

GRIGORY GRABOVOY
The Doctrine of the Resurrection
Speeding up the meeting with the resurrected
08.07.2005

The topic of today's seminar
This is my Teaching about the Resurrection
Speeding up the meeting with the resurrected

in this topic I would like
so that everyone's practical experience
who is involved in resurrection
was moved
on the task of practically transmitting information
that such a phenomenon exists in management
precisely as an acceleration of the meeting with the resurrected

and so that the subject matter is actually yes the resurrection itself
was withdrawn
into the structure so to speak Well self-evident so to speak

because it is desirable that
information about resurrection
about resurrection technologies
it would be like ordinary information of society

still practically Well the same about resurrection
and the resurrection of Jesus Christ
it's already been almost 2000 years
and we should somehow get used to this by now
and try to simply implement it technologically
tasks

i.e. you have to try hard in management
to speed up the meeting with the resurrected
It is necessary to realize that level more
that the fact itself has already been implemented

and then we can do this well some discrete break
in the system of collective Consciousness
where is knowledge
For example, there is the resurrection of Jesus
it was when Jesus stood up
It is precisely in transcription that it can be polyphonic even yes
a lot of objectification

where is the total number of words and sounds

meant the name of Jesus Christ
and his resurrection yes and resurrection

i.e. we have all the information that indicates that
what for example there was practical experience yes resurrection of Lazarus, etc.
and resurrection

and it turns out that we must, first of all,
this is precisely the gap in the collective Consciousness
try hard
Well at least the task is the most minimal
this can still be ruled out
exclude

if you do minimization
then only for a short time

because here is the main task in general
is that in connection with that
that all processes are connected in this World
and due to the fact that a certain number of people
For example this well don't do it, let's say Yes

then this is what is happening here
it is precisely the main, as it were, discrepancy with that
that the implemented process
starts to either slow down there or move away

that's why today's seminar
will be more dedicated to that
that we will have to do it anyway
it is precisely to engage in accelerating this process

because there is a lot of factual material
which talk about that
that communication with the resurrected occurs
even there are some physical contacts there by the hand, etc.

and it turns out that the main thing here is to somehow overcome it
this one well quite small already
a gap in collective consciousness
when a person is saved
in the usual well let's say the wheel of time, if you can call it that
among those who did not die there, among those living, to put it simply

where the resurrected ones already enter

so basically here it is

the main control is

It is precisely in the aspect of acceleration that it turns out yes

i.e., in fact, we are moving control forward

we say yes resurrection process

it's a matter of course

which speaks about that

that we simply know the Laws of the World's Development

and we say that the fundamental Law of the World

everything will be restored anyway

from God's point of view

everything is Eternity

and therefore it turns out that he was resurrected

it's somewhere already anyway

and the question of resurrection is still the acceleration of the meeting with him

i.e. one of the first methodological positions

today's seminar

this is the ability to speed up well as if the passage of time

and considering that, for example, in the general resurrection

more people believe

and already at the level of collective Consciousness

created quite good

Well like some kind of bridge yes some platform

where there are very stable concepts of ordinary everyday life

i.e. the faith of people, for example the history of Christianity

history of other fundamental religions

speaks about that

that the platform is quite stable

and it goes without saying

for a fairly large number of people

what exactly is the general resurrection

that's basically it Well in general, it's even a somewhat mundane question

at least there are shades of everyday nature in this

because there is no detail

like a person in a normal way or something situations

reflects more

when some household processes
away without thinking
as a rule, there are details there or something

why do some phenomena occur
Well everything goes without saying

as well as in the transfer to the general resurrection
this element is present

that yes there is a general resurrection
but actually speaking this is
as a more ideological platform

and so our task is to be able to
this factor in the collective Consciousness
because we act only with the consent of the people

so it turns out that we should be able to
this impulsive one or something
factology in the collective Consciousness
balance in a certain way
and the light of a stable form of the future process yes
for example, the general resurrection
move here

i.e. in optics it is generally In fact
on a logical level it's not very difficult
because take for example there thought form
or is there development
from the point of view of the technologies of Eternal development of one
person
and just look at everything
as the light of this concept of "Eternity of life"
comes here

and from here it turns out that we are in order to speed up
we have enough well objectified or something picture
in general, everything here seems to be quite simple

we pass through this optical impulse
and our task is simply to compress time , yes
i.e. bring the time closer and say
what yes that future platform is here now for example

if there is a general resurrection
Well, we're just there, for example. we want

so that there would first be a resurrection of a number of people there, for
example Yes
which we deal with

and then universal technologies will be hindered
only from a management point of view so to speak
in social processes
how can I even accept this ? where to distribute people, etc.

i.e., strictly speaking, in a purely mechanism there is more power , so to speak Yes
authority management
socio-political or something management, etc.

and that's why it turns out from a logical point of view

when we sort of balanced the management environment
i.e. we believe that this issue is simply technical
by the way, this is mostly true

so we begin this fine line
overcome little by little

because there is still something here
as if some kind of moral code even for management
because the phenomena and concepts are often unfamiliar
and here are the moral principles of interaction
from the point of view of a kind of global morality there is Infinite development
what is the morality of Infinite development anyway
in society
at a deep level, well, of the human soul

after all, when a person sees Infinite development
reverse impulse
which already extends to his Soul
he speaks about, in general, speaking about a new ideology, as it were Yes

for example, the moral and ethical principle of Eternal Development
what should a person do in this case, for example

It seems to be the same, yes kind of logical but
but generally speaking it is a different management environment
it's even a different information environment
and the tissue environment is different in humans

therefore it is necessary to take into account
this is the exchange of information

as soon as a person meets the first resurrected
a principle arises

or he accepts it completely, for example
and is part of another control system
i.e. at least of such a plan that it is analytical
starts working
with this concept in management

or he starts to search for example
some logical motives indicating that
what well maybe it's a one-off there yes option
maybe this may not affect
there are, as it were, fundamental systems of the World, etc.

so if we look at the process
what will not touch
in fact, it will affect everyone anyway
i.e. it is necessary to very clearly exclude the principle of that

that this is still a one-time thing, yes an option for someone
even if there are many cases of resurrection

This is naturally not a one-time process
everything in the world is arranged this way
we have to try somehow
I retell it? in management at the level of the Soul
that everything in this world if it happened at least once
but it is constructive
then this usually has an Eternal development

especially if the process generally corresponds to Eternity yes
resurrection is still one of the technologies of Eternity

and it turns out that when we
we are starting to transfer control already
like in everyday life or something let's say so Yes in the technologies of Eternal
development
this is where we get into the system well let's call it that
ordinary or something level of Consciousness
when we have basically the same state
which is no different from the primary one
before receiving this information

and we further convey that this issue is also systemic
and each element of the everyday, as it were, level of management
Generally speaking, this is how it should be

into the system of natural human development
i.e. the normal state of a person

it is laid down in the first place
technology of Eternal development after all

and it turns out that when we are ^{like}
^{Well} somewhat strong-willed ^{yes} by effort
we transfer control back to that
that nothing in this world has changed
from the fact that a person met with a resurrected one

we are starting ^{to actually} come
to a certain norm ^{well} so calm
there is purposeful management for the general case
precisely the case of the general resurrection

and then the factors are already there
even if there are millions of some individual resurrections there, etc.
they look like system level
i.e. the primary system level

and then we shift this control
on the structure of the next level already ^{yes}
that in ideology there is a universal resurrection
and we are already giving a signal from ourselves

as soon as we leave
to control from yourself
although of course we always manage on our own
but in this case it's reflected light
it is the same as our ideology

i.e. external information has the same characteristics
^{in general,} Eternal development
what are we
as an ideology we invest in management

then it turns out that we have
at Infinite Distance
from the control level or from the control point
^{actually} Well, basically the same information

i.e. how
such ^{as} spread
information into Infinity and into Eternity
we must from any point of control
get what we want now here ^{yes}

then it turns out we are distributing control
for an Eternal number of years

for example , there is how God makes management in Eternity
for Him Eternity is also information

from God's point of view
the primary impulse is equal there to the Infinite

then it turns out to get Infinity
He just needs to increase the number of events.
and change my point of view or something
from the point of view of what he perceives
separately there is Eternity
separately point there single point

and then it turns out that for God
the concept of "Eternity"
and the final element
it's the same control
i.e., it is generally speaking outside of these systems
and beyond Eternity
and outside there for example the finite element
and when we assume we start
make control on Infinity
then here they begin to be realized
in general, they are quite familiar in essence to humans
technological principles

these are exactly meetings
accelerated meeting with the resurrected man
where the acceleration element
For example there primary acceleration element
this is a meeting with information
which one well in general it is understandable to a person yes

i.e. with whom is it easiest for a person to come to an agreement ?
in management
who does a person know the most
First of all, he can think of himself as a person
know most of all

i.e. the first element of acceleration is obtained
this is information infection
exactly the same as the one that suits the person

i.e. the ability to determine at the meeting point
those coordinates that correspond to you personally

but for this you can just look around
and consider that this is the situation now
but it is impossible to transfer this mechanically and naturally
situations are different everywhere

then you need to highlight
some kind of universal module there yes
some kind of matrix-universal environment
which remains constant in any situation
and at the same time you recognize and recognize it
at the meeting point

