

GRIGORY GRABOVOY
Teaching about God
Self-organization of God with the controlling action of man
21.01.2004

Hello
The theme of today's seminar
is my Doctrine of God
The self-organization of God
with the controlling action of man

In this topic, I'm looking first of all at the fact
that when we talk about the Self-Organization of God
we are talking
about the Infinite Structure of any Action

ie the first action, even the most initial one
is already an infinite structure

so when we consider
for example the position of management related to the fact
that we are talking about such a structure of being, for example
where man himself is organized
here we can say
that God is the Essence that organizes
both the Infinite structure
and, for example, finite action

so when we talk about God's self-organization
we have to consider
as a kind of projection of the Infinite medium
into some kind of movement

I mean, if a person moves his hand, for example
and some action takes place
then this structure as a finite structure
is a manifestation of the Infinite Macro Environment
Well, for example, if we take the initial position like this

then we can say
that when it comes to, for example, Macro-rescue
or the cure of serious diseases
we can assume the Action of God
as a structure of management in this level
is the organization of the whole process

both Macrosalvation and cure, for example

ie God He exists
in the very act of healing, for example, yes
but also in the very act of Macrosalvation

therefore
when we talk about the self-organization of God
there are two levels
This is the level of manifestation for man
what does a man perceive
and the level of God himself
where man's attention is his Perception
is also the Action of God
from God's point of view

so when we consider this process
with the controlling action of man
we can say
that man's controlling action
can hence be quite an Infinite action

because when we enter
into the control system
we are, generally speaking, in an infinite medium
manifested for example in the optical range

and the detection of this infinite medium in general
in order to get a control action
this is the level of human self-management
including, in general, self-organization
from God's point of view

Here we have to be careful
because when I say "from God's point of view,"
we have to consider His point of view

So when we talk about
how to achieve action, for example
from the point of view of both God and man
we're looking at
the organization of one's own personality
that is one's own approach
so this action
leads, for example, to a Macrosalvation result

or to a result that is exactly the kind of result
when it is possible to balance some actions in such a way

to restore, for example, the original normal state

and on this basis we can say
that this is the normal state
I.e. earlier
normal state of some situation
this is the structure of Eternity in general
which is practically manifested
in the form of God's organization

Because God is organized
both in the structure, for example, normalized for a human being
and in the structure of for example future developments

but at the same time future developments of some kind
in the control system of man
it doesn't mean that there is no Norm there
there may well be quite normal for a human being
environment, of course

and that's when a person realizes
what is the norm from the point of view of Eternity
for God, the norm of the preceding event, for example
is the next action of God

ie God He always acts normally
from the point of view of man and for man
in essence for the Soul of man

we can get pretty much
control mechanism
the same as the level of God's Self-Organization
where, for example, human action from the point of view of God
is a divine action
ie co-directed action
like yes with ideas with God's tasks

and when we see this structure
as a control structure
we can understand, let's say
we're sitting in the audience right now
what we need to do in a state of ordinary thinking
ie without taking any special actions

ie we can, for example, reason about different processes

how can we
save at the same time

at the same time, for example, to overcome

some kind of situation
involving perhaps macro-destruction
or like we could very well be preventing
a macro catastrophe
if we are in a situation of Norma

ie Norm is basically the structure of Eternity
where is the norm laid down
as a structure of pre-organization
from God's point of view

because when we talk about the organization of God
we can say well
that God is also organized
where does a man not consider
the beginning of his organization

that is, if we just take and divide up
the structure of government into such actions
as a beginning, a consequence, let's say an end, yes
or a pre-primary action
then in the pre-primary action
there is also a certain control structure

and when we want to consider, for example
how a self-organized God
which let's say is self-created
in the perception system of the human soul
He exists before the moment of organization
Himself

then it turns out that since this is
the space of God
then the man perceives
in general the structure of knowledge from God

Here it is very clearly revealed
the criteria of knowledge
ie man sees and perceives that system
that is generally manifested
as an organized system
Well, in the form of some optical signals, yes
in the form of some control elements
from a human point of view

but if he doesn't consider this question

then it turns out that the entire external environment
is the environment
until the organization of God
in this management system, of course

but also this question is such
that before the moment of self-organization
God also exists and is also organized

and given that man can
for example not pay attention to this system
it turns out that the external organization of God
for man
is a human action
but manifested in general in the Infinite Future

There is a very clear gradation here
that we can quite find the future environment
what does it look like
from a human point of view

and when you start looking for this future environment
to look at it in a human way
in a human way
you see
that God in general
He is looking for and doing the same thing

pay attention to this
the approach here is completely different
because I'm showing
that God acts in the same way when man acts

And from this we see the consequence of this plan
that man is naturally a creature of God
in the image and likeness of God
because He acts at the same time
and after man

ie in a kind of pre-organized area
but from the other end
basically, if you look at geometry like this
ie the next action
and then there is the action of God
that is, following the action of man
there's a specific control structure of God

hence we can recognize

this optical action of God
ie identify in the system of information
where there is the Action of God
from the human point of view
and in this way we can give
basically to this property
a level of controllability

I mean, we can kind of cut off the human structure
that's generally speaking to analyze
that's what the person in this system
may not have done completely Yes
or he needs to add something to his action
in order for the future development to be optimal
and directed to the Eternal Infinite Development

then it is necessary to, like, trace a certain matrixYes
consider
God's actions in past events
and separating, for example, the action of man
just correlate in the future
what still needs to be done

Here there is the same macro meaning in the fact
that God himself when he shows
what needs to be done
He also leaves this area
what we don't see
as an organized area
which is an area that needs to be pre-organized
in a logical sense

so here in the analogy of God
man also acts
simultaneously
creating an area that is organized
and an area that actually should be attributed
to the pre-organized realm of his action
ie the area to be correlated and supplemented

so in the area of growing human organs, for example
ie the regeneration of organs that
well they're considered to be practically non-growing
you can use this technology here
basically just by looking at
the trace of God's action
ie how God grew an organ in a human being
and thus adding control

to sort of the pre-organization area
and get a control impulse just like this
to grow an organ after resection, for example

post-removal yes post-op

in the area of resurrection management
it is quite possible to consider a level here
that the resurrection itself is a manifestation
of the accuracy of the World's position

as soon as your Consciousness
is aligned with the position of God
then the structure of government
the structure of the world
it becomes eternal

Then it turns out that we could very well
to have the resurrected in general because
because the World has regained its True Structure

and it turns out that this level of separation
of the structure of the organization
between God and man
is the level of control
where we practically improve
our system of development
from the point of view of God Himself
and at the same time, in general,
we can logically set such tasks
such as eternal development

