

GRIGORY GRABOVOY  
The Teaching about God  
**The Vision of God**  
11/19/2003

Hello  
the topic of today's seminar  
is my Teaching about God  
subtopic is God's Vision

In this seminar I will consider  
the process of God's Vision for that  
to give people the opportunity  
who are studying this technology  
apply in your specific practice  
following the principle  
act as God acts  
create management structures accordingly  
through its structure of Perception

This includes  
your physical structure of Perception

that's why in this technology  
it is advisable to devote specific  
this is precisely applied attention  
to their already generally well-developed mechanisms of Perception  
what is meant is  
Spiritual Perception  
Perception by the Soul  
physical vision  
and generally speaking any other forms of Perception

in this case, consider the principle  
that this is the external structure of the World  
for example, the external structure of the concentrated World  
when there is pressure for example  
on the structure of human perception

let's assume concentrated light  
puts a lot of pressure on my vision  
how to see in this case  
what's behind this light

and the task is technologically the same in principle  
i.e. if you look at that  
as God sees it  
then you look at His Vision yes  
to Light which has a higher intensity  
than light well for example there is your organization  
including material

that's why this particular position  
Study of God's Vision  
i.e. to see as God does  
primarily related to the fact that  
to look at fundamental structures  
namely the fundamental structures of the organization  
His Vision  
from the point of view of God Himself

i.e. how God perceives his own Vision  
as He sees

and for this we need to consider a very simple example  
Well, there is a certain event structure  
there is some event going on

and as the Creator who created this event  
how does he perceive it  
He can also perceive the essence of the inner  
i.e. micromolecular level , let's assume

including seeing everything that is around the event  
and connect it practically in your Soul

i.e. we came to the conclusion that  
so that God could see the event  
as if organized in fact by Him  
He must look at his own Soul.

and through reflection  
see in your Perception  
i.e. practically build your Perception  
this event

so the Vision of God is the construction of an event  
including  
and simultaneous Perception  
through the reflective structure of His Own Soul

then for a person  
Soul of God  
this includes the manifested material World

first of all  
this is his degree of Thinking in relation to God  
i.e. to what extent he reaches God in Thinking

and then already  
manifested some material processes

comparing this for example  
with the physiological level of a person  
you could say that  
that a person for example waking up or being born there  
he first examines the internal structure of the body

i.e. well, what is always with him  
the simplest postulate for a person  
to have what is always with him  
i.e. it is his constant vision, yes  
on your own for example there is a body structure

and looking at the body  
as the physiological structure of the Soul  
in terms of its action, for example in Infinite Development  
exactly in this position

we can well say that by analogy with this  
God first sees the whole world

i.e. when He addresses the Soul  
He sees, among other things,  
and the own structure of the organization of one's own Soul

because for God who can create everything  
It means that he can practically create simultaneously  
Your own Soul

there is a fundamental difference in this  
between God and man in terms of action

because when we want to learn  
do as God does  
we must see what needs to be learned

here again it is absolutely practical

mechanism of action  
we must definitely see the difference

and then it turns out  
that for a person the same level of organization  
this is his spiritual characteristic

i.e. a person can create a Spiritual action  
which is aimed at performing some task  
i.e. for a person this is the level of the Spirit  
he can create the structure of the Spirit  
he can create the Spiritual quality of some event

and it turns out that by analogy with that  
as God does  
when God sees for example with the Soul  
and organizes the Soul, among other things  
organizes His own Soul  
starting from the primary level of your Consciousness

then a person does it in Spirit

and it turns out  
what is the level of primary Consciousness  
for God  
this is the Perception of one's own Soul

for a person  
this is the Perception of one's own Spiritual development  
by analogy with the Vision of God  
in this case  
the context is precisely the Vision of God

so when we say for example  
about the Spiritual development of man  
what is meant here first of all is  
development of the status of one's Consciousness  
exactly the way God develops

and when we translate already  
on physiological functions  
it turns out that visual vision , for example  
what is maximal there is most primary  
specifically in a more social sense, so to speak  
in terms of communication

because there is nothing to talk about

that it is physical vision that prevails  
let's assume in an event-level organization  
Of course it's not possible here

because there is a control element  
Yes, in my soul  
In Spirit  
there is control from God, etc.

