

GRIGORY GRABOVOY
The Teaching about God
Health of Eternal Life
14.06.2005

Hello
the topic of my seminar today
this is my Teaching about God
Health of Eternal Life

in this topic i show
how can we do management
in Eternal development
taking into account what the health resource should also be

i.e. when we talk about Eternal Life
naturally we are talking about that
that the person who is considering
this position is objectively real
he must consider
and that he meets with that information accordingly
which confirms that life is Eternal

i.e. it includes resurrection technologies
from the presence of this manager
and technologies for providing resources in his own life

i.e. the health of such a person must contain
as a component of the resurrection control condition
which also requires a certain amount of management resources
and also ensuring the task of Eternal development

i.e. a person who encounters a certain situation
when implementing these technologies
he must have the appropriate
a certain kind of, so to speak, type of health

so here it turns out
what I would like to show is the management related to that
that everyone who is engaged
namely the technologies of Eternal development
and is found almost
with situations well for example, the resurrection of people
with the tasks of introducing information of such management
into the social environment

he must provide in a certain way

self-management
for the health of others
and accordingly actually provide social
including, by the way, political health, etc.

and therefore here the first level of management
is first of all the level of tasks
which occurs in a person
when he perceives such information

i.e. I just divided the level of such a plan
what we see as a task, for example, Eternal development
this is still the task of real Eternity

and in real Eternity there the spectrum is more complete ^{yes}
so it turns out we should consider
First of all, the resource that is located
in the Soul of every person

i.e. the Soul of every person has such a resource

then you need to see the signal
which comes from your Consciousness
into the structure of the active Soul

this is where it's important to see
a certain optical combination
actions of the Soul and Spirit

by the way it is perceived very simply
as often happens in the usual variant
here the man saw something
and on his Perception there is an impulse in the form of a light impulse
which ^{seems to} touch the body at a certain level

here it is important to see such a Perception in management
when you consider
still a touch of information
but you perceive that the information concerns the body

this is the first level
when the structure of Eternal health ^{actually} touches you

By the way, it's not difficult to learn this

for example, a person reads a book
and so he just kind of glances at some object
for example, there is a person in the kitchen

and then he casts a glance somewhere

such a practical example
and then the impulse that touches his body
as if by the way
this impulse from the structure of Eternal development is precisely

because when we already know how
here is this impulse to highlight
then it turns out that the resource level of health
it is inserted as if in fact, in everyday life, so to speak, the level of action

and so when we extend the action
let's say to Infinity
then it would be better to do it now
when I show exactly this kind of control
now try to recognize this level

because the structure of Eternity
this is still just information, among other things
and the ability to recognize this particular control system
this is a control action
This is a fairly special control characteristic.
and it's better to do this constantly for some time

i.e. for the current seminar
It would be desirable that after the seminar
management has been evolving almost all the time
Well for example , there all day, so to speak
and periodically as often as possible
to return to such management

based on the logic of this control
we are looking at the development structure
it is precisely the Eternal plan in this way
what if we consider the level
when a person first perceived himself, so to speak

that is, a certain point of self-perception
in a person
if you think about the structure of Eternity
where does this information come from anyway

i.e. we will try to consider the information
in a certain algorithm
when it is organized

and then it turns out
what is the Eternal Development Department doing now
i.e. it needs to be done constantly
at the level of the Soul

we will be able to consider such a status

for example how does God perceive Eternity ^{yes}
from the point of view of logic here is the control

i.e. He still perceives Eternity
as an external control system
i.e. going to Him

and at that moment He comes
and to Himself
and at the same time Self-Aware
because God
He is still the Creator of any Reality, ^{yes}
including Eternity

it turns out that when we consider
such a level of movement
we need to consider
for a person, ^{as it were,} a similar projection system

and practically a person should do the same
He must perceive the system ^{as if} in its entirety.
regardless of whether it is complex or not
still perceive the structure of Eternity
as a control system
I'm talking about the system
which must always be in effect

and therefore it turns out that here
it is the structure of Eternity
this is human development after all

Well, if you think about it
that the original point of creation of man
^{Well for example} there in the information space
some point where the primary glow begins
a person perceives himself

where it was created

but before that there was a structure of Eternity
before its occurrence it turns out

and this structure is kind of natural
goes into structure
his own, as it were, information level

before the structure of Eternity there is the Action of God

it turns out that a person is simply based on logic
it is inextricably linked with the system of Eternal Development

common logical model
we just take the person's information
information from Eternity
and we don't make breaks
we are just looking at these optical communication lines

then it turns out somewhere in the structure of Eternal development
there is a level
where a person can control the situation
for example from the current time

for this we still consider
already a dynamic system of human development
where the optical level of his own as if control
is developing
as in minus Infinity, i.e. in the structure of Eternity
and towards yourself
i.e. where a person begins to control himself, so to speak

i.e. we move to the management structure
but in that structure which is called after all
management through the technologies of Eternal development
namely Eternal Life

and when we start to develop this structure already
as a structure for the development of the Soul
then here we see that the action of the Spirit of man
it can be an action, including a specific local one, so to speak

The Infinite Spirit can be manifested
exactly the same in shape as the human physical body

i.e. the Spirit organizing the physical body
The Infinite Spirit which is originally Infinite
and one with the Spirit of God
it creates the structure of the physical body

then we move to a deeper level
where the body creates the physical body

i.e. we consider in information
a very simple logical model in principle

it means when the human body
moves forward one second
there is his own body

so it comes from the physical body of a person
information comes from his own body
Well, that's just logic

and when we start to consider this process
on the information of Eternity
i.e. before the organization of man
before the first impulse of Perception

we can clarify the impulse
i.e. make it more subtle locally
as if even dynamic
and see
how does a person organize himself
to the structure of even primary Perception ^{yes}
those. to creation structure

