

GRIGORY GRABOVOY
The Teaching about God
Universal control method
18.09.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Universal control method

In this topic it is necessary to consider
for example, such a geometric control object to begin with
like a silver colored sphere
and this sphere has functions
namely universal control
for any spectrum of action

i.e. in this case we are considering
such a position
what if we have for example some management goal
then this goal should be
first somehow visualized for example
or formulated

then the control action is done and so on yes
overall the process on average
basically it looks like I described

if we are talking about universal control
then at any level of management there is a built-in
task
first of all, goal formation
achieving the goal
and implementation

i.e. we can exercise control
actually being in phase
For example there it is outside of time, that's right
and outside of space
with your Consciousness
and at the same time be able to get results
if we don't clearly record, for example
some kind of well as if a basic control system

i.e. in this case
the control impulse is already a result
and it is precisely the concept of "universality"
it is not only for example application to different systems
but also universality
from the point of view of staging systems, yes
setting tasks

Well, let 's say some unknown body is flying , yes
towards the Earth
and we need to make it so that there is an obstacle
i.e. there was no disaster

then it turns out
Well, there are a number of signs of such a plan
that the body itself is unknown
then what action to take
in general, how it is expressed may also be unknown, yes
at the level of let's say even optics

i.e. it is necessary to get the result
and so that the result is mandatory
i.e. in any case we received control
for example, everywhere
it is more appropriate to use here
namely universal control
i.e. management that leads
at any level of action
exactly to the result

i.e. a celestial body, let 's assume a comet
it does not collide with planet earth in any way
or even the Moon , etc.

and we consider any position
what well approximately there Mars Venus Solar system
and so we begin to go out
to the level of the next, so to speak, spectrum of knowledge

that when we talk about the outer space of the World
then here, generally speaking, it is also embedded
principle of universality of action

because if we look at

interaction of at least two planets
or let's assume that the satellite is the Earth
Moon
we see that there is something here

the principle of universality in interaction
for example from the point of view of human perception

i.e. if we take the segment of Human Perception
Well as if an element of Consciousness
and concentrate in the form of optics
well on the line Earth - Moon
then it turns out that here you can understand
that's why for example tides occur yes
and see how human Consciousness works synchronously

i.e. there is some external system
it is enough to place the fraction at some point
you begin to understand the process
then you start to see all the processes as a whole
i.e. universality from action at a given point

i.e. we know the controls
because we can do the right thing

and because we work synchronously
Well , this process is kind of natural
tides
from the fact that the Moon interacts with the Earth
and then we get the Norm in our events

i.e. by simple placement it turns out
element of your Consciousness
we get fundamental action
corresponding
It is the Law that seems to have some changes there
primary action magnitudes

i.e. the action leads to the result
i.e. here is a construction of natural control
consists in the fact that
that you are laying down universality
precisely in the spectrum of action of your Soul

i.e. you understand with your soul that this is universal
and then it turns out that in universal control

the main thing is still this
knowledge of the Soul
knowledge of the Soul
this is the universal principle
i.e. the Soul cognizes any knowledge precisely universally

just like God perceives
any information

any knowledge
acts so that for Him
any knowledge has a universal character

i.e. knowledge can be applied to that
to make an event happen yes
perform management
set a management goal, etc.

i.e. for God generally speaking
knowledge as such does not exist
well, sort of in absolute form

there is a certain substance, so to speak, of Perception
or precisely the substance of action yes
and when we consider this substance
as an element well as if the beginning of the world
then it turns out that from this beginning
is born
any action
target
goal realization, etc.

and so that there is a negative event there
take beyond the given control
we need to make it so that the action is universal
contained only the creative aspect
actions of the most

i.e. it turns out
that in order to solve some problem
there to cure the disease
make management for any range of events
it is necessary to somehow highlight
only the creative aspect in this action

and then we come to the point
what is target management

i.e. the goal
this is actually well as if a thing in itself
we see the optical expression of the goal
as an element of the accomplished future

i.e. in universal control it turns out
precisely in positive natural management
the future contains the process of such management
for example, so that there are no catastrophes
problems in future events

it is necessary that
basis for events yes
and the event itself
that means they were in the Soul of a person, and each one
in a positive way

i.e. when we consider
namely all elements of the collective Consciousness
in the practice of action
then it turns out that there is a positive event here
that which all people perceive
always happens positively

i.e. so that we know for sure
that the future event is positive
enough to understand spiritually
that every person in his future
it is perceived exactly like that

then it turns out
what is universal control
in this case it is that
to examine the Soul of each person
precisely the positive side of some action

