

GRIGORY GRABOVOY
The Teaching about God
Spatial extraverbal control system
18.03.2005

Hello
the topic of my seminar today
This is the Teaching about God
Spatial extraverbal control system

in this topic i show the technology
when a person, for example, put
the primary goal of management ^{means}
in the form of a specific management goal
further can already
Firstly, work through the spatial environment
i.e. actually visualizing and perceiving space

secondly, he can in principle
not to produce ^{suppose}
some further verbal accompaniment
management objectives

moreover, he can in principle use
any verbal accompaniment
in this case the goal will be realized

i.e. in fact we are talking about
what is the glow
Spirit
Souls
and Consciousness
^{as if in counteraction to}
to some external event
if the event ^{is assumed well,} not what is needed, ^{yes}
to the manager

then this is the unification
at the level of action
at the level of internal action

here is the external
and in this case it is an internal action
this control will be implemented in any case

right here, that's exactly it
this is an important aspect of Eternal development
from the point of view of the technology of Eternal development

what if we consider for example the Action of God
then God is the one who acts and creates at the same time

then it turns out that for Him
here the concept of "information" is a certain state
i.e. a word is created somewhere and an event is created , for example

and if you get closer
to the state of God at this moment
that word in principle has no defining meaning
from the point of view of distant goals

because He is also the Creator of the word

if we consider
initial meaning of the word
the further effect of this word may be preserved
as if in the inner world of a person
and the person understands this
it's completely clear to him what we're talking about
and everything is like external support in management
it turns out that it is not important

so in this case
having already crossed over
to a regional, so to speak, territorial spatial management
we can consider this point here

here is a glow or let's say a thought or let's say an action
which comes from a person
action in the form of Thinking
can be distributed
into a series of very subtle, as it were, sub-gradations
i.e. in lighting systems
where the intersection between separate systems
it is practically a very barely noticeable structure

and when the light starts to cross
at high speed
individual tones of light
so that from some let's assume there is gray color
make the manager there silver color

we need to be able to practically
the external structure as if to capture yes

i.e. we need to do it this way
so that the external system is not defined
at this point in space
as soon as she comes closer to you

Well for example, God is Eternal
any information comes to Him
He is still Eternal
moreover, He creates Eternal development
He's still teaching.
shows technologies
and shows some prospects there
creates thought forms, etc.

and it turns out that based on this
factor of creation of matter
the matter itself is distributed into a state
as if both absence and presence at the same time

this is an important aspect of management
what is more present at this level
state of a knowledgeable person
well, some knowledge and some knowing Spirit
even this can be expressed to a certain extent
although here it is more precisely the knowledgeable person

and that's when we start this knowledgeable person
as if to project onto oneself
because that is your personality
i.e. the personality of a person

then it turns out that this is the projection
it forms harmony precisely in that sense
that this knowledge is even a certain field of knowledge , so to speak
what suits your personality means
where is the primary state
generally speaking, it is not defined initially
it is neutral

and depending on that
how do you look at this element
you create an image of yourself
and at the same time it turns out to be the same
in life information

God does it at the same time
He doesn't have anything stabilized , or something
absolute state from the point of view of logic
because He is looking at the object
and creates in the object
reaction of oneself

and it turns out this state is quite
in general Well, by and large it's correct
because for a person
when he works in such a state
because then for him
any external information
any event
practically harmless
at least he can
as if to stand on your control and that's all

and what is the event line if it is negative
she's just passing by
well because the person is not really manifested
in the structure of one's own knowledge
in this place

i.e. in fact, this is an area of , so to speak, absolute knowledge
but this is also an area
where there is no specific form of knowledge

i.e. you perceive this area
you know more with your soul yes
with your internal state

and in this area you work the same way as God does
It simultaneously creates
and form
and Consciousness
and knowledge yes
and Perception

and if you think about it logically
we need to catch up somehow Yes
actually at the level of logic or something like Thinking
behind the different systems of this process

and this state of control is somewhat unusual
that the area is practically not defined

i.e. you initially made the control
you remember, well, by analogy with that
have you ever done management
and you remember that management
Well for example, it was done one way or another

and here, as it were, an earlier memory works
that any other goal
it falls under an earlier mechanism

after all, for God, how does governance even exist?
He must make such a management
when is the next level
it practically already exists
i.e. He should do it in advance
from the point of view of a person's personality, for example

and that's why this area
most clearly as if one can see
as at the territorial level of government
the system of information organization is demonstrated
as if from the outside of the external Macrosystem
then the system is most harmonious

i.e. space management
is some territory there
from the person
this is the light coming from the personality
and at the same time the light coming from the territory
which transmits information to the individual
in fact, as if even a light aspect of the personality

and diagnostics are already being done using light
i.e. without yet getting onto the fabric base

and that's when you start working
already at light level
then here it is natural

light has an infinitely fast speed
any means diagnostic as a property of an external system
for example, a section of light that falls on your beam of light
it also has neutral characteristics

because the light of Consciousness for example
it has the property of interacting

with those areas that are neutral

i.e. light falling on another light
at the same time it carries information
and at the same time there is no information
because in another place
this information may not be available
it has an instantaneous propagation speed
it is precisely the light of Thinking in this case
and not just optical light
which has a finite velocity

and when we start working it means

Well for example, we exclude the concept of "physical light"
and we work precisely with the light of Thinking

it turns out that this area needs to be built
some absolute control space
from which the current state is created yes
the current Reality is created
in principle it's not that difficult

Moreover, the current Reality is very harmonious
because the processes are super fast
and this is, as it were, in the structure of the current action
then the person is absolutely protected

because we are practitioners
we must still definitely strive for it
exactly such states when
such management systems
when a person lives forever anyway

here he thinks, he sleeps, he speaks any words
just any means
Well , the only action
must be done
naturally creative and physical plane

and here is the structure of Thinking
because there is an aspect of Thinking
when a person has been in control for a long time
Human
he naturally understands that
or initially from the state of the Soul
which is absolutely not allowed
for example, doing something there is not creative

but for example in the learning process
there are certain people who think
that this person did something wrong
and often for the purpose of analysis
This Thinking is nothing so problematic
does not represent itself

it means there's just a person there
Well for example, he took and allowed some thought
which he himself considers problematic
although it is not generally problematic
it is from the point of view of information
did not bring anything negative to anyone

and he thinks since he allowed such a thought
then the control slows down
or for example it is not effective there at the right time

