

GRIGORY GRABOVOY
The Teaching about God
Profiling health improvement
29.07.2005

And I would like to start today's seminar with this
what when i do management
at the time of the seminar
try to set your own personal goals
and, if possible, solve them
well, almost at the same time as everyone else

i.e. there will be more collective management
therefore, it is desirable to have tasks
how to synchronize with that
what is happening in the hall in the country in the World etc.

so that's the topic of my seminar today
this is my Teaching about God
Profiling health improvement

in this topic it is necessary to take into account that the discussion will be
about
that the management related will also go
with restoration of personality structure

because in some cases the concept of "recovery"
is connected with the fact that a person must practically collect
structure of one's own personality
in conditions if well for example external control
or there for example some kind of counter control
it was quite difficult

then a person must realize
all control systems themselves
and in fact, as if to create a personality structure
again

i.e. it turns out that
it turns out that if we, for example, are in this management
profiling health improvement
we set the task
as a healing as such

i.e. we highlight
structure of its own management in general

from tasks

let's see what problems there might be, for example there
a person personally or another person

in this case we are talking
about management in general

i.e. you can attribute the control system to yourself
you can go to any other person

that's why it turns out
what we must definitely take into account
the multifactorial nature of such management

and there may be situations in management
when a modification of information occurs
to the level of output of material aspects of management
in some kind of illogical phase yes
these are elements of materialization, etc.

just in case, you need to take it into account
that such control systems are possible

and therefore in management
for example, related to achieving results
It is important to find out the objective picture
i.e. where did the element itself come from in management
what does he look like

and mark this place
from the point of view of the control address

as well as, for example, from the point of view of God's Action
there the physical body of a person has
a very specific type and nature
and each element is connected
at the level of His management
in relation to the physical body of a person

also a person
can control external Reality and internal
very specifically highlighting
system of specific points
i.e. address control points

that's why in this topic
highlight your range of tasks

i.e. review your information

as if by internal perception

highlight the task as such

if it is not visible on the optical system

it doesn't matter

it is not necessary to see something in the form of optical systems

it's enough to know her

and when you start developing

for example Perception in optics

i.e. to perceive the optical expression of the task

then it could be an image

which you simply enter into control

it is not necessary to find it somewhere

this is where it is important in this technology

namely, profiling health improvement

we must be able to create management

no matter what happens around

because the task is prevention

it is to have a Health Standard

Norm of action

regardless of external circumstances, so to speak

that's why here in this management

choose or mentally define the task

and roughly arrange the thought

where is it located

for example, you can highlight there

depending on your system of Perception

some task

place somewhere near the physical body

in a specific place

and consider that your task is here

then we need to consider interaction further

you

or there is your task

with your personality structure

and here is the next level

this is when you need to organize the personality structure

actually starting well like again yes

as God does
He organizes his own structure.
almost instantly and always works
here at the logical control level

and here it turns out that we can
in some cases use this technology
to be able to set those tasks

which need to be resolved in any case
as feasible tasks

and in this case a person should always be
well in that situation
that he can always have his own information
how to collect

so we are talking about that
what we are in the case of, for example, the technology of self-recreation of man
from the level of suppose own information
or from the level just actions

so for example, if you think about it
how did God create Himself in the first place?

it was just Action
which organized both
and God
and Reality

i.e. it turns out that if you think about it even further
and what was before this Action
this is how God generally perceived and created Reality
which exists before the Action

then it turns out we come
to the structure of His own thinking
yes above Himself
i.e. initially you can only go with your thoughts
into the structure of the next development

i.e. God, just like man, can ask Himself a question
for example He acts in the space of Action
but what happened before the Action is also a question, generally speaking

here from God's point of view

this could also be a question
in Human Perception

and it turns out that we are looking at
this design
as a construct of existence
well, as if some kind of unchanging Reality
here is the one that always exists yes

i.e. we come to the conclusion that
what in the logical or something plan of management
such Reality always exists

somewhere

and if we start to analyze
Where
then we get an answer right away
that at the point of setting the problem
This is where we set the task for ourselves
she is there

i.e. if you think about it
in general why did it somehow turn out historically or something
in personality
that the task exists somewhere and at some point

we can, for example, from the point of view of management processes
to enter the structure of the past
analyze the existence of this task
and determine the location
where the task exists outside of time
i.e. it is always there

i.e. we come to some problem logically
at some point in time
for something

and here in the profiling department
these tasks need to be considered

i.e. you need to be able to
just like a person walking in the park for example Yes
he has a rough idea
where is which bench located
if he was there for example

and it turns out that if you develop
managing for example there Spiritual vision
then you can see the control objects
which are located
in the form of the same thought forms

the first element is contact
i.e. try to get
thought in the space of the future

elementary method
there you take the calendar
and Thinking is tuned to the number

i.e. the information is done in this way

that you just concentrate on the number
and depending on the form of Thinking
you start to figure it out
what will happen there

i.e. you take information as if from the future

and then if the information, for example, does not suit you, yes
i.e. a certain bench in the park, so to speak
requires that it be bypassed
then you start working
Well how to reconstruct events

and here is a technologically simple technique
in fact this technology
with such unique simplicity
it is quite difficult to maintain
and in attention
all processes as if of the Universe
everything that happens around this road and management
around the control path
and the ability to correctly differentiate external signals

i.e. in fact it resembles in technology that
that you look almost as if with your eyes
for the whole space

technologically it resembles action
when you introduce yourself for example
that you are looking at the outer space

and then it turns out that you perceive it
some objects of Reality
there is a starry sky, for example, if it is night
or is there just blue space or clouds

