

GRIGORY GRABOVOY  
The Teaching about God  
**Life of the Soul**  
25.12.2004

Hello again  
The topic of today's seminar  
this is my Teaching about God  
Life of the Soul

in this topic i show  
in what way exactly is the life of the Soul  
what we consider as the "Eternal Life of the Soul"  
This is precisely the concept that can be expanded  
to the level of for example there is Eternal life of the physical body  
to the event management level  
and moreover from the point of view of giving the status of Eternity

and to the level of that knowledge  
when getting to know, generally speaking, that structure  
what is the life of the Soul  
we find specific technological techniques  
which allow us to compare, for example, these concepts  
as " the life of the Soul "  
" life of the body "  
draw a certain conclusion

what if we know how the Soul lives  
then it's easier accordingly  
for example, technologies of Eternal life of the physical body  
to implement

so in this case, the truth is there is such an aspect  
what is originally from God  
the physical body already has these technologies  
and in this case we learn  
as if the status is often even the body  
here is the manifested on B e s k i n t ...d e n t development  
i.e. more like an ideology of physical development of the body  
when the body is eternal

so here we need to consider  
it is precisely the task of the Soul's actions  
i.e. the logic is that we study and consider  
life of the Soul

we can have the appropriate mechanism  
transferring it to the body is the first thing

secondly, consider the life of the Soul of God  
and receive direct information  
for the human physical body

and also receive all the information  
about the Action of God, for example , means  
and about the Action that is directed  
not only through the structure of the Soul of God  
and through all other systems of God  
through the Personality of God

because here it is actually  
as soon as we consider the Soul of God  
The Life of His Soul  
then we generally speaking have the entire structure of the Personality of God

i.e. in fact, it is still the Soul of a person <sup>yes</sup> Soul of God  
this is one level at a phase of Eternal development  
Well, <sup>yes</sup> in the World  
and the Physical Body of God is Eternal  
and the physical body of a person can be Eternal  
if a person has this knowledge  
and it turns out that  
etc. <sup>Yes</sup>  
The Eternal Spirit of God and Man  
i.e. some kind of connection coincidences begin  
by information elements

and it turns out that the physical body  
in this case it is a level  
which practically in essence very accurately understands  
your Soul

i.e. in this case the study of the life of the Soul  
can be led by the physical body  
in this case we begin to see  
how does one understand the physical body as such

and a fairly powerful mechanism is created  
generally speaking, teaching the physical body any information

because the Soul is intersected with any information  
so the body receives useful information  
for Eternal development

from any environment from physical space yes from actions etc.

so in this case this is exactly the mechanism of action  
should be considered precisely as a mechanism  
in principle which is kind of widespread

to the whole physical Reality  
from the point of view of body development

and the Soul in this case  
as a manifested system in this Reality  
this is still a mechanism for teaching the body Eternal life

so let's actually consider this system itself  
or so to speak the very concept of " life of the Soul "

in this case, well, everyone knows from the start  
that the Soul is Eternal  
but she is Eternally Living  
and therefore we mean  
it is the meaning of the Eternal Life of the Soul

i.e. in connection with this it is necessary to consider in general  
as the life of the Soul  
perceived well for example, the physical body Yes  
or logic  
Human consciousness

i.e. the Soul is somewhere  
For example there in the physical body of a person  
and therefore performs certain actions Yes  
by the organization of the physical body  
from the point of view of the health of the body

i.e. the main task of the Soul's action  
this is the organization of a healthy body  
here is the main amount of time  
from the point of view of human logic  
The soul spends as if it were considered that it exists  
such a concept as " time " for the Soul  
so that the physical body is healthy  
so that God's tasks are carried out, etc.

i.e. the life of the Soul in this case  
it's like a level where there is some earlier center  
and the earlier center it is practically  
as if it controls the following tasks of the Soul

i.e. it is a series of tasks, for example there is the Eternal life of man  
implementation of his specific ideas there, etc.  
the realization of God's ideas  
and this control center is actually like  
Well, it forms what we can say from the outside  
that this is the manifestation of the life of the Soul

the same goes for the physical body by analogy  
we are solving some issues there in space-time

and it turns out that based on this  
we actually have a very specific position here Yes  
that there is also task management there  
there are also long-term tasks  
God's tasks  
which stand in front of the physical body of a person  
i.e. there is some analogy

but here is the concept of " True life of the Soul "  
where the Soul so to speak lives yes, a person here  
Well, there is such a term where it is located  
that's another question  
for example, in the physical body of a person it can be  
and generally speaking is always located in a certain element  
always in the physical body  
although it may manifest itself in other places