Well naturally at the first level
this is the Soul of man
which is still there here yes For example
and may be located somewhere in Infinite Time
in the control action already

i.e. the task is solved
separate the impulse of the natural state of the Soul
from management level

i.e. where there is a Soul
and where is the control from the Soul?

here from God's point of view
God has a clearly defined level yes
there is a Soul but it is Infinite
but there is still control

i.e. for God the management and the Soul
realized at the point of origin
The spirit of man

this is where God is from the point of view
it is this resurrection technology
where we already talk about meeting with the resurrected

because for God
He is actually a human being
in the possibility of God He is a living man
that's why He mainly

management is done, it turns out to be a meeting

here from the point of view of the fundamental level of management
what to create an event what to create a meeting
for God it is basically the same process

so if a person
approaches the situation observantly
then he can learn a lot from that
what he has in his personal practice of event management

i.e. he walks somewhere, looks at the streets, he does something
and here is an analysis of the internal contents
and the content so to speak external event
provides a meeting point in each case

i.e. a person meets God somewhere
here at the level of Infinite quantities
he always meets God somewhere
at any given time, by and large

and maybe not specifically there
with the Physical Body yes For example there is God
and with His Action there

but God has Action
and so let's say the beginning of the action
or there is the Action of the Soul of God
and the Soul of God
in human manifestation this is often an inseparable process
if a person has for example ask there
how he views
The Soul of God
and the Action of the Soul of God

then a person can apparently recognize
only at a certain speed level
where exactly is the docking
this is where Action and Soul come together

and this can be recognized in the Spirit of man
i.e. the Spirit is born for man
let's say in Infinite embodiment and development
in this process

it turns out the Spiritual status of a person
defines the actual meeting point yes

i.e. the higher we develop the Spiritual status there
not by some long way there, let's say
or studying some long-term technologies
namely, as if by technological means

i.e. we highlight the structure of Spiritual vision
we direct and focus on the point of interaction
Souls of God
and Actions of the Soul of God

and we recognize it through the physical body
those. coordinate system
i.e. the pendulum is your physical body, for example your personal one
well, basically, or a resurrected person
or any other person whose future is Infinite

keep in mind that there is a very clear coordinate level here
there are not many systems here
either you
or resurrected
or a person where his Infinite future is visible

and to see the Infinite Future of Man
you still need to be able to look at it correctly, right?
on this person
i.e. from which side to look at it geometrically

so as a rule means human point of view
if a person looks at the face there yes
then it is more about managing that process
what is being considered is the Infinite Future

if you look at the person's hand there
there is the right one
it's more of an aspect of managing the past
i.e. the coordinate system of the past, etc.

i.e. this can be recognized through simple practice
how to watch

for example, we highlighted it this way
actual meeting point

because as soon as as soon as yes
Soul of God
begins to recognize His own Action

then the primary Action is man
at God's

in the Image and Likeness
God naturally recognizes first of all
Your Image ^{yes} and His Likeness

it turns out that there is a person here, and any person, ^{yes}
Well and including the fact that he was resurrected

if we start to develop this point
i.e. we try to simply objectify the process
actually need in the grand scheme of things
here ^{in general} to consider
the process of interaction between God and man

and see how a person would meet
with your own information
i.e. how would he see himself in general
or how do people meet in life

there are many processes going on here
how do people meet by chance in general
how they meet systematically
Well can you call ^{yes}

such a simple question
resurrected why is he there ^{For example} there won't be a call ^{for example}

Well as I said in the system
although there are calls from the resurrected, etc.
that means there are quite a lot of cases of systemic

I say that ^{kind of} logical status
if resurrected ^{then} can call
and the resurrected one retains them

all aspects of the common man
he remembers everything
what's going on here ^{yes}

here at the level of logic a process arises
what can stop ^{it at all}
for a living person this is often not clear

is this connected with
Well it turns out to be more of a behavioral situation, ^{yes}
another person the same

he doesn't call and that's it

yes there are social processes
there are some other norms there
but here's how to justify the fact that he doesn't call for a long time
something third arises

there's something hidden here, yes it turns out
there is something hidden here that does not allow
perform a deliberately simple action

here we go, well I say except in those cases
when the resurrected one calls or meets there

For example man made management
carried out the resurrection
but the meeting is starting to drag on

and from God's point of view
in general, everyone is alive in certain intervals
or there according to human logic in the Infinite future
where everyone is resurrected yes or in the past

i.e. for God there is no gap at all
i.e. He only carries out
that organizing meetings works out
God himself

why is there no concept for God there
there is no "fatal destruction" there for example, some system

anyway, everything is restored for Him in due time
and the only task is to organize the meeting

i.e. a normal meeting of a person
some ordinary processes in this World
it's not a very simple thing, yes
why are they needed at all from this point of view

it is clear that they are, as it were, logically, it is clear why
somehow the processes of life go
but from this point of view

it turns out this organization
some other substance
it is the organization of some substance actually yes

if we start to analyze

what is the meeting system as such

the postulate is simple and logically simple ^{yes}
again returning to this position
we take as a starting point

man lives for God
he is still alive in Infinity
he will be or those who have already left there will be resurrected
Anyway

the living have the opportunity not to die
it turns out what we have all the time
that's exactly the concept of some kind of "interaction" ^{yes}

i.e. then we need to consider the internal nature , so to speak
or there is the structure of God in management

Oh my ^{God} the primary and only Creator
what interested him most of all in general
in this world

i.e. it turns out that he should be interested in
^{Well} some internal interaction
he must somehow differentiate
each individual element ^{yes} in this world

he already knows everything, i.e. everything is clear to him
the only question is how this interaction occurs
in general, so that God has ^{well} excite ^{as if} to create interest
He must keep track of every element.

because He is the creator of everything
then it turns out that he is interested in interactions
^{Well} so in a simplified form ^{or something} ^{yes} to the scheme

it turns out that this is precisely the interaction
from God's point of view
why does god determine such interaction

with complete free will
we are starting to find this fine line
between the future there is a general process ^{yes} Eternal life
where no one dies at all
and everyone is already resurrected, ^{for example}

This area needs to be taken under management

then we should also consider the process

Well as if for human understanding

this person should consider

as if a process of self-knowledge

For God, what does he need to know?

He is still the creator of everything information level

it turns out to be the main process for Him

is the perception of knowledge in another person

this is how another person perceives and is saturated with knowledge

and by the way, it is precisely Eternal development

then he begins to see something like history

or create history free history yes

of its own primary development

here is the whole meeting system

this is where God begins to know

Well as if from a human point of view

but in essence it gives complete will and freedom

to consider how it means Well, what do you mean? So

probabilistic possibility

what God can even consider from His point of view

i.e. how can one know oneself

from the point of view of my creation there yes

and it turns out that these systems of meetings, etc.