then it turns out that at the moment of Perception
there is such a thing in human consciousness
some way
he's like, well in general, not trivial
but existing in the system of human Consciousness
naturally as a certain
additional function in human consciousness

something that a person perceives with his sight
there is a certain area that it implies
that there is something there
and knows many things quite accurately

pay attention if you even come
to some unknown place and look at it
that is, points in this Perception
where it is absolutely clear
that there is something specific there
here you know what is there

although you don't see it with your eyes , for example

in this case you decide the question for yourself
what is there for example you don't need to go there
because you know

for example, how a traveler decides for himself the question
where should he go

if in Perception space
well, like some kind of task or something
he perceives space like this
that some area is known to him in his sight
then he may not go there
because he understood what it was about, yes
he must go to some next place

and here is the next place if he knows everything
he then decides for himself

God does the same

He every next place
determines independently yes

and if you think about it
how does he define this place
because He knows everything
i.e. no matter how He looks, He still knows everything
God

it turns out that He must determine His Action
based on His own, as it were, motivating motives

create this Action, as it turns out
so that it was
not the same as the existing system
something new yes
He must do the following task

and at the same time the integration of Macro-creation
should be exactly like this
so that it would be understandable to people here

in God's task the main task
this is people's understanding in reality

and when do we start
let's assume we are doing a health management
Here is an example of such a super forum
there is a quick recovery forum

then this is the level of God's Action
it is desirable to recognize
precisely in the profiling recovery

that the structure of a person's personality
primarily focused
for the permanent, eternal life of the person himself

just like God
God knows that He lives forever
and He knows the future well enough
from the point of view that He will come to this future
well, that is, a logical problem
for Him it is solved quite simply

He almost sees the connection.
between Its Action

and the fact that He is this Action
will do it anyway someday yes

and here so that there is time synchronization
God can, for example, introduce time

Well, if you think about it
and where is the concept of "time"
God Himself introduces

here from the point of view of His tasks
He just needs to enter the time at this point.

so it turns out that there is God's time
i.e. it can be allocated and control obtained
in the structure of this time
then it turns out that you are absolutely protected
from some external influence, let's assume Yes
from external action

and here there is a very powerful level of healing

that is why it is in the profiling department
where prevention of a possible problem is done

it is necessary to navigate
for a time that has a specific form

this time is more convex
it is defined by points in space
i.e. it looks like space
in Perception

and here at a certain level
where is the transition
between for example the level of Perception
when you know more than you perceive
in this case you can no longer differentiate

I don't speak here at all
about the application structure of the control vision for example
namely, that there are simply elements of Perception

and here at the level of Perception
the transition is precisely at God's time
where time carries all the information of the Universe
these are exactly these areas

beyond the level of Perception

and that's when we start this level
start finding

i.e. differentiate the level
as a structure for example of one's own development

i.e. here's how you can determine, for example
how is this time deciphered there
how are these places reached

then it turns out that you can see here
in his own personality
what is personal development
into the structure of some actions
i.e. the secession of the performance of actions
in the conditions of there word control

i.e. the word can be said there
partially
fully
have some kind of wave control systems
and yet we have one and the same essence
for example, Infinite Development

well i.e. Infinite development
if you modulate the control on the word

initial letter of a word
there is part of a word
the whole word
or a suggestion

and consider how completely stable it is
or it varies there
Infinite Development System

then you can see that in the personality structure
in the organization of the personality itself
it is the action of the Infinite sense
there ^{yes} Infinite action
has a very strong analytical system
by interaction
between
personality and future events

i.e. to find out how to navigate the information structure

and at the same time get healthy
must have
namely the action from the Infinite environment
on the person
of the information that is
information of the person himself

i.e. you need to find information
which suits you personally
i.e. the information that comes to you
she is no different
from the level well as if the first element of Perception

in fact, we are talking about
what do you get
your own action
or your own presence
in the future

and from these elements of presence you build management

here is God, He built the whole Reality
no matter how He acts
He always perceives information.
My own

and it turns out by analogy
it's all quite logically simple
here comes the simplification of management technologies
the rest is pretty simple

have for example a structure in Perception
own information
and to go, well, actually, after her, yes it turns out

here is the first element, as it were, axiomatic
that's exactly the profiling recovery
this is complete freedom of your creative actions
and the ability to obtain your own information

because in the conditions of prevention
we still have to do it
those tasks that exist
or which we put

so it turns out that we
because we cannot avoid these tasks

we are left with only one option
work in tasks correctly yes

in the structure of tasks to be able to perform them
that's actually speaking
the main task in this management

and it turns out that based on this design
we should receive
Personality characteristic of Perception

and try to analyze, i.e. observe
how God accomplishes His own purposes
following for example the structure of the tasks of all people there

well, that is, right now, specifically for working in the hall
or in the future who will watch the video recording there
you can see all people's tasks
highlight your own task
as a task that needs for example there
Well as if there could even be such a thing as fast control

because for a person often
the element of speed of control is very important
a person often cares about his own tasks
do it quickly

then it turns out that he
Firstly, he can devote more time
in terms of some subsequent tasks, etc.