Well let's assume there is the simplest action
a person goes fishing, he needs to catch fish there, for example, yes
then it turns out that if we consider
in the action element
as if the first principle yes
why doesn't man catch fish
Well, some people don't want the fish to be sick, etc.

and it turns out that the universality of action is such
that one person, for example, might want this , let's say

another person is against, for example, fishing, etc.

i.e. this is where the imbalance comes in
at least one person in Perception
it doesn't give any results there
in fishing there for example there is the required amount of fish
or no fish are caught at all, etc.

and it turns out that when we
we want to get an action for example in Macrosave
i.e. Salvation of all
Actually, everyone needs this

so when we work through the Salvation of all
often shift some macro-catastrophe
it can be very simple
because it is the common desire of all
and there are usually no exceptions

even if there are some there
Well, people with obsessive-compulsive disorder are inadequate.
where a person, for example, does not do this or does not want to, yes
as if an extreme value

it is all the same in the Soul from the Creator from God
he still wants it
i.e. there is always a level
namely the structures of Eternal development

and here we come to that
what exactly is in Eternal development
in Eternity
universal control consists of the fact that
what is Eternity generally speaking
universal magnitude of action

in Eternity we always receive Infinite development
Well in general, any creative system
and based on this
we can always get a positive result

i.e. any material action leads to that
that we control it now
i.e. any impulse in the future
gets so big

that the light reaches us in the current time

then it turns out that we have problems
as if the threads of regulation of future events
so as soon as we have
information on the Eternity platform
we get again the sign of universal control
exactly a sign

because the management in this case
this is another increase in the platform
as if to the next level of movement, for example, Thinking

because in this case you still need to manage
and the platform of Eternity turns out
Well as if the basis for the future Eternal event

and in this case you need to be able to
to create some kind of anticipation of thought

i.e. here is the idea of management
we need to do it so that in the future
as if the next thought
or is there a next wave of thought
contained all the events of the future
and at the same time you did not lose the goal of concentration
as it were, without even naming the goal itself

i.e. you internally understand what you want
after all, man as a whole is designed like that
that he doesn't constantly set himself some kind of tasks there
and many aspects of management are natural

God is designed this way
that he naturally perceives Reality
and this natural Reality
this is what is controlled and managed
as God
and also by the fact that God gives someone knowledge of management

and it turns out that in this case we
we have the following factor
universal control
this is a natural state basically
well, any level of management

and it turns out that it is necessary to achieve it after all
status of universal management
because
often to speed up
because it corresponds exactly to how calm it is
specifically to the latent level of control or something
calm Norma as if

dynamic norm there
there is a norm, let's assume it's static
and this is precisely the Spiritual aspect of this management
this is exactly calm Norma

i.e. the Spirit perceives it as a calm Norm

i.e. the concept of "Norm" is in this case
Well as if it were a generalized concept
but calm Norma
these are personal characteristics of some magnitude yes

i.e. we transmit the properties that are inherent in a person
for example, personal management structures
into the properties of an external object

then it turns out that with any action
the human mind his actions are always standardized
i.e. a person cannot, for example, enter into a trance there
he cannot lose control of the situation, etc.

because in this case
it is precisely the transition of personality yes
into action, well, into some kind of Norm, yes
into some universal system
this is the absolute norm
well, that is, the balance of all processes in the World
i.e. there are no extreme values, etc.

thus it turns out
that standardization arises from the action
like God
He is the properties of His Personality
i.e. in fact, he develops his Personality
to the level of the information object

and it turns out that the information object is under control
just like the Physical Body of God

the human body in general
controlled, for example, in any action
For example there Well, human hands, yes
physical control level

also if we develop
this is an action in Infinity
then we gain control over all external events

i.e. the principle of universality of control
here in that
that you are kind of extrapolating an action that is known to you
for example physical
into Infinite magnitude

then it turns out that you can naturally
any negative event
remove only that
what can you do there for example, make a hand movement
and at the same time perceiving the movement of the hand
in fact, as if with a mental gaze , yes
Thinking of the Soul

as if the next factor of Thinking
i.e. what is behind the thought

the control precision in this case is as follows
that is a universal sign of Thinking
is located there
what is behind the front of Thinking
in optical terms

there is development, for example, in the sphere of Thinking
and what next for example Yes