I am always in the information field
which is called, as it were, external Eternity
before the creation of man

and I give control
how this information should be managed
because we, as technologists, must be very clear
managing the structure ^{is generally} technologically simple

and in connection with this it turns out
what needs to be highlighted in this management
Laws ^{in the general} distribution of information
what does the information look like
and it should be quite simple and fast
to be carried out

so here is the detailing
where I say that there is a fine line
which says that it is possible to manage
level from Eternity
level of self-organization
this line can still be made systematically

i.e. it's not that it's needed there
to be creatively oriented somehow
or hold some special events

in fact, each of these levels
must be systemic

because that's what we're talking about
that these technologies should be disseminated

as system technologies

after all, in conditions where it is possible there
the same global nuclear war
show the value of the human body
and in the separated information it is visible
that war is impossible by the way
this information is quite clearly visible
that there will not be such a global war

and the transition is some kind of system of actions, yes
i.e. there is a forecast, as it were, an absolute forecast
in this action
and it still needs to be implemented
do something at a system level

and it turns out that here
the resource of human health
This is a health organization
i.e. the organization of all human events
to the level of being like a person
at some point in the event

this means working through all the lines
around human information
to a greater extent in the first place
this is the development of the lines of Eternal development
i.e. working with the structure of Eternity

and when you work with the structure of Eternity
then here God's task is immediately visible

for example, a simple question here
what was god thinking when he organized
such a system of transmitting information to a person

i.e. how did He consider it in general?
factor of your own health

i.e. for God He can still organize
here's everything he wants almost instantly
it turns out that for Him the concept of "health" is then

so from this point of view
it turns out that it is the information transmission system
and by the way, real self-organization
the same as all people have

so this is one of the components of God's health

when we look at this component
as a system of knowledge
then it turns out we can connect
God's thought
with your physical body

and that's when we start
in this information of Eternity
tie up
The Thinking of God
with His Physical Body
it turns out that it is completely clearly visible here
structure
where is this information of Eternity
it's like it's ending

i.e. there is a border of Eternity
here we have felt it on the Personality of God

i.e. development comes from man
further on the Personality of God
interaction begins
man is God

then it turns out that it arises
Spiritual factor of action from the current time

and the information that goes
Well as if it were fast enough and dynamic information
which connects both God and man
This is naturally the information that controls any system

so the first postulate of such management
in the health of Eternity
exactly in that
what health should be in Eternal development
It is imperative to create management
Macroeternity in fact
i.e. to the level of human organization
and at the same time manage connections
intensive connections in general even between people

not only there is man and God
and consider super-fast connections as it were
in the ideology of Eternal development

then we get the first element
it's an ideology

if for God it is actually clear here

God is Eternal
and for a person it is an ideological connection

and here, well, here is this internal vibration
precisely the ideological connection
where the Spiritual is as if yes, the development of man into Infinity
develops into management

we see that a person begins to acquire
fixed characteristics in Eternal development

here is the first fixed characteristic
this is an integrated development precisely in ideology

in fact it doesn't look difficult
there are ideologists who understand
that it is better to do this for a number of reasons
well, so that there aren't any global personal problems there
for example, they want to live there forever, yes

or simply act by analogy
God does
then we need to do the same

Well, here is the simplest example, yes Means

although in reality the personality is much deeper naturally
it's just copying there
as a rule this can only happen the first time
when there is such a postulate
man does the same
but he must understand
why does he do it man

and when you start to consider
your own essence
then there further there is like Infinity
passes
generally in the dynamic phase

here, by the way, there is a very interesting human factor
arises
God has a distribution system
Mind-Body
are quite clearly organized
and you can see the process of organizing the body
from Thought

i.e. all mechanisms are visible
it's like a special technology

and by the way, quite simple

and when we look at a person
then here it already arises
creative level of human development
this is Infinity

why for example would God have a Physical Body of a human

because it is a creative process
i.e. more interesting and, as it were, sublime
the process doesn't actually happen
that is why God has a Physical Body of man

and here we get a form of development
for example coming from a person
where is already the Infinite level of information
which captures as if yes physical body

and further information system

she is practically factual Well as if not distributed
there is just an idea of creativity
there is a living Spirit and moreover, an Eternally living Spirit

and that's when the Eternally Living Spirit
is projected into the physical body of a person
then we'll see what happens next
that the Spirit organizes the physical body

creative spirit
The ever-living Spirit of man
organizes his own physical body

without any breaks there
without any systemic connections
simply Spirit and body are one entity

and at the core there is the Soul
The ever-living Soul of man

and here is the transition from the Soul
in the Spiritual
and as if into the biological and physical structure of a person
this is the level on which the whole world rests
i.e. the Soul carrying the Eternity of the World
being Eternal herself

and that's when a person begins to realize
such a structure

then inside himself he sees the Eternal

pay attention here
as if Well, in everyday life it is considered Perception
Man in essence always sees himself as Eternal
you just need to walk along this line
it is a fairly specific local line
going towards the heart
and somewhere fixed at the level of the heart

and here this line is quite simple
i.e. it is not in the very heart
and how does it touch human skin
but it is the heart that perceives, not the skin
i.e. a dynamic system that moves

although if a person moves

then comes the perception of the skin
i.e. here, by the way, is a very simple training option
you can see the line of Eternity
with which, generally speaking, a person always comes into contact

and when this line starts
similar to what I said
there is a first fixing phase ^{yes}
the transformation of man into Eternity
begins to see
that impulses outgrow
in the phase of Eternal Management

then again the mechanism known to us
where Eternity is directly highlighted by us, ^{yes}
to the point of creation of man
this is a certain ^{block or something like} how the information looks
generally speaking just like a small glow
and by the way I'm showing it
exactly where it is located

just a glow element
if you need to highlight Eternity
no need to look for it anywhere
she is right here