i.e. here is the allocation of control speed
not because the task is difficult

and because you often have to learn to work faster
it's just that it's logical, yes

for example, a person may be calm
perhaps he had a task before
maybe it's just informational

this is what is very important in this technology
can be highlighted
just some information, maybe negative
restructure it
i.e. make a positive development plan

and moreover through information
which can be restructured
you can get into the current task plan
and, for example, having made a quick diagnosis of the body
be able to solve problems that may be even more complex

here is the selection of a certain one task
as a root or as a solution system
all existing tasks

this is the next axiom in management
according to the profile management
that through one access one impulse is needed
be able to solve all existing problems
therefore, they must be able to be found in the impulse

i.e. while you are approaching
to the point where access is provided
you should at the same time have some kind of peripheral vision
conditionally such a third vision
be able to determine
what to summarize in one piece of information
from all your tasks

i.e. you need to be able to collect information like this
Well as if from myself
or from another person
so that you can bring a ready-made solution to reality

and when docking you immediately received a Macro solution

like God does at the Macro level
At the same time, he solves private decisions.
at the moment of the creation of the World
all the private tasks have already been solved
at a certain level of free will of course

human actions

i.e. a person has the right to modify them yes For example
but for example to influence the root structure of the World
a person can apparently under certain conditions
when he understands absolutely creatively
God's tasks in Macrodevelopment
here is every element of the World

i.e. if you take some molecule there

focus on it for a sufficient amount of time
and try to understand its development
in the conditions of Macro-creation
for a few milliseconds
then you can move the whole Reality there
the weight of this molecule for example yes, one of the examples

but the thing is that God's Action is universal
and human action must also be universal

this means a person should be able to
allocate any volume
and if a person works with another person
this is a completely special control structure
this is unique where there is complete freedom of will of another person

i.e. it is easier to work with yourself
because you know for example
that you don't limit yourself to your work

then it turns out that this is the access task
in help or something let's tell the other person so
it is a task to be able to find from God's point of view
where another person connects with God
solving problems together

and try to provide assistance there
as if in the sight of God
i.e. seeing that God gives you the opportunity to help yes

i.e. it is not called ask there
Well, some kind of permission from God
to help

you always need to help
i.e. if there is an opportunity, you should always save
this is such a point of view in management

but here you just need to be able to somehow demonstrate
that you have more experience for example there
you know what question you are asking
some kind of package level there
just how you highlight information

what could you do
a person already on the way somewhere passing by takes
this information and apply it

the same can be done
with your own information
the attitude towards oneself should be exactly the same
like all other people

in relation to oneself
there are no real advantages there
as a rule, on the contrary, the rescuer himself
sometimes devotes very little time to himself

and yet in the conditions of Salvation
he should be practically healthy
he must be able to manage the situation
therefore he must care in some way
about my own niche of information

and here on the signs of equality of management
the selection of sort of universal modules yes
universal human modules in fact
where is the management itself
what is any other person there
coming to them he recognizes
positive level of management
and accepts

it turns out that this is where it is located
this problem has already been solved in many respects
technologically it is the task of Macro-salvation

i.e. when all people think about the Salvation of all
they are in about the same place
in the structure of Consciousness
enter this information
and then the person goes and finds this element

another question is that for example everyone is saved there, yes
such a purely logical control option
then it turns out that
what works in this case
i.e. the elements of Macrosalvation are logically worked out

although in essence the concept is such as "Macrosalvation"
this is just a management level
i.e. not to allow some problem to happen there
first of all, so that there is no global problem

and generally speaking, in fact, it is private

by and large and the goal is always management
is the absence of problems as such
which would limit
there for example is the Eternal Life of Man

and it turns out that here the element is still access
what does this have to do with management?
is what we should get
information from the future
again from future events
which suits us according to the structure of the Universe, for example Yes
according to the structure as God made the world

and it turns out
that since God nevertheless made the World ideally Eternal
it turns out that we should be able to differentiate
with this information
what about the future well as if it is superimposed on that Reality
which is laid down as Reality
Well in general, in fact, it looks like this
which must be achieved

The eternal development of man, for example, there in the physical body

so that it is clear that this is what we are talking about
about this person and specifically about his physical body

because if we start to deviate
depending on the level of management there
and we set the task somehow differently
or talk about some philosophical aspects
then it will just be like in general well, philosophy for example
not an aspect of management

although philosophy can be like a management system
on Eternal Development

but still this is not an achievement of the goal
if we change something
Well For example there's been a million years there or there's been a certain number
of people living there
and what next yes

Eternal development implies

just the usual Eternal development
in the same physical body

this is the ability to formulate and set a task
such as she is
i.e. what we say is what we do
It is very important that in the profiling department
receive now already
even if at the beginning there may be some results over time, yes
for example, not instant if needed
in some cases it may be necessary to obtain
instant results

and it turns out that here is the ability to concentrate
precisely on this common Macro-goal
will lead to that
what next if we are talking about that
that we have solved the problems of Salvation
there are elements of Eternal development

and the elements of Eternal development
Well for example, some extreme context
which is implied in the system of Salvation as such
i.e. Salvation means that there are some problems
we need to react to them

and in the case of Eternal development
we already have it
a structure of a more harmonious nature
in Human Perception
where a person believes that he practically has a need
just develop the system there currently
a good state of affairs, for example, or a favorable one
from the point of view of the Eternal context

this is actually a special task
Eternal development is a special task
and the technology of this task is different
from the usual technology there well For example there is health there Yes
assume even

or for example, if you set a task
Infinite health to man

it turns out that yes, this is also Eternal development
On the one side
but Eternal development implies

Eternal life is the ability to work
in the structure of life and all life

i.e. it is still a different amount of information
Eternal health means
yes he lives forever favorably but as if autonomously

i.e. the more we work
with categories of Eternity
the more precisely it is seen here that Perception is such
what are verbal categories
are of great importance

and here is the selection of the verbal form
in the profile health improvement so to speak
This is an important category of management

i.e. the ability to highlight information
and translate into level
Perceptions of the verbal type
i.e. to recognize information in words

therefore , the third category of management
some kind of even axiomatic level
the postulating level is that
what is the word you receive
as a word of information recognition
should not contain extreme negatives of the future

i.e. you should receive information
it could already be there and there was no need to modify it
because more people have events
they are favorable one way or another

so it turns out that it is not necessary
and generally speaking from the point of view of Eternal development
this shouldn't happen at all
what should you get
negative information from the future

means the ability to receive
favorable sustainable information from the future
this is the main thing here, in general, as it were
even if we change the word we compress it
we can compress the word

i.e. try to use words

which may not have explicit parameters
in management

skills can be to shorten the word
Well, how do students write there, they abbreviate?