so here it is further
universal level of information
there is, for example, an external space
there is a concept there, well, those elements of Perception
where is the thought anyway
what do you influence , etc.
i.e. a whole complex of questions

and if there were no universal environment yes
for management
then the thought would not spread so quickly

i.e. actually well like some kind of wheels
tied to the sphere of Thinking
well, relatively speaking

i.e. really
this is the light that goes before Thinking
light coming before action
but this is precisely God's Divine Action

i.e. God in direct Perception
and Divine action at the same time

i.e. in universal control
God and His Action are one value
in Human Perception

i.e. it turns out it is the person himself
man universal level of control

and when you start to see
in what way do you want
Well For example there to restore your health there
or just at least relieve fatigue
let's assume that the person was completely healthy

then it turns out
that this is exactly this compression of light towards you
from the unity of God and the Action of God
in your Perception
this is what it really is
the most powerful level of factual information
is essentially perceived as powerful energy
bodies
matter
ability to act, etc.

i.e. now it is possible to do such a practice
consider this position simply in action
God
and therefore the Body of God
and the Action of God
this is a unified system of Perception

i.e. some element of your Perception
has this function

and instantly a powerful light appears
coming towards you

i.e. the body is actually filled with energy , so to speak Yes
that's how it feels, etc.

and it turns out that you can create a structure
as if external universal light
which since it is universal
he doesn't have the ability to linger somewhere, yes

because if the light is universal
then it has the Infinite Access feature

if it is already functional in some way
then it performs only one task there, vector, etc.

and it is a universal light
enters your body with virtually no restrictions
you get this saturation of a kind of energy
by Perception
but in essence it is just a very linearly expressed light
The Light of God and Man
in the action of precisely Infinite development
and God and man

God in Infinity He is the same
man he develops

but the difference can be understood
where is the universal control vector
must be embedded in the human consciousness

i.e. in the Consciousness of each person
exists exactly here
universal principles
and it is this universal principle that is what it is
that for example when a person considers his name
future information
and this information contains for example
well some actions including his own name

i.e. to determine
what is near you
you can consider the Consciousness faction
but you can also call yourself there or perceive yourself there

well, how does a person perceive himself in the future, for example?
at the information level
how does he even understand that he is even looking at the future

this is where the principle of universality comes in
he has access to an absolute universal environment
and he understands that this is his action

that's what makes the environment of Perception more universal
the more accurately a person realizes
that it is he who receives accurate information

and that's when we come
to the level of God's Action of God
then it turns out
that God really does give universal actions
and here are the methods in this case of universal control
as for Macrosalvation
and for you personally
i.e. here the principle of universality is already linear

the denser the information
the closer to God
the more logical is the principle of universality

i.e. that the action is aimed at Macrosalvation
there is some kind of scratch to treat there
of some substance
salvation from macro-catastrophe
it's all the same value of the action of Consciousness

and when we start moving forward
it turns out that human consciousness
that's exactly how it works
i.e. the basic light -like optical characteristics of Consciousness
the main elements of the development of the action of Consciousness
they are practically arranged
precisely according to the principle of universal action
as to God
and to a person

i.e. it turns out that in order to go to God
in this case you need to go as if more
towards self-knowledge
i.e. as if inside the optical expression of this glow

and for a person this is an external value

and therefore knowing God is an internal process
mainly in this technology in particular
and that means the external system is a person

i.e. man in universal action
understands
how the other is organized and structured
but he understands how another does it himself

in this technology it is very clear that
how another person builds himself
in general, what mechanisms does it use to create itself?
in action

and then it's easier to help him
i.e. it is clear that
from the outside it seems more visible, yes
it often happens that he does something
or slower
or he needs to pull up some photon there faster

then he is simply given knowledge of everything
he does
or can you do it yourself yes
by his own will
because the other person has an open problem
which well, maybe it's a problem for him, yes
it always leads to the fact that you involuntarily
how often do you make the impulse of Salvation

in fact, here is the principle of universality in that
what if a person considers correctly

for example, the position of future events
then it turns out that this position is like this
that a person works also universally

i.e. he has for any action
exists as if well, some kind of counteraction , yes
if this negative action is external
or vice versa assistance
if for a person it is a positive action, etc.

i.e. the person is in automatic mode

as if choosing what in this case
from the point of view of the human body's reaction
it is necessary to do

if you think about it
that the body is a perfectly controlled system
in well How in general, in the logic of Infinite development

physical body of a person

then it turns out
that any interaction
bodies and Infinite information
expressed in finite form

i.e. why does a person make some movement
why between its action
and for example there well, some level of the next development
there is a level in general Well there are spaces, times, etc.

