

GRIGORY GRABOVOY
The Teaching about God
Rejuvenation
28.02.2005

Hello again
the topic of my seminar today
this is my Teaching about God
Rejuvenation

the theme in this case implies
highlighting specific areas
when a person needs rejuvenation

for example, if we have
such an action as we suppose is expedient
from a human health perspective
or when a person personally makes a decision
for rejuvenation
due to, for example, subjective reasons

that's why the topic is divided into two parts, so to speak
This is rejuvenation for clinical indications
if necessary
in order to restore human health

and the second part is a personal desire

so in the first part I consider
process
when it is necessary to consider
rejuvenation procedure
as a regeneration structure i.e. tissue restoration
at a certain period of time of a person

i.e. a person is considered
as so to say the global level of development in the whole world
as a development system with all the connections

and a section is allocated which characterizes
specifically what at the moment
the man had
the most, so to speak, a more favorable state of health yes external and internal
events

so rejuvenation after all
in this case it is a complex value

and if we consider
as God does for example
from the point of view of the rejuvenation procedure
then for Him in general here
the management process is like this
that we have development for example Actions of God
as an action such that the process of youth
for Him, in principle, it is a process of Action

i.e. to create a structure of youth is Action
to create a structure there for old age is also an Action, etc.

and that is why it is important to highlight here
as if subjective reasons

i.e. here is the Soul of man
considers some period
like the period for example young

therefore in the structure
rejuvenation according to clinical indications
highlighting a spectrum of youth
this is still a subjective type of task

i.e. a person at some period of time
highlights the phase of his personal youth

for example, God perceives Himself as young
when He wants

i.e. for God the concept of "old age" does not exist in principle
It can be any period of time
for example, perceive it as a period of youth

so for God, for example, to differentiate
what is youth for Him there or, let's say, old age
this is a special technology of a set of certain features
in a state

so it turns out that for a person
to rejuvenate
we also need to think and consider
exactly the structure when he had
the most optimal qualities
from the point of view of that manifestation

Well, what is called youth, for example ?

so the first phase
this is the allocation of the management structure
for a young state

precisely according to clinical indications
i.e. the person must be healthy
there, let's say, restore health

and the second is use
a selected segment of information
in order to attract in the current time
this segment of information

then comes the transformation phase
i.e. the body's reaction to a given condition
and adaptation phase

and here is the most, let's say, drawn-out one
or, let's say, having some kind of pressure wave
phase
this is precisely the adaptation phase

because both the first and the second system
when a person identifies a phase
as God does
it's not difficult at all
it is enough to remember two or three useful concepts yes
from the structure of youth

and therefore the adaptation phase in the body
this is a natural state
the organism was young

in connection with this it turns out
that there is nothing unnatural about it
and this is precisely the phase of adaptation to the current time
where there is a change of social physical as if
some informative events
this is the main position in this management

so if we consider that the first two phases
it takes up a thousandth of a percent there
selection and, in general, attraction
into the structure of current time

then mainly in the structure of rejuvenation
it is necessary to engage
It is precisely in clinical terms when it comes to
indications
for health purposes ^{yes}
Again, I would like to emphasize

sometimes to normalize some events
with the purpose of acquiring health ^{there, etc.}

for example in Eternal Life technologies
it is necessary to be able to periodically rejuvenate
at the request of the person

and in this regard, if ^{we assume} that we are considering
such a structure as, for ^{example,} resurrection
then it turns out that there is work with fabric there
should go fairly straight
reaching the required age, management, etc.

so in principle
technology of fixing a certain image
more generally, ^{for example}
from the point of view of technology, ^{for example,} there is Eternal Development
the point is that we allocate a segment of time
so that's how we do the management
what are we saying
that at this time we have such an age ^{yes}
and such and such health characteristics

and that's when we use it
in order to have exactly the health characteristics
provided that the first level is still a level
the main thing that stands out in management
this is the need for Eternal Development technologies
highlighting the structure of human immortality

i.e. a person should not die under any circumstances

that's why it turns out
what from the point of view of the onset of old age
this is also, ^{in general,} a fairly important technological level
for the technology of Eternal development

and here

this is precisely the adaptation to the structure of external events
it is done the same way as God does
i.e. overcoming there often literally instantly
sometimes it is possible for example there by means of analysis of some do