then the word has a different meaning
and we understand from this word
your control context is different, yes

i.e. the main control element
or there if we are the main control element
let's take the context as follows
what we assume is the main element
we can replace the main element there
control axis

if we change the stress "main"
then we generally use the sound principle yes
the word "os" is a kind of mantra principle

i.e. it is in the system of collective Consciousness
there are sound forms that allow
make a favorable level right away
and then recognize

for example "os" is the level of favorable action
how was the eight built, let's assume Yes

you can take the letter o
you can take it from
connect and with or there extend
Well, you can build any logical structure
and understand that we are from a local action
we get Infinite

we have a tool for example there are words
we want to convert to a number and get eight
then this "o s" transition to the eight
we are actually kind of imposing
the system of the future Eternal development

therefore the next control is already
axiomatic level
this is the ability to impose, in fact, i.e. introduce
into your management system
based on any sign

based on any abbreviation of the word
based on any Perception of primary parameters
words

if you don't like the word
you don't perceive it any further

so you start to output control there

towards a favorable expression so to speak Yes

i.e. it doesn't really look like that
as some kind of element of interaction
where words seem to just come from outside

you all, all the time, kind of enter words on your own
but enter it so that they
when docking with the Reality system
they gave some kind of correlating or something for the better
Reality
or even a corrective interaction system

i.e. the correction itself
regardless of even the words spoken
either correlating or correcting
we take and still get favorable management
because
in the Soul
and in the Spirit of man
the favorable system of Eternal development has already been laid down

i.e. we return to the Spirit
which is present there yes
in our future action

we meet our own Spiritual action
and we return to it
we see our own Spirit
which is already in effect before us

God also acts in the plan of management
He creates the next Reality by Spiritual Action

because Spiritual Reality is what is very important
with God and with man
this is precisely the Reality of Spiritual Action

here is to recognize for God
where there is material there is a system of action
and where is the informational one for example ?

He must then act Spiritually.
and see Spiritual Action
and know that this is a Spiritual Action

and the element of knowledge is obtained
He introduces as the creation of His own Spirit
widespread there in Infinity

for a person it is possible to develop the Spirit
i.e. for example the volume of Spirit in a person
for example, he is the only one there

but nevertheless develop the Spirit into the Infinite phase
receive the Infinite Action of the Spirit
because each element is Infinite
for a person this is also, in principle, elementary
he just has to look at reality
which exists as if outside the system of action
there may be some identified actions outside the system

this is what Spiritual action is
ability to act further, higher, etc.

it turns out that based on this
Now take your own tasks
just group it in a distant Reality, as it were
even further in time

by the way, the further you go
Display current tasks ahead in time
the more effectively they are solved

for example if you have some problem
and you solve it there now
consider the solution period in a week for example Yes
and in a week this problem may not exist at all
first of all it means

and secondly, it's easier to look at the situation from there
are you doing time management accurately
maybe you are doing extra work there
and it makes sense to just do other things quietly

and this situation is just information
Well, she's not that much of a problem

It happens that information simply affects a person
and either a person interacts with it
somehow
or he may simply assume that the information is like that
that you can not react to it now, for example Yes

i.e. the ability to know exactly
elements of development of any information

and here is the next fifth aspect of management
axiomatic also of the plan postulating even the plan

is that you have to recognize very clearly
information as such
what can it lead to

this is the most subtle moment in management
is connected with the fact that in fact it looks like this even
at the level of control optics
how thin are they lines
the lines begin to thin out and go somewhere further away
into the system of remote areas of Consciousness, so to speak
even Mira

and here is the intersection
remote areas of Consciousness
with the structure of the World
such that the World begins to realize very slowly
the structure of some undefined plan

it looks like this at the level of the World
information of the World of all
a certain question arises from the information side

if we consider that a person
this is also a completely Infinite level
and the outside world is also a kind of system
then from the side of this information of the World
the question begins to emerge in general
and how to define a system in general
how to build it at all

i.e. the question is addressed to the person

Well, if you think about it
how did God get information about that
what should he do

then He must have asked Himself a question somewhere
to himself
He asks himself the question

i.e. we are at the level of our own personality
we can move into the structure of what the outside world is
this is also a task for the individual

and then the information of the World is clear
why is the world like yes asks you a question
because it's still your personality in the end
you ask yourself the question, how is it better for you, as it were Yes

and that's when we start to take this control out
it is clear why then God lives forever
and has Eternal development

He knows all the connections
can always make the most favorable level for yourself
here in this Action

in this technology
By the way, this is quite a powerful technology
anticipation of any range of events

in this technology it is quite clear
what a radically negative event
one hundred percent will not happen

i.e. right here, right here on this section
so, well, the tasks are like questions
you can vary the action

i.e. your answer should lead to that
that you get a beneficial effect

and then it turns out that based on this
from this level of action
you must be able to do the most important thing
not to deviate from the goal as if yes, in the current time

that is, there is a logical goal

there is an informational purpose
but there is a goal that seems to exist in itself
on yours it's more like that as if omniscience

there is such an element in a person
man knows what is Eternal life Eternal development
he sees it even in a certain part of the Soul

it is possible to determine this level of the Soul
looks like a mirror reflection level
any information

and is located in the heart area

as some kind of reflective system of a mirror type
well, like a drop, yes for example there is dew there
from the inner surface if you look
when it drips
here the inner surface reflects Reality