that which corresponds to Eternity
before the creation of man
a specific person
i.e. each of you
everyone can find
the primary point of your level of creation

even more than the level
because in total
there is also a system for creating a Soul
primary level of creation [Souls
and here it turns out that a person is already entering the structure
and watches as his Soul is created]

this is a deeper level
and compare it with the properties ^{of the so-called} Eternal development

these are the properties of the surrounding Eternity
here you can still influence the properties of Eternity
through the structure of the Soul

because it is originally from God
always the Soul is Eternal
so we can just do it all
even moving in the structure of the Soul
we can consider
how to influence Eternity locally
and transmit a signal, for example , to any point

i.e. the Soul is infinitely developed
you can simply structure the Soul
without changing any special systems there
just using the well- known qualities

and here it is
this is the structure of Eternity
to the level of the Soul again
which is like a factual Eternity yes
in the structure of Perception
it is quite easy to manage
from the level of the Soul
from the level of Spirit
Consciousness
and from the level of the physical body

and here is the level of the physical body
for example, there is body movement, yes
these are some actions of the body
finding the body
at the moment
and at the present time

and if we consider this Essence of the World
from the point of view of the Eternal level
being here

For example, we are now discussing the topic
what is the deeper meaning there
and how to develop this system in Eternity yes

i.e. how to spread this wave
into the structure of Eternity
if we are here
but the technologist thinks like that in management
since we are here and have a structure
for example, a certain Norm

or we work
above a certain level of tasks
and they decide
and this management can be improved and developed

it turns out that in the structure of Eternal development
we must find very clearly
information transfer element
this kind of state
where is there an improvement, especially in management
hand over
into the structure next to the structure Infinite

then it is precisely the management of the element of Eternity
which is generally inextricably linked
with the body of a human already
and this is already an inseparable part of the connection
can be found through interaction
Eternity and man
at the level of logic
at the management level

for example, you need to improve the health of some organ, yes
or just get healthier
but in the structure of Eternal development "just get healthy"
it means to realize
perceive all the information
identify all events
view generally all cellular systems
their relationship
increase resource
and by the way, the cell resource can be increased to Infinity

i.e. one cell
and you can store an infinite amount of information

the same simple example
look at the cage well in control yes For example

enter information
and on the other hand the structure of Eternity
the cell is in contact with the Eternal System
then you can invest
any amount of information

and by the way when to such a level
you are entering the management

this is at least a fairly quick recovery
It happens to a person if he needs to improve his health, for example

if he is absolutely healthy there then it works
that this is a pretty good natural way out
for event management, etc.

because in event management
the principle of non-interference is also important
when for example can you say
that the event is practically well controlled
so that there is no pressure of influence
that the event happens as God intended

then the spread of the event to Eternity
shows the freedom of all parties the action of all parties

and therefore it is precisely this distinction, as it were,
well, some kind of division of Eternity, yes
monolithic Eternity on the management structure
to some substructural systems

it turns out that we have
in fact, the revelation of freedom of action
in the structure of Eternity
when we set a task
reserve, as it were, health management

and by the way
this is, well, reservation , so to speak Yes
a certain level of health means an increase in human resources
it doesn't really look like anything there
something special or something

the same person, he just needs to have clear control
strategic management systems
the simplest element
This is control of strategic systems
where it develops for example
there is a point there of Infinite time of development
he must understand that the information from that point
comes to him

often with experience it's just a matter of control
some systems of connections
with information about future events

and that's all

i.e. it is often not some kind of complex technology
not some kind of details in the events

as a rule it happens like this
what can be worked out once
and for quite a long time afterwards
you can simply control everything
Well as if the route is some kind of optical communication line
with future development systems

or even just with future information
which concerns you
which is your information

and what does this information have to do with it?
you can find that everything is fine with you
simply because you work
to a greater extent with information even
i.e. it is not even necessary to see it often
events as such

because a person is completely free
can change events for himself as he wants
in a creative way

that means and therefore it turns out
that it is enough to just see the information of the Norm, so to speak Yes
and this information is quite dynamic
and she is in contact with humans almost all the time
and acts as an active quantity

here is another factor
Health management in the structure of Eternal development
information that concerns you
this is active type information
i.e. it is an active value
it can be distinguished by its activity

for example, a person started to study
technologies of Eternal development
he needs information of the future
somehow recognize

so here is the information that shows activity
and by the way it is neutral

it just looks like an optical illusion as if the level of the sphere
and not even in the local sphere
and how would such a glow without clear boundaries

and this glow starts moving towards you
and you just start interacting with him

i.e. it is enough to pay attention once or twice
and you already have it
as if a platform of Eternal development

which by the way a person does constantly
he constantly pays attention
to some signals of the future there

means the main element of development in a person
it was already created by God initially

i.e. God has already determined
that any human impulse
i.e. any level of his attention
this is already the direction of Eternal development
you just need to recognize it

then it turns out
what is so special about the situation, yes, it would seem

it was possible, for example Well how to concentrate
and make management
there to speed up the verbal level
i.e. the initial letters mean words
the initial digits indicate the control rows, etc.

and take and get super-powerful control
the whole volume for example yes, due to concentration, for example

but here again the management is like this
that for now, as if every person
still won't be able to master it
a system of this type of control
it will be necessary to invest resources in knowledge transfer

and here it arises
an element of speed control, so to speak

that's because there is a need
every person who perceives this impulse

pass on knowledge to others
we have practically well how does one get such a level?
that not all people recognize the system as such
and to a greater extent they are focused on that
to pass on knowledge
in words
in actions
in communication, etc.

