

GRIGORY GRABOVOY
The Teaching about God
Movement of the Physical Body of the One God
04.12.2003

Hello again
The topic of today's seminar
This is my Teaching about God
subtopic is this
Movement of the Physical Body of the One God

in this structure of my Teaching
must be considered first of all
necessity of withdrawal
coordinate system
the location of the Physical Body of the One God

i.e. in this case
movement of the Body of the One God
and announces His location

when a person sees how God moves
then by analogy he will build
mechanism of self-propulsion
then it is clear that this movement
the physical body of a person will be like this
what is around the human body
processes become Eternal

the same as around
Physical Body of the One God

for the presence
Physical Body of the One God
has
in the optical range, for example, reflection of information
two factors

this is the first factor
that the Physical Body of the One God is Eternal

and the second factor
the information reflected to Him is also Eternal

because He is the Creator of the external system
and He is also the Source of the optical impulse

hence
reflected fragment
he is the same His and fragment
i.e. God perceives the reflected fragment as the Eternal

so for God
there is no concept of "destruction" "death"
and He is quite adequate, so to speak
from a human point of view
from the point of view of human Consciousness
perceives this phenomenon for himself

i.e. adequacy is expressed in that
that God perceives this phenomenon
how completely normal
in the structure of His own Life

so when a person learns
perceive in the same way
constancy and eternity
external elements of Reality
then it will also develop forever
as well as the Physical Body of the One God
i.e. in fact, man becomes Eternal

then the resurrection processes in this case
take on the appearance of a simple comparative movement

for example a person moving in the same way
how the Physical Body of the One God moves
actually entails
restoration of the departed
restoration of some external elements of Reality

and when it comes to illness
then even the beginning of movement means the human body
in the same direction
that is the Physical Body of the One God
entails the restoration of human health

and by the way you can see it from here
that is precisely the fundamental difference
between, for example, a person who did not die
and the man who was resurrected

consists in the fact that
that in order to resurrect a person
it is necessary for human movement
i.e. the physical body of a person
and the Spiritual body of a person, for example the Soul of a person

together with the Physical Body of the One God
where are the concepts of Spirit and Soul
they are focused
precisely in the Physical Body of the One God
there were such
so that if we are talking about resurrection
then this movement should be carried out
Spiritual character from a person
i.e. a person must spiritualize his own path

in case of recovery
just when the person hasn't died yet
It is enough to just look at everything
the trajectory of the movement of the Physical Body of the One God

logically it's quite clear
because here to consider
where is for example the Physical Body of the One God
Well , let's say we can take action to improve our health
and at the same time he is the Light of God and brings healing
therefore here it is enough as if a primary impulse is obtained

from here onwards we move on
to the further development trajectory
Movements of the Physical Body of the One God
we consider the process of Eternity in fact
which fits in general
at a certain time
Well let's say a fairly straight optical path
from the point of view of human perception

i.e. to find the resurrected person
in some specific place of information and space
or to definitely cure the disease
we need to consider
the path coming from a person, for example the path of light

the way to go around the world

and this light must necessarily go
to the side means God

which this path gives initially
but also which gives this path
through human consciousness

that's why it's important
to form one's own Consciousness
in conditions of, for example, the most varied situations
Here for example, there are household or targeted ones
or related to Macrosalvation

so that without speaking about any
maybe even a special long-term development of Consciousness
namely to form
for the specific purpose of Macrosalvation

that human consciousness
directed towards Macrosalvation
always goes through this path almost instantly

the path where God gives
for human Consciousness
Your own path
He gives it to him
because a person perceives consciously

and when we consider
for example, this process in a complex
then it is clear that all people see them
how the Physical Body of the One God moves

because people can
give birth to healthy children
can be healthy
and at the same time do socially significant things
useful things for society for oneself

hence
this glow
it is also built by information
coming from the Physical Body of the One God

for the One Body creates all Reality

so here we can consider
any positive way
as a co-movement

and then the question arises
that knowing ^{well} some positive elements
development of civilization
in the field of, ^{for example,} culture, in the field of ideology
you can focus in this way
all these optical manifestations of Reality
towards the Source
that ^{in general} the Source here may be
quite easy to find