through the structure of Soul diagnostics
perceiving some better, let's say, state
which we define as the structure of youth
without particularly setting external or internal parameters there
this is generally a fairly understandable state
to any person

from the point of view of information

if you consider
how does a person think , for example, yes
what structure of the mind for example is at the center of action
then this is precisely the structure of optimality
well, some kind of youth

what is "youth" in the informative concept
accomplishment of some close ones
or periodically close actions
enough as if new and initial actions
which then, for example, may not end

in principle, this is basically the technology of Eternal development
in subjective Perception

so in this case
when we consider
precisely the adaptive function
now man has taken over control
sent the optical phase to itself

and here the body's adaptation begins
to current events
this is where the main tasks arise, yes
in management

the first task is this derivation
structures of the young state so let's say yes
which is already controlled
as a state integrated with the organism
into the structure of Infinite Development

if it can be withdrawn immediately

a person rejuvenates quite quickly
as if with one impulse

brought out
into the structure of Infinite Development
and received Light from Infinity
in your direction
then adaptation goes very quickly

if somewhere in some management integration
it turned out that we, well as if we received
additional control unit
i.e. an additional connection which can be the following

that at the moment of rejuvenation
a person begins to think
how he will be perceived by others
or some subjective ones
i.e. what age yes
how will this look subjectively
i.e. some in general, these are often thoughts
which are not fundamental as a rule
it is at the first level of management that they arise

then here comes the point
the main level of adaptation blocking
namely the structures of youth to the organism

actually
although this may occur
physiological, as it were, healing
here is a manifestation of the structure of a so-called young state
Well there visually or indirectly
that arise
some similar pictures in management
here, as it were, this structure is already beginning to exist
well, sort of slower in time

here to speed up the management
need to bypass the structure
as if periodic or as if systemic in general Thinking
where similar questions arise

for example how to rejuvenate for a specific time yes
then it turns out that the main task of management
is actually rejuvenation for a specific time

a whole complex of tasks disappears

for example, a person became younger

by 5

10

or there 15 years

he knows roughly how people will react

in relation to yourself

and understands that if for example he needs it yes

it's exactly this age to somehow rejuvenate

perhaps for that

to rejuvenate according to clinical indications

i.e. just to get healthier

enough rejuvenation for example there for a month or there for a second

a jerk phase at this second, for example

i.e. it is enough to do

Well as if integration in time

there is minus one second

and it turns out

due to the simple elasticity of the fabric

because that's all in all

tissue systems management

the body acquires a normalized state

that's exactly when we say

about rejuvenation according to human clinical indications

i.e. he may not be sick at all

but he just wants to be healthier

this is also, in general, one of the properties

so let's say clinical, well, conditionally, indications

because basically what I'm talking about now is that

that through this structure one can be healed

from for example there are some problems there

or in principle cure serious diseases

through the structure of rejuvenation

This is what I call "clinically indicated"

and at the same time the property of time

in this case it is very simple

if we bring the organism into a state

when he well as if remembering the natural level

where there was no disease, strictly speaking

from the point of view of future events

throwing the structure of future events
even without working often with the past tense element
then we get
in general, just a normal state of health

so it turns out that this is subject to
that health , generally speaking, can be normal anyway
but this procedure can be applied
as if to prevent some problems, yes

can be used to get rid of
from ecologically harmful impact systems

this is what youth is
this is a certain normalized primary environment

and if there is radiation exposure there
or is there a toxicological effect
you can simply remove the organism

outside the phase of this influence
due to the fact that adaptive functions
as if in a state of youth they are higher yes
it is considered so

although this is enough again
for God this is a conditional state
for God there is simply a function of adaptation and control

so we're just saying
Well, here we take it and call it conditionally
that the state of heightened adaptation
we call it "youth"

and we take it as if we were making fabric
there is less information there or something loaded
from the point of view of previous development systems, yes
or from the point of view of information reception

ultimately we have to
make a cage
Infinitely perceiving
any information system
then it turns out
movement along the structure of time there or youth
this is a personal level in general

how a person wants to look
so he for example yes and it looks like it

and based again on these clinical norms, so to speak
physiological parameters norms
we can quite well consider
that this is, in general, a means of regulating the body
well including healthy
from the point of view of there, well, the standard
for example, according to environmental indicators
normalization of the body's reactivity
for some situation

let's say a person has some kind of difficult situation
then it's easier to enter the state
as if young integration on on Reality
and react in a more "younger way"
you could say so, well, in quotes

for example, you need to increase
emotional background of management
you take enter into a state
you just work informatively

at the same time you can rest assured
you have reached a state of, for example, a young level
and worked on an emotional type
i.e. through emotions the main control was carried out

then it turns out that you basically worked
as a young man
who works at this time and for example also yes

because it exists in the collective Consciousness
certain signs
as if the emotional level of youth
certain levels of action
from the point of view of that
how the young man acts , etc.