but from the point of view of the Salvation of man
This cannot be allowed either

i.e., generally speaking, we must pass on knowledge
when a person has received a primary level of knowledge
already saved protected and saving everyone around

therefore from the territorial level
when is the management going on
space
and as if by the light of space
this is the most dynamic form
as if strategic planning

that you can see directly the region
you can see exactly what is happening
and receive information as a platform
here is some platform carrying some events there

and from the standardization of regional systems
get your own Event Norm
i.e. there is a very deep inner meaning here
normalizing management somewhere
you get the Norm of your own events

and it turns out that this one
your own Norma
that's actually what you are

Well in general, you practically do it on your own behalf or something
into the realm of his Infinite Future

pay attention here there is this status
namely the Infinite Future

and when do you start seeing this status
i.e. you start to see
what do you want for example Well, it needs to be done at some point
to do something
you are doing it

this is what it is from the point of view
precisely of creative action of course
element of the infinite future
where you can sort of decipher
why from the point of view of Infinity
you perform some specific actions

and look at your own personality
from the point of view of organization
personalities
And
Peace at the same time

and that's when you're like this
Well like speed or something actually management
come out
it really means some external level
other than the stated purpose
primary
it doesn't matter anymore

then all external information systems
they kind of blur
from the point of view that if they are negative
they don't happen at all
By the way, there is no information about them as such

and therefore, in principle, this is the state
it may be a bit unusual
but mostly there are people in action
This is how they react directly
for some events
or in extreme conditions
or there are special technologies if you work on them
what exactly is the superreaction rate

where the state is simultaneously
and is created
and at the same time often contains
the next impulse is like Macrocontrol

i.e. some situation has been resolved
but just imagine a pilot who starts to lead
there is a plane in extreme conditions
he has to make one decision after another

it turns out that by selecting
one as if impulsive means the decision
everything is changing
he should take another one in a second

but the first impulse must pass
Well, it's leveling out , but for now it's flying
he must make decisions one by one

which by the way let's assume there in the treatment of diseases
this technology is also very important
in the sense that you are simply on everything due to management
bring the control to that area
where all the external Reality is
does not reach the disease
i.e. it is not there, the disease is absent

i.e. this form of information
that it does not contain information
well, which you don't really need

or or she means like this
what are you doing there with word management
it's like internal yes
like a word level
a word that only you can hear
and which only you understand

i.e. here, well, there is as if the sound of the word even yes
there is a concept of "word sound"
and because something is said, for example , by a person
well, sometimes in the distance
can be understood by the timbre
or approximately on a physical level yes
what the person says

the same thing exists the sound of the word
which is organically connected
for example with the human tissue system

and now if we consider
sound of the word
which, for example, is connected specifically with fabric
then we see further
what really is this interaction
for example words and the external world
this is the first visualization
as if a static control loop

i.e. to get static ^{yes}
here in management
namely the obligatory Infinite development
this is actually a special action

because if we say
about Eternal development
as a system level
and this is the only way to really talk
then any other systems well as if measures
they are still only temporary ^{there}
and do not correspond, for example ^{yes}, exactly the main goal
which is realized in any case
namely Eternal development

that's why it turns out
here is the primary static in this process
it is precisely when we exclude
here is the level of control
as if outside of time
beyond words
so this level should be created

and for ^{example} you created this level
i.e. you actually created space ^{yes}
what is the effect on

once you start the action further
for example, to show
into the structure of the Infinite Development
or into the structure of some level of the next one
then the next question arises

here we created a series of words there

set a sequence of some events
we know that we need something
because we see it

pay attention here
we can switch to such technology
what we can see and know
but you don't have to say it
and already build events according to what we see
just Soul

i.e. the Soul perceiving events
and all external control structures
there are action words, etc.
this is generally speaking a consequence of the action of the Soul
but it's not like the Soul is doing anything specific there
in the form of word organization
Of course she can do it that way too

but in this case we are talking about
that you are just on everything
as if you were talking
with your own Soul
which is at very high speed
strives for Infinity

i.e. in Infinite development
The soul has
The infinite factor in the personal context

i.e. how to feel the fabric in general
human body
what is Infinity

here through the state of the Soul of this type
you can feel it
just appears there in a specific place
as if a feeling of warmth
and this warmth is Infinite

i.e. there is ordinary heat
and there is warmth there infinite

and by the way, it can be felt, it can be seen
how the wave spreads out there along the whole arm for example
from just one finger there

and by the way it is clear that it really is
the properties of Eternity appear in the body
in principle, this is by the way a mechanism of treatment
can be used
if a person has any problems

but in this case from the point of view of knowledge
that's exactly to touch Eternity there
as if having modeled this structure independently
and get from here the real structure of Eternity
Well, the cycle has already closed

i.e. you with your own Consciousness
build yourself
and in Infinite development

it's not just that health improves there, for example
and if you are healthy there it turns out that here
Well, event management is clear

but there is the factor of Eternity
this is what Eternity is in a certain way
and it is also constantly felt
i.e. this happens
certain well is it a stereotype of human reaction ?
when he, well, having some kind of forecast phase there
about myself about others
he may know quite clearly
what awaits him in the future yes

and he can in this structure of Eternity
develop as much as he needs
so from the point of view of, for example, one direction
you can develop there infinitely
in the other direction, etc.

i.e. here is the level of external words
this is the level of one's own Thinking
as if Well deep in the Soul

and that's when we set the task
that words have no effect on Reality
and in this case
a person in any case achieves this Reality

then another problem arises
what are the external words said in relation to a person

they don't affect either

for example, a person needs to solve some problem
Well take the clothes to the dry cleaners there
there is a simple everyday problem of a generalized type
such things happen often and everywhere

at the same time, something breaks in this dry cleaner
and someone says that it is closing

then it turns out he can't pass it, right?
this thing
but as a manager he should do it
so that there Well, if you don't waste time
I'll have to hand over my things anyway
then he must also control
that the external system of words would seem
Well, nothing threatens him with such unprincipled ones
this is a background level completely
did he dry clean it or not?
in the end it doesn't matter
for world civilization

but nevertheless if he is a manager
and let's assume he still wants to use it
any fact in this life
in order to understand the mechanism of connections
and so it is necessary to do it anyway to make sure yes

even here there is a lot in my Teaching
basically everything is built
on the personal conviction of a person
when he acts he gets results

and it turns out that here we must be able to
make it so that even in background structures
if he needs it specifically for Macrosalvation, for example
then he must make sure of it

and if we assume he is there for some reason
wants to make sure that the person's actions are effective
for example, some event is happening there

and he wants to see
is there any point in influencing this event or not
i.e. in the action of another person there
maybe there is no point

because it means there is a kind of third sub-meaning
i.e. a certain ladder of solutions is developed

that's if he finds a solution for himself
what is there for saving the world
he will be convinced somewhere else
and dry cleaning is not necessary for him
no problem he can do it

and if he still thinks
what is better to do management
yes in any case

as soon as he makes a decision a person
that for the sake of saving the world he must do this
then here's how to change the course of events, as it were Yes
this dry cleaner is already broken, the word has already been said
Well, that's been said