and that's when we talk about that  
that it can be manifested in other places  
we can consider the dynamics of the life of the Soul

i.e. such a simple question if a person is faced with it  
consider some movement status  
own physical body Yes

then we can watch  
where next to the physical body  
his Soul moves on information  
in this case the Soul is perceived  
just like the physical body  
but man sees that it is the Soul that is acting

i.e. this is some kind of friend Yes let's say so comrade  
or the one who tries means to show a certain way  
and he starts to show

where to move  
for example, a man is walking in a field  
where should he go anyway  
how does he even make decisions

he makes decisions  
at a certain level of relationship  
Well as if optical distribution of information  
and now we can see where his Soul invites him to go

i.e. the Soul acts as a friend, even as a person in many ways Yes  
but which is manifested as if informationally

i.e. from God's point of view  
the life of the Soul is like the universal life of all humanity  
and at the same time a specific person  
here is the one that is  
in principle, the personality of the most yes man

i.e. as soon as we approach this  
we see that the Soul is inside  
but nevertheless it is manifested from the outside

God does the same  
It exists and in Action it is in every person.  
but He is also manifested from the outside Yes

i.e. the life of the Soul is very close , as it were, to the Action of God  
here "Life of God " is more of a general concept  
but precisely to the Action of God

and when you start asking the question  
in general how does God work yes  
Here he should move his hand, for example  
and then it turns out how to describe this moment in this case  
from the point of view of human logic

you need to consider your own Soul  
i.e. to look through the Soul of a person  
i.e. the Soul is also a mechanism of cognition  
therefore the life of the Soul implies  
the usual set of knowledge

i.e. the Soul is like a certain level  
actually converting knowledge

where do we see  
The action of God but in the form of a Soul  
action of God concretely as a Person  
this is the Soul

hence  
why the world must expand increase  
The actions of God are infinite in number  
and every Soul carries within itself  
in fact, as an Infinite Number of Actions  
and the number of actions that corresponds to a given Soul

and it turns out that from the interaction of the Souls of people  
we get the following events Yes

here the Soul controls, as it were, a finite number of events  
Well, which means it needs to be controlled  
Soul  
To God  
for example to people

and from finite systems we get an infinite quantity  
which is already the Action of God for the universal development  
i.e. somewhere there is a transition to the Infinite status  
final, as it were, elements of the action of the Soul

so here is the transition to Infinite status  
this is actually the Eternal body of man  
because it makes sense logically  
that the Eternal body is precisely that path  
which God showed initially yes

and this is the path of transition through the Eternal body  
it turns out that it is necessary for the Soul  
in fact, as if cultivating the Eternal Body  
to solve God's problem  
by the Infinite, as it were, enumeration of events

i.e. the Soul also strives to be like God  
i.e. to act like God

and here we see a very powerful mechanism of cognition  
that any element of a person any life of a person Yes  
any life connected with a person  
acts on the level of similarity to God

i.e. even the cells are synchronized at the same level

from the point of view of Eternal development  
as God does and shows

i.e. from the point of view of the cell  
life is originally eternal  
if you look at the cell nucleus <sup>there</sup> <sup>yes</sup> at the molecular level  
it turns out that there are elements there that are completely indivisible  
i.e. there are structures in a person  
on the physical level which are Eternal

and it turns out that if we  
these structures of Eternity are knowable  
or let's pay attention to them  
then the support at this level is the transition level  
between the action of the Soul  
i.e. between the life of the Soul and the life of a person  
to the Life of God

and it turns out like this  
<sup>well</sup>, some kind of triune level actually  
where we have essentially  
that which is originally before the action of the Spirit  
there is an action of the life of the Soul  
here is the " life of the Soul " as an autonomous concept

as an informative concept  
if we say what is " human life "  
this is a certain concept  
a living person is a person's life <sup>Yes</sup>  
living Soul is the life of the Soul  
but a living Soul is always alive

nevertheless, we can use this term  
i.e. it turns out  
double life <sup>yes</sup> the soul is alive  
and we speak of the life of the Soul  
we double the information of life we strengthen

and the closer to God <sup>means</sup>  
<sup>well</sup> , to a greater extent, <sup>so to speak</sup>, compression  
with a high level of information compression  
we begin to see that at a certain level  
The soul is very clearly visible  
how it interacts with the body  
i.e. all the mechanisms of interaction between the Soul and the body are  
visible

and at the same time it is clear that since the Soul is Infinite and Eternal  
inside is the Eternal Body

well, that is, in fact, we find on the information  
level  
where is all the data  
about the qualitative state of the Eternal physical body