Here I've made a special distinction
that a human being has a Truly Eternal Development
ie God gave initially
to everyone to live and develop eternally
but a logically set task
is a kind of logical adjustment
in a man's own organization

he may think that just by setting such a goal
he can achieve it logically
even if he didn't have, for example
initial knowledge of some kind
that he has it in his soul

and what is in his soul
this knowledge is initially given to everyone

in his body
Soul
in his Spirit
in their Consciousness
in all aspects of the personality
and this is an unconditional value
which in general, well, can be postulated
exactly in logical action
exactly at the level
where the basis of logical action
is the level of the next human development

thus logically posing a question
or simply as a goal
Eternal development
and as a basis having a real structure
we see that in man the essences of that organization
in fact the essences of that organization
that God possesses Himself

ie the level of organization visible
from the point of view of organization
i.e. the logic of man's actions
and the level where man is practically already saved
he's from God like that
but at the same time this level is
in the system of pre-organization

a person has to put on a willpower, let's say
just these two levels
in optics it's generally simple
The infinite level of the divine manifestation of man
and logic, which is like a layer superimposed from above

and here is the selection of this structure of the upper superimposition
this is the level when God is organized
with the controlling action of man
ie man's controlling action exists unconditionally
and also it exists outside of him

Here I introduce this very value in the logic of control
I am introducing for the first time
precisely from the point of view
as a method or methodology of management
because earlier I always reported that

that the principle of management to a greater extent
is the level of human volitional action

and in this case I show a completely different value
We have to be careful here
because this value is such
that the controlling action
from God
and man
exists outside of man
but it is a human action

hence
man exists outside of e.g.the physical body
ie he exists by the Soul for example as a control system
Spirit as a system of Infinite control, etc

and so when we define
this point this position of the Universe
we see that the World is really Saved there
There are generally speaking there are not any
exactly predictable problematic situations
exactly predictive because there
very clearly opens
the mechanism of what should be done

ie there appears
quite simple from the point of view of mathematics
a certain graph appears
where you can absolutely see
these possible spikes
that may occur in the future
and you, from a control point of view
you can only manage these outbursts
with a kind of willpower to normalize them

I mean, in this case, I've shown you
a methodology for identification
as a generally suboptimal state in future events
and by willpower you can here
by a normal optical glow
for example from the side of your brain
or any cell of your body
already from the body to equalize the position to the norm

therefore
the body has a control function
where is the binding to the body

is the level of accuracy of the action

So all you have to do is to do the control
from the body
from your physical body
you get the same as the Physical Body of the One God
Infinite action in the finite level of control

here you can see and understand immediately
i.e. at the level of control
where you control unconditionally
together with God you are ruling

there you realize
that in general the physical body of man
is the level that carries within itself
all the information of the external Reality

It's just that I've sort of divided this level of Perception
into certain stages, as it were
where the control algorithm is the control from you
and the algorithm coming from a specific point of space
outside of you

and that's when you
this point of space to consider
you see yourself but in the Soul of God

Now, notice what I'm saying here is
that when you see yourself in the Soul of God
you are saved
and there is nothing around you
any global catastrophe

Moreover, you can generally restore the action
if there were some earlier catastrophes
you can restore the action to the Norm
it's enough just for the project
the early catastrophic actions in general
to project onto the Infinite System
in the organization of God Himself

because as soon as you enter
into this system of control
actually being in the Soul of God in essence
with your faction of Consciousness
you begin to be able to reconstruct
including past events

and it's quite easy to get a normalization
in terms of future events
because in the Soul of God
that past events can be normalized
and future events are basically the same, as it were
in terms of the power characteristics of control

all you have to do is see
your own body
in the information system
ie to give a semantic level to the body
where the body is in general like a coordinate system

when you consider
the coordinate system coming from the body
you see that God has given you a realization
not only the position of the body
but also an awareness of the position of the entire external world
in relation to you

And what's more, you can see locally
where is your feeling
where is
your, like, level of thinking
in a space

as you begin to enter that space
you see this space
is basically just
a level of universal norm

you're in
in a fairly average space
that is, a person's personality can be
in a kind of unified environment
and yet it is preserved and is
completely individualized

so you see the unification of the individual and the world
like an unbreakable connection
of the individual and the World
and yet the world is not separate from you

when you enter this system of control actually
you see
that you just have to group yourselves inside of it
ie to give the property of normality to your organism
everything around you is normalized

so in this case the process of treatment for example
it's just a level of reaction
to your internal organs to your internal state

i.e. to normalize the lung
it's enough to visualize in the memory
in the area of the right hemisphere
if the right lung
right lung
remember it
and send a signal to the other person
and that person's lung will be restored
I mean, the principle of analogy is what God does

when you want to look at other processes
I'm just giving you one specific example here
You can just look at
which organ restores
in general any other organ in another person

maybe it's about
that you need to restore, say, a tree

or a forest from burning out
Then the question arises how to do it

in this case it is enough just to enter
into a system of continuity with the external environment
and basically just represent the array
as a norm
that there is no progression of fire,
for example, or there is no fire at all
if it hasn't started

then it turns out that we can quite
at the level of ordinary Thinking
to get positive control
just by thinking right
that is, actually sort of picking up or seeing
those fragments of the environment
that you need to bring the control system closer to
or that needs to be helped

so that's why we can consider here quite well
this position
where I started today's lecture
that in a state of basically ordinary Thinking

when you're thinking about different tasks
to be able to do normalization
to be able to see the situation
and to be able in a natural free state
to normalize the external environment and the internal environment

that is, when you start to be in that state
you see that even if you are
in, like, any place
where you don't necessarily have to do force concentrations

or macro-saving technology concentrations
you're still saving
because you see that environment correctly

and when you diagnose that environment correctly
ie you take the initial signal
then first of all you are already equalizing the environment
that you need to help where you need to optimize the events

and secondly you simultaneously
at the same time you introduce a control level
just by self-regulation

when your self-improvement, in general
even in this level reaches this level
ie self-regulation becomes such
that you see the environment at the same time
as a regulated environment
and at the same time
as a kind of external environment that needs to be helped
that needs to be managed

then you can see here
that for example if you take there a subtlety of thought
you want to think for a long time about some situation
ie to introduce some subtle thought in optics
into the control environment
then you can up to the necessary level
introduce control

ie make it, for example, highly intelligent
or, for example, slow it down
make it simplified in some way, etc

that is the environment that is exactly
the environment of the Creator's organization
the environment where God acts

and the environment where you act
it's a universal environment in terms of the fact
that you can vary the momentum of control

That's where I've come to the point
that you can vary the control impulse
in real time
without even having to load it
in the area of logic control

I mean, you have to be able to see with your soul and your body
at the same time

when you see this control structure
it turns out that your state is control
you're in a continuous connection

Let's say it feels like this
that you are somewhere in the sea in the water
and the external environment is, in general, sort of
is perceived as unbreakable
in relation to you
Well, water as an inseparable factor

when you enter such a control process
Of course, this is just an analogy that is quite conditional in general
but it is also a training

when you start to be in this state
Well, it's like you're swimming, yes
in a controlled environment
then you see that external events
they are organized in the same way
as you are organized in relation to God

ie an external event that, for example, well is manifested
as an event where you have to do control
is manifested here in such a way
that it's quite possible to separate the faction
to the level of organization of the event
and it is also possible to distinguish a faction as if already
after the level of organization