if open well the sun's light is so bright there
this is the reflection if you transfer this image here
and many can find it right away
It is better to work not in an image but to find this system

then it turns out that the person knows yes
what is Eternal development
and then you need to base it on knowledge
i.e. on direct vision of this Reality
Now that would be a different kind of management

i.e. if a person knows that there is a road
he can't say that she's not there

because under management conditions
often matters
fixation of for example Thinking
this is what the man was thinking at that moment
what was he doing

and the ability means for a person to group together
and form some kind of format or layer of management
it's still some time

and during this time if a person
there for example did not immediately answer with knowledge yes let's say so

he will then have to spend some
even if it's milliseconds
to restore the system
and then start answering this question
that yes, he needs only favorable development

why am i saying
that the technology of Eternal development of Eternal life
this is special information
we need to introduce that he needs , for example, Eternal Life
then the action is different

here, pay attention to the reserve action
should be much higher then in a person

i.e. even in some elementary action
he must have it constantly
reserve of its capabilities yes

and it turns out that under the conditions
when a person can somehow
maybe it doesn't feel very good there maybe it's good yes
he may not be in the right mood, etc.

or does it mean he can count
what does it mean in the profiling version
something like a painful condition may occur
he might think
what if there is some kind of disease there, etc.
it may not even be a disease
some information that indicates the presence of a disease
then you need to look where
maybe he works with someone
this is a disease of a completely different person

i.e. try to differentiate
what does it refer to

from God's point of view, he should be treated
only positive Eternal development
here is the ability , as it were, rigidly into the matrix of Eternal development
enter again

and this reserve
it concerns more the plane of Spiritual Thinking
this is the level of Thinking with the Spirit, so to speak

pay attention here
one can think with the Spirit
on the Spiritual plane the Spirit is completely stable
An infinite quantity such as Spirit
Macrodynamic, i.e. the speed is Infinite
and it turns out that this is the most stable structure
in the system of this control

from the point of view of the Soul, everything is clear there
The soul is already Eternal
and for her, with her knowledge, it is completely clear

the point is that we should
on the logic of the management structure
to introduce control into the physical body actually ^{yes}
make the body inaccessible to any attack
physical body

so it turns out that the task here is still
training of the material part ^{and} tissue of man
including such direct training, ^{so to speak}

and it turns out that we are this very Reality
which is absolutely Infinite
which is designated as a system of real future
must somehow

be able to remember this Reality
^{Well for example,} there is a golden color of this future Reality

one aspect of this color is enough
and there is already an answer to this question

yes you need Infinite Development
you need a non-dying system
as a special technology too sometimes

but here the level of Eternal development implies
there is natural immortality there

nevertheless, if it means the question arises
precisely the task of non-dying
then this task must be performed
as a management task for just about everything

and it turns out that we are dealing with
with information as such

which from the point of view of Infinite development
should be accurate
based on the knowledge of Infinite development

i.e. knowledge that is in the Soul of a person
and which is perceived and exists in the Soul
this is the mirror principle of Perception
but in the Soul of a person there is this knowledge

i.e. on the Spiritual level we receive this knowledge
and does a person have it?

and here is the combination
the combination must be
the physical body of a person

and here you can create
in fact, the area of creating one's own personality
including the material level there
including the task of personality
including management tasks

still the most universal level of control
is that aspect
when a person can create himself it turns out
in management

and then it turns out that it is quite reliably protected ^{there}
from possible nuances of some external influence

then he can perform tasks
actually building one's own personality
in management
solving these problems

how does God do He builds and decides ^{yes}

it turns out that this is the level of Macromanagement
is located somewhere deep, ^{so to speak}
in the personality of human knowledge

that's exactly ^{how it's distributed}
personality ^{or something} in management
or knowing as a knowing person
we see that in the element of knowledge
there is always an aspect of Eternal development

after all, knowledge is still a touch
to some part of Eternity

and here is the ability to highlight
in the structure of knowledge the element of Eternity
it is actually a very reliable tool
Eternal development of Eternal life
where in knowledge a person always highlights
this is the Macro-meaning of Eternal development

i.e. for example well if there is a task there
affect the temperature information yes
in the space of Perception
you can take and reduce the structure in management
i.e. make the temperature lower, for example Yes

and at the same time when you lower the temperature
then in Perception you can go there two levels

or you perceive that it is the same on the thermometer
or you lower but
or you just perceive lower due to Perception

here it is an element of some training
is that
that you can practically manage
at the level
any let's assume strategic thinking
and it will be Reality
and a comparable result will be added

or you work at the level of physical matter only yes

then it turns out in the management structure
physical body
there are points where there must be a combination, here

in body management for health improvement
need to have points
which are nevertheless necessarily combined

i.e. you must definitely be able to
almost at the level of combination
there are some possibilities there Macrosil yes
Macro level help you
consider the body as an integral quantity

what is your physical body
interconnected
with all aspects of Reality

and it turns out that you then
here you should see it absolutely clearly
what you should do first at the management level
consider
how can one obtain something completely unique through an Infinite amount of
information, in general
access to your body
which ensures its Eternal development

hence
next level axiomatic control
it is the ability to gain access
from the Infinite amount of information

and logically it is completely clear
since the amount of information is infinite
and do you have Spiritual action
aimed at Eternal life

then naturally you will find
in this Infinite level of information
answer
what to do next for Eternal development

i.e. as if there was another option
here it turns out in logic there is no Thinking