This is generally speaking the path of Divine development

it turns out in essence

i.e. as God originally

here He took and created the first elements of the World and looks

that they begin to develop

so this is the path of Divine development

i.e. every meeting

carries a certain path of Divine development

and the idea is laid down precisely of the path that God shows

i.e., in fact, the path that God seems to take

Well maybe at the level of Perception yes Your own

and for Him
what Perception
what is life
it's the same thing
what are real events

and here is the connection of Perception with a real event
gives just a clear, absolutely clear gradation
here is the Soul of God working here
there is His element of Perception here
those. Action of the Soul

it means God is watching the event
i.e. considering its history of development
from the point of view of the absolute level of all freedoms, yes
in the coordinate system

i.e. everyone is free
and they do it for example they do whatever they want there
Well in the context of social norms and systems

and it turns out that this is a clear distinction
this is the primary platform
which is absolutely stable by the way
and it characterizes the place
where the meeting must take place necessarily and systematically

because in the general resurrection
information or as a meeting platform
it is no different from the current information

that's if there is a case when there are one-time resurrections
or even systematically one-time or group ones
even if it's millions, yes

it is possible to make a resurrection of all
if one person remains unresurrected
this process is not sustainable

it turns out that we haven't solved the problem
if even one is not resurrected

and if we assume we have control like this
that we need to transfer the structure of the World
for example, the current one
into the structure where everyone is resurrected and dock

we actually need to do something
review the process
how god unites
Action of the Soul and one's own Soul
that's all

and from God's point of view
He can unite
Your Action
and your own Soul
when he likes it there ^{yes} Soul control is achieved

i.e. He takes over this control
and thinks that yes, this is how it should be, ^{yes} it's one

then his Soul is actually
^{Well} increases at Action level
That's where the difference lies, by the way
after all, God is separated from human actions

that He can develop and expand His Soul
and this is the primary element of any World

i.e. God practically meets with Himself, it turns out ^{yes}
at the point of fundamental or primary control
or at the point there of the Infinite Future
He always meets with Himself
^{Well} with your information ^{so to speak}

and it turns out that if we have this
then the primary creation of man is exactly ^{yes}
naturally God can always meet
with a living person

we just need to get through
along the line of view or there Perception of God
and we see a practically living person
that's all

i.e. this is what this element is for
^{to} learn it technologically
combination of action
The Soul of God and the Soul of God as such
at the point of information reception ^{yes} knowledge of acceptance

that's when a person accepts
how does God accept it anyway

He accepts information as a human being.
He created man, which means He already accepted
i.e. you yourself are the basis for acceptance
the point of view is not somewhere out there
you don't need to chase her anywhere
it is enough for us to consider
your actions at this moment
this is the root of any event

and it turns out that we can then
accept information, for example, some
and also, in principle, differentiate

and when we differentiate information
Well because we need it yes
we need to consider
what concerns us and what would we do yes
so that we need it

i.e. in principle, technology by the way Perception and action
it is almost identical to that
what does God do in management

because well in the Image and Likeness
this is so it's absolutely clear
and in the perspective of Infinite development

and this is precisely the differentiation
as for man
what will he do
i.e. consider your own information
This is basically an elementary system, it's not difficult

gradually we move on to identification
of his own action

and as soon as we come to this
then we can see
the structure of the future where you can see yourself

where you are directly moving, for example
By the way, this is a powerful controlling clairvoyance
even organizing clairvoyance so to speak

clairvoyance that does not just control there
and creates Reality

organizes the following system of Reality

and in essence this is management
which is characteristic of God
when He created the primary elements

simultaneously Infinite

and here the intermediate system is more complex
from the point of view of human logic
control system
because there is a need there
to know the essence of any ^{event}
i.e. all communication systems

and the initial and Infinite level
it's ^{generally} quite simple
because there aren't a lot of events there
in the first case
because they haven't gained ^{any} strength yet
and there are not many of them
in the primary act of creation

and in the Infinite level
^{it seems like} the forms are quite unified
all the same, everything Infinite cannot be destroyed

the shapes are quite linear
and practically not ^{well} they have no instability

therefore, manage at the level before the fact of creation
or there for the first time there are some milliseconds
if I may say so
in fact, in the first pulses of light

and in Infinity it is approximately the same technologically
and ^{how more} complicated and longer, ^{so to speak}
not that it's more difficult, but the longest, ^{so to speak}
manage it in the current management
^{Well in general,} in the usual version of ^{ordinary} life
there is no other person there

i.e., in fact, a person who masters technologies
he simplifies the system of achievement for himself
apparently certain aspects of the universal Reality
that's exactly what the tasks of universal action are

this is kind of a prerogative or something Togo
who starts to develop
and sees some aspects of management
in front of you
what should he do next ?

further management develops
on a more general scale

i.e. he starts working more, such a person
with more global tasks

that's why, for example , in my Teaching I always say
that through Macrosalvation
naturally in this case too
the control is accelerated

and it turns out that acceleration
i.e. attracting a person here to this place
where are you
this is a clear identification
their own location factors
in this World in this information

as soon as you well convinced
that they have mastered the primary coordinate system there
and you see all the light streams there, etc.
what do you need to do

and at the same time the following cases for example Yes
they are quite stable
because you see the light of the future

it is possible not to differentiate the future
you can just see the light of a sustainable future

although you can do it there once anyway
spend half an hour there somehow
see your whole future there Infinite

and then it's already known
and you can, for example, just count
that you have light yes and that's all
why is there the same thing several times
how to implement in management
it will happen anyway
and therefore it turns out that
Of course, it is the creative that is meant

that's why it turns out
what we are considering here is management like this
what is the task in this management
maximum concentration of light
where is your exact location
in information
be able to advance to the level of access to the resurrected
and that's all

i.e. when it is known in this World
of course it is immediately known where the resurrected one is

is simply to bring control to him

Means it turns out that the very concept of "acceleration"
it's just often a very large amount of work
Well how is big considered

it's not always a lot of work
It also happens that it is just the point of view of some person
in the collective Consciousness
whoever doesn't know about it doesn't want to know

and in principle a person has it
to a greater extent well May be
some kind of laziness there or something Here
to overcome a seemingly huge amount
information
to convince someone there
who has an opposite point of view there, etc.

but if he goes for it
i.e. decided to get involved with this concept
and considers
why does a person not want to understand something there
there may be some external influences

because in essence it is in the Soul
every person can do
and resurrection
and meeting
he is distracted from this by someone somewhere yes

if we analyze further
then this is a system well again, the development of events

and in each case we must see
the essence of each event
from God's point of view again
God's way yes so to speak in general development

Ideally, every person should go through that path
where he reaches Eternity
and therefore this is the path of primary development
which is what God originally intended
he is at a certain level of his path
it should not differ in capabilities

and how do people master such capabilities?
God has other tasks
next

and it turns out that well in this situation
that it is necessary to go deeper
and again, in essence, come back to yourself

i.e. as soon as you come to your management yes
the search phase is balanced
i.e. you don't need to reason, for example
why does one person want to do something there
the other one doesn't want to

you compensate by that
that your point of view is known to you
you search and you see yourself

just like God does
He does He sees Himself in control yes

i.e. well in one aspect not always
but at least as soon as He sees Himself
and God always sees Himself yes everywhere as if

this is the point of view
always see yourself

not to observe exactly
and to see knowing that it is you

may not differentiate
where exactly we will say there

look at some clearing or area
and you know that you exist

i.e. it is clear to a person
that he knows that he exists
but to know from the point of view of seeing ^{yes}
knowing and seeing are one thing

in considering the image
you see knowledge about yourself

and when you start ^{well} bring closer
this system
closer to yourself ^{yes}
then the events of the Infinite Spectrum
become more controllable
or often completely controllable
i.e. it depends on your position or on your affairs there etc.

then it works out
that any external level of control
this is a controlled system ^{yes}
in space and time

and here it already arises
you ^{well} actually ^{yes} technologically gained
all systems
do you know what's at the division level
Souls of God
and Actions of the Soul of God
here it is, the point has been found
you have defined your coordinate system, etc.

and here it arises again
what is always talked about in the control context

what if at least one person
still doesn't know completely
or at least there is no participation ^{there} in management

then this is not a big system ^{in general}
^{Well} some external event
this is not very stable
she's starting to influence

This is where a very specific ^{issue} arises
and it can even be complicated

ideologically or something understanding
moment

on the one hand there is a desire
technologically master the system yes
on the other hand, this individual person can
convince from a distance
there give him some information there
he will start to master

but then it turns out to be an ideology
what time is it then ? will take this process

i.e. you have reached the control level
and suddenly one person ca n't do this

and his control again
it starts like a small stream
scatter literally there

looks like a thread-like system

i.e. the entire control space works
and let's say one thread
it carries a phase like another opinion for example Yes

so it turns out that the task is already here
continue to work exclusively technologically

i.e. to be able to connect the social events of your life
i.e. its own management status
the knowledge that there will still be a general resurrection
knowledge of what's there There is
for example, there are some specific cases of resurrection

when he speaks and explains
something like a resurrected man
it shows some elements yes management
analysis of these methods

how did it fit into the system of those living there, etc.

and it turns out that technologically an internal task arises
i.e. what are you in the mood for
or you mean yes and you show technologies as if

Well first level

you do

Well or just resurrection

there are individual people there or do you have some kind of meetings there
and you lead people within the framework of your task

as a person acting

or the one who made the resurrection

and still in effect

i.e. it's a different perspective

if you did the resurrection

and we met and the man had already arrived

often this is a big disconnect from those who are just starting out
just starting to do management

and therefore there are quite a lot of people

chooses this path

that yes they are dating

but this border is not being pushed forward at all

because they think that in this case

they will come off too much

from the system of collective Consciousness

now we move on to the personal system

more of a personal attitude

conditioned by human practical experience

so everyone is social

everyone is given the path to lead

and precisely in the structure of Eternal development

and everyone can really, for example, save civilization there

it is precisely due to the power of your Soul

due to the light of your Soul

i.e. no one is throwing such tasks off a person

he looks in any conditions

what does he do on this task mainly

and if for example he performs resurrection

the question arises

what happens to this person next ?

