

GRIGORY GRABOVOY
The Doctrine of the Resurrection
Resurrection of the Soul
29.12.2004

The topic of my seminar today
This is my Teaching about the Resurrection
Part one is Resurrection of the Soul

so in this topic I show how
use the technologies of the Human Soul
so that a person can technologically do it
using a tool known to him
could resurrect and systematically there
any other person who has passed away before
and prevent departure
i.e. well, any problem close to this, so to speak
another person who lives

i.e. it means that in this context
resurrection structure
it is still like a structure of a kind of current action
i.e. we act first
we don't give a person the opportunity there, for example get sick there
we don't give a person the opportunity
to have some problems close to leaving, yes

because the Soul is basically designed that way
here is the capture of a kind of preliminary control
information of the Soul
coming as if from the heart
the principle of helping others always works
from the point of view of the other not leaving
and didn't even get sick by the way

here in the Soul there are very clearly worked out
these are the mechanisms
therefore the technological nature of the action
denotes preliminary control
related to real technology
which seems to exist simply already exists

we can of course strengthen increase management
add some additional factors there
but in this case we are considering

first of all, what is there at least

then when the technology works
actually help yes
to another person to all people at once
we are already moving on to the technologies of actual resurrection
under the conditions of a sufficiently specific descriptive model
process
the interaction of this process with all
for example other control factors
well, like the external environment there
some situations are random as it were yes or there are not random

but the Soul is constantly present
in this management environment
i.e. the Soul is actually in that real situation
that the structure of the external and internal worlds is constantly changing
so there are essentially no real problems here anyway

so it turns out that we use existing technologies
having his own previous experience of managing the Soul
in seemingly ordinary situations

although obviously every person has these situations
when it acts as if in a resurrective manner
on another person
but maybe he doesn't really notice it

and therefore it turns out that we must identify
still, here are the details as if in a person's action
when a person practically means
makes for example the process of resurrection
i.e. it anticipates certain events yes

so it is possible in future events
he actually kind of resurrects another
i.e. does not let him leave, etc.

i.e. we must have this process
namely the technologies of Soul control for resurrection
should still be considered in the context of real life
ordinary life of any person

considering that the more there will be
external information and attention

to the processes of resurrection
the more technologically advanced these processes must be
we must show
what in a natural situation in a normal situation
the person is generally quite capable
make for example resurrection elements

as if without entering into some special states, for example Yes
i.e., as if working in some internal control field
well, the same one he lives in
that's in terms of my ordinary life

therefore, Soul management
after all, this is also a normal control angle
i.e. which is characteristic, generally speaking, of all people

i.e. we don't make any special secrets out of it
we are not saying that we should not say
there is some special complex technology here
this is exactly the management of the Soul
this is a natural real technology
This is what we are starting from

and based on this there is a series , for example there are axioms of Laws
and for example there are no technological actions
which in principle fit in, generally speaking
simply into the sphere of human behavior as such

i.e. here is the revelation of the spectrum of the Soul
it's still management
first of all, in general, a person as such
from the point of view of, for example, there
some of his promising information

i.e. the theme of resurrection is important here
or the resurrection aspect
see in total for example Yes
with any human actions

Well, the Soul does almost all the work, right?
and often at once
i.e. she doesn't often excrete
for example, here are some aspects of management
some one as a predominant aspect

and in this regard we believe
that we should say more subtly, more precisely, so to speak Yes

to see her is actually ^{like} feeling her
at the information level
there is a feeling at the level of feelings , for example yes man

and at the information level
you can also, in principle, ^{feel} it

here we use
technology of translation ^{as if} transcription

known systems for the human body
on the structure of the Soul's work

i.e. we must also
for ^{example}, to be able to manage conventional technologies
that's understandable
be able to work with technologies that
^{generally speaking} well, in normal everyday conditions
just ^{kind of} inherent to humans
a person perceives this as a function of the personality of the body, ^{so to speak}

and the concept of "sensation" ^{there} "premonition" "feelings"
he perceives some subtle level
how exactly is the internal level
often does not connect only this with the Soul ^{yes}
or with the state of the Soul
and often, ^{for example}, he thinks that this is a certain feeling
from a combination of factors

such action exists only for the Soul

so we have to ^{kind of} project
transfer this to the structure of the Soul
and try to understand here
i.e. specifically apply this to the actions of the Soul
i.e. the Soul works simply like a person, ^{so to speak} Yes

but there is also a far-reaching factor here
it is clear that the Soul ^{is} constantly involved
in the creation of man
but here is a very important point
which speaks about that
that as soon as we ^{define} such a technology
then a person gains a powerful level of knowledge
which is ^{generally} quite clear
translates a person
into the system of Eternal development

because when a person sees
that the Soul works the same way as he does, as a whole, yes
including the physical body
at the information level
the same information exchange processes

then it turns out that it works
Well, if you show it in the optical field, for example Yes
if the optics of the manifestation of the Soul
this is so let's assume geometrically here
and the optics of the work of the human physical body
here well there is a distance of about fifteen centimeters
by the way, in optics this is what actually happens in control
it means because here we should see
that this is an optical process
which is perceived by you, yes
well, in the form of white glow elements, let's assume

then what difference does it make in the end
if we begin to bring them closer together by an effort of will
there geometrically
and as if in a circle to bring out the optics of the work of the Soul
on the optics of the human body

i.e. as soon as we have one optical model
as if we were translating to another
then in principle we get everything as if Well as if the ratio
i.e. for example we take two balls, two spheres
we put one on top of the other and see the difference right away
what is the difference in the general action of the human physical body yes
general human personality
and just Souls

because in this management it is important to highlight
namely the work of the human Soul
specifically the optics of the Soul in general
not just optics but real Soul

i.e. a person must feel
that he works specifically with his Soul
and he must understand and know this
that no other level of management
basically, just like in linear management
he is not participating

that's why this is precisely the control system

which should again use a similar mechanism
such as there is a feeling or sensation
that's how a person is in general

that's why this is exactly it
that the sensory system is relocated
to the level of the Soul
this technology consists of the following
does it mean from the point of view of axioms
what the human body perceives as the Infinite Environment
The human soul perceives
as exactly the final environment
which comes into contact with the human body
it is in contact

it could be skin ^{there}
this can be at the level of Thinking, etc.

and it turns out that this is what
here is a transcription of a sensory image
this is a projection of the Infinite phase
Perceptions of Human Thinking
to any area that is nearby
i.e. on a skin area

i.e. we will see the first point of contact of the Soul
and the physical body of a person ^{yes}
based on this we exit this contact there
to the comparison level
how the Soul feels
and we show that from the point of view of fundamental aspects
for example Love Infinite system
means both action and management and as such
it's like just information that exists, so to speak Yes
independent information

here we start near independent information
means to set control

that's why we are striving for an independent factor
to such as Love
because there is a certain level here
which allows you to find
points of contact between different systems

and through Love it turns out that this is how through structure

there is a segment of the construction of the World
in private
and in general
we are starting to build further management

therefore the element of primary contact
is Love
this is exactly when the Soul touches the body
Well, this is, in general, a fundamental Law of development
God first builds governance through Love
first contact with a person
it also happens through Love

therefore the elements of resurrection
here is the resurrection technology in this case
consists in the fact that
that having considered the level of action
Love level of action

Love of the Soul to the body ^{yes}
and that means God to the body and to the Soul
we get that we create a platform for the resurrected
we create the level that is for Love
that is precisely the technologically expressed control system
which is built around Love

the resurrected one will definitely come to this level
because here it is precisely the resurrected one
that's what's interesting about this technology
the concept of "resurrection" comes down to just that
what we know is that the resurrected one will still be here
in this place

after all we need to look for a place ^{yes}
we must find a place time
so that's why it turns out that to this form
where Love is ^{as if} concentrated and spread
on the physical body of a person
on the Soul of man and on God it turns out at the same time ^{yes}
from the point of view of Love as such

on the contrary, if we consider the beam
those. vector change control
then it turns out that the resurrected one will approach this point
in some place
here we are expressed in some place
we are beginning to understand

Laws of functionality of the human physical body

i.e. the personality where it is determined

Soul

Spirit

Consciousness yes

human physical body

Well, other attributes of personality

so it turns out that it is precisely the physical body

resurrected is characterized

physical body and everything else

just like the personality of an ordinary person

it turns out that we need to determine

basically one parameter

physical body

to identify the resurrected

near this spectrum of Love

and based on this, here is the action of the Soul itself

then the action of the Soul is clearly revealed

this is precisely universal Love

this is the contour of Love, so in fact yes

well, which is clearly imposed on your Soul

and this contour touches

at the point of such a stationary Action of God

with the whole world

i.e. it turns out that we have on optics

that's basically it on the optical level

this is, in fact, a very clearly defined line

optical control system that comes from the Soul

it means it is manifested in the form of a certain connection

with the whole outside world

and it is universal Love

This is the primary control level contour

that you are working with the information of the Soul

i.e. this universal Love is this glow

specifically having a geometric level

Well, there 's no one there means cones

or even there is one there that is shaped like a plow

that's how I describe him

i.e. it turns out that this level
as if it dissects information
or rather, this is how it interacts with information
at the same time, it's not like he's cutting off or scattering anything there
like he 's standing still

i.e. this is how God is built too
from the point of view of universal Love
He's not moving.
It's in terms of exactly what Human Perception is
God
His Love is present everywhere

so it turns out that we have this general opinion
why are opinions different or opposite yes
because as soon as God gives action
It gives absolute freedom to the next action.
and the next action can be absolutely anything

because this is the system of universal Love
this is the construction of external Reality
An infinite level of ways

and it turns out that well for example, a negative opinion is possible
there is an opinion that can of course be controlled
for this you need to go out and generally need to control
and make it so that it is not carried out, for example
For example at least there was
or softened or absent altogether

but you need to get out somehow
into the internal system of external information
i.e. we perceive all external information
as an activity that in a certain sense
similar to human activity

i.e. we model the system like this
that the Soul shares the entire control system
on the Soul control system itself
where the outline of universal Love shows
the Soul itself actually begins

and this is the glow of the Soul
inside we project into external Reality
and from the outside we get the structure of a person

at the same time, not one that is necessarily located here
and ^{for example,} it definitely only affects you personally
he can act on the idea ^{there} etc.

and this man is absolutely clearly manifested
in the form of some specific people events

and it turns out that we have ^{a kind of social model}
from the point of view of that
that it is precisely this external social model
She actually acts like a human being.

i.e. the Soul perceives another person
a completely different situation is personified
i.e. just as if it were a human being acting

this is an important characteristic of the Soul
it is through the sensory level of the Soul ^{that in fact}

i.e. the Soul perceives the external World
as the structure of the action is the same
as if she had contact with a person with some

i.e. it turns out for the Soul
any process is alive ^{yes}
that this is a human action ^{there,} it is clear
the person is alive

any living system ^{is as if it were} a given
but when in contact with any other system
at the level of ^{the} sensory plane of development of the Soul
subtle plane
although ^{well} the Soul is like ^{some kind of "subtle level "} ^{yes}
in quotes or you can ^{just} perceive it that way
but nevertheless there is an even more subtle level
namely the Perception of the Soul

and when you start to look at this system
already on myself
it turns out that you have practically
^{Well} ^{as if} the next control context

you are transferring the external management structure
^{as if} inside
that's to understand another person
I need it ^{well} ^{how to accept} ^{yes}
i.e. his information must be accepted or at least considered

but there are information flow systems
from person to person
as if completely unconditional

why one person
can always save another and all people
because it is always there
in the control center of the next
where is the best event forecast event optimization

this is where it's important
next action of the Soul
this is the level that comes from the heart
The soul constantly gives control from the heart and shows
it mostly looks like this
that the beam comes from the level of the heart
here in the area of the coccygeal spine
a little higher ^{there} sometimes lumbar
sometimes the cervical region is ^{like}
here comes the element of glow
which first stabilizes a person as much as possible
in his future events

i.e. in reality, when two people meet
this level of improvement is happening ^{in general}
and it always happens that there is a general improvement

then the third motives begin ^{yes}
as soon as the meeting ends

contact levels start to go
contact of some kind
or contacts with the external environment
^{there} with the plant world, just ^{there} with the air

and that's when a person comes into contact with other people
there is always a level of positive action

i.e. the next Law of the development of the Soul , so to speak ^{Yes}
into the structure of a person
this is the level of positivism

i.e. one Soul always helps
to the human physical body at least
but then the question arises of helping the Soul, ^{yes}

i.e. here is the next question
because the other Soul acts similarly

i.e. the physical body
help is accepted virtually unconditionally
because the mechanisms of Eternity
constantly improving developing
and the body becomes as if more and more Eternal in a person always

and the Soul is already Eternal
i.e. there is a uniform level of interaction
with a kind of counter control design