and considering that the management is from God  
contains also the functions of His own Consciousness  
and human Consciousness

then logically we come to the following  
what is the Soul of God  
And  
The spirit of man  
united in a common conscious action  
what is called Consciousness

and from here it follows  
when we want to consider  
conscious action  
in relation to one's own body, for example  
then an element of conscious action  
on the fact, for example, of an existing body  
is its canonical i.e. correct  
from the point of view of Eternal development  
Perception

so we came to this  
what is the analogy of God's Vision  
the person has it  
Primarily correct perception  
of your own body

and when I talked about that  
that the one Body, for example, the Physical Body of the One God  
this is the center  
including the center of the world  
which gives generally speaking Infinite knowledge  
and the Infinite quantity is obtained logically  
conclusions

then the human body has the same property

i.e. Primary level perception

basically already existing  
gives an infinite amount of knowledge

therefore the person has  
Infinite status of knowledge  
in your own physical body

and it is enough to come from the physical body  
you can have the same vision  
in terms of event management, for example  
what is produced by the Action of the Vision of the Soul of God

here it is precisely by Action  
here are the functional characteristics

because the Soul of God  
this is also what I said  
organization of the Soul itself  
there is a difference in this

when we come to that, for example  
what we need to consider for example  
how to organize for example Spirit here  
as God does  
on the organization of one's own Soul  
in the process of Actions

then its characteristics are directed  
on the development of the Eternal structure of the World

for Consciousness  
The Eternal Structure of the World  
this is what we do from the point of view  
for example kindness  
in terms of accuracy  
human behavioral structure

if you consider  
that God himself for example yes always leads correctly  
then a person can see with physical sight  
some next element of the event  
also works correctly

i.e. physical vision  
this is an analogue of accuracy at the general level  
correct behavior of the One God

and when we start using  
this mechanism in cognition  
it turns out that if we use physical vision, for example,  
then we set the precision function  
Well as if in extrapolation, i.e. in expansion  
for Spiritual vision

then it turns out to be physical vision in this case  
will work as a training system  
which is constantly increasing its accuracy  
for example Spiritual diagnostics

Well Let's take a simple example  
diagnostics suppose there is no transport there  
distant space objects  
this is actually not the same thing logically  
for the Spirit it is the same

transport can be assumed to be seen with the eyes immediately  
space object suppose in three months  
when the module is determined

but at the same time, if the results coincide  
let's say I take my own practice

it turns out that vision is spiritual  
does not have a parameter of this interval  
in terms of performance

i.e. there is no parameter in Spiritual vision  
as if time stretching  
the concentration of the Spirit is like this  
that the time of the Spirit is universal

Well logically it is so  
The spirit is present in all phenomena simultaneously .  
this is an infinite quantity  
that is why time has a universal characteristic  
i.e. it practically doesn't change there

Thus  
we have come to the structure of the organization of the Spirit of man

i.e. how, generally speaking, to organize your own Spirit  
from the point of view of its fundamental structure  
and in the way God sees it, for example  
in the action of precisely the Eternal development

for this it seemed sufficient that a conclusion had to be made  
just logically highlight  
component of Infinite Time

Well, let's say take the highest intensity of glow  
in the structure of one's own Spirit  
Having selected, let us assume in advance  
just an optical phase of your Spirit  
and determine the concentration where there is no time  
i.e. time is sort of "squeezed out"

and here it turns out that the external glow  
for example, coming from God  
what i said  
look at the Sight of God  
i.e. to the maximum light coming to you  
this is the release of this concentration

i.e. we do it by an effort of will  
we take this structure upon ourselves  
and it turns out that we came to this logically

i.e. we begin to see the Vision of God  
because we concentrated time  
having come to the conclusion that this is  
expression  
namely, the maximum, as it were, Spiritual control  
from the point of view of Spirit management  
in the optical range in general