i.e. well Of course, all good things happen to him anyway, let's say

the question is in principle of its further action

the main number of people means

Well in fact, as if seeing his own isolation then

from the system of collective Consciousness

where this process has not yet become systemic or universal
are beginning to be considered to a greater extent
the task of their collective action

i.e. and they maintain this thin border
i.e. they often see people there and even shake hands
but do not complete a full cycle
because they think that this is a kind of shaky border
through which if they cross
and will meet with the resurrected one
the resurrected one already remains

then this is what will happen next
will they be able to follow them further?
how to control at the same speed

because then they will think differently
here is the resurrection done
and the speed characteristics are already different

this is the social status of the task
what is really going on here
there is no reduction in speed characteristics here

i.e. going i.e. doing ^{yes} resurrection

and made the resurrection
from the point of view of everyday Consciousness
and in general from the point of view of the structure of the World
it's basically the same thing

Well well the man resurrected someone there
Well, what next? The world is the same.
there are also nuclear weapons there, for example Yes until now etc.

and it turns out that here
in fact, the main thing here is to be able to overcome
to overcome at very high speed
Well this is the level for that person
that after he meets the resurrected one

and in full cycle
i.e. the resurrected one comes
For example there It's definitely better to go home
and lives in the house
i.e. because if there is a third option somewhere
Well it could be some kind of completed cycle there

but still it is not considered complete
from the point of view of social systems of the current at least

i.e. people who were known in the near future
close to there for decades
they should, if possible, return to their families
and then the full cycle will be completed
as a demo more yes

the level of demonstration of such obvious demonstration
that the person goes back to the family

and there's no way to get rid of it
family is the primary level
who accepts a person as if he recognizes him, etc.

and it turns out that this is a factor of evidence
that it really is a family member there
This is the man who was resurrected

and it's not just like that that's done there
because well there somewhere if a person is lonely
Well there's nothing scary about it
however, who had families
then must means yes return to the family

this factor of action is already further
the third motive already
how does he come back

to whom
How will relatives react?
won't they have any there
cardiovascular problems etc. yes

because at a minimum level of incorrect reaction
so it arises well there is vasodilation
that's what people around you think

in fact it is not so
here, resurrected, he does no harm
this is like the law
he can't organize there

let alone organize it there as I say figuratively
Well how could a meeting not cause a heart attack, for example?

because this is still the third contact level

i.e. matter is saturated
upon contact even with the resurrected
matter is of a completely different type
You can even see the contact points there
at optical levels

matter becomes more reserve in humans
reserved as if for the structure of further management

and it turns out that here we need to clearly explain our positions
what if a person comes resurrected
at least there will definitely be no harm to anyone there

here here here
this is the position
should be very clearly understood
There are different films there about zombies, etc.
which seem to confuse the collective Consciousness
and they give a completely different process, a kind of mechanistic one
which is based on absolutely no information
which by the way will never be implemented
in systems
that supposedly it can be done chemically in some way
mechanical system there to develop the body, etc.

and therefore excludes the Spiritual path
that these are the same people

and the path that the majority of people believe in
just a normal resurrection there resurrection
the same as in Christianity

and in many other religions in general
These fundamental systems are reflected

i.e. this path is already known
but it means in the collective Consciousness
often some such thing is brought in
technogenically there is material yes or even more like that
critical technogenic-material option

and it turns out that people, well as if disoriented
this is actually not even a term that describes everything
in fact they are completely detached
from the technological plan of this process

and it turns out that this opinion has equal status

because that's how everything works in this world
every opinion has equal status

and either one opinion
due to the larger number of followers
more is realized there or less is realized there
and that's all

and it turns out that right here
it is precisely the control over detailing
for clarification as if to all family members

optional by the way it is needed there
some declaration of basic principles
It's often enough to just have
your own position calm position
but for example there is not even connected with the explanation

but at the same time you have to implement
space for implementation
you should then be more in control

if you explain less
you will have to manage more

Means and when do you start
this space well implement more widely let's say yes
you are preparing your platform for the arrival of the resurrected one
here you basically close the process then

well arise as a rule there
even if long periods often pass
physical meetings yes

for example, a person sees but he thinks
well okay he will fit what next

again, first of all, people
This is how I view the process
most obviously they perceive it or not
affects the process
will he continue to be so proactive?
there for the salvation of people

because there is always such a well some kind of temptation or something
this is how most people think

that in this process who does not fit there they say
Well, well stood and didn't come up for example Yes

and because a person
his mission of universal Salvation
takes for the primary level
he believes he sees resurrected
and thinks well ok let it be there
the majority of people can see
there's a ninety percent chance you won't be able to get there
it's easier for them
and he holds this status for example Yes in management

the most active ones who break through this status
Well as if it were personal or something personal initiative there
or the triumph of one's own Thinking
somewhere out there in Infinity

he meets such a person there
or somehow returns it, etc.
They usually overcome the system quickly there
Well similar to fear or something it can't even be called fear there

and how would it look more like this
what could be scared
a person in case this happened
it's like more information about possible fear
if there was some observer theoretically

as if it were simply visible in the collective Consciousness
and this system is exposed in management
it turns out that we are dealing with more
with some such and such information
which by the way can't be
namely fear of some information
which may never be realized at all

and here such an element arises
what does it mean in the resurrection
and even that has to be ruled out

because when we talk about the general process
we can't allow ourselves to leave anything in the system
what would it be like for example Well how can we say it's not clear, it's not clear
or it would even cause some discomfort there
not to mention the fear yes

i.e. logically this process should be very natural

and it turns out that a person at the level of the Soul is like this
here the Soul of God and man are very clearly connected

i.e. here it is already clear that the action of the Soul
God and man can be one and the same

and moreover the Soul of God is practically
Well in fact, it is like a carrier of the human Soul

i.e. the ray that comes from God
passes through the glow, for example, so to speak Souls of man

and their form is the same at this moment, i.e.

but in this case it may be
or the Action of the Soul of God
or the Soul of God as such
Here

and when does a person begin to differentiate
these ones, well maybe not very complex concepts
he begins to see that his task
see often who touches it there
or God with his Soul yes i.e. God Himself
or is it still indicating the level?

if God
what he points out then yes

so how did god touch
and how to do more and don't need anything yes
God means he touched, that's already considered good

what if this is just an indicating level
i.e. it needs to be recognized

and then a person comes to understand that
how does God himself reason at all
from a human point of view yes for example opinions

what is generally considered a directive Action for God
if we think about it in this sense

it turns out that he is forced to himself
Create some conditions yourself, yes management
up with something for himself , in general, logically

and here the next one arises
as if Macro level of the event aspect of the action

i.e. a person is in an event system
where he can always create for himself
events to manage yourself

i.e. he just moves on
Well here God is familiar to Him just there well man let's say yes
and that's all

since he does so
so it turns out that he can, for example , create for himself
control system
and make sure that the resurrected one is here yes
All

here he comes to the point of view of God's Thinking
from the point of view of primary organization
there are the desires and actions of God
and organizes everything so naturally
that he has no gap
between his Thinking
and the system of collective Consciousness

i.e. it overcomes this discrete gap
when many there for example don't know yes about this technology
just because he thinks like this, for example there
as God does
and that's all
mentally superimposed on the Action of God

and then the system of self-knowledge is like this
that the resurrected one can no longer
Well it's not that it can't
there, by freedom of choice, he chooses that place
where does he stay
it means to stay in this place

and then let's do it now
collective management let's say
let's make such a level

what is in the natural in the natural system
without straining at all
there we have identified one place ^{yes}
and let it stand there even if we don't use it
some technologies
but we know that God's Thinking is the same as He
He thinks that let the resurrected one be there

our task is only to approach
or ^{how to} organize events
so that he could come closer there

