

GRIGORY GRABOVOY
The Teaching about God
Private management
via the General Information Area
28.01.2005

The topic of my seminar today
this is my Teaching about God
Private management via the General Information Area

in this topic i show
how to implement specific management
through any universal Common Area

i.e. in this case
one of the elements of the Common Area
may be, for example, an information area
where the system of Salvation of all has already been implemented

i.e. it is meant
remote forecasting system
which is projected
to some nearby sphere, for example yes
specifically, it is located right here
where I physically show with my hand
this sphere

and the projection of the Infinite Region
to the level of generalization
it is always a specific area

what is there in life in general
level of some really allocated objects
this is a certain phase in the collective Consciousness
i.e. some generalizations of the system

for example if we consider
molecular level known there from physics
then here we can clearly highlight
what is it generally speaking
the structure of generalization of a particular system
there is a core for example
some movements of protons, electrons, etc.

and if we look at the Macro level

Well there is an analogy there in the movement of the planets
then we can highlight
in what phase of generalization
each specific cell is located

i.e. how a person is structured
from the point of view of projection Infinitely distant systems
where the elements of action let's say so Yes
are the same as God's
as his personal control system
and the system is like a projection

i.e. the only difference with God is that
what is external projection system
this is the same thing that He initially, as it were, translates
i.e. single-pulse
and external and internal components of management

in humans these are different systems
and so that means there would be control
the same as God does
in this system

need to
external i.e. common area
means to concentrate in this way
as if around itself around the physical body
so that the control coming from you
caused an immediate reaction
external region of the generalized region
those. projection area

i.e. Infinite lines of light
which are projected onto the table there
for some human life yes
what is in front of a person

for example, right now there in this case
you can see what is being projected onto the table
what kind of external optical control system
follow up
which system gets control first
i.e. what exactly is in the material world
corresponds to the primary system

For example there is the continent of Australia, some kind of coastline, etc. yes

i.e. why exactly this system

you can see the thought form

who needs the maximum phase of Salvation
and it is translated there to a specific person
this is management

i.e. the transfer of information is connected with the fact
that we have first of all a task
which stands before us

just like God, God always has a task
He does it yes

For example there according to the Eternal development of humanity

that's why it turns out
that here is precisely a single-pulse system
this is a formulation that is practically instantaneous
tasks

as if in an area where the task does not yet exist

i.e. the ability to formulate the problem in this way
so that it is definitely resolved yes
positive task for Macrosalvation for example
or is there a private task?

and the ability to do so
so that it would be like a non-existent phase of the task
was formulated in two impulses
i.e. and from you
and at the same time was favorable
for the entire projection outer area

i.e. a certain harmonization that is embedded in that
that you manage to get the job done
before a negative level of result is possible

and when you for example this system
you're starting well how to visualize understand yes
To master spiritually
see how it develops
it turns out that you can express it very clearly
Well, let's say this thought
that the Infinite development of man
it is still the ability to perceive, so to speak
well, including the ability to perceive
Well as if an infinite number of projective systems
some generalized areas

general information areas
where the selection is specifically the General area
this is still what it is, it is a universal environment

this is not some kind of uniform structure, for example
although it may be a specific structure
and here is an environment that allows
have the material of creating Reality

i.e. the allocation of the General area
it's all in the end
Well as if the allocation of building material of some yes
so that a person can carry out
namely to carry out management
which depends specifically on him

this is important and can be seen here
then it is clear that your personal impulse
coincides with the external system

because your management
corresponds to the fact that the General area
acquires the properties of your control already
because it is kind of abstracted
from a specific external projective plan

i.e. at some model level
we can consider that this is a three-dimensional object
if it is mapped onto a plane
basically it becomes
as if it were a universal spot and somehow

but the properties of the stain are not always defined there
what is this, what kind of object is this and what is it from the car
from some cube or something like that

i.e. it turns out that we can receive
as if universal areas are already mechanically
because the projection does not provide complete information
about all systems
some overlap each other, etc.

