
i.e. do not separate desire and action
then well, ... in general it's a pretty simple principle, yes
for human Consciousness
if you don't split the action
then how can we determine it at all?
how to describe the action itself

here a principle arises for the human Consciousness

that is, a warning, so to speak, division
i.e. by analogy, in general, with the creation of man
a person here can already create events
before its organization

i.e. up to the very factor and event it turns out

and here it is important only to see
primary event light
i.e. the Light that God sees initially
light of realization
in the positive aspect of this event

then it turns out that you can do it
form an event
even before the level of its formation in your Perception

for this you just need to
to form for example with a heart
to form there by some one cell
or there is the Macro Universe

and here is when you move to the Macro level
then that's enough at this point
to consider the movement of some distant star yes
precisely in Perception
not at the level there just the optics of the sky
as if in physical terms
and consider the whole Universe
consider one signal
or there the whole Reality the whole World

and here you see some one signal
and remote signal control
gives you control over your events
and such that these events
there are desires for the Soul of God
and at the same time for everyone

i.e. what is meant is Macromanagement
all processes at once
in a global sense
in a global sense

to cure some diseases
such a control system is necessary
and or to implement some kind of management systems

let's assume in terms of exactly that
what is required is exactly the reserve action
or is there some kind of enhanced action?

then you need to understand all the control systems
and it turns out that in this case

you just have to be able to cover it
the whole actually World the whole Reality
and make control of almost all Reality

then it turns out
namely, management through global systems of Reality
this is that technological action
which implies that you absolutely must
constantly solve your own problems
i.e. well let's say personal tasks
being , as it were, at the control center of all information

and based on this, it becomes generally clear
that when a person already has the opportunity for Eternal development
and has a control system
then any action is permitted
precisely naturally in the creative aspect
he can do whatever he wants

i.e. freedom of the individual
this is how it is in general, let's say
not only technological, you could even say so
and such as a general state
i.e. it is precisely the state of the future yes

i.e. at this moment he is simultaneously
and in the future
i.e. intersects
he understands that he is intersecting
with a system of future controlled events
to them too

but it is still a technological state

and it turns out
what exactly is the technological nature of this state
it consists of the following
that you then start going out again
in the phase of a calm state , let's say in everyday understanding

i.e. you begin to see quite calmly
what is the normal state
this is also generally the norm of maximum control frequency
it's just that in this case the control occurs
at the level of calm systems, as if distant
not very often far on optics
from the physical body

but nevertheless you are in control
as if in the calm breath of the Spirit, so to speak
one can even cite such a factor as breath of the Spirit
i.e. the movement of the Spirit by analogy with that
how a person breathes with the physical body

you begin to see the juxtaposition
Spirit and body
i.e. the living Spirit yes
The living spirit
The spirit at work
but acting as your physical body

when you start to see for example
such is the status of Reality
then in principle it is clear that Infinite development
This is quite a reasonable assumption in general
or even so to say, the technologically mastered value by you

because the Infinite Spirit
you understand that he is invulnerable
from the point of view there well, some kind of global weapon even

and when you act in sync with your Spirit
in this case it is
In spirit, precisely that
which you built when defining events
their primary
then it turns out that it moves the same way as your physical body

and then it is clear that you can do it
be in Eternal development
precisely in the harmonious phase
The spirit is the harmony of all things
this is, in general, the breath , so to speak, of universal Peace
the breath of the Universe including

The spiritual status of the Universe for example yes
if we consider this position

and your Spirit is very harmonious
he can interact
precisely in the Infinite level with the Universe
and for him there are no problems for him it is harmony

what difference does it make to the Spirit
Infinite Universe
or is it some kind of local
the transition of the Spirit into the structure of the material World
this is an action that is harmonious in relation to the body

because the Spirit always, well, let's say, accompanies the body
besides, it is in the body expression
and this is action
namely the internal state of the human Soul

i.e. when you see
it is the inner perspective of your Soul
through the Spiritual system of knowledge

i.e. the Spirit of knowledge
and your Soul
and your body
Spirit as an instrument of knowledge
and as an instrument of action

and it turns out that it is the same as God did
Spiritual status
organizing the material system
and the Spirit is from the point of view of God and man
In many ways it is a completely stable system.

because it is super dynamic
there you can always get the system of Eternal development
ultra-fast information transmission systems
interaction with information

and it turns out that if, for example,
you have a control system, let's say, of this type
when let's say you need to get a super fast result
and at the same time make this result harmonious
maximally and necessarily, so to speak, harmoniously

because you choose the spectrum of personal harmony yourself

i.e. you act from your point of view
harmonious result good for all good
but when you have to control
what is good for everyone
and you too
then it turns out you should enter
ultra-fast information processing technology
and this is Spiritual action
i.e. the Spirit covering and action
The spirit that is present
and in action
and controlling the action

and now make such a control connected with that
what do you see the system of Spiritual management
and the system that was located

to the level of organization of your personality
where did you make the decision
about all of its future events Eternal and

and here you informed the Spirit
the structure is already as if that personality
which is in the future

i.e. the Spirit is originally existing
to organizing your personality
well your Spirit

and make this Spirit the ruler
i.e. Spiritual management
in optics it is a very dynamic, rarefied environment
which is near the body
she moves
in a small, as it were, spheroidal level
and let this environment affect
just your tasks but also spiritual

translate logical problems into spiritual ones
and let your Spirit solve your problems now