Then what do you see here?
basically a simple analogy
you can go into the root of the event
the root structure
or the root constant of the event, so to speak

where is the separation
between the event itself
and between the idea of God's task
in relation to the event

then you may well see
God himself in the action

because what I'm teaching now
is to see God and His actions
and to be able to then act directly, directly
because the next action
the next methodology could be, well, it could be such a methodology
that you're going to have to introduce
your own management
in terms of decision making

then it turns out that when you see
how God acts and shows
then you can act the same way
and the number of combinations is, let's say, basically Infinite
but here you have to keep in mind
that the exact action is always a concrete value

and when you see God's action
and you see that there is an exact action
then you can
grow an organ in a person
almost instantly
even before the level of organization
You just have to go to a level
where the organ has not yet been organized by God

Technologically, it's easy to do
in terms of the growth of the organ
for example, considering growth
as a level in general including the organization of God's organ
we can go to an earlier time
and consider such a process
that the already large mass of the organ
is already the next state
then we can from a smaller mass it can kind of grow
and that's it

In principle it can be done
if we know at least one cell
ie the location of one cell of a given organ

So the control problem in this case
is the task of finding
a kind of primary sign of control
from where the control should be placed

and in the same way when it comes to making sure
to avoid a macro-catastrophe
you have to consider the sign
from where the control should be made
to avoid a macrocrash

There's no possibility here
For example, let's say we do a second pulse often Yes
In the first pulse you have to correlate
so that there is no macro-destruction

then it turns out that this is the level of unconditionality
i.e. the singularity of action
is your normalized state now

I mean, you can say
that it's only necessary to fix
normalized state
now
in the world in society
and store it somewhere in some memory cell
or in the cellular control system of the organism
and then there will be no more macro-catastrophes

ie what you have now is a guarantee that
that in the future there won't be macro-destruction

So then we can transfer
mechanism this can be transferred to the fact
that there won't be, if possible
and some localized disasters

and ideally, in the Infinite Development in general
there should be no such thing

Then it turns out that your natural state
is again the level of normalization of the environment
and at the same time such a level
which is also a guarantee
that you don't need to take
any additional actions
so that there is no macro-destruction, for example

then the question is
what is done, for example, in the case of taking
intensive action

in this case we are considering
in this structure of my teachings
that there is a transfer of knowledge
where you're basically improving
as a person, as a manager, for example
just in terms of even solving personal problems
you show the technology to others

but at the same time, your personality becomes such
that you're the next level
That's exactly the sign of a seamless environment
The next level is practically
you kind of organize it in such a way
that the previous level is basically the beginning

that is, you organize the environment in such a way
that each level
has its own fundamental meaning

and then it turns out
that you're almost constantly increasing the level of possibility
that there won't be a macro catastrophe, for example

which means that every previous level
guarantees that it won't happen
in terms of the generality of your personality
and the way this technology has evolved
that you're constantly backing up
and each point
is the same level of unconditionality
that there will be no macro disasters

That's exactly how God himself works
in terms of action
in relation to man

ie God gives knowledge in the same way
so it's quite possible to receive knowledge
as a system, for example
of a powerful optical level of Perception

When you look at God
you see a powerful optical status as well

and then it turns out that the more you
for example, consider a given position
the more you practically reserve
the security system of the world
in relation to God's tasks

ie God sets different tasks
for example, the infinite development of the world in general
then it turns out that here you have to
this task to see
and correlate your actions
in relation to all the events of the world

then it turns out
action
pre-action
investigative action
it's all one
in your perception impulse

which means you have to consider
the position of perception as
as God sees it
I.e. you have to see
the universal essence of control in general
the universal essence of any state of the environment

I.e. you must see
that the environment around you
is a universal environment
from the point of view of management
and it's also your environment
I.e. you are here too
for example there in the control system
near the physical body

When you see this system
you see the manifestation of the Law that
that your control is correct everywhere
and so you're just observing
your own fact of control

but you're not just kind of mechanically
you're observing it from the outside
but you're seeing your own personality here yes
at some distance
from, for example, even the object of control
that is, you see how your personality

is developed at all in this world

because God sees Himself
in universal manifestation
and you naturally have to strive to understand
how God perceives the world and Reality

so when you begin to understand that
it turns out that you may well realize
that your personality is what it's full of
I mean, the point is exactly

to experience that fullness of personality
when the external phenomena of Reality
they are indivisible from you

I practically embrace you
all the phenomena of Reality harmoniously
harmonious state of personality

then any control
is an action
in general, almost at the level of creation
ie any element of Reality
in this case you create
within your own personality

and when you start to understand Reality in this way
to understand reality
you start to build a control
from the ground level
that is, you create a place from which you do the control
and virtually conduct the optical pulse
to control the environment

you just get a segment
practically consisting of two points
initial level of control
and action level

the action level
can be
approximately all the time in one plane
there at one point
or in one area

so you don't have to move away
to something great

or infinite distance
to control
some macro galaxy, for example
or you don't have to make a control system
what has to do with the growth of tissue

all you need to do then is to just
to form the initial level of action

because once you've formed
then the action often spreads
almost unconditionally
The Soul moves itself, that is, it is a movement from the Soul

and when you start to see
this level of reality
it's finding the primary level
where that piece of light is kind of projected from
in control
this is a special action also connected with the fact
that the organization, for example, of the Creator
God's organization
it is also the level of primary organization

and when you look at that level
it can be considered
the level of the pre-organized realm
an area where organization has not yet been observed

so this area
it's also continuously connected
to the organized area, which is you

and then it turns out that you
you can quite easily accomplish this action
just by looking at
your own body
in your perception

so you just have to look at your body in the right way
at your body
that's how to look at your body
and how

to do that, you just have to bring out
the control structure in the form of Spirit
ie make the algorithm simple enough
in control

first of all, for example, the cone of Spirit
what you see
like an out-of-body glow

then you look at
the structure of the soul
where the Soul is the outer and inner component
of your physical body
that is outside of the physical body
and at the same time it's inside in action
ie inside the Soul is the Soul in action, it's Eternally living

life is action
For example in this context we can look at the controls

then the momentum of the beginning of the luminescence
where this segment of light comes from
it is an impulse that is formed
like silicon means when it is used
in order for there to be a spark
when the Soul interacts with the Spirit
while being oriented
on the eternal development of the physical body

It turns out in this way we form specifically
the beginning of the segment
the next action
for example, to make there a recovery in the gym
for example powerful recovery in the hall
and for example if,
when people are watching a videotape for example
so that's too much

then it turns out that the primary segment
starts to go to Infinity
ie Infinite wellness Yes, for example

we see the action of God
how God teaches how to restore
how God teaches, for example, to be healthy
of a human being
and how in this case to make it so
so that there are no macro-catastrophes

