

GRIGORY GRABOVOY
The Teaching about God
Organization of action
24.04.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Organization of action

in this topic it is necessary to consider the process
when you through your own management
organize the action
directed primarily
from an external object yes for example management
to your own Soul

i.e. when your Soul organizes your action
as in the Infinite Phase of Development for example yes in Infinity
and right next to you

so you can consider
as an action that is located for example
somewhere in Infinity across all aspects of Reality
because the infinite quantity
it is also a quantity that covers
all phenomena of Reality

and it turns out that you are through such an action
you receive knowledge, for example, about the whole Reality
and also my own knowledge
i.e. private knowledge

in this case we are talking about
about the allocation of a local level of knowledge , for example
when you know some personal knowledge
through the structure of Infinite Action
but in a single impulse

that's why it turns out
that when you organize the action like this
for example, Action is organized by God
you can consider your personal problems
from the point of view of past events
for example, you can consider some current tasks
from the point of view of past events

those which God Himself made

and you can see God's work in the past

based on this

so you can practically record time

i.e. in time, for example, to do those actions

when events are a quantity

virtually completely controlled

to your Consciousness

because the action that you did, for example , yes

let's assume you remember or can say

that somewhere there was some information about past events

but when, for example, you decide the issue with exactly that
how to single out God's Action in the past

then here it turns out

what exactly is the organization of Action by God

when God organizes the action and the coming too

because in the understanding of the Soul of man

action is always some kind of movement

i.e. it is not static

and in order for this, for example, direction of action

led for example Yes

to a result that is definitely positive for you

provided that you can have

Well For example there in the structure of World Salvation

certain resistance

your own tasks and actions

then it turns out that you can see

that simple Truth

that when God created the structure of action

He naturally created Action in such a way

that His personal tasks are always realized

in action i.e. in dynamics

and based on the fact that we see the world as developing

then it turns out that this is how it is

firstly because we perceive it

i.e. that's how it is because we can prove it

that any action can be considered, for example,

as well as the position of some statics of the next action

or for example action by action

where there is no gap between actions and some

it turns out that God showed here
that He developed the World so

that His initial Action always proves
that any action of yours is feasible

and even if you

For example They haven't fully mastered the system technologically there let's assume

in the implementation of the action

but you know the Truth

i.e. the initial or root meaning of God's Action

then you see yourself in Him

i.e. that's how it was originally

at the root of every Action of God

in Macrosense

and for you personally

generally speaking, you are

you can see yourself in action

in the form of a static system

where is the dynamics

this is your obligatory achievement of Eternal development

i.e. from God's point of view

there is a very simple quantity

Well, if you take it and ask yourself the question

how does God see Reality anyway

He is also the Eternal

for Him all events in principle have the structure of Eternity

i.e. He generally perceives only the Eternal magnitude

and then it turns out for God

do you exist

and Eternity exists there as if formally

Well, let's put it simply yes understanding

or in an adapted sense

for human Consciousness

here it is necessary to identify

the following structure in management

what did God give for contact with Himself?

to a person

and it turns out that He gave, generally speaking, including

very clear and absolutely principles of contact
because if there are no systemic ^{yes}
clear principles of contact
it turns out that it is impossible to say
that the Action of God is fully realized

i.e. God for Himself
must provide clear access paths
to God

and here a very simple element arises
that's exactly from the point of view of organizing the action
that's according to my Teaching
here you can immediately give general knowledge
For example there about universal Salvation
if only we could concentrate everyone's attention
in the unchangeable past

and if it is
then the knowledge will immediately spread ^{there} instantly
if you do this in management
then you can transmit a very strong system of knowledge
just by acting in this direction
for example Spiritually

so from the point of view of highlighting events
in the obligatory achievement of the Action of God
and the Action of God
from a logical point of view
Spiritual aspect of understanding
this is Eternal development
this is also an action of God

