

GRIGORY GRABOVOY
The Teaching about God
Self- installation in action
14.07.2005

Hello again
the topic of my seminar today
This is my Teaching about God
Self-healing in action

in this topic i show
how can a person heal himself
while doing and continuing to do
for example, the planned work
i.e. moving towards the initially set tasks
the usual social, everyday, ideological, etc.

and in the conditions of this action
to be able means practically well how to solve it at the same time
as self-healing tasks for example
which by the way includes the tasks of improving the health of other people
because the concept of "self-healing"
this is still real management
precisely in the general sense

i.e. if a person can apply some technology
in relation to oneself
so it turns out that naturally he can implement it
in relation to any other person

and it turns out that in this case
we are the level of universality of action
we consider it more as if in a specific order of actions

i.e. the spread of control
on almost all persons
and selection from the whole circle well so let's say the area of all persons
specific people

i.e. the ability to quickly
for example, by means of a single or similar signal
transfer the experience accumulated for example
by your personal action
for all the information of this circle, yes, as if of this level

Well for example, you have cured someone of some disease
took made an impulse of healing

for all of this disease, i.e.

i.e. the ability to collective Consciousness
introduce a system that would allow for reform
this is the concept of "disease" for the collective Consciousness

and generally speaking
This is a fairly important aspect of management.
for example in the health system
because basically that's what it's all about
if we approach it in an ideological sense , then
from the point of view of that
how does it even happen ? Generally speaking, this is the information
as a disease yes

because originally God
being absolutely healthy in the human sense yes
well and in the Divine too
It means he didn't create it.
i.e. I didn't put it there specifically, let's say Yes
a system of some change
differences from this

this is the ideal version , I guess
a person must be absolutely healthy

and at a certain point of information
this information always exists

and in principle a disease
this is some kind of modification of just information

and that's why it turns out
treatment is just rationing return
to the desired Norm

i.e. any level of disease
it turns out that it only means
in general, some technological things are possible there
some informational action

and in principle, unlike Reality
absolutely the same type
that here is an absolutely healthy God

also created people healthy

everything else is just information

i.e. it turns out that human health is Reality

from the point of view of physical implementation

healthy person

and disease is information

i.e. as if not even a material substrate

so from this point of view too

Well for example, by the way, a typical example

here in history it is given in many textbooks there

one of the examples related to the topic

what's going on anyway

when for example this approach is used yes

i.e. it is the approach that is analyzed

diseases as information

in the literature there is such an example, for example

so two people were going to the ship

i.e. one was apparently seeing him off

and they were bitten by a dog

means he sailed away on a ship Well, who were we seeing off?

one remained and it turns out he got hydrophobia

Well, he had problems there

i.e. it turns out that an infection has occurred

Well as if according to the system of collective Consciousness

that yes there is such a disease as hydrophobia

it means the person who left was absent for 15 years

then I came and suddenly found out

mean that his friend got infected 15 years ago

he had the same symptoms

although naturally there was nothing left there

material substrate, i.e.

i.e. it turns out that as such

from this point there is no control over the virus

i.e. there is just information

and similar levels , as it were

are given quite often here

in the systemic even in the statistical literature of medicine
that are implemented during management
just signs but no substrate no substance

and it turns out that if we start
proceed from the management level for example Yes
from a health perspective

we just need to align the governance structure
up to, for example, the first criterion
there is no disease there
there is simply some kind of information constant
it just needs to be reformed

and then it turns out that you have to go out
into the system of collective Consciousness
and be able to reform
your own action in this management

i.e. to see yourself
and see your connections in management
and be able to introduce health improvement
as just a system of rationing

then it turns out that you
working with information
you are always in the phase of just health

i.e. self-healing in action
it is a skill in a certain position of control
be in the structure of that which means health

so it turns out you just need to be able to observe yes
find differentiate information
where are you at the moment of action

the performance of an action as such
those. self-healing
and also the performance of an action
you must control
what impulse comes from you
at the information management level
and how it spreads

i.e. firstly, this means this place
secondly, impulse control

well, etc. can be differentiated
watch the investigations there
development depending on the following goals, etc.