because if we see ^{we will say so much}
clearly visible optical rays
^{for example, there are} sunbeams or some reflections
then we can still form an opinion
even if the Source is removed
about where this Source is

same here
considering positive development processes
human societies
we can very well see here
where was the Action of God
where His Physical Body was in motion

and when we consider, ^{for example,}
God's given way
then we see
that the Movement of the Physical Body of the One God
it primarily ^{means} located
in the statics of the human soul
it is precisely in the eternal original
statics of the creation of the Soul

when God created the Soul of man
He pawned
factor of its movement of its development in that
that the Soul is already maximally developed
and she has all the knowledge

and from here it turns out to see
movement of the Physical Body of the One God
it is enough for us to consider
namely, the revealed one's own Soul

i.e. the Soul that is
in a state of interaction

with all Reality
from the point of view of the technological approach already
when the Soul considers
the God factor as a factor of action
and as a factor in general, a coordinate one

because in the World
where is Eternal development
the only essentially coordinate factor
from the point of view of the primary impulse of Perception
is precisely the movement a certain path

and movement as an object, for example, of a certain form
this is the world unfolding
before the Soul of man
i.e. the World that God reveals
in the Soul of a person

and when we consider
this process is precisely this process in general in a complex
you can see it here
what if for example we want
allocate a certain percentage
primary perception of this phenomenon
i.e. how much we see immediately and fully yes
this process

then it is clear that about the percentage ratio
we are talking only then
when we, in general, kind of consciously form
first impulse
in the form of a sort of cut-off local region
to understand it, look at it from all sides

so God formed
from the point of view of One's Consciousness
local as if finished image of the Infinite World
i.e. the image of a person
human form
this is the image of the Infinite World
for God

and then it turns out
that the resurrected man is in this position
or for example a person who needs to be cured
or a person who needs to regulate events
this is the person who, first of all,

revealed to God
as a person carrying out actions
for the general development
as a person who contains within himself
all knowledge at the same time
and at the same time, for example, the level of a healthy body

i.e. a healthy body is, in general, a given
which a person always has
for the outer world
it exists forever from the point of view of man

and one factor is enough
existence of the external world
in the Eternal Plan
then man becomes Eternal

i.e. as soon as a person places himself
into this axis of knowledge
he has an Eternal path of development
in your physical body

and from this point of view
for example, the starry sky or the Milky Way
or some galaxies especially distant from the Earth
they exist for human Consciousness
level transition structures
where a human cell , for example , becomes Eternal

i.e. to make the cell healthier simply even
give it the characteristics of Eternity
and thereby improve health
enough with the mind's eye
walk through the milky way
and return through a distant galaxy

This is the simplest technological technique
which speaks about that
that God put the external means the glow
in the form of elements of the external world
by such action

and this same action leads to healing
i.e. to bring the physical body of a person
to a level similar to the Physical Body of the One God
i.e. the level when a person is Eternal
and the body cannot be destroyed

in this case it is quite easy to see
what is the resurrection level then
for God as such there is no death at all

and this external glow around a person
when it is located, for example, on the axis of the World , yes
or in the center of the world
from the point of view of the Eternal development of this person
he exists and lives forever

i.e. for God
there are certain areas
where a person is always
in its True status
in the status of Eternal development

for the Physical Body of the One God
it is also located
in the center of the world actually for man

also a person has the same place
and so when it happens
for example biological death
or the person has some kind of disease
which by the way are completely different concepts as I already said
fundamentally different
but nevertheless
the nature of some deterioration and condition

then in case of biological death
the person is shifting
more towards the diffuse bias
for God
like where the concentration is
there is less optical glow
and is often not visualized by people

at that moment when there is a disease
Generally speaking, this does not affect the picture of the world at all
i.e. a sick person
and even for example there is an extremely sick person
he under no circumstances
not really close
to this type of glow
where there is dispersion of the system