but it turns out like this
as if the simplest means projection option
somewhat mechanical
and it does not provide full control over the system

i.e. we need it with projectivity
do not lose all the properties of the system
then we must understand how to keep up
behind the projected part as if from the other side yes
look at the changes in the system during projection

i.e. the formal fraction of Consciousness
is taken out of the General area
and when approaching the Common Area
to some projective levels
we kind of watch her but from the other side

i.e. we are looking at the actual
on myself, in general, in essence
in the General area
I also have your information completely, yes
but we look from the level that is determined by that
that the Region is moving
into the projection area
i.e. in the area perceived by you, yes
control systems

and at the same time you look from the inside
knowing such systems
at high speed you can learn
like for example Love coming from Reality here

i.e. how does Reality reproduce Love?
just a normal system of Reality is uncertain
there is simply Reality
this is how reality is
such a concept as Love
for man or for God
how does she reproduce yes

and the configuration is visible
the geometric shape begins to become visible
i.e. when approaching yourself
from the point of view of studying the system
and moving towards it as if yes in projection
we get the integral property
and it turns out
the first level is love

i.e. research
in fact, we are engaged in

research of the process
but we get the first status, it's Love

so if we start to enter
into the structure of Generalization
then it turns out
to get a generalized image
beyond information layers
we must highlight Love in every fragment
and ultimately these forms are put together like this

knowing that it is allocated on the basis of Love
but we add it up speculatively
we add geometric systems

and if you look
that's exactly how the human body is designed
from the point of view of the Infinite development

i.e. a person practically folds the body with his Consciousness
depending on the tasks at the management level

and so that the body is whole yes
well, that is, so that there are no diseases
the body had Eternal development Eternal life
it is necessary that this addition element be like this
so that the impulse coming from a person, i.e. solving problems
coincided
with what is required firstly for the solution
and what is required
body
some kind of thing is considered to be necessary
some kind of energy for example Yes

in fact it's just for the whole
orientation of the body in the information space
and the resources that are obtained
due to the fact that you kind of control the body
in the Infinite level

some elements of your body
become Infinite at the level of information
even so, let's say it's not that there really is
of course you can enter the management
and at this moment you have Eternal development

and you still see

the body is already stretching out
into the structure of future events

and a certain element of getting used to the situation arises
i.e. you start to get used to it
and moreover, as soon as you have the primary impulse
perceived as a system of ordinary Norm
it feels like that
it's as if a person's skin is being stretched
and it sticks well as if to future events

i.e. future events are very tightly tied
on the person himself

i.e. the person himself
this is his own future yes
in the end it's understandable

private level yes person
this is his whole, as it were, multidimensional future

i.e. the only thought of a person
at the moment
or there are many thoughts
but at the moment
characterize all systems of its future development

Well, it's a bit peculiar
although a very clear level
Quite deep by the way
level of human perception
which is
precisely the level of integration
as your personality
as well as all external systems
at body level yes

Well, of course it's not a mechanical adhesion there
this feeling is like a wave environment, yes

and when we start this level
how to detail try to understand
how to get the private task then
if we consider the General Area

i.e. from which point to approach the Common Area
to get momentum on a particular task

Well for example, at the level of conventional optical lines
that's understandable
there is a certain sphere or any area
you just need to correctly reflect the control beam
we get into solving specific problems

when we work
it is through the system of Salvation of all
then the beam in any case
hits
into a particular problem

i.e. if this sphere is the Salvation of all
we always hit the mark
we don't need to aim somewhere
there is no need to waste unnecessary thoughts there
or let's say control and extra time
to find this projection point

it's enough to just say
that we are engaged in the salvation of all
but if "everyone" then yes, yourself too
First of all, we get there right away

and secondly, when "everyone"
we work non-contradictorily
and we have no resistance
impulse
i.e. we get there anyway, just faster

but really if someone doesn't need it
then in principle in fact
maybe the impulse will be blocked then
i.e. if we help someone in the wrong place, yes
at the moment

and then it will work out
it is more difficult or even impossible
if you miss even one person

in essence, by and large
if at least one person is not helped
It is precisely from the point of view of Macrosalvation that
according to the Divine meaning
the control doesn't work at all

i.e. it closes
at the level of the primary impulse and that's it
a person can just dream for example
or somehow reason that this is possible
but this will not be management

maybe somewhere in the distant future
these systems of Thinking will just work out somewhere
and the control will work
but it is important to manage now
at the moment often

and it turns out that
based on this so-called management tendency
we must identify
areas that were originally
i.e. they are always canonical and harmonious
based on the foundation of Love and universal happiness, etc.