i.e. we can see
how is time organized in general
for a person
i.e. how it looks from the point of view of this technology

this is very surprising in its logic
process on Perception
i.e. we see that universal time
this is the creation of space in the Infinite Future
i.e. well as if of Infinite space

it's clear that
what is the concept of "universal time" anyway

Well, we always think
that time is like a linear quantity, for example, yes
maybe it is a multidimensional quantity

but when we talk about the fact that time has
properties of universal control yes
or by means of universal control
is for example time dilation
into Infinite magnitude or into Infinity

because here
when we introduce the concept of "time"

for space
i.e., as if a human concept
then for God space in this case
it's time compression

i.e. the more we stretch time
Well there let's assume we take it as some kind of rubber band
and stretch time into space
and wrap it up there for example into space
well, a big skein of time
considering that we work with time
let it stretch and stretch

and that's when we get to the point where the limit of this
well, some kind of "elastic bandage" in quotes
it's getting thinner and thinner
then after some time we get
a very peculiar picture

that as if dense matter it begins to disappear
it kind of disappears, i.e. the "bandage" itself kind of falls somewhere
and a simple system of organizing space arises
already then
and this is the system of organizing space
she shows the inner well as if the True structure
any person in general
information object
but first of all a person
i.e. a personal position arises there
it is the Personality of God that is shown in Action
how god builds
i.e. God is the builder of the human body

and here it is very clear
what does a person do in general
where to take and move
some kind of photon of light again
take to balance some organs yes

i.e. the human body becomes very controllable
and generally speaking every element of the body is visible

very transparent almost independently
i.e. well, in fact it is visible of course more clearly, more accurately
there is even some kind of holographic scheme there
or there are some systems for visualizing demonstrations, etc.

i.e. you absolutely clearly not just see
and your gaze normalizes these organs
because you look like that
how God looks acting in Infinity
for the body
i.e. from this angle of view

and this point of view is Eternal development
this is the light of help
light means actually giving the following system for life, etc.

i.e. it depends on which side you look at it from
on the human body in this case

and you can see that depending on the viewing system
as a rule there are 2-3 main positions

i.e. the path to the body is as follows
that the body is expressed by Infinite action
there are only 2-3 approaches
and the body has infinite development functions

and it turns out that this is the principle of universality
is that in this case
that the body is like an infinite quantity
shows how to approach it
i.e. the body contains elements
self-control
self-diagnosis
self-regeneration yes For example

when you start to explore this process deeper
you begin to see and understand
that here is an interaction of, for example, two elements of Reality
Well, already in a human body
built on the same principle
mutual knowledge
mutual universality n
at as if mutual assistance

i.e. one cell of the body for another cell
it should be there, so to speak
there as a doctor's assistant, etc. yes

some level of creation of future events
because future events are created in interaction

and therefore it turns out that we can
from any cell
if we find at least one more nearby somewhere yes
in space
or in Thinking
or in information
we immediately guarantee a healthy physical body of a person
because interaction
this is already the logic of the universal plan

any interaction is a universal value

if there is interaction
this means that there is a universal value at the root

i.e. in fact we can take any action
how to get the glow out of it
well, like some kind of needle, yes
precisely of universal action
and then the design can
either fall apart or become even more universal

i.e. it will fall apart only if
If
it won't just fall apart, it 'll just sort of pass over
to a qualitatively different level of development
i.e. actually well as you can see
that it 's like some kind of informational shell
begins to decrease in this
in this area
but we can find it already higher
according to information

i.e. it turns out that a person is the same way
it has a non-destructive function
and the transition to the next information layer
and as soon as we
layer of precisely ordinary logical time
not some kind of seven-dimensional spaces and things like that
but simply the usual level of its next development
in a second there is a month, 10 years there are 50 years, etc.

and when you start to see
that the body actually moves in space-time
as a control quantity

then you see that these structures
there is winding for example
well, by means of a kind of volitional representation of time
there is an element of space
this is so as if a model model quantity
you are modeling some phenomenon
but the phenomenon being modeled
has universal interaction functions

i.e. you don't need to build often , for example
well some kind of long-term management position
it is enough to just imagine the position of your body
understand the position of your body
and you perform universal control
everything is fine around you