This happens everywhere by the way
the one who saw the maximum level of control
he is still in the system of all information
transmits knowledge

this knowledge still passes on to other people
so it means fast or not
but in the collective Consciousness
By the way, time is speeding up

and if a person has found the structure of Eternal development
it literally comes down to seconds
this information becomes common
and is included in the management of the cellular plan

i.e. we still need to look at where the interaction takes place
at the level of a kind of integral collective Consciousness
who comprehends faster
and how is the information transferred?

after all, man is free
he must also pass on the information
by their own free will

and therefore it turns out that there is enough here
ideologically often directed
that he is ready to live there forever
ready to have Eternal development and everything
this is enough information is freely transmitted

if you add more words
then it will be much faster

and it turns out that based on this
as if integrated at an individual level
we come to that
what if we look at ourselves

and our own attitude towards ourselves
i.e. how do we generally develop in our direction?
what do we want from ourselves for example Yes

such an unusual element
[well maybe for some people it's normal
but from the point of view of logic and problem statement
we started with the fact that we are external, as it were, light
who is coming to us
precisely in a dynamic sense
let's develop

but when we start focusing management
and watch
in the structure of the Eternal Development Plan
then here we see information about ourselves generally speaking
own for example there is a management level
own tasks, etc.

and here quite a lot arises
Well as if a clear fundamental level of management
where a person holds concentrated control
all over the world actually

i.e. the main level of management , really
where does a person keep
and systematically, it means completely controlled

this is where the level comes in
what do you perceive
own system of knowledge
own state
as an action

and that's when you start to see
own state as action
this is where creativity comes in
Well, let's say, external Reality
external information
your own position
your own condition
this is a connection
between your control
and generally speaking by you
but in the space of external information

i.e. it is not somewhere deep in the Soul

although it is possible to work
at the deep level of the Soul
then you need to be in control
to enter the management structure of the Soul in fact

i.e. you need to touch the level of the Soul

and this means that everything still depends on practice
whoever wants can do so

in this case i am talking
that interaction with any information
this is the Eternal development [of man
in the event that he considers
[your own positions on Eternal Development]

i.e. it invests [the tasks of Eternal development
in any kind of form of information in essence]

i.e. any external information
which touches a person
and has a kind of return signal or reflection
or simply when a person perceives it
this information is evolving
as a structure
intellectual development of the person himself
and spreads into Eternity

i.e. we took the first step yes
closed the first circle of control
in disseminating information
at the first level it sounds like an axiom
[as a completely clear immutable Law]
it's almost impossible to get around it
it is a very rigid system of connections

here the greater the value
the more rigid the system of connections in management

so it turns out that
Well, Eternity is a big quantity, yes
and we need this first step
this is precisely interaction
with your information

given the level that we invest in information
the task of Eternal development

into every element of this interaction

By the way, you can consider it like this
what do you consider yourself
or there is the state of your Soul
in terms of management where there is control
and such calm management
just very concentrated
and as if in general, even normal, ordinary management

that is, without any of that
special acceleration events, etc.
normal state

you just need to find this center
this is again in the area somewhere around the heart of information
here the information does not necessarily have to have your outline
but you have to perceive the information
as information about your actions

the channel is very simple
there is a lot of information in the information space
get to the level where you perceive
as information of their own actions

it's like you're looking at yourself
and as if you are observing that
what are you doing
that's all, a simple control channel

then what comes next is what comes from you
has the status of Eternal Development
already because you invest in it
the task of Eternal development

and now the second circle is also quite specific
and in general Well, it's a tough management axiom in general

what the next level should contain
this is again a certain sphere of information
should contain your knowledge understandable
to the level of their occurrence

pay attention here
very much so in general as if a difficult position in management
in fact, it's like , very simple
well, some kind of such a colossal degree of simplicity

because to give knowledge to the level of emergence
easier than when they are already formed
where connections exist

and you must pass on the knowledge of Eternal Development
to other people
before knowledge has
well, some kind of expressed systemic view

because only the first concept
starts immediately

quite a large array of information
and you work with the technologies of Eternity
the array is already large

i.e. here is the difference in this ideology
and in general in work practice
in the fact that you work all the time
with a large, colossal array of information

then one contact is enough
with this information
and you should get control

and that's when you start to transfer control already
in Infinite Status
i.e. you only have to define the places
which denote some action

such as well, to convey some information
some object of Reality
informative Reality or physical
without designating an element of Reality

in optics everything is very simple
there is a reflection in the structure of Eternity
you find this point
and that's all

this means that action needs to be taken in management
that would show people
where at the information level
you actually see it yourself
this is the signal

i.e. you show the place
where does information come from and how is it organized?
and that's all

this is a very high speed
which practically allows you to work
at the level of generally quite active systems , I think
where you can for example just show everything
level in the information of Eternity
and this level will be transmitted

so that this level is not some kind of floating there
and for example, you were constantly doing management
so what does all systems mean
you can bring it to one place

so as not to go
based on some large array of information

it turns out to be the simplest option the simplest option
transmit information all the time
from your healthy [body]
from your good events
and that's all

it means that you are constantly in control
already in the second round of control
showing all the time the Health Standard
i.e. in fact, you are in general in control of yourself
and not intrusively
and just because you teach others

i.e. by yourself at that moment by the way
you may not even have to do much
you just show the place
where the information is transmitted from
which is then structured, etc.

and by the way, now make such control
i.e. try to pass on the knowledge
before they are formed
simply pointing to his healthy body
in the structure of Eternal development

By the way, it's very powerful
is this some kind of backup health management system ?

if you work at this point
then the health reserve is much higher
than just to cure someone of something, etc.
because there is a very powerful level here
namely works in Infinity

i.e. a person must be able to cope
with an infinite number of situations
and at the same time he must cope on time
as soon as possible in a timely manner

that's why you work now
I will work with you

by the way, this arises in such management
such an element
that when a person starts to do
this management

he must control himself

and the management is like this
that not only does he have to be there
for example, to take care of your physical body
if he has any tasks for health improvement

if not, then he must constantly reserve
for example he is healthy
but that means he has to constantly reserve
control

and this is the management reservation
is of such a nature
that you have to watch all the time
Infinite background in control
i.e. it turns out to be like managing a multitude of tasks in essence
to control something all the time, etc.