and when we
These are exactly the kind of positive concepts that we are considering
as a remote control system
then the management that comes to you
from the Infinite System
this management is always positive

i.e. you in any case
exercise control regardless of
how do you do it yes the primary impulse is there
how is it configured there
at the primary level of management
and what does it come into contact with

those. namely the concentration
or there is the creation of external harmony, here is personal creation yes
as if far away from you
in some external area of just information
allows you to control precisely

i.e. it turns out that we see
that created for example on the basis of Love
based on the fact that Infinite Deletion
in Infinite Control Areas means
and as if created at an infinite distance from you
this phenomenon is just like what God does
like God
this management is such that you get

it means a gradual increase , as it were
power factor of control

i.e. you start to feel
what is your management
has a certain power
there in the information space
this feeling in general looks like a specific force yes

if we think about it, for example ,
how power is manifested in management
then what is power in general in reality
this is primarily a macro-creative result
and then a private decision

then here is precisely a private solution
when it coincides with the Macro level
as if it coincides as much as possible
that's when your private task
thus set
or is that how she decides
that this is the most consistent
namely the creative part of humanity
that's when the feeling of power arises

i.e. not because a person there, for example , pumped up with dumbbells
and he mentally imagines himself there as strong
and because there is a general, well, peculiar vibration
when there is interaction
at a certain level of goals yes
internal private
and General

i.e. in this case
private systems management
via the Common Area
implies that this General Area
these are simply certain collective connections of people
in terms of Macrosalvation

i.e. we can clearly see here
how does a person even
perceives the Macrosalvation system

what does this phenomenon mean to him in general
what does he generally consider, for example, a generalization of some kind, yes
again from the point of view of Macrosalvation

what he thinks
what is the General area well in a particular case
not related to Macrosalvation for example
then in this case it is not related to Macrosalvation
in principle it can be anything for any person

i.e. each image is individual
the primary thought is individual
so as it often happens, few people are interested in it
and is not an effective management tool.
until the area is saturated
it is precisely the level of Macrosalvation

and moreover if this level is not inserted
the area may again be only speculative
and not the manager

and when
but when we are already saturated with Macrosalvation
we see the tasks of all people in general
any person at the same time

and the problems are often very convex
often see one task enough
to understand what in general in principle
what is happening in this world now
what is the essence of the current state of the world
all over the world
i.e. General
well, in the particular case of the Earth, for example

i.e. we have
such a fairly effective system of knowledge
Moreover, it is a diagnostic system
and control at the same time

because as such in management
just diagnostics of such a phenomenon
in general, by and large, no
there is only the action of many systems

and the one who is oriented
to a positive management system
then just his glance is enough for the system to change

i.e. we do not record

some kind of negative diagnostic products then
i.e. as a result of diagnostics we should not record
negative element
we must receive in management
the element we need right away is better right away

i.e. then it turns out
that we made the management i.e. wanted
then well conducted an impulse there and checked it
got the result right away

then it's easier
firstly, the result is obtained faster
you can do the following
and not waste time on any additional analysis
Well, you got results and that's it

so that's what God does
that He actually condenses the result
it means to such an extent that it remains
For example there the space actually looks like this
as a space of positive result

there is no action there
there is not even that often there
how was the result obtained?
there is simply a result space

there is knowledge that this result is positive
and the result is quite strong, so to speak
well at least if it is highlighted
as a result of activity
this is already good, this says a lot
a person gains stability

for the simple reason
that he remembers that the result was good
so in principle we can act calmly