Infinite amount of information
gives
Infinite number of solutions

and from here we have
own well like intuitive or something
logical level of knowledge
that yes, it is enough here to just set up
your management tool actually yes

i.e. to be able to means to do it in such a way
that you are your own level of management
so you consider it as a level
which if he already did before
perceived information and learned yes

your level of management
then what is the fundamental difference

here it only works out
your personal will and knowledge
and since there is such a thing
then yes, you can overcome it
you will always have time
overcome the situation no matter how it looks

and based on this, of course, it is desirable to profile
so that the situation there doesn't go as far as it should
to some unfavorable level

nevertheless, in principle
in the structure of self-organization of personality
when a person can recreate himself

just like God does
He still recreates Himself.

we can still solve problems here
absolutely fundamental
and from the point of view of Eternal development
this is exactly the tool that guarantees
Eternal life to man
when he can recreate himself

means selection element
Well as if completely long-term information
some kind of completely
some Infinite aspect of action
is that
that any information
which comes from Infinity
that's how much more distant it is
the more accurately it should correspond
the task of the human physical body

Spiritual tasks
his personal tasks

i.e. the ability to recognize information in this way
that comes from a very distant future
information
On the contrary, it matches you as closely as possible

and this is the principle
which is quite correct to understand here
in that regard
what the closer the information
the more manageable it can be, ^{yes}
due to some kind of systemic or multiple actions

but if the information is deleted
then it often takes time to manage it

Well for example, you receive some kind of signal
which comes from the future
in this signal we can immediately determine
structure of the future

for example, his own presence there
or some action

if you don't get an exact match ^{for example}
then you have to balance and spend time
but until the signal reaches this distant future
it may take a long time

so from God's point of view
absolutely distant future
this is absolute controllability

and this is another point of confidence for people
in relation to God
and ^{well}, to God
naturally it is visible from all sides
God Himself always knows that He is Eternal

but it is precisely people's confidence
that He determines all processes
including Infinite processes

and it turns out that He has absolute control
as if absolutely remote processes
and those close to him

and based on this, here is the ability to teach yourself
in event recognition
where is the control of approximate processes
the same as absolutely remote

there is a very good teaching example here yes

For example there at school when a student starts to study something
and from the mass of objects there is a principle
maybe look at something simpler, for example , to start with

Well, some may start with more difficult tasks.
but nevertheless, in this design, if we consider
how to approach learning yes
as for example from the point of view of simplicity

it is easier to manage remote systems firstly
easier psychologically
because management
we still need to watch him, wait, etc.

and secondly, it really is here
this light is like a control lever, so to speak
he is such that remote processes
more correlated

i.e. they, well, with your desires and actions
creative type naturally

so here it turns out
what is this management
a point of sorts of Infinite development , so to speak
maybe it will look like a dot too

this is a pretty good characteristic of this type
that this is a point that is always controlled

example , we found a point that is always controllable

the next postulate of management
being in Endless events
points that are always manageable
the further it is the better

and from the current controls
since that point is still absolutely controllable
as God does

and then we have current events
we start to connect

with this point
i.e. the point starts to attract them yes

like a kind of magnet there, for example
begins to attract elements of light levels

and you begin to see that current events
although they may be there somehow
well from the point of view of your management
managed there for a longer time
or somehow apply some technologies there

then from the point of view of the external point
it is often seen that they are completely manageable

i.e. the external level begins to align events
and the World is essentially built that way
The world must be disposed towards man

i.e. we begin to bring the World Order
in Norma it turns out to be just enough for everything
i.e. we don't really invent anything new there

and then it turns out
that based on this management concept
we take and normalize the system of events
in relation to
to the Infinite development of the whole World

that's what I was talking about
collective consciousness
control
then naturally our state
it becomes normal it turns out

in terms of well, the Norm of Eternal Development is meant
this is exactly the norm
what you then begin to see technologically
you start to get some management technology

any development is considered normal
it's just that in this case it will be more [...]

and it turns out that the main thing is that it happens
development action

so in the current management task
make the controls this way
from the point of the Infinite Future
get to your tasks

and as if you are pulling them into the structure of Eternity
and they start to level out
i.e. to align in the phase of collective Consciousness
that everything works out for everyone

Here is the next very important principle
what works for everyone
and then naturally it turns out in you yes

so what do you do now?
I will work with you

and in this management
it is necessary to base more
at that level of knowledge, so to speak, of cognition
what if you can do it in management for example
self-creation of one's own personality
and in management, in general, every person can do something

and many people overcoming some obstacles
often they self-create in reserve here
or in some extreme situations

i.e. they group the personality
all information is collected at one point
and that's all

and it turns out that it's not such a complicated matter in essence

but if we start to assume to do so
that we are on logic and knowledge
we start to lay it out there in technologies, etc.

then it turns out that there is something like that
Well what is the third medium or minor action
naturally you will overcome it

because being there
well, in some more or less favorable situation
or at least being in a situation of action
naturally you always have time

it is very important to highlight here
time vector
that you definitely have time
and nothing can be different

than the system of your Eternal development

i.e. everything else seems unrealistic
here in this technology

here it is very important to develop the third one
there is the eighth concept of management
where would the postulate be
that you still have only the structure of Eternal development

and there are some problems there
you can perceive it simply with surprise

i.e. use your own potential
well, there may be something of this kind, often of an unusual order
i.e. people are surprised if there well, something new for example
or simply what is perceived as surprise

you take and introduce into the structure, for example, surprise
to everything that does not correspond to the Norm

well, that is, you take it there on a human level
enter simply surprise management
why on earth are you in the Eternal Development system
and why does something like this suddenly appear
that you have to strain yourself
to sort of level out the controls yes

well this could be possible information
about some unfavorable event
this is possible information
and in some there may not be the disease itself
but just information
some actions

and so you must on a personal level
to be there just surprised
why is this happening
and start building a personality
from the point of view of the emotional level of management
where emotions are this level is brought in
to the seemingly previous states of personality

well, i.e. where do you have absolutely yes
the spectrum of your emotions feelings

the level that every person has
and you are absolutely almost one hundred percent
control the main spectrum of emotions

and when you start building
and the manager is ninety percent

controls everything

then it turns out that you start to build a personality
based on the fact that you still use a number of emotional
to the level of actual standardization
systems of Infinite development