Please note that many people
Well as if when they think about it
they pause in their Perception
and this static
some fixation of action
some kind of second-long static
This is a universal type of control

i.e. here the person thought
it seemed like he made some kind of head movement
turned into something like that Well there, conditionally, on the right side
stood up and even further to the right, etc.
and you got universal control
because you
logically, first of all, it's understandable
you interacted with the external environment
then you have already made the control somewhere

but for the control to be precise
it should be universal
in this case and for example it is very easy to see

knowing that the management that you do
Well, at some elementary level, yes
you need to drink a glass of water
you can do the management first
then you know for sure that you will drink the water
i.e. you take and as if well, at the level of the action of the body's physics
trace the route accuracy

but when this route is known to you
and you know how to give the property universality yes

given impulse
please direct this light to that area
Well, where is the problem?
or where there is no nuclear disaster, for example
and the principle works in the same universal way

i.e. you can check the impulse
take for example drink another sip of water etc. or another glass
and to see that the impulse always has
the same characteristic
it comes from you, for example
reaches the water
are you drinking
and the impulse goes as if to Infinity
as soon as you drink water
impulse begins endless development

i.e. any external
Well there is absorption of food and water
any external thought is an Infinite glow
coming from you for example yes

i.e. how to recognize
that this is an external thought
or is it still for example Well, it 's a thought generated by you

your thought has the properties of a kind of introversion
i.e. the glow goes inside the physical body
and you create a body

external thought is also natural
helps to create the body
but precisely in the sign of universality
as if in Infinite magnitude
where God determines and interaction

not a single thought
no impact
does not pass on to a person without God's knowledge
without the will of the person himself, by the way, in many ways

and that's why it turns out
that this is the sign of universality

this is the ability to identify a universal environment
in the outer faction of Thinking
and any action

i.e. to avoid some problem
it is enough to see the universal sign

so that there are no accidents, for example
Well there is some kind of difficult situation on the road
you see
it is enough to highlight in the whole structure
not even cars specifically
who participate in a possible situation
but simply in space
the universal value of this space
in the form of just flashes of light
and this is very conveniently done simply

because when a person drives on the road
and now in the control phase
he still turns it on periodically
this is like a control and management sensor

he takes his light of his body first of all
resets to the Consciousness function
and then it locates , like , in a search option, or something like that
point of universality of space

as soon as located
the next 50 meters of movement arise there
or 100 or kilometer
if the distance is long, then it can be 20-25 kilometers
sometimes it's just from point to point of control yes

it all depends on how a person is set up
means to build actually in this space
these are like paths and corridors
interactions of universal systems

and pay attention to this
what why are universal systems designed this way
Well for example if we compare it with the physical world
why don't trees grow on every meter
or some kind of obstacles to movement

because everything is determined by the will of man
it is easier for a person to move in open space

also and well and to God and to God and man

and when we look at that
that one impulse can illuminate

For example there are 100 kilometers 1000 or there is as much as you want, yes
a million kilometers 10 million or even a billion

we understand that the development of physical space
I mean a billion or more
into Infinity
allows you to control external matter

i.e., all you have to do is develop this logic
it is possible to influence physical matter
another planetary system
what does it give yes
what is the practical benefit
there to influence a molecule somewhere on Mars
or in some galaxy

and in the fact that for now, for example, the light of your Consciousness
reaches some molecule
there in the starry sky on the starry sky map
It's better to look at it visually or imagine it
remember what stars you saw there as a child
or some special signs of special glow

i.e. you can look at the stars and see a certain picture
and can you remember what is in Perception
there are some special elements of glow
when you look at the starry sky
they often happen in general
Well, some of those one-off ones are remembered, yes
how are the actions of your Soul

The soul is manifested in Infinity

it turns out that the influence on molecules
somewhere out there in Infinity
can cause a very powerful beam
Well like a beam of not even that much light
and as if elements of collective Consciousness
light
and collective Consciousness

as if which is as if waiting
your faction of Consciousness

and in this case interaction occurs
precisely of the creative type
i.e. the more distant the system
the easier it is to find elements of interaction
i.e. the more time and space you have , so to speak

it turns out that it can be illuminated
some atom a billion light years away

and you get the most powerful control here
because the atom if illuminated is universal
then it gives a source in the form of this light

You can already move and adjust the light
well, direct it to carry out some task
or to heal a person in this light, etc.