Well, for example, biological decay of tissue
this is the dispersion of the system

and the principle of equality
any object of information
for God
leads to God starting to level things out
the situation in reverse

i.e. in fact, God is constantly doing work
in general, according to a healthy human physical body
and what does such a body have to do with it?
which has
development technologies in Eternity
technology means self-regeneration
Eternal Development Technologies
in a social sense

i.e. in the human body
information is located
which allows him to do the same
how god created the world
and civilization flourishes nevertheless
despite, for example, various wars, etc.

a person has a level
which allows him
accurately navigate the situation

Human diseases are also cured in the same way
only he gets on his way in a social sense
and so the resurrected man is found

The Thinking of a Resurrected Man
this is the path that comes to us
i.e. the path leading to those who did not die

and when we look at
this structure in the form of means paths
going precisely first and foremost to the living
then it is clear that the world is arranged in principle
well, in the form of a kind of , let's say, harmonious system of light

where are those who did not die
this is the glow of the outer contour
as if the outer ring means a circle of some kind

and the internal system
this is everyone who has already been resurrected, for example, yes
more generally diffused glow

and in the center of this, well, in general, in a darkened level
there is a level where you still need to resurrect, for example
or they were resurrected but did not appear

from the point of view of this circle, for example
it turns out that we get a kind of cone
going, for example, in one direction or another

goes in the opposite direction
cone of Norm of Events

i.e. the faster we do the management
or the Health Standard for example
the faster we get
it's the golden glow
this cone in general in the general sense

hence
normal human life
in terms of its individual place

from the point of view of the Perception of God
near God
or for God we can say so
and for myself personally as well
this is the golden spectrum
which covers all phenomena of Reality

where the departed must be resurrected
and the living must have a Norm of events

and therefore
and a normal physical body
i.e. practical human health

but but when we talk
that the person is practically healthy
we are considering precisely the principle
practical human health
then here first of all we need to consider
what is practical health
is formed by the Gaze of God
Physical Body of the One God

or God from His Physical Body
on the processes of distant Reality

here is where the peculiarity lies
why do some diseases exist
which relate
for example, to the category of genetic diseases
or biological aging occurs

because God is watching
into the Infinite System of the World
and a person often, for example, limits his vision
let's assume some local problems situations

and therefore it turns out that if we consider
this is the option where there are two cones
diverging in different directions
starting from the tops for example
are drawn to one point
inside this circle

then we see that the resurrected man
or a person who, for example, has suffered biological death
he is in the center of this circle

i.e. it turns out that the radiance of this person
this is the collective will of all people
collective will creates this man

i.e. it turns out that a person in principle cannot
just die somewhere disappear as if completely

i.e. sooner or later collective
in general, how could it even be said that way
collectively
increased glow coming from all people
This glow forms an image
which will eventually become alive anyway
i.e. people who shape life

and when do we begin to understand this
at the level of just an optical control plan , in general
that's what I'm saying now
I mostly speak at the level
logical precisely Perception
where Spirit is a system of knowledge in this logic

i.e. knowledge occurs through the Spiritual aspect
but the control fragment itself
stands in the field of logic

and then it turns out that people give life
they act the same way as God

i.e. God in the complex level of the World
where situations requiring solutions are also manifested
social systems, political systems, etc. and the like
comes to absolute clarity of understanding
that then man is Eternal

from this point of view
having looked at the whole external world
we understand that everything that is done in the world
some systems are even being created
there is like a macro even of destruction
they actually lead to more and more
to clearly capture this moment
that man is Eternal
it is impossible to destroy it