but when you go for example
to analyze this situation
in general, what does a person do in general
then basically the main amount of time
you can see such an element in optics simply

That's basically what he does
he is constantly in control
strategic remote information

just ^{well} as if not very often it may be recognizable
this process
it's all in such a natural level of control

but if we look
how does a person make decisions
then these are exactly like these
volumetric control areas of Eternity
i.e. from the point of view of the Eternal development of man
basically, and determine local decisions of a person

and that's when you start
^{it means that} any decisions must be implemented
and man is absolutely free
he should be able to do whatever he wants and therefore
of course, in a creative sense

when we consider
some local human action
and introduce it into the management structure

complete freedom of action
then here you can introduce freedom of action
due to the fact that we have a very large array of information
we translate
into the structure of Perception
there is one private perception of a person

and this, by the way, allows us to solve problems
integrated for all

this is how a person generally transmits information
^{for example} about his Eternal Development
in ordinary life practice

when he watches something there ^{yes For example}
Well, a simple practical example
it means someone is watching some video tape
which is sold at the kiosk

here he perceives
the image of a video cassette ^{well a certain amount of information} ^{yes}
there is a stall

the video cassette outlines some systemic connections there
how this film was shot, etc.

and you can immediately go through all these connections ^{yes}
at the same time there is external space
is this information somewhere
accumulates integrates contacts

and we can, ^{for example,} record it in management
some point
watching a video there or understanding what the video is about

why are some tapes interesting and some ^{not For example}
some information is interesting
some, ^{for example,} require
^{for example,} longer-term perception

so, to make the information neutral
i.e. perceive at a neutral level
how god perceives information
generally speaking, the one that He Himself creates
any information can be for Him
completely neutral

and that's when the level of neutrality
you move into Perception

then you can have a very large array of information
translate
in the structure and transmission and action

i.e. the structure of Eternity
can be translated simply into a single impulse

and here it is again, the same story
The man looked at the videotape
and into this impulse
you can embed the structure of information transfer
where is the information infinite amount

and that's when you start
in some already private management systems natural ^{yes}
invest Infinite level of information
Macro-creative information

why do i often focus on that
so that it is through Macrosalvation
through the Salvation of all universal Salvation
management was in progress

because technologically it is also
and the level of ultra-fast transfer speed
Macro array of information
in some local action

and when you [have already transmitted] the information
in its own way, in principle, in any creative action
well, in general, in normal operation
which is part of the system of social relations, etc.

and when you start to see
that this system is controllable
then it is possible with this external structure of Eternity
manage in order to conduct accurately enough
information to the physical body

i.e. in any of your actions
there can be almost instant access
via Macrosystem
through the structure of Eternal development
to the physical body

and not only to the physical body
can be controlled
any level of information

can be considered
structure of Thinking
actions of the human Soul, etc.

one can see the movement of the Spirit

and by the way it looks like a static system
you can just look from the outside
where did your Spirit go and what does it look like
and why did he end up there by the way
it's in the information yes let's say so

this way you still have complete control over the situation
namely, this is how it looks analytically in the information
how to view a system

and the faster the movement goes
the more static the information of Perception becomes

those. super-fast action of the Spirit
and a completely local level of expression
when we want to perceive it

because Consciousness seems to accumulate
ultra-fast systems
into more rigid, more static things to
well, to study the logical law longer

if the system is very large
It's easier to make the projection more static
and spend more time analyzing this system

and it turns out that these systems
health backup systems
which can be used and applied
as systems of Infinite development

first of all, they are fundamentally built this way
what exactly is a static system
human physical body
perceives everything as the Infinite
what is related to information

i.e. first of all the physical body of a person
perceives Infinite quantities

and that's when you start
This is the level of management to consider
i.e. to see

how
your physical body interacts
specifically with Infinite systems
with Infinite quantities

then here by the way it is quite clearly visible
social systems of human development
and in complex systems
political

that's what's interesting here first of all
as soon as you start taking care of your health
and how to consider it positionally
what does this mean in events in general
it is precisely social systems that arise

i.e. first of all, a person reacts
on the social system

and why does this happen?

society develops endlessly
God gave Eternal development to everyone
then it's natural for society too

and then man first of all
Well how does he get this level of control?
that it naturally occurs macromassive
that's how it is in his management

and it can convert this array
how to translate into control in this way
that even an action can be expressed without words
Perception just goes

i.e. the action can be denoted by different words
and even arrange them differently
but still the perception is integral
Infinite level of development of society
and humanity as a whole

it turns out that based on this
logically it's clear again
what Perception of collective action of people
this is already the third level of control of Eternity
this is the third level which already gives to your health
in fact, a guarantee of social events

i.e. you can have very good health

but we need to ensure that there are no wars there, etc. yes

i.e. it is necessary to ensure
social status of own development
development of people

in general, it is projected onto a person
the task of developing society as a whole

that's why when I give well for example forecast
I often show it technologically again
First the Macro level
some kind of there , for example , the whole planet as a whole

including outer space

because what we are talking about here is
that we must definitely work
via Macrosystem
to control action
it was more expanded there more precise ^{yes}
so that there would be more
exactly this kind of Macro creative action
or there privately - creative action
to obtain [sometimes one particular creative action]
absolutely everything [Macrosystems] needs to be viewed
which are ^{as if} close to the level of this action

because the action takes place in the information system
that's why there is any interaction
with any information
can naturally take control
at some specific level

and now control the management
this is again a social system

so it is necessary to convey the information in general
to society
i.e. to participate in the work of the society in management, etc.

