

GRIGORY GRABOVOY
The Teaching about God
Eternal body in the Soul of man
18.12.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Eternal body in the Soul of man

in this topic i show
that the technology, generally speaking, of constructing the Eternal body
is contained in the Eternity of the Soul of man

and just as God built His Body
initially creating as if previous information
then here the technology is actually the same
that God who created all Reality is as if
at a single level of management, so to speak Yes
where is physical matter
informational, so to speak, matter
from a human point of view
this is still a single level of control for God

then going for example at the opposite level
to the Perception of God
you can see that the Soul of a person
actually contains all of Eternity's technology
because the Soul is the Action of God
by the level of creation of Eternal Reality

and in connection with this
thus considering the Soul of man
we can quite see
that the technology is precisely the organization of the Eternal body
contained in that
so that in principle the human body itself
perceived the action of the Soul
while doing so as if in real time

i.e. if in some periods
a person, for example, interacts
with external Reality
and it works periodically

from the point of view of Perception of your Soul

then in this technology it is necessary first of all
consider the Soul as a kind of beacon here
which is located right in front of the person
in terms of action

although the real Soul is in a person, for example
or in some area of management
in general, even at an infinite distance from man

and here it is simply necessary
concentrate attention like that
or there is a concentration of one's life
or there, generally speaking, life can even be external
is some kind of plant there

just make the concept of "life" so active
this concentration
that the Perception of knowledge is here
well, exactly that knowledge of Eternity, so to speak
structures of the construction of the Soul
essence of the construction of the Soul
exactly that level
which comes from the Soul itself
so that all these phenomena, so to speak, they were like this
that a person in real time
I would be able to understand the language of the Soul

i.e. he must see
what does the Soul of himself do
this means that this is, in general, synchronized knowledge

i.e. the body in real time
perceives the glow in the same way
as if here are the parameters yes
The infinities of the Soul's action would be recognizable
as if it were an elementary action

Well for example, a person with the help of a physical body
or there it means perceives with the physical body
some elements of Reality in time intervals
i.e. some text is read there for some time
and is remembered, etc.
i.e. there are some speed characteristics of action

from the point of view of the action of the Soul
actions are generally infinite and local

i.e. in manifestation it means Well as if
in the optical expression of the dynamics of the Soul

there are finite actions
i.e. a person can perceive this action

and at the same time in this action
the Essence of the Soul is manifested
this is the Infinite quantity and the Eternal quantity
for the person himself

i.e. the Soul is most understandable to man
i.e. his own Soul

and therefore how to understand the technology
only by synchronizing with the Soul
quite simple

for this you need, well, actually
exactly as if the level of such action
where the velocities have a certain value
speed of human perception
synchronize
with Infinite Speed of Soul
knowing that the Soul is a manifestation of God

i.e. the Soul was created by God
in principle the matter of the Soul
this is what God touched from the very beginning

and therefore the transmission link
i.e. this is the contact trail
it is visible quite transparently
as soon as you start
develop this technology
in application to the Eternity of the body

then it turns out that in principle, well there
in general, even to the Eternity of the event
in the selection means some nodal point of the event

i.e. if in the event
well and what about the event you need
where the purpose of management is perfectly manifested

for example, you make the event Eternal
then the event still happens

here your personal motive is immediately visible
why did god create man completely free
that as soon as a person by his action
organizes the property of Eternity
some central element of the event

then he doesn't react , for example
or there does not contribute to the realization of Eternity
for there unfavorable events

it turns out that this event is acquiring
comparable property
with human action
with his Thinking ^{yes}
and then it is realized

but of course not at some indefinite time
but simply the property of Eternity often moves events forward
generally at the exact time of implementation
literally up to the hour of the second ^{there} and so on.

and that's why it turns out
that Eternity is ^{generally speaking} an exact quantity
at the measured time level

and here it turns out that the same thing
measured coordinate ^{there}
speed of perception of information ^{there} by sight by hearing ^{yes}
some levels of feelings
for a person this value is a manifestation of Eternity
by analogy simply

and from here it turns out quite simple for us
take and examine, as it were, fragments of actual management
creating ^{something like} an hourglass
some kind of nozzle where
where in the narrowing element
on the one hand the final action
on the other hand Infinite

it means that the person himself is visible in the narrowing
i.e. a person is essentially a transition between these values

but then it turns out

the other value is again the man himself

i.e. this is the nozzle
which is like a part of this cone
whichever is closer to a person is again the person himself

and here it turns out
a person begins to move towards himself
he begins to develop himself