when we move into the bodily structure  
that's how God sees it  
on yourself  
on your Soul  
but God looks at Himself at the Soul  
generally speaking , essentially  
in the Physical Body of the One God

one could say, for example,  
located somewhere  
but here it is "somewhere"  
this is the Physical Body of the One God  
therefore God also looks within Himself

and therefore man  
he may well do the same thing

take this maximum expanded concentration  
and as if compressed as possible  
introduce into one's own organism

and it turns out that he sees God from the inside  
i.e. how God looks inside him  
i.e. how does God work , well practically in it yes  
in a person

i.e. why is it visible with physical vision  
some object created by God  
i.e. from the point of view of this mechanism  
it turns out that the system is , in general, autonomous  
i.e. it is not connected  
with external control systems

here from the point of view of God's Vision  
it all happens as if in one area

man watching  
sees those objects that God created

for God it is basically one level of Perception

and at one time I was just saying  
that every event is of equal value for God  
so it turns out that for Him  
need to differentiate  
from the point of view of development  
of his own essence of his personality  
that which would distinguish Him  
from for example yes to all external Reality  
with which He is often completely united  
but in essence He is always united

and it turns out that in this case  
and the task of creating a human being is revealed  
personalities  
which has its own vision

because only external vision  
directed at Him  
He can consider it , yes, it even turns out logically

looking at Him  
enables Him to think and know  
that He is not alone

and that the World, for example, is developing in an Infinite direction  
through for example His primary and own impulse

the same for a person when a child is born  
or is the next life developing there?  
or is life saved there  
the person in this case is  
in the center well as if the initial level of events  
when life grows further

so is God  
being in the structure of the World organization  
must see external vision

and that's when it's external  
i.e. looking  
and looking at Him correctly, for example Yes  
Well, in a general sense, let's say, for example , human vision  
essentially directed in the same direction  
where is God's vision directed  
well in the same direction  
towards Eternal development

geometrically, by the way, it looks very simple  
these are really just directed rays

co-directional beams  
True, they converge at one point  
they are kind of at the same point  
and manifested  
and converge

and here is this point  
this is the canonical level  
and God and man  
i.e. the human body is practically no different there  
from the Physical Body of the One God  
except there For example there are Spiritual characteristics

let's assume the saints had them in their time  
and have always been manifested  
very clear optical characteristics above the head for example Yes  
and generally speaking it could be looked at from different sides  
in sensory vision

here are the characteristics of development, yes, they are different  
but God has all the characteristics of development

so it turns out that at each level  
man sees God

i.e. he sees

Well, in its own way, really  
because everyone is different in their own way  
sees  
manifested structure for example object yes  
investigative system created by God

when we look at this process  
very well as if practically or so to say in a compartment  
then here it is quite easy to consider  
next position

for a person to be healthy  
it's enough for him in the area that I showed  
how to synchronize with the Body of God  
with the Physical Body of the One God

understand that he is indistinguishable there  
this is understanding  
gives normalization  
for example, a physiological event state

and has a very serious consequence for that  
so that, for example, there would be no possible nuclear catastrophe there

because for God  
the concept of "catastrophe" does not exist  
disaster cannot affect  
for example, the Physical Body of the One God  
cannot affect the structure of the World in essence

because the solution is as follows  
God  
there is His next thought  
this is the Norm of the World

and originally created the World  
Eternal development  
He will naturally not allow disasters

so when for example  
we kind of "squeeze" out yes  
the principle of extrusion, actually, is  
some undifferentiated light

what's going on here

so it's not even light but some kind of space  
more like the action of light

that's the difference  
what is the True Light  
and what is the action of Light

God radiates the True Light  
the action of Light often does not have optical characteristics  
and we see only that God gives knowledge  
so that this action is orderly  
and for example there harmonious positive

so in this case  
For example there is a theory of preventing disasters  
looks very simple  
all you need to do is just enter the light phase  
i.e. light is necessary for that  
so that there are no disasters, for example

when you start to output this structure for example  
to the level of one's own Perception  
then first of all you see  
that any part of the physical body  
this is essentially a manifestation of God's Action  
in Eternal development  
of the same Light

i.e. Light that initially creates for example yes  
the whole Reality  
then the body is, in general, the carrier of the functions of this Light

but functional Light  
it also has an Eternal structure of development  
therefore the functions of each element of Light  
i.e. each element of the body is also Eternal

for Light  
if we consider even just  
at the physical optical level  
crossings of crossed borders generally speaking No  
i.e. God and man are one here  
in terms of the action of Eternal development