An infinite level going up
We can see God from here
I mean, sitting here you can see God

Make this control
ie organize this section of control
from yourself
from some area
set your goals
and you'll get a better result right away

I'll work with you now

When you're working, you try to take your time
'cause you have to see
the achievement of the action in a calm state

which means that you must, at the level of the spirit
at all times perceive the attainability of action
I.e. you must know
that the action is attainable
for example, or in a specific time frame
or in specific circumstances

ie you need to have complete confidence that you are
that you're achieving the action
then you work in peace

but the thing is that the very concept of "management"
in this context
is that the spirit that is actually getting caught up
into this system of control
it always enters
into the realized control system

That's exactly the difference
between God and man
that when you act
in the analogy of how God acts
you have to know here
that God always acts
in terms of realizing His actions
and any positive action necessary even for man
action
he always accomplishes

so when you enter the pre-control area
enter
it's the very area
that is seen as the pre-control area
God's actions

Well, that's a rather arbitrary value, of course
but from a human point of view
we can introduce such a conditional
general characteristic of governance
and consider that in fact God has put
in the impulse of control His own
His own impulse

then it turns out that when you do a control
coming from you, for example
into a given area of control
you can see quite clearly
what God is doing in your task
and be at peace
just getting closer to the task at hand
from God's point of view

This is where the mechanism of approaching
to the task

because when you approach the task
for example by your own intuition
it turns out that you may well
get often
in the area of pre-organization of action
in relation to
the way God has set up the control

so in order to get right into the right action
you must see the Light of God
coming through the realized event

and sweat the release of that fraction of Light
Well, it's actually a kind of track to follow
This is the level where you may well meet
for example, there's the next traveler, that is, walking the same path
but walking towards you

When you see him coming towards you
that's God
If you see the traveler somewhere else
that's another way

when you consider, for example
management in this context
what is the right way to walk
on these, like, sleepers, yes, conditionally

you walk on the rails even

then it turns out that you can well imagine
that if, for example, a train is traveling on the tracks
you have to get off the tracks and let the train pass
but how do you make it so that you don't have to walk a long way
from one point to another
Well, that's quite a conditional problem
and the tracks are just a symbol of the fact
that a train can move there

Then it turns out that if you stand on a sleeper, for example
you can immediately find yourself in your Perception
in the realm of realization
But it is a symbol of stability Well, in general, in this case
here is the symbol of stability
are sleepers and rails

ie you have taken a conditional fraction and put it in control
you have introduced your own action
in relation to management

Well, you haven't really done any control as such
ie you just introduced to the environment
providing, for example, stability in your management

then it turns out that in general this control environment
is essentially what you form
the external reality so
without even looking into the control process

because in this case I didn't say
that you have to identify the object of control

and you've often noticed
that the preparation for an action
contributes to that action
when you're not actually doing, yes
this particular action in management

That's the mechanism here
but in this case I meant
first of all allocation
of the light coming from God
in terms of a realized event
to go the right way

Then the fragment next is similar

but you have to increase the control system
i.e. add a target fragment

which is your goal Yeah
to see, like, the end of this path
where there's a realization of events

or to see that there's a train on the oncoming track
you see that it's a track and not
just some railroad tracks and so on
so you're magnifying both the external environment
as well as the control objective itself

so you come to that Light

that exists in you
You do it yourself
What I said
it's just your logical actions
that seem to justify the sustainability of control
and performing actions
for the uniqueness of this control

This is especially important
from the point of view of preventing macro-catastrophes
when something else cannot be allowed
and every action has to be directed towards it

when you're in a natural state
in a normal state, such as you are right now
when I say that now you should be
in a normal state of being exactly that
where there is no special control
this state is also the state where there are no macro disasters

when you, for example, begin to recognize
signs of a control state
and the sign when the control comes from somewhere
you see where the control is coming from
in your Soul
ie how the Soul forms the control in the first place

ie you see how the Soul practically moves
to the control structure
so you see the growth of the Soul in general
it looks like just optical growth
I mean the optical level is increasing
when you look at the information of the Soul

but you see the Soul itself
so you can look at the information
but you can look at the Soul itself

but when you look at the Soul itself
you see how it organizes control
and then you look from the Soul itself

that's a tremendously important level of control
when you look
from the Soul to the Soul itself
and you see how the Soul operates

so then you're in the same realm
in the same realm

That's what God did when he created the world
He was in a single realm
He made the whole multifaceted Reality
including His own self-organization
Included the control system and self-creation of His own
produced, for example, in a remote area
of His Consciousness
at the same time He actually appointed the Consciousness Himself

ie all actions are simultaneous
but from one local system
how to make a monosystem multifaceted
ie Infinite system

the problem is that for this purpose it is necessary
that is the goal of control
and the action leading to control
ie external attributes
basically all of these things are all directed towards
what do you see
the self-improvement of one's personality
Going on God's tasks

when you start to see those tasks
in the form of specific tasks
you see that the Light of God
is the Light that organizes everything

This is where you see God Himself
as a level of, let's say, information
as the level of God

and as a human being

When you start to see that
you see that man is Eternal
In general, man is Eternal in dynamics
in any general system of manifestation is Eternal

but here a third question arises
why, as if in everyday Reality
there are other systems of action
For example, there are some problems
related to the biological level of decay, etc

ie here it turns out
that this is exactly the level of pre-control
ie the level when the controlling action of a human being
is outside the level of, for example, human organization
we just get such an imbalance

when a person, for example, seeing
what is happening and how Reality is organized
by the fact of his own organization
is in conditions
when, for example, diseases of destruction are possible, etc

ie here is the level of knowledge
that it is necessary to add here so to say in knowledge
that the level of organization of human actions
should be exactly like this
when a person independently co-organizes
together with the Creator, with God the One

when you begin to recognize this level
then your actions

are the level of your own self-organization
the level of your own self-creation
in any action

Once you know how to do that
you see that Eternity is happening to you
not because there's some criterion
such as such a rigid and absolute one
that man as a physical matter
has the property of Eternity
and that's all

but because Eternity is a state of being exactly that

that you develop through the work
Soul
Spirit
Consciousness
and including, of course, your physical body

