

GRIGORY GRABOVOY
The Teaching about God
**Self-organization of personality
by means of an external event**
19.08.2005

Hello

The topic of today's seminar
this is my Teaching about God
Self-organization of personality through an external event

in this topic i show
when personality
for example, it self-creates or self-organizes
that is, such a mechanism as the possibility of organizing
simultaneously with an external event

then it turns out that it must exist
some external point of control
which allows for simultaneous control
how in relation to your information
and in relation to the event

in the technology that I am showing today
a person should consider
primary structure of an external event
and already from this structure understand
that it is already self-organized

i.e. the very process of self-organization of self-recreation
it is certainly implemented in this technology
i.e. he is a person who does not take control over himself
and for example, well, just like God does
initially He exists in all aspects
management
Realities

and therefore He naturally exists at any point
well including self-recreation

i.e. if, for example, we consider God
some kind of dialectic of the development of His Self-perception
it turns out that in the system of Self-recreation
there is a point where He exists before it

and at every next moment

He is looking at
the structure of your next development
always perceiving an event external event

here's the same principle
the technology of this control has been built
i.e. you are considering the structure of an external event
as the structure of the action actually

i.e. you need to identify the action
that any event exists at all

it could be a light element
but it can also be a physical element
it could be anything, generally speaking
perceived level of control

and then it turns out that the exit is at the point
where there is already a personality
this is the level of actual allocation of the act of Perception
and highlighting that the act of Perception is personally yours

when you start to consider
what other act of Perception could there be, for example?

Well, there are some other forms of reaction degree
to external information
there are other people or objects of information
and unlike just information objects
A person's perception is always personal

and when does it pass through the social aspect?
well, some kind of diagnostic impulse
who is coming to you
it can be unified
i.e. you can at high speed
in the case of similar systems
consider the social aspect after all

for example, the same people look at the same thing
on the store window yes
it turns out if you diagnose this event
then there is something near this thing
well, some kind of microfield, so to speak

which turns into the structure of the thing itself
and it is universal
i.e. people see the same thing

and you need to highlight your event

i.e. to see the structure in this case
in fact of his own personality

Well, basically, God does the same thing
He is in any event as if
entering the event
considers himself

and it turns out in this control system
you are in the structure of the thing
in fact, you find the management to be such
that you already have the management level
i.e. to the level of how you perceived this event

and then we get complexity
which for example Well, it is expressed verbally
as a logical control sequence
here it is expressed in that
that you are just like, on everything, if I may say so
you are doing a very simple action

you enter the event structure
as if into the internal content of the event
into the structure of one's own personality
through the element of one's own Perception

i.e. by and large
you are for the structure of your own personality
don't go out
if we consider the Infinite level of events there

and when in the Infinite Plan of Control
Well For example there a person needs to protect himself
from some kind of super-fast or complex system
which is possibly harmful

then it turns out that it should clearly accumulate
in the structure of one's own personality
i.e. to be able to autonomously realize
how to display well as if external control
or how to perceive the element of the future in general

so that there wouldn't be any problem ^{yes}
from some sudden action

then it turns out that he should
element of Perception to see like this
so that it will be at a favorable level in the future

i.e. in fact, if at the level of non-dynamic, ^{as it were}

not fast control
not a reagent control of some kind of super-fast
at the system management level
introduce this technology

then this is the allocation of the structure of the future
i.e. the construction of actual future events
where in the structure of any reaction
you always get it right
to the level of implementation of favorable events
for you

but at the same time it is an implementation
not some kind of template type, ^{so to speak}
and it exists in the form of a universal module
universal solution

there may be a difference in control
i.e. you can see the controls like this
that the modification ^{is like some kind of} information
in accordance with all Reality
happens again in the structure of the human Soul

i.e. an indicator of action
under the conditions that the modification occurred
is an expression of your Soul

i.e. for God diagnostics of events
is how the Soul perceives the event
in the conditions of an already created Reality object

i.e. for ^{example}, there is the Thought of God
this is already an object of Reality
and the Soul actually must ^{well how to} leave
some kind of matrix trace of an event
in relation to God ^{yes For example there}
to the Physical Body of God
or to the element of development of His Spirit

and His Spirit develops
as a structure of external knowledge
for others

and it turns out that here
if God for example would have asked the question there
well, for example, teach yourself through spiritual development
actually how can He teach the structure of development
when there He for example knows everything yes

then it turns out that in this system
here is a prognostication, a certain organization of a future event
this is a completely precise action
for God and here is the accuracy
accuracy it determines
event location structure
from the point of view of God's external systems of analysis

i.e. highlighting the location
for God it actually means teaching
on there Spiritual plane yes
well, like an imitation of learning, he knows everything anyway

and it turns out that based on this
if we do it this way
we start making management
then here is the trajectory of this trace of events
and the trajectory where you perceive with the Soul

in this case the process will be similar
those. in fact, it's like self-education of the Soul
and the recorded event
but in the very Soul

i.e. as if no action is taking place
the event has already been recorded in the Soul
you are addressing yourself

but at the same time you can stretch a certain train
i.e., you can, for example, look with the so-called clairvoyance
i.e. for example there just see events and Spiritual vision

than you see
why is it called "clairvoyance"
maybe you just know and the image exists yes here

and the image appears in Reality

maybe you are the opposite, introducing the image forward

and from a management point of view
this is precisely the most necessary element
i.e. not some kind of fixing clairvoyance
namely, output to control from oneself

then it turns out that it really is then
any universal blank
it acts as a universal module
but which somehow connects to Reality

then it turns out that one form can be universal
in management

you don't have to invent anything
the level that you have prepared
it should match the one you have

i.e. how God transmits knowledge
He just passes it on to the person.
but He knows what He will convey
God knows the level of information reception

the same thing is the accuracy of information transfer
indicates the location of the information

when you consider
element of precision transmission place
then here is the level of sending information
i.e. where is the information sent in general?
determines its source of property
generally speaking the information itself

i.e. you don't have to watch
to the area where this information is located
but we can only consider the message in this area
and by the way, you can consider it
in general the message is simply of a universal type

i.e. there is no need to highlight the address and everything will be clear
what is this information
without any interference at all
you are only looking at the source

which seems to be directed towards information

and it turns out that it is just that
this is the principle of organization through an event
it is carried out here
at the level of not even a defined system

i.e. you don't care what the event looks like
the main thing for you is to determine the outgoing place
in relation to some other place

then it turns out from the point of view of relationships
God
Human
external space how it is oriented
in principle it doesn't matter at all
space can be oriented
under the structure of relations
and here is the personality of the relationship
God of man
determines the exact location of any event

means to define an event
needs to be considered
your structure of relationship with God
i.e. to determine, in fact, some internal resources
or something like compliance with God's tasks

maybe even at least
at the level of knowledge or at the level of desire
it is not necessary to review all tasks

and then it turns out that you get there
into the management structure of future events there
because you are in sync with God
how do you accomplish this event?