Now we need to work together to create such a management
I will do it with you
try to reach more people
better than anyone else
and we will work out this management

after this practice
I will show the technology ^{as if} the control details

in fundamental management
try to overcome all the time
this border
that as I said I highlighted the periods
that a person leads others
because ^{well as if} he wants to lead more
and it does not overcome the boundaries of radical, ^{as it were, yes}

if he overcame then he is the same
it's still no different
^{Well} he resurrected man
and then there's still work to ^{do} almost the same ^{yes}
except for those resurrected ones whom he resurrected
and that's all

i.e. we need to quickly bring it to that
that no matter how many resurrections a person has carried out
until the general resurrection occurs
until technology becomes universal Eternal
i.e. you can't just destroy a person , ^{so to speak}

is brought to the level of Eternal development
in any case, a person

only then can we say

what is some kind of primary work status
was completed ^{yes}
man has come close to that to a certain extent
how God originally implemented his governance

i.e. as He intended
and He then becomes close in understanding

if you move to that point
and from there begin to understand God
where it is impossible to simply destroy a person
and everyone is already resurrected
i.e. there is no concept that there were any systems of destruction

then from this point of view
if you start to understand God
then it turns out that it is already clear here
why everyday events now
this is exactly how they look in this world

and that's why the details of events ^{yes let's say}
detailed systems
where to meet
i.e. what should be the characteristics
the location of these buildings in the area there are some
or there is a selection of a time interval ^{yes}

This means that this is a system that is actually going on
from the point of view of an already completed process

but this is actually more accurate
because as soon as we have
the implemented process is complete
then it turns out that we are like ^{well} some level there
which one should follow

and the vector that goes there
we are walking along it
and then we know exactly what is happening here

i.e. we detail the system ^{well} actual meetings
because we see
that we are on the right track in this process
where everything is already Eternal

i.e. the process of Eternity is an element of Eternal development
what we are raising now ^{yes} in management
in the Spiritual Administration

there control of the physical body ^{yes}
or there in the spread of the action of the Soul, ^{for example}
in all aspects of the personality of human Consciousness

this is the level that allows
almost ^{like} acting from here
knowing what the criteria are

when we know what our task is
under any combination of events
gain human indestructibility

which means, by the way, with any combination of events
receive mandatory general resurrection
the parameters are very simple and well known

and the task is just
try to take into account from the current time
these are the concepts

and taking these concepts into account
gives a complete picture of the development of the World
where from the whole picture of the development of the World
we already receive detailed systems
by meetings, by time, by time management, etc.

and here there is such an aspect of action
that's what happened when we looked at management
going in relation to oneself

i.e. we look at our information
and we get the location point ^{yes} and a person

as i said god can consider
Your information in the Action of the Soul
in action as such

and if we consider the process of action
^{for example, as such, already coming from the resurrected} ^{yes}
or ^{for example} there from the resurrected even like that

then we can basically exclude
there is, ^{for example,} the concept of "person's departure"
in the structure of its implementation ^{yes}
it is in the structure, ^{for example}
let's assume its further development there

here's from the point of view of logic
the man was born

how he views his future development
in the Infinite version here is Infinite time
exists
he is some elements from the Infinite spectrum
still perceives
a person can perceive Infinite time
at any time

and it turns out
that the first element of organizing a meeting place
this is how a person lives
perceived elements of the Infinite level of the future

i.e. the simplest element
find how resurrected at all
wants to come to you well come let's say to some place

consider in the history of its events
what signals from the Infinite Future
what elements did he get it from
well, at least a billion years or a million years ahead, etc.

select these signals view
what he perceived
and by these contours find a place here

i.e. at the level of optical systems it is visualized as follows
what we are looking at is the primary impulse
where he seemed to look

here is the most important element
in the history of this person's development
look
where he looked into the future

if he doesn't look he doesn't perceive

it means a person is looking
By the way, there is a very simple criterion
in this management
he always looks at the moment of birth

he looks into the universal there including minus Infinity

it's a kind of vision at the moment of conception

so he looks at 25 years old, at 75 there, etc.

i.e. there are intervals

although it is believed that there, for example, there are 50 years

this is considered as an anniversary

nevertheless, the interval is laid down

that at this moment

he looks more into all aspects of information

but in the future if we need to allocate

so as not to look there

where he looked and did not consider

the action of his Soul

can often be seen

element moment of birth

but this element is very fleeting

literally there are milliseconds

he perceives the signal of the entire Infinite Future

and at 25 years old it's a fairly stable position

there it happens that the control systems go quite clearly yes

but the 25 year interval always hits the mark

in a very strong projection

at the moment of birth and even at the moment of conception

i.e. we can consider 25 years old , so to speak, age Yes

this interval is quite stable

level or something actions in all aspects

But first of all, there is the level of birth, conception, etc.

and if we go out

to the level of viewing through Infinity

i.e. at the level there is minus Infinity yes

but there it doesn't look like minus Infinity

and what about the information that is well in optics it looks like this

what is future information

some kind of signal there for example there from a billion years ahead

this information is at high speed

at the moment of conception

bends the information that exists
well until the moment
some kind of deflection yes some kind of lens appears

and at that point where it is not reflected back
human life arises
Well, well conception actually occurs
at the moment of acceptance of the whole World

i.e. when a person accepts the whole World
as it is yes i.e. Infinite
then he is born

i.e. it does not reflect
he accepts her information

accordingly any element of the World
in this world so to speak, if I may say so
so he is actually capable of creating a human being yes
it turns out
at any point
unless there is a reflection of this information

i.e. if we have that the World, strictly speaking
the personality itself accepts this
i.e. this is again the realization of God

even in biological birth
God's opinion is realized anyway
or he accepts
your own Infinite Impulse
or he doesn't accept

and so it turns out
that in this way God actually sort of correlates yes
information of the Infinite Future Development
at the expense of the opinion of a particular person

Well it's a bit peculiar
God's action is socialized
on the obligation of people's actions

i.e. man as a criterion
i.e. a born person
it always turns out to be God's chosen person
in this control system

and since that's how he chooses and the person still accepts
a collective opinion emerges

i.e. I am saying that it is not quite like this Infinite
or what? in minus Infinity not in the direct sense
namely in optical terms
what is behind this in logical understanding
An infinite number of years
which was before birth

and it is believed that this

Well , maybe there are elements of the future there
but it looks more like this
to an element of some large mass of information
some array
where is this deflection
but there is no return signal

and it turns out that the task is then the person's
to resolve this issue
just focus on everything
take your signal there and send it to this trough
to the point where the person got it from
maybe he got there 150 years later
not necessarily a billion

but as a rule, by the way, the element is very high
there literally a million years affects
where time simply folds
into event form

i.e. there well as if events are measured by others
other categories
not time but a more concentrated concept
as an element of events

and this is where most of the control comes from
at this well or something like that at this point of the bend
and then we can understand
what did the man see there anyway

i.e. to understand it at least Optical perception
what did he see

and this is, i.e., color is just color

that he's golden there somehow
or there's a silvery-lilac one there

and this color is actually his road
where can he go
resurrected

i.e. if you want to determine
where is it located
look at the color that is located
right on the surface of the earth

and then the way is open for you
you took it there look

he passed
can you tell the time by the color and thickness of the color

if the resurrected one entered there
into the structure of Infinite Development
i.e. he understood that development is Infinite
how did a living person understand

By the way, the resurrected one is still forced
Means perceive the Infinite Future
from the point of view of additional knowledge
when a person is living, i.e. not dying
he sees it from the start
this is his everyday state

but when he learns, by the way, he stops being different
here in the Infinite Future
the resurrected is no different from the living
i.e. well from not dying for example Yes

and it turns out that the more he understands the future there
the thicker its platform

i.e. accordingly it can be located
there at some level
if necessary there, for example, there is one and a half meters
this means it is almost completely located
in the system of future events
he already means he won't leave
logically it won't go away

i.e. there are resurrected ones by whom it is evident
that they won't have any more
this, well, ^{biological} death
i.e. he won't leave like that

just like technology in principle
can be realized by any living not dying

i.e. the difference falls at the level of action
that's how I said it
there is the Action of the Soul of God and there is the Soul of God ^{yes}

if the realization of the Soul of God
initially in a primary state
this is the physical body of a person and he does not die ^{yes}
the primary impulse of the Soul is realized

the departed person in action must be realized

but there is a combination of the action of the Soul
actions
and the Soul of God

and it turns out that here already
where there is a combination
there a platform for the resurrected person appears
who knows that he has an Infinite future

and then there are no problems at all
because if he already knows it and is technologically capable of it
then first of all it's easier for him to come then
back
because he becomes an ordinary person
in the direct sense

if we consider that it is commonplace
this is the understanding that there is Eternal development
this is the most ordinary person in general

and it turns out that once
^{Well} the most ^{or what} household level
^{Well} conscious management
when Reality is most accurately reflected
this is what a person has in Infinite development

and then the platforms merge ^{yes}
It's easier for him to meet a living person

who knows what needs to be done there

For example there is a general resurrection

and some know that it will still be there

general resurrection

and they do it not very quickly

By the way, there are also such categories

absolutely confident people

and they can stay there for a long time

practically do it without rushing

knowing that it will happen anyway

and then it turns out that way

it also slows down time

but nevertheless this is already a person's personal status

and then they must choose for themselves

or they will start to engage in more active activities

or they know that the process is still universal

i.e. absolutely as if knowing this characteristic

they are not in a hurry

and it turns out that here on this platform

where for example there is absolute knowledge of a person

you can follow the growth here

this is a unique path yes

and by the way it looks very unique

This is clearly visible on the optics

that a person is at this level

Well some kind of special as I said

information

at the beginning of today's seminar

where a person has the structure of a resurrected person

and this train of some kind is stretching

you can even see it straight

where did he go there

where did he get off anyway?