and it turns out that it is not necessarily visible
to do some social activity often
Often it is enough to simply give control
but nevertheless here is a man
so ^{let's say,} determined by God in management
that he should still participate in all systems
it doesn't matter in which ones

there is some kind of nuclear core there

more initial substance
and if it is necessary then we need to do this too
and as much time as it takes , ^{for example, yes}

based on what a person actually does
some business
and there is a specific work schedule there, etc.

you always need to have time to do something in between
what is needed

and this level, well as if there was a period of action yes
i.e. work
between some identified systems of action

i.e. there is a management goal
there is a realization
and between these elements of action

i.e. how can you do the management
the entire external system
as if emphasizing or concentrating
on some special or necessary systems

and that's when you start
impulse of the entire level of Infinite Control
tie up
with some private action of his own

i.e. you can do management
for example, in terms of health, yes, to improve the health of all people
all at once taken there
some specific person
you can be absolutely healthy
and then do only other things

and at that moment you start working there on ecology, etc.

i.e. to be able to concentrate in management
the whole Reality at once
without releasing Reality, as it were
from the management level

i.e. you are not all together well how do you perceive it
because often there is no such task
the main thing is to understand that you are in control

i.e. that's how I said it
when you take information
as if observing myself from within

i.e. the control thread
this is still the management of the whole Reality by the whole World

and when you start making management universal
then it is enough to learn at any level of management
it's not difficult to learn , actually
relatively simple, let's even say so

I just need it all the time
concentrate the grain of general management
in any particular problem
it often looks elementary

then any control should be transferred to optics
and inside, like this, you can even highlight it with color
golden grain like wheat grain yes For example
have a goal of concentrated management
throughout the status of the whole world

i.e. a radically fundamental control system
all over the world

and then it turns out that you do some things
by the way, then they are made more harmoniously
the management looks more harmonious level
as if without any discrete outputs to control

because the simpler and more natural a person is
makes management
the more accurate and easier it is for him to work
i.e. he shouldn't strain himself at all

i.e. the next level of management
next

For example there is the fourth circle of control
in the task of precisely Eternal development
this is a conclusion to natural layers of control

i.e. in a natural state
a person does the whole range of Macrotasks
Macro arrays of control

at the same time, in general, no one anywhere and I think no one says
that it is necessary to invest some resource there all the time
use your creative potential there all the time

we are talking about the systemic level of management
where often only ideology determines
in general all other tasks

but this is precisely the exit to natural control
this is a very strong wave of information expansion

i.e. can we concentrate now?

and let's do it now

i.e. all tasks, for example, of the hall in management have been solved
in Infinite Development
who will watch for example Well, the seminar itself
their tasks are solved

but there are people who are outside the hall
who are doing other things altogether

then it turns out how to solve their problems
but still they need to be given knowledge

and this is precisely the continuity of the connection
i.e. we perceive ourselves as a collective
all external Infinite information
is built on the same model
personality - Eternity
and here there is simply a collective - Eternity

the difference is actually small
the team simply works more systematically, by the way, often

and because there is one common ideology
for example there is Eternal development
and collective tasks are solved quite simply

and by the way, it is precisely in the Eternal Development
collective management
will give very high speeds over time
and this speed will increase very seriously

and the system of Eternal development for example
that the body will become, well, more manageable , so to speak
through the system of Consciousness
this will be visible quite quickly already
in general, with a short period of practice
precisely by the collective method of management

that's why I'm saying
that for example in political systems even
if we lay down the idea of Eternal development
then politics as a system of dissemination of the goal
will give many people the opportunity to work simply on ideas

and then the results will be significantly better

precisely according to the technologies of Eternal development

i.e. the next level

this is a study well let 's say fifth level

although they can be distributed differently there

Well, you can call it the fifth level then

i.e. the next one looks like this

as a system of waves coming from a person

and even there you can see

that some nuances are already arising there

i.e. the more information we transmit

the simpler the less rigid the system of connections

i.e. as soon as we start

transmit information

between people

and other people

then it becomes easier to vary the information

there is no such rigidity

because the closer to the person yes

the harsher the information

the more creative level control comes from him

there is Macro-creative

the easier it is for the person himself

here is absolute freedom of action in principle

arises

when he does the most for everyone

why is God absolutely free there

He did everything he could for others.

therefore He is absolutely free

as a person so to speak

and based on the control action

we clearly see that God's freedom is absolute yes

or there are people who are engaged in Macro-creation

they are ideologically driven

Well for example, the same line there in Eternal Life

they themselves generate this information

and it turns out that there is absolute freedom

this is what a person is to himself

as an ideological action there

introduces as a system of Eternal development

as I said Eternity is possible well how to consider
as a structure of individual optical elements
monolithic Eternity we begin to divide it

and that's when the absolute freedom of man
is being integrated
for Infinite development it is simple even logical
for the Infinite Development of Other People
or the person himself

integrated as a system of personal action
then this system of personal freedom of action
turns into
in the normal status of external space by the way

here you can see very clearly
why is outer space exactly like this
you can find connections
why some action
either it happens or it doesn't happen

it's very clear what's going on
you start to influence the system

and it turns out that based on this
it is precisely the influence on the system that occurs as if from within

what i just showed
man begins to act from the side of Eternity
i.e. a mirror image occurred yes

we are now speaking from the side of Eternity

I didn't translate it mechanically
but he just pointed at everything
that we begin to act further further further
control waves diverge
It is natural that man is more and more
how it works with the structure of Eternity

at some point he is already in this information

and not because he just jumped over there

there as if discretely or dived there
or somehow did something some mechanical action

but simply because it develops naturally

in that direction
that's all

and where he begins to realize himself
how is the level well generally influencing the overall system
he falls into the structure of that Eternity
the truth is already personified
with people
with actions
in general, such a living Eternity