God did the same in his time
He created the indestructible Eternal system
because He came to Himself in fact

Well, they say that there is a path to oneself
this is a certain level of reserve knowledge of management, etc.
at this level it is visible technologically
directly in the geometric figures of specific

and when we look for example
this cone is like from the inside, yes
i.e. our knowledge allows us not only to see the cone there
increasing level of human strength
but also to see what's inside
the inner wall of the cone

then as soon as we get inside
we see infinity
we perceive it physically, as if with vision

i.e. the vision of Thinking or the vision of Spirituality
becomes the same as physical vision
it's like a person is looking at
well, to the sky with physical vision

then it's clear
why is the outer world created by the Infinite
logically clear
it cannot be otherwise configured as such
in terms of the creation of Eternity
bodies
Souls
Peace in general

Then

and then the external system of the World
it is almost also clear that it is Infinite
i.e. it means Eternal
Infinity as a characteristic of Eternity

and from here it is clear
that there are no options there, for example, concentration
some unnecessary collapses there, etc.
Well, there are some physical concepts there
there are no "collapses of matter" physical
on some remote version
but they exist only as theoretical models
and prove that this collapse is real
not a faction of Light but a physical collapse

this can only be done by speculative methods

Well let's assume if we consider
if we assume there is an option there like this
if increasing gravity to that level
that there is a powerful compression of matter
but then it turns out
we can control this phenomenon
because we know
that on the other hand, in principle, it is all the same matter itself
at any compression

and it turns out that we come
as if to the Divine meaning of any phenomenon
then we begin to learn here
this is the level of maximum concentration
what does it mean from the point of view of that
that each element of Reality has some information

and we see here
universal transition level
that for example the Soul of a person for a person yes correspondence
what is analogy or similarity
Well there for stone wood molecules

and we begin to see a universal language of some kind Yes
i.e. we begin to understand the phenomena of Reality
because God understands everything at once

i.e. we move, as it were, into the field of activity
Where from a human point of view
this is how God perceives it

i.e. a person begins with his Perception
actually working according to this method
organize in fact Perception is the same as God's

but when you well in this case the only difference is that
that for a person it is a fragment of Perception
i.e. a person can see a specific fragment
God sees everything at once

how to understand this part
and move on to understanding the simultaneity of vision yes
and the Actions of God

the same model works here
but it is also close to a cone

but here it is already closer to the level of nested systems
like some kind of matryoshka doll there
i.e. many cones
but working on the same principle

then it is clear why the human body
there it is rigid and fixed
Well, why, for example, if you ask the question
that's why there are phenomena of Reality of this type
what is unfixed there is wind
some kind of discrete phenomena, yes
air means some kind of gaseous environment

are there rigid systems there, for example, the human body

here it turns out
that this is precisely the fixation, as it were, in a rigid version
this is that that as if the light optics, so to speak, of the Soul of man
there's this bright silver light over there
which God sees
through human vision human physical vision means
this is that
what is visible first of all
God sees
and a person often observes it himself
how he builds the World with Consciousness

Well for example in the logic of Thinking
a person is doing some project

and this project is being implemented in the form of a building

i.e. a person thinks that he has thought through some idea
and built a building or some kind of object , a material plane, etc.

so when he thinks about it
he comes into contact with God

Well there are some creative ideas there
and the field of revealing contact with God
this is the field where

This is where a person first encounters
with the Eternity of Soul and body in the Perception of God

i.e. God perceives the Soul and the body simultaneously
and at the same time Eternal

i.e. He perceives as He perceives Himself

and when you start to see
what is the path of Perception of God

i.e. God perceives Himself He becomes like this

then here it turns out that a person also becomes like that

i.e. Eternal and human

when he comes up with the next creative idea by analogy
sees in an inseparable connection
between action and control

i.e. well , by creation

For example there is the creation of the aircraft yes
must be controlled by Consciousness
at all levels of development yes
or any element of Reality

i.e. this is the development of the controlling clairvoyance there
development of actually Spiritual levels of creation there

and it turns out that here he comes then

as if in a strict configuration of the Soul

which was created by analogy in general

well to that situation

or generally speaking by analogy to the action of the Soul of God

and by and large this is generally speaking of course

exact analogy of the Soul of God

but it has a level

there is even a term for it here

not the consequences but the level means as if local comparison

i.e. just like a person
from the point of view of your body
perceives the Soul in optical expression
God also perceives the Soul of man