and that's why in principle we say so
that we have this information
for example we know yes or we know approximately
who was for example in a state of youth
well, just like an ordinary young man
what he is like later
then it may not make a difference to him

but we think
that we can use conditional values
which relate to the concept of "youth"

here in this case
i.e. we can consider
that in youth there is a certain state
there which characterizes precisely the concept of "youth"
emotionally
psychological plan there management plan

and in connection with this we have in principle here
quite a large selection of controls

here's another characteristic
as if of a young state yes
what about from the point of view of a younger state
you have overcome, for example, some level of management , yes

for example, they overcame some systems
which were before you
then you have experience of overcoming
then you can overcome

and if you take it there
a regular rod -like structure
and introduce everything as if into a model solution

here is a problem
and make something universal
is it a decisive action ?

just take the form
impose
on the management structure
it turns out you always overcome

i.e. the state of youth
this state of obligatory overcoming of the problem is obtained
it's logically simple
and by the way, in terms of management, that's how it works out

from the point of view of the personal management plan
for example, a person has no clinical indications there

he is healthy
he has no environmental problems ^{there}
and he decided ^{to just} rejuvenate himself
Well, of my own free will, ^{yes}

this is the next level of management
then the question arises
why does he need it

Well ^{there for example,} the aesthetic level
or ^{is there} a personal level?
in order to
if it can be so that a person thinks
what about age gain
as if ^{yes} age characteristics
On the contrary, he has his own social status ^{there,} etc.
i.e. this is also ^{generally} the same level
in general kind of **systemic type** ^{yes}

but here one nuance arises
what from the point of view of personal choice
here in the direction of development ^{there For example let's say so}
aging processes ^{or old age}
the structure is very complicated to manage

i.e. ^{for example,} if a person chose
level of rejuvenation then
or precisely the adaptive level to Reality
i.e. he must be, ^{for example,} of a certain age, ^{yes}

in this case we are still talking about
on a broader integration of concepts
because there is something in front of a person
tasks of the Soul
tasks ^{of} personal development
if he ^{for example there well} professor doctor of science
it is considered that he should be at a certain age
at least ^{there well maybe there are a little older than 16 years old} ^{yes}
at least

so it turns out that there is
some levels ^{well as if} subjective
as if some phases of collective Consciousness
which still affect the control system
as if external control

that's if in case of management

for rejuvenation according to clinical indications
for health improvement
here, in principle, nothing at all should work
a man decided to improve his health there and he became younger

and there are no other criteria
because health is the absolute norm
any control

then in the case of personal choice
a lot of nuances of this type arise
here you can either lead to recovery
then the question arises
for healthy people
This is a fairly complex design
i.e. you can just be healthy
why be young yes For example

who cares
a healthy person still does the same thing
Well as if he is ready to work in any management status

and this is where it comes in
the nuance is precisely from the point of view
Eternal Development Technologies

here is the root of the situation itself
that when we consider
for example, a full recovery system
any creative object of information in general
For example there is a resurrection structure
recovery structure

there is some flower there is some blade of grass yes
in Infinite Development

God can restore everything
because He is in real time
sees everything at once

this is where it comes up
it is the context of personal and quick decision making

i.e. rejuvenation is precisely by personal choice
it's still a quick choice of this kind of solution

let's assume that God will restore

some blade of grass that is somewhere
for Him it is very far away in time

this means very quickly
just develop at this time yes
and it will grow here somewhere now
i.e. it turns out that
i.e. at this time for example

and this is the level of a very quick solution
here's how to rejuvenate according to a personal plan
need to choose a solution very quickly

with all this with all this
in this case the concept of "rejuvenation"
sometimes has a subjective control system
and for example a person takes an exam there
he used to study the ticket there yes

then it turns out that he can use
this system just to be in this state
when did he learn this ticket