then it turns out in the action element
the event can be modified
simply the interaction is carried out by God
as if in a dialog mode

i.e. it turns out you can
at the moment of this level of translation
some event
into the structure of future events
just go and get it as if having agreed, so to speak, with God

change in the management structure, i.e. you

here is an option to negotiate
in fact, it is not at all complicated
the main thing is to see
what is god doing there in this place

i.e. actually get into His form of control
and this is generally speaking a form of Eternal development

therefore it is well like the first one like that
axiomatic level in this control
through an external event

this is the level of selection of that form
which has
the property of Eternity the property of Infinity

i.e. selection in the final system
this certain attribute yes in Perception

it means when we are in the element of Perception
we highlight the structure of Eternity
then any event we
can be modified
including a past event for example

In an ideal case, this is possible
if for example the collective Consciousness can be achieved
transform at level
absence of any factual systems
or, for example, show linearity
cause and effect system
For example there at resurrection it is a linear system

the facts of the resurrection are known
it kind of fits into the logic of people's events

if we change Reality
so that it would disappear
in general from the structure of the information of the World
Well, negative Reality

For example there to prevent some possible global problem
for civilization
then it turns out the structure should disappear
from everywhere in general

only creative Reality remains
should in this case

and therefore the aspect of management
in this case the past
is first and foremost the status of a person
why does he need some information and why does he not need some

there, for example, to extract information
we still need to actually have sex there
the consent of this person of any kind

at the level of collective management
even a person who did not participate in the event
even a person who will be born there in the future
participates in the management structure

then it turns out that the factor of universal agreement
this is the correct location of the human Soul
i.e. the correct orientation towards the tasks of all people

again the structure of Eternal development is actually
the truth expressed now in a personal context

in relation to all people

but so does God
He expresses His attitude
and depending on how a person perceives
possible at a remote level of development
this is the attitude
he is forming either for example there well good health
or he is forced to improve his health there once again, etc.

i.e. here is a system for viewing the development of interactions
your task or your personal life
in the complex of the task of what God shows

that's when the match is complete
it is not necessary to follow it directly specifically
on this impulse
because people are all busy, they often have their own tasks
here are some of them For example there are household chores
and urgent action needs to be taken there on Macrosalvation

then it turns out that a person cannot interrupt there
doing some household chores

it should then match
precisely at the level of future events

i.e. it is enough to highlight that the future event is favorable
and then we have simultaneity of control
as through the spectrum of Macro-events
main events so to speak Macroregulation
and through the system of everyday events

and the imposition of everyday events
to the Macrosystem
shows a kind of reverse trace
from the everyday level well as if at the level of personal tasks
we are moving into a Macro-regulation structure

and it turns out that the combination of these control systems
leads to that
that no matter how many people there are, for example
can perceive information at this moment
is it obvious or not obvious?
you already get the principle of universality

i.e. the ability to impose one form on another
and separate them
under any combination of events, i.e. universality

Here is the next axiom of management
such allocation

in the primary impulse of Perception
element of self-recreation for example
it is the ability to identify a universal system
and with all the structures of his personality

when do you come to this
it turns out that you can highlight
and your own, for example, there is Infinite Life

in front of you is just a common object
you extract from it what you want
in management

and it turns out that this is the management structure
it looks more like a compression structure for example
Well, let's say some information in one place
and due to this level of Infinite development

i.e. in fact, if we consider
statics of compression as a physical body
Well, it's normal, for example. there is a healthy body and physical
or just an ordinary healthy person
consider that
or there is practically healthy yes

then it turns out
what is the first element if you need recovery
expressed in the structure of its future development
you can just synchronize right away
control line

i.e. this is called a controlling vision
or is there clairvoyance
where you immediately improve the system
you equalize immediately
to the level of his, for example, Infinite development

and at the same time you see
that outer space then expands
this is how you get closer to human tissue
the more you use
for example, there is a sound analytical control level, yes
through word control
through the analysis of some situation

the more clearly they are visible

direct connections direct dependencies
between the physical body of a person
And
namely the Infinite level of events

pay attention here
if we consider how children perceive, for example
there in creative thinking

they are considering Infinite status
and they often talk there or explain something there
namely the projection system

i.e. Infinite lines well as if they
even if we change the sound form
I keep saying that you can change the sound form

i.e. their speech is well for example, if you consider there
that everyone can get a super-fast education there
then children's speech often skips some letters
i.e. it is meant that the projection form
it doesn't have any clearly defined systems

i.e. logically we have
Well, here we have a system of reverse control, or something like that
to teach a child faster
need to be considered
how does it interact
precisely with the Infinite System

it would seem that his letters would be projected more accurately , yes

and if we consider
as in well there is the usual logic of the generally accepted conversation
be able to introduce the Infinite form into control
or perceive there
maybe there at the level of words at the level of Thinking

then it turns out that the verbal form as such
as a universal module
Well, it may contain information.
namely the instantaneous organization of the system

i.e. the word is highlighted at the moment of action
and it may not even be a fixation of words
and highlighting the word
some kind of volitional effort aimed at highlighting a word

it is, well, actually, in a certain sense

a guaranteed path to self-recreation of personality
self-organization of personality

and now if we consider the same phenomenon
in relation to God
then God highlights the structure of primary understanding yes
for example words
the word "God" for example
It contains the entire structure of world development.
in one word

because He is able to allocate enough
some information
He created everything

and that's when we move on
on the structure of this level of management
i.e. we are considering the level of action
when we select information by volition

then it turns out that it becomes clear
at this level

Well, at least here you can see that it is possible to consider
all connections as if at the same time

why in some cases there are some events

well, maybe a negative one too

they are saved yes for example there

information about wars is preserved

people comprehend the system of Eternal development

there is a resurrection

by means of one's own logic

and this information is not removed

or in what [...] in some cases

People come through knowledge after all

and here the question arises

again the speed of mastering information

and so if we set the structure like this

that the man who has mastered the path

to some extent there in its own way, so to speak

personal

maybe he just got acquainted with the fact that it is possible

and I read some technologies there

or did you somehow master it yourself ?