and it turns out that based on this
here the field of events is formed quite simply
at least it's logically clear
does it mean then for that
Means well, it's a factor of development towards Eternity, yes
for God in human understanding was manifested
He must do so.
to examine the human body at the Eternal level

because the Eternal Soul gives the Eternal development of the body
and here, in general, by analogy
Well as if not even some kind of reverse analogy
and even in general not directly analogous
but here is the line of self-direction of Thinking
shows that this is the simplest option for action
in that logically it is even understandable

that the Eternal body of man
this is a certain level of God's development

and in an intuitive, as it were, personal understanding
it turns out that this is what a person strives for
from the point of view of knowledge of the Eternity of the Soul
and therefore simply the Eternal development of one's own
for God it is the Eternal body of man

i.e. God strives to know
The Eternal Body of Man
but knowledge
or create there yes actually
but already from a human point of view

this is where we come in
to the level of creation of physical matter in general
as such

because as soon as we cross over
from a human point of view
a person must then realize there is a platform there
Earth, air, etc., there are foodstuffs

and then it turns out that in principle this is it

Well, a person really can live forever

For example without eating there

and using only the generations of one's own Soul there

but for this he must

so that it would be a system level

he must then teach everyone

i.e. the analogy is clear

when the platform is the same for everyone

and the action is one, the impulse is one

if the impulse dissipates someone has not learned

until it is concentrated

we do not achieve concentration of information exchange

Souls and bodies

i.e. the same type and level

there are only the speeds of information exchange processes

and here there should be the same ones

but this effect can be achieved

generally speaking inside a human cell

i.e. it is not necessary to wait there for a long time often

while everyone is studying

can these elements be used already

but for this you just need to

to enter, as it were, into the information of a human cell

consider high speed movements

there for example, an atomic nucleus

Well, if the person there doesn't know physics

or, for example, let's consider this situation

what we don't consider

concepts known generally speaking in physics

a person has personal vision only there

and he thinks that somehow this situation needs to be resolved

while everyone is getting an education

while everyone is getting organized

still needed

somehow use this mechanism

to apply there practically yes

with benefit for everyone

and by the way, this is a powerful level of Macrosalvation
because if one person
in an autonomous system
will do as God does
then he gives knowledge to everyone, generally speaking
as if it were his personal breakthrough

here it turns out what is the login to the control system
i.e., internal, as it were, localization of action
it is a passage through human skin
with your Thinking

i.e. Thinking should be like this
as if there was this substance
i.e. well, a person rubs cream or water into the skin, yes
is the water filtered or is there some kind of cream?
closer it is like viscous water, so to speak
it rubs in then Well there in the skin, let's say, of a person's hands
and then it turns out what happens as soon as
there is mechanical rubbing
we see that man is capable
to enter by some action
inside your own system
what is located as if under the skin yes

so either he is capable of eating something there, for example, inside
place some information object inside
which one well it's good for your health there

it seems to satisfy the conditions
his eternal residence there, etc.

and that's when we see this ability
we understand why then
People eat in principle yes

system of interaction with the external world
according to this technology
with elements of the external environment

i.e. the speed of the entire Infinite World
he makes it adapt to himself

i.e. in this case
he gets what it means by eating some food
it just balances the speed of interaction

and if a person learns to balance this
by means of your Consciousness
he doesn't necessarily get to eat then
or at least ^{there}
already a man which is in society
where not everyone is trained in this yet
but at least it is already possible to minimize ^{yes}
^{for example} food if he wants of course
Human

but there is one criterion
until everyone learns
It turns out that you still need to eat

and here we ^{gradually} get into that
what's inside the human body inside the human body
a person actually finds himself in an autonomous system
just like God who created the world
It is inside the World
which is actually perceived as His Body
human
including as Body Action ^{yes}
then the consequence of the Body

but on condition that even
what is the Physical Body of the One God
internal system and external
are perceived as His Action after all
i.e. as if a continuation of the Body in terms of development ^{there}
and as if some kind of volitional action or ^{intellectual}
from a human point of view

some manifestation of the next intelligence

i.e. a person believes that God ^{is like Well} I thought ^{there}
showed intelligence and something came into being

although for God
what Perception
what is intelligence
what Action
it's basically the same thing anyway
He gives birth to another phenomenon from one

it turns out that by analogy with this
a person is basically within himself

can always cope with any task
which is inside ^{yes}
inside the physical body

and based on this
here is the simplest management model
the physical body is in that place
where is the human soul