Now if we suppose to pose the problem like this
what does dry cleaning mean
some mechanism is broken in this dry cleaner
but the word has not been said yet
that's the difference here then

then it turns out that a person can perceive an event
from the point of view of the diagnostic system of his personal
event
and he himself yes

and then precisely from the point of view of diagnostics
this is exactly what is needed here
have such a space
which works in any case regardless of the word
regardless of the event, for example

and it turns out that based on this
you have, in general, such a fairly objectified
what is the level of action
Here's how you can act in an event system

can you describe the system in words
and work on the verbal level in relation to the word
and is it possible to work without words at all, i.e. to divide

and when you start to divide
a very clear diagnostic mechanism emerges

which already realizes the external Reality

i.e. it turns out that Reality is organized
from your action in relation to the word

and in relation to the same event
but which cannot be described in words

here is the ability to divide
word from event

this is you personally where are you for example Well, you are there without words Yes
without any negative information
or even positive information there
i.e. you are simply the source of Reality

and that's when you come to this understanding
then here is the same dry cleaner
it's very simple then influence can be done on the past
there, bypassing all the words

here are all the corresponding words
possible defects in technology in general
this is some kind of sphere that can simply be folded
and put it aside

then it turns out that the absence of the subject of the action
absence there in the collective Consciousness
in this area and at this moment at this level
transforms Reality

as a rule this can be expressed
there in something like the following
For example there is a call from somewhere and the defect is removed, etc.
and the dry cleaning starts working

i.e. you don't need to look further
what to do how to do
you just escape the word
and minimize the meaning of the negative word
or turn it into a kind of management structure

i.e. well, there's some kind of broken thing there
broken mechanism there is a destroyed system

you can log in
into the internal system of this concept
and restore the structure

i.e. after all, when we consider
well, there's some problem there
if a person has a disease
which is in the forecast in the usual
leads
to some problems there may be more significant

then it turns out that it is simply necessary
enter this information
and control of the internal state of this system

after all, any diagnosis
any unfavorable situation
it's still a certain level
in general, some external system

that's it, if from this point of view
let's consider there, let's suppose
process of destruction of destruction
then there are still some external systems working here
this is normal information some control systems

and when we begin to see
how are these control systems
are related to each other, for example
it turns out that the work is within the system
often restructures very quickly
this negative system and then
then it turns out
we can't use their mechanism here

the destruction system is built on that
that there are some words there, for example
some information levels

and if we work within the system
we must work as if we were not saying anything
and even generally not perceiving the negative status
so as not to drag out the information
into an additional cell
i.e. so that there is no additional channel
distribution of information

i.e. the ability to work
as if without touching the system
but at the same time influence the system

the same thing means there is
in relation to the space of action
we need to raise it
some level of its management
personal person
but at the same time he can do this
bring great benefit to some region there
make ^{suppose well} some kind of positive system
by Macrosalvation
and already as an investigative system
changing this invisible component of the World
get your own events

but he also receives the event sequence
still not considered specifically here
why did the event happen to him
here is the vector that decided his event
for the better

this is where God's work is
God created Reality this way
that she is ^{like well}, it twisted in that direction or something like that
that the events in his life became the ones he needed

at the same time, there is the status of events
which ^{generally exist well as if} by themselves
and the person doesn't think much about it
and why ^{for example it means that} some events exist now
^{Well as if} in some automatic mode
perceives information
or somehow implements its actions

so basically this is the level
^{Well as if} systemic fundamentals sometimes
levels of Perception
this is exactly the level
where is God and man
are in constant close contact
both in telepathy and on the physical level
and through prayers of action there assistance

this is this level of some naturalness
this is precisely a very intense level of communication

because from a human point of view
naturally when he understands

and this is what we, well, people think
let's assume the calmest state
where it seems like he's not working hard somehow
Human
he can calmly remain in a state of rest

just a little further, cross this border
and to cross it you have to get ahead
neutral system level
which I just mentioned
where there is no possibility to shift the action
well when there is no information, so to speak Yes
fields
no spatial environment
which generally correspond to a certain optical field

it looks like some kind of empty area
and when you start to cross it
it turns out that in principle all external information
it is quite intensive, which means it is being formed
in the system it is almost like super remote control

i.e. you see essentially by optics
very distant systems mean connections
and those that do get in
that means your level of Perception
to your level of action

for example, there is one wave of your Perception
there is a next one that is already captivating
what was for example earlier outside the zone of Perception

and it turns out that you see
how is it organized
and your Perception system too

i.e. you can see that the system of Perception
then this is knowledge
in fact you
what's actually happening
know yourself

if you know yourself
that's when a person knows himself
he doesn't have to think about it for a long time, for example
again about myself there once again

what to do next

Well, the person knows himself and he is in a state of peace

i.e. it turns out the more a person knows himself

the more this area is

some safe level means so this type

that there is no need to attach anything there

some additional conditions

in order to accomplish something

i.e. the same as God

human condition

this is both a person and his action

and if we still for example

Well, unlike God

God created all Reality

but if we by means of management

we will also add the creation of Reality

then in practice we are very clearly aligned

with the Action of God in the plan of Eternal development

and it turns out that this is it

Well, it's a peculiar state then

well, some kind of so to speak dynamic rest

where do you have control

there is some kind of empty

well, it's not informative in optical terms

region

this is all the action

this is precisely the complete real security of a person

from any external influences

from any external changes in information

and it is constantly there

at a super-fast level of Perception

when information moves at super-high speed

he doesn't differentiate it

there is still such a system here

that it is enough to perceive something there calmly

there watch a movie read a newspaper do something in the office

and at the same time be in a state

when the speeds are very high

and that's when the speeds are very high

then it is also as if the information is not differentiated
because when the speed is high
here is a segment of information going at high speed
It still needs to be stopped and decrypted

and if this is not done
then again it feels like
information as such
Well, at least it's not expressed there explicitly
i.e. she is not in this place
although here, on the contrary, there are super-fast processes