where he went etc.

it's clearly visible if you can distinguish it

this is the structure of action

you can see the days vertically, literally

days are visible

usually there is a week then the next week
how the information is condensed, etc., etc.

and by the way, multiple compaction of information
leads to the emergence
of the same composition of material substance
what is the earth made of

example, if you look at the resurrected one
who walked there for a long time and gradually approached
to the concept of "Eternal Development"
in a technological sense

because the point is
that the resurrection itself is a fact
enough well for the resurrected one let's say he is like this
a bit peculiar of course
for his Perception
but nevertheless it is technologically
it still looks like some kind of lag
he needs to catch up with the man who didn't die
due to the fact that he missed some time there, yes For example

and it turns out that there are technological advantages
it doesn't give a person any benefits at all

he just knows that he is a man
that it exists such a process
Well it even happened to him
but nevertheless he is forced to know it
It would be more logical that way

i.e. and when we begin to see
structure means in logic
although it happens that the resurrected
then he says
that some kind of miraculous phenomena happened
and this convinces him more, for example Yes

but this status is always no greater than the logical status
any other person
it's just an element of knowledge

because everything is knowledge, yes everything is information
he has nothing more than knowledge

that's what's special about that
i.e. I always say that the most basic task of management
in any resurrection technologies
so that a person does not die
the most important task yes

i.e. a person must live
and then further on there well who left to resurrect those

i.e. here is an element of this action
is this level
what does not die have
Well the possibility of infinite entry into information
almost instantly
without discrete elements or phenomena yes
associated , for example, with the biological decomposition system
and subsequent recovery
loss of time

and how as soon as further already a person
connects to the structure of Infinity
here it is in a projection version
soil arises

i.e. soil as a carrier yes
Well in biological matter

in the projective version
is implemented as a system for Eternal development
it turns out

logical conclusion
what as the more the resurrected moves
as soon as it enters the structure of Eternal development
of well arises and on a material level

i.e. an element of a specific one arises
Well just soil ordinary soil

and if for example Well i.e. it consists
from the usual silicon elements, for example , etc.

and it turns out that this element
Well as a matter of fact
described or existing in the collective Consciousness
which to a certain extent yes
the structure of the soil characterizes a person in some way

Well they say there that well there is a concept of some kind of "dust" etc. yes

but according to logic, the organization of the soil itself
This is the organization of Eternal Development
through overcoming, as it were, the structure of biological destruction

and if you find points in the soil
where this structure is overcome simply in the soil
in the usual, so to speak, in information even about this soil

then you can find places very clearly
where the meeting with the resurrected one is most favorable
most favorable

i.e. learn to distinguish the properties of matter
By the way, this is not the concept of geographical zones there
geophysical faults, etc.

it's just a completely different concept, it's connected to that
that a person is not dependent at all in principle
from where it is located

at least there if he is capable
can organize oxygen in a vacuum
and project there

it's like a person is an Infinite substance
and it is truly Infinite

just as God acts Infinitely
people simply collectively create an event structure
agreed that they would go there
through Divine development
that's why they are in one place

that's basically how it works
that at the level of management in general
there are absolutely no problems here
where a person can realize himself

and it turns out that the number of connections
more than well you can imagine it there yes

i.e. it turns out that he is resurrected can choose
any implementation system
but since there is some kind of primary agreement there, let's say

some desire together does not look
this is often in the form of some kind of agreement
but simply a joint desire for Eternal development

then it turns out we can find
the structure of the soil at a general level , so to speak
and from the general level
find the most favorable points
from the point of view of organizing the meeting

i.e. I say that the primary level of a person
and not the soil level there
not the level of the carrier on which he walks
he chooses his own carrier

so it turns out for a living person
the soil always exists
i.e. he is not dying
and Infinity is natural for him

i.e. the type of soil is one ^{yes} Infinity factor
i.e. the soil corresponds to the system of Infinite development

i.e. for him the soil has the status of Infinity
for the living for the undying

for the resurrected
he is forced to realize himself
^{Well} i.e. to build the ground under your feet, in fact

and this is the information structure
i.e. it doesn't look like it does there of course

large quantities of soil
although by the way for some places
this is even a significant increase
physical soil by the way

and ^{well} according to the same observations
that the earth is still expanding very actively
as in the previous literally even thousands of years
now literally every month she increases her mass volume

it turns out that this soil arises somewhere
where did it come from, it didn't get here by meteorite
there are as many meteorites as [...] and approximately as many fall

and it turns out that the increase in the soil itself
this is the action of the resurrected

i.e. the logical problem is closed on that
that he rose again and took a plot of land there and grew it For example
is no real physical soil there

so it turns out from the point of view of logic
there is no limit on the number of resurrected

in projection version
they develop an element of spatial development
i.e. there is enough oxygen, food, soil, etc.

if we start from this
from the point of view of Infinite development yes
then the third level arises
next management plan
in the general resurrection

how many civilizations were there in total
how many in this world
there are elements of development generally speaking yes
how many there could have been on other planets, etc.
and where to implement such a number of people

so that's the principle
that at any point of information
if a person accepted
it may arise

i.e. accepted this World yes
acceptance of this world

then it turns out that we come

to the point of creation of God
that's how He generally the World and Himself yes It turns out he accepted it
How did God even recognize Himself?

after all, during the initial development of the creation of the World
He must first

Well how to find your own information
First, accept the world and work it out
then how to create it yes

and this is what absolute stability in management is

He created the World that exists.
so he did it for sure

and it turns out that He must first work it out
to the creation element
where was he based then
and how did he make the decision
God is meant

so from this point of view
if we start to analyze in the same way
and put it on this point of view
in general, a person living there, for example, yes not dying

then everything is simple
he is already here, he is developing calmly
there are no problems there
He expresses it in naturalness and harmony
his own state of being so to speak

Well this is some kind of philosophical distraction
nevertheless it characterizes
almost pragmatic element
meetings with the resurrected
acceleration exactly

here it turns out that philosophy is action
inner philosophy is the acceleration of action

and it turns out that we see then
that resurrected
when he starts getting close to that place yes

where is God at the moment of decision making

Well For example, God looks at the whole world first
and thinks where to create it
Well such a paradox

unusual point of view

but nevertheless He definitely created the World
He had to be at some point.

so when a person starts
approaching this point
resurrected

after all, if he accepted the World once
then he can't actually ^{refuse it}
one must be born if only the whole world is accepted
he comes to his primary point
he must get into the position of God
when God was still about to create the World
resurrected himself

i.e. where do they come from and go ^{there anyway? For example}
Well, if you ask yourself the question
where they arise
Well such a purely mechanical question
where is this place let them show and tell
where do they come from ^{yes}

then ^{how does it} turn out that this point
it's just close to that
which I am now describing

he must return to the primary level
and then there is already a similarity with that
as God does
It turns out to be so initially
must accept as a human being ^{yes}
the system of the whole world and should be
to be created as a human being

i.e. God, ^{well as if} entering into His own future
he chooses the world in exactly the same way
according to the elements of His return ^{as if} of His personal Essence
to myself ^{yes}

and it turns out that He does not go beyond himself

i.e. as soon as a resurrected person
begins to see autonomy
of his own existence there

i.e. precisely the autonomous characteristic
that's when the image is recognized

which comes from Infinity
to him

i.e. well, ^{well for example,} there at the moment of biological decay
there they begin to dissipate

characteristics of the external world yes
for such a person

and he needs to kind of assemble an autonomous system
it's easy to gather a point of view about yourself
that he is an autonomous entity yes biological entity

and when this is generally a normal action
routine, often stressful action
connected by the way with a large thought process
the resurrected one or the person being resurrected

and when he begins to see
what he saw at the moment of birth there
from the Infinite System
the system of events begins to unfold

i.e. he begins to recognize events and meetings
but he always strives to meet in reality
he always has a meeting task

i.e. just like a resurrected person
Well for example , someone somewhere is looking at it
there are some meeting positions
and considers what a living person has
there is always a mechanism to resurrect another