even and not the other way around
i.e. we do not move the Soul, ^{yes}
as if we push it inside the body
and ^{how would} we configure it?
in the control space
position of the physical body

and then it turns out that the absolute coordinate
well, in which the Soul is originally located
she remains like that
but we take it ^{as if} by concentration of attention
keep the body at this point

and when we reach
Well like synchronization ^{yes}
in the field of optical control parameters
then such an Infinite ^{Light} appears
it begins to envelop the body
the body begins to glow ^{there in a certain way}
there ^{as if to implement} ^{yes}

and this is often visible
you can even see it there at dusk
^{for example} or during active work
This can be perceived with physical vision

and here is this element
when God perceives through physical sight
human

Means Well ^{as if it} gives exactly the answer
why did god create physical vision

because ^{it's like} the outside world
as a transition system
to compensate for the Infinite External Information
and the internal system
this is the first level of God's Eternity

in the implementation of a kind of universal action

and it turns out that based on this
here it is quite simply and clearly shown
the system means the following

what if for example we take the length of the path of light there
from some distant tree
in general, an object of some Reality
any, and you don't even need to configure the object
or to represent it

so the light goes into the human eye yes
Well, let's fix a few points
and we look
how a person perceives
did he first dot the first point
in fact, he seems to perceive both at the same time
from a human point of view

and it turns out that
i.e. a person does not excrete
that first perceives the first element of light the second
for him everything seems to exist in real time

i.e. in a person's physical vision
an element of adaptation is included
Infinite or decomposed information
as if into a single whole yes
into one seemingly static picture of Perception

because in principle
God could have given such control
that a person would simply manage and be aware of everything
but He also created physical vision

and it turns out that this is exactly it
transition level
this is where the Soul is actually, namely the Soul of a person
learns to show the body its Eternal path of development

i.e. in general the Soul actually always has knowledge
but here is the concept of "training the Soul"
it's like an adaptation of the Soul and the body

i.e. the body as a part of the human Soul
physical body

Well, it's kind of logically clear
but from the point of view of the sensory
or there is a management level
where it goes into the mechanism and into the control system

here we can say that in reality
as if from the point of view of this technology
where we consider
it is the Eternal body in the Soul of man
or there in the system means the Perception of the Soul of a person
we see that here in fact
no differences as if between the Soul and the body
from God's point of view
this is exactly the difference in transition
physical level non-physical
from God's point of view there is no here

here there is only the implementation of the event
which is done for example
or by the action of the Soul and direct control

i.e. you can take and cure remotely
it is not necessary to prescribe any drug to someone there, yes
then this is the action of the Soul
but the result is still there
or diagnose the system there
in one word Spiritual action
in my, precisely in the practice of my Teaching
it's just a personal action in essence
where there can be action in principle and the physical body

but what will save the plane there?
or a person came up there and tightened some nut
well, relatively speaking
or he did a diagnostic
from the point of view of Eternal development
where development is creation
i.e. creative development in the Infinite future

for God, in principle, there is no difference
from the point of view of the logic of development of events

not like God
from the point of view of personal manifestation there

in the form of a human ^{yes}
but just in an abstract sense
from the point of view of the general logic of Eternal development

then it turns out that if so
then God has a level of Perception
where there is only Action
i.e. there is none at all, in fact there is not even any
level of the formed matter as such

and that's when at that moment
a man enters he sees
that the formation of precisely the material level
those. formation of matter
this actually ^{means striving} for the Eternity of God
i.e. in fact, as in a person it is very similar
it's ^{actually} quite far but similar
in certain aspects

this is God's striving for Himself

i.e. it turns out that here
that this is precisely ^{the} human desire
God to Himself
creates physical matter in the human understanding

and here it arises
a very important aspect of today's lecture
that it is human after all

i.e. man is born and created
from the task of God ^{as if} Self-knowledge ^{and} the following development
i.e. God has personal tasks for just a ^{person}

i.e. a person is still an objective being
^{Well, from a certain position,} ^{maybe} Reality
which ^{means} it functions on the principle of ^{this}

that's when God strives for Himself
man is created
i.e. the first element of the creation of the human Soul
comes not only from the local creation of the Soul
and then ^{the} Soul is introduced into the body, ^{so to speak} Yes

it's not such a process in essence in reality

this is the process of creating the World
where the body and the soul exist generally speaking simultaneously
together with the whole world
from God's point of view

then God enters the space of calm control
and then Eternity is a stable management
i.e. when a person realizes
that such space exists
he realizes Eternity
as a stable phase of management