i.e. observation of the Norm area is actually

and when do you start working in this regard
then it turns out that you are adding
just one control parameter
you just need to add
monitoring your actions

and track the outer contour

and if you are, for example, in management
you start to enter the structure
where information is not standardized
just bring back to normal

and physically this means
a signal comes straight away, by the way, it looks like a rainbow
It is this multi-colored rainbow, full-color, so to speak

and this signal characterizes what to do now

so it turns out that we
in fact, we are closing this control chain
what if we need to apply control
we can use collective consciousness
in this case

i.e. there are a lot of people who don't want to get sick with something there
that's logical
and generally speaking initially
in the Soul of every person
and at the level of the Spirit of man
there is always an absolute norm of health

and it turns out that it certainly looks better
as Spiritual in a broader sense
Spiritual with elements of control
in the structure of the logical phase of Consciousness

and it turns out that this is the action
Spiritual with elements of logic
this is the level that forms
this very Reality

it looks like a special optical medium
formed by the Spirit and Consciousness of man

and here we clearly see
what angle is it in
here is the matter that forms the Reality of health, for example

matter by the way is right on
specifically located well or something in the niches
looks like a substance
which just lies in some niches

and when you start this substance
Well, what to do with it then ?

where it should be located for a person to be healthy

we need to explore the properties of the Spirit then
because the carrier or as if the keeper
this substance
is the Spirit of man

and when we begin to explore the property of the Spirit
as if entering or approaching it from the outside
as an object of management or analysis
we begin to see
that the structure of the absolute Norm
embedded in the Spirit itself, in the Spiritual system itself

i.e. if we approach it from a highly spiritual point of view, let's say so
from the point of view of what is high
Well as if a high, so to speak, level of spirituality
does not mean sometimes difficult problems
often it's just following the same principles
for example there are Macro rescues

or some things related to that
well , that's the same position
that for example some unnecessary changes
it's just information
but really there are no problems there, yes

i.e. these are some specific systems
which must be followed
and that's all

and this means the concept of "high spirituality"

if a person is still capable
well, to the best of my ability
attract high creativity and implement
This of course strengthens the control
or sometimes makes it instant *yes*

I say even if *well for example, don't do it*
some special
or there is something irrational
or some highly spiritual
in the professional understanding of each person
management

but just to endure
high status of the Spirit
i.e. following your positions
the core status of the Spirit *yes*

but what makes the control structure more core?
i.e. the Spirit is always fixed on one thing
for example there is Eternal Life
for example, there is harmonious development
and this status increases

this rod somehow increases the height bar
it's even geometrically visible
how the bar is raised here
high spirituality *as if even*
Well so to speak in the understanding of time
multiplied by the stability of opinions

and when do you start to keep this system
in management
then it turns out that you are actually the basic level of the Norm
which is generally embedded in the Spirit
just keep it at the level of Consciousness

i.e. a bundle
logic of your Consciousness
and Spiritual status
which you perceive with your Soul

you can diagnose at this moment
With soul
system

Thus

you begin to see the action of the Soul

and an element of self-healing for example Yes
in action Souls
or there self-restoration means in the structure of that
what is healing and self-healing
this is self-healing
i.e. these are equal concepts

we see that the level of action of the Soul
this is the level that forms
entry level
and for Consciousness
and for the Spirit of action

i.e. there is simply the Spirit of man, yes
and there is the Spirit at work
as soon as the Spirit begins to act
specifically in humans
then a platform appears, i.e. a site
for the whole next level
i.e. it looks very simple
Spirit Infinite magnitude
if the action of the Infinite magnitude begins again
then a huge space immediately appears

for example God is in any impulse
has Infinite Space in Action

i.e. this is what it looks like
that God does one Action
and instantly this is Infinite action
somehow it still fits
into some local space it turns out

make this process sustainable
in the Perception of all people
it turns out that we can consider it
the same level of human action

i.e. a person who has an Infinite Inner World
has , for example, a local autonomous body there
physical is meant

and it turns out that then the implementation of God's Action
that's exactly how it looks here