Well, it's a means of memory training
or a means as if not loading the memory
know everything yes

i.e. it turns out that based on this
it's like a technological trick there
in the application of this process

and it turns out that based on this
we can in principle have
and access to this information
if we extrapolate, as it were, our Consciousness

Segment of Consciousness
in the structure of writing a book in general
and we will try to understand
emotional structure there
in terms of age
because understanding age
and the author's path
this is also a system of knowledge
here to understand the management structure
It is enough to know the author yes

and then it turns out that you should know
his age characteristics

It is often easier to understand the author by age
it is enough to consider the age structure
and you understand what he wrote

and it turns out that based on this
In principle, you can just take the information
it is not necessary to read the texts ^{there} technologically
study something for a long time

i.e. it is, ^{in general}, a system of access to information
managing this process

and when do you start setting goals
again, then we'll move on
to technological methods ^{yes}

then the method of rejuvenation in this case
here I give a methodological plan
to a certain extent
because here it is already
here is the system of personal choice
it ^{basically} makes the problem more general
and then we need to standardize
from a methodological point of view

so this ^{is} a method of rejuvenation ^{yes}
by personal choice
a person simply wanted to and became younger, ^{for example}

is as follows there

first method
you need to perceive yourself
^{so to speak} in the Infinite Future
as a structure of manifestation of the external World

i.e. you are looking into Infinity
and you see
increasing level of oneself

First of all, these are informative signs
by the way, this is a very strong level of clairvoyance development
to control the situation around you

and when do you start
see your own kind of informative plan
you begin to understand
how do you even work
at the information level

let's assume that you perceive
some object of information
it turns out that here you will be able to understand
as information
in relation to you, as if it develops yes

i.e. how do you work with information in general?
how do you look on information

and when do you start
this well in general, develop the system
then only your personal well as if a primordial image
here is the one that was originally created by God
or conceived by God so to speak Yes

here in this in this level of your Thinking
he shows
how do you work with information

and when you start tracking
your own connections
that come from you
then naturally the whole system is controllable

so it turns out that this method
allows you to track
all your own connections
which you practically build yourself

i.e. to track your own channels , so to speak
or there are optical control systems

which means you can have access
to any of your own fabric

in management
in information

i.e. it turns out that you don't need to touch it
your tissue system directly yes

but in integration with the entire system of connections of the whole World
you can clearly correct the system
and what age will you record
there you will be

and here there is such an axiomatic sign
the axiom is as follows

What
no matter how much you do
additional control yes
except the first one
there is the first first wave
all following management
will always come to you personally
and you will have to do the management again
actually in the following status

i.e. you can't work constantly
coordinate system or something
Well as they say, you can't enter the water twice, etc.

i.e. it means that in this case
we are talking about primary status
primary standard of living

what is the aging process anyway or what for example youth

this is the process of changing some information yes

and in principle the task of rejuvenation is obtained
skill in current time
create a system that is practically identical to that
which you have already used in general
under other management structures yes

i.e. from a generally known form
and we take it and want to use it
this form is there for the second time actually

for God it means
each piece of information is equal
so the transition to this form
For Him this is a primary phenomenon

here we need to understand God then

this is what he wanted for you at this level
when He gave it to you
next level of development
for example, towards aging

towards that
actually exists in the collective Consciousness Yes
that well it is considered that aging exists for example

and then it turns out that if we
here we look at the primary form
and we want to understand
why are we heading here?
according to the general phase of collective Consciousness
why do we need this at all

Well, you can be young there for example yes
Eternal time or at some age

why do we go the same way as everyone else
and for example, well, so as not to be different , yes For example

means or what we need to have
it means when we have signs of aging
what do we even want in this world
i.e. a person always chooses personally

and then it turns out that from God's point of view
it is still a collective action

that's when through Macrosalvation
through Salvation of all
for example, you need to become young
then people can really become young

at least they can quickly become
that is the main number that are considered
what is there for Salvation
there or for Eternal life which is also
from the point of view of how the technology of Macrosalvation yes
is considered in this case

we need to become young
and they become young

i.e. in this case it is still a point of view
some position

there is, let's say, a certain age
in which it is considered
that a person should do this or that action

and these are the phases of collective Consciousness
like some contours yes
well, how can we say if there is an electric current
goes along certain contours, along frames, let's say
and some frameworks that actually fix
well, some kind of normalized system of Perception