or at least logically introduced something into the management

then as soon as this system arises

what well for example, it is generally accepted there

that a person must first master something

then maybe this system will work somewhere

For example there in professional activity

he must first master

it's some period

then this knowledge is applied

in the Macro Rescue control system

it turns out that it is desirable
so that the knowledge that one person has mastered
were instantly transmitted there
generally speaking on a global scale

then we get the number of negative events
can shrink very quickly

and based on this, if we introduce this system
as the structure of another person's organization
namely self-organization
through the external level of information

i.e. you have learned something
in the system of collective Consciousness
this information exists
you have achieved something positive, *for example*
from the point of view of Macrosalvation
or there are solutions to their private problems
by direct control

and this information still exists somewhere
you can pull up
to the level of human self-recreation

but when a person recreates himself, he does everything himself
at this level of management

then it turns out
that he can accept your impulse in that case
if the impulse corresponds
here satisfies these conditions
there Eternity highlights the structure of the future, etc.
that's how I just said in this part of the seminar

it turns out that if right now there
to perform such control simultaneously and
and try to enter *this* information

on this part of the seminar
into the structure of collective Consciousness

that is, to control
only here, *as if* the targeting of the allocation of information
then we give virtually instant learning *yes*
at any distance

the only question is there
how to fix it then
that such training exists

here from the point of view of future events
it is the ability to enter information
at some period of time for example
before some problematic action

i.e. this is again the allocation of a certain management structure
but not at home anymore, so to speak
and in some information system

and the ability to behave like that
so that the external control system
the external environment even
in relation to a person
accepted this system
and then the events would be configured
in the structure precisely the most favorable

Well, take for example the same counter-terrorism system
after all, in the conditions of modern technologies
only human consciousness is real
can recognize the system
what can happen
none there, well maybe some there
appropriately constructed devices
but which often still give control
when fixed objects house car etc.

Well, of course, they also give control to a person
but here it is the human contact with the system that is important

it turns out that, by and large,
after all, this control through Consciousness is a guarantee

i.e. the ability to enter the required amount of information
so that the event does not happen
virtually no other system
it turns out that it really is not clearly defined

in this in this task

and on the other hand, if we consider in general
from a logical point of view, any control task

then the main task of any person
be able to solve some future problems
and at the same time everything is the action of the person himself

in a certain sense
a person is often in a situation
when he makes all decisions absolutely independently

i.e. a certain selectivity of decisions
exists regardless
even if he does some household chores

and he is the only one participating as a manager
he must make the decision alone

and then here is the mechanism through an external event
introduce information that is actually preemptive
i.e. the ability to satiate in a calm situation

i.e. to form an actually favorable forecast
in advance
by and large, it is here that things are actually being produced
First of all, the ability to introduce in advance
information that is favorable to you
so that it works
in conditions of freedom of your actions

i.e. God created the Infinite World
but He is free to act as He pleases
and it turns out that the World is still
Well For example there is infinite development

and based on this
besides, there is still a transfer of knowledge
for example, according to Eternal Development

here is the system for transmitting such information
it is a social phenomenon on the one hand
i.e. you are in society
and get this control
quite appropriate as if considering yes
all external aspects of existing information

and on the other hand you must guarantee

implementation of this management
just for myself personally

i.e. a person must guarantee for himself
the existence of the whole World in Infinity

and the tasks of the World are also Infinite
they are there

for example, Infinity is perceived first
as a very large number of tasks

and then some point
which simply means Infinity
i.e. recording of events

and it turns out at some level
this is the Perception of God
where the event is recorded
there is God in Action

and if you look, then the Action of God
from the point of view of fixed systems
in man there is the same thing Action

and here is the level from God to man
where are the events well sort of suspended so to speak
i.e. a point where there are no events, for example Yes

do you know what's beyond this point
events Infinite number
but there is a point where they well as if suspended

and it turns out that this system of "underdeveloped"
if so in quotes of course events
i.e. the beginning of some kind of action platforms
the beginning of some action

here generally speaking
well, like on a regular initial construction site, so to speak
you can always build any event

the only question is
to understand the system of this space
since events there are suspended
that means there is some other environment there

and the ability to carry out this structure
to the current level

and then it turns out that here

Well like a bit of the opposite or something
action

we consider Infinity as a system
which is behind a large number of events
means a point, well, static

and the input of the system is again the recognition of dynamics
again the level of primary Perception
and again interaction with oneself

i.e. the level of self-construction of self-organization
simultaneously with the event

that's when the level of simultaneity
this is already a task
and action
and the fulfillment of the Soul

i.e. the Soul performs
but in fact, as if for the Infinite Future

you realize your social Macro-entity
that it's not just there that you are a person
who does some tasks there or knows them there
from the point of view of even there [...]