God created it logically there
at the level of human perception
Well, "logical" because the manifested person is physically

having created man
I put it into the inner world
The Infinity of His Action
and Human Perception Self-awareness
this is the Infinity of action

it turns out that we can see
that God is in any design or control yes
invests in any system
Infinity Action in different ways

for example, in a person it is high spirituality
or the presence of a human Soul, etc.

and from the point of view of any other element of Reality
action this is this Macro action
is invested as a system
First of all, the human perception system

i.e. it turns out that we have, for example,
in the human perception system
the level here is quite good as if extensive

i.e. if we, for example,
we start doing management this way
that we consider the Action of God for example Yes
going through human action

then we see that the control, for example, is going on
from a person
to God
this is quite a high speed
coming from human thinking

i.e. this is somewhat like this
a bit of a difficult form to manage
but nevertheless the simplicity is in that
that it is enough to consider
Human thinking
and we actually see a kind of speed
coming from a person

i.e. how is the human body in general
human thoughts form a certain speed

i.e. we begin to see
quite active mechanism of internal action

i.e. pushing out , as it were , a thought
from the inner level of Perception
from internal action

and skill at the internal level
restore in fact
well, some elements of the physical body

and we can see
how is it formed
the initial position of thought, perhaps
at the level of the human Soul

then it turns out
that we have practically the entire level of development
starting from the initial level of human development, i.e.

i.e., in general, from the level of human creation
By God
further the internal level of a person

further overcoming there at the level of Thinking, for example
systems well as if the next action
i.e. the passage of thought through the physical body

and further we see that any element of action
here's an example yes in Infinite level
it is gradually being translated
to the level of some signals of some quantities
manifested there by human action
there well, sound, thinking, physical, etc.

then it turns out that if we want
for example, make management at the analysis level
that's where the action is as if it doesn't exist
primary statics yes
all Reality is created
including each individual person

and from here comes what is called "action" yes
in Human Perception

it turns out that we can see
that here is the passage of this system of some control
from statics
into the system of action
this is the level that implements
in fact the level is like well, the discreteness of this World
i.e. separateness

why is one element different from another
this is how it happens in the world
this is generally clear at the logical level
each element is excellent for example, etc.

but at the level of the structure of the World
some action still needs to be taken here
to have a distinction

so that's how it was originally
from some outgoing static
ongoing action
it just divides the statics itself
into discrete elements

because the impulse goes to Infinity
it begins to acquire new properties
and the reference point changes
of this impulse

so it turns out that the speed
it's just a change of platform actually
i.e. only the geometry changes

and in this World
we can see this point of view
that nothing changes
only the geometry, form and information change

and it turns out that based on this
we see one of the well as if axioms in action
that the change in shape is often super-fast
or there is Infinite speed action

and the form well the person did something
the form has already changed
change in the form of movement

Well there is physical movement of a person
or mental
here is the connection between the mental and physical levels
There is such a level here that you can already manage
external, as it were, control
which refers to the level of Thinking for example
what is related to the physical level

i.e. the ability to separate information
the informative part, which, for example, means
some level of events there, for example yes in the plans

and the ability to examine an element of physical matter
in general, how does physical matter look like on information

and when we start to consider this level
then we see by analogy yes

for example, as the Physical Body of the One God
reacts in control
on some element of information

after all, the Body must react
just like any other body first of all yes
in the first control impulse

but in general, in essence, the action is initially universal
i.e. there is still a certain difference

i.e. God has universal action
and this Action means
that the impulse coming from Him is in Him

i.e. as if He acquires an impulse, it turns out
Well, from the point of view of novelty
practically remains the same

if a person starts
do as God does
he begins to see
that even acquiring new information
an impulse that comes from a person
so that at least ideologically, as it were
set a management task
so that it does not change