things in nature , well , let's say yes
in ordinary nature
example, here is a hive and let's assume there are bees there
they gather near one place
according to some laws of its own

then it turns out that
we can de-integrate the law
give them more as if is this some kind of next path of development?
more can be intense

but then we will have to show
i.e. to enter into their structure
and redefine the structure of all Reality yes

here to redefine the structure
a person can do this
act as God acts
he can redefine the structure for himself
and then act individually

but for it to be expressed on others
but then I must teach others

and that's how it happened
the process of teaching others
it's already becoming more or less systemic
in a person
i.e. he transfers more knowledge
or implicit
or obvious ones there let's assume lectures
or at least thoughts
or he wishes them youth
it is increasingly becoming part of the management structure
this process

as desired

and then it arises
the following axiom

in order to rejuvenate

For example there is the maximum population there
the whole globe is there for example there for a while yes
for a second

it is necessary to do so
so that everyone gets it in this second
Well, that's how it roughly boils down in time
knowledge
which from the beginning of their organization to this second

i.e. practically a vector of rejuvenation
i.e. changes in the structure of the entire Reality

for God, any event is equivalent
that all the previous
that all the following yes

so it is essential to rejuvenate
there for 10 years or there for a second
it's the same management task

and although we assume this very second
we make equalize
to all previous development
to change some event in the World let's suppose Yes

then it turns out that we have
such a level of management
that all the previous work
it's kind of directed
to replace some specific event

i.e. we must equalize
what we want to decide in the next second
with what we have
for example, as a task of one's own development in general

i.e. one local action
is equal to

to the choice of the whole goal so to speak yes human development
up to this time

and when we start to equalize it
but in principle for God
it's all the same anyway

God acts once but He acts forever.
and for Him
what a one-time action
what is Eternal action
all the same, generally speaking

i.e., we simply put it this way, we enter
into the same control system

and it turns out that when we enter here
then the following type of adaptation process occurs

that is quite a large mass of time, so to speak
event mass
starts to wave there
you can practically feel it
it starts to act, well, at least as if it were informational
but it is often felt even on a physical level
like a wave that is near the body
such as there is a person who is there
he's swimming in some very salty water
here is some kind of wave , external

and this whole spectral level
shows that the entire next Reality
it often has an incorrectly defined level

i.e. you are getting closer and closer
to the structure of the construction of the World and events

and that's when you start to see
that the construction of the World and events
at the moment yes it is determined that
that you are at the level of , well, any level of management there
somehow any external even system
sure
that you have Eternal development
i.e. confidence arises
from the level of, as it were, earlier decisions

i.e. you decided to rejuvenate earlier
did the action earlier
and then any information suggests that
that it is achievable

even by the way well maybe it's enough
some kind of pressure information there
maybe she requires some kind of reaction
i.e. it is not always some kind of favorable information

but at a certain level of knowledge
you understand clearly
that you will achieve the system you need
i.e. at least in the pericellular space

it is very important here
in the structure of my lecture systems
what is the pericellular space
starts working
as a structure of the cell's own reservation
in the management structure

i.e. it is not necessary to see
this information
like the structure of the cell itself, for example yes man

take for example there is a heart cell
heart cell
completely objective information
which has for example this information
because you thought about it before yes
and you have this information in this cell
as a history of your development

but in this system
pericellular information
has the same status

i.e. you actually accept this information
and have the same status of development of the event plan

so your events are very reserved and they work out
Well, in terms of power , I guess
as if any action hits first
to the near-informational level
i.e. not at your cellular level
and how about information about you

i.e. you consciously
translate any action
to the information level of management

it means to reach you as if Yes For example
Well, for example, there in some negative perspective
first you have to overcome
actually comparable structure

and it turns out if we reserve
this level of control several times for example Yes

Well, we can do this as much as we want.
if depending on time

then it turns out
that here is the signal income of some negative type
before you
becomes much more complicated

then it turns out we're in
approximately into such a development structure
as God does
He created everything
but nothing can happen
for Him it was negative, like, well, radical
from the point of view of the influence on Him, yes