and here the same factor arises
the same as God and man
i.e. God gives the Soul of another person the same systems

but considering that the Soul is Eternal
as if He practically gives to Himself
He receives the return signal himself
He's just looking in this case.
only the level of development of the Soul

it turns out the next status is the level
Well as if an inner glow
By the way, this is the control
gives a level of such a fairly specific glow, so
which allows you to simply increase everything
the level of knowledge development there
in terms of exactly yes , resurrection technologies for example

and it turns out that this is the level of Love
which exists as if independently in man in general

i.e. in every person there is a certain level of Love
which just exists and that's it

and that's when you get to it
it is right in the center that it is located Soul
from the point of view of all points of view
i.e. when all people all information systems
pay attention to the Soul of man
then it turns out that we have this glow of Love

and it turns out that you are actually
here at this level of management you come to that
that then the resurrected one comes to you

this is what I got to
I just took the external control model
Love
and brought this system
to the level of simply having the same management segment
but in your soul

i.e. when you transfer control to yourself inside
i.e. in principle you don't do anything special
you just find it in Perception
this element that exists in the Soul
it is natural

and when you find
in technology it looks like a transition system
here, for example, is the one I just marked

then you are already sure
that he is already coming to you resurrected yes
because you glow with the same
Well as if by universal Love yes
which exists simply by itself
she doesn't need that
so that they would remember her there or activate her somehow
or said that it exists
every person has it and that's it
by the way, this is a powerful level of healing for the body
it's like even a body construction

at this level a person sees how his body is being built
i.e. it is directly visible how the construction processes are going
own physical body
and they are at the very basic level
i.e. it is actually the presence of the person himself
at the point of its creation according to logic

then it turns out to be the person himself
it is practically a very clear level of management , so to speak
well, some kind of such a system of education
and with a fairly clear training system
when you know that you have enough
information and management of own management
seeing what is happening to you
how do you actually build yourself

as soon as you start spreading this information

to the level of any information object
anyone just there
it could be some kind of tree there
which is needed ^{there} for it to become healthy
or a broken ^{tree} or an old tree
or ^{does it mean it} could be any person at all
then you show it instantly
maximum system of knowledge

and it turns out that then a person
^{in general, it suits you accordingly}
having gained technological sophistication

i.e. he sees that you are passing on that knowledge
which firstly give you the way on the way ^{means}
to the transfer of your knowledge
to this person

and on the other hand a person is walking towards you
because he sees this radiance of Love
he sees technology that is built correctly
because you can build on other aspects too
^{Well, in general, you can of course build it correctly}
and you can always build correctly
if the main thing is the focus on the Eternal life of man
just here
I mean correctly from the point of view of that
that Love is always right
^{as if} the criterion of Love itself is correctness

and when you start to see
it is precisely the movement that is towards you
human
then here you understand why he still
^{Well as if} always resurrected

i.e. here is the concept of "technologicality"
i.e. transferring it ^{to} a state of resurrection
absent

because this work was done by God
^{Well as if} for you in this technology

because you see the structure that unites
Action of God
the man himself resurrected
i.e. for God in contact here is the concept of "death"

generally speaking it does not exist
He has no concept of "leaving"

p therefore for God
this person is defined from the point of view of a person

i.e. if God would just take and look
through for example there is a person there
He would define him as a resurrected man.
because for a person there was, for example there is a care option yes
i.e. for God it is a rather conditional concept in general
and it turns out that
as if God appoints this term but through man yes

so the term itself is "resurrected"
it means a term assigned by a person
let's assume Well there Well, the man said that "there is a person leaving"
there is for example there is some kind of biological problem there
there is the destruction of man

if it means radically human
this removes information from history
i.e. such a phenomenon does not exist at all, yes
at the information level
then it means that these phenomena did not exist

it turns out that, well , firstly, then the person does not die
secondly, a general resurrection occurs

i.e. this is something quite fundamental, yes
withdraw
Well as if something negative is fundamental
remove from the system of personality
and you find yourself in that World where
it's not like it's transporting you there or anything else
but you just get there in an informative way
and this information becomes Reality

i.e. in this case resurrection
well actually from a human point of view
it really does look like a resurrection

considering that objectified is
For example there is the fact of a person leaving
then you just do it through management
that these concepts are disappearing

and only then the level of a living person arises

All

there is no other concept yes

i.e. we through this technology of action of the Soul

we can radically change the world's information

only information of life

because the Soul is only life

and therefore if we disseminate information

to the whole world

it's clear that everyone is resurrected

at least at first those who are closer

at the level of the Soul's action

well, let's say those people who are engaged in

from the point of view of resurrection or meeting with the resurrected

so it turns out that for the Soul

that's the concept actually

there is "time of resurrection" "duration of resurrection"

As such, such a concept generally speaking does not exist

from the point of view of the Soul, a person has no True understanding

when the Soul understands God

here at this level of management

man is always resurrected

i.e. it is enough to just start work on management

he is already resurrected

if you just have a thought there

a person must be resurrected by some

everything he hits right away he should hit

on a person already resurrected

from the point of view of Soul technology

it's just a fundamental Law of Soul management

man is always resurrected

because then the Soul acts correctly

just like God works

and then this moment arises

and where is a person, for example, from the point of view of Consciousness, yes

was there at the time when it happened

fact of leaving

then the fact of resurrection

like these are all kind of third moments

so there is such a level here
God created everything
from God's point of view there is an explanation for this moment

please can you contact God and ask
and God will explain every detail
there for example such and such microsecond of such and such time
where was the man

but there is such an aspect here
that there is a very clear level
the next as if control
that God is the Creator of both time and process

i.e. what are you actually doing in this process
you negotiate with God
for God to do something specific

because for God there is no longer a clear level
in the past even
If you go out, then that's your point of view.
i.e. you are trying to get your point across
to the level of, as it were, the realization of events even of the past, yes

i.e. because for God everything is the same
what is the past what is the future
that's understandable

and then the question arises again for you
why do you need to know this area
that's what it gives you yes

considering that in the system of collective Consciousness
naturally such questions exist
there a man died some time ago
then he rose again
and what happened between these two events ?
this is just a normal logical level of collective Consciousness

it turns out that we must then clearly define for ourselves
why do we need to touch
with some kind of story and some kind of action

those. history is manageable
those. any action
this is an action that can be corrected

according to technology, again, for example, Eternal Development

in general, you should always strive
namely, to make management in the direction of Eternal development
often the controls are very clearly defined
and very simple namely [...]
precisely in the direction of Eternal development
i.e. it kind of develops there on its own

so it turns out that from the point of view of the Soul
here is the management of the future
this is still management of the future, yes, in fact

and here all aspects of action are very clearly directed
to organize a kind of system of past events
management of the past

because we are still connected
Well as if in control of past events
so it turns out that the structure of the future
determined by how the past is built as if in Infinite development

for example, we have many aspects of construction
well yes, the past
past events may develop in one way or another
why are they developing exactly like this now

from the point of view of the fact that past events
for example, the organization of the Earth is also a past event
and why in the current time we have
this is the system of Reality

so it turns out that here we can do very
define your path very clearly
our personal path
this is what we did
see your path from the point of view of that
how God sees you in action
what's interesting here is exactly this level

and another one is looming
the fundamental Law of the Soul's action
namely the actions of the Soul

i.e. the Soul can always explain
Always
why do you need to know some information

from the point of view of your path

and here if you need to know there
that in this microsecond

find out
but find out knowing how the traffic is going ^{there}
of your physical body
Souls
Spirit
Consciousness
in general, all elements of personality
precisely in Eternal development

then you will have applied knowledge, it is useful
and from the point of view of Eternal development
there knowledge becomes fundamental
not only applied

and it turns out that here you see
^{as if} the tasks of the Soul
when the Soul sets tasks for itself
and at some point she herself decides them
sometimes quickly sometimes ^{later}

so that's when she sets the tasks herself
this is also the Action of God
for the training of the Soul
^{Well as if} in the Infinite Future

i.e. she somehow manages
take information from the future
it itself ^{sort of} converts this information
^{Well, if you consider what there is,} for example there is the hand of the Soul
^{well if there is Soul Perception}
^{Well, let's introduce the term "Soul body" ^{yes}}
that which corresponds to the physical body of a person

and this one ^{is like a worker of} this level of management
your Soul
She is always making up something for herself
she decides it herself

and the question arises why she is making this up
it's exactly what she comes up with, a more subtle question, ^{yes}
and that's what decides

Well, why is that clear?
there is a certain level of adequacy of reaction
to the outside world
he is absolutely clear
there may be sometimes it is primary
in some actions

but the outside world
The organization's structure is arranged as follows
if we consider the position of God's realization
then before the start of the whole organization
God was still there
Humans also have this level
and the Soul also has such a level

i.e. the outside world
it's ^{like} in this case as an aspect of management
but it is not fundamental in this case
management aspect

the main thing is what a person initially wants
generally speaking from myself ^{yes}
what does he want ^{anyway}

and it turns out that right here
It is important to identify the next level
that in the sensory Perception of the Soul
there is a level of ^{some} kind of prognostication
what for the human body ^{well} the personality as a whole
means prognostic level
i.e. the precise level of control
and not only there sensual or intuitive

the Soul also has ^{a kind of} external level
when the Soul perceives
external information quite clearly

Well, it's clear that ^{for example} you can do management there
get clairvoyance ^{there} clairvoyance controlled
precisely by the Soul
This is an applied technology

and as such the Soul exists in that space
what is the external aspect of management
from the Soul
which determines the accuracy of its development

i.e. the Soul has preliminary information
as if from the outside world
but considering that the Soul means it exists

in different information systems
in general, in all of them, including
then the outside world is for her in principle
that's basically it
its own management segment

i.e. a person can always find
own management segment
in any system of the external World

and then he understands that this segment
he is there
where man interacts with God
but in the distant future, in the Infinite Future

i.e. any search engines there
they eventually come down
to the interaction of man with the Eternal Infinite
with an Infinite level of future developments
or future events for example Yes

but there may be developments as well
not only events
namely, each event develops instantly
there actually

and it turns out that as soon as a person
touches something there in the future
the situation developed immediately
it can't be static at all right away

but it turns out that the next level
this is already development
i.e. a level that again depends only on one person
its internal stability
this is management as if on a general level

i.e. a person finds himself in such a dynamic environment
that from one interaction with the environment
the environment constantly increases control at every step yes
changes

and here it turns out that the management of the past
it is actually quite possible to quickly optimally
and the main thing is that here, after all, something systemic exists
and there is a level of system management

because by analogy
i.e. if this is possible
in relation to the Soul
This means that this is also possible in relation to information

because all the information is built
on the first level
at the same level as the Soul of a person
by form of action
i.e. if you look at it there is a river and there are rafts there
or let's say two climbers are descending there
then they descend synchronously
and the rafts float in sync

and so that the raft does not float to another
to the other side
they simply either tie him up or negotiate
initially with the words yes
that they will not swim across this river

then it turns out that this is the agreement
i.e. the primary meaning of the word
this is an even earlier level
from the point of view of this logic

in fact, this is the current level of management
but it turns out that the pronunciation of words should have been done even
earlier, yes
some agreement some action
if the climbers descend
or mountain streams descend well as if independently

after all, someone defined this action
for mountain streams it is there that God has determined such an action
For example there the climbers could have come to an agreement or not

but there is some preliminary information
which
Well, I brought climbers as an example
just like there are naturally rivers and streams there
here we must keep in mind
that there are some earlier levels

than all possible actions
in the Soul this level of course exists

and that's why when we see some dream
then if we consider the fractions of sleep
as if it were the texture and material of the dream
at the level of relationships there is Soul-sleep
The soul as a tool for sleep research, let's assume Yes

then it turns out that the Soul
Well for example, if we want to see our dream there
there 15 years ago on such and such a date or any
there on January 1st for example 15 years ago

so we watch a dream
what was there in the interval of two or three hours
what information arises

pay attention here
what occurs at the optical level
information of the same type as that information
what is the action of the Soul at the Infinite level and in such a way
that here the action is back and forth almost simultaneously

i.e. super speed as if Well, it's not expressed
precisely by dynamics
but as if expressed by statics

i.e. we are at a certain level somewhere Spiritual
speed as we understand yes
but we have optics, well no matter how we do it
i.e. optics are almost there at a very distant level
somewhere in the Infinite Future

i.e. sleep is a level of information division
as if external yes actually sleep information
and what's more, you're just reacting
on your Perception
how did you perceive the signal