In this case, the role of the body is such
that the body is almost like an accumulator of knowledge, yes
I mean, the body as a system of integration of knowledge in general
of the Soul, for example
of the body including the body itself as a separate spectrum of knowledge
Spirit
Consciousness, etc
ie it is the level of identification of your personality in essence

and when you start to see that structure
in stewardship
in the indivisible governance of God
you see that God
He's also a person, even the ultimate person
who is doing virtually with you
practically the same work

it's just that He periodically sorts of enters
into the macro-control system
and regulates other environments in some places
and your task is to be able to do
what does he do
because when you do that
God has the next task

and when you see that, like, the term
"God has a next task"
you see that He's the one who sets those tasks for Himself
then you see how to set your own agenda
just like God does

then you're practically entering
into a system of basically autonomous control
ie you're self-managing
in an autonomous area of your personality

and it turns out that in this case
you both set tasks and solve them
Again, the level of naturalness of the state

everybody's used to the fact
that they mostly form their own tasks on their own

so it turns out that you're in
in this fairly logical environment
and it's clear that you, as the taskmaster
is the beginning of this glow
where the action comes from you
to the goal of control
is action coming from you
as a physical body, ie as a person in fact

where you are practically, so if you set the task again
of identifying this segment of control
where there is the formation of the initial action

ie the main thing here is to find
at what point in space
the initial impulse is formed

then this point is already known to you
it's you yourself
your physical body
and here it is only necessary to add
the state of the soul
a state of being with whom the Soul is standing next to Yes
"co-state" of standing with someone at the same time
Well, if you put that kind of meaning into the term

then when we assume this state of looking at it
in relation to God
we see that all other people
have equal standing

So according to my teachings
it is in this control structure
transfer of knowledge
it's often instantaneous
all you have to do is reach a level of control
and it is precisely in this Infinite unbreakable
space of governance
all people become the same

That's why God, in creating the control space
naturally gave everyone the same level
of divine development, ie eternal

When you start to understand it logically
you see
where logic is separated from the irrationality of the Soul

ie where the logical phase of the Soul
actually transitions into the logic of Consciousness
you see how your Consciousness is formed
by God Himself

This is actually a very important moment in management
when you see
the formation of your own Consciousness

because consciousness is a personal characteristic
where you can vary your management
to somehow increase the resources of the Consciousness
by studying some science subjects and so on

and in this case you see
what happens when Consciousness is formed
God

then you get exactly the process
of human free will
it is the process of free will
that man is
in a harmonious free state
and sees that the formation of Consciousness
is also a process of control
for God

Logically, it is clear
that since God created and is creating everything
in the current real time
this is His process of control

and so basically we can just stand here
to this position
when we get
to this position from God's point of view
we can see
how we can better shape our Consciousness

for in this case
the criterion of God's action
as a matrix of development
is the level where we can quite possibly
to see His Action as if in vain
that is, we can see what He's doing as a human being

when can we see it
there's an unconditional factor of knowledge transfer

and you can always distinguish
the true God, that is, you can always see
that this person
is God
and at the same time His actions are unconditional

ie he gives in the area of pre-organization of the world actually
ie he gives in the area where actions are not formed yet
there for example sound
the action of a thought
the action of some image
or material level

so His action is such
that His physical body is organizing

naturally
the whole external world
the entire external reality

and then there it is
generally speaking, there is a special question
it is connected with the question
how god organizes for example
for example the Reality related to the fact
that if you, for example, want to form a control
then this control must be
a control for example coming
from you
and from God at the same time

Then it turns out that the shaping of Reality
like the shaping of sound
When God makes a sound
He is the first to assume
that sound can be different
Let's say in timbre, yes
It can be different
some kind of situation with the volume
It can be that there is such a status
as soulfulness of sound
there is a soulful penetration of sound

then it turns out that when you start
to do management from the point of view
that we have for example a control
coming from, let's say, the timbre of the voice there
or the sound parameters of the voice

then we can say that, let's say, well, if we consider
the specific application aspect of control
what we need in sound form
to change the structure of an internal organ
there to restore yes in someone from the environment

Then it turns out that the sound vibration
is restored

I mean, every level of control
is a level directed to the fact
that God creates phenomena that are inextricably linked

so when you see
control coming from God, for example
to you
ie through, let's say, the Physical Body of the One God
you see that it is enough
for the Physical Body of the One God
just do your job
something God can do

and it can just vary
sound forms
forms of action
and you have the absolute norm

and so can a human being
ie, he may well realize
what sound to apply where
what form of control to apply, for example

so there's a factor to consider here
that if you put
just in the timbre of your voice or in a thought
some vibration of the soul
some soulfulness in control
then you're achieving control
because you are thinking in the same general categories
but you just add a controlling status
to your ordinary actions

and so when you look at it, for example
from the perspective
that God is a man
and He's doing some of His own things
including human things

then you see that by analogy
you can do some things
just by putting into them
the structure of actually pre-management in general
or a structure of sort of control action
where can you actually quite
a segment of the plan
that if, for example, you make a management
that goes well in the everyday way of solving a question
as a logical control system

then if you put the meaning of control in general in such a way
that you can, for example, make a control
coming from you, yes, for example
from you
to the Infinite Environment
then quite here will be manifested such an action

that if you, for example, make a control
coming from the external environment
to you
I.e. you're looking at
let's say the sensory level of control, yes
then here the external environment
can vary in such a way
that a sound or verbal form of control
is the external environment

I mean, notice here
I've varied the control quite a bit here
in terms of making it clear
that the external environment, that is, any external Reality
is your own control

that is, when you start to realize it
at the level of, like, generally speaking,
as you can say even more here
at the level of the Spirit in the depth of Consciousness
that is in the deep state of the Spirit

when you start to realize it
you can quite see this factor
that your own control
even if you're increasing in speed
ie speeding up your speech, yes
you create some phonetic control systems in speech
or you can increase

the intensity of sound from the Soul

I mean you can increase
the control structure from the soul
while keeping the speech smooth, for example

but you can use the mantra sign
you can use
some other vibration of sound

and you'll notice
that you can do all of this mentally
I mean, you don't have to say it out loud
but when you do it mentally
you should be able to see here
that the control, for example, is mental
I mean, the mental control comes from the fact that
what are we doing

ie, we
Why is it that the word "mental"
consists of, for example, the same level
that first we say the word "we" Yes

ie mental control
has the property of uniformity

if you're doing some kind of control
from yourself
it turns out that other people
may well be able to recognize the control system
from the point of view of this optical level of luminescence
of this thought

and when you, for example, take
control actions
it turns out that in general your control
is also, to some extent
unified management of another person
aimed at, for example, ensuring the vital activity
of the whole environment and yourself, yes, including

and here you see that the other person
is also acting according to the Will of God
you can look
by seeing his action
to see that in the diverse world
God is not manifested as often

there's some kind of unified or large environment
Yes exactly where there are many parameters of information

but God is manifested in such a way
what you can see
just one person
and through him you see what God looks like

Then you see only God

what is when you start
to see specifically only God
then all your control parameters
for example, there are sounds
parameters so let's say definitions of control
as the movement of a body, yes, for example
or the movement of sound
and external parameters
they start to merge
essentially into a single state again