and it turns out we can get
another control complex
what from the level of lack of information
get speed
well, and super high speed at that

and that's when we, for example, this speed
we are starting to translate into events
then here the next level is very tightly bordered again
lack of information
this is realized right next to each other, literally at the junction
the implemented environment is worth it
well, that is, a kind of antipode

there is some substance, let's assume that part
which corresponds to exactly another structure
there is a material thing
and is there a place where the thing is missing

but if we are the place where it is absent
but which exactly corresponds to the existing thing yes
in the World of Information
we learn
we can influence this thing
which exists in the physical world

and that's when we start to influence in this way
on the situation
then here it turns out
what exactly, well, let's say, subject management
substance
there is territory
you can control an entire territory like this, for example
and specifically work out the environmental situation

come there and measure
to
after

this will be implemented
you can even see
how is the cleaning of large areas going in general

it's a very simple job
in terms of objectification
and as a practice you can really
do this thing more often
from the point of view of for example there is work there
Well, using some devices for control
which measure either nitrates or radiation there

and try to implement this practice in regional management
use for what you have worked out the region
there is a reservoir or just some event on the soil
helped someone

Well, look at how you get it
all external Reality
for myself

and when do you start asking this question
then this very formulation of the question
Reality itself begins to give birth

i.e. so that there is Peace before a person
he should have first formulated what was next, yes
some question

and that's when he starts asking this question
God begins to help him intensively
and here a person puts in the main control

this is the area that
Well as if so there is no such unannounced information
where did i say either this is absence
or it's some empty field
or these super speed moments could be

but the only thing that does exist here is
the internal difference in all these systems
what when superfast processes
they are closer to humans

maximum speed of information
the man himself

and when he is just like God
for example, it starts to increase control
then in fact he comes back to himself again

the more he works in the outside world
the more he understands himself

and here is this level
Well as if some absolute knowledge
some kind of polis existing in space
this is his level
own peace own action
according to a seemingly confident development plan

and then he sees further
that God who acts
well, even if at a distance
if there is information there
He will always give at the right time
there is exact correct information
to a person
and from this point of view I am calm

because apart from management as such
and, let's say, absolute control, ideally
for a person it is also necessary to know exactly
that God will help him in any case

but we need to decide on a position
God always helps in any case
maximum for a person

so here in this case we are talking about that
what should he know
that he will use exactly that help
which once came there from God specifically
maybe at an earlier time

For example there was some information there
a person didn't take it into account, then problems begin
you just need to go back and take it into account

i.e. to work out some mechanism
and also interactions with God
i.e. having returned there mentally ^{yes} or control
in information back
you can get quite that level
what does this God's help ^{mean} , it is being realized
because you finally paid attention

and when you pay attention, you start implementing

now that's when you ^{start} working
in the management structure
where God works
and you
from God's point of view
you can do the same control
that's exactly what happens here
that is the maximum concentration
which hits
precisely into the structure of physical Reality

this is the first time you encounter it, ^{for example} Yes
with your physical body
which ^{means} it works ^{just} the same
both in the external and internal environment

and it turns out that the question arises here
^{as if} the internal state of the physical body

i.e. if, ^{for example}, you don't have such knowledge there
there's like an atlas of morphology
what is unknown, ^{for example}, to count
that the person was born there
lived somewhere in a certain area
where there is no such knowledge
and he decided to think about it and look inside himself
and ^{how I would} try to understand
how it works ^{for example} Yes
what's inside

then it turns out that here
this is precisely the projection of the super-fast processes of the World
to its internal level
he manages to grasp
Well ^{as if} the thought form ^{means} the light going inside
and then he sees precisely the organs

in the first level, by the way, it is in its Eternal state

it is the light of Eternity that comes from outside

like a blue level bluish color

this means that it gets inside the body

and he begins to draw conclusions in principle

based on what he physically observes, yes

Human

in natural phenomena

and this is the configuration of phenomena that results

at this moment

forms an organ in him

and if a person does not have access to the collective Consciousness

it's like more intense

he sees how an organ is being formed, there is some cell there

and here it turns out that this exists

very simple way then

to shape oneself

only by perceiving the external environment system

including by the way the formation of their own events

even a distant object of physical Reality

can help in forming the desired event

and thus connecting in this neutral area

different phenomena that are not even related at all

in one place

Well as if throwing a large number of events there

Well as if a mosaic is being built

you can get

in general, colossally fast control

which allows you in any case

perform management

Now make such control without words

i.e. any words in relation to events

don't matter

you just go into control this way

as if you were adding

With soul

In Spirit

Consciously but without words

I will work with you
and in this management try to keep
the dynamics itself at high speed
i.e. feel the speed and don't reduce it

your events must be realized
in this case if you want quickly
so work, I will work with you

and when you do management here
try to keep the goal at the same time and clearly
but at the same time *as if with* inner knowledge
i.e. the system of Consciousness of your goal
your personality

this is very important
because you are the same as God does
you are creating a goal at this moment

and when you start to see
that you didn't just put it there sometime
and then you do it
and you always end up creating somewhere
you feed it *as if*

then these are precisely some negative forces
which interfere with the fulfillment of creative goals there

you can definitely get them out
from a management level outside the target

i.e. to exclude the concept
for example, I have it in my presidential program
Death Prohibition Law
so death should be prohibited in any case
no matter what is said at all
about this phenomenon

in any configuration of words
death should not exist

so I must naturally each of the managers
who is doing this task
but in general this is a common task
in fact for any person

in the future everyone will have eternal life anyway

so it turns out that this future is already coming
now it's easy for many
Now

that's why it turns out
what if we have a management structure
which must be implemented in any case first
for the sake of saving civilization

then if a person lives forever
It is clear that no technology has
so it can't be shifted
as if the development of civilization as a whole, etc.
i.e. there are many ideological tasks here
some target tasks

and it turns out that when you see these processes
you are of course already at some moral level
you understand and somehow start working more intensively
that nothing should displace this concept
For example there is the concept of "absence of death", i.e.

and when you bring this concept into the Infinite environment
then the docking is any configuration of words
around the concept of "death"
leads to the absence of death

and then we are already sure
that it really is absent
For example there one hundred percent

in the conditions of there Infinite development

because there is some other status here, right?
Here is a person who is developing endlessly
there he blocks, prohibits, etc.
but some time passes
let it be there for billions of years
but is it possible to bring everything out through prohibitions?