'S assume that we are there in a dream
how did you count the information
You didn't move anywhere, your body is static

and it turns out that if
Well let's say if we ask ourselves the question here
how does god sleep for example yes, what is God's dream

so then it turns out that in this case by analogy ^{yes}
for Him
only the level of some division of information
and for God to sleep there and approximately the same way as a person does
He must introduce a division ^{as if} artificially

i.e. He must create the texture of sleep
and sleep as a system ^{for example well,} some action of Perception

it's still a system
which is like ordinary information
it interacts with the human Soul ^{yes}

and that's why when we Soul
we begin to draw the outline of the dream
^{let's say we need any sleep there}
or even any element of Self-Perception
consider

then we see that here is God's Action
the same as the action of a person ^{as if}
in household control systems

i.e. God to separate one information from another
should behave exactly the same
how a person behaves in everyday life
^{there is} differentiation
^{there} he drank a glass of water
he did something with his hand
he walked somewhere
here is the same analogy
God acts the same way
from the point of view of God's action in general
^{it means} in order to separate some information
from some
from the point of view that He thus forms
the same perception as a human

i.e. God has the action of His Soul
and a person
in this case synchronous

i.e. if you want to see
^{For example there} is this action ^{of sort of} division
that's when god does something ^{yeah}

this is how it happens in normal situations, this is the feeling
that He is always present nearby
something does, moves, etc.

but then everything is very simple
just look at him
through this level of ordinary events
but God is Eternal
It turns out that it does not carry any information about destruction at all.
there is some kind of care, etc.

and therefore it means when you know how to work like that
for you to find just the place where the resurrected one is already located
it's just for the sake of use
means and properties of the environment
from this position

the Soul acts in the same way
at a subtle complex or dynamic level
she constantly reaches the level of action
where the resurrected are visible
i.e. where living people are visible
i.e. where there is only life

here when approaching this level
going through a phase of one's own life

this is this phase of my own life
this is the description of the Soul
i.e. you can take it and read it there
what are the tasks of your Soul
you yourself appointed them for a certain period
i.e. the path is clear

then it turns out that you see clearly
where should you go to meet the resurrected one

i.e. it's one thing that the structure turns out to be quite strong
why are you glowing like I said
level of inner Love
and the resurrected one knows where you are
and can come to you yes

and at the same time you can walk through your Soul
as if on some canvas
and be able to do such control, for example
do we see here ?

this external control structure
when in principle this is the action
exactly as if your movement and
and when the resurrected one comes
this is a certain road
which generally speaking has no other options simply

because there is no discrepancy
the resurrected one goes along the external aspect as it were
actions of your Soul
and for example, you are already proceeding from that
that you see your own path
as a structure well as if differentiation of information

and when you start for example
let's assume that the information is divided
i.e. you are just like I said
God tries to suppose some information to separate yes
one from the other

then it turns out that based on this it means
you see that we have , for example, an action like this
what is the differentiation of information
those. the movement of information itself
this is still a certain choice, then

and in general when this choice
it begins to be produced by you as if in continuous time
actually yes with Infinite speed
then it turns out that you have basically the same path
the same as God does
when he differentiates information
when he is there like me well I gave an example for example sleep yes

if you want to understand
how does God build a dream?
then He also somehow differentiates
for your Perception information

it's also very easy to learn here
Well in general Well how to simply differentiate
like the following kind
that you can, for example, do the management yourself

Now go ahead and make the controls
by differentiating the information that is in front of you

i.e. you choose such control
that the Soul acts in the same way as God, for example
begins to differentiate information
and chooses only the structure of resurrection
precisely from the point of view of this technology
try to act like this now

it's quite a tense action
i.e. here it turns out that you must definitely
as if a process of resurrection
how to make it completely unambiguous
i.e. it turns out that here
namely a meeting with the resurrected one
absolutely definitely

it turns out that in principle this is what arises here
This external one is quite powerful
is it a control element ?
including through the physical body

i.e. keep in mind that here
differentiation process
this is an action and the physical body too
i.e. you perceive it on the physical body

so now put the control
that the systematic nature of the meeting with the resurrected
this is the correct differentiation

and stabilize the flow
what is a mandatory meeting mandatory meeting
Don't move away from the level of systemicity

i.e. it means that you should meet
Anyway
here is the important point
because working with the Soul implies
the meeting is still mandatory in any case

there is of course an element of external Reality yes
as if in the form of some kind of optical expression
try to make this element
was not projected to somehow shift this event

i.e. monitor the sphere of external action
it looks like a sphere infinitely distant

as if from you

i.e. work more now
exactly with the Soul exactly with the Soul
control the optics of the Soul

After today's seminar, it would be advisable to study optics
right now, by the way, when the optics were installed, ^{yes}
^{for example} for all participants
who will be there to watch the video
should also be controlled
They installed it when they already had control optics
i.e. this one is closer in color
well, to such a bluish light color ^{as if} in control
primary level of management

then you can build coordinates
i.e. where the resurrected one should come

so now you build coordinates in this system
again the choice of the Soul
just like God does
very quickly chooses correctly chooses

i.e. it's ^{like} you're just walking
when you walk along the road somewhere there is some path
you choose something very quickly

and in principle this is a special action
still of the human physical body
because it turns out that a person in this action
should be in static ^{yes}

generally be in one place calmly
do not move, etc.
or a person can walk slowly ^{there}
there are no speeds ^{as it were}

but nevertheless the speed of the Soul's work is very high
interaction is in progress
physical body and soul

i.e. you have to see it here
special level of adaptation of body and Soul
i.e. interaction is also important

i.e. that's why you are now trying to work like this in principle

so that your physical body would have time to do so
perceive information

there is super-fast information of the Soul's actions
i.e. to receive information with the body too
the body is the action of the Soul, including yes
for example, it can be considered as part of the Soul

so there are no unusual situations here
basically there is not even a transition
but try to see how in this superdynamics
the fastest possible action of the Soul
perceived by the body

i.e. in this case some effects are possible
there, precisely , an increase in the thermal energy resource of the physical body
, etc.
i.e. some such manifestations are quite possible

i.e. and therefore
so it turns out that here
in fact, at this level of management
your body adapts as quickly as possible yes
to the structure of the Eternity of the Soul

and then the Eternal Soul
interaction well with your body interacting
shows the way to the resurrected one it turns out
it works as if on an infinite number of systems
i.e. your body
the way of the resurrected
other bodies, etc.

i.e. it works in a similar way to that
how does god work in general
i.e. shows movement to all levels of Reality
by target management

already to the resurrected person
which is moving towards you
then of course this energy resource becomes high

by the way, this is actually quite strong
health system
and a large number of people
or you personally , etc.
the ability to perceive the body's ultra-fast system of work

therefore in this management
make it faster again
i.e. a quick meeting with the resurrected one
coordinates are known
he knows where you are
you found it in the information
here he comes to you, agree on a place

as long as we're talking about the location
the time is as if known in advance
time is your way yes

i.e. now do this control
I will do it together with you

when you do this management
try to do it this way
to have planned and here or having carried out
as if in the space of future events
meeting with the resurrected
try to make your own actions yes
were clear enough to them, as if from the outside

i.e. what do you want to do, let's say
from the point of view of distant prospects, yes
example , how are you going to behave with them?

i.e. you must clearly define the social program there
or eventually define them down to that
what political program
who are you voting for there what are you doing
so that everything would be clear to them

and in the long term, in principle, it turns out
what for resurrection processes
the process is more favorable
when earlier political systems emerge
Well there are forecasting systems

so if we proceed from this, for example
why, let's say, announce earlier about some situation
for example, the fact that I have been the president of Russia since 2008
I am showing this information
because this process is quite clear
there it becomes for the environment
that my more distant realizations are there

so it turns out that this is like a goal
which will come true in any case
in any combination of events this is understandable
I declare my own construction
it's absolutely clear
i.e. all the control structures are clear
and it becomes generally clear
how does the situation work out then ? For example

so , in principle, I think here
this is exactly where the question arises
in relation to each

i.e. everyone determines their own position
control lines become revealed
just like ^{from} God
He created Eternal Life ^{there}
and accordingly everything is clear when it comes to God

it's about what a person should mean to follow
Eternal development
and that's all
there are no options at all, as it ^{were}
logically at least accurately
but Spiritually this is known to everyone from birth
to the level of development of the systems of Infinite Life

i.e. it turns out that from the point of view of management
is very important
i.e. Spiritual level of understanding
Spiritual action
Spiritual action is also super fast

i.e. when the Soul works very quickly
aspects of Spiritual action arise
action of the Soul
This is the Spirit of development among other things
and the Spirit of Infinite Action

because if the Spiritual aspect is defined
as a system of interaction

for example, the Infinite Soul
with Infinite level
then it turns out to be the Infinite Spirit
where does the concept of the "Infinite Spirit" come from?

Resurrection of the Spirit

so in this part of the lecture
my seminar today
This is my Teaching about the Resurrection
so I show the technology of resurrection by Spirit
i.e. how can you do resurrection
through the control of one's own Spirit
or through the same way as your own Spirit
managing produces resurrection means

and therefore in this technology
The following needs to be considered

that when we consider
let's assume ultra-fast processes yes
which we saw
that they do act in a certain way
on the physical body of a person
i.e. the energy level increases, etc.
i.e. well, some such systems arise
Well, still a favorable effect

however we need to
these processes are like external control
take under full, so to speak, level of external control
and show that through Spiritual action
we can in principle receive
the same control systems

but here the quality level will simply be different
and some processes can be done more statically , so to speak

i.e. the Infinite Spirit
he has been interacting for a long time
with the physical body of a person
as a system of Infinite action and static action

and it turns out that when we start
for example from the point of view of some Infinite processes
analyze the question
in what way, for example, the Spirit who is

Well as if in an infinitely developed control system

interacts with the external environment, for example

then we see it quite clearly
what if we consider
human action in this environment and in the Infinite environment
it turns out that in this environment we have
practically the next aspect of action

that the Spirit practically exists
not just as an element of any external environment at all
in relation to a person
and this is the element that is mainly concentrated
from the point of view of the Spirit itself in general
inside a person

i.e. there is a concept, let's assume there is "Spiritually strong person"
but what is meant is the spiritually strong person himself
i.e. not some kind of external Spirit, yes
namely the Spirit of man himself

that's why it turns out
that when we have the power of the Spirit that is within
again by the way the level of energy is increasing yes
physical body of a person
this is the Spiritual glow that is increasing
there a certain halo may appear around the head, etc.

here we need to clearly define
that the Spiritual sphere is a kind of aura
i.e. what is more revealed
as a projection of the inner Spiritual content
into a structure outside the human body yes

i.e. and therefore it turns out to be a spiritually strong personality
so maybe technologically, for example Yes
through the definition of the statics of the Soul
create for yourself absolutely clearly there Eternal development
only the easy way

that due to the concentration of the Spirit
the location of the Soul is determined
synchronizes with the physical body there
and man lives forever

i.e. it's elementary how the Spirit plays a role here
as if correlating in general at some level
management level

and it turns out that based on this

in general we are considering

why does the Soul give the Spirit such control anyway ?

why, for example, the Soul in general does not perform this action or something

so it's logical to ask the question

and does she perform this action somewhere herself?