here in this technology by the way
the cure looks exactly like this
that a person is standing under some kind of front, a stream of light
well, like in the rain

and this level of some kind of rain
for example, you can see that it passes
in the form of golden little ones like these
cylindrical closer to cylindrical
namely the cylindrical type of elements as if light
they pass right through as if they were entering the skin

if we move further away
then we see what is really happening
there is no movement at all, there is no entry either
it's just the way the body perceives the signal

the body, as it were, actually recognizes the external world
and takes it calmly with its receptors
something is being pulled out there
let it go on itself
Well, these are these quantum cylindrical components

i.e. the body builds itself from quanta of light
and the light of your own life
of your own Thinking

and when do you start this process
already for example Well there to regulate
Well, it's clear that if the body's receptors work
then what's the problem
receptors, of course, of the optical plan
these are not some kind of physical systems there often
although there are also physical ones when we already have
the dense structure of the Eternal development of the body

i.e. we can say
that the body is absolutely dense in the physical plane
when the body develops Forever yes
it can't be destroyed, it's kind of super dense, yes, in that sense

the body is normal of course
not that it has any functions
there are different from the current and human body
it's just that the event structure is like this
what is clear is that the body is indestructible

you know your future events
This level is very good by the way
such a powerful predictive level

and what does it consist of
what the further you look
the more accurately you see your body
i.e. look into the Infinite future of all people
problems are not only revealed there somehow
but they are also immediately resolved

you just have to look
from the point of view of universal action yes
for all time

what is universal action
this means the solution to all issues
including creative questions yes

but if we consider the Infinite Line
it is clear that these are only constructive questions
because if in the Infinite level
leave at least one structure of destruction
then a person already has a future
in this aspect, well, somewhere there in a billion years

may not exist

because destruction develops the next destruction
then what are we talking about
the platform is collapsing yes

and it turns out that in the Infinite level
there is only the creative value of action

i.e. there, as if in a full-fledged beautiful format, so to speak
this universal control value has been identified
well, like some apple tree standing in the Infinite level
you get closer to her, she moves away from you again
well, like the horizon, yeah

to eat this apple
we need to grow this tree
in your Consciousness

and why do we need Consciousness it turns out yes
to Infinite quantity
Well, why is it necessary in logic, of course, it's clear anyway

but in this technology
to Infinite quantity
it was actually projected into us
and we could condense with Consciousness
precise knowledge of the future development

accuracy is identity
identity there with the Divine Action , etc.
but also the possibility of identity
some external quantity of any

to protect against any external problem level
we need to become an object of external control, yes
in your Consciousness

then it turns out that you are in a synchronous phase
and you can't be reached

for example why can't you harm God
because it means that here it turns out that only you have to
Well, I'm not saying that anyone wants to cause harm, yes.
but for example, you just have to think about God
you acquire properties just like He does

i.e. and it turns out
what is in this as if property of universal action
You
first of all, by the way, you become protected
here is an appeal to God, this is protection
so God is always outside the zone
as if there is a negative effect

and it turns out that well, negative
as if from your point of view
there from God's point of view
any information object in general
which you perceive

and when you start looking further
then you see that the exclusion of a negative value , so to speak
for God
this is to give you such coordinates
which you would understand
Well, well as if there is action at this level

i.e. when you implement the action
you see that well if you look at God on one level
that means there is no negative aspect in acting with God

i.e. when you
in the Soul you perceive the structure of God
turn to Him
then there really is no negative aspect

in this case I just sort of broke it down into details, yes
well, close to what you can take
there, put it on the shelves, etc.
but in this case there are no shelves
I just took and stretched the time coordinate
and looked at it

i.e. there are no hard angles
there is basically no carrier there
but I figured it out logically

and it turns out that when we consider
control
where, well, in fact, we don't have, for example Yes
namely a certain information carrier
i.e. we can work well like I have no idea or something

or even without information as such ^{yes}

in Perception

what is information

^{well} and the physical body

you can just take and work with your body

without perceiving any other quantity

except for the size of the body

and that's when you start thinking like that
then the size of the body is an infinite quantity

i.e. the body has Infinite weight in this World
in space

it turns out the body ^{is actually} from this point of view

from the point of view of universal action

^{as if it fills the whole world}

then you

but already on information

all you have to do is give the body the status of non-informative
information about him spreads instantly
in all directions

^{well,} given that the body is healthy, etc.