On the one side
this means there is a counteraction
logical or managerial
the process of arms buildup

when people, for example, already have some kind of superweapon
in the global sense of destruction
then, first of all,
significant level of management
and precisely the survival of people
even if it is from some local conflicts
is personal will
when a person can influence a weapon

and again, it is necessary to influence in this way
so that the weapon does not actually destroy a person
this is again the Laws of Eternal Development

because even in light conditions
levels of management
light-optical control levels
it is clear that any impact
first of all, it must be fundamental in nature

and when we see this image
which I have now outlined
in the form of some distant galaxy there, yes
or in the form of a DNA spiral, for example

then we understand
what is the form of this phenomenon
she carries within herself the Divine nature already because
what we perceive it as
in the form of, for example, some huge ones
well, like objects created from somewhere

so while considering
what is in the act of creation
perhaps God was involved earlier
and then they kind of developed on their own

that's where nature is
for example, meetings of the resurrected with those people
who resurrected this resurrected man
or the recovery of a person
have nature first of all
indirectly often related to that
how the Physical Body of the One God moves

for it is Eternal
it has not undergone any changes, generally speaking
in the level of biological decay for example

and we see this path
as the path approaches
to the movement of the Physical Body of the One God

because if the path is along the movement
then the person does not die

but in order for the path to approach
became True i.e. by movement
man is resurrected
and met with living people

and met, for example, in a family
i.e. in the conditions where he lived before

then it is quite possible here
It's very simple and logical to solve

the next task for myself

Well, for example, set a task
identification of this path
a specific person
as a coordinate system
and even flat

for example, in front of you is a sheet of paper, it is in a box
and we want to project the place on this sheet
having designated this notebook or this piece of paper
like the city plan there for example
where will the resurrected man come

or where does it mean that a person has passed
well, for example, there is someone who has a disease
at some point in a given area
will be cured

then we just project it onto everyone
the level I described is, well, generally speaking, diverse
where are two opposite cones
and inside there is a kind of toroidal surface
in fact there is just a circle there
well, some kind of top, let's say, in shape it looks like a top

and that's when we start such a construction
how to put in the center of this sheet for example
for example, lying here
and we start to squeeze
by the effort of the Spiritual will
here is where I introduced an important concept

namely the Spiritual Will
the will of the Spirit of God
for a person
this is the Spiritual will in relation to some concept

and then this compression
leads to the localization of a specific event
where does this event take place

Now I showed the technology
when can a person learn
in general, to develop your clairvoyance in fact
Spiritual logical, so to speak, clairvoyance
clairvoyance coming from a harmonious state of the body

those. body harmony
in relation to the outside world
this is also a vision of the accuracy of the situation
which was originally given
for example God
to a person

and here you can immediately see a specific place
on this notebook for example
where does this happen

why did i say that
what to take a piece of paper first
why not just take a map of the area right away ?

because i showed
that even a leaflet that is not informative
then carries the meeting information

i.e. you formed it yourself
as well as indirect, i.e. conditional
or the approaching path of the resurrected
to the path of God
or, for example , a sick person
to the path of the Physical Body of the One God
so that the patient can be cured

then it's the same here
as if this leaflet personifies it
actually getting closer to a real map, for example

but if we look further
further there is the real terrain
so the real area is co-operation
i.e. the action of both God and man
on the development of the outer world

and when we, for example, this process
already generally consider it as a process of action
then in real action
when the person already leaves
to meet the resurrected one
or he is getting better
in general, due to social circumstances

because I showed

not just some point in the city
where a person, for example, will come and recover
as a rule, this place is associated with its tasks
in relation to God
to society
i.e. correct or even sometimes intense
fulfilling your tasks leads to healing

the only thing you need to know is
where to do and what
it seems to be written in fate
at this moment at this second

then it turns out that the concept of "fate"
it's what you shape
by forming the same level of management
You put this piece of paper
and then they attached a card, for example, yes
or the diagram was drawn in the form of a map

here it turns out
what if you meet a resurrected person
this process means
process of co-facilitation in relation
to the next development of the resurrected

i.e. the place on the map should indicate
how does a person live normally
in this social society
and he is happy with everything
and everyone accepted this action, for example

and the healing process
or the process of normalizing events
this is an ongoing process
to the next level of development of this city
there is a given region or space in general

i.e. here again there is a moment
where it is said and shown by me
that the resurrected one must first do something
i.e. some kind of loss of time again in the social aspect

and in this regard again
there is already some kind of social gap
between the resurrected and the one who did not die

for the one who did not die
I need to continue working with God
with the Movement of His Physical Body
and maybe go there with him
let's assume hand in hand
Well, I'm speaking conditionally, of course, including conditionally
and continue with some other work