naturally, in conditions of complete freedom
words and actions
we need to find a third, different mechanism
which will allow in the conditions of Infinite development
under any conceptual framework
whatever arises, no matter how this concept is spoken about
this concept should not exist

there is no such thing as "death"

and therefore the joining of any word
with this word it means it can't manifest itself in any way
on the fact that the phenomenon occurs

this is basically the main task
all people in civilization
in the conditions of especially technogenicity of this active
which is currently happening in society

and when we mean it starts
set the control parameters in this way
next is this task
it is there that the Eternal development of Eternal life
it is generally the same in terms of management level
what and in order exactly from the point of view of achievement
event-based at some level

because in this case we are talking
that we achieve precisely the state
there is Eternal Life
guaranteeing it to yourself
that it's not some kind of condition
for some, even long periods , yes Means

even if it takes billions of years
but that doesn't mean anything
if a person is further in billions of years
For example Well, he knows that he definitely lives further away
regardless of how the situation develops there

then this is basically the exact state there
namely Eternal life
Eternal she means really Eternal
i.e. there is no cessation there

and then it turns out
that any element of external Reality
any element
it should be aimed at this concept
for the implementation of this system

because then it's clear enough
that a lot of time passes there

but all external Reality is configured
how does it turn out to be derived
into a configuration of some kind of such field
when is this level of external reaction
external field
it means that he is such that you are already in control
the outside world is very dynamic

i.e. it turns out that any signal
which is coming to you means
he'll almost hit the target
at the level of well as if such an action
what you already know for sure
that the signal is initially favorable

because firstly you can influence it
secondly you can just see
that everything is fine with you anyway
i.e. it is control
and from you
and control to you

and this is the level of action
it doesn't even look like space
for example, the word "configuration" here implies
that supposedly there should be space there

in this case there is not even space here
it's like a figuratively chosen word

but in fact it's just a question of
about signal level
which exists at the moment of reaction
i.e. at the moment when you look at it

this is how god does it looks
at this moment the phenomenon is

for a person this phenomenon has existed forever
for God it also exists forever
in this Action

Well, for Him there is no such concept
"one-time" and "endless action"
for Him all is one

and it turns out that this is when we start
this level is to comprehend
this level is like some kind of control field
where we have practically no task
or something of your own status
other people's tasks there
here the third meaning arises

where there is no information at all
this is also someone's task
i.e. this is also some kind of control

and it turns out that if we solve some problem
this is the area that is like
well, it can practically bring out some level
Well, you have to look at it from which side

this is where it becomes clear
why did god create
namely the manifested physical matter
in the form of continents of some dense matter

because it's a fixed system
creation of a development system
directly on Earth for example
and the ability of a person to be in these conditions
this is exactly this area
which one well as if unexpected
i.e. which is not manifested in any way
this area is the least developed here yes
in terms of management

for man God made it so that it is
this is precisely the Perception of the Macro level of the entire space

i.e. we can take it and make a sphere there
there at a distance of three kilometers from the Earth
and that's all

there is a sphere on top, everything is clear what is happening there

and since he did so let's say well as a Personality
He can do everything
so as a Person when He means built
it is the element of surprise
in the form of B infinite status

this is exactly what compensated
the previous primary state , as it were, yes

when the unknown quantity
it means it was shown in dynamics
i.e. there were no rigid systems

and it turns out
this is precisely the Perception of Infinite Magnitude
it's about the same as a dynamic state
here is an unknown quantity

what to expect from Infinite space
This can only be seen if a person is clairvoyant
there is a clear-sighted yes Reality
and so in principle
or develop this system and just know
and then there are no problems

but if a person is still developing this system
then all people practice to a greater extent
so they are considering
for example, the practical side of life mainly

so it turns out that even if he looks
and another person has a thought
that he doesn't know how to do this, for example
and one there knows that everything is fine ahead

but if even one doesn't know
anyway, a third meaning arises

this is why everyone should know
knowledge of Eternal development of Eternal life
because all people can live forever
and know everything how to do it
if at least one doesn't know
there is still no stable system
basically none at all

we are under well basically almost then
at the initial level

because that's enough
that at least one person doesn't know
and that's it, and the task already arises
which in principle well, the same one

means to teach this person in fact
means to independently study the system of Eternal Development
Well, with the help of other people there
and so that he was in the same state

Oh my God for example He is Eternal
if so the mechanism yes consider the Eternity of God
He is also because He is simply one Person there.
and it is easier for Him in this regard
originally created the world
He doesn't depend on anyone.
and He is calmly in the state of yes Eternity
He is Eternal and that's it

for people it is a social level

and that means that here they do matter
all people
that's why here is the state of Eternity
this is when all people are Eternal

so here is the transfer of knowledge
through structure
some absolute and there unknown space
this is still a special level of control

for example, not every person is there
for example, he wants to study there for 10 years in a row , so to speak
some system for the sake of achieving Eternal development
maybe he wants it now
to get something specifically and not to study something

For example Well, any person's point of view is quite understandable
and he may refuse to study anything at all
then he has the right, well as if to do whatever he wants
from God's point of view
which created complete freedom of action

and in these conditions
we need one more of this one or many of them
be able to direct to the natural path
when their choice will be
not because we are somehow intensively directing them there
in this direction

or we just take too long to explain

and they do for example yes
next
who study exactly the technologies of Eternal development

but simply because this is his state
he will come to this state
well, how is some process developing in the World
which will be like this anyway

and that's when we start to consider
already this aspect of Reality
where exactly well as if this is the effect on a person
when, well, such an extended environment , so to speak
when he will be Eternal anyway
i.e. he kind of starts to move into this state, to put it simply
on information

and when we start this state
see
then here again the fundamental meaning
in general, that factor is used
to be considered here in general
again such a level
when not a word there
no action
no other state
it doesn't matter

because the transition itself is here
this is neutral level again
well, i.e. a change in the quality of management, yes
some intermediate systems

and when there are a lot of them
Well, maybe a person can follow
one action of the optical beam there
directed somewhere into Infinity
or to a specific star or to another person

but at the same time it is one action
and at this moment things happen
there are billions of additional actions
which are generally perceived as billions
but there are also actions happening
some super tall super big

where does it actually happen

Well, in general, the process is like this

that we always understand
what exists

Well, there are an infinite number of other phenomena

and that's when we start to see
this side here
and we want to control this system
we must simply manage we must know
what's going on in that Infinite form

then this is just a projection onto the current Reality
in a systemic form

for example, there is the space of the field, the road territory, etc.