perform dynamically
i.e. the dynamics of life does not stop

dynamics of developments
this is a continuous quantity of yours

this is when you start to come out
on the structure of such Perception
then this is a complex human perception
which is in interaction with God
which is in the Infinite Event Level

can simultaneously saturate
well what I named for example there
a large number there is a huge number of events
in the first level of Perception of Infinity

it saturates
because he perceives events this way

that going through all the events
through this point in statics
where God ^{actually} created man as Eternal

and not just there Eternal
and who else can master all the technologies
in any case for Eternal development

when you come through the whole spectrum of events
you come back to yourself
you're already there
so all events actually
at the level of your creation
we can create them

i.e. in one direction you passed them
from there you see them ^{as if} from the Infinite Future
and from myself they turn out to be like this
that you can create them

so the control point is like this
what from the Infinite Future
to yourself
you can see a very clear event
some completely neutral
which you can at a favorable level
bring to yourself
^{well, by creating such a site, or something,} the most favorable

i.e. it hasn't affected you yet
but it is starting to be created
constructing the future through external magnitude

if you go from yourself
then it turns out that you are constantly participating
^{well} maybe even there in some counter control
there may be some resistance

and here you are building near yourself

when did you build the site
take the impulse from yourself and connect

and it turns out that as an external system
and yours too
you can do it ^{in general} ^{well,} quite favorable
for everyone, absolutely

and with those data
that you even under ^{some} special conditions
what do you clearly understand
that building an external system
if you need to add ^{something}

you need some time, ^{for example}

that this system is not yet formalized
it doesn't affect you and that's it
and in general does not affect anyone negatively

here is the first element which is a department
^{well, actually external Reality}
it comes from God

here is the act of separation
God made the first level of separation like this
that all external Reality is controlled
from the point of view of Infinite development
if all elements of development are directed towards Infinity
all people know that they must live forever

then it turns out that Reality is completely stable

here is every element of this development
must be Infinite
because you know it
when you come to yourself you know it

God, coming to Himself, understands that this is so.

He can, ^{for example,} examine His element there.
in outer space
and see that the element has such a property

but if He has to ask someone
He must come to Himself again.

i.e. it turns out to be the same thing
a person must come to himself
and see that it is so
that all external elements are Infinite

then it becomes clear
that any finite element

there is a sequence of events
let's name a list of events there
it's not that they are finite there
but just a list of some specific actions

and this list of events becomes Infinite
because when I come to myself
a person there can see their Infinite meaning
i.e. all Infinite connections

what could this possibly lead to?
if you have time you can take it and watch it for example Yes
The endless development of each event

and now if you start to develop this management
there to infinity
i.e. well somewhere a drop of water fell into the sea for example
Well, let's look at this event.
even though it was two hundred years ago
what can this lead to what aspects of communication

if for example you don't highlight it again
for example, some lists of events
but in essence to look at the structure as Infinite
then here is the selection of this spectrum for you
this is, in general, a sufficient information carrier

you can on this information
build your own any event
due to the fact that the other event is torn off
it was, for example, two hundred years ago

and then it turns out that you are not touching the event
have a platform all the time

so in a management environment of this kind
where the event is kind of suspended
there is a level
through which you can always freely pass
between events and in control

i.e. events are visible as external control structures
but they do not affect a person negatively

i.e. the ability to make harmonious management
when a person can
well, just like when he walks in the forest

if he walks there carefully, he looks there with his eyes
and doesn't go blindfolded
then he can go freely

the same skill to pass in the event structure
along the line that always exists
because there was a primary event

and that line which is always favorable
because you in advance
You can at least look a hundred years ahead, right?
or there for a million or there for a billion

what difference does it make to you
you highlight the structure of events and that's it
which concerns you

then it turns out that based on this
you are already starting to analyze
how can you still return in this case
to the starting position
everything that for example there well there was some negative yes

i.e. from God's point of view
all unfavorable systems
should not manifest in the future

Infinite life is a level
still absolute stability

ability to overcome
all previous negative events
i.e. the ability to return everything
to the level of creative Infinite development
and at break points for example Yes

somewhere someone lacked some knowledge, for example
he didn't have time to master the system
means to add knowledge, etc.

i.e. the ability to derive a universal circle of some kind
it looks like a spheroidal shape
and it looks like that from afar
it looks like the action of fire actually

i.e. like a circle that burns, so to speak Yes
at the level of Perception

Well, of course it's not fire
it's just that these golden-pink tones stand out

and here are the Infinite Spectra, namely the Infinite White Spectrum
this is the organization of this color system

i.e. you begin to see that ^{there is} such a structure there
or there in the collective Consciousness exist
there the concept of "division into elements" is different

then you can highlight it altogether
how does it happen
i.e. if we need to have some knowledge of some system
we can have them
any up to the Infinite level, ^{well, like actions} , yes

there are decryptions or there is bringing to the management level

if there is a need for elements there Earth or air
or just any object of Reality without elements
we just need an object of Reality
create ^{for example} in management

then we must definitely create it, it turns out

i.e. from the point of view of Eternal development
any element is continuous
and we always have time
it turns out there in the Infinite Future
to level everything out ^{and} bring it up to standard

i.e. it turns out that there is no other way
man he is obliged to return everything to the level of creation
restore all destroyed systems

and then it turns out that the amount of work
in general, in the future, ^{well, it} 's just Infinite

i.e. the number of actions that need to be included
into the structure of future events
even if only there to regulate the past there
from the point of view of there ^{for example} there is a resurrection of all the dead
in the Great Patriotic War
a specific local level of work

then it turns out that the management here should be like this
that they still need to be given Infinite Development

i.e. any impulse that comes from you
must necessarily be Infinite
i.e. to increase Infinite quantity
time there or distance
there must be Infinite time with distance
some other categories of Thinking

and what if , for example , another person thinks
and you give control
then what category is this
where is time and distance here
is the space anyway

i.e. even in the simplest case
Another person's thoughts

but there are some more extensive systems, perhaps

a person already understands everything about another
from the point of view of universal principles

but everyone has a different system of Perception
and so in any case, if we speak briefly here
then you get your impulse
must necessarily increase infinitely

what god did
He made an impulse
everything else works out. It develops endlessly.