then there are no problems at all
at this moment he definitely doesn't have any illnesses
i.e. this is an important control element
i.e. as soon as he achieves this control
he enters the Norma phase
and here arises
as if **defined**, strictly speaking what is it **configuration**
well, maybe **capture this state**

i.e. you need to be able to achieve this state
translate logic into Consciousness
then this Reality is really there
that he has no diseases
it goes into the fact that he, for example, is healed

i.e. here when he is there
he really doesn't have one
i.e. but it is as if in a dynamic level
where is the Soul and the body
these are generally inseparable concepts
it's like one thing
from God's point of view it's like just information
which is manifested by both body and Soul

and here is the transition to logic
i.e. creation of time
the main thing here is to hold the time line
i.e. so that the timeline does not somehow affect this state

If this succeeds, the person recovers.
to make it happen
you just have to practice
entering this space

or if you enter into this point of view
then the resurrected person is just as alive
line for example there is biological death
it is completely excluded
i.e. death as such does not exist in this case in this understanding

therefore God is Eternal
that He does not introduce this understanding at all
into the subject of His Action

and for a person
He ^{kind of} shows that he should be a person in general.
bring the Perception system out of this level

i.e. for example, a person has some system of concepts, yes
Well so how to make it so that every person
so he knew and understood
that yes, resurrection is a mandatory value ^{there}
all of them
what ^{is there} Eternal life
this is ^{so as if} the necessary minimum in general
for the system of knowledge

i.e. in this case Eternal life
this is , generally ^{speaking}, a minimal system
which allows at least something to be real there
in life configure ^{there} understand

and ^{from} God's point of view it is so
if God considers ^{for example}
the process of some Reality ^{yes}
and the processes are Infinite
He can perceive the process.
only if He has the function of Eternity
^{as if well}, fully realize ^{yes}
and it's ^{like} taking control completely

i.e. the real position of the whole World is Eternal development

the Soul is structured in the same way
why is she Eternal
because it is simply a canonical reflection of the World
and vice versa
from the Soul the World is built this way

only in this case is it possible

in general, everything that exists, so to speak

otherwise
the molecules would start to collapse
and actually what would we be talking about then?

because only through knowledge
control is carried out

and in fact therefore exercise control there
as if in continuous time it is not difficult

that's what I came to
what to look at in dynamic level
for the development of the Soul
those. synchronization
speeds of perception
and the dynamics of the development of the Soul
it's not a complicated process
because the world is like that

i.e. for this it is enough to simply stand there rigidly , let's say
to the position of the Norm of this World
that the world is like this

as soon as we fix it there Well For example there with feet yes
take this position firmly
then we all begin to perceive
the first signs of the organization of the Soul
from the point of view of her Eternity

for example, what does what we watch give us?
that there is a line of development of the Soul
what does it give there for Eternity for example there is a right hand
specific question yes

then we start watching
how is the distribution of the glow going yes
how the lines bend there at the entrance
for example to the right
where does the information go in general
organizing right hand

from the point of view
how is it anyway For example there the Soul organizes the right hand

that there is a glow going through her left leg
actually really through the left leg

that means and I'm just saying
that there are specific mechanisms here, for example
which allow a person to understand in principle

how does the human soul
interacts for example
Well as if with its own Infinite essence

i.e. in this case here we see such a level
what is the Soul of man
interacts for example
with a certain essence, I guess
in the Infinite World thus
that here we are considering management processes
For example well, in some forms yes means manifestations of the body
there with sound forms

we can work for example
through let's assume the level there of Infinite development
and see that if we control the sound form
then the sound form can be completely different yes
i.e. she can acquire
timbre for example external control level

i.e. if you control the Soul
then the Soul can in principle give
for example the level of Infinite development
through sound yes
for example, the sound is Infinite, it is discrete

i.e. let's give it a voice there
sound of Infinite development
it has discreteness functions

for example if we listen to Eternity
then Eternity cannot be perceived immediately

i.e. the voice must create
discrete control functions
i.e. it should be for example there vibrating
or must create a sound form

such as there are birds transmitting a signal
over a very long distance there are kilometers, tens of kilometers

because they are just for the sake of it
the level of discreteness is taken and caught here
and through a discrete transition
they get there

i.e. high-speed interaction systems
in this world
they are not always actually like in the laws of physics

one bird can transmit a signal over tens of kilometers
only because she perceives Eternity
and enters the discrete phase of this World