this is a level that is just blocking or something
namely Infinite number of actions

i.e. physical Reality is a level
actually regulating the Infinite Environment
it turns out in this case

and in this regulatory mechanism
it does exist
a certain, very specific connection

and if you consider it
materially manifested substance
on a physical level
and outer space
then from the point of view of physics
It's very easy to find by the way
how the specific position of the substance
even a specific molecule
connected with all external space
i.e. where is this regulatory mechanism?

and by the way, you can influence the outer space
for example, by working with the soil
it is possible to clean the ecological environment there, in the air, etc.

and for this you just need to consider yes
these are the very rigid levers of light
i.e. exactly that principle of the World
that any material system
this is the management level
Well in general, also a certain form of matter

but which is perceived by Consciousness
like Infinite Environment for example there is a vacuum there

i.e. a simple question yes
how to control vacuum
for example, we need some amount of vacuum there
well let's say there are two grams of vacuum
it's not very clear
vacuum has no weight

i.e. how can I express it quantitatively ? For example
Well, we think that there is a certain volume
we take and therefore approximately some form
there's like a flask there
and we say that yes, for example, there is a vacuum here
we sucked out the air and there is a vacuum there

means material structure
defines the following concept
as if well, the system that corresponds
as if there is a level where the substance is considered to be absent
or it is minimized

so that's how to control from matter
with all the vacuum
For example, we don't like that there is so much vacuum there
suddenly it will leak out somewhere there
in large quantities not needed

and so it turns out that we have a task
Macroenvironment Management

by the way, in the case of ozone holes when they increase
the vacuum environment is really starting to tighten up
into the structure of the Earth's atmosphere

and if there are a lot of them there
complex processes are growing there
managing a very large environment
there which is called vacuum
in fact, this is a fundamental task
for a person

and if we consider it from the point of view of the cell, yes
human

human life
then the cell is constantly working
in essence, let's say that she lives in the body
she is constantly in control
a large amount of substance

because if we look at
cell as a single structure
or even the nucleus means in the molecule
that which is there in the human substance
then it turns out that there is still control

We are basically familiar with this mechanism
let's just listen
to the cage
and understand how a cell takes care of itself
about each element of the body

and such an element arises
like a very large array
light is concentrated on one cell
and he creates the same cell
this array is essentially

Well, it's all really connected
and therefore the cell functions
in the general system

and in optics it is very clearly visible
high concentration means it creates a cell
so it turns out that matter can also be created from a vacuum

i.e. a large concentration of vacuum for some reason
and by the way, this is formally written down
quite simple
that's exactly where in mathematics we suppose
as a system of simply harmonically revealed functions
which have certain properties of Infinity there

and it turns out that if, for example, we have
the structure of development is precisely manifested
in the form of , well , such a level of knowledge
what of well kind of vague yes
or a clearly defined environment
we can get some specific action

then from this action
we can get the same environment

well , for management
what to get the goal
what to get what organized the goal
having traced the mechanism of interaction
it's the same thing

here the light shines at the same point yes
as some sources of light
you can put diffraction gratings there
and watch
here comes the light

we received some substance
Well, let's look at it the other way around then
just calmly, on the contrary, let's look the other way
and then we can see
what is the outer space made of this substance means

and then here we come
right to the main point of this question
and what is behind the outer space
what's behind it

so we studied and some so-called emptiness
further we see the substance
Well , by the way, I'm not really saying this is a physical model
I'm just so enough

Well I guess I'm just trying to explain figuratively
what can be built on logic
any model control system
just even logically reasoning

and when we look further
for this system
this is where things get really interesting, generally speaking
aspect in the Universe
that society is already beginning here

because while we are watching
inside, as it were, its own monosystem
We understand everything

a space that seems to contain no information
gives birth to a space that contains

the other way around is also understandable

and if further, then it's already starting
other people's opinions
and here again only the person's opinion matters

God is clear
but in this case, that's exactly the difference
a person yes
there is just another person's World

which does basically the same thing

and that's when we start
already from these positions to see
how is the world built then, there is this vacuum there
from the point of view of the collective Consciousness of man

then generally speaking in this system
can be cured almost instantly
are they quite complex or are they considered there?
which are incurable diseases

the main thing is that the person himself is oriented
it means that it happens quickly
because in the speed of treatment or action
it's always the person's opinion that matters

because he has the same equal positions
he reacts the same way himself
looks at the same vacuum systems there
or some missing information level
where there is no information or no space
some kind of null space for example Yes
translates some systems

every person has
generally speaking, the same instrument of action

there is only one God
and it turns out that He is God who actually gives that control
which comes only from Him
any action
it has only one rigid matrix

i.e. any action in management
it actually has, as it were, by and large
some single rigid schematic level
and any person in principle acts in the same way
at that level

it turns out that learning to act
if one can
generally speaking it's elementary
it's like mastering just one machine
and of course anyone can master it
just time or desire at least yes

so it turns out for this too
what if we have

this is the angle of interaction with a person
then we see
that interaction with a person
this is how we start interacting with God
God the Creator of Man
It turns out well so it's easier more often, yes
makes contact in terms of management
there help shows

and the man already
how so in general, the investigative level of God's control
it means to gain knowledge
should be at a natural level of development
is this system unique or something?
or does it mean the uniqueness of this space yes
unique management

he should sort of understand
what besides the fact that this is the only space
For example there is Eternal Life
in any case, this is the only possible solution
in the conditions of the civilization of Infinite development

and he still has to do it on his own

i.e. he must make his own choice
otherwise he is not free then

and that's when it means knowing all this there
that's where he is where he should do it then

your choice
here is at what point in space , generally speaking
the most as if Well, is it a loyal or simple option?
if he does it where the information is kind of absent

i.e. he does it initially in that area
in which there are no opinions
there is no information at all, nothing

and that's when he really makes a decision
on one's own
i.e. he already sees his own investigative system

so he made a decision
i.e. the solution is starting to mature
well, like in a vacuum there is light and matter
and that's all
and he comes to some control point
already with a solution

and so if we are here by decision back
then we start analyzing already
at the personal level
how did this decision even come about?