means the structure of Infinite development
Generally speaking, this is a certain system
embedded well in the level of God's Action
in some of His nature of Actions yes

i.e. let's assume there is such a concept as "nature"
then it turns out that this is a manifestation
some properties are the Actions of God
properties of the Personality of God

external structure expressed for example
in the system of visualized some actions
or there are designs

and outside of all this stands precisely the personality of man
man in infinity clear

it has the same capabilities or even more

as a rule, human capabilities
generally speaking, they do n't change in any way
maybe it's even easier to consider here
that a person begins to pay attention just like that
on something

i.e. to say that
Of course there are those levels when you need to increase there
resources of the human soul
management

but in fact, in terms of management level
the main part of the work
it is done simply by doing that
what a person begins to realize
some elements of Reality are external and that's all
some technologies for example Yes

i.e. you can give many lectures on the same topic

the more, the more precise the control
and that's all

it's just a volume of knowledge
there to say that something changed in a person because of this
his character is there
Well of course when there is peace he is forced to work there
according to the Macro-peacefulness

i.e. it is a technology
it's like a structure that can't be bypassed
then it turns out that he changes for the better

but from the point of view of character traits there
aspects of personality
nothing changes here

and it turns out that he can educate himself there
there or re-educate as he wants
the main thing is that he lives there yes for example Forever
did not destroy anyone

it turns out that this is precisely the approach to this ideology
this is an expansion of just human perception
just an extension

It turned out there was nothing else there
i.e. there is nothing new there for a person in principle
it complicated or something? let's say so

it turns out that based on this
we can clearly say that yes, everyone can be taught
It's easy to live there forever
if they want to at all
will they even know about it

and then it turns out
that that impulse is this primary Perception
which we are talking about
through it to make self-recreation

it already begins to have continuous characteristics
Then
you just have to take a look
well, as if on a reproduction of one's Thinking
in the future
where do you consider the external phenomenon
in relation to oneself
then the impulse of Perception reaches you

and you already see yourself then
at the level of general management
i.e. you control the specific position of your personality
in Macroinformation
and this is the natural state of man

i.e. it is enough to select according to a certain algorithm
structure of external impulse
you are definitely out of it
Well, in fact, you organize yourself

and from the point of view of the self-recreation of personality
well in all aspects
here in the Infinite Future
there is also, for example, the level of God's Action
and you see self-recreation

but a person must technologically
to be able to provide for oneself and also to recreate oneself
if necessary

then we get a level of self-organization and self-recreation

this is still a level, well, more actually aimed at that
what should be done at this moment

it might be enough to do a self-recreation
there several times there over the millennia, let's assume
but if there are some difficult situations there
more than us

and self-organization means it works
that in general the system is larger than the external one
is it a system of interaction ?
with external information
where is the element of self-recreation
it has basically already been resolved

This is where we need to be clear
at a certain level of Infinite development
or even there in local systems
to highlight in terms of that
what is the local system
still implies the infinite development of man

that self-recreation is well, in fact, in line with that
what did God do He created Himself

a person is forced to master this technology
at a certain level of your Thinking

and when we already see
that the structure of self-recreation
which simplifies many control systems
makes them more stable for example Yes
moves to the level of self-organization
mutual organizations
including the organization from an external impulse

then the element of self-recreation is like this
that you are already here
i.e. you end up recreating yourself
when you react correctly to the external system

you already exist anyway
in the Infinite aspect at some point yes
in some region of space

it turns out that at a certain level
self-organization implies self-creation too

and if we begin to realize self-recreation
through any verbal construction there without showing the word
without pronouncing it completely for example Yes

then it is clear that this is essentially how a person is organized
i.e. you come to your Eternal essence
to the point where these are
Well, let's say that events exist forever.
they look maybe at the level of projection systems
that they are kind of located
in some phase there is such a state of equilibrium rest

i.e. you see that events are being organized
for example in your Soul there in your personality
quite calmly
and you have clear control
this is the boundary of the organization
where God also acts
and you act

then it turns out that this is happening
well, some kind of system
On the one side
that God in any case organizes the entire event
and on the other hand you should see balance
i.e. the organization of the same action
and God and you

and that's when you have such a property of events

you begin to attract closer to yourself
then first of all you become closer to God
i.e. you see the structure of the Action
so you are participating there

and the dialogue does not take place
only there in words or even in action
dialogue and action with God is often the construction of Reality

Well there it's elementary, a man made a machine
this car still drives, etc.
it is a certain element of Reality

it turns out that in the World there are of course structures
where permissible and moreover
there they often expand very widely

the structures there are of a man-made nature
cultural Spiritual level of development
humanity
each individual person

and here is the level of those systems
where God imparts more knowledge
i.e. the selection of all knowledge from the system
those designs that have the highest priority
for Eternal development
this is to see [...] the development of civilization already
this is macro regulation ^{yes} at this level

i.e. I was talking about what we see at a private level
as a level of ^{autonomous} action of the individual
[...] tasks

a person who considers his personal tasks
and when it comes to the level of Macroregulation
then apply the same personal system
can be selected from
there is no technogenic level of artistic
cultural level from any
the closest
but in general it's better to highlight precisely

because there is often no time to repeat something
even in the Macrosystem
although it may be more stable
there are no additional accesses to the system

but it is precisely the selection of signals of Infinite development
any system

i.e. what kind of education what kind of development path in general
God gives
created systems

and here His participation is already there
in the system of human creativity

i.e. God creates ^{so to speak} when you see
what God directs development to
Well, there are the same machines ^{and} equipment

what should be the spiritual cultural life there
civilizations

means in order to accept this knowledge
God
which actually come before every event
generally speaking in any system

and here is God's participation in any system
i.e. we can take this event for example
or maybe people who don't perceive them

after all, this is also technology
and often you can just use ideology
but technology leads to precise, faster work

and it turns out
that here is God's participation from the point of view of man
in the creation of every object of Reality
in a certain vector sense, yes
from the future to the present time
consists in the fact that
what God determines or, as it were, disposes
recommends so you can say yes
some supposedly better way
more expedient

what should the technique be
so that it does not destroy man
what should be entered there
what additional boards, elements, etc.
what should society be like
so that there wouldn't even be a possibility, for example there is a nuclear war, etc.