She certainly does

but we are talking about Infinite processes

after all, from the point of view of the Soul, here is the optics of the Soul

this is a specific specific optical system specific action

and the optics of the Spirit are like silvery-white shades

well, more like a level there

it is precisely these sparse systems

there then and in principle if the optics of the Soul

it is in system technologies

systemic resurrection technologies

i.e. mandatory systems of meetings with the resurrected

She has this bluish color

well, it's like some kind of transparent shade

i.e. well, such a bluish one can be more well like a transparent light

on the one hand it is transparent light

on the other hand there is a bluish tint in the distance

i.e. this kind of light is generally multi-valued

for the action of the Soul

and for the action of the Spirit this is a completely clear structure

well, like a sheaf of white light

like some kind of flashlight that shines through some cloud

or steam there

and it's not even like steam

because when we get closer we see concentration

and moving even closer we see in general

how the Spirit organizes the human body

i.e. it is still dense matter for a person

The spirit is not separated from man, for example. there in the cell nucleus

that's if we're getting closer

to the atom there

to the molecule

then we look at what's in the atom

then we see that the Spirit is generally inside, as if

and therefore we can, for example, from this atom
take the Spiritual faction and bring it into control
then inside the atom we should kind of leave something

this is the canonical system of action of the Spiritual
that the Spirit always exists as if in one place
in the presence of a management goal

this is the Law of Spiritual Action
that if we act somewhere Spiritually
it turns out that the universality of action
reflected in our personality
i.e. at this moment we are actually
as if in the center of the Spiritual level of the Universe of world governance

i.e. we do not act in a general way
that we kind of take a certain matrix and mold it
and from there we spread the Spiritual action
no, a person always has one spirit
that's the peculiarity
he is also of course one, just like the Soul
but here, although he is infinitely developed, he is still alone

and therefore the Spirit of a particular person
this is his personal Spirit
and the optics are completely unique
it's just that there are forms of Spiritual action there
and therefore the action towards, for example, resurrection yes
this is an action of the same plan again

for God there is no concept of "death" at all
therefore this is the level of human existence
always in the Spiritual i.e. in the dynamic faction

and when it exists there are no problems
it turns out that there is enough of everything here
to come out as if with that level of management
that we are, as it were, in our Spiritual sphere
we find this person

that is, it needs to be found in the Spiritual sphere
own optical level even in general

Well, that's understandable when you're in the Spiritual realm.
find control
it is usually a creative solution

and the systematicity in this case is that
what you will definitely find
because the Spiritual solution
well quite often or mostly
it can be quite accurate

and in principle in this technology
it just has to be absolutely accurate
i.e. we cannot allow
that the man who began the resurrection
from a human point of view ^{yes}
in fact, it turns out that it normalizes
simply brings the World back to Normal
here is the same problem
and "destruction" etc. disappear
this is simply the normalization of the World according to the Law of God in
fact

i.e. well there is a big world
there imagine what needs to be done
some kind of colossally big job
well, take somewhere to a certain level of control
and normalize everything
there is no death, all the more so it means there are no departed, they simply
do not exist
that means they exist somewhere alive ^{yes}

but this is already a process
as soon as at least one person
will be able to do this
a general resurrection is taking place

in this case, when we get close to it
the resurrection of individual personalities is underway
which are, as it were, closer to this process
how does this seem like a resurrection ^{yes}

but in reality, yes, this is a living, ordinary person in a physical body
so he also has the same point of view
another person who is resurrected
he is the same, he is no different

and therefore it turns out that based on this
he should have one too
the same processes of Spiritual management

personal level yes

i.e. as I said, if we pull out the Spirit
from the structure of the atom
we should at least leave something
if we leave some there

Well there is a billionth part of the Spiritual faction
She instantly organizes herself

i.e. the rest goes into management
the other one immediately organizes herself
but we have to leave something at least

this is the axiom of Spiritual management
We must leave the Spiritual system somewhere

the culture of civilization also develops
Spiritual characteristics of a civilization
remain in the form of monuments there in social processes

and therefore it turns out that it is precisely Spiritual action
a process arises here
to concentrate the Spirit in general
what is the power of the Spirit and a strong Spirit
from a management point of view

we just need the maximum amount of substance
actually the Spiritual level of management
where is God's Action
this is the Infinite action of the Spirit in fact

i.e. the Spirit is clear that he acts in an infinite way
but for a person it's like a level in general
Infinite number of events
concentrated precisely in the Spiritual sphere

i.e. we need to increase it as much as possible
this very concentration
and at the same time receive instant replenishment of the Spiritual sphere

i.e. increasing the Spiritual control system
to an external system
should not lead to that
that a person is spiritually there somehow there for example perceives this
as some kind of work or some kind of difficulties
on the contrary, he should grow spiritually from this, and it works out

i.e. we must, in addition to the action itself
bring out the concentration of the Spirit
and also fill it with a control system
actually there is already a physical body or personality

but in reality it is so
we have to fill it out immediately
there for example, another system of Spiritual comparable action
i.e. we kind of increase the Spirit
means an increase in the Spirit of Spiritual action
this is a mechanical transition
through structure
initial action yes
physical body means physical body

and then let's assume the following process begins
that here is the physical body yes
as a transition
into the structure of the expanded Spiritual action
This is God's plan

because through the physical body of man
is transformed
external Reality and internal too

therefore it turns out that the Spirit in this case
fulfills what was originally intended by God

and it turns out that then we have practically
Well, that's enough , actually well, specifically, like
approximate model of action
where we have exactly the approximate
to the Action of God
where we already have a generally well-established mechanism
originally fine-tuned by God himself
where God gives such control to people for example
that this is precisely Spiritual knowledge
knowledge of the Spiritual sphere so to speak
this is a specific path
and God to man
and man to God

i.e. it turns out that the Spiritual level
very stabilizing
i.e. it is quite a calm level by the way
although it is dynamic although there are many elements

there are intersections there
many elements of some action following
there or after-the-next as if
where the following events still contain further events, etc.

it turns out that we can say for sure here
what does it mean exactly in Spiritual action
the original level of the Spirit of God so to speak
Consciousness of God by the way
where there is a man
and the Spirit and man are crossed
i.e. the general platform is as follows
that God who sees only the living
in terms of His further actions there

and generally speaking He created the World this way
what is the real world
where there are only living ones
from the point of view of there Infinite development
in Infinite development everyone lives Eternally anyway
so it turns out that God has
more like on a Spiritual level
this system of action has been identified
i.e. God acts on the basis of all possible technologies
already implemented for humans

and it turns out that this is the platform
where the person is already alive
it is simply in the future
i.e. it is basically the same Spiritual platform
well, a little higher up there in terms of management, let 's say
not specifically where it is more difficult or higher in level
but simply
there or higher in optics as a rule
mechanically superior in optical terms
specifically, for example, in this place it is located
if here is the first platform I show with my hand
where is she exactly now

because by hand as a rule
I generally show mainly optics
which actually exists in management
and therefore
I just show it when I show it
this means that this platform is actually located here

and therefore, based on this, we have in this platform

a specific management system where a person is already well Eternal
he is not he by the way here already even the Eternal
more revealed as the Eternal Man

i.e. the resurrected one possesses
elements or even properties
manifested by the levels of Eternity
just like an ordinary person who never died

and then naturally the path converges
and much more so
because it's one thing to just be a person
it's another matter when he already has elements of Eternity

and here are the differences in principle from the action
when he acts here only with his Soul
there is none at all
because he is also manifested there as the Eternal Man
but he is manifested there as the Eternal
the body can still be considered
as the structure of the Soul after all

and when the Spirit then we can consider another aspect here
The spirit builds the physical body
i.e. we work at the investigative level
but it still remains Eternal

and it turns out that we have to identify here
some other line
why regardless of the level of management
we still perceive man as Eternal

i.e. what is the matter here, as it were
some universal yes or invariant level
regardless of the control system
the same options , so to speak
he is the Eternal Invariant Level

i.e. it turns out that this is a kind of control system
which is not transformed in any way
no matter what we manage how we manage
this is actually the person who controls

i.e. you can see yourself and all the systems of your organization
through this control
and then see how to approach yourself on information
come up

to be sure to meet with the resurrected system
i.e. of course a creative option is allowed
Of course it is possible that there is creative management there

in this case we are talking about
how to develop and how to implement it in general
definitely in any case
it is precisely the systematic nature, i.e. the obligatory nature of the meeting

this is basically, in fact, this is a minimal task
which exists ^{yes}
i.e. any person should do this systematically
but just solve this problem
^{Well} there are usually certain people who start ^{there}
and then it should be a collective task
this task

i.e. everyone should be able to solve it

and based on this it turns out that then
this is a property of society
property of this World and there are no problems ^{there}
we live in the ordinary ^{as if it were real} from the very beginning
it means in a certain World and by God

that all are Eternal and all are already resurrected

^{so} that's why it turns out that we have to
this stabilization system of some kind
to work out
^{well}, some kind of further function of Infinite development
when all criteria exist and they are realized

then it turns out that if we consider
this process
then all ^{well} some kind of catastrophes are possible ^{yes}
small big even all diseases can be avoided
but on condition that this technology is implemented by everyone
again here is the exit for each person
if at least one does not implement
then he carries it inside himself
can carry a very large destabilizing system

because the world is built on equal grounds
you could say it like this
that the whole world works ^{yes}
he acts in a clearly positive and purposeful manner

to Eternal development
but if at least one of the people does not act for example Yes
then it turns out that everyone has equal rights

that the whole world acts in one direction
that one
therefore management at a certain level of management
God gave everyone equal rights

it works until one person does yes
development into the structure of Eternal development
then it can destabilize there
Well, of course, he has significantly fewer opportunities
because the more people do it
towards the management of Eternal development
the more sustainable the development of humanity

but nevertheless he can still
not because he is some kind of criminal there
simply because he doesn't know some technology

and for example it cannot be implemented
in his system of Perception

then it turns out that he is there
some kind of destabilizer but

but then such a person if everyone already knows how
Firstly, it is easier to teach him
the more he can do, the easier it is to learn
these are the Laws that are laid down
precisely at the Spiritual level
namely resurrection actually yes

that we transmit such knowledge on the Spiritual level
that even this last person there
who hasn't learned yet
but he is also definitely studying and will definitely learn
that's exactly the process of Eternal life

i.e. that's why it's visible here
why Spirit super-fast systems and their own here
combines with static systems

i.e. here again the transition to the person's personality
the person who is this one who must learn

he's just an ordinary person
he doesn't do any super fast
there may even be movements of thoughts
maybe he just thinks in a normal way, etc.

nevertheless he must be taught there the Eternal development
to a greater extent, of course, independently
and naturally only with his full desire

this is what is special about my technology, generally speaking
at any level she is like that
but here is exactly what is important
that the free Spirit must learn
with the help of as if well, of my own expression, yes
of one's own desire

and therefore his Spirit of that man
must get knowledge somewhere
which are completely objectified yes
and he should get this knowledge on his own, in principle, as it were

i.e. he must have this knowledge
not that they should have imposed it on him there
he must have them somewhere

i.e. it turns out that this knowledge
which must be somewhere
that's basically it
Well, first of all, the man himself
in the person himself they are yes

means any human action
for example, which is connected there
with his well let's assume the following action
those. there for example there is the action of the human body
this is the knowledge that means on the Spiritual level
determine its Eternal development

i.e. the Spirit of man
it constantly directs him towards Eternal development
Well, logically it is

so to meet here with the resurrected one
as if in the optics of precisely Spiritual action
well, it's kind of whitish, like I said
sometimes silvery
silvery such a whitish color

i.e. the further away, the closer it seems
it has a silvery tint

sometimes they're so bluish, so well as if there were slits of light
this is the level of interaction with the Soul

i.e. the infinitely remote level of the Soul
shines on Spiritual action
The spirit seems to be constantly striving
to your own Soul in its Infinite development

and it turns out that the meeting must definitely take place here
it's already time
here we define the time constant of the meeting

if from the point of view of the work of Soul technology
It is often enough to determine
space constant
and the meeting happens as if time itself
is defined in your path in the path of action yes

then here the time constant determines
this is exactly the path to implementation
i.e. as if the space is unpacked and revealed
where the meeting takes place

The spirit is like this Well, the action turns out to be time
i.e. we begin to see
this internal component of time

i.e. if for a while , well, just like that
for example, a somewhat abstract task
or maybe it's just some kind of peculiar approach

we will take and build such a system
let's take a look at time from the other side

i.e. let this one be well as if some level of time
there is a cone or there is a twisted spiral like DNA
here we see the structure of time, we have identified it yes
this system

and we know that the Spirit has properties
both dynamics and statics

and we decided to take a look
and what events does this time contain?

Well, time is abstract, in principle it doesn't mean much, right?