It is not only meant that we naturally consider
some action of the physical plane or simply Spiritual
but we are also considering the form of action
or the meaning of the action as such

it turns out that any event
it can always be restored
to the level of primary connections, ^{so to speak,} of this event

i.e. well, like, ^{for example,} some matrix, ^{yes}
which originally exists
and when converting this matrix

it is still possible to restore the matrix
with any changes to it
according to the logic of actions, for example, yes according to the logic of actions

if we know that some changes were made to this matrix

so to understand what they were
we must know the past again
but God's past turns out
in our own action
from the point of view of the past or the future

but the current action
this could also be God's past as well
God is always ahead of us, yes
event level

and it turns out that God always leaves the action
as if accumulating the structure of a fixed past

for God is Eternal
therefore the whole structure existing in life
This is the path He actually took

and based on this
because He is Eternal
it turns out that there are no special problems with logic
anyway the world will always exist

and that's how it is from this point of view
in order for a person to actually take action
certain actions for example yes so let's say about Saving the World
it turns out he should just understand
what God wants from him personally
or from humanity as a whole
or in general from all phenomena of Reality
in terms of their own development

i.e. what is the action of a person then?
what is expressed by human action, for example , first of all

but by analogy with God it turns out
human action
this is the creation of the achievability of personal action

why according to my Teaching
it is precisely the attainability that is the fundamental point

for example in the structure even if the event has already been implemented

and therefore when for example it is necessary there

Well let's assume we master the technology

or more intensively or specifically yes

and make, for example, control through the past

it turns out that it can be done quite simply

change the structure of current events

as many times as necessary and generally as much as necessary

you just have to find some kind of inner

such a special or internal moment

for example in the depths of the Soul

or for example at the level of the external structure of the Soul

find the moment that concerns you

and why is he like that

that you can see events at the same time

as if from the outside as if yes from the Macro level

and from the inside

i.e., having in mind only the internal content of the event

you may not have to

generally speaking, to delve into the event as such

then you fix it

that any adverse events

they practically stop

i.e. you stopped time until the development of these same events

but already in the past

here is the technology

it's similar if you listen to it for example there several times yes

It is precisely in the technology of control through the past

then it turns out that you have any negative system of events

you can bring it to the layer of past management

and it turns out that then the future is for you

always quite manageable

i.e. you have no problems in the future

because you kind of got ahead of yourself

time of its own action

this is on the Spiritual plane

i.e. what I just said

this is more the work of the Spirit

and it turns out that when you
for example, you make a management structure
through for example there is an analysis of the work of the resurrected
for example if a person is resurrected
for example, he is registered there at a specific address
where can I talk to him
at this particular address

then it turns out that at this address
there is information about this fact, for example
that in the collective Consciousness yes For example
it was supposed to be an action because well for example, there was a person there
some comparable level let's assume
with a level of as if no action

i.e. the process of life is an action
from the point of view of biological death, for example
this is some level of lack of action

and if we change for example
level of no action
for action after all
i.e. we are considering the position of a person who has already been
resurrected
then we get the address itself, i.e. the factual coordinate
that he can receive people at this address
let's say we talk about his positions
how does he perceive the resurrection at all
this is the Action of God
aimed at understanding the person himself
the most resurrected

i.e. his answers, for example , his stories , yes
about the action of resurrection
this is what it excludes structure for example well, some static
precisely in the structure of the collective Consciousness
i.e. he actually excludes with his knowledge yes
popularization of that
what if a person, for example, is resurrected
or at resurrection level
begins to understand
what is there, let's assume there is still no static

and when you, for example , transfer this technology
for example, there is treatment there there are diseases there

where the absence of, say, some disease
this is an effect of health yes
health development action

then here is the selection element
as if the structural level of management
in general how to take and make control
so that without entering, for example, into some kind of deeper level
and just take everything at one level
remove suppose structure of adverse effect

then everything turns out very simple here
you just have to enter it into statics
i.e. for example, the statics of the past yes
or just fix it
information of an unfavorable type
at this level of management

and it turns out that the element is static
he instantly seems to lose control
over the system of action of the further

and then it turns out the disease is no longer effective yes
the person is recovering
or or for example resurrected
that's the one I started talking about
as if from the future tense
that he is already resurrected and is located at a specific address

and it turns out that then
it is due to the fact that it is already there
and maybe, generally speaking, it turns out to convey some knowledge
it excludes the element
it turns out that the element of action
but towards, for example, the organization of statics

i.e. from God's point of view
statics is also generally speaking an action
but organized by God
but in no case static
aimed , for example, at biological decay

because from God's point of view
there is only the statics of creation
that's the peculiarity

and here you can see very clearly
where is the realization of a person's personal will yes