I mean, it's like the vibrations
of the sound of the external environment
your own control
and when you see one person
or just God
you see that you're in a system
where information is practically
it's not really defined completely

so you're getting into an area
where the control is not yet perfect

So in terms of abstract quantities
for example it looks like this
that there's an external set, there's an internal set
and then they merge
There's an indeterminate set
where you can do any kind of control

So you get into this state
but not in a trance-like way
so this is where it's very important
that you have to see it logically
In this case, I've shown you the structure of control
from a logical point of view

I mean, when you act logically

you see that all the external information that is created
is actually like pre-control information
and you can use it to build
any kind of control system

naturally creative
because there is no other level in this management
there is no other level
even if, for example, someone wants to construct somehow
any other environment
in conditions of unity of harmonic type
when you see the Action of God
you can only have creative action

so when you start
immediately build some actions
from the point of view of creation
it turns out that you're quite giving this environment
some informative meaning

If you give properties
and at the same time you have to understand very clearly here
that the environment exists as it is
outside of you
You know, like the environment Yes

so when you start doing
you are doing in the area
Where is God doing?
in terms of planning for future events

And in this case, when you're already realizing those events
you can do well
that control status
that any event is revealed
as a system of Infinite Mass
ie a very large informative environment

For example, it's like a big white infinite cloud
and you can take the luminescence from this cloud
to direct it to your events
and get the maximum concentration of control
already in a local event

but here you just come to the point
what you are confronted with
with that environment in general, in general
that you're actually isolating

a spectrum of events in such a way
that the logical level of events
That's when you start to bring that environment closer to you
you see that the logical factor of events
you've already formed on your own

ie you see that the event is your own personal event
you have already done it
with your body
Soul
Spirit
and here at the same time with God

which is to say, that's when you're acting
in the pre-control area
you're working simultaneously with God
and you're sort of in total connection with Him

you're practically inseparable from Him
but at the same time you have
a very distinct personality status of your own

ie the full level of personality manifestation
ie the personality is crystal clear
is revealed
at the level of full union with God

ie on the contrary there is an element
not a kind of blurring of the personality, not a scattering
but rather crystallization
although you don't see here a break with God

so when you look at this structure of governance
you start to see it
as a structure of, for example, sound forms
or for example the structure of control coming from Thinking
or the structure of, let's say, the verbal phase

then you see that essentially just in some
in this or that situation
it's just important to choose from the control mechanism
natural for you
some status
and to saturate this status with a property

if you are thinking
then maybe you can illuminate this thought, yes
more intensely

If you speak
it means to put in your speech, for example, a restorative impulse
Or so that your speech can restore others, yes for example
you can do this

or some kind of control elements
what your thinking
Just Thinking is Restoration
It's about helping

So when you perceive external space
it appears that you have quite
often a restorative cycle of control

and when you look at, let's say
that your control system, for example, is already balanced
and you've created sort of an original source
at the level of logic
as God did

then you can say quite a lot
that you've done the right thing
and you created the event

Once you get to that point
you're already seeing exactly the Infinite Impulse Control
ie you've created an infinite level
superfast impulse of control
and at the same time you can see here
that when you this superfast level in general
take it and realize it
at the level of, for example, the development of this impulse

Suppose you need to increase the speedYes
then you have to, let's say the word "superfast"
to increase in size in length
or say it slows down
or replace it with a longer word

and when you start to increase
the intensity of that control multiple times
that is, you start to let's say the impulse is already logical
increase
you're interacting with God again
but at your request

i.e. God responding

to your logical request
increases the impulse
for example, by giving you some words next
or showing you some techniques, yes
for example you can say a word slower
or make, like, more hissing sounds, etc

so when you add sounds like hissing sounds
you enter into a kind of macro-control structure
where the source and the receiver
are practically on the same vibrational frequency

so you get almost a level
when you have another property
if you accentuate in general it's just even possible to do that
that you don't have to accent the hissing sounds
you can do the opposite
let's say vowels are more accented
in speech
But it may not be detected

or it may be revealed somewhere in something
but it doesn't have to be Let's say you can do that
just to make a normal speech
but saturate the letters with weighting in general just functions

I mean, for example, a word, if I say just a word
and I start to increase the letter O
then it turns out that this factor of increasing the letter
for example with an optical sense
allows the word to be seen more vividly by others

that is, when you start to just zoom in on everything
as if optical in general and not necessarily even one can say so
optical to make control parameters
but you can increase the spiritual characteristics
that is, you can put some other meaning
to control
and you can do it in such a way
so that your words
they're practically at the level of Thinking
first came out exactly in the Spiritual plan of management

ie having mentally spoken some variant of management
and putting, for example, a Spiritual series
or just on the Spirit level by speaking
Speaking for example with the Spirit you can even do this

you see that this is exactly the external environment
that you are working with Yes
the informative mass of control
it may well remain calm, as if untouched
because you work all the time
with your control apparatus

and it turns out that you only need
just to connect
with this external mass of control
ie this pre-management area
and you're analogous to the way God organizes himself
you're just doing just a
a system of diversity
in the external world
well, including the inner world

I mean, you can, as I said here

to work at the same time mentally
and simultaneously with words, for example

then it turns out that you're pretty much just
this area of control in the mind

And so it is with God
any external area is known to Him
so he doesn't really need it

pre-control area
for God's logic
He doesn't need it
because He perceives everything explicitly all the time

It's exactly the same here
I've basically shown the mechanism
where do you work with the form?
with intensity
with sound
with some vibration parameters
you can take control
going any distance
but without affecting the pre-control area
ie without actually affecting the source
out of control itself

I mean, when I outlined this cloud
I said that it could well be considered

as a source of control
from which you can build any environment

So it turns out that you can work
with just your own structure
So you are the source of control

and when you start to see
this interconnectedness
it's quite clear that it's enough in your Soul
to consider
for example, the parameters and principles of control,
well, in general, of this type
that you find in your Soul a controlling status
ie for example there is a vertical column of light
which characterizes the achievement of some kind of control

in the area of the heart, if you will
or in the area of the lung
or just outside of you
just the light that is the light of control

then suffice it to say that you realize
that this light is the realization of your tasks
You don't have to take the task
to the level of decoding
You just need to perceive
this light in this place
You know what it is
You don't even have to translate it into words

so when you start to understand in a different way
that is to understand the essence of the world
then you get the guidance that comes
from your soul and from God
who is practically right next to you
and to a certain extent He is working through you
and at the same time your own control

then it turns out
that you may well already be working
with conceptual systems
that is, systems that don't require
the level of pre-control in general

and that's how God's level of control is organized
there's a level of organization of Himself
together with, for example, the organization of human control

this is the level where there are no third values

ie here we can see such a status
that when you, for example, do the control
coming from you
to, for example, some infinite quantity
Let's say you need to shape
the whole external Reality in such a way
so that it evolves like the Earth, for example
that people live everywhere