at that moment
the resurrected one may have to first
determine one's social status
in this life

so in order to overcome the social system
for example where is well as if some kind of loss of time
in social adaptation
many resurrected pass the level
where they are mentally actually
i.e. at the expense of one's Consciousness
due to the general level of development of one's Consciousness
bring the structure of their own body
in your Perception
to the area where they are located
in the center of my own World
i.e. where everyone is Eternal

and when they perform this action
that is social adaptation
happens almost instantly

i.e. for the resurrected
There are also certain technologies
acceleration of adaptation to the World of Tech
who never died

and at that moment
for example, living people have more space
for the next action of those living
who did not die
I used that word
"never"

but the thing is that when a person is alive
for example he was born
It's clear that he was born, he has birth certificates
it's clear that he had never died before this moment

Please note that in Russian
there really is such a nuance
not only in Russian translation of course
in all translations it will exist
just a logical status of an event

man never died
because he was born and when he lives
it's clear that he never died

as if repeated many times
of the same logical course
leads to the fact that birth
this is the fact of birth in the center of that World
where is the Everliving Man

i.e. birth itself always gives
The true structure of this World
for the newborn child

a child is always born
in the center of Eternal Development
it turns out that way even logically

because what I just said
this is a logical consequence
well, for example, the previous part of today's lecture

it turns out that we are dealing with
here in the nature of things with elements of Reality
which are actually initially designed like this
that they are Eternal

i.e. therefore there is here
movement of the Physical Body of the One God

and when we start to consider
how it is manifested
well, in case of the birth of a child
movement of the Physical Body of the One God
is the Love of God

i.e. here is Love manifested
in relation to a person
Love is all-manifested
not simple in general, even if you can say so
unidirectional

or maybe even sometimes multidirectional yes
Love for a person

but it is precisely the all-manifested
here is all the manifestation of Love
directed generally at the same time
to a specific person
in a specific place

it is immediately clear that the World is built on Love
His Body is Love
in relation to people

and when you look at this statement
well, from the other side
then he who does not see Love
he can't perceive it clearly there
for example, faith in, for example, an active God
and who gives them the complete technology
because He does not look from the point of view of Love
and looks , for example, from the point of view
some other motives

there is something God must give him, let's assume yes
or solve some of his issues

but you just have to love God
he gets what he needs
he gets his way which is
at the center of this initial level of its development
his birth
from the point of view of the level of Eternal development
and Eternal birth
i.e. birth in Eternity

he seems to be born almost all the time
together with such a discrete
as if permanent even somewhere
level of the state of the Physical Body of the One God

i.e. for God
every next moment is new

and that's why it turns out
co-birth
with the Physical Body of the One God
this is the True Path

where is Consciousness
The soul of man
human physical body
controls all processes itself
including his own life

and when a person comes to this
he understands
where is his life located for example
I mean in the information of course

if we consider
some variants of fairy tales and various ones we suppose
there at Koschei the Immortal's
life was in some kind of closed situations
including there are even such versions in some kind of canard
which must fly away

those. movement shown
that life is precisely Eternal
located
either in a closed system
well, some kind of needle in an egg, yes
either in motion

Well, I brought it up this way , basically, so as not to have to consider it
just say from the point of view of that
what is written in the fairy tale

and what is there
and movement
and some closed statics
in the form of some kind of egg , well, like a circle
in general, some kind of toroidal system, including

and when you look at these processes in this way
that is the combination of statics and movement
this is Eternal Life

the only difference is that
which Koschei the Immortal seems to be doing well
that it was directed
to the decision
some of his narrow, for example, well, there , malicious tasks

and focusing in one direction
does not allow the development of the system itself

it turns out that if he solved the problems of good
then his life would be Eternal
but he just apparently didn't know, so to speak