i.e. the ability to record and understand and see
positive result
this is for real
very powerful level of further control
i.e. some stability and some float or island
on which control is exercised
stably constantly
even if you are busy with something you don't manage there

or you don't have any Well, let's say time

or maybe there is some kind of complicated situation, yes
is happening
which should somehow cause some kind of reaction in you
there may be some concern there
Well, in one word
such a specific restless reaction

but nevertheless if you know
what exactly is the performance base
is based
on certain powerful systems of this type
then anxiety usually moves away
in a person
and he feels quite calm
having only the concept of "result" as such

i.e. the result has the property
that there is some positive information
what difference does it make what is preliminary
before this positive information there was yes let's say
what is it made of
i.e. what is the basis
what were you striving for

and here we get the following
that the result is a means of unifying information
when information ceases to acquire
individual properties

i.e. the more results we get
the more unified the information becomes
around the result

logically true
the more phenomena of Reality
in the form of the result we need we get
the more it arises
are some areas of intersection there
mixing means different areas of information
and we get
an increasingly unified area

so if many events of the World are mixed up
we are already receiving closer information from God
what is meant is precisely creative events

aimed at knowing God
to the realization of His knowledge
precisely according to Eternal development

then it turns out that in this case we
have a very simple understanding then, so to speak
why does civilization develop anyway
into the structure of an increasing number of phenomena

and because then it arises
more intersection systems
and a more unified area as such
as if it stands out from the system of the World, yes

Well, that's how it turns out. The world is like a matrix.
which concentrates the number of events
increases highlights information
which is already allocated in space
as a universal system
around which life arises

it's basically almost like space
Well, it looks like information, yes, it seems so
but in reality it has the properties of space

so if in the treatment of a person
it's easy to get it out
into this control space
there can often be instant cures
even with very serious pathologies
as if even the so-called incurable ones, etc.

because that's where it's concentrated
system of unified i.e. generalized action
not because she's very well as if significantly there
again due to some so-called power characteristics

and simply because in this system
the following events have not yet been fully determined
for example, healing, on the soil
and the person is cured there

i.e. a certain one arises
the germ of events and the following

and when you see
that this system is functioning

For example there near the Earth
in a certain geometric space

for example, if you look at the moon there, yes
that's from the point of view of the laws of attraction
Well, actually it's clear
that certain laws of attraction work yes
so-called physical, etc.

but a deeper meaning
it is still some kind of external accumulation of information, yes
i.e. a dense system
distributed in exactly this way

collective management factions
collective Consciousness is so focused
what results in such a configuration
like the Earth and some satellite like the Moon, for example

so this is the level of transition
into outer space
this is the construction of external space
as if a collective form of Reality
which is located on Earth

and that's why it turns out here
that the very concept of "vacuum" as such
then you don't have to watch
at this very level of management

i.e. the entire external environment
it is a waste product yes
as if so to speak, a certain level of Reality
For example there are people, plants, animals
as if some kind of system is precisely factual
which reproduces the external environment

i.e. we can trace
how from a specific person yes
such a system comes out
what about air, i.e. oxygen, for example, vacuum, etc.

i.e. we can make an inseparable connection
in this control system
with any information object
where control is not lost, like this
in physical space

i.e. for us, vacuum is also a certain environment
which can be unified
and is derived as simply a large Infinite region
but you can do it through it too
private management

and if private management
For example there is oxygen in a vacuum
then we can get oxygen
if we take the whole area well as if we were entering
into the system of your Perception
and already through this area
we get a private system as if visible
well, let's assume in the form of oxygen

it turns out that it is precisely understanding
i.e. introduction to the sphere of Thinking yes
as much information as possible
allows you to make a material system

so how to get oxygen
or improve, for example, the oxygen in the room
I need as much information as possible
there collect hectares of 50 yes
for example, its volume is so big, take it as 3 kilometers high
and just compress for example
oxygen will increase really

you can even do it there
when it is needed for premises

or let's say you need to do
restoration of the physical body of a person
Well, I just mean recovery, for example.