Then it turns out that this control status
is the status coming from the logical phase of control
but the final level of, let's say, control
when everywhere and everywhere in the infinite level people live
Here the status is
that the other Reality is kind of superseded
ie there is no other environment

but if we find a second planet where people live
then the interaction between the two planets
it's a status where people are already living
in fact, practically logically speaking
in two places

but here it turns out that if we
we don't find a third place in some other place
people live practically even if in two places
it's everywhere
So the logic is that a person can live anywhere

When you start coming back
to the logic of, for example, the primary level
then you can say quite a lot
that a person lives on Earth
he can live anywhere then

that is, by building these logical systems of connection
we can see well
that man himself organizes the external world

and when you start to see that
that man is quite capable of organizing
the outside world
just by the procedure of Thinking practically

then you can quite see

sort of the next set of controls
that it is only necessary
to give to the general construction of the World
practically the properties of control coming from you
you can achieve control
anywhere in the world

that is to say, to reach the point
where a human being in principle really
can live anywhere
I mean, if there's a vacuum
then you can create matter and oxygen and so on

and once you see
that as soon as you see that matter itself is here
it's a controllable factor
from the current state
That's exactly from the current state
you achieve control
naturally your personal task
also in the Infinite Future

so do this control now
Take any two parameters
make a sort of analogy, like I said
not necessarily exactly like that
and find the third level of control
and achieve control of the personal task
but at the Infinite Level of Realization

ie you can actually achieve
for example there's Infinite Life
in a physical body in one

ie do this management now naturally
well, as if it can be also by doing
some other parallel tasks

Do this management now
I will work together with you

In general, it's desirable to try to do the control
in a calm state
exactly on Infinite Development

because when you work
from the point of view of Infinite Life
it is naturally clear that any state

must be conducive to it

so when you find
unconditional forms of control
for the purpose of eternal development
it's very useful in terms of exactly
what you gain methodology
when in any condition in any action
you're always working
on the goal of your own Eternal Development

then it turns out that you quite achieve
exactly the criterion of Eternity
in your development
through every action
and the action is not that
that you need to concentrate on the fact
that by doing this action
you are contributing something to the system of eternal development

but just on the fact that you are doing it unconditionally
because the main characteristic of action
is to do like God who is Eternal does
He is certainly Eternal and always Eternal

So when He is
in the state of, let's say, the physical body of man
from the point of view of Human Perception
then it turns out that His every action
is both a structure of the current Eternity
as well as a permanent contribution of some kind
to His next eternal development

So what I just said
is often more the work of the external environment
in relation to you
I mean, it's you
but you're working with yourself
from any point in space-time
and from any level of consciousness

then it turns out that when you're
for example, you're doing a manipulation
that is coming to you in general
from, well, here you could say
that from a reasonable level of the external environment
but just such a reasonable level of for example space
where you have formed this status of reasonableness

I.e. you have laid down
for example the structure of your eternal development
here

and then based on that
this structure, it just guides you
to the Eternal level
and practically it
quite organically quite harmoniously
exists together with you
but at the same time it's a technology
ie it is a specific technology of management

when you can see just this structure
to see
how your organs, for example, develop
from the point of view of, well, in general
from the point of view of Eternal Development
and from the point of view of Eternal Development
in relation to how other people
see that point of view Yeah

I mean, for example, the way we work
in the collective consciousness system, among other things
and any level of maximum achievement
in the creative aspects
it's necessarily immediately manifested
in the collective consciousness

it turns out that we have to define ourselves
also from the perspective of the observers
I.e. those people
who work in this sphere through management
or who are certainly there
but, for example, don't pay attention to it

so when we start to see this difference
it's basically a big enough mechanism
to be able to teach those people
who are doing, like, unconsciously

or to add just a little bit of control to those people
who do, for example, well, you could say that here
by special management

Here we can quite see
what is God doing

this is who he adds what to

when we start to analyze here
this particular situation
generally speaking how God adds knowledge
generally speaking, why He determines the position
for a particular person

then we enter exactly into the sense of governance
what comes from God
and here we can see well
such a characteristic of stewardship
that if we only understand the meaning of God's action
in relation to man
we may well add
as an unconditional meaning

what if a man is engaged
solely in management and getting results
then to show him
that there is an unconditional meaning
which is his own personality

where he, for example, still becomes Eternal
even if it doesn't do active control systems
like in some kind of targeted control systems

then it turns out
that again we gradually start
to sort of integrate the environment
where there is no organized control
and the environment where the management is already organized

So that's how God's
the concept of "unorganized environment"
in principle from God's point of view there is no such thing
because God initially
any environment perceives it clearly

then for a human being to come to this concept
it is necessary to be able to synthesize, as it were, to superimpose
unorganized environment
on top of an organized one
or vice versa
and get just a logical target control

I mean, in this case, the control target
is the environment

to which the action takes place
and then it turns out that there is no problem here
you just have to focus your attention on the target
and we get control

ie by isolating only the control environment itself
then it's essentially a pre-organization
or an investigative organization
it's no longer a matter of principle

and when you look at that process
you see
that it's the target management structure that's being emphasized
and when you do this target management
it's a level of basically essentially
that you basically have to very clearly
the target environment very clearly, you have to feel it

ie you have to make it practically inseparable from yourself

then it turns out that the criterion for this inseparability
is again your physical body, for example

it's essentially ninety-nine
and often in some cases
it's one hundred percent accurate
when your body clearly perceives
all the information of the target control environment

but then you practically have to
from the target environment
to identify the norm with your body
that is, you actually both create this environment
and you get control from this environment
Well, I mean, like, let's say energy for further actions

I call it rather conventionally "energy"
because it's your own personality working there

I mean you are inseparable
with the external control system
you set it up

so it turns out
that when you get
this control pulse
it's quite possible to get, for example
an instantaneous control effect

by identifying this environment locally

so to get instant action

it is necessary to localize the environment very clearly

to make it autonomous

ie similar to a human being in essence

and when you start to localize all the multifaceted phenomena

start to approximate

to the structure of human development

then it turns out that the environment starts to take on

the same properties

ie animals become more intelligent

plants become more amenable to, for example, mental influence and so on

and this is where you can see

the future development of mankind

I mean, God has designed it in such a way

that all systems are in harmony

can interact

at the level of, for example, Thinking

I mean, or at the level of, you know, intelligence

which is a kind of universal intelligence

so there's no violation of rights, for example

because it's more intelligent and so on

and then what do we get here?

a fairly integrated environment

where another plant of some kind growing

outside of, you know, maybe even humanity's habitat, so to say, yeah

it's almost essentially also adapted to

and generally synchronized

with the life of all mankind

that in the future in the Infinite Development

if, for example, they come into telepathic contact

and the plant will know for sure that it will not be destroyed

that is exactly the level of interaction

when the external environment and the internal environment,

i.e. the local environment

are integrated

you can quite see

the process of God's very existence as a human being

what is, you can see

when you begin to understand this process

to see why God, for example, chose
the physical body of a man
and why He chose it by His own Will
I mean, why He organized Himself that way

and when you start to see that structure
the goals and the achievements of people become clear
I mean, why do people strive
to a certain level of development, for example
both personally and socially