and it turns out that the signal that is here
instantly
like this: at first one bird flies somewhere there
then she shows the way as if
also bees by the way
through vibration sound discrete yes
shows the way in general
and make migrations very large

because there is a certain intelligence officer
which shows the way
but they don't have any kind of communication system Yes
but they have audio communication
which with a small click there
or by imparting vibration there
For example there is a mantra principle there yes
voice makes vibration discrete control functions

and it turns out that when you start
do management
through let's assume already the action of the Soul yes
there are voice functions
functions there actions of the physical body
they become more intimate
as if it were natural there or what about natural levels?
more discrete control systems

and here it turns out that you can see
how can you
for example, to influence the situation as if the opposite is true
i.e. means to synchronize
the speed of your Thinking
the speed of action there

or conversation
due to the fact that ^{well} so it has some influence there
to give to the sound of speech ^{there}

or vice versa
prolonged system
give some word ^{there} and introduce it into the concept

as the song goes, for ^{example}
which has the structure of Eternity
simply by Thinking
for example , you can enter the glow of Eternity into the phrase

in the usual in the final phrase
then you get prolonged Perception
others have
i.e. the speech ^{seems to} drag on
more than on a physical level

it turns out to be a different accent
it goes to the vocal cords
and it turns out the vocal cords start working
well, ^{actually} , it's long, ^{yes}
they hit a specific note

i.e. it is a feedback rigid connection
information and the human body rigid communication system

and it turns out exactly the same as I just showed
control system
through a discrete ^{system} of transformation
Well let's assume ^{yes} by speech
or putting meaning into management ^{there}
we get what we can compensate
i.e. having just a normal level of speech
we can put it into speech
and discrete meaning
and receive a return signal
as if putting an Infinite meaning
as if putting information into it

this is how we form
the first system, ^{for example}, of the human physical body
i.e. let's assume the skin
system of docking different systems
where for the Soul of man this is an Infinite action

here the Soul has performed an Infinite action
where does this impulse go ^{yes}
where does it even end
and how is this impulse expressed, generally speaking?

i.e. where are the boundary conditions in general?
actions of the Soul
Infinite action of the Soul
here's a question if you ask

then it is clear that for this
need a system of Perception of the action of the Soul
as if in the Infinitely Remote Region

Human organs are created for this work
as soon as we consider
actions of the Soul in Infinity
we see that an organ is being created

i.e. the Soul creates an organ practically by that
that she constantly tries to work endlessly
from the point of view of the person himself
so by the way and the organ ^{and the created organ}
so and so that she, ^{for example,} transmits knowledge there

from this point of view
God does ^{what means Well,} not directly, ^{let's say} exactly that
but on the other hand
He creates Eternal development for the Eternal organ

and it turns out that this organ, ^{for example, yes}
with Eternal development
configures Light into the human physical body

i.e. take any organ
any human cell
just put it in the absolute information field, ^{for example}
and just ask a simple task
let the cell develop forever

this means the cell starts to tighten
all space in the human body

and thus we get inside the cell ^{yes}
based on logical action

i.e. this is exactly what I was talking about earlier
we get into the autonomous intracellular system
which contains
all functions of Infinite Control
i.e. the cell as an Infinite quantity

and then we begin to see very clearly
that here, *for example*, the same properties of information distribution exist
but they only concern the border areas of the cell

i.e. if we get there with Consciousness
inside the cell
then here's the transition, *well as if* in the Infinite phase
this is the next cell

for the cell *as if Well*, the whole world exists inside her
but at the same time the transition is simply to that cell
which generally touches *yes*
with this first cell
this is actually the Action of God

those. the cell recognizes the Action of God
in any neighboring human cell
but inside a person

and when it is skin skin cover *yes*
transition to the outside world
then there is already the action of the external world, *as it were*
some discrete break *and* here is the vibration of speech

when vibration
we connect external and internal parameters
speech being delivered
and vibration *as if*

it turns out that here we have
very simple postulate, *so to speak*
from the cell's point of view
the next cell is the manifestation of Eternity

by analogy, from a human point of view
That what comes into contact with a person
this is a manifestation of Eternity