He can only experience it himself.
make decisions
and somehow react in your own way
but to get Him
God is out of reach

and it turns out that from the point of view of this process
It is on the level
that any system of action
on Him
or there are appeals
this is the level
this is exactly the kind of informative action

but the appeal
This is, generally speaking, youth
i.e. the level of youth
if we want to understand the level of youth

for myself
then we must turn to God
in the place where He Himself is young yes

and God is young everywhere
there is no concept of "age" as such

if you think about it, for example there is the age of God
ask such a question
what he's like right now

then it turns out we can [...]
well see age if we think we say
"yes, the age is what God Himself considers
at the moment"

He took for himself such an age and set it there.
or we generally see Him and can see Him visually

only in principle visually
what other age criterion is there

this is why god needs to exist
in the physical body of a person

so that at least the age would be visible
and it is clear that knowledge can be passed on
even by age category

For example Well there if God speaks
as a child yes He grows there
then accordingly the level of knowledge transfer
suits children yes for example, further more, etc.

from a certain age
For example there since I was sixteen
God can impart knowledge more widely
as soon as He received a passport, etc.

i.e. the criteria for knowledge transfer are the same in principle
how does a person pass on knowledge ?
to another person or to all people at once

that is why in this system it is Macrosalvation
let's say salvation to all
from the level of knowledge there or the action of rejuvenation there
we can see

that it is precisely the integrated Consciousness
God and man
in a structure as if there is no time
or in the structure so to speak Well, you can call it Eternal Youth, yes
this is a state

it is
multiple redundancy level
means, in fact, the management of external information

that's what it ends up being
or let's say at the management level
it looks like this

all external information
controlled to a certain level
Well as if it achieves some criteria

and begins to be controlled
For example there is further than the physical body

and already to the physical body
more suitable information
or of a completely favorable nature
or at least of a more favorable nature

when the process is already being completed, for example
to the level of model improvement
means primary recognition of information
not of a favorable nature
alignments
there are vector control lines
and obtaining favorable information

although for a person there for the Soul of a person
maybe so
that some situations are being organized
in general, they

although it may seem so to external systems
that it is unfavorable
except for the completely negative cases
which it is clear that they are negative in any case

any other systems can be conditional
they are not necessarily negative

for this person
perhaps this is a path of some kind of development there, etc.

and therefore
here is differentiation in a complex system
perfectly linear systems
this is what happens according to the Law
First of all, there is a health standard, yes
there is development towards technologies of Eternal development
some very specific norms
which obviously must be adhered to
if there is already a control loop going through them
then here it is already clear what this means, it needs to be corrected

and in all other cases
the question of action arises

that's when we understand the root of the action
For example there God created the whole world
but this is what is the root level for Him
or as if let's say internally maximally developed, or something like that

so you can say there is some sacramental moment there yes
in this situation

what he perceives as the essence of the situation
all over the world

with all this
He has
what's plus Infinity what's minus
it's all one for Him

while God sets aside for Himself
this is precisely the essence of this process
what is the essence of this process for Him

it turns out for God
the essence of this process
it turns out that He laid it down
For example there from the point of view of Eternal development

for example, the Eternal Development of Humanity
or a specific person

and that's when He sees
that he is developing normally in this regard

He realizes His essence
God
at this moment

then what for a person
we will say the same thing

but in principle it's generally the same
if a person sees that he gave knowledge to another there
or was able to show the development into Infinity
at least there he gave knowledge about Eternal development
he has already somehow realized himself, including

Well first of all
a simple, as it were, technological principle
giving knowledge to another
he actually gained experience in development
and got it back for himself

and this happens almost instantly
for a person
You just have to give the knowledge

and although another person
actually starts to develop
towards Infinity
the one who passed on this knowledge
receives all development experience at once
this man into Infinity

i.e. it is not comparable in volume
control system

for example, you can give one method of development
and get what the one who has learned this method
what will Infinity receive in its development

but generally speaking God acts in a similar way
in order to develop there the system of the World into Infinity
for this he needs
as if at the boundary point of each phenomenon there

for example, we think that the whole world is a sphere, yes
to do so
so that it can develop infinitely

each point of the sphere must give
Endless development
to the entire outside world
Well, it's a geometric model.

i.e. that is why it turns out
that when you give knowledge about Eternal development
you actually get
Infinite level of knowledge
of the entire outer world

and God succeeds too
for He must know the whole external World
from a logical point of view, ^{yes}
human logic of development

There is of course a logic of development from God
when God just sees everything at once
and He has no such tasks

i.e. He just has
He does everything
and sees everything at once
it's a different system of knowledge

and from the point of view of logic
He must see the logical connection.