what the body should look like  
at some specific second, for example, yes  
how can we do management for example  
there let's assume in Infinite development  
and this coordinate system  
it is not sought somewhere out there in the Infinite magnitude  
not by means of large numbers of controls there

and we just find this place  
where is everything  
there it means inside the structure of the Soul  
the physical body is located Eternal

then it turns out that we are looking at this certain matrix  
as a coordinate system and we understand  
that at this moment  
so what is the optical control level  
we must have

i.e. we can choose optics for Eternal life  
this is a very important concept  
because the life of the Soul is an optical manifestation  
life is manifested optically

here is a man moving in the physical world  
different colors yes, even different optics  
from physical space  
life is dynamics

if we consider  
more dynamic systems of the Soul  
more well, in the color variant they are expressed Yes  
in action  
then we look at more contexts  
life of the Soul

because if you ask yourself, for example, a fundamental question  
there is human life

from the point of view of external knowledge  
besides what we ourselves understand  
what does life mean

i.e. there are, as it were, attributes of life  
there a person moves, solves problems, etc., etc.  
as if you take it and count  
that there is an external analytical level  
a complete stranger, for example, to a person  
before the first contact with him  
it has only external parameters of human life

the same thing exists in the Soul as if  
these are the external parameters  
where exactly is the multifaceted nature of many aspects of influences  
this is the manifestation of the life of the Soul

so when we look at it this way  
then we see the primary level  
that for the Soul there are also  
certain transition systems  
they are completely different  
there are individual ones for each person  
where the Soul first recognizes a person as if in terms of contact  
i.e. she is in contact with him for the first time

so there is always some level of first contact Yes

i.e. we can say that God  
at some point during the creation of man  
from the point of view of human logic  
this is also the first time I'm in contact with him  
as if man was created

actually for God  
it always exists  
Human  
there is no concept of " beginning " and " end "  
in the Perception of God

and from the point of view of human logic such a concept exists

and it turns out that during the period of first contact  
Souls and bodies  
The soul perceives  
perceives the human body  
exactly the same way it is designed

i.e. if the object of study has some functions  
then he perceives another object  
as a system  
well, which can have such functions

i.e. the Eternal Soul immediately determines instantly  
in the body  
the structure of Eternity

and then she begins to recognize him and to recognize him in terms of  
from a certain point of view the Soul always knows the body  
because it is an inseparable system  
but in this case we are considering an abstract model  
which really exists  
at the moment of a person's birth

and at this moment the Soul seems to fix  
the entire matrix system of the Eternity of the body  
and remembers

and then it turns out  
that this is the object of her control  
these systems continue to develop Yes  
and it turns out  
that the primary Eternal system  
physical body of a person

starts means Well as if in space and time  
develop  
to the next level of management  
nuances are already emerging  
already connected with the system of collective Consciousness

i.e. to the primary level of development  
the emergence of man  
corresponds to the level of Soul Perception  
and the Soul is organized at the very beginning  
at the very beginning of the World

i.e. it turns out  
every person is born  
in fact, in the very  
in the very beginning of the World Organization System

and it turns out that a person was born  
for him the world is just organized

logically, in principle, that's how it is Yes  
for him

at this moment he perceives  
all physical reality there for example or informational  
but in fact, from the point of view of the Soul, this is how it is

and it turns out  
that the life of the Soul includes  
transfer of information  
about the beginning of the organization of the World  
to a person

i.e. why is it necessary yes it is for the life of the Soul  
or the function of the life of the Soul why is it so manifested

since the life of the Soul is still Eternal  
The soul still lives forever  
i.e. some special elements  
Well according to the type of food there is no need for it  
that's why I say "for the life of the Soul"  
from the point of view of the consequence means for a person

and because the Soul transmits  
all the accumulated experience of the whole world  
from the initial system of creation of the World

i.e. when a person is born  
he gets absolutely all the knowledge  
which humanity has accumulated

the whole world in general  
since its initial level of creation  
including the movement of all molecules, atoms, etc.  
in all systems of the World

i.e. in fact, a person is born with a level  
which corresponds to well as if closer to absolute knowledge so to speak or what?  
where is the knowledge that corresponds in real time  
To God

and logically it is  
God creates man  
although it is born, for example, biologically  
of God is also Eternal and Infinite  
also have a nature "from the very beginning"

that's why everything fits together here  
when we see that the Soul  
this is the knowledge that is passed on to a person  
i.e. creates conditions for life for him

it means because only having all the knowledge of the World  
a person can carry out, as it were, a continuation of the development of the World  
Yes  
in its own development perspective