and when he ^{well for example} undergoes
just some problems or illnesses
but in principle it can work here too
that it is not even the word "suffers" that matters here
because it's ^{like} the word "tolerate" ^{yes}
but it is precisely "pre" that is ^{precisely} "pre"
and then he goes "suffers"
i.e. "before patience" ^{yes}
but the word "pre" ^{is like} or so to say a preposition
or ^{is there} a prefix "pre"
because it can be done with a pretext
control area
this is the level that shows
what where in general if "pre"
those. before or after ^{yes}
what does he feel at the same time

and if ^{for example} for the resurrected ^{yes}
this word is repeated several times
that's ^{how it would be} with him
this is a phase of ^{so to speak} patience
or action phase
this is what is located, ^{as it were,} behind the phase of patience

because ^{well} you can tolerate it up to a certain level ^{yes}
but when a person, let 's say, has passed the biological level
and had biological death
then it turns out that patience itself is what is here
what directs him to the level of resurrection after all

i.e. that is why man will be resurrected in any case
because the level ^{of external action} ^{is yes}
and actions ^{we assume} patience
at some level of development
because he can endure when he is in action

i.e. the word that revives life is obtained
the word that revives life

and if ^{we assume} for a person who did not die
this is the level of, ^{for example,} one 's own development
any word
then for the person who is resurrected
here the level of Divine action arises
and this level is aimed at that
what a person should then build
word structure

almost as if on its own
in order to not be different from those who did not die
at the action level

those. word organization
i.e. this word is an Infinite quantity
originally given at birth
and it doesn't have this size of gaps

those. roots of the word yes
roots of action
and the roots of man
united
at the level of the initial Action of God

and since there is a level of development there, for example ,
that every event has
let's assume the level of , so to speak, one 's own self-development
i.e. God gave every event
the opportunity to develop oneself in a positive direction

i.e. around the action
there are like many levels
in fact, you could say so
what are these levels of assistance

i.e. you just need to see where in the events it exists
this help yes

then it turns out that in order to canonize the event
i.e. make it completely harmonious
from the point of view of God and man
here you need to highlight the action
as an action in progress
both from God and from man
but to the event
and from the event already to God

i.e. it turns out that a person takes part
in this design in that
that he practically cooperates with God
in event organization

and this is co-operation
this is a clear distinction
factions of the past for example

current
future tense
and through the structure of the past
direct path to contact with God

i.e. here is the structure of the past
where in general you can say so
that a second passes there
and for example, just a second ago it was already the past

and it turns out that a person is always
it comes into contact with something so hard, so to speak Yes
wall of the past
constantly

i.e. it constantly seems to slide through time
with sometimes very strong pressure
on the structure of his personality
according to some rigid system of the past

and it turns out that if it means we
Well as if we were starting to move this wall of the past
well like the great wall of china
how can one person move it
but theoretically you can just climb over the wall there

then here we can assume in principle the same method
Means well similar to physical yes
the human physical body allows us to immediately understand
and what to do in this control structure

i.e. it is enough , as it were, this structure of the past
visualize at the level of understanding
and just take and climb over this border
as if there for the past
before the past

and then you get there
into a structure of very clear linear connections
where is god working now
in the past
because the past is a stable construction

and then it's already quite clear to you
what to do
because if you know
where does he work now
then it turns out that what's the difference

It works the same everywhere.

just walk there and be with Him
according to the structures of the past
and technologies of Eternal development for example Yes
Eternal life
take it and transfer it to the present or future tense

then it turns out you are already going back
you don't find this wall
because you are going to the future tense
and in the future there is no such wall
it is always a multi-variant system of events

and when you start to connect
multivariate system
with the previous level
and think how God, for example, comprehends such a connection
that He is precisely supposed to be technologically
brings into action
a fixed system of past events
and a multivariate system of future events
at the level of your personality, for example

then here it is quite simple clear
that when your personality can change any event
regardless of time
then this is the possibility of such a combination
past and future events

i.e. God technologically gave you this opportunity in general
actions in essence

in relation to that
which you can get almost immediately
all management is in its own area and according to tasks
and at the same time you can get personal
i.e. local control for each

but at the same time you can harmonize the situation
almost instantly
because from the point of view of the harmony of some situation
if for example there is a structure of the past
or something like that, for example, a big level
well for example there's not even a wall there, but bricks

so there is such a concept as there is some kind of "pressure" yes

there's something else a person has to do

and then this brick

for example, there you can move it to the side

and harmony immediately comes

i.e. here is the concept of "working with the past"