he must be able to translate

in its impulse
one area to another
how to change the shape actually yes

i.e. get the same thing
not due to, for example, the following actions
by changing the shape of the pulse itself
it turns out

so that we have
the same work in self-healing
as God does
we must be able to modify it
light impulse and in dynamics

i.e. it is developing, we need to have time to modify it
and still not affect its purpose
after all, impulse is still the goal of control

and when we begin to see
how God shapes Himself
How does it even self-heal, for example? Yes

i.e. He Self-Restores at the Moment of Thinking
He doesn't have a gap
between Thinking
and Action

i.e. His Spiritual Action is the same as the physical one, but
but in the future
where the current time is just super fast speed it turns out

God always exists in the future

and it turns out that based on this
if we start the current time yes
make super fast in control speed
i.e. it is like some element of the future
Well, that's the simplest model there
which kind of got twisted here somehow
in the current tense

so this element
it turns out that he is good in this position
the fact that he has a future means everything is fine

you are already blocking control towards Norma

Well as if you are fixing yes

and it turns out that you have already achieved
there is standardized management
since you take an element already from the future
and the future is multi-variant
you can choose the option that is useful to you, for example

and it turns out that these properties coincide
in management
you need the current element
just change the shape
so that it would fit into the structure of the future

so he got into the past and there he collected information
and how to put it back

again the problem is well compression yes it works
information or form

and it turns out you can compress
in fact through the Norm of its own events
through one's own level of physical matter for example

it is possible through Spiritual matter
but then the speeds are very high

and then it turns out that self-organization
for example, the healing of physical matter itself
this is the ability to arrange in information
physical body
between the impulse that goes
from the normal level of the desired, so to speak, future
at the current time

and the future goes the other way
practically unchanged

but only passing by
through the information of the human physical body

and here's how the constant impulse keeps going
through the structure of the Norm of the physical body
the body begins to heal

because we take it initially

as if we don't change the momentum

and there is a very simple principle in information
what if such a signal passes near the body
then the physical body is always oriented
to a kind of absolute Norm
to the Health Standard

it turns out that we are practically just on everything
we show
how the system of interaction is arranged in this World
between there information of the future for example yes
past tense

and the physical body perceives
at the level of well let's say some kind of intellectual action yes
at the level of manifestation of intelligence
in the Perception phase
at any point of Perception

and then we start to approach
to the concept, for example, there "body intelligence"
i.e. how is it expressed?

besides the fact that yes, every person has it
there is normal intelligence yes
well, that is, what relates to the concept of "intelligence"

and for example there is cellular intelligence
cellular reaction system

and when we begin to see
that the body has infinite development
at any point of connection with information

i.e. this is where the physical body connects
there arises an infinite number of actions
and often highly intellectual in terms of tasks, yes

then we see that the physical body
it does carry a fairly important basic function

for the implementation of the basic level of management
that is realized through the physical body
the level of specific events, for example,

let it be the earlier thoughts of a person

but still he thought it through, etc.

and even if he is not involved there at a particular moment
and somewhere else he is doing something else
but does not participate in any event

if he had anything to do with it
then the criterion of this action
is the physical body of a person

and considering that any event
related to any other

then all people participate
everyone succeeds at each other
somehow
in the system of aggregate information

and you can trace all these things in connection
the only question is why yes means to do

but for the salvation of all
this can be done using an example
For example there is some kind of service work there
well there's some kind of social public
which according to technology is possible there security
technical service, etc.

for example, there is avalanche control, yes
technical service

and interaction in the system
here is a man
external system yes
Human
there is an internal system

this is the level of interaction
starts leaving space
where are the realized systems of God's presence

i.e. God at this moment
well, as a person in management, yes
He can be at ease

at the point where it happens
this is precisely the first level of the emergence of man

how does God choose anyway
point of your presence
in the absolute World, if I may say so

from the point of view of Self-healing itself
He needs it in the most, as it were in a direct sense or something
to avoid doing anything
He just needs to transfer health information to everyone.
there to any person
which appears there for the first time, yes
in this place

i.e. God must initially understand
who to provide, for example, maximum assistance to
and then this help will extend to everyone
because he is a human being
i.e. the one to whom He helped

but here is the distribution to everyone
this is already the same task of God and people, etc.