it means because if he lacked some knowledge  
then a person would first be forced to supplement  
and then as if to be born

so it turns out that based on the level  
Well like some kind of abstract understanding of Reality  
here it turns out that God when He means Self-organized  
He immediately turned on this mechanism of Reality  
in development

i.e. He immediately gives all knowledge to everyone  
and at the same time in this way  
so as not to miss a single element of knowledge

and based on this it turns out  
what God is actually creating here  
as if a personal system of the Soul  
or you can say that the personality of the Soul  
here by analogy what is there the personality of a person as a whole  
and for example, if we consider the concept of as if  
"personal characteristics of the Soul"

that the Soul is at a kind of sensory level  
connected with the body

It is precisely in this task of God  
not to miss any element of knowledge

and if the Soul doesn't miss it  
man he develops  
Well it's more harmonious there  
more can be expanded  
in terms of interaction with all the information

and it turns out that the Soul works like this  
how does life itself work

i.e. to a certain extent the concept  
"life" and "Soul"  
these are indistinguishable concepts

and it turns out that the Soul  
as a manifestation of life and universal Life  
it's like a consequence, or something like that, you could call it that  
Life of God means

and based on this we are already starting to work  
with the concept of simply "life"

and when we start working with the concept of simply "life"  
knowing exactly what the Soul does not miss  
not a single element of knowledge  
it turns out that this is how we simply live, yes

and we only need to be in this field of information  
work here  
that's how we live constantly  
i.e. Eternal life is Eternal work in the information of life

logically it is also so  
to live forever  
then you need to create information about life around you  
any element of information must be alive  
and then it turns out to be Eternally Living

well if it's some kind of external object there  
well, which relates, for example, to that Reality  
which one well for example, it does not correspond  
with the concept of "living objects" there yes  
then in this case we are talking about the fact that  
well if it's a stone there or some object  
maybe even immaterial but kind of one-time yes

here is exactly the question  
that life is a level that  
Generally speaking, it is very autonomous  
i.e. inside life every element  
has properties intended for life

i.e. a person lives in the World  
where are the external systems  
are practically not separated from it

i.e. it turns out that even if we take  
let's assume a big city  
many phenomena of some mechanical physical  
nevertheless, when he remembers something  
he doesn't separate this part  
i.e. when he remembers  
it's as if he attracts this information to himself  
Human

i.e. memory of movement Perception  
this is interaction  
and these are also certain manifestations of life

i.e. by analogy with how the life of the Soul is  
and using it for management purposes  
you can get Eternal life in any design

it also means any element of Reality  
perceives a person  
like a person's life  
and then he can learn to be Eternal, yes, as it were

here it turns out that these are the objects  
are drawn into the field of human life

and then any thought of a person  
begins to influence the subject  
it can change  
depending on the person's thinking  
i.e. it is a continuation of human life  
it is inextricably linked with the subject

i.e. the field of his life expands  
and here we come to that  
that when we introduce the concept of such a "universal Life", so to speak  
then we come to God to that extent  
where the Life of God is expressed  
as the Life of many Souls at the same time yes

and then here is the creation of the next Soul  
this is the work of God  
where He actually creates the next World

here then it becomes clear  
that the Soul is the whole World

and so, since it is an autonomous system, it satisfies almost all internal and external properties and qualities that's exactly why and, in general, thanks to this the next World is created, i.e. the next Soul

it means that the Soul is not just so to say well, some external systems there in relation to the World she is the whole world

and therefore all systems within this World they are living, they are dynamic and it is enough just in the center of the Soul make some movement you can influence an entire galaxy or for example there is some kind of instant control there

then you just need to see that this is the life of the Soul was extended to any element of the World

i.e. take as a basis for management life of the Soul life of the physical body combine these elements for example inside the physical body or just a physical body and then you can see that even the movement of the physical body in this case it affects Reality

and then it becomes clear that it is enough Well how to simply convert control then to the level of Thinking and then thought is already control

therefore when we know the life of the Soul we can even localize the human thought system we can practically deduce to the level of Macromanagement

i.e. it turns out that if we have let's assume some thought yes and at the same time this thought is visualized for us

then it is enough for us to have only one segment of thought, as it were

Well, let's say , for example , that we believe that there is

gravity  
which acts on thought  
after all, thought is also a certain level of photons  
and there are some interactions there  
and that means a certain sphere inside which there are more photons

i.e. as if at the bottom of this sphere and below  
at the level there it is closer to vertical  
there are more photonic elements

it turns out that we can inside Thinking  
create life  
because we get an autonomous system inside the thought

and as soon as we have this number of photons  
we are starting to build up  
and then one thought, for example, turns into the next  
we are simply increasing the control light  
then we can increase  
the structure of one's own physical body  
from the point of view of the resources of so to speak Eternal life

i.e. so that Eternal life in this case  
you don't have to do this all the time

it is enough to increase the resource of Eternal Life once  
due to Thinking and management  
and for a long time

For example you can find that level of management there  
where, say, for billions of years you can simply live forever  
without doing any additional management

after all, when God created the World, it was immediately simultaneous  
He did it in one go.  
He didn't do it there many times, did he?