it is very often a simple concept

from the point of view of harmonizing the tasks of the future

and from here it is clear that God is originally harmonious

He gave that impetus

that He is always in the future

because the Infinite level of harmony

i.e. the Infinite Harmony of God

all the time gives Him the future path

and it turns out that harmony is the path, among other things

harmonious development is also a level

practically the development of God according to logic

from the point of view of for example there is human Consciousness

but if we want to understand how animals react there

how does a dog react to its past in general

or there is a cat or a plant yes

it turns out to be convenient for them

here is the form of reaction is absolutely the same

here from the point of view of the past process

the reaction form is leveled in that

what does a person perceive, for example , yes

and here you can see how the World is changing

practically from the point of view of human perception

because man gives control

as if to the following structures

and then it is clear that a dog is developed in the same way as a cat and a plant

any element of Reality in general

strives to the level of a human but in the current time

i.e. an element of development or co-development of different systems of the World

with this approach it is very easy to observe

i.e. it's like in fast-forward video recording , for example

Well, there are systems like this that are often shown on TV.

what with an interval of a minute or an hour

they take a picture of a flower and you can see how it blossoms very quickly
yes

here you can see the same picture
what can you have
the structure of the development of some phenomenon
but in a faster version
because you see how it develops towards a person
any element of Reality

and it turns out that God is revealed there
like the level that shows you
on a human level
i.e. here God shows on the human level
to a person
when He speeds up events

and when you, for example, start to see some events
from God's point of view but in human perception
then the formation of such a Perception occurs
in which you see the action
in the fundamental aspect of the action itself

i.e. an action associated with any value, for example, the World
action reaching any, let's say, aspect of the World
or expressed in some Spiritual action
but the whole world
you can see the Spirit of the World for example
i.e. Spiritual action of the World

what is the Spirit of the World
or what is comparable for example
with the Spiritual action of man
but the same similar concept, for example, is the action of a tree

i.e. you start to see here
that in action generally speaking all elements
they become similar

because if it's at high speed, it means it's moving
many different objects of information

then from the side
let's assume there is some wind there
and a lot of some objects are moving
then they can merge yes

in general, speed often in physical Perception leads to that

that some separate elements of Reality are merging

and when the separated elements begin to merge
then this is already a different process

"separate" from the point of view of the past current time yes

it's a different concept

"separated" can be at different times

and when we look from this point of view

for example on the human body

then you can see that the person

can very easily restore health

if it just syncs

different separate systems of their own development, as it were

i.e. when the cells that respond

for a certain order of actions

they work correctly

maybe these are often some individual cells

and they are in small quantities

well, which, for example , regulate the immune system

It is in the action of a local person, for example

not necessarily the whole organism even

and all you have to do is do one right thing there

the person is recovering

but for this he must know

what cells regulate this action

but this already turns out to be a lighter impulse

no need to control the Macrosystem, etc.

and in this regard God created the World in this way

that when in motion they begin to merge

all objects for example yes Reality

then it turns out that super speed is essentially a movement towards God

i.e. when all elements of Reality are united

in action in motion

it turns out that first of all they begin to see

themselves

in super speed

here's to understand yourself from all sides

logically very clear

we need to increase the speed of thinking

up to, for example, some kind of super-fast ones
in general, not only can there even be characteristics
but also properties, so to speak Yes

and if we take let's assume
Well, we start to pronounce some word
and then it turns out that you just have to start saying yes
and then we already know yes
all further actions after the start
it turns out that there, having spoken the first or second letter of the word
we can say that the world is known to us
because although we may not yet have finished the word

and when this property of your actions
it is clear to you
those. The world is known to you
it's clear what you want to say
and for example let's assume all people understood this
I still need to finish the sentence
i.e. therefore the word is whole as a rule yes

although if everyone understood it, in principle it is possible not to finish the
sentence
you can switch to another control transcription there
or put other words

and it turns out that here when you, for example, do management
for example, coming from the word
then you see that the super speed of that type
when you start analyzing
all phenomena of Reality
at very high speed
then it is clear that you are falling into that structure
that you are in the sphere of God's Action then
i.e. you are actually there all the time
is generally close in logic
to the structure of, as it were, generalized events
where is the structure of the past it is very clear
interacts
with the structure of current and even future events

i.e. you see where the past is
interacts more with the future even

then it turns out that you highlight
fraction of current time
and in its pure form, i.e. how God created you