it turns out that here it is clear that God is involved
in the creation of any phenomenon, just by analytics
i.e. society develops to know God, among other things
and generally speaking, it is mainly because of this
society and has a certain level of development

otherwise, then there would be completely different designs
in the World

God is involved in the next path of every system
each element of Reality
and this is also called
"an element of the creation of this thing" including
but in a different system

i.e. on the one hand it has discreteness

some kind of continuous path
we perceive that something is happening continuously

and on the other hand, each subsequent element
can modify the system

if the car has the right controls there
she drives steadily
precisely in the technical version, i.e. without defects
regardless of even human actions
just for example there is some thing there

but human action is initially embedded in the machine yes
there are previous actions

and now if we start
Well, maybe it looks a bit subtle in management
however, if we consider this
structures before the action is performed
and what would you recommend, generally speaking, for the action
how it should be done in general

it turns out that it is precisely the structure of such an action
what are you considering
then one level of Reality and then another
i.e. the difference of action is the difference
i.e. the ability to see dynamics

it's not always the same
not always everything even well how could it be perfectly good
but not the same thing, let's say so

the ability to see in this facet
namely the Action of God
precisely the instructive action
Well, maybe not so formally
what does he teach there, only there is some difference

and the ability to see
why did God create man like this
that it has almost everything in common
the whole mechanism of Eternal development
where is this mechanism anyway

we see that it exists

we even find it there
at the cellular level
in the Spiritual sphere
there in the Soul
but here's where it is in action

so in action it exists precisely for this purpose
the difference in events in general
and often this difference fits in
in absolutely precise, well, you can even say there
mathematically, if you can say so
calculation
can be viewed at the event analytics level

and at some level one event
and the other is completely different it would seem yes
Well, this can be good but it changes

and now we need to make the management
where are you in this difference
i.e. God created man
and the next level in action

you external impulse external impulse
have your own personal structure
and in which there exists
in general the whole system of Infinite development
yours
or there, by the way, including the whole world
simultaneously
it is not really different in the big sense

i.e. the ability to highlight it
in the Action of God
that he took the next step yes
the next some kind of Reality

the creation of man is the next step
but the whole system is laid down there

logically it's even clear
what is between God

and the next action
there is the creation of man
there is a whole system necessary for the same
just the opposite action

event

if we consider the Self-creation of God
via external control from a person
then the person has all of this

here from the point of view
you just need to look at God and man
into this mechanism

and as soon as you see it
you see absolute harmonious stability
future development
i.e. all your problems have already been overcome there
you see this well Well, let's say that
and Soul
and body
i.e. the entire personality system

try to see this system now

first act
external level of control
and having looked at the system you already align yourself
to the level of the Norm
from the point of view of Eternal development

work on your events
but so in the substructure of events
all elements of the development of the World
I will work with you

in this type of work
through these external events
you have to adhere to it very strictly
such internal status is desirable
your personal management in that regard
what for example did you do management
after all, it could very well be like that
and as a rule that's how it is
when you have done the right management
or at least according to the lecture
passed in management
then you have made precise control

i.e. you did, for example, Macroregulation

you did something to make things better
or have they changed radically if there is such a possibility ^{yes}
for the better

and here is the thought
and how effective is that ? for example, management of this kind

so in general everyone has control
it may well be a thought
what he did was management and this is macro regulation

from God's point of view, that's how it is
It gives every person the opportunity
influence the Macro level

so we need to understand very clearly
that each management is in the event plan
has a certain
well actually, the meaning of the necessity of even actions
i.e. you need to manage more calmly and confidently
from the point of view of that
don't look for information there
and here you have made the control
and how, for example, is it necessary to prove it there
that the control system was implemented

To do this, you just need to prove this problem
All
this is a separate task, generally speaking
If you want to prove it, prove it, if you don't want to prove it, don't
this is already important from the point of view of the person himself
what does he need ^{yes}

for objectification or popularization
does it make sense to log something
Well, it's just a separate control system.

from the point of view of management as such, for example
you made the management it was implemented

It is important to make such management
so that each of your management levels
due to external events
[...] important there for you personally
for example, you are doing some important work there
for myself but under normal conditions

i.e. the seriousness of the relationship should be
Well as if it were routine in management
because after all it is management of external events
what if the external event is of some minor importance?

it's one thing if you just do direct control
You
the volitional level of control is carried out
and in this technology you just any impulse
well, in fact, you perceive and control through it

what if this impulse is completely different
well, it means , for example , at the level of a specific value
we can decipher any event
look
what in general what have we identified in our system of Perception

it could be memory
some physical event
Well, maybe it's some simple situation
a blade of grass is growing or there is some kind of sky or landscape

and what are we then
it turns out we used our powers

Yes, we have achieved stable management.
but it turns out that we got it through
through an event that well as if completely autonomously
and it seems like it doesn't concern us

and think about the fact that everything is connected
Of course it is possible, there is such a law
but then we need to trace the connections
and prove in a specific case
how is this related

like some section of the starry sky
is related specifically to you
or there with some letter that you will read
in ten years there

i.e. this is basically also a question of position, yes
what to compare with what

then it turns out that it is important to work out here
system of uniformity
for God created everyone equal

and actions too at a certain level they are equal
outgoing actions in relation to any event
they can be and by the way often should be equal

there God is every one of His actions

perceives as absolutely equal
for everyone
and for each specific object of information

it turns out that at a certain level
when God perceives this action
a person will know it
but for this to happen God must first consider it
there God sees it from the very beginning
He has it in His Soul

i.e. the impulse of the primary Action
this is the act of actually managing the Soul

by analogy with this
for a person this is control at a logical level
i.e. a person begins to see the logic of control first

and then on a logical level
i.e. the first level of development is logic
where the physical system is interconnected
there is some intellectual
or the Spiritual System of Human Development

and here it turns out that for God in one impulse
this is actually the development of His own Soul
in the management area

for a person this means
to a greater extent the structuring of the Soul
i.e. a change in structure due to the action of logic
i.e. some change in the coordinate system
those. some change in the action of light there
the action of the Soul as such in general
to some place of control

and it turns out that it is precisely the emergence of a place
from which you can control
Well how such a place appears by itself somewhere
under the sign precisely under the action of equality of control

this place is perceived as a place that is completely understandable
at the external level of management
where is it exactly

but the person understands that he is in this place himself
naturally yes
at the level of information there for example