then it turns out that you need to capture
as distant as possible, well, more distant system
such convex i.e. generalized realities
and try to get them
not to mention compressing
and go through them
with well as if by elements of their Consciousness
in order to obtain compression information

you don't have to touch them yourself
but at least get it

what will happen when compressed
or start compressing somehow
then it turns out that we get
control of your own body yes
due to the Infinite Regions

but when we get
managing your own body or health
due to the Infinite regions
then this is the control
constantly teaches a person to live forever

because its impulse passes for example
through Infinite systems external
and it turns out that these Infinite systems
they are directed in this way
that he gets some local action

i.e. if you think about it by analogy with that
here is a planet
there is a spread of Reality
to the outside world yes
construction of Reality

that for a person
what does it look like then
here at the level of approximate control systems

i.e. why does a person make some movement with his hand there
he thought of something there , yes
Well, I thought it was his kind of internal intimate level
which may not need any attention at all
if he is not aggressive this level

i.e. as a rule
it makes sense to pay attention
only on thoughts that are possibly aggressive

as if some other thoughts
if they are useful maybe it is possible
but on the other hand it is there
the only benefit can be in that
precisely "useful"
from the point of view of the development of civilization
Saving civilization
no other criteria
telepathic interaction as it were

doesn't actually exist

and in general it's really impossible there
look over some idea
which a person protects

Well, in a creative sense, *yes*

i.e. the person is not aggressive
and he's thinking about something
then this is his personal Thinking
not a single real person
Generally speaking, it is impossible to view a thought
if he wants *yes*

until one himself allows the other
who thinks through some situation
but if she is at least minimally aggressive in something
it immediately starts to glow
and this is basically starting to be visible to everyone

i.e. it turns out that there is still a control phase
that through the Generalized Region
which is fixed
in some heterogeneous private area
you can find the problem

For example there is a search for systems in case of possible terrorist attacks

it means just concentrating light on everything
and this is where it starts to differ

i.e. it is compressed, which means there might be something there

Well, it doesn't necessarily have to be a terrorist attack, there could be a crack
in the building, etc.

and this is a very powerful diagnostic system
due to the fact that it is highlighted
as many parameters as possible
external control level
and due to this we get
really accurate diagnostics

but that's how it is
all external areas
this is also a reflection of some earlier ones
there are real areas

and the outer area it can contain
all information about the Real area

but this will only be one position

after all, God gave it this way
that any information is universal
i.e. it carries some one status
and a change of point of view can change the status
Well of course not radically often
at least there as if according to the level of current concepts there, yes

and it turns out that if we start
this is the management that needs to be done after all
i.e. we start doing management
which comes from the Infinite level like this
that the contact of this management
as if it creates a unified environment

I've already gone further, I said
that we don't necessarily have to
constantly monitor static areas
use them for private management
you can just control it yourself
make it a Generalized Control System

and then each element
goes through generalization
and becomes the one we need, generally speaking
before the start of management

i.e. as soon as we translate
this system into a personal characteristic
i.e. in the state of the Spirit yes
into action of the Soul

not that we translate
the action of the Soul can be just like that
that it is this action of the Soul
just kind of perceives
external management
which happens for example well, to solve problems

and then we have integration
Spirit
Souls
Consciousness
bodies
and with all this we can very quickly
solve all the current problems of a person there yes

if a person is even for example located
outside the control zone i.e. he has
he doesn't know there or he doesn't study some material
but he needs help

then we have to integrate
your personality
with the outside world in this way
so that your information is higher and more in volume
to get control well as if by that person
or give Salvation to that person
which for example there at the moment
does not pay attention to this system
or he doesn't want to or can't for a number of reasons, etc.

then it turns out that we should be able to
so concentrate the management
so that help can be obtained in any case
Well as if unconditional control of events
as God does
He doesn't necessarily beg there . or always
or says that it should be done exactly this way
some steps
He often just configures Reality and that's it.