Well as if Thinking there from the cell yes
towards the physical body

and here it turns out
what if we start thinking further
then from the point of view of a person then already
but being at the same time at the level of cellular Perception
naturally God is Eternal

i.e. from the point of view of the basic level of Consciousness
man understands that God is Eternal
because that's how Thinking works

and when he understands he already sees
the way of God in personal human manifestation

then there is God in the person of man
it's very easy to show knowledge
enough, and human knowledge
then they become like knowledge
transmitted in reality without distortion

there by God
and from person to person

and it turns out that here we see
next status of Soul organization

The soul perceives itself as a person as a whole
if we take a fragment of Consciousness
then Consciousness is still a dynamic quantity
and Consciousness is always an element of action
it's like a kind of working tool
which is configured and distributed there

and if we consider it from a philosophical point of view
that Consciousness is all there is yes
then there is a personality inside
but it is always a quantity
it means either she is more than a person
The consciousness of the entire civilization of the whole world is there

or it corresponds to the personality of this value

but the Soul is such a point
where the Soul perceives itself as a person
i.e. she does not separate herself from the person himself, well as such yes

and it turns out that when she ^{says herself} as such
does not separate from a person
then there is such a term
for example "as such" "as such in general in the World" ^{yes}
not an external phenomenon or "as such" i.e. itself

i.e. it turns out that we
even the concepts here ^{seem to} stick together a bit
talking about the same thing
And
i.e. the outside world
or is there a personal level?
are beginning to unite into a management structure
where does it turn out that it is here
the body ^{and} the physical and the Soul are one and the same
in Human Perception

here we finally find this point
where ^{does} the Soul reside?
in the physical body of a person at the moment
^{Means Well,} the Soul is always ^{like that}
in the physical ^{yes} is considered the human body
but here we mean we just see it

at the expense of the external faction of Consciousness
yes, the Soul ^{is there,} it is calmly in the body
specifically matches the shape of the human body
and then ^{it means} the mechanism of the Eternity of the Soul
we begin to know through the action of the body

for example, as the Physical Body of the One God
so where is the concept of "Soul" and "body"
often not ^{generally} separated even in Perception
there is ^{any,} even an object of information
not to mention ^{that a person}
in principle, it does not distribute them here at all
in the form of some kind of ^{external} difference

then it turns out that we already have
mechanism of knowledge of the Soul
through the action of the physical body of a person
For example there is a hand movement there is a man drinking a glass of water
Somehow the water moves ^{there, yes}
according to some laws of gravity
or due to the contraction of muscles ^{there , etc.}

it turns out that we are starting
distribute the following system

Well for example, a person is in zero gravity
so he still drinks the same water
water is the same, the distribution of information is still different
how would something change
you just took the gravitational constant there and removed it

but this is a reflection of the whole World
there for example there is no big Earth there
this means that a large amount of control can be removed, as it were
at the same time, a person remains a person
the first principle of absoluteness of actions
and human existence

if you take away one after another
Well there are some Macro-regions of information there, yes
then only God and man remain

i.e. God is actually here next to man
and man is as close to God as possible

but then the following question arises:
You can either come up with it or put it there

and what's left then anyway?
between God and man
further

so here is where the Soul is visible
in its purest form, so to speak

and it turns out that the physical body of a person
it is a collection of all manifestations of the World
where everything is separated as if Yes
and a person, in principle, perceives everything this way
as an autonomous quantity, so to speak

i.e. the physical body is he, yes, among other things
or exclusively he
but this is a completely correct perception
the physical body is one
in Perception in the awareness of personality
only myself

i.e. the physical body as a kind of concentrator

and then the transition, i.e. training the body

it kind of reminds me of some kind of exercise machine by the way

what is body training

direct information from God

it's just the right surface line

i.e. the Soul must simply

linearly correctly transfer knowledge

then it's clear why she has all the knowledge

and practically does not change at all

because it's just some kind of

Well It's like you can't even say that it's like a channel

but some means of transmission

some form which generally speaking

because this is still a personal aspect

I still came here to this management position

that the Soul perceives itself as a personality

i.e. it is impossible to say

that this is some kind of purely mechanical system

some kind of simple bridge and that's all

through which information flows

not really

this is a completely independent level

therefore in management

the body and the Soul are separated in general

and it turns out

that when we want to do Macro Management there

quickly stop the explosion at the nuclear power plant there yes

so that there is no accident, etc.

the Light of the Soul is simply taken from everything

The Light of the Soul is clearly revealed

human body

Soul

God means

is taken and projected there rigidly
instead of a possible accident
but specifically from the Soul faction
The Eternal Soul does not allow an accident to happen
because there is no concept of "destruction" at all , etc.