this arises
from a simple level comes a high-speed element of self-observation
well, that is, sometimes they show films
that there are some fast movements happening around the person, yes
such movements on the street
This technique is sometimes used

and if you consider it from this point of view
that not only does a person stand still, but everything moves
and you can watch it yes
then you can observe any phenomenon
around a person
for example there around you

then it turns out that you then naturally see
how did god even create you
and how He has arranged it for you
access system to it or control system

arrange the control system in front of you, for example?
and where is this system in the form of a sphere
of some kind of digital rows
or in the form of simply a Spiritual action of self-knowledge
well at the moment

i.e. at some point there may be a Spiritual action
at some point it may be possible to apply
let's assume there is a digital system
i.e. you begin to understand
from the point of view of these shelves laid out in front of you
where in what place is the level of tasks and task execution

i.e. before you is a mechanism for understanding God
it becomes very simple
it is enough just to single out you created by God
but this element really simplifies such an action
allocation of one's own personality
in the structure of God's tasks

and it turns out that you are always there
beyond, for example, some time positions
i.e. you begin to feel personality and see personality
in that action
that you are not dependent on events
do not depend on circumstances

and when, for example, you come to this understanding

it turns out that some circumstances
can develop for example

well in the direction that can be like this
that you in advance and for a very long time
because there is no time aspect in this state
you can quite possibly direct the line of events this way
that this event will be brought up to the level of the Norm

then it turns out that any action is always achievable
because the thread of time here has an infinite value
regardless of the length of this thread
you are out of time in this situation

and thus being physiologically
out of time
i.e., actually accepting the state of Infinite action
as God does
you can regulate events very easily
because it is a signal of some event
comes as if from Infinite time

so then you don't even need to use it
structure of event decoding
you don't need to look
what an event
you are enough at the level of Spirit
as a rule, this is the action of the heart
it is the heart that perceives
but there is a very specific point here
the heart perceives a signal as if it is being pushed out
and not the other way around

here you see with Consciousness or optical level
i.e. it can be traced even at external control
it's as if a signal is coming
but in reality it feels like you're pushing out

and it turns out that you begin to feel
an inseparable connection
your body for example Yes
with the structure of any action in principle
but generally speaking, the target action
and the exact connection

this is where the peculiarity of management lies
the connection is absolutely accurate

because just as God gave you the way
always turn to him
in the same way, any action is always connected

in general, the connection here is this
that this action is connected exactly
but also moreover technologically

i.e. any action or event itself
has the aspect of a creative solution
towards you

just as God gave you the opportunity
always develop creatively
in relation to God
according to His tasks and Eternal development
the event also has such freedom of action
i.e. the event acquires, as it were, the features of rationality
any
and it's always easier to work with a reasonable level

and then you get this level of management
you begin to introduce the structure of interaction
i.e. you actually form the interaction
by preliminary study of the action
like in this seminar

and you can take it right now and understand
all actions by management level
easy to understand
understanding already gives control

but understanding is also an action
you don't have to understand anything for a long time to do this
enter the action of the concept of understanding
and that's enough

and when you start for example
let's assume we're already analyzing
how do you unfold the entire external structure of the World
in relation to oneself
then it becomes clear here
that your Soul forms the body
where exactly
i.e. where is the knowledge of the Soul

and how to transfer knowledge to the resurrected one
so that he, for example , would come to the meeting ^{there faster}
or even resurrect

it turns out it 's not a problem
because in this transcription
biological death does not exist in principle
you can output the control line structure
for the structure of death

i.e. this allows the level of that
what do you have
Firstly, access to God is direct ^{and} precise

and secondly you see the whole connection of events
you can take and remove the structure of death
just take it and ^{somehow} output information
and by the way, it really won't be there then

and when you ^{for example} start to see
that the event develops according to the same Laws
towards you
any event becomes clear to you
i.e. any phenomenon of the World then becomes understandable
because it is clear that God has given you a way
and you know him

at the level of the Spirit, you generally know it
for you it is a very simple quantity
i.e. everything is clear to you
it's like walking on a known road
and ^{as if} not to think about anything logically

when you are in exactly this state
^{as if} a control action
outside the context of time ^{so to speak} Yes
and even outside the context of the action ^{in general}
because that's where God created you
there is a more general understanding of the World in general

and when you ^{for example} start to see
that the event is developing in the same way
it becomes clear to you at all
what to expect from this event
i.e. the event cannot be unknown to you