and this is the level of configuration
this is a very important point in today's lecture
like a small hinge
a small sphere actually
it is closer to a sphere, and to an ideal one
which means that it moves like some element
around which there is a lot
large arrays of information
so let's say arrays of influence yes

why does god always exist
the ability to interfere with the system
and quickly modify it

because these are the hinges
these little balls that are in the form of spheres
are the connecting links yes
between the elements of Reality
they are very manageable
move them, as it were
even up and down in geometry
and receive comparable management

only due to the movement of these systems

and because we understand
what are articulated i.e. flexible systems
have any configuration
i.e. they are actually at the information level
so this system can take this form
that the shape can be any

i.e. I showed
that these powerful information systems
are on those hinges
which allow this system
give any shape

and therefore
what is form
this is already a decision

i.e. formally when we start working
under private management
by highlighting the General Information Area
it turns out that here we are essentially highlighting
control form
which as it turned out is here
highlight exactly highlight precisely
much easier
because you can kind of trace it
how this form works over time

and when you start for example
we will assume that we will do this management ourselves
setting the goal of Eternal development

then you can see
does it mean next to each element let's say Eternal development
there is some parallel
reserve layer of information

and here's to determine
Well, this is just a Generalized Area
and private area
simultaneously

a certain layer that seems to stick
the structure is very close
from the information of the Eternal development of man

or some level of Reality

and this is some kind of sticking
when we start walking on it
as a system of recognition and Eternal life
there is a nuance here
that's why for example right away yes
can't enter root control system
and transfer it to yourself

because there are people who haven't learned
therefore there is a region of sorts of adhesion
i.e. the area of the incomplete level of information essentially means

but this level already contributes
and is really the Eternal Life of man
if a person continues to defend
the structure of precisely the Eternal development
i.e. well, some canonical systems
specifically of a Macro-creative nature, so to speak

if he doesn't advocate it there in principle
then it turns out that he doesn't care
there is no effective system then
It's like he doesn't have clearance

so here is the Macrocontrol system
through a private task, perhaps ?
it is also a system for organizing some kind of security
there is no access to information
under this system
any external implementation is ineffective yes
unnecessary to you

because it means when there is a lot of information
there is contact of the external quantity
there are a lot of options
maybe there are a million years they need to be counted
these options
to perform some one action
but the action has already moved on

therefore, management of private tasks
via the Generalized Information Area
Another convenient thing is that you can build it
actually very well as if an absolute type of protection in fact
for a certain type

well for a certain type of task
for certain people
or there are some goals of specific situations

and at the same time we can see very clearly here
that when we start building
Generalized domain and private domain
then we see how God actually built a path for people

that's why there are roads to the temples there
do some holy roads and places exist yes
in terms of events there it is understandable

but for the event to happen
corresponded to the holy place there
then God must have laid it first
and the place is also under control
because this place is holy yes
He's like so it works out
I took a block of some information there
and invested

those. namely a generalization
i.e. Generalized area Macro area yes
where Macrosave is an element of this information
allows you to sort of mix
or have one time for action
between current and future events

that's why we can say for sure
negative stories won't be repeated there
that were in the history of civilization

because you can take it
How to teach a generalized area
this is like a self-reaction of self-regeneration
and the area starts working
precisely in the plan of Eternal development
but as if on my own

i.e. transition
between the General and the Particular Domain
this is still quite a big training

so how can one understand for example
what is the private area there yes

what does she look like
and what functions does it carry

this can be done on some plane
on some field of information

For example there is a Macro Generalized Area
some physical surface

i.e. we get a generalization
it is also a level of analysis
level of bringing the execution into action

this means some kind of execution of some task
was in action
we need space to operate
this means that we still need a generalized system

we need to be able to
from a private task from its private task
get Generalized System
and get control from there

for example, if you ask yourself this question now
and it is possible to do this
for example, make a health management yes
in relation to yourself and others
then it will look like this after all
at first
external level of contact with all Reality
and then the transition to a particular task anyway, yes
to any