not just some information of Eternity
and that which gives Eternal life by the way
real one at that

i.e. Eternal life is real when all others live Eternally

This is by the way the only criterion
which says that it really is so

if at least one other person there
this mechanism is not fully developed
then we can only talk about that
that all people can do it

but if at least one can't
then we have to teach him
then talk about systemic action

and in principle yes people can
for example, to live there permanently Forever
but if the criterion is, for example , still the same
in relation to one person not fulfilled
anyway, we are dealing with a conditional state of affairs

on the basis of universality there
if one can't
then its characteristics can be transferred to someone

and it turns out that this also cannot be allowed yes
it turns out that everyone is eternal

and therefore in the structure of remote information
here is the transition through this border as if of universal Eternity
this is what God originally gave
this is the natural state of man
it's like in general, even between certain levels of management
is seen as the most natural state of man

and here we come
to the most natural state of man
what God gave , for example
in the form of natural also Actions

and it turns out that it's just for everything
in this state he is already the Eternal

so the criterion is his
Well so let's say logical and real Eternity
where possible, they are not yet organized
there are all the words, not all the events
still, the fact is that others are Eternal

Well, again , yes, we come to the criterion that says that
that only by comparison can we say
that yes indeed civilization is eternal
when everyone already knows how to do it

and moreover this applies to everyone
i.e. if one doesn't know how to do something
this means that the whole civilization must learn, etc.

and it turns out that based on the task of influence again
this is where we come in
to something very simple, even elementary
at the optical control level
management plan
that in that already social
some kind of socialized Eternity
where "life is Eternity"
By the way, this term is already applicable

this means we can influence this same point
which we talked about
the point where there is the creation of man
well, i.e. you
What does God have to do with it?

i.e. as God does
He is constantly His own point of creation
as if he were examining it periodically
to show that there is a status of time and Perception
to pass on knowledge
It creates some kind of system of events in fact.
for others

and that's when we start to see
that all actions

there God gave control
and all actions are created in order to teach others

here is the True status of the individual
really opens up
as the status of the Universal personality there is a Divine level yes
actions of the individual

i.e. the personality begins to work
at the level of , well, Divine Laws, let's say
in Eternal development
they become natural for the individual

and then it turns out that we begin to see
what is the information transmission system
it's not just there for example there is a person's desire
and in general the whole world is arranged
as a system for transmitting information of a specific Macro-creative
information

i.e. the world opens up completely
you can see absolute forecast systems

i.e. here is the concept of "prognostics"
there it is not a complex value by the way
because they are quite clearly expressed there
communication systems
they are open there, there are no problems
all events are visible as if through the eyes

and then it turns out
that when a person begins to realize
this is the control to yourself
i.e. starts to adjust the control

from the point of view of absolute forecast

there are goals and tasks
the need to implement them for example Yes

and absolute forecasts
they therefore have a fixed characteristic
due to the fact that all people are in the collective Consciousness
at a certain time
see certain nodal points of the future

and that's when they, well, at a common level, so to speak
they think that it should be like this
an absolute forecast arises
which generally speaking does not change

it's visible and that's it

and if for example well, some private tasks
within the absolute forecast
every person is free
that means it can work one way or another
nevertheless, in its tasks, it is naturally creative
when these are precisely creative tasks
in a person
and I am of course talking about Macro-creation as well

then the whole structure is visible

and that's why by the way a very simple example yes
influence there
destructive systems they cannot really affect
foundations of civilization
i.e. the world will definitely not be destroyed
even logically clear about this control system

because it turns out that there is no transparency there
in Perception

as soon as the first element
well, it doesn't correspond to the task of Eternal development
instantly space is compressed

i.e. a person cannot then consider
prognostic phase

and even logically if a person
creatively directed towards Eternal development
He is opening up more and more

predictive control system so to speak
or oriented-forecasting
where systems are also taken into account from what he sees

and then the full level of creativity
complete freedom of man
This is a logical action by the way
ability due to the fact that a person can personally see something
just pass it on to others

and by the way, in management now try to do it like this
here is an open space yes
a certain absolute forecast
make sure that there is no nuclear power plant there
some further problems

often it's just a job
with one atom
just the orientation of the atom

if it moves too fast
take it and control it as if
Well, it's easy to press it in the controls
so that it would be fixed
and that's all

the logic is simple
if more fixed element
so there is no explosion yes For example
instantly find logical status
why did we do it this way

By the way, this is something you can do and see
that any system needs to do this right now
and see that any system is available for management
the one that concerns all people

all people agree yes what all people agree
so that there would be no nuclear explosion there
that's why, by the way, it's often much easier to work here

and when for example Well, it's easier in that sense
that there really are no explosions
and quickly you can get to the system
how to perform a control action
and almost instantly the system is normalized

there is a technological cycle after all
which is initially laid down as the Norm

and therefore there is a certain Law
which allows to identify
how to influence in the most optimal way
on the system, on the structure of one's personality , so to speak
to the element of its creation

i.e. to identify what is again required to a greater extent by others

i.e. the more you work
from oneself to others
the more you discover in nodal systems
well, specifically at the control points
precisely by its level of creation
how to actually influence the events around you

after all, you also need to influence your events
giving complete freedom to oneself

and that's why the area where you were created
it doesn't change in management
this is one of the generally strict postulates again
in the system of Eternal development

so health there, let's say, with an increased resource
or with the necessary resource for Eternal development
it is a system that is always in one place