Let 's watch then
some connections of his with other people
there is contact with God
tasks of civilization
then we can of course see
why did he decide so

but if a person decides all the time
just because there are some connections
then it turns out that he has a difference from God
God does what he wants

but at this very level
a person should have
Well, let's say the minimum number of differences

he must decide often regardless
what is the situation around
then at the information level

here's an example there is a nuclear power plant that needs to be saved, yes
many decisions many opinions

but there is one true one
which is often not related at all
with nothing and no one at all

it turns out that he must actually create information
Well as if almost anew
or he should not even create it often
and to perceive it as if the solution certainly exists
it is precisely in its remote action
and it is so positive and clear
and he will definitely do it and decide

but this is already a direct vision in fact as if to myself
and this is where we need to develop
direct vision system
i.e. a heart directed towards the future
the thinking heart and the acting heart

i.e. internal system internal organ
which works on a personal level

as soon as you start
to identify the personal aspect of the organ
, this is actually a somewhat specific action
because personality is
it's all on a single level, like a system or a cell

but when you start to see
as if a personal plan of the heart
you see the heart on an independent level
well as such yes my own heart

by the way, can you clearly show the shape of the organ ?
as control diagnostic systems
very useful technology

means to reveal the personal aspect
as if of internal development
where for example there so that if necessary have
Well for example there is a primordial heart
how is man created by God
had yes initially

so you can do it from a personal point of view
or those properties

that match a person's personality

but in general, from the point of view of Perception

how is there an intelligent system there

Well so to speak, systems of personality action

in terms of freedom of action there

i.e. try to relate management so

how do you interact for example

with another person or yourself

and that's when you start from the inside yes as if systems

there for example from the heart

move on to the same knowledge

to any other system

well, not in the sense of just some kind of personality

Well there is an external environment for example yes some

and it turns out that we naturally can't

there the external environment can be called a person yes

it means something

but we can enter into a uniform level of reaction

i.e. we can enter into that well as if a state

Well, let's call it a deep state of control , I guess

in terms of awareness

there is self-involvement in action

i.e. you have to really concentrate to understand

what is the man doing there as a worker

effort of will

then here is your personality phase

goes into space

outer space begins to possess

personality traits

as if in the near field of control

and then that's exactly the division between

your personality

there is no external space as it were

i.e. the external space begins to acquire

your personality traits

this is in conditions if there is some there

natural, even level

just a normal natural environment there

where in your field of vision
there is no physical level of a person
as soon as a person grew up
This is naturally a different system
this is the level of equality
under conditions of already collective management

and here is the social status
joint action
there is a level of integration of this action
where there is a natural environment

for example, why is there in this regard
Again, here's such a simple question
if it is in this context in this lecture
today means to consider
what does it ^{mean} to integrate people in general
in terms of natural systems

why is the World built this way?
then here it turns out
what exactly is this external system
this is the integration of the freedom of expression of people

here people can watch
on the same landscape
Well, a few people
and the other one may not watch

freedom of choice
freedom of choice must be
somehow manifested, including by physical action

these seemingly insignificant ^{factors}
in fact, this is also there
a rather special Action of God

God created it this way
so that a person always understands
that he is free ^{for example there} in the look
he has the right to think whatever he wants ^{there, etc.}

and if we look at these processes
as a ^{general} realization of human freedom

i.e. external space

This is a principle that objectively
really captures it clearly

the next human right
what can he watch
either one way or the other

and based on this then the person is confident
Yes, he is free.
at least he can look wherever he wants

so it turns out that based on this
well, some accumulated experience
it means he can already receive comparable control

i.e. some system of the next action
which is based
again on the spatial control system

and so if we go through such a level yes
freedom of human action
let's move on to the analysis of the social system
in some place
then we can definitely understand
what is happening in the region in general
there at least in the depths of any ocean

if we are considering precisely the principle
natural free means human activity
either an individual or all people there

and that's when we walk through the elements freely
we see how God himself does it

i.e. the truth must be considered here
it is precisely the creative aspect
here you need to be able to separate creation
from what a person can do
non-creative, reductive, for example
in terms of negative level yes

and when do we start separating
then this is exactly this space
which well like an empty space where there is no information environment

here it turns out that we have a level of that
that sometimes this environment even needs to be created
to track where this real one is
from God's point of view too

Well as if approved means Yes so let's say human freedom

and that's when we True freedom of action
we see
not in terms of just moving around of course
and True real freedom
his actions
Thinking
Spirit

it turns out that we already see that component
that man is Eternally Living
for example, there is a species , so to speak, biological
so he starts, well, some kind of something like that
the next area of so to speak habitat
to conquer in that sense
what is external space for him
is not a limitation
for Eternal development

i.e. we just take and compare there
different types of live levels
well those who are perceived as alive there are animals plants

and we believe that man as a species level
which interacts with external nature
I just mastered everything using the same technologies
what, for example, happens there simply in nature

then we can pass on
mechanism there for animals there for plants etc.

i.e. in fact, if we adapt
and we take the form that is well as if it exists in nature
we pass on knowledge to them yes
but not by way of transformation there naturally
some material systems

a man is a man
his body does not change
but precisely due to Thinking

i.e. to pass from one person to another

only possible through the form "person"
but a person can transmit
due to the structure of Thinking

and here it is already a fundamental point
is how he should think about it
at the level of interaction of his Thinking
that's when he looks
there is complete freedom to the external Reality
or performs some action

then here it turns out
that this is exactly the key moment
that his thought must contain
elements of Eternal development
other objects of Reality there
living systems that are perceived as living, yes
or as they are called in the orthodox level
to a greater extent animals, plants, etc.
well, including any molecular systems

gave his own life
with your own Thinking
the Eternal Man so to speak
begins to embrace all the phenomena of Reality
then it turns out that here it is just
this is this universal coverage
this is complete control over Reality

i.e. you just end up in that control system
where in general you have practically
Well, that's exactly the full control that you need

and if for example here we make the control like this
what to do well for example management
coming from you for example yes to Infinity
then in the conditions of a seemingly Infinite action
you see that it is the final element

is your control

i.e. it turns out that if we
precisely the final element
we have as a narrowing of the control space
then you see
that this is exactly the very same Infinite action
is revealed as an element of well as if the endings of the sound form there

end of action

i.e. the more you go into Infinity
for you to visualize the effect
well, some kind of final action

and it turns out that when you see
this one is well comparative yes what is the management level ?

that we have some expanded management tasks there
we see around us, let's assume, some finite systems
then it turns out quite well

i.e. we can have some levels, well there vary yes
we can do so that if we assume we will say so
we translate some Infinite system into a finite one
here on my own
then we can see how it can be created
there is some kind of sound form

you can there well with this sound form
use the level there sound timbre
and you can use, for example , from a non-verbal form
level of space reaction

and it turns out that the main thing here is to have all the time
how to keep it under control yes

i.e. if you start this task as if
well, not differentiate at some point
it turns out that this is where they arise
well, some phenomena at the final level of management

i.e. how does God, for example, look into Infinity
and gets practically so to speak
well, if there is not necessarily some final value there
or there is Infinite
He gets a specific action.