then the resurrected one always has a mechanism to meet here
with whom he would like to meet by the way
Well First of all, with the one who is there as a rule
there he resurrected for example

although they are not always the people who resurrect
they don't always differentiate who
often they have simply the Action of God

and they do not differentiate the primary impulse
this is right
because initially the presence of God is everywhere

and here it doesn't matter there
who put in more effort, less
This is, in general, a natural state of the human Soul
this is Eternal life to another yes

so this is resurrection for example Yes
creation of the technology of Eternal life

so it turns out that in a natural state
a person doesn't really differentiate himself personally
what is he doing in terms of this event

if he brings out such a person there
for the specific task of resurrection
he simply has a personal responsibility factor
for bringing this process to the level of full implementation
and that's all

i.e. if a person, for example, highlighted
some individual
and thought it was necessary to resurrect
he has this task now remains with him practically forever

for example, he can forget about her there, etc.
but in reality he will be forced to perform a resurrection
and to track means when this happens in management

then not only that, in management
he will still have to make sure if possible
and as a rule he must somehow make sure
or he developed clairvoyance and saw
that he is walking somewhere resurrected

or as a rule it is still a factor of action
is a personal conviction
i.e. it is a meeting with this person on a physical level

and either this certificate is there
due to all the usual formats and there
what exactly is this person
that he is the resurrected one, that he is alive, etc.
common identification system

or at least at least
recognition among a number of people
anyone, well, when meeting somewhere by chance
there in the store there or just on the street, etc.

and here comes the differentiation

but here is the next process
as soon as you meet it
the following problem arises
they are immediately Infinite

this is how god did it
He always focuses on Infinite development.
and well, well how to relax so if I may say so yes
in this process
only when
the process of universal resurrection has already been accomplished
and it has been proven that nothing threatens humans anymore

i.e. any combination of events
will not lead to biological death there

well arises some kind of rest
the task is simply excluded
and that's all
there is no more task [...]

but in reality a person is constantly in this system
works
constantly goes along these certain
Well similar by the way to some rivers like this
here are the temporal-spatial
and are constantly improving

Well, some don't notice it, some do.
so it's better to know this right away and count
what needs to be done first is simply better
and that's all
and do something else

Means and when for example we are considering
this is the process
Well from the point of view there is already a place for God there, yes
in its primary organization

then God also had such a thought
we need to make this World there Eternal
and then it will be easier from now on as if

and this is where the position arises
that God originally determined His primary place
at the point of mandatory action

why did God oblige Himself to create the World there
i.e. what was an obligation for Him
what prompted him yes

for example, there is a system to create a world
Well How is the person in charge?
he always brings something there to a specific solution

this is where this point of realization is for God

i.e. I bring the resurrected one closer to the place
where he seems to make decisions more accurately
where is his personal path more precisely
where exactly are these optical systems or something development links
where can it be found more precisely?
where the glow elements are more revealed there
where did he walk

after all, it's not always just a path along
on material grounds
often it is an instant occurrence
as if resurrected at this point

i.e. there is no previous path, as if it is not in the information
although maybe he was walking there yes
so at the level of logic it would seem

this overcomes the system of certain such phenomena
Well from the plan or something unusual
i.e. you're walking and suddenly you look there
a person there is resurrected for example Yes
Well did he come here
or did it originate there
or it appeared there a centimeter before that
this is more of a logical question

seems logically impossible to say that it appeared
anyway, a person has to go somewhere, get out of there somewhere, yes

but how can I say that he can't appear there
also not allowed

it may well be that he is in this place
and appeared
no previous movements on the ground there
may or may not be

and therefore it is necessary to consider further
and the vertical component, yes
the realization of the resurrected man

after all, a person can appear at any point
as i said if he can create oxygen there
he can create earth and oxygen in a vacuum
and to live means regardless of distance
he is the center of the Universe

and it turns out that based on this we can say
that people choose a place for themselves
for him the whole world is, in general, universal
for a person
it can be implemented anywhere
just like God in general

it turns out that God set the task of His development
namely universality and Infinity
and set the task of achieving this yes

why did he do it
Well in order to be sure, i.e. to know exactly
that nothing can displace
sustainability for example there Eternal development
Well in human words or something if it can be said so

For a person, logically, this is very clear
God who owns and controls there
all the information
He might actually be able to choose
only this point of view

because there can be no other point of view
otherwise well maybe there is some kind of collapse of the world, etc. yes
God cannot do this

that's why it turns out
that He chooses precisely universality

and then when a person already understands
this point of view
he is almost approaching God
to the level of His as if following into Infinity yes
according to logic

i.e. he meets God already in Infinity
that's why he turns out to be alive in Infinity

i.e. his point of view is this

that the originally created matter
has the properties of a further ^{yes}
here is the Eternal uniform development

i.e. if the World is created
that means it was based on some platform
based on Infinity
so that's where he gets to

and accordingly
^{as if Well} the initial substance it is infinite
it can't be destroyed there, it can be crumpled somewhere
or is it transformed there

so even the logical model is like this
what if we talk about that
what is the primary point of creation
She was somewhere, naturally
what was she like
then naturally it is clear that she was Infinite

because we clearly understand
that here you can simply logically understand ^{yes}
absolutely absolutely definitely

what if it arose somewhere
it could not have arisen at some final phase
that's all

and here is the level of logical status, ^{so to speak}
awareness of Infinity
naturally passes into Infinity

if something in this World is created
then it will still be Infinite
precisely in a creative sense

and therefore the person ^{well} he has one road
he just has to get into Infinite Development

and therefore it is clear that the meeting
God and man in the Infinite state of development
this is the space that God and man create
on the Spiritual plane

it's not even physical, let ^{'s say}

World organization system yes
this is generally more common
level well so let's say Spiritual action

i.e. the Spirit of God and man intersect there
some kind of unity arises
i.e. the difference between the Spirit of God and man actually disappears
for the Perception of a person there at least

and here there are no differences anymore
then any person is alive
here is a very powerful acceleration of the meeting with the resurrected

God Himself shows
through your Spiritual path Spiritual development
place where a person was born yes
initial level
starting point

and everyone has their own
and at the same time there
there is a common point

Means Well we take our local point

further in the future Infinite
it exists

Next we look
on the element of physical implementation there
i.e. development of the event form
in what place where where to be born yes For example

picture emerges in general
you can even just put it there, well draw it somehow
connect these dots

and it turns out that in the projective version we see the following
that by the universality of all events
what he saw in the Infinite Future
although it is generally somewhat complicated yes
as if on there Perception

but logically there is nothing complicated here
he's just one of those people
formulates events for himself
Now

so that God would receive the Infinite platform
initially

He must make the future Infinite
and from this mass form yourself
as if the basis for the initial impulse
Well in human understanding

and it turns out that we can clearly see here
similar to how God does it
the person therefore shaped events for himself

he somewhere laid the point of Infinite development
Necessarily
of your own

so it turns out he connected it somewhere
external aid mechanism yes other people

i.e. his personal will

because we can
especially quickly meet with the resurrected
if we implement his will, yes too
i.e. he is a free man

but freedom doesn't mean that he is there
there, well, like, he does whatever he wants, changes his decisions
so he chose some solution once
at the moment of birth it is
these decisions must be implemented

after all, God created the world
He did not deviate from his creation.
and the man goes the same way
he still doesn't deviate
from the system of its own Eternal development
in essence

he may not pay attention
maybe it applies there well for example, it is considered frivolous there
or something like that
but nevertheless it will still move in this direction

and it turns out
that in this way projecting events yes
into the system of this Infinite development

we find a very simple average such point
as if in general in the social system in development
that this point is actually implemented like this
what can it do if you want to change
by your will yes

we've looked at more now
from the point of view of the resurrected person there
so that the principle of his free will is not violated there

but it can change
i.e. the space built by him
his Thinking
his will
after all, it was God who created everyone free
and you also have the right to regulate there yes For example
meeting point

and this is already an approximation
regulation is already approaching you

the approach happens in the same way
as well as the original action in the construction of the World
i.e. this is the development of the World into Infinity

i.e. the more people master it there
or already having the technology of Eternal development
the more precise the coordinates of the meeting with this person

the easiest option
well at least once so to speak quickly see
Actions from God
those. tune in yes
and you will immediately see the resurrected one
only then remains to approach

i.e. either technologists who have mastered this technology
and you can see their rays
which push this person towards you yes

you are already mutually regulating
i.e. the same as with any other person
by calling each other on the phone you agree on a meeting place
taking into account his time and capabilities and yours

and that's when you move to that position

that we also need to take into account his time and capabilities
that's when it becomes easiest
you are transferring control to the everyday level

the only aspect here is that
what's wrong with him there
other desires
it's a different time there
other possibilities
but then you'll have to overcome it
this is by management means

that's why i say
that we need to develop management after all
direct there events distant
this makes meeting time easier
because then you help him from a distance
there you solve his problems

get into his problems
there to consider what he does yes already

there is a healthy person there, for example Yes
and how to move it here

i.e. the ability to simply manage events
speeds up the option too
and meetings with a resurrected man
because in this case you
you actually organize its events

but there are people who take it upon themselves
a lot of control events
are the same resurrected ones there