Well, if a person, for example there is healthy
then what is its health level
he just heals others
for him it then becomes a health level
as if for him too

because God has
healing of any person
this is good for God
yes, in the control logic

and based on this
it turns out that a person can still do something
with your self-healing

just for this well he must
if he is absolutely healthy there
just omit some control flows
for all people
but at the same time, as if still participating in the General process

let him be healthy
but he should do like everyone else, for example Yes
he must involve management
must implement it

so when we look at the mechanism already
namely the actions on a person
so when a person well as if Well, he does
some kind of control
thinks that he can do it , for example
well some kind of macro control systems in this way
that it's already getting easier for him there
it goes into deeper control systems

so it's precisely the ability to do like everyone else
often becomes the main task

i.e. it is often not difficult to take control there
what for example that's where the influence comes from
on Macroprocesses

but influence on Macroprocesses
it still exists up to that level
when after all every person can do it
if at least one can't
all the same, control is not complete

so that it happens completely
we must always give knowledge to everyone
means to delegate a private task
in Macro Macro manifested structure so to speak

and it turns out that this is exactly it
so the position is peculiar and management
when we have
manifestation precisely in the Macrostructure
shows that it is necessary to build a crossing
Well as if even geometrically
but that's not what we're talking about now

the thing is that when we do
for example the Macro Rescue system
we must perceive the sensory level
it is precisely this kind of universal matrix environment
through which any control is done

so that's when we start to consider
this level
he falls into normal human form
i.e. there is love there For example there is devotion, loyalty, etc.

i.e. some positive systems arise there
if you can say so
for example, in relation to the entire spectrum
what we consider positive

Love is clear there Means
Well there is devotion to whom, devotion, loyalty, etc.
i.e. these are also specific concepts
which are imposed precisely by the level of positivism

i.e. positivism is your personal understanding
that devotion for example is good yes or loyalty
that means and exactly to whom

i.e. we begin to turn to the individual
but the first Person is God
when we address "to whom"
then God always hears us yes

so we always turn to
through the Macrosystem, in fact, i.e. through God
if we turn to anyone at all
from people

and that's when we start
to appeal through God to all
then there is a path that exists in general
without any logical or verbal knowledge

when a person addresses everyone
he must go precisely the path to God
in relation to God yes indeed to God
exactly
the more precise it is, the more it will appeal to everyone

it means that the control technology

was accurate for all people actually
we need to make sure that the appeal goes through
precisely to God
then many people will get the result
or for example all

i.e. so that everyone would be saved
It is necessary that the appeal for Salvation
to God
contained Himself
in terms of the human level

that's the guarantee
that the World will not be destroyed
because God is a man
in this case, such a conclusion can be made

and then the appeal
as if precisely through the structure of Himself
God who is a man
allows very hard
strengthen the structure of Reality
virtually forever

i.e. to close all systems of Infinite development
and get a very simple result
what's there through the private area
you can get a large Infinite
through the Infinite or there is a huge
there is a private or point

or you can make control at all
that the area itself is not visible, it is as if it does not even exist

but the factor of non-existence
implies the presence of
even smaller sizes as a rule yes
some size
which corresponds to the given space
it is enough to just consider some other properties

i.e. if they are exhausted
some properties of the system
then other properties simply fill it

but in this case we are already talking
not about some kind of material movement of information

and we talk about the fact that it is enough for us
change properties
or perceive the properties differently

for example, to resurrect everyone
you just need the properties of the mind
on the adoption of this system
bring to a higher level of activity
and that's all

then it turns out that there is a general resurrection
because there is a system of mutual adaptations

because even the most elementary things are there
some kind of queue at the store
if even one person is unhappy with something there is already tension
not to mention that there are a lot of people yes

and that's when we talk about that
what does it mean well, the same option
the same resurrected
which must all be resurrected at once
except for those who have already managed to resurrect faster
or be resurrected

here it turns out that it doesn't matter
a very important element
is precisely an element of that
that this is precisely the private access system
to a person means yes to myself
this is a system of, as it were, internal knowledge of God

i.e. man knows God
precisely by the Soul
Infinite system

and when we collide
with such a well as if by a process
then it turns out that this is what the system of knowledge is
when a person has answers in the Soul
and for example there God knows his own Soul

He Himself created his Soul
how does He even know each neighboring element
in general, what is then the basis of His Perception

so that's human perception

this is also the basis of the Perception of God
one of the foundations

and when He

Well, he can perceive there.

how the tree perceives, etc., etc.