Well, you could say it's not even the time
some fraction of information

i.e. as soon as there are no events there we consider
that this is some kind of external information and it is not clear what kind of
information it is

to say that time exists separately from events
theoretically we can say but it doesn't give us anything

so if there is time then there are events
where are these events then

so here we are looking from the other side
and we begin to see events
i.e. the specific place where the resurrected one is located, etc., etc.

i.e. it turns out that in the Spiritual system this is possible
because the Spirit has super-fast control systems
so if we can see here
then we can see from the other side at the same time

By the way, this is a very convenient system
for the managing clairvoyance
or there for organ regeneration
generally speaking, for the process, that's exactly it
replacement of information for example there is biological death
namely the information of life, and of Eternal life

i.e. that's because we have this impulse
he sometimes well it seems to be late sometimes
but sometimes he is not late
It is the delay that is more like a different object of attention

if we take one point
and we want to look at another point
on

well from another position of just Spiritual action
to the same point
then we have the same action at the same time

logically, from the static side we
we are building with one faction of the Spirit

Now do this action quickly
i.e. once and did this action

this point
and brought the management here
to the same point
for example clockwise

and look at the stabilization that is taking place
i.e. the Spirit becomes statically active
stabilizes and

but logically we are like , well, is this your detection or something
here is your Spiritual action
by analogy with how the Soul works, yes
i.e. this is of course the action of the Spirit
but still

here on the mechanics of the optical level of manifestation
it looks like the system is like that after all
that is the level of the Soul
and here the silver light is the level of the Spirit already
and for example, this level of Consciousness is bright silver

i.e. the deeper a person goes
towards the structure of one's own "I" and one's own personality
the less he sees other light
except by the Action of God
in relation to him

so it turns out that based on this, for example
we can see that this instant so-called path
to the same point
it is simply the action of the Spirit but universal
i.e. the Spirit acts on one point
from all sides as if at the same time

i.e. we only need one Spiritual object of control
identify
we see immediately the Infinite action of the Spirit
on all systems of this control level

i.e. the Spirit having universal control systems
acts almost instantly on all points

therefore this is the path yes
the path is this
this is the path we see the way

in fact the Spiritual path so to speak the Actions of God
from a human point of view

i.e. we see how God paves the way for us , yes
i.e. His work is actually

from a human point of view
God also does some work
does
paves a certain path for a person yes

then we begin to see this exact path when
which you can already walk along
and through which, naturally, if God passed there
then it's clear that there is a resurrected one there
no problem, it definitely exists there

i.e. we begin to see this structure of events
that the event is done very simply
any object of information
how to define an event
it should be both oncoming and back
any other information
keep at about the same time
i.e. the same optical background
in any light color

and on the other hand this information
must be very clearly identified
from the point of view of the Perception of God
i.e. the place should be a little lighter than the surroundings, yes
everything around

as a rule when the resurrected one comes
to the meeting place yes it is brighter even in optical expression
in ordinary physical vision, so to speak, it is perceived

so it turns out that we start to see from here
from time it turns out we begin to see
place
because in fact we reduce time to zero yes

i.e. because
what action here what action some other
we perceive as if simultaneously

but for now another action is being carried out
some time intervals still passed
for another as if space

we are, in fact, assembling this place ourselves according to logic
by and large, God always collects Himself
we do something similar in this case

and it turns out that we unpack it ourselves
this is the space of action
and that's all

and it turns out that we basically
this structure ourselves
We

the only way we can say
we remember that there are some elements of Reality
which we like
and for some reason we consider them
or more calm or more acceptable

if you delve into the structure of your own personality
then the individual always determines for himself
through the context of one's own choice
the place where a person meets the resurrected

for example, according to some laws defined there
well, except maybe social systems
although there are laws in force there too
a person somehow simply makes an appointment or moves somehow
in a certain direction
choosing some aspects of actions

that's why something does yes one way or another
Well, yes, there are tasks, it's clear
but there are criterial elements in optics

as a rule, these are like glimpses of Spiritual action
here is a glimpse of the Spirit, which means the action is correct, yes

a person determines orientation here
takes information from here
a glimpse of his own Spirit
not just a glimpse
and the Spirit has precise, dynamic, super-fast information, as it were

Infinite action becomes static
All

and static action is already real events
i.e. physical events are meant

and now here we will derive the following Law
very versatile
which guarantees the universal resurrection
and the systematic resurrection of each

Well For example there is an element of biological death there yes
is happening
occurred in humans
then it turns out that a certain environment arises yes
which is kind of very prolonged
i.e. the time of the future when he will be resurrected
as if it was not determined in advance

but here I showed the Law
what from the Infinite Environment
we always get the final substance
element and at the initial point of action

i.e. if we think in terms of time
the resurrected will definitely be resurrected
because this is the Infinite system
i.e. Infinite space
has self-regenerating properties

and we only need the element of resurrection, as it were
consider a point for example there is no care
like the fact that suddenly an infinite volume of space appears yes
then a person should actually logically
resurrect at this very second
or there how a niche should exist
where he didn't die at all it turns out

and based on this
Well, this is closer to it
on some kind of physical model, it seems so
but in reality it is an optical distribution of information
That's all I'll take, I'm just showing the optics
how is it located
and that's all

and it turns out that based on this level

we have in the structure of management through time

that any control
any level in space at all
built as a manifestation of this very Eternal magnitude yes

then and if for example there might be a carpenter there
there build a table there anew and something similar
then a person can resurrect the same person
because there is a level here
that after all, technologies of any complexity
they are knowable from the point of view of Infinite development

even according to this Law
compress time for example
you can get control
for example, there is a person who is engaged in resurrection
It happens that he is busy there for a long time
some other work requires it, for example Yes

and yet in the systemic task
he still has to resurrect
in any case, do the resurrection
i.e. he should meet in any case
with a living, resurrected, healthy person, etc.

he himself should be practically healthy
in the ideology of management

and it turns out that since there is a completely clear canon
that the occupation of resurrection
this is definitely an improvement in human health

if there are any others
it means something is being done wrong
he must constantly improve his health
must constantly improve the events of life their own

by the way, this makes it even brighter
even brighter events
and then it's easier for the resurrected one to just come
at least he has a stable system
the resurrected one will be even in social terms
it is easier to orientate towards it

and it turns out that when we see this process

as if Well, cause and effect, yes, to a certain extent.
then here it is exactly this, well is it a fragment of space ?
where a person always remains alive practically yes

so it turns out that some space exists
i.e. time is a function of time
i.e. take the matter of time there
we decided to study it for example today in this aspect

then in the matter of time, as if in the very form of information
here in this one
at first it looks like well, this is whitish, yes, information
in color
there is some kind of simply mechanical segment
where a person is always alive

and as I said, from time you can get space
i.e. a real event

it turns out like this it's like a parachute there
took and lowered alive
and that's all yes
from this time segment

so here too an element arises
Well, first of all, the Law of transformation of Infinite time
in the initial action

i.e. in relation to it in general it exists
to any object
any object of information
there is a table somewhere that has an exit
what we can control
its reserve levels increase yes
by controlling the cone there
this is like how hot air balloons fly
some kind of drop is such a shape
it exists
it can be increased and the table resource will increase
i.e. no one will hit him there
it will work longer or indefinitely

the same thing applies to any person
i.e. this is like some kind of
looks like a cone at first

if you look at it
cone of time yes

by the way, that's why the hourglass is like
if you set a task like this
how can you speed up an hourglass
like **this** Well, it's paradoxical
i.e. a task that in principle should not be solved

an hourglass is an hourglass
how does it pour sand or some liquid instead of sand
so time can't change either

but we need it at the same time
make more events
what should we do

in advance and for this event it is easy to increase management
let them fall as they fall as if
for the collective Consciousness
and at that moment you took
one second there the tenth control was installed

for example, I say there the time is from 10 pm to 11 pm
there are often a very large number of different methods
i.e. they can be taken there in advance and simply worked on
and here's an hour for example there to relax or do something

i.e. it turns out that I am increasing the concentration of management
well at some point in time yes

but the cell has an Infinite level
i.e. any element of the Spiritual plane
allows you to get an infinite amount of information
per cell

therefore we can generally invest
all information in one cell
as soon as we invest
we get our own physical body

i.e. all this information is Infinite
in fact, it is no longer visualized afterwards
i.e. at the beginning while we are her
well, like some kind of compressor we pump there
it increases there , for example, in gigabytes in volumes, etc.

and then when we reached that
that they removed basically all the information of the World
or they got it and bent the point
She starts everything
ceases to be visualized in this particular cell
the normal level of human perception arises again

i.e. it turns out that at the ordinary level a person is designed this way
that he takes the Infinite System
Well as if on myself at the same time yes
at the same time it happens as if by itself

i.e. a person in principle constantly builds himself
interaction
well, through interaction, including here
with the outside world

but this is it
like some kind of automated interaction yes
when the Soul is clear
when the Spirit builds, there is also technology there
specific things actions

and here in the Spiritual World
revealed
a certain automatism of human self-construction

and this automatism speaks of that
that initially man always existed
and exists and lives
and by the way happily
Initially he was completely happy

here a person is born, he appears yes
God created it
before him an infinite amount of time yes
An infinite amount of time
curls up into himself
i.e. this can be assessed as happiness here
and is perceived as happiness

i.e. if we think about it
what is happiness
from the point of view of Spiritual development

The Infinite Development of the Spirit
happiness

for example Eternal development
creates a level of happiness
which acts specifically on the heart
the heart becomes healthy ^{there yes}
the organism becomes Eternal ^{there}

and then the heart becomes Eternal
but initially the heart is still Eternal
together with the organism

i.e., but we perceive it ^{as if consistently} , yes
that at first he ^{seems to be} getting better
but the level of Eternity is located further in time

if we exclude time then we are always Eternal

i.e., ^{like} working technologically like this
i.e. literally drawing out ^{the} technology ^{there}
For example ^{there is} the first point of action ^{yes}
and ^{there is} a common time
the second ^{one is} the exception of the initial action point
the third ^{is} getting the desired object at this point
from which the action began
in any case ^{yes}

and then it turns out that we are at every interval of life
we can also distribute it like this
therefore it is clear that God, ^{as it were,} simultaneously created the World
He doesn't need to constantly share something ^{there.}
It is enough for him to do one Spiritual Action
which takes into account only what is closest to it
and He has the tasks of Eternal life there
and that's all
which He Himself reflects into the external environment

moreover, the entire Infinite external environment
she has this property
namely the realization of the information of Eternal development

i.e. we are in a very closed system in principle
which is almost mostly configured
to Eternal development

then the question arises
why ^{as if Well,} in practice we have some ^{other} result
because here is precisely the freedom of choice of a person

knowledge is also infinite

i.e. a person can have Infinite knowledge
that's why it's very important to direct knowledge
on the purpose of personal choice
because any information is infinite
any

if a person has
has the potential of Infinite knowledge
does not choose personally for example Yes
does not consciously choose Eternal Life

although as I showed the World is structured precisely according to the
context
basically, Eternal development
then this sphere of choice is already becoming like this
that he has equal conditions

i.e. the Infinite sphere of Eternal development
has contact with the sphere
which does n't have such goals

and the situation turns out to be balanced again
i.e. we have to teach this person again

so it is precisely the Spiritual action
can be taught almost instantly
just need for everything
to the initial level of the organization
Well as if his Spiritual action
means to bring a level that would be understandable
his Perception
show how God works
that God is Eternal He showed this way yes

and for this we must, it turns out logically
Well, for example, there is a resurrected person
can you show some kind of correct Infinite action

well as a rule a very powerful level of well training yes
in fact, it is precisely the Eternal Development
precisely because a person freely chooses
this is the path of Eternal development

although there seems to be no logical way
at a certain level of management it is clear that no means

but nevertheless, freedom of choice should be normal
in a person
i.e. even a household system
he must choose in the usual everyday way
that he should live forever

as soon as he chooses
then there is no place for destructive systems ^{yes}
it turns out that the element of universal resurrection
simply passes into the Eternal body for all
all have Eternal bodies
i.e. both those who were resurrected ^{there} and those who, for example, did not die,
etc.

and this process ^{seems to} happen almost simultaneously

so from God's point of view at the initial level
those who did not die are closer
because it is more typical
and He did not die and these people did ^{not} die
faster transfer of information

and for the resurrected as soon as everyone is resurrected
the last sphere of some instability it disappears
All
for God all become equal

and it turns out that then in order to bring this process closer
and already those resurrected who would now possess
this function ^{well} equality
i.e. so that there is no strong dependence there
because there is still some kind of theme
precisely control over the general resurrection
more ^{like} dynamics
a resurrected man must work for the general resurrection

then it turns out that it becomes practically
^{well}, just somehow, sensory or any other way
it will no longer be possible to determine that he was resurrected
just like a living person and that's all

so then he should just cooperate with God
in the general resurrection
i.e. Spiritual action Law of Spiritual action
the ability to convey such information Spiritual
which would necessarily contain

even if you say it like that
which would contain some information there
then we
again "contained" in the future
i.e. again the time aspect is brought here

and we say yes it contains information
the event contains information
an event is not necessarily related to time

and here is this piece of information
contains
information about the next Spiritual development
the next level of knowledge transfer ^{there}
i.e. it turns out that the resurrected one will definitely meet
with you
it is necessary to transmit as much information as possible
at the level of the Spirit ^{there is} positivism
development of the Spirit into Infinity
information about subsequent resurrections from the resurrected

i.e. the resurrected one should be able to control almost immediately
on the transfer of knowledge ^{there next}

then it turns out that in this case
this meeting will be a mandatory meeting

i.e. now make such control
pass it on to all people
^{Well, let's say resurrected yes}
which must be resurrected from a logical point of view
although as I said
there is only the level of the essence of life from God
^{well, nevertheless, from the point of view of the collective Consciousness}
linear function

for ^{example,} they should be resurrected
pass on to everyone the knowledge of Eternal development
that the resurrected one with that man
^{Well who are you supposed to meet?}
he also passes on knowledge to them
i.e. ^{how would you teach him to actually learn?}

and now make a meeting management with him
through the transfer of knowledge

because as soon as we establish a canonical level
knowledge transfer
even those who well there is no attention paid to it now
they have a free level of choice of knowledge yes

but the collective Consciousness will somehow orient us towards that
so that you have a level of well as if such an action
that the knowledge that this person, for example, receives
were immediately oriented
on the knowledge of the Eternal development

i.e. now make such control
and again systematicity
i.e. the obligation to meet with the resurrected one
and the meeting is obligatory
so that you get a meeting at a specific location yes
again, still in a specific place

although in this case you should
or clearly record the date
By the way, you can take any date
and from this date just get the place
and through Soul technology
come to this place
well, i.e. make a longer path

do not record the date of the meeting there
and just record any date

then it turns out that none of the dates can interfere there, yes
it could be some kind of celebration, some kind of anniversary, etc.
some event in your life in general

but intersecting with technology
namely meetings with the resurrected
through Soul technology
there time is obtained at the moment of movement along your path
i.e. the interaction of two technologies in this case