Well they see that the world is there
as if it were opening up for them anew
and they start working very hard for society, etc.

however, the task of returning to the normal cycle
this is still , in general, the main task for society

and this is what makes them
that's exactly what I should pull don't go back there quickly etc.
here again is the structure
projected onto this person

i.e. he is also looking for himself

he starts to think
why did this happen to him anyway for example the first aspect

he must understand
both from the point of view of Eternal development
he should behave now yes there etc. etc.

it means that he can bring with him
what information for a person

because resurrected
Well here too there is quite a peculiar nuance
arises in management
this is an example of the fact that matter is completely regenerable

i.e. it can be restored
including the human biological body

how much does this contribute to that
so that a person well lest someone else take it for that
that everything is quite simple in the World there
and what about his threshold ? acceptability
from the point of view of safety of crossing streets, etc.
would not be belittled

there is also such an aspect

and he begins to reason like this
as if very often moving slowly
to the solution of precisely the stabilized solution

that is, his task is still the Infinite World
if he sees a downplay somewhere
Well what is a person who is engaged in
such technologies are used there deliberately yes
he understands that everything is the same
the task there is not to die, etc.

and if he meets a person
which well these issues do not concern
there is an initial meeting yes

then this is exactly what minimization is
this level of security is generally possible

i.e. if some neighbor meets him
who didn't hear at all

about resurrection technology
and sees that everything turns out to be quite simple
there he spoke about a couple of methods and the man was resurrected

then without knowing the fundamentals
the main task of not dying ^{yes}
he may think that ^{there} are no special problems in general

and here is a very subtle nuance
many of the resurrected ones ^{seem to be} leaning against this wall

and because of this there are also elements
^{course} they ^{do n't} show up
it often happens that they show up
there is a certain circle of people
which is stable and nothing ^{more}

i.e. they need to be brought to the level of that
what is obviously in control ^{yes}
educate people that
^{Well} at least there is some logical formulation there
if there are resurrected then there is no point in dying

i.e. there is no concept of "death" then
there is no point in dying then
anyway, the man was resurrected
It 's not even a logical concept

then here are some such methods
try to place control near it
on some technological basis

and by the way the main control element
in this case, this is the main resource ^{or something} Yes
from the structure that's when a person
looks into the Infinite Future
and sees some kind of system for himself

it is precisely in order to convince these people
^{Well} as if by chance ^{yes} although there are no random ones of course
just those who don't deal with technology
here are the resurrection controls

try to bring it to the level of Norma there
even those who deny it or are against it
but nevertheless the ability ^{to somehow} deduce
to the level ^{or something} stabilized forms

stabilized forms
at least so that it doesn't affect there, let's say yes
to the level of well again humiliation
first of all the safety threshold

as soon as the resurrected one decides this
this task
then as a rule he can already then
generally speaking, in this case it is safe to appear

but then he should be able to solve the problem
for quite a long time yes
for your next meetings, etc.

i.e. for him, in general, the task is very big
and in fact, for example Yes at the resurrection of Jesus
the tasks had already been solved for them
for humanity

the only question is that in each individual case
resurrected man
I was forced to detail the system somewhere yes
in management

and if we consider these tasks of his
i.e. try to understand its tasks more deeply
then this is also a significant acceleration of the meeting

sometimes it happens that he just doesn't come

because there is only one person he fears
what is that well there or get scared
or there will be some problems there

and here he is next to this man
goes there often for a very long time

everything is decided, here is another person, he doesn't even know the
opinion
these are just normal interpersonal relationships
you have to be able to understand

and another person may, on the contrary, be waiting for him
but he has some internal mechanisms
unusual or something he thinks that he is his
there will be an unusual perception or something else

here are some nuances
completely human completely simple
which prevent us from actually meeting there

it turns out that we need to sort out the situation

and when you start to figure it out
i.e. you will have to in this case
delve deeply
into the system of psychological relationships between people

then we'll have to solve them, this is management again
we'll have to decide taking into account something unusual or something
some kind of unusual component
for some people in this department

Well i.e. there is a person who knows and is waiting there
but is really looking forward to it

and to compensate for this expectation he
he thinks that we shouldn't pay attention to this
or it even says that it doesn't exist, for example

but in fact it's the other way around
a sign of strong expectation

because you can't say "no"
how many people believe in the same resurrection
the resurrection of Jesus Christ, among others, yes
there are specifically resurrected ones, they perform on stage, etc.

but it is impossible to say that such people do not exist, for example

but for example if he says that there is
there is something else hidden here

from a logical point of view

If he is expecting something very much, then why is he embarrassed?
maybe he hits the nail on the head

Well i.e. living
fall into the point of view of some elements of the past

and here we can do without this Macroarray again, yes
information of the future
Infinite future
it's difficult again

i.e. it turns out that we have
all the time a projection of some Macro-phenomena of the future

and here to agree on the point of view
there resurrected
living
we'll have to move anyway
into the structure of Infinite Development

and in Infinite Development all the questions are resolved anyway
one way or another
precisely creatively resolved
no one dies there anyway etc.

and so it turns out that Infinite development
it is also necessary for it to be technologically implemented
resurrection process
i.e. we need it, it turns out
not because it is there "I" "am"
it is already there, it is clearly visible in the information

but we just need more
in order to solve the same questions
meetings with the resurrected for example

but generally speaking the Infinite Future
when there are easier to consider some current ones yes
affairs and questions

so here we need to work out
your personal position
to create an Infinite Future
Infinite development

then you can approach it analytically
what does the resurrected think
what should he do

where is he now
for example, does he drink beer or does he drink mineral water
what is he doing

so when do you start to approach
as if from the point of view of this analytics, yes
drinks beer well
look through the beer then
where is this beer

through external systems

if mineral water

look through the sediment of this water, etc.

and start to shine as if throwing impulses at it

Well some completely external ones

even though the resurrection took place a long time ago, yes

external impulses coming from external objects

after all, he accepted this World

he is for him

this means he can give the impulse back

i.e. you can enter

to the primary point of its organization

say that measures have been taken

that's when he didn't give the impulse to Infinity

Now let him give it back

let him show his place

if he gives you this impulse

there are no problems, in fact, everything is not that difficult

but technologically it just looks like that

i.e. it looks like this

if possible without thinking there

there's nothing to ask for

he may not even see you working

but at least consider it

how the impulse is reflected from it

and here due to the reflection of the impulse

in an external system

the external environment begins to emerge

further we can determine

place city there road or something

and define literally take on the map

if there is a desire

but the principle of approaching by map

sometimes violates

as if the principle of freedom yes human movement

so there are restrictions again

if it does not violate

you can find it later and on the map too

and it turns out that the main thing here is
this is the process of agreement in action

and by the way it means in my opinion here
if we look at management in this way
what do we need well maybe express control technologically

it is precisely the general agreement there, yes
some kind of universal agreement
This is such a very important element
to speed up some super-fast level there
meetings with the resurrected

and by the way, there are already factual works
for example, here is Nadezhda Kosikhina
published the book "The Factology of Resurrection"
here are the cases of meetings
there is a performance by, I think, two resurrected people

and here in principle
you can analyze and see
what are the internal nuances

and that means the book by Nadezhda Andreevna Ilizova
"On the technology of meeting with the resurrected"
they are shown there
Elements of Spiritual Administration
elements of implementation at the physical level

and in general it is advisable to practice of course in my opinion
try to popularize it somehow
For example there also publish in the form of books and brochures
try to write some work reports as much as possible

for my part
I will conduct an analysis of all processes
in order for example there in my program
President of Russia since 2008
to identify precisely technological cycles
as system cycles
where the technologies will be presented

at the level that they should be implemented systematically
in institutes
in special ministries and institutions there

Well in such ordinary social
who will deal with this task simply systematically

not in the form of one-off events
but scientifically systematically
therefore by that time it is desirable
in general it is always desirable to do this this experience
to implement in the form of some publications

In my opinion

this can be done in the fund
so it can be done in principle in any other place
as long as it's popular
then it will be much easier for everyone
meet the resurrected

This is where I end today's seminar.

Thank you very much for your attention