i.e. it works out when we want it to

^{For example there} to cure a person from a disease

it is necessary to express his Infinite status by means of that

that you perceive his healthy body

indeed you create for him infinite development

linear looks very simple in this technology

if a person knows the diagnosis

so it turns out that you are just for everything

perceive his healthy body

and in Infinity you send, ^{for example,} the status of Eternal life

^{Well as if} you give a structure to education in the future due to that

what do you put ^{well such} optical even spheres of development

on his way

where it says that we must live forever, etc.

and it turns out he recovers

because you do just about everything

the same job

as God does according to Eternal development

any and all fractions of information

and then you are in the universal plan
you can treat with universal action
any disease
which means any disease can be cured

and based on this
it turns out that by and large there
there's no point in being sick then, right?
and it's better to spend some time
if possible, a person there will not get sick

i.e. for this you need to be able to, as it were
well, sometimes in tough situations
well some real life for some people
or in some complex generalized situations

what we are talking about here is that you are just on the whole
well, in fact, you do such an action
what do you attach
then the properties of space
time

i.e. the passage of time
i.e., as if it were an artificial value in general
for a person

Well, the man just went and came up with it For example
Well, in this case we will say it this way
time structure
and you take and impose the function of space
it turns out that space turns into time
outside of your personality
but at the same time you see
what God shows you in this area

i.e. this design is actually very simple by the way
have you often encountered this in action
when you understand
what is the sphere of your Perception
but you don't go into detail

Children perceive information often
without knowing the words there, yes, it's difficult
and at first they don't know any words at all
but they understand everything correctly

children's understanding is just as correct
as a person who knows

if you ask a child ^{there}
how ^{so} Let's ask this question
what kind of table is this ?
mentally to a child ^{for example there} 3 months

then it turns out that he doesn't think
Well, if you even analyze it
why can you understand
why exactly the word
he will understand that we are talking about a specific table
and it is this table that he will see in his Perception

i.e. there is a universal principle
at any signal sending level
a table from a universal position is always a table
the main thing to say about this table
precisely from the point of view of universal control

i.e. a method of universal control
in the transmission ^{of} this knowledge
it turns out that you are in some area
you highlight this optics
that in all phenomena of the World
a table or ^{a chair} , some kind of information object
he is here
it is in a specific place

so by the way the position of God is always precisely known
for a person
a person always knows absolutely for sure
where is god

and it turns out that when, ^{for example, Well,} God gives knowledge
then you can always pass them on to everyone
knowledge can immediately become universal
it's worth it just ^{for example Well,} let's direct it
it is precisely the impulse of universality
by the way, at least to myself

why does this structure exist
as an understanding of the position of the World
i.e. it is only necessary to understand something in the World
instantly your knowledge is transmitted to everyone

in this design it is very easy to see

and it turns out that if this is the case, then there is a database
it only takes one to cure some disease
let it be so
by the way, by any means necessary
then it is enough to connect to this database and activate it
and that's all
a person is cured of the same type of disease

another question is that the time is different, ^{yes}
different control structures ^{in general}
then you just need small correlating coefficients
enter and that's it
here is the concept of "correlating coefficients"
this is the level where the so-called universalism
this is the universal ^{one}
has private characteristics

i.e. depending on your will
to express these coefficients ^{yes}
so it will be
and in this case there is nothing but your will
The main thing here ^{is not to} make a mistake

again it turns out so as not to make a mistake
need to do Macrosave
That's for sure
i.e. it is a lighthouse through which one passes
you get a training system
^{in fact,} already honed to precision

and calmly correlate your specific impulse
under control

and it turns out that in principle there are three actions
there is a common database, ^{so to speak} Yes
where do you enter
do management
and correlate through Macrosalvation

when you do it initially through Macrosave
it is clear that the main function of any person
this is to make Macrosalvation ^{as if it were} the original value
in any action

so when we start talking about that
that we need to unite
do Macro Management Macro Rescue
this is absolutely true
it's like even at the level of some kind of mechanistic logic
even by disassembling optical control elements

although in fact this is what I said
I spoke with my Soul as well, actually
i.e. as the Soul says

i.e. what is the speech of the Soul if well there for example non-verbal yes
in that the word and action of the Soul is non-verbal
coincided
this is Macro Salvation again

and the Soul and any action
and well there is a manifestation of the physical body
all this is aimed at that
to be able to obtain the Macro Level of Salvation
but already as if in my Soul to bring closer to myself

i.e. to realize that this is really so
and you will be able to control it precisely
any Macrosystem

i.e. the density of external information
should be as if compressed yes
and the whole world must be compressed to such an extent
in one point
so that you see yourself first and foremost
how are you there
Well For example you are born there
are being created
where are you

and received for the manager clairvoyance
it is not necessary to walk somewhere in some spaces
some information
Well, there is , for example there are such opinions
or is there really a real movement of thought forms there
in some Worlds, etc.