This is where a very important aspect arises
reactions as if of the external world yes
external information there
external substance

and even if you don't define the word completely
and you only start speaking at the initial levels
and a kind of unsystematic position

here is the level where the word is
really have any fundamental significance
as if what you see

here it turns out that then already
Perception of you yes
from the point of view of external Reality

because external Reality
it's like some kind of control system , so to speak

here of course it is still excluded
keep in mind that this is very important
that when I speak about external Reality
here we are talking about information in general

but a person is a completely special level
this is the level that is located
at the level of well as if of the same type
on the same level as you

and therefore when we talk about external Reality
then we are talking simply about the whole World as a whole, as it were
we don't highlight a person's status there, for example

just information from the world

but here is an important aspect
what first begins to perceive
your status
it is the structure of external Reality

suddenly elements appear there, and optical ones at that
they are starting to become visible

what is external Reality
begins to perceive you
as the Eternal Living

and aspects arise, well, actually
by the way they are similar in Perception
to what corresponds, for example, to a person's surprise

then you start walking through them and looking
and why?
that from the point of view of external Reality
does not correspond to this concept
and immediately diagnose the cause

i.e. you get there on a sensory level
Well, I just gave one of the directions as an example, so to speak
synthesized surprise so to speak Yes
with you created a concept or there is a structure of surprise
simple information

or you can use any other feeling
it doesn't matter there
for system diagnostics

because the outside world uses
Well, naturally there should be creative feelings
which at least don't bother people, so

and when you start to see
management structure
then you find quite often minor reasons
which are sort of like, well, they are imputed as alternatives
that there are some problems

Well for example, conditional information
there is some kind of stone on the road
you might slip

so what
you already see it, you will go around it
there is something else problematic about this [...] etc.

i.e. and you start to go around system by system
i.e. the more you practice this path
learn this kind of management
the more accurately you begin to differentiate the object

and it turns out that I'm not talking about the feeling of love here
it's a universal feeling
and this is a unique system, it is universal

and apply it there or somehow implement it
this system doesn't exist at all
according to this management, let's say so Yes
which concerns the feeling of love

but love has neither beginning nor end there
and exists there, for example, at points in space
as an Infinite quantity

so in this case i say
about other systems specifically
which can be modeled

and it turns out that
Well, if love can't be modeled there in any way
that is, a system that can be modeled
For example there is a desire for knowledge
the man wants
knows
he doesn't want he doesn't know

you can develop a desire to know

he decided to find out
element of self-development
and it is ever evolving

External Reality
in fact, it is a form of collective Consciousness
which does not yet contain
such as advanced knowledge or something
about such a phenomenon
it starts to react
what well what kind of knowledge can there be in this process ?

the process , for example, is just beginning
Well , God lives forever and maybe there are some people there
and what next?
how to make it universal

but our task is the only obligatory task
so that everyone can master this technology
everyone should live forever

and this is a completely simple formulation task
i.e. we cannot deviate from it in any way
we formulated it and we just carry it out

it turns out that based on the task

thing arises here's an explanation
what yes for example there so that there is no global catastrophe
It's better for people to live forever, yes
there will be no desire to press the nuclear button, etc.
at someone's

i.e. some logical postulates arguments
but there is also an internal position
there is another level of knowledge
that man lives forever
This is more often a fundamental position.
for a person

and the nuclear button may never be pressed by anyone
that's how it will be by the way
and collective management will still work
there will be no global nuclear war

and it turns out that it is based
only on the system of Macrotasks of possible use
we have to solve them but we will still exclude them

then it is necessary to a greater extent more often
Well, I'm not saying always, but more often if possible.
and at the system level in general always
rely only on one's own knowledge
own experience and own systems

why do i say that it is advisable to practice more often
It is advisable to do management by specific tasks

and going through some of my own levels of knowledge
Well, often the rescuers have private tasks there
are
save the world from a global catastrophe
also a private task, generally speaking

and it turns out that if we start working
in this direction
then it turns out that we must
must see here
here is my own principle of operation
of one's own personality
in this management

i.e. where your personality is absolutely confident
and then the differentiation of the external system
after two three times
the outer phase of collective Consciousness

still she looks often
as a form of life of some kind of management

and this system starts
accepting this information
is already starting to react to you
as a person who lives forever

further you see
reaction of this phase of collective Consciousness
for example what
what is this faction yes Well as if external control

that the system is self-diagnosing
and the system starts to react like this
for example, there are nuclear weapons there, right?
so again there is some kind of discrepancy

there are logical versions of control
that nuclear weapons, for example, could explode

you reveal this structure
and you interrupt the connection so that it cannot explode
you saw this and opened the system, etc.