from the point of view ^{of sorts} Well, there's no such logic
which is considered
logic of the expediency of the process
or logic, ^{for example,} the possibility of developing a process

and that's when we unite
God's logic ^{for example}
as if everything were at once for Him
and logic, well, some kind of ^{logic}
close to the logic of development of the physical environment
which people observe

it turns out that here in the center
very simple picture emerges, in principle ^{, as it were}
methodological
as a simple rejuvenation method

^{it means} there is just one person
opposite there is the Physical Body of God

and this glow
which comes from God
it rejuvenates a person

at God's
and in humans
same status of Perception
Well as if two yes objects of two systems

and that's when you see
this silver light
i.e. the entire external and internal World arises
and here is the formation of the inner World
sets [...] well, more like the following task

your next tasks are as follows
what is placed in front of you
as the next task
she is being considered
as a task in communication with God

i.e. the exact task
where do you communicate

after all, dialogue is communication
nothing is being forced on you

in dialogue
in communication
or there, for example, in contact with God

you implement your own task
and it arises there inside the heart
or inside the physical body
and begins to develop

this is what the physical body is for
to a person

to show that he is free yes
he personally from his physical body
produced his own task
and he solves it himself

i.e. nothing but a personal task
in principle, it turns out that a person does not exist
from this point of view

at the moment of contact with God

and when do you start
translate such a principle of contact
on another person
then you understand very clearly
that any knowledge you have
you instantly essentially transmit to other people
you just need to know and understand it
how do you do it technologically

and that's when you're already learning and already ^{kind of} know how
transmit at least the main amount ^{there}
exactly like that in real time ^{yes}
as God conveys to you

then in principle here you are already recording
the structure of its development
from the point of view of time, ^{let's say} age, ^{yes}

here you can already vary
this is when the transmission goes continuously
the same way you look at the worlds
when can you pass it on to other people
this knowledge ^{for example there is} Eternal development
creative knowledge

then here you can already calmly
move your age ^{wherever} you want
in principle there is no problem there anymore

that's when you do the management
then your action is justified

i.e. you can say
what are you doing management
so that the ^{other} person would understand better

^{for example,} there is a person in your room
who needs you to be there and look younger
then please rejuvenate
and pass on knowledge so that he understands better

so it turns out that it ^{is, as it were,} expediency
falls into the structure of the action

Well maybe it should be

some kind of integrated age ^{there}
which is understandable to everyone ^{yes}

here from God's point of view
whatever God is in age
anyway it should be so logical that everyone understands it

but ^{for example} from the child's point of view
if God doesn't look the way he wants
i.e. it is better for a child that God looks
^{well} at least as such
middle level of the human species there

i.e. not some guy with a beard
which, ^{for example}, could scare a child there
but at least it shouldn't scare the child away ^{yes}
God then in this case

and it turns out that there is some kind of average image
which is the mode of action
and in this image
^{well}, like through some kind of labyrinth system
some level of overcoming
you can watch
what's in the rings
or there in the path of collective Consciousness
where there is some integrated image ^{yes}
it serves for something

i.e. what is the meaning of age
or some average qualities
human
at a certain age

^{well}, to serve some task
or perform some task there

teacher at school
must be of a certain age ^{for example} ^{yes} it counts
for children

if the teacher is the same age as the students
but this ^{generally} complicates the transfer of knowledge
at least
although ^{in general} this is acceptable

but ^{as if} we look

that the teacher is of an earlier age
then the question arises
how he finished several classes there
why does he teach children there for example
there are older people there

well, that is, if we are in the logic of these tasks
It's like we're starting to dive in or something
we're starting to find out
what is the age there for Consciousness

then the most common sense is something reagent
We need some food for thought too
in general it will take some time
we can only think at that time
which ensures global security and development there