so this is a selection
his own information in the future
i.e. his personal information
includes information on the physical plane

and that's when we start this information
as if to attract to the level
where is the main concentration of events

then from the place where it is located
this is the input or something in the event
people are starting to see
that they basically do it themselves
they are actually introducing themselves at the management level
into the system of future events

and in advance it is a very long time ago
sometimes it's not such a long time of course
but it is always clear that it clearly depends on you
where will you put yourself
into the structure of future events

because you take yourself from a place that is determined
your equal attitude
to all objects of Reality
and it turns out to be true for myself too

and since you are in this system
but in action
then everything is fine with you there too
the only question is
how do you enter the trajectory of your events
into future events

and then it turns out that it is possible
first of all in this technology
to see events very clearly through the simplest action
by simply considering

well, practically well as if a vertical level

vertically just take it there mentally so to speak
or with a spiritual gaze
conduct a vertical system
at any point where an event is possible
look vertically

and consider the perpendicular layer
your earlier location

then the whole spectrum of events is on the left side
here in relation closer to the heart it begins to take shape
what could possibly be negative there ?
how can this system be modified
and here it is
to a better management system

and then the output to this system
if it's you there are no problems
you for yourself and you know what you did or you remember
or you can write down what technology there

but it's better to just work at the level of Perception
in this case
here in this control system through external events
in general, as a rule, it is better to work simply by seeing how it really is

because as soon as you wrote down
you have simulated another situation
there is a paper with the context of events
and there is a constant correlation of modification
and any symbol here has a meaning it turns out

and so you can just see
like God does
He just works in management and that's all .

so it turns out that here
this is exactly the structure of your location in the event
very definable quantity

in other cases
when an event relates to you
and you see it
i.e. you can see a negative event in advance

question is to what extent will they listen to you
so that the event changes for the better
are there any means of communication at all, maybe you are just busy

here is already a definition of the situation
it is often expressed nevertheless
properties of the Soul and the actions of another person
i.e. how much is it oriented towards that
to get to know your system of Salvation there ^{yes}
general level

here it is important to work out all the time
level of universal Salvation
how exactly is the context of transmitting your information to everyone

i.e. if you suddenly feel somewhere
what information is required from you
perceive
can often be seen at the level of simple telepathy
there you can see how people want to get knowledge there Salvation

you should go through it right away first
through the general aspect of management

universality is equality ^{yes}
so it turns out that you are here equally
you will overcome yourself
it means equality of all in front of all
it turns out we have stable management

then based on this aspect
another person can take
or he takes the universal aspect, i.e. he understands it, ^{yes}
then he turns out to be educated
things are going well for him

or maybe he still perceives
like , for example, an individual
there in a more general definition ^{or something}
and just as a person
which may be a more private aspect
invests in management

i.e. this is where such an element arises
if he tries to put a more private aspect
then this is your level of general management
he can be sent to him

but he might take it wrong there
or you can't get enough of it

this might improve it somehow event
but at the same time it is still his will

and here is the skill
it can be formed yes
there to have time to give him some information
but here is the system of collective Consciousness
which is often well there contains some specific events there
negative events
may act on the definition
there are situations of a specific person

because once in the collective Consciousness
there is some list of simply negative events

then it can be realized
well like some wheel that grabs
the event picture there is another person

it turns out that you can be more clear in this regard
managing your system there
hand over
For example there from the point of view of future events
into the structure of development of collective Consciousness
what you manage to do in a certain period of time

and you see that for now, for example, in general
collective consciousness
contains stable structures there
some destruction
some unfavorable situations

situations can manifest themselves yes
principle of equality

i.e. the ability to level out this situation
there it depends again on the expression of will of other people

i.e. do they see in the movies that there is destruction or do they not see it?

agree to refuse altogether
that they will not consider destruction
when there is no destruction at all, for example Yes

This of course does not influence TV programs there
from the point of view of censorship there, let's assume
but the question is that there must be an inner conviction
what can be achieved through knowledge
exclude from the collective consciousness
control

then you can show basically anything you want there on TV
it will not affect the system
namely the real collective Consciousness
which influences the situation
which is the basis of some situation

i.e. the ability to enter the management structure
where, for example, from God's point of view
who gave people Eternal development
the structure of some kind of collective
precisely as if of a factual kind
that something negative was happening

and then it turns out that this is a skill
it means to somehow at least level out the situation
but so that everything that is possible if you did
then we will align it from the point of view of Macro positions, yes
some kind of systemic philosophy, for example there is Eternal development

then here it turns out exactly like that
that only the level of systemic philosophy
in any event it turns out
but it would be better if it was a more positive event

allows to say
then that's definitely the next level there
Well, more precise
more correlated again
with collective Consciousness
let's introduce it more widely
point of view for example there is Eternal development

i.e. a more positive point of view
but one that guarantees all people
including there may be carriers there
some aggressive system of knowledge
but it guarantees precisely Eternal development

because you are like, well, ideologists, for example

don't just do Eternal Development
technologically yes you implement it
and you also see this Eternal development
as an external event

what difference does it make to you
you can perceive the event
just as an event
For example there is a sky with clouds yes but you don't need it

you can see all external event
in the same place in Perception

and if this event is well in a complex that contains everything
the whole world
there is an event but for example Infinite
the whole event contains the whole Infinite system

when you start to see it for real
and that's what I teach, to see this light
Well, in fact, this is knowledge, yes
really

then it turns out that you already have stability
which is still technologically correct
because you see correctly

you can see a plane there
let's assume there governing clairvoyance
or there by Spiritual vision clairvoyance
there is definitely an internal structure there

or you can just reason
that there might be something inside
some details or even know the plane well
but it won't be reality