Now we are looking at the process
Well, for example, based on this plot
process of knowledge

as soon as a person knows
that he can spread, let's say, his knowledge
at the same time he knows
where is his Eternal life

that combination
statics of the Soul are precisely of a static design
where is all the knowledge

and movements
movements of the Physical Body of the One God
after all, God is also manifested in the duck, in general
well in any element of Reality and
especially in a moving duck

it turns out that understanding is deep understanding
their place in this process
this is the real Eternal life of man

i.e. places at the level of general action
and your personal place
at the level of action for another person

that's what he needs
for example, teach another quickly and survive
this is the primary meaning
not only to survive
and give him Eternal Life

here in this section of my Teaching
where i am looking
it is the movement of the Physical Body of the One God
I am considering passing on my knowledge
as a system of knowledge
its structure of essence
your place in this particular life
in relation to
to the process of movement

and locally of course
in relation to
locally in concept
precisely in relation to
to the movement of the Physical Body of the One God

Here I am looking at the process
very clearly interconnected
with the personality of a person

i.e. a fully spiritualized personality
you can apply it to the name of the person
although on the other hand
how to determine how complete a person is yes
in terms of his level of development as a person, i.e.

here the fullness of personality is determined by knowledge

i.e. a person can say about himself
or a person can declare
that he feels the fullness of his personality
in this action or in this state

and it turns out that the feeling of completeness of personality
By the way, this is complete health, and often
or at least it's practical health

so this is the state of God
Physical Body of the One God
according to human consciousness
maybe not quite close
because this is how human Consciousness perceives

but God perceives
his revealed Personality for everyone
in the same condition
that he is happy and creatively developed
or on a high creative upsurge
when all people are alive and well
this is his main task
and not only people in perspective

and it turns out that it is comparable, for example
with the Physical Body of the One God
human physical body
personified by his own personality
can fully perform

at the level Well, let's say, my creative upsurge
in the conditions of awareness of one's place in this World
almost any task

such as God makes

because it is located
in co-movement
in this case
in this element I have just shown that place
where as in one express train
and God and man ride side by side

and if God is riding on this train
that means the express is safe
and there is food and there are the following events

and it turns out that we are looking at
process in a complex for that
to realize practically
your place of action as a person

why do we want to resurrect another person
and because
yes there is logical knowledge
that life is Eternal
and they are targeted and they are realized by the Soul or the Spirit
but there is knowledge realized by the body

human physical body
under no circumstances
does not seek destruction
or there to self-destruction

by and large the physical body
it's set up so multi-redundant
that it should not be destroyed
and in general it can't be
from the point of view of, as it were, correctness
or the optimality of events in the external world

therefore, a person faces a task
to personify with one's own personality
exactly the person who understands this state
the entire external physical world
including your inner world

therefore it turns out
that your inner world is the world
which a person creates for himself after all
i.e. it forms in many ways
by transforming external Reality

and therefore
resurrection of another person
this is a person's internal task
this is his own, as it were, acquired task

It is clear that initially a person is born
with resurrection mechanism
Well, let's say another person
for a number of reasons he
or can be forgotten
or remain in effect
if there is knowledge from an early age

but it is precisely the resurrection of another
actually overcoming death by the person himself
from the point of view of solving the Divine task

showing resurrection
man proves
and it turns out
to myself and God
that he is on the True Path

and showing that he is not dying
he also proves it

when everyone is resurrected
the way of proof is unity with God
for this everyone must be resurrected
it is clear from this

at least
from the point of view of the dynamics of action
It's clear
for Perception, for example, even well, in general, those people
who are encountering this concept for the first time

and when we want
to overcome this concept means for those people I mean
that they first encountered
and we want to explain that this is so

explain very quickly

i.e. we want to overcome this concept
transformed by them
in Consciousness to the level of the Soul
where the Soul is not yet open to this phenomenon

then it's enough to show them
on the structure of your body and Soul
that their Soul holds the body

that their Soul is designed like this
that the body, well, it turns out, on the Soul, you can say so
on the information of the Soul

and physically it looks like this
what is in the structure of the human physical body
there is a certain light cone
and the body is as if located on the structure of the Soul

this is the canonical image
which is not related to the concept of, for example, "aura"
and is not related to the concept of well, let's assume there are "biofields"

this is the Soul
which was sent down by God from the beginning
reflection of God but inside