Well, he can perceive the entire system.

but from a human point of view

God can perceive Salvation

and Mira initially

hence the Salvation of the World

this is the Perception of God

information Perception of God

i.e. direct contact with God

if a person perceives another person

they are standing next to each other

so there is direct contact

Means Well, it's logically clear

what is saving the world

there had to be contact with God somewhere

or at the initial level

but the information of the World Salvation

this is contact with God

so when you come in here

into this control system

you get the following

that there is a personal factor

which allows you to change the control methods

and ways of considering information

and there are basically an infinite number of ways

you can take it and count it there

to cure some serious illness there

consider a certain angle of entry into information

there it's different on one corner

it means it can be cured there

a hundred or a million diseases, and any of them

i.e. information changes very quickly

depending on the angle of entry

How it works in the World
even outer space is a vacuum
depending on the satellite's entry angle
example, on the territory of the planet Earth
fundamental things are already happening here
just a little bit of a slight deviation
and there may be a completely different picture

same here
Login to management
i.e., in fact, as a different point of view
another contact with that information
which is generally controllable

i.e. you through management
do such an action
what does it mean the more you manage
the more control the next segment has
i.e. accumulation yes

here is another method of management
on today's topic
management through the Common Area is actually

that you just concentrate on everything
in each subsequent iteration
such management
when you have well as if increasing the volume of information

i.e. you
do not disclose the volume even in an implicit form
just keep an eye on him
you track it, you increase it
and the mass of your control increases from that
that you are simply there

i.e. the more you are present
in one place
the more your control is strengthened, yes
at the information level of course
or even physically by the way

and it turns out that when we look at
model in relation to God
that's right, yes
that the long-term status of Macro-creation tasks
increases the presence of God

even in ideological status

and here to increase the element of presence

Well there We will say for the cause of Salvation
and in the matter of Salvation it often happens like this
that we are obliged to save in any case
we have no choice, no alternative, no other

and then it turns out that here
outer seal area

as if well, external mass of information
must be that big
to have a private event
it was determined
precisely by a large number
namely external factors yes

and it turns out that based on this
we can make a simple conclusion
that here is the transfer of information from the Macroregion
towards your private tasks
it definitely happens
only on a human level

because to cover
such a quantity of information
some primitive models
projections, reflections, etc. are practically impossible there

i.e. external information
should be distributed
only at the level
Human
Human
yes contact system

so when we look
to the Infinite Information System
in fact, there is just one person there

this point of view is very simple
and allows you to manage
huge masses of information
just finding one person for everything
For example there on the shores of Australia then
who just needs help

and from the point of view of assistance
you exactly mean you define it
Well, for reasons known to you, for example
there are no reasons to have any generally speaking

because the criterion of life
well it should be like this there is health
and in general a person should always have life

therefore you can simply
to normalize the world for no reason at all
know that the reason is that
that everyone should be healthy

i.e. every person should have practically
well let's say the opportunity to live forever
and you're just helping him
because you decided so

God also decides like that, for example
and gives Eternal life for example Yes
or gives there health gives technology

and it turns out that based on this
you are getting closer to that
what is your decision
may actually coincide with that
how does god make a decision
in this control structure

but if so then you
in any case you achieve control

and so here it is
squeezing
Generalized area
V
private task
you always achieve control
because it matches
level of information of your decision
and this exactly corresponds to that
how does God make decisions in general

so in principle
along the primary dynamic line, as it were
or something of the primary level of dynamics

i.e. what can be seen visually on optics, *yes*
you can tell right away
that you will definitely achieve control
i.e. you don't even have to watch distant events

because if this information coincides
it is clear that you are achieving control

Well, control over a remote event will be clear
when such a Region exists
means distant events
they are definitely good
because God is for Himself
always determines the positive status of Eternal development
and you just do the same thing by analogy
and that's all

This is where I end today's seminar.

Thank you very much for your attention