This means that humans also have such a mechanism  
i.e. man initially lives Eternally  
even without any increase in control

i.e. there is such a resource  
what is in the center of the human soul  
this is the center of life of the human Soul  
where no additional resources are required

because the Soul may not feed there, yes  
she can just live forever  
because she is simply Eternal in herself  
she is in this space  
she is like that and this is just the property of the World

because the created World  
By God  
which for example is in the Soul yes  
and which means in itself  
The soul of man  
it has already been created  
why does he need to have anything else in addition  
in the form of some kind of nutrition or some kind of so-called energy, etc.  
this is already a created structure  
autonomous

By the way, this is a very powerful mechanism for treating diseases  
ability to highlight  
so the structure of human life is thus  
to see exactly autonomous systems  
inside for example there is that process  
well which needs to be cured

i.e. having seen the systems of life  
which do not touch  
with elements of external Reality  
we can very quickly normalize the organ system  
This is a powerful organ regeneration system by the way

but for this you just need life, the glow of life  
place it as if a little higher near the organ  
i.e. do not place it on the organ itself  
because then we contact  
with a specific place and local  
and do it near  
and here is the glow that is near  
quickly weaves creates an organ

because in essence that is exactly what it is  
Well there is a lack of an organ , for example  
in case of resection there is no operation of some kind  
in a person

that it is actually just an element of absence  
Well as if locally from the life of this system  
but there is still space inside a person

where is this life  
it is also an autonomous system

i.e. it is enough for the Soul to remember yes  
and bring it to the desired position  
i.e. in this case the Soul is of fundamental importance

after all, organ regeneration is practically happening  
around the canonical body  
and the canonical body is inside the Soul as I have already shown

and it turns out that the Soul simply remembers  
your condition  
this is a memory, this is the growth of the organ

and when we begin to explore this process further  
then it turns out that we see  
the following control structure

that when God talks to the Soul  
He creates the Eternal physical body  
i.e. in any contact between the Soul and God  
the body is always created by the Eternal

and therefore when a person turns to God with his Soul  
he passes through the Eternal body

here's an example there in prayers in the appeal for management  
for example, according to my Teaching  
turning to God is a necessary way out  
through the Eternal physical body  
there is only one way there  
exit through the Eternal body

and there is only one access to Macrosave  
only the Eternal body can comprehend all events  
and see all the connections at the Macro level

if if we consider some other design  
we still don't take into account all the connections  
only through the Eternal body

therefore Macrosalvation Salvation of all  
exit via Macroinformation  
it's a constant training in remembering that  
that when Consciousness passes through the Eternal body  
Consciousness is increasingly mastering the technique of interaction

bodies and structures

and it turns out that there is experience here  
the experience you have  
it immediately grows there instantly

each time it increases very strongly

and it turns out that when you act  
for example, at the level of yes, here is Infinite development  
then this experience is colossally important  
to see how the life of the Soul will be in the future  
shows you the next path

but the Soul, as a rule, gives  
some kind of guiding light for a person  
True, it gives it to a person initially from birth

and that's why this is the indicating level  
he is actually often very distant  
i.e. action must be taken here  
and the information is far away  
because the Soul is initially a very distant level  
for human Consciousness  
it comes from the beginning of the organization of the World  
and therefore  
and it turns out that often the tasks of the Soul are the same  
and the person, well as if sometimes it does not quite the same thing  
because he perceives that information  
as distant information geometrically distant simply

and in this information there are tasks that are right now  
i.e. to recognize this system  
a person must definitely learn, so to speak  
quickly turn to God

or does it mean to be able to turn to oneself Eternal yes  
means to your Eternal physical body  
at the level of knowledge of this body  
be able to then quickly ask God a question

i.e. through a question to God  
he can solve problems, for example, of the Soul  
which the Soul places before him

or else he must first make the management  
to the Soul

how to tune in to make control get answer  
but in principle it turns out to be the same as turning to God

because the level was originally created  
which is the Eternal Life of the Soul  
it will still be practically like this  
that you will go through the same thing  
but on the other hand, here are the controls

i.e. it turns out that in management there is a problem  
some side of the action  
and that's why when we look at  
life of the Soul  
we can see that the control space  
has a vector nature there

i.e. each element of the action  
has a very specific direction  
the elements of development are clearly located there