and we see
that the ability means to somehow disperse information
make it Infinite
in a single impulse
there or in one impulse

and the ability to receive means the action is the same
for example, in the physical body of a person
as well as comparable action
for example with Infinite Action
or there with Eternal development

these are these opportunities or abilities
let's call it skill
they practically implement
a whole layer of events that has
precisely the shade of Eternity
At first it looks like a shade

and then you can see
precisely detailed systems
that even in that case
if you haven't reached control quickly yet
they were engaged in some specific level there
or you want to orient some person

for action on Macro-Salvation
you need to show it there somehow convincingly
that you are right

then here so that well there for a long time not to convince
and yet a person can have his own opinion
then it turns out generally
you can attach once show
well, the same self-healing system

but he can accept it or not accept it
without knowing what we're talking about in general, essentially yes
you need to be able to convey it

this is where it comes up
level of technology transfer
when another person for example Well actually doesn't react often
busy with other things

and it turns out that at the level of action
Human
God
we also see what it means to always be acceptable yes
what a person
Well, these, let's say, control systems
when what a person sends what a person does
for God

God always sees Norma
in the original Action
there in the formation of precisely the creative level
requests or something

because the initial level of the organization of the World
it still comes out
into the structure of any number of words manifested there

i.e. if he asks for something
the most precise request that matches
entry level of the World Organization

and precisely at the point
where he was personally created by God

the easiest way to meet God
in the same place

where for example man was created initially

that's why it works

Well, at the level of information, of course, in this case
although it may be physically like that

it turns out that we can see
what does this action mean for self-restoration
in a person
has quite deep roots
as if even at the technical level of implementation
i.e. there are many intermediate actions

and it turns out that even if a person does something there
one elementary action
at the nearest level
near him immediately reacts
a lot of information
on this process

and depending on the level of reaction you can see
how do you need to improve your health there, for example?

i.e. here it becomes visible
how does it happen generally speaking
a mechanism for this self-control
there for your information

i.e. where does it come from?
where does it come from

because in this case we are talking about that
that the implementation of this control, so to speak, external
in relation to their own tasks
this is the situation
which for example there is often it is done once
and then the situation becomes clear
and you decided to continue to develop
depending on your decision
it may be that it is a long time

it turns out that if we start to control
Well, how is the control carried out?
that's the easiest way
the ability to teach others to give them knowledge
then the performance is significantly higher

becomes

you can see it here
that restoration is in action
there is self-healing in action
This is a level that is based primarily on the fact that

what can you see
that in any control system
Well, there is such a level
which allows you to always instantly
there a person can recover
be able to if there is no immediate need

be able to perceive
information transmission system for example
about the fact of recovery or healing of a person, etc.

when we begin to see
connection between elements such as future events
elements of the past there
where we begin to distinguish figurative events
seeing this action structure
with which a person deals yes

i.e. in this case
I showed it mostly
where there is human action

although there may be many other actions
I just didn't do them today, for example
somehow implement something

you should look at the controls like this
so that these are your private tasks

and it turns out that having
here is an example of a private task level
we can see
a fairly wide range of the next action

i.e. if we have a set of discrete events, and
for example, I just described it there in the past 5 minutes
set of discrete events
often unrelated to each other

but we need to be able to manage

this phase of different events

Well, at first I was talking about one level of management
discretely moved to another third

and now we are at the point of the future
we are located
and we need to make sure that all systems are managed