It seems like the time is recorded first
through the structure of the Spirit
and then transferred to the Soul management structure
on the optics of the Soul
and then we kind of block time, yes
let's catch this element well as if we were capturing this element of time
and we don't let it influence the event in any way

because time has properties
unpack further
i.e. to somehow influence or modify
but we don't allow this to happen
we take and translate into the structure of the Soul
and that's it, there's no time there

and thus we increase the systemic nature
so do this control now
and do it quickly

that's how they did it
try to see your Infinite future
i.e. here it is important to see yourself in the Infinite Future

i.e. time is an abstract concept
but in reality it is very specific
i.e. for example, they looked there a billion years ahead, yes
what exactly are you doing
looked there into Infinity
and so in the end you must see yourself in Infinity

when do you start to see it
your Spirit has an Infinite speed of propagation

i.e. information about you as well there is some kind of beacon and emitter
well, let's say, some kind of antenna even
from which they constantly emanate there
these are the Infinite speed waves of information there
well, conditionally waves

i.e. you become visible everywhere
generally everywhere at any point

and naturally it means a person who from the point of view
God is not only from God's point of view
he is alive and he is alive
who is alive, he naturally sees you in real time

Well, if you watch TV for a long time
did you like the channel
after some time you may find out
where is this transmitting station located
where is the antenna what kind of TV studio is this anyway

i.e. you can just find it somewhere

i.e. information becomes more controllable
for the resurrected
he can eventually find out where you are
because you constantly give this control

that's why it's very important to pass on knowledge to people
i.e. the resurrected one can in principle go out
to the nearest person with such capabilities

and then if he came out
and the main thing is this is a social system of recording events
as soon as he came out several people saw him
then for example the first person who knows
that he is engaged in a kind of resurrection
this particular person
and that's it, and the system closed

then he finds the one to whom he should come, yes
Well there is a relative or that person
Well, who was the first to start the resurrection?

and it turns out that here it is very important to know
that a person, for example, is, after all, exactly, resurrected , yes
here is the primary level of knowledge

because the resurrected one can meet people
naturally with others who don't know that he is resurrected
but in general this has little effect
on the structure of collective Consciousness
because they perceive it
just like a normal living person and that's all
especially already
have already begun to manifest themselves in the current time yes

now they have already begun to appear
it's almost the end of 2004 now
these are the systems like this
that resurrected on a sensory level of control
are no different from the living
here at the level of just some kind of sensorics

i.e. only God can initially determine there
because of the length of the path, that's all
but no longer possible
not physiologically there
no bioinformational data there

are no longer different

i.e. already now the process is becoming more massive or something
in this regard

and therefore it turns out that it is only possible logically
to convey the knowledge that he left
why do i say that the resurrected man
should come preferably to the family
and stay in families
there so that everyone could see that the man was resurrected
he should, in general, undergo a full identification
still in the circle of people who know him, to put it simply
First of all, these are of course the closest relatives there, etc.

therefore, through the Spiritual action of this inner circle, yes
unite the Spirit of all people
who, well, first of all, know the person
then the Spirit of all who help, etc.

and try to make such control
well , it often happens that the one who is engaged in resurrection
is engaged in other activities for other reasons
not because there is a relative there
and make sure that everyone has equal rights
so that coming to any person to any person
the resurrected one could clearly fixate
in the collective Consciousness

and then it's easier
then it's just normal human relations
he can always come to visit his relatives, etc.

and here at the Spiritual level of management
it's much easier to do this
The Spirit has an Infinite universal system of action yes
Spirit of God Infinite Level of God

God who acts as if on Infinite Reality

so try to do it here now
such management
to generalize, as it were, i.e. average
i.e. to make your Spiritual action
it was the same as the action, well, the acting one
here is the management of the Eternal, that is exactly the development
action of God

and try to make sure that it is resurrected
always had the same opportunity
objectify oneself in front of everyone

then of course you meet significantly ^{faster}
so you work
and I will work with you

Resurrection through the action of Consciousness

This part of my Teaching on the Resurrection
is called Resurrection through the action of Consciousness

i.e. in this case we will make the control in this way
that we are simply considering the Consciousness faction separately
and this faction

as if in its pure form, yes, we consider it
action of one's Consciousness
and we believe that management through this area of information
leads to resurrection or to a meeting with the resurrected

or, in fact, we
similar to how we worked
when managing ^{means} resurrection
through the action of the Soul
we create such systems of connections within Consciousness
when does the resurrection happen
because these connections ^{seem} to work on their own

here is a very important aspect
this part is precisely the Teaching
is that here the main element
it may still be the case in some cases
that when we configure Consciousness in this way
that no matter what
do you do any target management or not

with all this you are constantly working
on the resurrection system

that's why the following is important here
what if such mechanisms are embedded in the Soul
as if by themselves

i.e. God gave the Soul exactly this ability
work independently ^{yes} from sleep ^{there} actions goals of management
precisely in the direction of Eternal development

for the Soul itself is Eternal

then here we must create these elements
or recreate it in the Image and Likeness

For example there is the action of the Soul

it is important to identify here
it is precisely the aspect of the Soul's action
because there is such an element as, let's say, control
aimed , for example, at a kind of similarity ^{yes}
let's assume that we can act as the Soul acts
but you can simply act in the likeness of the Soul

but if we proceed from this, then we get
from the point of view of Consciousness
very close control
because Consciousness is also reproduced by the Soul
and therefore if we actually act
just like the Soul
then we will ^{basically} act ^{almost} in the same way
the speed of action will be close to those
^{well,} which are achieved by the Soul

i.e. if a person acts as God acts
speeds are achieved in some cases
but it's ^{almost} like the same action and ^{it} arises

i.e. with precise action
Man must act as God acts
in the control system

and it turns out that here when we start working
in this area
then it turns out that what is needed here
It is precisely in the dynamics that the actions of the Soul are
select an element where we see the dynamics of the action
^{well,} i.e. Spiritual manifestation
or simply the dynamic action of the Soul

because here it is possible from the point of view of Consciousness
divide
where there is Spiritual action

well, that is action of the Soul
this is well For example there is Spiritual action
or Spirit in its purest form

for example, the Spirit itself
this is also like a derivative of the Soul
in a certain sense of management

and it turns out that then here we can
clearly, as if to structure
where is the action of the Soul as such
and where in general as a result of the action
the Spirit is already appearing

i.e. we are considering some intermediate system
between the Soul as such
and it turns out by the Spirit

and based on this
we make the model of Consciousness similar
to this segment of management

and it turns out that we work
in a clearly defined, as if technologically, or something like that, can you call it that?
sphere

i.e. it is precisely the technological aspect that lies here
what we Spiritual aspect means Yes
certain control optics
there is a spiritual aspect
i.e. that is exactly what the action of the Soul is
we are entering into a very generally rigid system of the World

i.e. the space of the World in this case
very rigid construction

i.e. if we consider this in general
as if in some positions
well, some linearity there
or a system of connections
or there is a dynamic system

then in a certain sense optical processes
quite clearly well as if configured like this
what we have here is some kind of semblance there
some kind of soft environment yes

i.e. the optics are such that we can, for example, act
in a word
and we can, for example, act there
start with a word and act with control
i.e. it is not necessary to finish the word there yes

and for example, you can act with both words and control
parallel
i.e. softness in the event form
i.e. a plurality of forms

there is a control which we assume is as follows
that we can, for example, consider that optics is very subject
it is true that the optics of management are subject to the manager
when done correctly

and the action is more like some kind of soft system
well, how is the air in the physical world , etc.
i.e. it is quite flexible management
where there are many connections
and the optics can be formed very quickly
or disband

it turns out that when it is formed
then we basically have a fairly good mechanism for disbanding
there might not even be a goal there
and just use the same optical medium for everything
we just move it to another place right away

then we don't have to visualize
i.e. we retain control
but as if in the field of management
as if this area is no longer functional

i.e. as if we have a fairly soft plastic
or there is a multifaceted controlled environment

so here in the transition system
the environment is completely unambiguous
i.e. there is a very clearly visible optical line
i.e. very bright light

and this bright light means
and what you reproduce or perceive
it is element of the primary faction of Consciousness
at an infinite distance from you
from your Soul, moreover

i.e. here is the Soul in the current time
is located for example here yes
and if we want to look here
Infinite development of your Consciousness
in the Infinite Future
what is it
and what will Consciousness look like then?

i.e. Consciousness must have
all control functions are obtained
so it's a very bright light yes

but the level at which the system is built
he should be the same now as in the Infinite Future
i.e. if for the Soul
The soul is built by God, created by God
and in principle it has a kind of plasticity
from the point of view of Perception
system means Well, maybe observations of yourself ?

because after all we are observing the investigative element
Perception is a consequence of the Soul
i.e. we are still observing at the investigative level

and from the point of view of Consciousness we can observe
by the same mechanism

here is the Consciousness faction
we take the element of Consciousness and say
what we observe from this faction behind the neighboring one
i.e. the material is sort of the same, yes

so it turns out that this manifestation
what does it ultimately lead to?
what is logically clear from this
why exactly the physical body
Well , first of all, it's dense.
secondly, it is still a faction of Consciousness
this is so so let's say according to the device, according to the operating principle
this is also an element of the human Soul
that's in terms of the similarity of the control functions there
but still, it's okay as if information yes

i.e. it is a system that is located
For example there outside the physical body

you can find it inside the body, it doesn't matter
but it is ^{still} external to the body
the system , well, some kind of system of perception

although Consciousness, ^{as it were,} in its pure form, is simply distinguished
from the Perception system
Perception is Perception
With soul
In spirit ^{there}
Consciousness
and Consciousness as such at this level
this is a very, ^{so to speak,} bright light
the closer we get
the more golden it has
here in the optical definition

and it turns out that this is the level
it is built on the Infinite carrier

i.e. here is the platform of this level
transition between Spirit and Soul
this is not in a linear sense
transition
namely from the point of view of the task there
or ^{there is} a real Infinite development

and therefore here is the real Infinite development and tasks
coincides in the Action of God
God's tasks and Reality are one and the same
the management task is always realized

and so that we can implement it systematically
i.e. it is necessary to meet with the resurrected person
we must in this faction of Consciousness
build a meeting according to the same Laws

i.e. there is a level
^{it means} on which the system is located, ^{it means} Consciousness , yes
at the same time, this is actually dynamism
i.e. the property of the Soul is conveyed here in what
that the closer we get to the system
we can see some more distant worlds
^{there are} control systems
i.e. Consciousness perceives simply the following system of the World

because that's how consciousness works

what does it mean it starts like unpacking decryption

certain systems of world order

in its pure form

it is a system of constant, as it were, Perception of observation
there is analysis of control systems

i.e. if we begin to approach this light

we begin to see some real worlds of specific people there

or are there some internal connections there Thinking

if we move away we see light

which in principle has similar functions too

Well for example, let's say this about the concept of an hourglass

the more we

hourglass shapes

we are moving away

especially since the golden light seems to come from outside

i.e. Consciousness in this fraction is in a point

at the control point

and in the Infinitely Remote faction

the light functions are almost identical at least

i.e. it is the same

because the Consciousness of God is that element

means which a person learns

i.e. in Infinite distance

man must perceive the Consciousness of God

therefore at Infinite distance it is the same as that

what is here now

and by the way this is one of the Laws of the development of Consciousness

so that Consciousness would be like the Consciousness of God

for a person to have it like this

we need this optical, even phonetic system, so to speak

how phonetics are reproduced

sometimes as a sound form of approach

i.e. we can approach the faction of Consciousness

expanding the sound system for receiving information

and light information can supposedly pass

into sound

and turn into the word yes

i.e. the form of Consciousness can transform

as in the word of the material control system

and in the system of constructing external Reality

those. through Consciousness there for example, you can
or is it enough to just say so and do the management
on the construction of the World in a formalized form, as it were

and here is this rigid foundation
which has the same Perception fraction
determines that through Consciousness
material systems are built

i.e. through Consciousness it turns out easier
to build such globally fixed systems

i.e. it is enough to perceive in Consciousness
some elements of the external world
and you can, like, copy a matrix and build it, yes

which is important by the way when treating diseases there, among other
things
because the process of meeting with the resurrected
process if on logic as in collective Consciousness it is considered
just resurrection
he still refers to the fact that a person
still constantly improves his own health
and everyone around