it is enough to simply take this point of superconcentration
although in principle some worlds are apparently acceptable
if you have time to do it

but the question is when you get it
namely, controlling clairvoyance
then this is the point of superconcentration
this is the solution to the problem

it is enough to move it into the area
so that there wouldn't be a terrorist attack there, for example
he won't be there
if you manage to do it at some specific moment

even if there are already signs of the beginning
i.e. to have time to pass through the collective Consciousness
not only there is a terrorist attack some kind of catastrophe
some adverse effect

i.e. have time to insert
this one is kind of unique
and filter
and the governing level is like a code
into the sphere of events
it is not necessarily there [...] as a sphere
the sphere in this case is completely arbitrary, as it were

but simply into a certain structure of organizing events even
pre-organization of events

i.e. the thought is where it does not exist yet , for example
has a spheroidal shape for Perception
but it doesn't exist there yet
how do we know that?
that it has a spheroidal shape

because any transformation
some unknown
and here is identical to the universal spectrum
this is a spherical action spherical influx

i.e. why do people live ?
for example, not in a flat world, but in a three-dimensional one
Means Well, to put it simply, why isn't a person flat?
if we put the question abstractly like this
not mathematically
and ask yourself, as it were, an analysis of this situation

then it turns out that
and because any configuration
going beyond the structure of a flat system
for universal action
this is precisely the universal action itself

any three-dimensional expression
this is the principle of universality for the Macro level
here any kind of three-dimensional object is obtained
in essence, it is a constant transmission of information
to all points of the world

well, some kind of antenna, yes
which constantly gives out information
and to the whole world at once

therefore, a person cannot be flat in any way
and in principle, to make it as if flat again yes
Well, actually, the concept of "destruction"
some organ there is a disease
This is a very complicated procedure.

because by analogy with God
man radiates precisely the Eternal construction of life
and it turns out that this is what a person gets
basically some kind of disease
This design needs to be modified
in some faction of Consciousness somewhere

and yet in reality
needs to be changed
the structure of the basic structure of the World
i.e. disease, especially biological death
these are extremely unnatural systems
for the very nature of the formation of the World

and it turns out how it turns out
that's logical if you ask the question
the nature of the formation of the world is such
that everything is set for Eternity
why then, for example, in human Consciousness
what prevails is what's there

yes, well there is old age yes
all this is observed by the eyes
there is for example biological death occurs there
although it is still impossible to prove that it does not exist at all, yes

there is a concept of "statistics"
but nevertheless, basically yes

and these are these insurmountable systems
Here's How to Systematically Overcome Death for Everyone

for this you need to exclude
this kind of flat system of development
possible situations
i.e. derivation of simplified planar systems
simplification means as if it were getting worse
it turns out in this aspect of management
i.e. the flatter the systems, the less universal they are
more or less capacious in mass means less information

and it turns out that the Infinite quantity is yes
this is exactly what is obtained as a volumetric and three-dimensional quantity
well or there if time is some kind of coordinates , etc.

then the creation of elements of Reality occurs
by universal control
so it comes down to that
what you should do also
how the human body works

i.e. feel the body yes
know another body as you know it
the result of future events
it turns out that the human body
this is your future, the obligatory future

this way you get out clearly
on a completely stable line
from all sides, no matter where you are
whether you swim in the sea, fly on a parachute or walk

this means you will always be here
in the field of absolutely sustainable management
because you always have a physical body
and you are kind of there
in absolute coordinate system

when you come here
to such a principle of universality

then further on you do n't really have anything special, it seems like yes

no need to do it
everything is going so well

but when you come deeper into yourself
you see that you are designed this way
this is your natural state

so do something like this if possible
control
and you will achieve a virtually harmonious, beautiful such
this is ^{how} the beauty of external and internal management is
when stability
this is your desire
this is you
but it is an expression of the will of all people
you understand it right away

and then you ^{actually get it}
absolute ^{yes so let's say} universal control
which solves everyone's problems at once
including you

once you fixate at this point
All
your questions are resolved
now which

This concludes today's seminar.

Thank you very much for your attention