Well, if you compare there
let's say there is some swarm of bees there
and they all need to be in the same direction and fly

i.e. it turns out that we should then consider
from the point of view of analysis
How does a bee react in general ?
what is a bee
what is it
the object of this action is in control

then having considered
as God does
He simply normalizes each element.
i.e. brings it to the level of the usual Norm

and it turns out that based on this
we see something like a very simple element
let's say so well, the standardization organizations

to get some action
we perform some intermediate actions
and it turns out that in the goal of the action
Norma itself is laid down

because any other signal you receive
i.e. the signal coming to you
he still has super speed at a certain level

notice this is very simple from the point of view of that
as God does
we can see that
for example, what is some kind of quantity at all ?
which means the proximity of one system to another

i.e. there is a time interval in the future
we need to look at some selected element

for this future
what does he look like

how to recognize the future tense at all
in information so to speak Yes

then this is exactly the contact
some small element
with an element that means
some element of the future
this is time and information as such

that's where this information comes from
how are they perceived in general
People

why do some people perceive things in one way
others may be different somehow

and this is this interaction
selected elements of the future
actually carried out through the past yes
and sent back to the future
in the same configuration
implements a complete recovery system
actually a person

in this case we are talking specifically about
it 's about healing, self-healing

under the term "self-healing"
to a greater extent
it is more expedient to make the management
for just healing

and often perceived
some problem with another person
it is still a human task
and it turns out that this is his level of self-healing
even if other people heal there

and it turns out that based on this
we can see the following management status
so that all the disparate systems taken separately there
were moving in the same direction
as I said summed up

and under management conditions
different systems are connected to one place

so it turns out we just need to highlight
the geometry of this action
and in this geometry lay down
as an element that is a plan
i.e. in fact it is some kind of plan
which he may have initially there
final characteristics
but it must be Infinite

and based on this
the plan should be set in management so
so that it matches

all elements of these events are highlighted

that's the easiest way
means considering direct connections there

but here it is also for the self-healing of a person
there is a level well or something in a more general sense

what a person can do for example
Well, that's the management
there to consider the system of future events
and create a kind of absolute standardization system
for any situation of any system

and when you start to see
For example there is a lecture course
on my technologies or there I give a lecture
I give seminar management there

and you can see
what does well mean for example, there is some kind of seminar lesson there
you can choose any topic there, yes
topics known there, for example

and here it turns out that you have control
as if selected in the system
Well, it's more about your reaction

and here it turns out
that based on the level of management
for example, there is a seminar going on there on my Teaching

and we have your reaction through some other article
Well, there might be an earlier one published
or you just read something

and here we see that this is precisely the idea
so let's say self-healing self-restoration
or just the usual Norm

can be implemented here
at the level of just physical space
where you start to make the management as if averaged
in relation to physical Reality

well, some for example there is a bench there
can be done in relation to her
control
or near it

and here you find
a very subtle approach to self-healing in action

you mean that at the same time all the time something to do
Well, somehow it is realized in action
you act somehow there
and vice versa you contribute to your tasks

and on the other hand
So you see
that there are many other tasks
other people

and your task there is in the social aspect
to be in equilibrium, let 's say yes
don't allow any excesses there
don't consider that there is, for example , a point of view
if she is really normal
then it must be normal
no matter what kind of manager there is, etc.

It's one thing if there's some kind of nuclear reactor there
then the point of view should prevail
which corresponds to this diagnosis
for example, there even in management
if it concerns equipment diagnostics
there at the nuclear power plant on a nuclear reactor

then it turns out that we have the opportunity
select the control target so
that we do not differentiate
hard phenomenon and concept
and we receive the sample in the form of ready-made answers

i.e. the answers are coming to us
however, we haven't created the task yet, it turns out

and by the way, is this the most common way ?
so very fast learning
when you can do management
practically well as if instantly , so to speak

although in reality
to do some kind of prolonged action
in relation to another object of control there

and your earlier pledged control object
it could be like this
what you actually can do there for example

and well, in the area of management
if we examine this process
at the level of logical connections, for example

then it turns out that earlier management
just has a different length in the future system
i.e. you can clearly see which control element
where it was created and from the point of view of the future