Well as if any common sense is aimed at that
to implement the structure of, for example , Macrosalvation
For example there for starters

if you talk about it for a very long time
develop some lines of development
completely artificial
then you can basically get away from the control system
far enough

from this point of view
there is a next level of management
precisely in rejuvenation
which is also what God does
takes concrete actions
however, no one is prohibited there
whatever you want to think about it

but for example , what is it used for?
this is some kind of axiomatic sign
collective consciousness

when we receive
actually certain norms
embedded there in society
in the social management plan
or there in the political plan of management

and when we see that these systems are integrated

to perform some tasks
then we can do it
technologically bypass these systems

for example, if it is pledged
that a teacher should be such and such age at school
in high school
then we need to take a look
what does this give for general development
or there for Eternal life
his image

if you follow these lines
then please become younger
if you are a teacher for example in a high school
and start working simply technologically
i.e. compensating for social status lines
just control

if we are talking about
about any other person
there he is the leader or he is there For example
has any kind of functionality
what about control systems ?
in society

then you just have to
what is required from a specific person
at this age
just to compensate
or how to actually replace the management

i.e. to work, so to speak, intellectually
consider
what does the collective consciousness do for example Yes
at this moment
for this person

there are also others there
and God's tasks His personal task
that he is at such and such an age
achieves something there

but here you still need to trace the lines
what many people thought about him
that at such and such an age he will do something
well, for example, typical of an adult

then it turns out that we still need to track it down
thoughts that ^{kind of} prepared him ^{yes}
to this state

i.e. thoughts ^{of} relatives, friends, acquaintances
^{generally speaking,} just the thoughts of strangers
who see a person on the sidewalk just
random people

and when you start to analyze
it turns out ^{that} there are no "just random" ones
any point of view
This is an objective point of view
the same as any other person

if a relative has been representing you for a long time
^{adults} ^{there} ^{For example}
and now you have finally become an adult
and then you are ^{like} from his point of view
^{as if} you are prolonging your development path
gaining age

and a person who just happens to be
I saw you at about such and such an age, ^{yes}
then it's a long way to build up
^{as if} thought forms of relatives
and the only look
for God it's the same thing

and then you need to consider
you can compensate all development systems
but if you don't consider
one look at yourself
you'll have to spin for a long time
near the same system

i.e. therefore it is necessary to be able to develop
here is the Spiritual vision
into the structure of any signal
which concerns your age

that's why it arises
the following axiomatic methodological principle ^{so to speak}

where the axiom is that this is it

exactly as the nature of information so to speak
and methodology is action yes
in this nature

that in rejuvenation management
precisely at personal request
must be considered
how much is your desire
corresponds
from an external point of view
even if it was a completely one-off
and completely random

and when you start watching for example
these controls
so you were walking somewhere down the street
some person looked at you
he captured Reality
at some specific point yes

then it turns out
to make this Reality mobile
This person needs to actually agree
what are you for example there are even younger ones there at the moment
because it was unusual for him at that moment

and it turns out how to convince him in absentia

that's why I think we need to develop
namely the system including
transfer of educational technologies
in a direct, as if absentee, way

because it works here
that you can convey the structure of knowledge
to this person
that it is possible
what is this all about
about simply regulating the system of communications in the World
and everything and you become somehow younger
in his Perception at this moment in time

then here they exist
specific principles
transfer of this information

as soon as you find

it is not necessary to find a specific person there

just find signals that ^{mean} they exist ^{yes}
you have in development information
and transmit via these signals
in a unified ^{way}
into a single image of a person
to the level ^{of} the right hand

you can put ^{it there} mentally
sphere of Eternal development
and let this sphere
in the physical body of man as such
it just starts ^{to} diverge
and in fact ^{it turns out to rejuvenate it}
this is what is special about this situation

i.e. if you found
methodology of rejuvenation of another
by its action
you are actually rejuvenating yourself

then you don't need to explain there
he is convinced from personal experience
that he's just getting younger

and when you are around you ^{there let's say}
rejuvenated all communication systems ^{yes let's say}
from the point of view of the people there, ^{for example}
or so they did it this way
that the plants there became greener for longer periods of time ^{there}
animals are younger, etc.
then here you come to the same thing
as God works

i.e. you are actually around yourself
create
some system of standardized time
at which point all processes are balanced
and there is no ^{for example there are} old age structures

i.e. there is a standardized time
which is characterized
precisely the concept of "youth"

then this time can be increased
it is possible ^{to} develop it

you can give it some characteristics
or give some specific level of youth
there is a specific age for example yes

and leaving by this time
create this accessible
for an intensive level
control field

once you are in this control field
entered
All
you have entered the structure of rejuvenation
and you are there

the more time
you are in this system
the more you rejuvenate

This is where I end today's seminar.

Thank you very much for your attention