I just gave a very simple one by the way

It is possible to have it at school even in elementary school  
show example

how is man united with God for example Yes

why is he a divine being from the beginning  
because the Light of God and man  
and man is also Light  
they are crossed there are no borders  
This is a basic example for school education

but in reality  
and for primary school education  
or even for preschool

when we look at this example initially  
then it is clear that in the education system  
no parameters and boundaries

those. Let's assume God's education system is like this  
Means Well, maybe it is and generally speaking it should be  
for example, to prepare a person  
that a person in any situation  
can correlate all processes of external Reality

because a born person must live forever

therefore he doesn't have time for education  
special time

so it turns out that initially  
this education is given again  
in the form of a light image of God Himself

i.e. Perception of God in the form of Light  
in the form of a certain level of external Light there, yes  
concentrated Light  
This is an educational technology  
where is the vision of God in the form of a Physical Body  
this is systematicity in education  
namely Divine education

and when we see this  
we see that in this technology

in fact, they are practically not separated  
systems of deep education of primary education

in this case, education is essentially one  
this is an approach to the structure of God  
to His level of implementation  
and to His understanding

in this case we are considering  
it is the understanding of God's Vision  
where Vision is both action and creation  
well, some object of information or events

when we look at it this way  
from the point of view of for example Well let's say everyday events  
it turns out that we can see quite well  
that any human action  
this is the Light-bearing, so to speak, action in this context  
where Light is what God sees  
and his  
and everything around it

i.e. the presence of God is always in any action  
and knowledge of God in every action  
it is a necessity for a person  
because it is practically a load-bearing platform  
for the development of the next event  
but from a human point of view

and when you look at this process like this  
then it is clear that the next event  
it is not separated by something like there is a special glow  
that the concentration of Light is more active  
well, like an event falls, for example, according to the lever principle, yes

somewhere, for example, Light comes from a person  
it comes out at some point  
and it comes out in terms of interaction with God

It's very easy to follow here  
that any event is built  
in interaction with God

i.e. God's Vision has  
as a going i.e. carrier level practically  
going, let 's say, through a person  
but towards the next event  
but also the one carrying this event  
level

and this unification gives birth to man himself  
which is already Eternal  
in Perception in Consciousness of the person himself

i.e. in this case the function of Consciousness  
was immediately perceived as such  
that man is Eternal  
because that's how his Consciousness is structured  
for example, given the given knowledge structure

and if a person is well for example, in preschool age  
or he was just born or in intrauterine development  
while this knowledge has

because from God's point of view  
Every person has, generally speaking, equal knowledge  
in order for example there was no macro catastrophe

so here is the equality of knowledge  
this is the manifestation of his body in action  
i.e. where does a person strive  
towards further life  
the child is clear, he was born and strives  
towards further life there

an adult is distinguished by the fact that  
that in certain cases it solves certain problems  
related specifically to for example with that  
that he interacts with God  
but for example not clearly at the level of the Soul often

often clearly  
so that the tasks are defined  
in front of him

if he can by prayer  
or there is the technology of my control for example  
in terms of interaction, yes  
with the Vision of God  
get in touch and get accurate knowledge

then in everyday life it turns out  
a person always chooses the same line  
either he is doing it right  
i.e. the co-directional light of its action

as I said  
there is the Light of God  
there is the Light of man  
and when they are aligned  
it is like a flow and a united beam in general

or they are not aligned  
and then the event status changes  
a person can have  
well let's assume there are some unusual structures there  
related for example there with a purpose or with behavior

then it's clear here  
that any destructive non-creative systems, for example  
in terms of Eternal development  
in general, in principle, as such  
they naturally don't get in  
to the required intensity of Light

i.e. in this environment a person cannot perceive  
True i.e. original Vision of God  
coming from  
coming from God Himself

and it is clear that it comes from God, for example  
Vision  
gives a true picture of the world  
i.e. it gives an accurate characteristic of control