i.e. we start but then
but then we can work through one cell in general
I showed you what the difference is
as soon as we enter the cellular control structure
the cell can
we just need to consider
development of impulse from one level
from one cell to another

and by analogy we get
what is the intercellular space
this is the structure of Eternity
i.e. the same way as the Soul is organized
you just need to shine the Space as if between the cells
if they are nearby
so just like logically understand
what exists
some kind of information transmission line
from one cell to another and that's it

this Light gives Eternity
i.e. it is possible to stop an accident with one cell
or make sure that there is no explosion at the nuclear power plant
i.e. one cell is stronger
than all the nuclear power plants put together

and it turns out that then we are kind of calm
how can we have one cell there
so that it wouldn't be there in the Infinite amount of time
nuclear power plant explosions
and eventually they were transformed there
Well, in the energy that does not threaten a person, yes
there you can take and put all the controls on one cell

theoretically we can
then take another cell
and tell all the vegetation there to flourish, etc.
but why another cell at all
we take in the same cell we put the same information

i.e. the cell has
An infinite amount of archiving information

and from here we begin to understand
it turns out that the Soul is arranged
by the same properties and characteristics

why is it logically clear
The soul is ^{like} a consequence
direct contact with God
and for God any level of information is Infinite

you can put any amount of information there
here God comes to Himself again
at any point of its action
and sees Himself fully manifested ^{yes}

then it's completely clear
why should man be Eternal
in natural life
i.e. in natural conditions ^{there}
in principle, in any actual conditions

because any conditions
this is a reflection of the Reality of the exact Reality

and then God receives full information about the World ^{yes}
Well, God doesn't have any problems at all
He still knows everything [...]

and it would seem why would He need it
^{there it} is exactly like that, the question is not asked here
that he receives it ^{as if} for himself
He should get it, generally speaking, for a person

because with his reflection he gives knowledge then ^{yes}
human knowledge

i.e. He projects onto Himself
Reverse Light is given to man
a person begins to understand Him
God
how to live forever

and it turns out that this is a mutual exchange

it's essentially more
exchange between man and man
than there is an exchange between God and man

that's why they say that first there
a person tries to decide on his own
and turns to God

that's why people are growing
what does human interaction mean Yes
this is actually their own education
in Infinite Development

and then it's completely clear
that the general resurrection
it's like in general, again, as if
even the minimum required criterion
in order for education to be complete
we can't just leave someone somewhere there

and it turns out that then this is what
we will not lose any information
i.e. let us come to God fully
Well there forever alive yes there forever living means

and it turns out that, as if based on this criterion
when well we are not there
Well, first of all, people shouldn't die according to my Teachings.
and here it is clear why they should not even die
it's even logically clear
everyone must be resurrected, etc.

it is clear that then there should be favorable events
then already
because God did not create destruction
He perceives it as if
from a human point of view
He seems to perceive it as if for Himself
but in fact He perceives again

in order to project onto a person
i.e. here is the principle of inverse
almost instantaneous projection

the Soul is also arranged in Infinite action
i.e. all the information that the Soul perceives
in huge quantities as if Yes

as a kind of phenomenon
it gives back almost instantly

and it turns out that then
all events in principle are for the Soul
they are initially favorable

i.e. God actually created all people
favorably developing
i.e. it's normal there, no diseases, etc.

and just when a person
this return signal as if from Infinity already
i.e. Infinity is coming towards him
then comes the reverse exit

when here is the return signal
he doesn't differentiate very precisely
then it turns out that distortion begins here
he is like his True Divine
Well, it is precisely the path appointed by God
seem to be very considerate
and a problem arises, like some kind of illness
some situations, etc.

and here arise well there are internal ones
these are purely personal situations of a person
this is generally a search and finding of the path
which God showed him

so, by analogy with that
how the human Soul works
the human physical body is elementary
through simple self-awareness
creates a system of Perception within

a person perceives a hand there
there is some action going on
makes some kind of movement and develops
there is a constant exchange of control systems
but already as if by local systems

i.e. any human action
aimed specifically at Eternal Life

and when we have this, well, some kind of quintessence there

some system in principle of the cumulative action
we consider as
the system of interaction between the Soul and the body
in terms of the body being constantly aware
how the Soul works
and constantly because of this becomes Eternal
just because of this

then any events
can in principle be solved
or instantly ^{for the better}
or just be there constantly
at the level of confident, ^{smooth}, clear management

i.e. as soon as a person begins to realize this
i.e. to see
how the Soul transmits knowledge to the body
and the body becomes Eternal

This is where I end today's seminar.

Thank you very much for your attention