Here you can clearly see therefore  
why is it organized this way  
human physical body  
dense, specifically like this  
where there are specific information distribution systems

because the Soul by its nature is arranged almost the same way  
i.e. information is distributed within the Soul in the same way  
as well as the matter of the human physical body

and it turns out that we are our Soul  
We know it quite well, physiologically <sup>speaking</sup>  
i.e. we can listen to it and understand it  
if we look closely at the body  
or to what your body is capable of

i.e. a person can run quickly, <sup>for example</sup>  
This means it can improve athletic performance  
the same by analogy he can get <sup>knowledge</sup>  
at your own Soul  
if he, <sup>for example</sup>, begins to perceive  
exactly this analogy  
what is the analogy with the physical body  
in this case, the analogy itself can be, <sup>for example</sup>,  
it is not necessary to visualize there  
but the concept of "life of the Soul" is enough  
"life of the physical body" <sup>yes</sup>

and here it arises  
the most fundamental moment in the life of the Soul  
since the life of the Soul is Infinite  
She is a Soul connected with God <sup>yes</sup>  
with the physical body of a person  
and moreover, it shapes a person  
and organizes, among other things, the human physical body

then it turns out that together with God  
it organizes the physical body of a person

has a very, <sup>as it were,</sup> distant  
Infinitely distant substance of action  
where all questions are generally solvable and resolvable

i.e. there is such a control point in the Soul  
she is located maybe <sup>there</sup>  
<sup>Well,</sup> as a rule, near the physical body of a person  
and then the Soul is in the physical body of a person  
all  
it means that all issues are resolved

because the Eternal Life of the Soul  
it's still a solution to any problem  
any question is still a local value  
compared to Eternity  
it is always a solvable system

and it turns out that here is the light of this solved <sup>problem</sup>  
applies to you  
and you know for sure, <sup>for example</sup> there is a future <sup>there</sup>  
you can precisely control processes  
<sup>there is</sup> some kind of Eternal Infinite development  
and with all this you can in principle  
transfer this in great detail to your local events

so here is the transfer to a local event  
this is exactly the same as the Soul transmitting information  
physical body  
this is absolutely identical control in this system

i.e. here it is enough to look at how in this situation  
The soul transmits information to the physical body  
and you can easily  
from Infinite Level Control  
get control of local events

for this you just need to consider  
my physical body for example yes  
review events  
i.e. set a management goal  
and see how from your Soul  
information is transmitted to the body  
i.e. where  
where for example there where  
physically where does the information go  
on the elbow on the finger there  
on what part of the body just

and once you start seeing it  
you very clearly define the control connection right away  
i.e. you can control it through the skin yes

for example, the light hit your elbow  
Well, knowledge of the Soul, yes  
or on some part of the body  
you reflected in the event itself  
and that's all  
and you end up outside the control system  
i.e. this knowledge practically does n't affect you  
you directly control the Soul

and the body works as an external system  
as a system of some kind of supervision, even yes

it turns out that the body can be  
at this level of management  
that the tasks of the Soul can be  
for example, to apply in a certain way  
for your management

because the Soul always solves its problems  
and here you can simply direct the light  
simply by coordinating the actions of the body

Well For example there a person needs to go through several shops  
he chooses logically  
what store or what action to perform

exactly the same logic can be applied here  
in order to interact more optimally with the Soul

and that's when you increase this level of optimality  
well, like in training  
then harmony of the Soul and body comes in terms of management  
here the main element is Macro creation is mandatory  
because the main training  
This is what a person receives through Macrosalvation

and you get absolutely precise and reliable control  
accurate information  
and the one that is actually, as it were, infinitely widespread  
into external Reality

i.e. not necessarily only the World of a specific Soul there  
or a person  
and this could be the next world

that's why there is information flow  
from one World created for example by God and the World of the Soul  
to another system

because the interaction mechanisms are infinite  
Eternity cannot be local  
and therefore the Eternal Interaction  
this action must flow somewhere anyway

i.e. if we want to consider the concept of "Eternity"  
example, we are moving for some kind of even Infinite time  
therefore we immediately consider  
what is the next element of Eternity  
this is the level that gets there  
so which is like the next level could be like this  
or this is the place where the next level goes  
this place is not defined