Well for example, now look at the entire external Reality  
and there let's consider such a structure  
like the Mariana Trench  
which, for example, works, let's say, in terms of human Consciousness  
as a system that needs to be approached yes

i.e. let's say to say "Mariana Trench"  
It is desirable to have a proximity system  
to the depth of this depression  
there Well there is the deepest structure in the ocean

it turns out that I need to say  
some preliminary word or sound

and when you talk in advance  
you see the exact structure of this depression  
i.e. where is it located and is there any there? for example problems  
i.e. the approximation system

to the structure of what God created yes yes  
to the objective side of being  
it turns out that it also needs a certain technology  
and knowledge and action  
especially the approach  
to the structure of the True Vision of God

and here first of all I consider the first row  
the position of precise knowledge emerges

i.e. a person must know exactly  
where he sees precisely the Vision of God  
and where does he see, let's say, the investigative glow  
some objects of information

this is, in general, a choice of information  
i.e. differentiation of the information object  
when a person must make a decision almost exactly  
often in extreme conditions

and here it is often a question of choice  
this is a question of further development  
including all of humanity in essence

because if for example there  
any person responsible there at the nuclear power plant  
even the operator who influences the situation  
will make the wrong decision  
Quite problematic situations are possible  
there for all of humanity already

it turns out that the problem is choice  
precisely the exact position of action  
is related to seeing  
that God sees the following structure of the event

that's when you come to this  
I just raised it sharply now  
as if this information  
for management

that logically it's clear anyway yes  
that when you know that God sees and He perceives it  
then you see His Actions

therefore for a person  
Study of God's Vision

this is the study of the actual characteristics of the action  
what should he do now, for example, without thinking

i.e. let's take the same nuclear power station

For example there 25 years ahead

where systems mean energy sources other

this characteristic may already disappear and be considered dangerous

and let's assume 10 years ahead

it may still be problematic

and for God this characteristic is one and the same

i.e. He needs to be provided

in any Reality

always an exception to that

for example the wrong button will be pressed

at the nuclear reactor there, which is dangerous

i.e. God always acts in one time

therefore an element of action

is the identification of an event outside of time

Well, that's quite a long description

for the analytical level of Perception

even with a systematic approach

and therefore it is easier for a person to just

see how God shows him

what does he do as a man

that's when this person starts

a person perceives

correlating your actions with what God sees

he looks at that first of all

how a person should practically do

from God's point of view

i.e. how does a person do in this system

those. canonical

let's say a matrix system of action

a specific person

For example there in extreme situations

although not only in extreme situations

this technology can be learned

for action in any other situation

then there will only be a difference in that  
what is extreme if some situation is possible  
It would be better if it didn't exist, of course  
but the action will definitely pass and will be positive  
i.e. there will be no global destruction of the World

in this technology it is immediately visible  
that the original Action of God  
this is a general creative action  
and there is no room for a catastrophe

I have already asked this question in part  
in today's seminar initially

and when you are in this information  
by the way, it really doesn't happen

Next we go through the management, let's assume  
it's already a private matter  
for some local and private action

then the main thing here is just to learn  
be able to correlate  
i.e. to give knowledge to others so that they understand it  
then you come to private action  
through the same method

and it turns out that in this particular system  
spreading my Teachings  
first of all, it is to quickly transfer knowledge  
and be able to quickly convey from the point of view of that  
that both action and Vision and Light  
it's basically the same thing

i.e. transmission in ultra-high-speed action  
or more simply, it is laid into the future of another person  
precise action information  
and he sort of unpacks it and the mechanism of action is revealed

i.e. in the system of healing, for example  
this is very useful  
very often rapid healing characteristic  
another person

to lay it precisely in the Light  
into the eventful Light of that man  
this is the concentrated Light of Norma