I will work with you
I will help you with this action
namely, universal action for all
and you will see that this help is there
that this is knowledge of the next level of one's development
in passing on knowledge to others

so you work
I will work with you

when you work at the level of Spiritual management
try to work more calmly
from the point of view of awareness
because the Spirit is a dynamic quantity
it is a calm state of Consciousness

dynamic spirit in this technology
this is a calm state of Consciousness of logic

and that's exactly if the management, let's say, goes
more on the right side yes Spiritual phase on optics
then the fixation of calmness can be on the left
the heart that perceives or acts
and creating a calm impulse of Reality

here you move to the level of creating Reality
there Reality is created by you
in terms of your local and global tasks

and here by the way you can influence
to a distant level of Reality
absolutely right

i.e. you can literally watch it
in laboratory conditions
there in some special there let's assume experiments of influence
on environments in a vacuum
or there for the growth of some microorganisms in the laboratory
it's very easy to show in this system
influence on Reality

so when do you start
Well, there's no point in just doing it like that
there is something to show there yes
means that it is necessary to direct only
this action on yourself
where you can manage after all really knowing
what is Reality technology
this is your system of knowledge
and you perceive it as Reality

and then control what happened

here is the control that the action took place
in this system ^{it happens like this}
and this system allows
immediately know the result of the control

at least you can on the Spiritual level
perceive
was the action implemented or is there anything else to add

this is quite powerful
^{as if a diagnostic control system}
because here the Soul ^{seems to be} growing into events
Now you start to see very clearly
that the Soul grows into the system of events

and where is your Soul
your event is there too

i.e. you don't have any problems
because the events you initially chose
they are already in the Soul

God made it so that when He shaped events
He simply set the task of docking again ^{yes}
events from God's point of view
and events from the point of view of how a person
displays the status of your Soul in this event

i.e. on God's technology it is quite simple
it is enough just your Soul action of your Soul
bring to the event
or or even often precisely the structure of the Soul
i.e. you can see how the crystal enters
to the optical level of the event
^{for example one yes} but it can even be some
^{Well For example there} the tones are not very bright
namely, the light of the Soul must always be brighter

and it turns out that your Soul leads the events
in the World

i.e. any event similar to that
how god leads people
events are also ^{a general} quantity
it turns out that from this point of view
controlled and controlled in exactly this way

that the event is formed by the color of your Soul
i.e. for example, bright silver there and silver-white color
or some other very bright light of the Soul
events are shaped positively
because the light of your Soul
shows how the event develops

it turns out the event reacts to
it is the intensity of light in your Soul

and therefore it is clear that when
it means that a person looks at God
and sees His Light, and the True Light
then things are going well for him
because then he himself illuminates his Soul
exactly the right way

so from the point of view of the technology of such control
it turns out that you are precisely with your Soul
show events
and events are natural and first of all people
in general, first of all, people are always meant

but even when for example you are working with an event
by nature we suppose

then the action always spreads first
to people after all

and it turns out that in this case
when do you start doing
for example, control coming from you
in relation to any source of information
or to any informative action
then you always see the person first after all
at the level of the Soul of God

that's if you look at it the way God looks
then you see a person

and it turns out that it's the opinion of one person
is often fundamental
and here it turns out that even one person's opinion can be taken into account
any one, moreover
that is, to transfer knowledge in fact and on general development
this is God's task

when you see this action
then you see that by creating Reality
God showed man
how to create it
precisely in Reality itself

i.e. you start to enter
into the internal actual meaning
namely some objects of Reality
those. for example a tree
and how to create a tree in general

i.e. you are in that status
what do you see it at the level
Spirit
Souls
Consciousness
and also generally speaking immediately bodies

although it is clear that the Soul builds the body
but God also builds the body

so it turns out that you see with your body
generalized point of view

i.e. the body is a level
which allows you to combine
and the actions of your Soul
and the Actions of the Soul of God are actually
and generally speaking often the Body of the Physical God of the One

it turns out that when you see this
you can definitely improve the health of the tree there yes For example
or do it

let's assume some kind of remote control system
when your control is absolute Reality
from the point of view of management, and for everyone

i.e. your management becomes visible to others
It would seem that they have done some work there and applied technology
as if it were your personal action

but in this technology
you can very well show and objectify
for others this action

and then other people will naturally learn

because your action concerns them first and foremost
i.e. you act for them and show them ^{Yes}
Naturally the learning process is very strong

why do people develop so fast in the world
because this is the action of God
it is perfectly aligned
Well , there are ^{actually} quite a lot of other parameters there

at the descriptive level
these are the interaction parameters yet
it turns out that the internal systems of the body
self-construction
interaction of one system and another, etc.

i.e. and everywhere here there is the same mind
the same logic of Eternal development

and when you start ^{for example}
this action is understood as a harmonious action
do you see yourself always healthy and happy
and you see that your path is endless
and is not limited by anything
precisely in the happy Eternal development

This concludes today's seminar.

thank you for your attention