I mean, on a human level it becomes clear
system of society development
the system of interaction
of, for example, such
generally speaking, maybe quite distant systems
like plants and wild animals and so on

and when you understand that in a complex way
you see that your control objective
it's practically at the level of information
is already in the place where you've decided to manage

I mean, I've got the management here now in this way
from a concentrated area
into a system of solutions
but an informative system
There's no optical concentration there

That's what God does
He brings specific localized systems
into a system of interaction with information
i.e. the Eternal Medium

and it turns out that in order to achieve
purposeful control
and to achieve it necessarily
it is necessary that a concentrated local area
for example, concentrated in the optical range
to be translated into
that you in the form of information
realize
that you have achieved control
Well, for example, your spirit perceived
that you have achieved control

then it turns out that you're quite seeing stewardship
coming from God in such a way

that the external environment practically comes
to you

I mean, your stewardship comes to you
on information
ie you get the status of your own personality
This is harmony
primary source
ultimate source
are you

And when you see that
it's clear that the organization of God
and at the same time the organization of man
is that when you do
from one level practically managing

that is, you're actually doing the management
coming from you at the same time for example yes
I mean, and yet you see
that this control that you're doing
is universal control

so there's a completely multiple situation
ie you set one goal, for example
and because of the fact that the primary impulse and the final impulse
are you
you can create a completely different action, a third action
an action that's kind of outside the realm of your goal, yes
but nevertheless it's an action that kind of emphasizes
your task

Let's say you're doing a concentration
going, for example, to a controlling impulse of some kind
on a control signal
and at the same time you have to emphasize
that outside of that control signal
there is some other reality

then you have to create
an external action as if it were an alternative
that there is a control signal
and there is some other alternative
Yes
there's some other task
some other kind of movement, etc

and then it turns out that in this way there is
a multilayered kind of Reality

ie God created the world with many faces
in order to always achieve
precise control

and all the external existing things
outside this world
is connected as a logical level
well, as a sort of allocation
of the spectrum of unbreakable control
Any other autonomous system
is the allocation
of the unbreakable spectrum of control

and that's how he created
that His own organization
and the organization of man's controlling action
when it happens in the Soul of man
it is necessarily the exact achievement of control
ie in this case you achieve control absolutely precisely

and for example you are, for example, doing the control
coming from you towards the goal
you may well be able to observe
why some
some external actions for example
ie why some
some internal control systems, for example

ie you may well be creating
control system
I mean, you can sort of interact
with your body
interact with sound Yeah
interact in a way
to show
that in addition to the canonical control systems
there are non-canonical ones

I mean, there's canonical sound
there's non-canonical sound
there are canonical thoughts
there are thoughts that are near
sort these canonical ones
but maybe you can't say they're non-canonical
but nevertheless they are born
by canonical thoughts

and so when you
let's say you start to do the management
coming from you in terms of just sort of a goal
you have to see clearly
if possible at least one touch
of this kind of non-target manifestationYes

then the external connection becomes clear
why by doing some kind of management
you see at least one non-targeted

it's enough to see
at least one stroke
It turns out that you are entering
exactly in the universal interconnection
of your governance
and all of reality

because if there was only
localized goal-directed control
it would be that you would sort of, well, exist
in some one-dimensional level of Reality

and to get something external

there must be something untargeted

and it turns out
that this pre-control area here
is just a simple multifaceted Reality
ie it has the same right to exist equally
and it follows that any pre-management
is a fully formed control

ie from God's point of view
this system is so fully developed
and has the same developmental structure
as, for example, your structure
in terms of the purpose of governance

and from that it's quite clear
that when you, for example, do management
your control
going for example to Infinite Development
is basically the status of, well, in essence, such
what are you form?
an infinite number of events
often with a single impulse of control

God did the same thing
He made a single impulse, for example, yes a single impulse
shaped all of reality

By analogy, it's clear that in this way
you see the harmony
of seemingly discontinuous or seemingly unconnected chaotic phenomena

as soon as you begin
to perceive this harmony
you can see that under the conditions of ordinary action
what is it when you are
maybe there in a normal state
in a way that doesn't have anything to do with the fact
that you're concentrating in any particular way
or investing a lot of time in control
you may be performing well
exactly the status of Macro Rescue

that is, you can quite simply by observing
a single external action
let's say a man walks by somewhere
to show that the world is not destroyed
He passed by
so the world exists Yes, etc.

ie and so on this basis
any movement
any element of perception
is Eternity and proof
that the world cannot be destroyed

and given that your Perception
at least of yourself
or why you had a Perception of yourself in the first place
ie at the moment you even began to organize your life
it's clear that the world is not already destroyed

based on these postulates
i.e. by building a rigid system
in general, as a kind of certainty of control
you can do quite well
you can do the management quietly and inextricably
with your current affairs

then it will be clear
that this level of interconnectedness and harmony

is exactly the level to which I have now
I have tuned you to in terms of general here
more of a technological level

and when we consider
the level of interchangeability of sounds and words
it's clear that it's possible to replace a sound for example yes
can be substituted and still retain the meaning of the word

I mean, you can mentally
for example, you say one word
and mentally pronounce another sound

then you get this correlation of yes
I mean, there's this external sign
some kind of control of the next one
it doesn't interfere with your control

so you can kind of pronounce it in the word
as if imperceptibly yes
or by emphasizing some kind of accentuation
just by accentuation

or you can pronounce the word canonically
but in a non-canonical form
to pronounce another level
that would not be distracting
just in terms of physical reality

I mean, you can vary in this way
knowing the laws of distribution of information as it turns out
to vary the control in the way
the way God does

so you create a multifaceted Reality
either by physical action
ie you allow the manifestation of physical action
into some external other attribute
or at the level of Thinking you change the sound form
or at the level of saying the word

so you can quite possibly
by learning to correlate these processes
from the point of view of the goal, for example, by working practically

but generally speaking, to get a result
now
you have to concentrate, as I explained

area
and get the information out
to yourself

Concentrate once again on your tasks
on your Macrosalvation tasks
try to make
so that your concentration is quick
and you get control now
through your natural state

i.e. as if without straining
without doing any special control
That's a special status
your personality always working
even if you're not concentrating

and yet you've got control
fixed
and try this mechanism, it's quite
so often in general
what you have to identify
ie the mechanism that I've just shown you
it often needs to be identified

the presence of that controlling phase

and once you identify it
you're in control
It's a fine line
but it allows you to control
in any state
even if you don't put a meaningful connotation
to the action

that is, you don't put
exactly the wording of control
that, for example, from this action
Macro-rescue, for example

in this case, you have MacRescue
always happens

That concludes today's seminar

Thank you very much for your attention