and the reflection inside can occur from above yes
from God coming from above
from everything above
in a logical sense

so it's natural
Light can pass through the head and into
and there it kind of blossoms
it turns out to be a cone
geometrically it's all clear

but when we
we start looking at the outer cone
what awaits us from above
then we see a future that is manageable

for the Light within is controlled

hence

human feelings
movement of human feeling
it is the same as
movement of a physical organ
Physical Body of the One God

and so that we can see
movement of a physical organ
then we can generally consider the following concepts
like the movement of the Hand of God of Legs
Well, I mean Hands, Legs , Heads, etc., that is, what moves.
We don't look inside, for example, the body of God
and we look from the outside

it turns out that something is created by hands
i.e. by human action movement
this is internal
including the Divine state
thoughts and actions are given by internal content

i.e. God also brings actions into us
from , for example, your system of World Perception

because today I said
that a person forms an inner world
and here I also add that in this context
it was at first that I first looked at
in general, the light optical level
manifestations of God in man
God brings it himself

and that's when we look
the intersection of these phenomena
then we see
the line of human life on each organ
on every cell

the intersection of these elements
creates the physical body of a person

Movement of the Physical Body of the One God
this is the created physical body of a person

and the movement of the human physical body
this is, in general, all-manifestation
Physical Body of the One God
in achieving some of His own control elements

i.e. social societies develop
for example building structures
life evolves
and this is God manifested
in the creative action of people

and from this it is clear that social systems
where creation is the goal, for example, of some civilization
so there is a designated Action of God
Including your physical presence
i.e. like a cone inside the system

having found life
in this case i said
that there is a life line on each organ
we see that God can walk quite well
in the form of, for example, an ordinary - looking person
in any social system
for these are His Actions through people

and when we, for example , consider this logically
what is clear on the one hand
that God can of course walk
but we looked at it as if in optical tolerance yes

what is God's pass into this Reality
for Himself
how He will be his
in this newly constructed environment

because He is through people
laid down the aspects of creation
and this creation is a kind of
Pass for the Physical Body of the One God
into the structure of people

and it turns out that the one who creates
at the social level
they are close to God
and He is helped in this by well, let's say, guides
Divine ideas and thoughts

and when we look at the docking
for example God passes by
greet a person
a person quickly or instantly recovers

then there is an element of contact here
is concluded as follows
if he shakes hands it is an instant action
if he nodded
perhaps the person understood the optics and recovered later
and maybe right away, but if God wants

it turns out to be God's desire
this is a human reaction
came close to God, said hello, became healthy

but then you need to know something else
how to approach ^{so} as not to tire
Well, in a word, it exists there
some code of conduct is ordinary human
God and man
interact on a human level then

and then it turns out
so that God would have let ^{us} suppose here
a certain structure of behavior
in relation to a person
in human logic and vice versa
there should be very clear canons here
^{like} joint activities ^{or} joint works

and the canons are very simple
to be like God
i.e. it is easier to solve ^{yes} in such systems

it turns out that man must be Eternal
he may come up on the right path
seemingly small physical meters ^{yes}
walk ten meters and say hello
but then it must be
at all levels Eternal
and be directed to Eternity

therefore life is in man
i.e. the entire physical body of a person is life

then when a person moves
in relation to God is correct

and when i said "find life" ^{yes} man
after all, the physical body of a person is living

this is life

logically it is clear
but it is understandable and spiritual
it is clear and divine
i.e. here we understand how God thinks
about us

and when we start moving
already to myself
to your Soul
then we see that the resurrected one, for example, he is already here
he has overcome this optical level
like a background and other people
who do not know about processes such as Eternal Life
and he is here because
that God can come
naturally can come here
any enlightened resurrected

or even not enlightened
but which, for example, has worked
there are a lot of characteristics in optics
for your way

for the resurrected come
producing optical elements
often in front of you

and it turns out that we have
this process is generally controlled in this way
that this specific bridge has been developed
he ca n't always lie down exactly
into the existing optical level
background physical world

that's why there are often meetings with the resurrected
it's delayed because of this