it turns out that they should be recorded in Consciousness
development systems i.e. progress of a certain person
towards mastering resurrection technologies

and right here it is located
a certain system level
when a person who, for example, has control
Well there in the Infinite Future
this person is basically
through the system of one's own Consciousness
it turns out from one level to another
from one fragment to another
can increase the control speed there to such an extent
that the Consciousness faction will become so concentrated
that this rigid system of connections yes
which exists in the structure of Consciousness
from the point of view
there is an external world
internal
material

or ^{there} is no material
it passes into the dynamic function of the Soul

i.e. we see how the structure of Consciousness
as if instantly becomes the Soul
it is in the implementation of the action

here is such an important key point
as soon as the action is carried out
positively embedded in Consciousness
we see our own Soul
i.e. ultimately implements the action
The soul is obtained

then the question arises where is this faction
where is this ^{super} -fast transition
which led to this or that meaning of this action

after all, being resurrected is also a sign of Eternity
here is the external World, ^{there} is the internal World
i.e. it turns out that we see our own Eternal Soul
so of course it's completely clear to us
that resurrection is the same everyday, ordinary question
like any function of Consciousness

i.e. the transition of this function
happens in the education system ^{well} as if at a household level
i.e. as soon as we get the action
Consciousness instantly distributes according to target characteristics
absolutely and precisely
who needs this the most right now
this function ^{turns} out to be educational

i.e. from this she receives, ^{as it were,} this fraction of Consciousness
reverse impulse
but already where God intersects with this function of His action
Consciousness

and it turns out that here God gives maximum knowledge
and as a result of ^{what} was achieved
a person gets ^{well} ^{there} is more action ^{there} ^{yes}
the following are often great knowledge
although for Consciousness it may be so
that's what usually happens
that every system of knowledge is independent, necessary, etc.
i.e. Consciousness also works on the principle

well, let's say, the balance of the knowledge gained

often knowledge of the past can also be sufficient
there or further further if you look they may be more important there
there in the future than for example now can be perceived
i.e. education matters

here it turns out that in Consciousness
knowledge of the past can be just as stable
as knowledge of future processes

and accumulated knowledge and experience simply in ordinary everyday logic
in the usual logic, as if it were an adequate reaction of any person

This is a commonly used level.
and sometimes even constantly
in case there is a specific profile of activity yes

the engineer there often considers the same device to be something
mathematically for example

and it turns out that we have in the structure of Consciousness
well, some well-tested knowledge systems
and so that this well-tested system of knowledge
implement to meet with the resurrected
or even through a common cycle
i.e. to go through the entire system of collective Consciousness

well, i.e., for example, the initial statement of the task is resurrection
then a meeting with the resurrected yes
so that a person comes to the family and stays, preferably, etc.
Well, at least the process of objectification is complete
that this same man was indeed resurrected

if we set this task
and generally speaking when we put
and the task is often set spontaneously
because when will it be recognized
about some problems related for example there with biological death
Consciousness actually collapses very quickly.
as if into a single point
and a powerful impulse from the outer faction of Consciousness
is working to restore the situation
i.e. in fact, as if to prevent a person from leaving
or there for resurrection

i.e. the internal function of Consciousness works similarly to that

how does the human soul work
i.e. in any case it works for positive control

and here is this function
let's say, well, is that how it's made?
that it is located as a support system
for all external control

well, that is, good always triumphs over evil
because the basis
good is the basis of the autonomous system of Consciousness
so when is the next system well as if it is no longer good, but it is located and
functions
then it's just the outer shell

inside the basis is still the same, here is the technology
it is clear that there is a system of mutual Macro-help inside

when we identify this function
then we see that iteration

i.e. moving from one level to another
for example, factions of Consciousness
creates a truly stable Reality
where with a person in any case
it turns out you can meet the resurrected one

and for example, you can use
technology of this type for example
that when you just meet other people for example Yes
or by chance here
first of all, the technology of a seemingly random meeting

conduct an analysis
how do you meet people by chance
there for example, you are walking down the street and you meet someone
Why at all?

as in general from the point of view of control configuration
it happens yes
then you begin to ask the question through Consciousness
and in general with any other person
what principles do you meet on?

i.e. logically it is one element
this is what allows you to combine
control logic and, as it were, processes tied together

only at fundamental levels of interaction in the World

i.e. logically because you left
because you are going somewhere ^{there}
and according to logic
precisely ^{as if} fundamental aspects of the structure of the World
we have here such a process
that's basically it
that you are actually dating at least one person
or with everyone ^{there at once}
all elements from the point of view of Consciousness
we can generalize and consider that the process is logical there
at least in some such logic
where all processes are equivalent
this process is universal

i.e. as soon as God met the first man ^{there , for example}
He had to lay it down accordingly.
in general the whole mechanism of such a meeting ^{yes}
^{there is} reproduction of people
i.e. He had to lay it down
already technologies ^{mean as if} the development of the Earth

all possible encounters in all ^{of} Infinite Reality
i.e. He must first have everything
only then does he meet the very first person

i.e. the creation of the first man
from the point of view of the logic of God or the Consciousness of God
this is the preparation that is no different
from His meeting with any other person

for God
what to create an event
what to meet a person ^{there}
this is all one level of His Actions

and it turns out when we
this is this ^{kind of} fraction of Consciousness
or God's logic in this regard
we understand from this position
then it turns out to be a meeting with the resurrected
this is generally speaking the same meeting
at this level of management
what about any other person in general

why with a person
because man is resurrected
resurrected man

although this can be translated to any element of Reality
i.e. and in general to do the management
in relation in principle to any element of Reality

so, based on this, we can say
well, it's just that often another element of Reality
as if it is considered to be torn off yes

but nevertheless, for example, from God's point of view
any element
manifestations of Reality
actions of Reality
all the same level anyway

God treats everyone differently
It's just that a person has other tasks
and so well there with the tasks of Infinite development
in conscious action

and it turns out that based on this
we can say for example
Well, basically this is the principle of management

what if we take the process well as if it were also somewhat peculiar
for example, a person lost something
there he must stand up and concentrate and the thing appears there
Well there is teleportation yes For example

i.e. he believes that all objects are equal
the lost item is here
she appears here

so if he starts , for example
basically at one time I did it this way
I had such cases, I was riding a bike there and something got lost
right there, some keys were jumping out of the pump
when there are holes like this
for some time I mean Well, I thought
that's it, well I heard that it fell, for example Yes
some key
and then it means Well, I drove past without looking back
in one place became home
and suddenly the key appeared in this place

where I [...] well I just in a certain way
concentrated attention

then in principle I even started watching
that, for example, the key fell out there
I don't stop I see that he fell out
but I pass by and it's like this element of Reality
it works again

i.e. I think that why, for example, the key fell out
there somewhere while I was riding my bike or there was a pump or something
like that
so why so here
this is how the logic works
that's why there must be a difference between space here and there

that's how it is for me
why should I stop there and waste some time, yes
I'd better come and concentrate
considering that it is the same space
the key appeared

and for me it's kind of completely systemic
it always absolutely happened
or there were some there I loved
For example there is some carpentry work to do there
My plane will disappear somewhere
then something was going on there, at one time people were coming

I was just concentrating
this plane appeared in this place
because I think that I like this world better
so that while I'm there for half an hour looking for this plane
someone took it away
I'd better concentrate here
he showed up

and this actually occurred to me at one time
to the extreme extent, to the systemic level in general
i.e. I wasn't looking for anything at all, I just came
I had a chest and all the carpentry tools there
I was just concentrating and for example there appeared a plane there
and that's all

i.e. it turns out that the elements are, well, sort of ordinary, let's say

are some physical elements of the real world ^{there}
they basically have the property
Well ^{as if} by the general action ^{there} ^{as if} to a universal action
i.e. it simply depends on the point of view of Perception
I remember I just had the thought that it would be faster this way
Here
because I'm ^{there} if I search it takes longer
and ^{as if} well why am I like this, I'm ^{kind of} here

if we think that we need this
to concentrate faster
don't search but just assume that the world is like this
that the resurrected man is right here , i.e. he
why for ^{example}
firstly, this is sometimes a complicated design
it takes a long time to find this often enough ^{yes}

so it turns out that from the point of view of God's logic
when God set the task
then He created the World ^{as if} near man
i.e. It's not like he found it somewhere there , but
i.e. man was created first
and then the World is created around him

i.e. it turns out that, ^{as if} based on this
for an observer, ^{as if} external, ^{yes}
this is a man, how did he even understand that the World is built in stages
first one part, then another, etc.

and because he already was, then
how else could he have perceived this information?

then it works out
where was he ^{yes} man ^{means}
when he built such a model of building the World ^{there}
how God created the World ^{for example}

then it turns out that he can know for sure
^{as if} all the development processes
here is ^{one for example} there is an infinite future
but if he takes from this future too
^{as if} taking control
the entire system of Infinite Development
i.e. it goes beyond the spectrum of Infinite time
then of course he knows everything that happened in the system

The action of God is an Infinite quantity
therefore the person had to go out
for the control system
and try to take control yes

but this is the complete freedom of man
this is specifically this is a specific value
which is called "an absolutely free man"
I just wanted to
is in Eternity
I wanted to be completely free there
Here

then it turns out that there is a direct analogy to that
what does god do
he falls into a certain personal plane of interaction
with God
pay attention when a person
interacts with a person as an individual
then there are some personal systems
there is often no concept of "space" and "time"
there is a personal plan of interaction

and it turns out that the person was
in the personal plane of interaction with God
at this moment

and there is Consciousness, Soul, Spirit of man
they are united precisely in the structure of personality
and it turns out that there is an interaction between two personalities

hence the interaction with the resurrected one, for example
by this analogy
this is also interaction with the individual
i.e. when you fully perceive
all systems of personality of a given person
then here is the Consciousness faction
she becomes completely like
well, practically autonomous
i.e. it occurs on the element of Perception well as if autonomous
because Perception is also an element of Consciousness

but in reality the Soul perceives the fraction
completely autonomous
i.e. we begin to see Consciousness in its pure form
Consciousness as such

what is the concept of "Consciousness"
and moreover to see often with the Soul

when do you start to see it
you see where the Soul builds Consciousness
for example in the Infinite Future
and from here you can see
how to configure your Consciousness
i.e. how to create management
to from one element to another
so that's how you developed
so that each control
was balanced for some reason

i.e. information has different development properties yes
so in some cases it serves that purpose
which is not currently envisaged
maybe it will show up somewhere in the future
as a positive characteristic

but if we want to consider, for example,
from a logical point of view
where this characteristic will appear in the future
then we can see that in the Infinite Future
if we choose a certain path
that is precisely the development of Consciousness
what's good is that here, after all, there is Consciousness
it can develop in an infinite way

so here is the Infinite development of Consciousness
this is also a way in principle
in itself it is a certain path, so to speak
although not in the full context and not to the full extent

but if we concentrate Consciousness
then it will be the full measure

i.e. if the concentration is close to the level of the Soul
and it is shown that this is the action of the Soul

then we still get a complete control system
Consciousness acts almost the same way as the Soul acts.
in Infinite Distance

i.e. Consciousness acquires the properties of the Soul
by analogy with how a person's personality is
can acquire properties that are similar

for example, the Action of God

and it turns out that based on this we can understand
why any situation and any configuration
in management
happened for example now or in the past

basically nothing in the world
well, except for some kind of total destruction system there, yes
there is physical exactly there Well as if
well when something like that is clearly happening
related for example there with the destruction of the human body

except for this action
nothing else in principle unfavorable
by and large for a person there is no
as if exactly in Infinite development

i.e. in Infinite development a person is always
will be able to overcome
describe as if and be able to reconstruct the events

and that's when we start to see here
how useful is it for us to know this information
what can we do from Infinite Development
then you can learn something useful for yourself

so here there are very clear connections
literally one to one
i.e. for example if you imagine there What
Well, in general there are certain systemic connections
how is it in electrical engineering
many harness connectors come into contact with others
and here absolute precision is needed

then here is absolutely the same design
it's absolutely clear
at what level to concentrate now Consciousness yes
to get
firstly, the implementation of the goal
primary level
secondly, how to know that in the future the process is sustainable

i.e. favorable

but for this we need to know
not the whole system

from minus Infinity ^{there} to plus Infinity
and we just need to know the connector itself , actually
where the fasteners are connected
i.e. one point one fraction of Consciousness
it's enough to know
so that she really was like that
so that it still satisfies the properties of stability

i.e. there is information about the entire Infinite Future
and about the purpose of primary management

so this is implemented very clearly
when it comes to a resurrected person
about meeting with the resurrected

i.e. we just grab, ^{for example,} that part
that we should meet systematically in any case
We have such a task ^{then}

so we have to meet systematically
in any case, what's the matter
we must have this same faction of Consciousness
find in your own, well, in Perception, let's even ^{say so} Yes

because Perception is not only Consciousness
there is the action of the Soul
can be perceived by the Soul ^{there}
and then translate into Perception
through the logic of ordinary ^{objects there}

then often such a moment appears here
if a person looks at something
then he sometimes perceives it with his Soul
^{For example there is} the controlling clairvoyance of the Soul's vision
and at the same time he thinks that he or thinks, ^{for example} Yes
or perceives with Consciousness

i.e. here the processes do not always proceed
only through the system of Consciousness

and so that we
^{for example ,} these processes ^{were} translated
in a rigid control scheme
^{there} only through the system of Consciousness
we just need this one action element, ^{yes}

where Consciousness works

as a rigid quantity as a point function
which has all the properties of action

so that you just this value
as if they just brought me closer to themselves
and that's all

and when you start moving it closer
then you do basically the same job
this is how God moved towards himself
for example some control element there
Let's assume that God created man when
in order to somehow bring a person closer to you
He had to create some kind of path.