i.e. if you, for example, move the control further away
then it may be that the light

which comes from Infinity
to you well on the man Eternal yes
at the level there view at the level

and in this case it's simple

it's like a biological term actually
personality is not included in the concept of "species" there
or some kind of "subspecies"
even at a living level in the general classification , yes
i.e. a person is always independent of any concept

and it turns out that when you start to narrow the concept
your element of concept realization is narrowing
from the point of view of the word

i.e. how to make the word ineffective
enter the form for example
into the generally known biological system

and it turns out that the word begins to narrow
and the effect of the word is diminished
i.e. literally mechanically

For example, you can change the timbre there

here's how you can influence the timbre if
or there in the light

you can do it like this
so that the light form changes shape
and you received practically
instead of some action directly there with a word
were affected by light

and here's a practice, take a look
how can one influence
due to the fact that you are looking at the Infinite Event
influence your own form independently
Well for example, there is a sound and light form of action, etc.

i.e., as if working at a very large distance from yourself
and get for example the level of variation
there let's assume in words
you can vary your own speech
change timbres
change the structure well there in the pronunciation
you can influence there
Well, let's assume there is some work with the vocal cords, etc.
work with the Infinite Light

and try to look
that again here is the level

when the word has no meaning
i.e. introduce internal control

whatever the word, however it is pronounced
whatever happens
conduct internal management
and perform the action due to the level of Spirit there
I will work with you

the management task is still like this
which is independent again from the factor of Reality there
current even Reality
the person still has to be there
in the stable phase of the Eternal Management again

for example, pay attention to this
if we talk about man as a biological species
we are narrowing the scope of control
to some concepts of a collective level

but personality
it is not defined it does not fit with the word
personality is always independent

for example, there is the word God
but God is a Person
and no matter what is said there
God is God yes

i.e. here the same thing applies to a person
no matter how a person is defined
no matter what is going on around him
matter how it stands out in terms of the external environment
anyway, each personality is completely independent
it is basically unavailable
from the point of view of external influence it is real

and that's when you start
your own personality status
bring to the level of such a concept
then it still exists here
personal, as it were, context or some kind of conviction
that you really should be safe
you don't have anyone there in an unnecessary way
somehow unfold it
not in that eventful direction, so to speak, your events

and it turns out that based on this
you have a fairly simple layer of so to speak action
where exactly is personal conviction
i.e. vision of one's own personality
at Infinite Distance
there in Infinite Information
where there is God's Action
and you definitely do it in sync
accurate and correct

this is also the level of that conviction
when in some difficult events of your life
you understand clearly
that you can overcome the situation there
and even for some macro-problems

and that's when you see for example
that the management structure is such
that you have finally reached such a state
which means it doesn't depend
for example, after all, there are actions from words
or even from plans

and you are there
in the system of Eternal development at least so
what's your heart like? it means it shines with that beam
what is the ray of Eternity
i.e. you connect with the Eternal information
exactly the one that is here
Well, it was created , for example , by you, among others, yes
and which exists
there is already a backlash
this is an objectively existing Eternity
objectively existing information

then in principle we can say this
that you are really in a stable position
and the one that you don't necessarily need
there are some long-term forecasts to look at
it's just that this is the level of a stable position
what is it really

no matter what happens around you
anyway you will be healthy you will live forever

and when do you start

this is the status well how should I understand
i.e. even practically encounter this, for example
pay attention here
which of course is not in terms of some kind of negative influence
you should always do the management like this
to avoid any negative influence
it didn't happen to you after all

but nevertheless if you start
how to deal with the situation
when this control is external, so to speak
it is not being implemented and you understand it

then you see that yes you really are
on a specific axis of Eternity
that other people are also Eternal
and they have the same axes, as if informative
well, light ones

it's just that some people don't know about it
does anyone know?
and for example, if in order to teach then
Well, let's say this knowledge
here the question arises
Well as if of this type or this nature
what we often show in fact
Well, in technologies there is Eternal development

in fact we show
in general, often well, practically what is already known

and when you see this value
as a known quantity
then it turns out that logically it is necessary to teach another
Well, what is known is quite simple

i.e. to enter this state once and feel it
and the problem with technology is what I just talked about
there I often talk about specific conditions
which is very important
it is enough to go through this state once
remember
and then you can talk about this condition
or mentally there by mental action
or you can tell for example there verbally

and this very conviction

it's not in the sense of some kind of fanatical conviction
namely, simply personal conviction

you can think a lot
there is a lot you can do to specially tune yourself in there
but this is the conviction of action

this is how it should be said

i.e. you are simultaneously ready for action
and at the same time you understand
that such a state exists

and then, in principle,
this is the task of transmitting knowledge according to my Teaching
just for each individual person
this is already implemented in the future
a task for every person

everyone lives forever
and then they arise
the following control structures
which characterize that
what do you practically get
on yourself
in the form of the following knowledge

that's when you're already looking
for this structure and for this system
what's next what's the next knowledge
then here you already have precise development going on
towards Eternity

i.e. personal conviction transfer of knowledge
and the conviction is not in terms of just information
namely actions conviction actions
and obtaining the following knowledge

and what about when a man is Eternal
what then should he receive in the form of knowledge

Now that's really it
what other business does he have ?

Now this is a stable control structure
which really speaks about that
that you are in the technologies of Eternity

well, in a stable, so to speak, control phase

and when you work with this situation
quite a lot
practice teach for example there are a lot of people there
then basically here you will see
that's actually the essence of the management itself, yes
event management

there any specific event
in this system
it is there through spatial control
where there is no announced preliminary information
this is your personal experience

i.e. you, due to your experience, due to your practice
you saturate this space

and here you already act
as the Creator acts
space of an indefinite system
is filled by your action
then your field is yes
your policy is like external control
he is becoming more and more saturated

and then you are really really stable
now it's already literally visible
that negative events do not really apply to you

i.e. you are like this policy
fill in with your personal action
just as the Creator acts

then you are confident in the Infinity of your development

and the Eternal development of others by the way
for you then too confidence
because then you know
that it is only necessary to transfer knowledge there
if a person perceives
then it really is Eternally evolving

it's just technology
there is nothing unusual there
there's nothing complicated there

you just have to work it out
a certain management structure
and implement it

This is where I end today's seminar.

Thank you very much for your attention