and haven't cleared it yet
Well, maybe you'll have to spend half an hour
so that there is no nuclear arsenal there

whatever it's called or any weapon at all
so that it wouldn't work at all, for example Yes

i.e. you start working
across the entire control field

as a rule it doesn't take long actually
because it is a form of collective Consciousness
which reacts well as if not the one who still needs to be taught

this form is actually
it's just a normal amount of information
the same as everyone else
the same as one molecule there

i.e. it is a universal level of control
you just need to work through it
so that your personal tasks are completed faster

and this system management well it would be like this
so that in the collective Consciousness

your system of actions was accepted
on Eternal Development

and then you can give very powerful control
to all
Now, by the way, you can give control
all at once
and to myself
and you will see that in the form where you worked
collective consciousness
Now you are working with me
you get the most powerful beneficial effect
i.e. favorable development of any of your tasks

here is the control point
which in the dynamics of our Thinking actions
fits in very well with that
that man has infinite development
on information
it's like a specific platform

and it looks like it's at the level of vision
somewhere at the level of the face is located
let's say something like this in the background information
first

first and have Perception
this is golden colored information

and since this information exists
We just can't get rid of her
even if someone wants to
this information exists
it can even be diagnosed digitally
take the elements and lay them out there
what does the substance look like in this control, etc.

and here we begin our dynamic structure
connect with this system

and by the way, let's assume the same systems
the same controls for Eternal Development
they are actually connected
namely the dynamic phase
our personal initiatives, let's say
with a phase that exists at all

because if you think about it
how is life built in general
in the structure of Infinite development

it is always being built into some existing future

but then the future turns out to be infinite even by logic
otherwise how would it be possible
some intervals of life would develop

i.e. there still exists, as it were, even a logical point of view
which can be proven
just physically write out a series of equations there
show that the entire phase of future development
this is Infinity
absolutely guaranteed to a person

and then it turns out
that based on the management system
here then it is completely clear

for example, there is the aspect of universal resurrection
why it must necessarily be realized
because the future phase
does not contain a restructuring system
as if some element of the past even

and it turns out that we can in this management
see perfectly clearly
that technologies such as profiling control
in this case
after all, preventive health technologies
they are completely different

they are not connected in any way
for example there with the resurrection technology
in essence
because we are talking about those people
who live and do management
For example there were no dead people there

but this applies
and to the resurrected ones who just work there
like living people and everything

and therefore it turns out that in the integral sense
This is still a preventive health technology

from the point of view of application
to technologies such as resurrection
this is to consider the next level of tasks
in a person after resurrection
put him on specialized health treatment, etc.

i.e. of course the prevention itself for health improvement
it is naturally like a universal system
as for the usual there for example there
A person who lives forever

i.e. the term "ordinary"
here, by the way, it is very useful to apply

because when a person has this technology
including self-recreation technology yes for example, personalities
information control technologies
like for example in the Infinite Future

then it turns out that he is completely in control
technology practically
not only there of its own in management yes
by its own, for example, Eternal development

he is absolutely happy there and in large quantities

can transfer control frequently Infinitely
to all people

because there is a very important aspect of management here
related to that
which, for example , according to my Teaching is absolutely clear
which is the same as what God does
this knowledge comes already as universal knowledge
i.e. Eternal

God's task is accomplished in this way
that people become Eternal
they actually got this knowledge right away
into the system of collective Consciousness
are being taken out

and then here is the reaction of the collective Consciousness
to the next one there Eternally living
will be more balanced

then they won't necessarily build
additional control systems

as a rule, so that a person lives there forever
It's often enough to just set a task

and in general he can live freely forever
in terms of simply completing this task
it's not always some kind of complex technology
there requiring some kind of long period of training, etc.

to a greater extent, management is often reduced
as if to logical levels
well, maybe to clarify the circumstances
some details
how does it happen in this world
from the point of view of its provisions

that's why there is specifically a profile of health improvement here
has an important aspect from the point of view of guarantees
which are perceived as ordinary household guarantees
for example Eternal development

and if we apply it in time
and it is possible in time it can be ten years in advance
can be applied

and see what happens
make management
or apply it to the Infinite level
highlight a particular aspect
where can I make management now

then it is quite possible to achieve
of that sustainable management
what is the person who sees
that he succeeds in implementing this technology
he says yes then it's clear
that this person is he himself, for example, personally the Eternal Living
Those who live forever
towards whom he applied control

because they have learned and apply it on their own
or even at the first level
it's just a manager who applies it
in relation to them

i.e. it turns out that we are talking about that after all
that there is only complete free will
and therefore another can
either accept or not accept

but from God's point of view
where there is Eternal development
people will still experience this experience

that's why it turns out
that here is the task of Macromanagement
still more often in this technology
this is a collective action

action aimed at that
so that other people see what you do
in the conditions of precisely Eternal development
could therefore also act in a correlative manner

i.e. social skills
show your actions
the ability to explain them simply
show that you are in control
some specific pieces of information
social level ^{there}
there is some kind of physical ^{and} health, etc.

and this is already a very strong level
when it turns out that the other person perceives
and this is a completely unique level
when the other person already understands
here the World is already gaining
stability in control ^{yes}
sustainability in Eternal development

that's why I specifically highlighted it
namely the element of the World
and here is the selection of the element of Peace
where often the word itself has no meaning
may disband

and then knowledge by another person
but often the other person recognizes it instantly
it is not necessary that the whole world will react there

and it turns out that something is already arising here
a completely stable level of control
where is God's task
the task of Eternal development of each person
it is already being revealed there
as a task for every person

they are performed in perfect sync
and with high priority
in terms of even helping everyone

i.e. it is important to see here
what is collective such as solidarity action
this is a very powerful level
which after a short time
gives a really real life
to all people, by the way

i.e. at first, ^{for example,} to a very large number of people
then to all people

so in this technology
It is advisable to use technology
as an applied practical matter

in terms of where the practice is
it is simply following the words often

and for example if you write it down
and just follow there even
axiom level of control
in the profiling management plan
where there are, for example, aspects of human self-recreation

Here we can generally highlight
even such a completely clear design
as a certain system with a specific algorithm

and now to use it
as a completely applied technology
which gives exact coordinates
provide real
Eternal development of man

This is where I end today's seminar.

Thank you very much for your attention