because where is the movement then
where does this person even have the concept of "closeness to God"
He must then create the Earth yes
and a person must approach him
through some system

and the same for Consciousness
so when approaching
we create an external system of Reality

as soon as we start
act as God acted
when man was created
then it turns out that we configure all events very clearly
that exist around the resurrected

and then we see absolutely clearly
in general Well so let's say the next aspect of development
when all external events
through Consciousness we create
in this faction it is exclusively independent

i.e. if we want to understand
how are we there, how are you personally each there
from those who practice my Teaching
there he created some specific molecule there
located at some point on Earth

then he can do this process through this fraction
see clearly
that he is there at least he can create a similar system
if it wasn't him yes it was at that moment as he thinks he did

or look at your own work

but of course it is possible to create something similar
and it's just of course the amount of time the number of people
which are well as if accomplices
in terms of favorable development of civilization
of this process

that's why when I talk about any of my technologies
Management is always built through Macrosalvation
because then we'll be there anyway
we even compensate in this way
we teach there some aggressive side perhaps
because these sides or people there
or some other informative
as if well just informational
maybe or information systems
they begin to transform
at the level of Eternal development

i.e. any of our actions leads to
still to a positive result
Why, for example, did n't God just create something?
well, like some part of an exceptionally good life, yes
and that's all
and why does he need to interact there all the time
with some kind of negative environment

and because, firstly, the concept of "negativism"
in this case it's just oh well as if there is a lack of knowledge
to a greater extent
as a rule for Consciousness it is one hundred percent
and interaction is, in general, a process of some kind of learning

i.e. interact in some cases
with some kind of negative environment
It is desirable that this environment
at least I had some knowledge
even through your negative ideas
about real phenomena of the World

and it turns out that as soon as we have this knowledge
one way or another we begin to transmit
then we understand that the path of the resurrected
generally speaking, even on the whole
here is the training of this management
are just meetings even with any person

or ^{there are} special meetings
with the people you know

i.e. but it needs to be brought to a universal level

that meeting with any person
it's the same meeting
but of course with a person

and ^{so} it turns out
and in no case should this be done here
introduce some kind of sexual characteristic
but we are talking about a person as such
it doesn't matter who he is, a man or a woman

and that's when we start
^{how to} introduce this control system
because from God's point of view
all people are equal anyway
regardless of gender ^{there is no} nationality
and all the other systems ^{there}
even regardless of age by the way

and therefore it turns out that based on this
we must imagine very clearly
image of man as such
in this context
from the point of view of Consciousness
^{there a person, for example, is in a crystal clear form}
i.e. how to realize it ^{yes}

So basically I am giving this management position now
you can just hold it
Here, keep it in control now
a man in crystal clear form
just a person, so to ^{speak, just like that}
if it can be compared like that
when both depth and perception are at the same time
^{Well, here we can't compare directly}
of course not literally a crystal
^{Well, there is such a light when you understand}
you clearly identify the object here
this is what I need

i.e. you understand that in front of you is a person's information

and as soon as you realize this information

on the one hand it seems simple ^{yes}
the man ^{is there}
the body is clear
^{means} Soul
Spirit
Consciousness

but every time we
^{as if} on one side or the other
we are approaching a person

in this case i say what is necessary
from the point of view of Consciousness
to realize, ^{as it were}, the fundamental meaning of man
that's how you can say it

and what does God give knowledge?
It is clear He gives the knowledge that needs to be understood
and this is exactly how a person realizes a person

and that's when you start to see it
consider that there is already space for the resurrected
stabilized and absolutely clear
in your ^{and} in human Perception ^{there} too

and then it turns out
that here is a system ^{of} some oscillations
^{there} in the collective Consciousness
does anyone know that there is a resurrection ^{there} quite quickly
some people may not be doing this at some point in time
maybe they'll start somewhere ^{there}
after a long time, maybe even a short one
even if he starts in a second
not currently engaged
that's another question

i.e. here it is necessary to clearly highlight
your function of influence
through your Consciousness
because you perceive the system of Consciousness

so when you clearly define this system
All
roughly the same construction arises
what to take ^{there} by phone call a person
he either makes an appointment there or not ^{yes}

or you appoint
does he agree or not

or this action
i.e. we equalize the system of any everyday action
with the system of meeting with the resurrected
at the level of your Consciousness

i.e. we take well as if in such
may be somewhat harsh

but we equalize
i.e. we believe that there is nothing else in principle
from God's point of view does not exist
all phenomena are equal
including this phenomenon

the only detail here of course
what needs to be presented very clearly
man as such
and not even in an abstract sense
and in a fundamental sense

and that's not the point here
and here you know more about what it's like
that man is Eternal, so let's say it this way

i.e., for example, you simply move into the future
and you say to yourself, Eternal Man
and this is the thought that comes to you
it kind of denotes more of this focus or something
this absolute person, so to speak Yes

and when for example you get this space
by the way the space is quite very quite unique
if at this
as a rule it is not very far from the physical body there
Well, we're already talking about meters there, right?
and you are kind of in this area
you can even there in this area
if you even mentally imagine another person there
you are making him very healthy
or maybe even yourself

but in this case
true if you imagine yourself there
you move back to yourself yes

i.e. this is healing in real time

and thus you are the hard faction of Consciousness
that's exactly the faction that practically, in general,
Means Well, it definitely works
that the man is resurrected
meet you there

i.e. the entire cyclical action of resurrection will be completed
from the point of view of collective Consciousness
or so to say a person will meet with the resurrected
from the point of view of the Consciousness of God

you see that this is the configuration
gradually outgrows
precisely in the personal factor of management
i.e. the person who realized
for example, the need for resurrection of other people

but it is precisely necessity as such that is a quantity
it is, in principle, already realized at the moment
as if to the organization of the person himself
because man himself was created by God
so it's before the organization
knew the necessities of life

i.e. here is just one factor of the necessity of life
according to the system of general communications
then life must be Eternal

and based on the fact that man himself has already been created
naturally he already knows this necessity

so how to convince a person
that he should live forever
or that he must be resurrected alive
It seems like there is no such need, yes

it's enough just
or maybe there is just one stroke
some one direction
in action here is a certain nuance to show
what's happening
and it turns out that the person is already resurrected
for example, he comes back or there is another person who understands

i.e. that's why I still often recommend it

there are many approaches to systems of resurrection methods
use

because this nuance is often used

some transition into Consciousness

where are the elements well it seems like they are often maybe not quite there
or are not linearly related at all

but since they exist

here in the form in which they exist

they provide efficiency

in terms of these subtle transitions

because Consciousness is structured

except for the hard ones of this hard level

where there is precisely the construction of Consciousness

transition through the Soul-Spirit connection

and between them there is Consciousness

platform for building Consciousness

Well, this is basically one of the models

but which one gives

namely the hard faction of Consciousness

because you can switch to a dynamic faction

understanding personality through Consciousness is already dynamics

a person always perceives things differently

maybe even because

the fact that it moves means that it has different movements

then there is already dynamics

but if we consider it anyway

this very tough faction of Consciousness

it turns out that here, based on that

that Consciousness does penetrate quite deeply

basically there let's say

into action of the Soul of man

i.e. there are certain areas there

here in the Soul of man

there are areas of action of Consciousness

Consciousness is somewhere in the area, and specifically

this is primarily for fast-moving tasks

this is the area of action of the heart yes

with slow liver ^{there}
i.e. you can even track where the action is
Souls ^{for example} Yes
Spirit in optics
to Consciousness
depending even on the organs and on the structure of the organs

i.e. why are organs built this way?
and the structure of Eternity of each organ ^{there} of each cell
i.e. skill
through Consciousness you need to be able to each cell
^{how to} introduce into the structure of Eternity
simply by conscious action

and it turns out that as soon as you
This is the main action you do
keep constant control over the outside world
i.e. to implement the system of external Salvation

so when you ^{act}, let's say so
through the structure of Consciousness
try harder
here is the level of Macrosalvation
introduce it as a level of conscious actions

i.e. try to do it from time to time
to enter exactly
visualization factor ^{for example} Macro-Rescue areas
and through this area the action is carried out

here through the system of Consciousness
it's really very clear to see

but there is also a logical follow-up here
that after all through Consciousness
this area of Macrosalvation
when all people will work
first, having improved everything ^{there} for the better
increasing concentration in the collective Consciousness

then it turns out that we are building like this
rigid control function
i.e. the more people work
the more rigid the function
the more strict the plan of events
which are virtually impossible to change

and it turns out that there are absolutely unchangeable events
here in the future
and in principle how can these events be seen?
because that means events are , well, practically, let's say
why they can be absolutely unchangeable
because it suits the person first of all
i.e. he needs it yes

that's why they are not changeable
and it is necessary because he consciously perceives
some actions

i.e. therefore, based on this
here's how it is that there is a certain
like some kind of lever yes
from the future management there is action
here at the current time
and this is again a certain road

i.e. we can simply through the function of Consciousness
take well except for those cases when in Consciousness

we put in the management function
regardless of Perception
there in a dream etc. there is a different type of Perception yes

we invest in the management system
Infinite Future
and we receive from these same control systems
in fact, there is a certain path to here, yes

if we start to build this up
Well as if the fabric is woven, i.e. in a large number of ways
it turns out that we are weaving this road for ourselves
i.e., in fact, we pave the way ourselves
due to the system of Consciousness
due to the fact that we use
as internal resources of Consciousness and as such
of his own personal

but we also use additionally
just this area of management or something
just like an optical sphere
for organizing, for example, the management of the Soul

i.e. if the ray of the Soul

make it a support in the sphere of Consciousness
we get a faster action of the Spirit

i.e. we have a task
meet the resurrected
anyway, in a short time, if possible

and therefore it turns out that we must
be able to increase intensity
just personal tasks
as soon as possible to implement
I'll meet you after all

and it turns out that here you can use
Well, here's a multi-angle optical control system
where, for example, is the understanding, i.e. Spiritual action, yes, it would seem
further as soon as understanding is realized
we see that even further
we can increase the function of Consciousness

i.e. you can do it like this
here is an example of an action
Souls
Spirit
Consciousness

and then maybe more
Spirit
and again Consciousness

i.e. we can work with different optics

we can continue working
with the optics of personality as such
where there are other aspects of management not only those listed

when we begin to see
how each function interacts with each other

we see that here is the reference level
i.e. the obligation to exercise control
approaches such a level of Perception
this is the one we have now

i.e. when we, for example, do not do active management
i.e. we see that we are coming
to the normal state of his personality

and therefore, ^{as if} previous knowledge ^{yes}
give a normal state
where even the movement of the body already gives control
on the necessity of meeting with the resurrected one

and then back to normal
when do you come
just towards the goal of movement ^{or something}
to meet the resurrected one

i.e. ^{as if} there is some internal thing going ^{on there well, that's} an indication
paths to others
i.e. some kind of ^{leadership} of yours
when you understand it simply
that you can meet at any time
you can meet with the resurrected at any time
not to mention the resurrection
of course there is already a completed fact in this case

from the point of view of God's Vision
in the faction of collective Consciousness
He only perceives resurrection.
because He has no idea of it after all
that "man can be ^{destroyed} "
i.e. He ^{kind of} introduces this point of view from the very beginning
further modifications will be introduced

that's why here
it is the modifications that are introduced by people

and then when you know it
it turns out that here you are already entering the system
already as close as possible to the obligatory meeting

and here is already a meeting, ^{generally speaking}
happens anyway
i.e. sooner or later
but it necessarily occurs in a full cycle

i.e. you definitely want to meet with the resurrected one
^{Well,} when he is normal, physically alive and healthy
and at the same time at the usual level of Perception

so now go and work here
bringing control

to the normal level of Perception
work on this information

mandatory meeting
at the normal level of Perception

This is where I end today's seminar.

Thank you very much for your attention