i.e. Eternity gives birth  
as if the next system of Reality  
Eternity itself  
therefore the birth of the next World  
this is a necessity  
for the functioning of the Eternal development

i.e. the birth of the next Soul by God  
creation of the Soul by God  
this is a necessity  
which forms precisely the status of Eternal development

i.e. the creation of the next World  
this is a characteristic of Eternity

and based on this we can say  
that in the life of the Soul there is also a characteristic  
i.e. by analogy with how Eternity develops  
the life of the Soul develops  
there is a characteristic of Eternal development

and such a characteristic is  
at the first level of management  
and generally speaking, both in the final and in the initial  
this is the physical body of a person

i.e. the Soul is considered developed  
Well, let's just say it's okay and good  
if the mechanisms of Eternal development  
Soul synchronously as needed  
transmits to the physical body

i.e. here is the transition of the life of the Soul  
into the physical body of a person  
this is actually the entire creative development of the World

because they are perceived  
generally speaking, all informative data yes  
and it turns out that based on this  
if we don't take something into account  
it turns out that not all the information is perceived

based on such control systems  
in order to help yourself personally, for example  
there a person can in real time  
when he's doing something there  
for example, to concentrate attention  
on some one aspect of information  
on any glow that is closest to it  
and get the most powerful level  
well, what is called for example there is energy  
or there is some system through which events are constructed

i.e. if you look at it in general  
how events are built  
what do you need for this, what material, yes  
used in Human Perception  
in optical terms this is a certain optics

which is distributed for example in Infinite Development

and then the question arises

this optics generally speaking where to get it yes for example

Well, in Perception it is full of this optics

you can take it from anything at all

there from the nearest image from the nearest thought

generally from the nearest action

i.e. the closer a person gets, the closer he gets

to the center of your Soul

the more resources he has for action

for the Eternal development

even in terms of how to show it to others

i.e. in this case according to my Teaching

It is very easy to teach others exactly Eternal development

through the life of the Soul

you just need to move closer to the center of your Soul, for example , yes

glow from you there

which transmits knowledge to him

and if this is accompanied by words

then knowledge is often obtained many times higher up in management

i.e. more concentrated

and it turns out that when you

for example, you make the control go far ahead

i.e., for example, you staked out some kind of structure there

management made

and all that's left is for something to develop around it

you take the structure and increase its status even more

something is developing

you increase your status even more

that's why God is forced to know everything and be able to do everything

i.e. why should He be able to do everything

and why should He be in control of the whole situation?

because He must increase every time

resource of its management

i.e. something in the World has changed

He must take control of this and so on.

from a human point of view

and man is built in a similar way  
i.e. Soul  
life of the Soul  
this is an element  
where there are permanent add-ons of the next action

i.e. The soul of man is such  
that it is constantly increasing  
resource of your next management

and it turns out that there must be a mechanism in the Soul  
the same as God  
as a person in general <sup>yes</sup>  
where the Soul is also included as a control system, <sup>then</sup>

where there is some kind of supporting mechanism  
here is something that the supporting action is based on  
and then the next one comes

but here the mechanism is very simple  
human physical body  
which <sup>means</sup> expressed in optical terms  
reproduces a certain light  
and the basis for the next action  
is the body itself

the same in the Soul  
the basis for the next action is  
in fact, the platform is the Soul itself  
it's just that this action should be almost instantaneous

i.e. the platform has suddenly moved to another place  
is a platform for the next action  
but then the platform moves  
should be almost instantaneous

which is what God does  
He is present everywhere  
in Its Action

and it turns out that these are super speeds  
it is actually the existence of an element of information  
in any other place  
at the level of logic

this is true

The soul has its presence everywhere  
and then the only task is to follow up  
what's going on inside  
between  
one element of presence and another

i.e. it turns out that a person  
in the study of this management process  
he himself appoints where the element of fixation of his attention is  
where is the next element

i.e. it turns out that this is some kind of self-training  
where a person makes a decision himself  
makes a sample of the dynamic process itself  
and dynamics is eternal and universal  
i.e. in fact we are faced again with the whole World  
which is the Soul but *as if* from the other side  
from the side of a person already as a researcher

and by and large a person explores  
your own Soul turns out  
when he explores the outside world

because here I showed precisely the junction of the research  
from the inside  
and external position

and when he begins to apply these mechanisms, *for example*  
then for him in principle it should be

from the point of view of at least creative Eternal development  
everything is familiar  
because he knows his Soul from the very beginning