Well, by the way, as a rule
this is on the left side
in relation to the body
and at a short distance there
this glow goes on all the time
it is visible in each person

and when you start working with this system
and by the way, people don't have access
Others have this system
that this Law is clearly reflected

what is real to a person
no one has access except God

yes, you can talk there
that some influences exist there, etc.
but this is only if the person believes
what he can or should let through from another person
some kind of impact or some words

but in this system
it is the access system that is being implemented
and you can see how periodically
God level
is docked
with the level of a person

and yet everything is clearly visible
that it is at this moment that God controls Himself

i.e. He controls
the primary point of its creation
and treats people equally
both to yourself and to people

and here is the unity and Action of God
i.e. equal treatment
and to Himself
and to people
allows you to see very clearly
information transmission system
in the form of a certain level of knowledge, namely
i.e., and such precise knowledge

that one person can do it there
to pass on to another person

so knowledge comes in handy
obtained precisely according to the tasks of Eternal Development
as a rule they are not distorted
they are, by and large, essentially
and it is almost impossible to distort
even if you change the words there
there or in some other way to determine
set different speeds of pronunciation of words

because there is the idea of Eternal development
she is clear
the whole structure of Eternity is clear even visually

there is some Eternal space
it is also impossible to distort the external space there

i.e., as if a simple postulate
what is Eternity
Well, [man] perceives it as an element of Eternity
outer space

there is something to do with this space
almost impossible ^{yes}
at the level of some kind of informational action

it turns out that Eternity is incorruptible
and the transfer of information through Macrosalvation
also undistorted

that's why there are True motives
there is no goodness of such universal Salvation
they are always transmitted quite stably
and one criterion is helping people, general good, etc.

and that's when you start
this structure is to be developed towards God already
i.e. you start to develop it like ^{this}
so that God would perceive as a person as a man

your system of actions
at a normal level
you work
There he works
any person works

and this is just your job
you are completely independent
don't depend on anyone
God is also independent ^{yes}

and it turns into a normal dialogue
in the structure of following the idea ^{yes}
this Eternal development
the idea of good in fact but Eternal

and when you start at that level
see Reality
then this is where you start to see
how god approaches you
in the form of a Personality

i.e. we have considered all the systems of Eternal development
and as soon as this warmth of God

i.e. His approach to you
at the level of information at the level of real knowledge
this is what you begin to perceive

here you already have
a living, so to speak, dynamic Eternity
human Eternity can be called like this

i.e. information that you
Well, you do the usual level of control
i.e. you live a normal life
and at the same time your life in all its manifestations is Eternal

i.e. any level of action is the level of Eternity
which you don't necessarily have to remember there all the time

after all, the point of management is precisely that
to bring management to the level of universal harmony
and then you can just live peacefully
and do some other things

i.e. management in the structure of Eternal development
it is not necessarily constant management
in this task

and as I said, it is precisely the basic level of management
this is a skill in natural situations
exactly how would it look like
so that from the side of external control, as it were
were you able to get
what is your natural state
unlimited
Well, such a free state is a harmonious state

this is the level that
you are already there Eternal in any affairs
in some cases you don't have to think about it
of course, things should be constructive again

this is the level of creativity
no matter how it is meant or how it is pronounced
can only be a basic level word
or there in full word

here it is still implied
that the majority of people

For example there are ninety-nine and tenths and sometimes one hundred percent
they still take action
aimed at the benefit of all people

and so that this would be everything, well always one hundred percent
then this is the main task

as if public education
so that there would be some kind of negative thought
didn't come to those people who don't know
these postulates there for example yes Eternal development

and here another reserve level appears
quite by the way significant in health
well, well, maybe people might have some problems
if some external information
we'll say the wrong thing yes it distorts
here is the system of Eternal development

it turns out that this is precisely control over any information
so that the information does not cause harm

and this control can be carried out
like people who really don't need health improvement
and those who are absolutely healthy there, for example, or there for him
the person is simply practically healthy

and people can remain in this state for years
just health there or decades

or always there Always yes

and then it turns out
that this is precisely the task [of working with information, as it were
quite often local information]
so that the information is local
did not affect other people
this is a special task specifically in health
with Eternal development with Eternal life

this means it is necessary in the forecast phase
Well, try to look somewhere into the Infinite Future
and find locally
maybe not necessarily there in the Infinite Future
and somewhere in some element of information

find the level you need to work with

as a rule this will correspond
possible problems there are often social in a person
i.e. this is actually the control level of forecasting

and it looks like more than just a forecast
and how is a natural human life

because in natural life
a person is always doing something
and at the same time it copes with a certain level of tasks
Well, with almost all tasks as a rule

and when, for example, it goes away
there is some amount of time
and the person develops further
so he managed to cope during the elapsed period after all
God gives everyone, as a rule, equal tasks

and when we look at the level
well, that is, "equal" from the point of view of that
that a person can overcome the task

when we consider the equality of people
before God of all
and when we consider
It is natural that a person overcomes challenges
then this level of being is like Yes
and in fact, well, some kind of management
it doesn't look like there is a special search level there

i.e. often and as a rule always
this is a solution to your specific personal problems

but with the level that you decide
at the level of realization of one's Eternal life

so as I said
this is a special level of work
with health
with health information
you can be perfectly healthy

and a special level of work
so that this work goes naturally
both for you and for those around you

and that's when you start
to this level of management
let's move on from the point of view of logic, so to speak
from the point of view of normal development conditions
ordinary life

then it turns out
what is the practice of Eternal development generally speaking
practice of personal health realization
health of other people in Eternal development
becomes generally speaking often
common practice of action

and as I said, it's not tiring anymore
it's not like you have to do it all the time
and just do everything

as God does
He periodically looks at his tasks.
and just works on tasks
that's all

and the main thing
so that your goal of management is still
implemented in total
all health tasks in Eternal development

those. do not separate the management goal from the tasks
i.e. in any goal you must live Eternally

once a person gets used to it
then he really lives forever
all that remains is to teach others

This is where I end today's seminar.

Thank you very much for your attention and waiting

I am very glad to meet you