was this element in the past
or was it created there specifically in the future

and here you can see it
what through the future
through information of the future
you can see it very clearly, so to speak
tasks of action of the human physical body

and that means you can protect this person yes
consider its promotion systems
not at the level of addresses there
and just watch where he walks
and where it is necessary to block at the information level
some negative information

when we start this way again
I'm still showing it here
highly discrete control image

i.e. the task that has begun
immediately moves on to the next task
often not recorded in words there
how where is the ending and the action

for example, you work with a card
for some region or a number of regions
you still don't always have the thought
naturally clearly fixing constantly there
remember all the subjects of the federation, etc., for example yes to Russian
or somewhere there are countries of the World

then you don't need them
you can remember them there
but you don't have to for example now
apply in management yes

you may just need a row there
for the central region
or some special series

by specifics, for example, management

it turns out that we can see the following
that even if at the analytical level
we are starting to introduce a system of random actions
i.e. the analysis begins to come out
to some discrete quantities

i.e. it is easier for many people to receive
a well-known control system
and then how should we do it here
so that self-healing for for Eternal development
it was natural

we just need to be able to be discrete
i.e. some such as if chaotically
although they are not always chaotic of course
but simply selected as a sample
elements
coincided with what you do
in the conditions of systemic choice

this is a very important level
God, what does He do once?
what is he doing there after

so let's say multi-course measurement there is a situation there
it's still the same for Him

for God
any of His Actions
has precisely the character of uniqueness yes

any other person
the same element is also implemented
but God is the Creator of the whole World

it turns out that a person
where it comes to the creation of the whole world
can help him
i.e. to do his part when he creates there
for example , as the head of the center there for my Teaching

and not only as the head of the center
to spread my Teachings
but maybe just an ordinary person
which contributes to the tasks of Salvation there

you can see it here
what is in the system of collective Consciousness

a health system so to speak Yes
it is the ability to carry out a quick action
skill from a sample of often chaotic
there are no related materials
make a control structure
which will be understandable for example yes means

and in principle everything is easier from now on
you start to see the management like this
what does it mean, well, some separate social value, yes
this means that this value begins to develop in this way
that you begin to see the prospects of this magnitude
here in Infinity
once you have left the series of independent systems

and it is clear what needs to be done to achieve the norm

i.e. the ability to form through discreteness
opinion

discreteness of movement, as it were
to form the Norm all the time

and from this we can see
what if we start working through images ^{yes}
through the system there optical ^{well as if} levels of connections

if we start working this way
what do we need logic for ? ^{as if it were optional}
in terms of ^{broad} development of the logical model

then you can see that it is the same as with God
any impulse becomes universal

it even becomes more universal
that you can, ^{for example,} set one task
if you have time to adjust the impulse
then it turns out that there is a solution to other problems there at the same
time

but as a rule, management is implemented this way
from the point of view of the harmony of the World
what exactly to take there and for some reason, ^{well or what} paths
where you have to force someone to do something

here it ^{is in general,} this option does not work
and so we can consider
here is even the following transcription

that the way out is still to discreteness in management
on the discreteness there in the knowledge of the material

it is still an organization of that
that God is active
and there discretely
and ^{for example as if as a} linear level of control
when He shows Action

then you can see that there is a structure here
Precisely the primary reaction of a person , ^{yes}

because that's what we're talking about
what he should be able to do in any action
be ^{well,} be healthy, improve yourself
even if it is being observed by another party
he ^{should n't know about it,} right?

because people are often focused on people
different points of view from different sides
and skill in this position
choose a normalized social level

i.e. a person goes out into the street
there are some elements of the physical world there
it turns out that it means exactly by analogy
for example, you can yes, do something third there
so that a person receives
for what he implements in the outside world

and when you start to see
that comes from the Infinite magnitude
there is some help for the students there
which implement means
well, some development goals there
and their own, moreover, personal

and this is an infinite quantity
again it goes on a discrete level
i.e. I am constantly moving to the level now
from one discrete system
to another
i.e. I am constantly increasing the system
often unrelated control bases