and when you start to develop this value further
then it turns out that since it

firstly, it has the properties of a certain well as if directions
towards a more favorable development , perhaps
exactly you

i.e. you can increase the levels of , so to speak, control
level of a kind of so to speak rationality and events
It's easier to get in touch, know the Laws of Development
then it turns out that management
it's still just your internal state

i.e. firstly
such an event is easier to deal with and easier to manage
it is enough just to activate it
your own state in this way
so that the event is under control and necessary for you

i.e. what is needed and exactly what you need
because in this case you
act as an event organizer

another question is that there are other aspects, so to speak
maybe someone else needs the event
but then you need it
you are in the system of universal connections

and it turns out that it means when everyone wants creative events
It turns out that in principle it is a coincidence, yes
level of development in the collective Consciousness
and the event is formed

i.e. here, according to logic, one can follow
why this or that event is formed

and when the question is raised, for example, about the allocation of a fraction
well, like an unfavorable system of developments
then it turns out that there actually exists there
for example, there is a resistance level there, yes
organizing a positive event

there is a level, let's assume as if some external organization
where there is a lack of knowledge about event organization
and in principle there are, as it were, earlier ones
tasks of personality
Souls of man
earlier tasks of the actual society

i.e. it can be seen very easily
generally speaking, fundamental principled connections
forming some specific event

Well For example there is some country's territory there
and there are some peculiar rules there
but the territory was formed by earlier ones
development systems

and it turns out that you can see here
very simple aspect of management
that in order for this seemingly large and global system
shift any event in general

towards, for example, Eternal Life or Macrosalvation
then generally speaking it is quite possible, and possible
you just need to work on those parts
which, generally speaking, are needed to regulate events

i.e. if there is a tighter connection
well with the country for example there
then you just need to enter the structure of the past
where can I unscrew it there
from can be a very long time
past development of this country
some aspect
just leave it there or shorten it
or maybe just lift it up
from the layer of the past

here is a very simple method
there is a task, well, like a kind of cord connecting events
Often it is enough to just move it a little
and that's all
and the event begins to disintegrate
i.e. either shorten it there by an effort of will and Consciousness

then it turns out that the event is already completely under your control
you don't need to do anything there in this country, for example
some additional excessive actions there
you can completely stop a global catastrophe there
It's only worth considering the layer of the past
as it is from God's point of view
i.e. from the point of view of Eternal development

here it exists

one fundamental aspect of today's seminar
that from the point of view of Eternal development
the past has a very large magnitude
because Eternal development into the future
on logic
says that the past, generally speaking, is then Infinite

and so, based on this
the ability to give meaning to the past
namely the Infinite quantity
from the point of view of even final events
this is the allocation of the Action of God

technologically it is very easy to understand
there is the same country or some phenomenon of Reality
and that means you enter into the structure of past events
this structure is probably local for you
there is some kind of optical level

but give it Infinite magnitude

i.e. if it is, for example, some layer , yes
then let it be very big
as soon as it gets very big
then there is always a place for you

and it turns out that you almost always
at the level of your Consciousness
you can easily make such control
that from this place to any other one to be controlled

because when there is a lot of space
and considering that it is a very large value
always connected to any other
as if on a simple mechanical level

i.e. it's like some kind of big , so to speak, clearing
or there is a large array
this is exactly the kind of array that you can always walk through
and look at both the time system and the event system

at the same time, the time and event system
they are mixed

here is the last one, according to the characteristics, or something like that yes
composition
here on Perception
if we talk about that

that Perception can be arranged in such a way
what can be differentiated here
where you are simply by Perception
in the past ^{there} or in the future
you don't have to aim for that
it is enough to study the properties of the environment

it turns out that for this moment
the past has precisely the properties
where event and time are mixed up
well, from the point of view of elementary systems of Perception

and at the same time if ^{well there} to speak ^{there}
with some physical accent or shade
it's more ^{like} an anisotropic medium
and ^{as if}
for Perception
it's very well ^{palpated} , yes
i.e. it is the past that is easier to take to the management level
Well ^{as if} with the fingers of a hand ^{yes}

why did god create man in this form
what is it for, for ^{example} Yes
this is exactly how fingers are arranged

and because if you want to work
with the structure of the past
then you can very clearly see why it is so
i.e. each finger shape
This is a management tool among other things