but since the Physical Body of the One God
this is the maximum light obtained
from the point of view of Consciousness
and the world in general
walks calmly, that means in physical Reality

then any resurrected
naturally can come here

No problem

i.e. I indicated now showed
the path of movement of the resurrected
by the movement of the Physical Body of the One God

means the Physical Body of the One God
this is the way for man
and the path for the resurrected and the resurrected
i.e. this is a common path yes

this is all that unites
and God and man
and what is located
it means in relation to the resurrected one
as a path necessarily towards life

because, for example, having come to the physical World
God shows

for example, to a physically living person
for example, not dying
how to approach it in one way
in the form of maximum luminescence

and to the resurrected
or the one who should be resurrected
differently

because he was resurrected
this is the path of social adaptation
i.e. the background, as it were, of the social level

but who else needs to be resurrected
this is a question for a person
because God sees him always alive

and for God he is alive

hence
resurrection is a question for man
so that a person
from a level of as if rarefied information
i.e. from the level that is perceived by a person
as a process of decomposition
I would bring this person
to the Eternal level

it turns out
resurrection is a human issue

and when do we start
this is the process that we should consider in general
as a process of human action
what we see here first of all is that
that man wants to be like God
at all levels
because he knows he can do it
i.e. he knows exactly this

and when we see this knowledge
it is clear that many people can , so let's assume, switch
or at least they used to switch
means to the level of biological decomposition
because he knows that he will master it
body restoration technique
and will receive his living body

i.e. knowledge that exists
allows you to overcome well as if in the future
the system of this decay and biological

and it turns out that this knowledge is like this
what does it mean when a person uses this knowledge
for example, it gets into biological decay
or there goes through the theory of reincarnation, let's assume
practice of reincarnation

then he goes through it because he is confident
that there are no problems there in general
he will recover anyway

It would seem that there are certain ones, then yes
Laws of biological development
but that was before the time
when there were no nuclear weapons yet

as soon as nuclear weapons appeared
which can destroy the entire civilization
The laws have changed radically
I mean that too
chemical weapons, bacteriological weapons, etc.

i.e. when did they appear
means of destruction of people

reproduced by people themselves
then this is the process of knowledge
he can be like that
that a person who knows for example
let him be very enlightened and know
that he will restore his physical body
based on the Laws for example yes to the Eternal development of the World
it means that he will come into this world
but then the next question will arise for him

and will this world exist?
will he even have time to get anywhere?

and now the resurrected are faced with a question
adapt the social system faster
so by the way, the sooner
people will learn on their own
cure your own diseases
the sooner they will show
that the body is completely regenerable

this is a big contribution
into the structure of precisely Eternal development
real development of the Eternal
human

and it turns out that now a person does not have to die
no knowledge logically

because here he can
influence and act
so that there is no global destruction
when it is outside of, for example, the biological body

from the point of view of people
on people's information
he can't have a radical influence

may God see him alive
but to influence people's information
that's how it works
there will be a person who actually lives

that's why it turns out
that the Everliving Man
this is Eternal development
eternal co-influence

well, for example , a person against another

and when people influence each other
then we see that we receive True life
when it is directed towards Infinite development
and this is the manifestation
movements of the Physical Body of the One God
this is the movement of the Physical Body of the One God

Eternal life
this is the movement of the Physical Body of the One God

and when we approach this movement
then we see specifically
The Physical Body of the One God
then we see His concrete appearance
Human appearance

and looking at Him
it is quite possible to solve it
in general, even applied ones, yes
your moments of control
some personal tasks
but according to the works and tasks of God
again, we must not forget
Macro Rescue Macro Management
and at the same time the Norm of all events

i.e. in fact, I have now brought it to this
what did he show
how to find
The Physical Body of the One God
and how to see Him
in what place
and how to do it
and how to get control

please do this if possible
and get concrete practice

I mean if possible
i.e. as I usually suggest doing it
not specifically there now and immediately
whenever you want
so that there is free will

and it is better to do this repeatedly

This is where I end today's seminar.

Thank you very much for your attention