I do this on purpose so that it can be seen
that any impulse is so universal
that even often the goal of the impulse
may not be set for external Perception

i.e. a person does well it's like the same thing
but a person changes all the time

the thought changes
and it turns out that it means that in Perception there is
that there is control all the time
through this block of information yes
or it's a mailbox
or it's an internet site, etc., an office, for example

when you start to see
what external information
very clearly, as if fixed
on individual frequent elements

i.e. a huge array of information
fixed on separate elements
you see that this is precisely the ability to unite
for example, there are some creative processes there
in the conditions of Thinking ^{yes}
and some other often complicated matters

this is the level where we finally see
that healing occurs through the physical body, ^{for example Yes}
i.e. the work goes through the physical body

and when we start to consider
^{Well how would} this situation develop further?
in information
then we see that based on the task
constantly increase discrete control
we can

^{well, i.e. not discrete}
in this case it is often not connected at a logical level
with earlier material ^{yes}

we can find the original impulse
which includes
and the action there of the other side
and the opposite is where you get the answer
i.e. the impulse of the initial value itself

then it turns out that self-healing is very simple
because you finally came to that place
where God shows
how is he healthy ^{for example yes} on information

and then get close enough to this place
and you become healthy accordingly

^{Well, if you are already healthy}

then at least then, ^{well, some in the working sense, so to speak}
from the point of view of applied aspects

some elements are written there
some elements
that can be transferred to another person

i.e. the fact of transfer in this case is established
as an element of action

on developing their own system there yes

and so does God

He begins to consider it as if locally

some thing

and all these external rational systems

they begin to organize themselves as if before our eyes

at God's

and generally speaking with other people

who, for example, observes these processes ?

it turns out that if we start

for example, work like this

that we need to improve our health

in conditions that are generally opposite often

by distance there in some elements in the control

then it turns out that this is the simplest option

bring the momentum

to such a universal

so that it doesn't even matter what he takes there

what kind of handle does the man have

what is he doing

but any impulse towards a person

universal

God does this all the time

what do you see control

absolutely well as if already universal yes

at some investigative level

but initially it is all the same for each person

a specific control spectrum is given there

and the personality is capable of Infinite time

perform management

those. self-healing self-healing system

this is a skill of some Infinite magnitude

there and from the future

means to be taken under control there

there from your logical level

and then everything goes on as usual

next action

i.e. I specifically switched to the social system
to show
that self-organization self-healing
or does it mean self-healing
this is a level that is often completely unrelated
with something preceding

I've explained it long enough
this is the position in management today
and even if you look there
Well, there is a person on some kind of garden plot

it turns out that we can see
that as soon as we understand
this household component or something
transition
any level of events
into the form of your action

i.e. at any level
on any discrete value
which is often not related
but it has the goal of healing, yes

when you have
transition to the level of implementation of human health, for example

and therefore
if the system is realized in the collective Consciousness
for one person
so it's for everyone

i.e. the ability to make this transition sustainable
this already speaks for itself
that you are at the level of Macrocommunication
participated in this process
and received this type of knowledge

that any action
given away
as if into the information and control system
gives Norma to you and everyone around you

i.e. there is such a point
what is the reverse impulse
all the time rationing

All

and as soon as you come to this level
then further on it's basically normal
with a completely discrete form of the external system

I even give the material on purpose
in completely discrete blocks

you get absolutely absolute
often stable management
which does not even depend on that
that's how much you'll change your mind
in non-strategic terms of course
and some local one

go to one store another third
you still get it
very stable control
from the point of view that all impulses
are moving on to you

just like God does
impulses are brought out to itself yes

This is where I end today's seminar

Thank you very much for your attention

try to highlight the discrete part separately
and work it out on your own
each one separately

and see the connections
Why
what is the discrete part
located
next to one next
i.e. look at the blocks directly according to this control

Thanks a lot