and let's just ^{assume} that we can get out of here
into the task structure i.e. Macro rescues
then it turns out that the task is quite specific ^{in general}
Well , first of all, she is still frequent
for people even who are not involved in management
or they don't know what it ^{is} yet
that this ^{kind of} requires special technologies

but ^{in general} the task is still local
because then any task
formulated by man in the Macrostructure
This is ^{generally} a local task

for example the task Save everyone
this is such a small amount of information in general

in this position

and then it turns out
that a huge amount of information from the past
including, and there is already a future there
because here the system starts to mix
as soon as he starts working with them, act

it turns out it was enough for God
just increase the volume of the external world
and all systems begin to sort of unfold on their own
because that's who He is

and therefore the human body for example
allows you to do the same control

then you start to see
what is the task of Macrosalvation
and even more so, generally speaking, your local task
although in Perception
it can be generally speaking the same size
in optics yes
sometimes we even assume more
for you are alive and the world is saved

and here it turns out that the task of life
the task of Eternal development
this is God's task
aimed at the personality of each

i.e. God gave tasks that could be accomplished
It's very easy to see here
just when you start to consider
from the point of view of the organization of your personality by God

so when do you start to see it
then it is clear if they are feasible
especially since they are so small and local
It seems like there are no special problems, you live peacefully

and here the element of understanding arises
why is this so -called, let's say, quiet life
where do you do some household chores
this is a level that although it is completely natural
It is clear to everyone that this is a normal, ordinary thing
the standard of living of any person
but there is a colossal system of management going on there

i.e. here it turns out
that everyone can save from macro-destruction
everyone can get cured ^{there}
basically any disease results from it
if he knows the technology ^{there} or, generally speaking, if he wants to at least

this means that he can , generally speaking, regulate any event
It only takes him his own personality
^{how to} translate in your Perception
to the level of God's Perception
i.e. how God sees him
in its own level of creation
namely the creation of God Himself

and then it turns out that you are technologically
you can very well act this way
that ^{suppose} the time interval ^{is yes}
fixed at some time
he can be Infinite to solve any issue

i.e. you have a few minutes seconds ^{there}
or maybe you just need some time
^{let's assume} there are milliseconds ^{yes}
to solve some issue
then the time interval can be Infinite
i.e. within this interval you can always solve the problem

here moreover considering that you
in this management position
see your level of creation all the time
and you will not just see how God created you, ^{but}
how do you create tasks that are feasible

and you personally take a completely free part
in all these processes

you still see how
in general, every issue should be resolved with absolute precision
at the level
Spirit
Souls
Consciousness
generally speaking the whole structure of your personality

i.e. you receive the same information at the same time
in this technology

and this is ^{generally speaking} **colossally important**
because when you have ^{like}
this is how intense the information turns out to be
where are all the information systems
they are practically compressed
into your personal volitional impulse

then it turns out that an element of personal will is formed
when you can practically control any action
simply by force of will
but at the same time knowing all the processes
it's not just this volitional control
and management with full knowledge
all the processes around you
and this is already very accurate

i.e. then it turns out that you can always say for sure
^{for example,} some very unfavorable conditions will arise
you can say that you have
very strong backup control level

you can actually say
that you can solve any management problem
including ^{for example} there is a resurrection
Salvation from global destruction
because you know the technological tricks
from the point of view of this technology

and then it turns out that when you can say something like that
at least in the action element

when you see yourself doing it
at this moment you can say it
to prove the same thing there
through ^{for example} there a million years of Eternal development
this will already be a criterion of only these millions of years, ^{for example} Yes

but the next second
this task ^{as if} again turns out to be actually proof ^{yes}
that this phenomenon must be realized
namely Eternal development

so God gave to everyone
namely the structure of the Eternal Infinite Soul
where the Soul forms all connections
for the formation of, ^{for example,} a structure
past

current
future tense
and at the same time the Soul from the point of view of human Perception
this is more so
its future development in action

i.e. the Soul always achieves its realization
and so that the same thing happens with the body
or there with the development of the Spirit
It is enough to simply consider everything by analogy with that
as God and man do
how then does the work of the Spirit proceed
how does the body work then

and you get your own analysis
leads to its own level of management
and you can then say quite clearly and distinctly
that you can develop independently
all systems yes actions
Spirit
Soul
Consciousness
body
in general all personality structures

and at the same time interact with them in such a way
that they can develop together

i.e. your personality is enough to achieve Eternal development

This concludes today's seminar.

Thank you very much for your attention