Reality is only what you perceive

and here is the same control system
selection from the system of perception
the structure is obtained from an external event
where do you start to consider for example
already the external structure
but also at the same time your personal

because Eternity is your personal path of development

and you are actually diagnosing Eternity
i.e. you interact with this system

because the structure of interaction
well with the same diagnostics of any system
this is assistance to the system towards Eternal development
some kind of verbal management there
direct control

and with all this when you highlight
in the structure of Eternal development
the level of generality there or the private level there
then it turns out that this is personally yours

i.e. here in the Eternal development
whatever design stands out
it turns out that it concerns you personally
and that means you have to manage it

after all, it's still technology
and the ability to distinguish in this technology
your personal path
it is still based in the private sector
again on some such universal doctrines

that the environment itself is like that in general often
it may not be familiar at first
for the technologist who begins to recognize these systems

then it's just enough
trace the properties of this environment
to learn already
i.e. it is, in principle, very necessary for a person
because it is still quite a powerful technology
well for example there is health improvement and it's elementary
control
Eternal development of events
that means they are smoothed out there
some systems of conflicts have been resolved there
and brought to the level of a favorable solution, moreover
it turns out that
to the level of the same Eternal development

wherever a person goes, there is Eternal Development
i.e. it is a whole system of knowledge

she just touches a person because it is useful even

and it turns out that based on the design
this is exactly the diagnostics of this system
you can find it there
its location
because you ^{actually} just need it
how can there even be such everyday logic at the level of simplicity
I need to know something more optimal
and now you highlight this knowledge

when you start to highlight knowledge
here you need to be more careful with the control speeds
you need to be there all the time
from the point of view of external control
to this system

i.e. learn to recognize ^{yes}
find a control system
but at the same time it needs to be regulated all the time

that's why it's important to approximate the system
to you
i.e. as if through external events
you are considering Infinite level
and you are constantly in one place
and you regulate it due to the fact that you are in this place
have the ability to regulate
any external system

that is why God originally perceived Himself there
He immediately understood that He had there the Eternal development
for everyone
for Myself
because it turns out that then it is completely clear
that Eternity is an outgoing quantity
of you after all

and it is you who form somewhere
through the system of Infinite remote connections
this personal structure of his

that's why it's important to see
dissemination of such positive creative knowledge
there on a global scale

i.e. sometimes it is even useful to follow

how is this knowledge spread
for example, on your personal levels
maybe it means exactly well For example there are no ideas for any actions
look what's in the collective consciousness
and where, for example, is this implemented?

and here it begins
interaction between individuals
who are there or mastering the technology
or there for example, they are just starting out or they already know how

and that's how a person crosses over
into the structure of personal management
where other people do the same thing
let them be there maybe
for some specific management purpose
a certain amount works

so nevertheless it is enough to highlight
another system of Reality where other people work
then all control becomes stable

and any external control impulse
it becomes natural
this is already harmony of management
i.e. another person does the same thing

i.e. as soon as God created man
He perceived harmony
because a person can do the same thing and that's it

it turns out that this is the external control system

this is Infinite stability

i.e. that which comes from God
at the primary level
due to the harmony of human action
has an Infinite status emanating from a person

i.e. outgoing harmony
Harmony of Perception
it is, in general, a kind of supporting element
for this Infinite or Eternal development

although here it is necessary to clearly highlight in a very structured manner
here at this level of Infinite Impulse

what is your harmony

it could be the Perception of Love
or is there your personal love yes
you see it specifically

there may be action
but again the level of love is generally universal, for example

that's why it turns out
that here is a selection in the structure of future events
your personal management system
it still leads to you in your state

and that's when your state is your normal state
and without any of that even
maybe there is a special level of control there
just an ordinary person lives
he may not think about it at all
about management as such
and this is his Eternal state his Eternity yes

that skill is already given to this Eternal man
give the following knowledge there so that he can teach someone
he is already Eternal, so he doesn't really need to be taught anything
here we simply output it by control actually
in this state
it becomes inaccessible to destruction

but later, for example, at a certain level of Consciousness
understands what it is desirable to teach
just to pass on knowledge

then it is clear that God did just that
external so to speak management external level of knowledge

in relation to Himself
to simply teach, i.e. all external knowledge
they go as knowledge of teaching the following people

and here is the selection in this level of Eternity
element where you teach already as if further considered yes
in management
although in reality it is one and the same
what is closer what is further you are simply passing on knowledge
well, just highlighting this sector

that's when your management becomes
well, almost ideal, so to speak
close to the level of absolute stability
and since this is the case, the phrase can be used
then it turns out at a certain level
it becomes truly absolute in stability

i.e. this point begins to project
into the structure of your personality
and you understand that the management is carried out exactly like this
what have you achieved
element of Eternal development
in general, they simply achieved Eternal development
in normal condition

this is your normal state
and the usual state of another person
this is also actually well so let's say its Eternal development

the only question is
he recognizes or he doesn't recognize
another person

for example, you recognized it logically at a certain level
it's easier for you
Well there, for example, they listened to a lecture and recognized it
and then it becomes easier yes
build the next level of management
already based on this knowledge

another person he walks forever but maybe doesn't know
then it turns out
how to convey this knowledge to him

well again it could be something like that
elementary primary control systems
but the most important thing is to show

what is in the system of the normal state of a person
it is precisely the primary Eternity that is laid down

i.e. everything that was an external event
Primordial Eternity yes
it has become a human condition

one world

a person who is in unity with the World turns out

because every next event
what came from the primary ^{well} level of unity
God in the beginning was one with the World, at least logically

it turns out that as soon as He recreated Himself
the next element is already the element of Eternity
^{well}, the same selection
this spectrum of events
means exactly that management
when we have ^{well} level
when logic is the logic of Eternal development
because we know

and some situations change in this direction
because we know logically
that ^{yes} such a process exists
it is enough to study it there in one lecture, ^{for example} , etc.

and so as not to enter here
there are no additional control systems
we can basically just use it
the knowledge that exists
how is knowledge dynamic ^{there}

use it all the time ^{as if} remembering just often
remember often enough
that there is such a system of knowledge
and it acts as universal knowledge then

another person who is Eternal
he begins to understand it
he's just generally getting his bearings
on your behavior and everything

then you start to transmit knowledge
because you know

you can even there
^{Well}, actually, I can't talk about it too much

although if you tell
of course then the number of trained people will be huge

but even if such a person does not tell
he still passes on knowledge

that's what it means to just know yeah
some aspect of Reality

This is where I end today's seminar.

Thank you very much for your attention