The soul is already there  
as an element of research within a person  
i.e. he generally doesn't do anything new at all  
he is simply Eternally created  
and that's all

when he realizes himself like that  
then everything in the life of the Soul is completely connected  
with the life of the physical body  
and then it is clear that with full docking  
the body lives forever

Naturally Forever

i.e. no need to strain yourself  
there is no need to use any technologies there  
there in large quantities for example yes  
and it is not necessary in large quantities  
For example there are some kind of superconcentrations to be done there  
or introduce some complex control systems there

and so we come to that  
that the original management organization  
that's where it all comes from  
this is the construction material of management yes

this is a system that already looks like this  
for example, like the physical body of a person  
and based on this happens  
as if the level of all further management  
i.e. the construction level of management  
is  
the shape of the human physical body

and it is enough just to perceive this form, for example  
we have the construction of the entire external world  
i.e. the World instantly arose from the form of man

then it is clear that God has exactly the same form yes  
as a person

if we take another element there  
then you can clearly see what is actually around the other element  
which has no human form  
there is no instantaneous spread of Peace

because here it is to prove this, for example, yes  
You just need to draw a basic control line

here is the life of the Soul  
which seems to reproduce external Reality  
but all external Reality  
this is already like a consequence , for example

there may be other people in the external Reality  
but that's a completely different aspect  
there it is a whole world and autonomous

if we take a molecule for example and ask ourselves the question  
and what is the difference between the molecule

maybe, for example, yes, theoretically it is possible to pose the question like this  
that she also has this molecule  
exists this spontaneous development of the World  
yes, it exists there too, but there will be a different system of connections

there will be molecules there  
there will be other communication distribution systems

and that is why there is a concept of "similar substances"  
where does the substance come from anyway  
because around each element of information  
similar systems arise  
such systems are a substance  
if it is a micromolecular level

and based on this  
in the life of the Soul there are also similar systems  
because the Soul has  
the same information as the outside world  
as I said there is a feedback system

it turns out that the life of the Soul  
it is the existence of emerging similar systems  
i.e. if there is a principle of origin  
this means there is a principle for further development

and considering that the Soul is an autonomous system  
then emergence leads to itself  
i.e. as if the beginning of the emergence does not exist

i.e. there is external control again  
the presence of God so to speak  
but God acting according to purpose  
God sets a goal somewhere in front of you  
and it arises here

i.e. He doesn't do the management here specifically, yes  
in this place  
but simply sets the task

i.e. it turns out that the source of control of some energy  
is the solution to the problem of Eternal development  
there is no need to look for or cut this energy somewhere  
or drag them in some masses to some place

there you just need to decide on the goal and that's it  
there you need to have the goal of Eternal development

and do this

then the concept of the so-called "energy" etc.  
this is all that is your Spiritual development in your aspiration  
and the autonomy of the physical body is clearly manifested here  
that you don't need to look for anything anywhere  
you have it all

when you, for example, already come to that  
that you begin to see the control of the Infinite  
i.e. you begin to understand that Infinite Control  
this is not really a problem at all

i.e. in the Infinite future the more you develop  
all the more so it should be stable for you  
and by the way, this is actually happening

who technologically applies the control system  
coming from personal systems and the tasks of Eternal development  
the more prepared a person is for the following situations  
the more stable it is, etc.

and based on this we get that  
that in principle for the Soul to develop Eternally  
you just need to perceive the Eternal development in everything  
just calmly, for example, in detail if necessary

and be able to achieve this Eternal development  
to orient oneself in this way  
what does the life of the Soul mean ?  
or is there information about the life of the Soul  
this was the level in front of you  
it glows all the time, as if inseparably  
i.e. you see the unbroken light of life of your own Soul

what is the life of the Soul  
this is life activity  
these are specific actions, these are specific movements

and when you move, for example, yes  
towards the life of the Soul  
then everything is going well and happily for you  
by the way, here you can immediately determine the structure of happiness  
and at the same time you develop in harmony [...]  
with the Soul in principle

you can basically see

that not only as if with one Soul yes  
here is a kind of fundamental aspect  
In principle, you are developing very harmoniously

and from this you can see  
that any events are possible  
because you are in control  
absolutely what do you control  
for example, everyone there is an Infinite Future

because the Soul is Infinite information  
and interaction with the Soul  
harmonious interaction  
this is the control of the Infinite of one's own future  
therefore it is natural  
and your own eternal development

therefore any management goal  
here it is naturally carried out only because  
that this light of harmony

light of interaction with Eternity  
carries out the event in any case

i.e. under any circumstances  
the event is happening  
the one you need

This concludes today's seminar.

Thank you very much for your attention