and it will correlate his actions

i.e. he will perceive and do it himself  
i.e. free will here is absolutely complete  
the person who is going towards this

and it turns out that this is free will  
manifested there  
that since man was originally created creatively  
for Eternal development  
then this is precisely the concept of "free will"  
this is often something that a person, for example, does not know how to do  
therefore does not show suppose there is no precise action

and it turns out that it is enough to learn  
and he will act exclusively creatively  
from the point of view of external and internal development  
or the Eternal development of God precisely

here we come to the point  
that the development of God  
from a human point of view  
this is taking into account almost all factors  
and management of these factors  
for example, in some of your everyday target desires

and when we come again  
here is the task there to save the nuclear power plant  
or there is some other object of information  
prevent it from happening in the first place  
there is a possible global catastrophe

then this is the selection  
from temporary or something yes aspect  
from God's point of view  
for example, God, as I said, perceives everything in one time  
here it is expressed in that  
that a person necessarily achieves the goal of management

i.e. a person necessarily achieves that  
that there is no nuclear reactor explosion happening there  
Then

and it turns out that the obligation to achieve  
of this event  
which, generally speaking, is no longer a time characteristic  
for logic

this is the selection of that faction of Light  
that a person begins to practically this Light  
how to attract to the center of your Soul

i.e. he begins to transmit Light actually to God <sup>yes</sup>  
initially to the level of creating your Soul

i.e. up to that level  
when the Soul of man received its task  
that's why it happened at all  
from the point of view of the person himself

i.e. the person begins to perform  
their own tasks  
which, by the way, he originally laid down for himself  
even to the level of his own creation

and it turns out when we already start  
analyze this process  
we see that this is the synchronization  
i.e. the unity of the Spirit of God and man  
unity at the physical level  
event-level unification  
is transferred precisely into the boundless  
such a harmonious phase of human development  
and the Eternal development of man  
when a person harmoniously sees and interacts with God

and then all the surrounding nature appears

i.e. a person can understand  
how elements of natural Reality are created  
from this position

i.e. he can understand  
that the elements of external natural Reality  
this is the harmony of interaction  
with God with the One God

and when you start to understand this  
from the point of view of God's Vision  
you start to see what is happening in nature

i.e. through this position you can see  
what happens to a specific <sup>example</sup> there is a cedar  
with a specific birch tree, etc.

and if you are interested in this particular cedar  
or some specific birch tree  
then this is your task  
at the moment yes

or if it's a person  
then naturally we are talking about a specific person  
which is needed for example orient there  
to precise positions of Perception or development

when we talk about God  
such a context of action  
this is the knowledge of the Action of God  
towards you  
this is what he wants now at this moment  
from you

then it is clear that it kind of "wants" and let's say more in quotes  
because it's about assistance  
i.e. about an action that is essentially joint  
what is needed there so that there in the next second  
The earth was not destroyed, etc. , yes.  
i.e. absolutely some elementary positions  
they are known in advance

so these are the elementary positions  
if they are transferred to, for example, the physical body  
then the concentration of Light is such  
which is quite clear  
for example, each internal organ  
OR for example the entire physical body  
what needs to be done at the moment

from the point of view of the human structure  
a person physiologically functions like this  
that every organ is absolutely practically accurate  
if there is no, for example, any system of diseases, let's say  
so it can act absolutely accurately  
on Means well, even in general on the systemic level of future events

i.e. if we assume we have such a characteristic  
as a normal state of the body  
where organs interact  
and the interaction happens precisely

then for example if we consider  
treatment in this context of the disease

then the healing process must take place  
just on the whole by rationing  
as if the prognostic functions of each organ separately  
and each cell for example  
in terms of future interactions

but it is much easier to build a future model  
than to have a support system at the same time  
and which, as it were, holds and recreates the body  
work with this system at the same time

Well, that is, the difference is fundamental.  
or work on a moving platform  
or have a rigid platform for the future  
and at the same time construct a canonical, i.e. the desired system  
and how to approach her from the outside

and so in connection with what I showed  
this is the technology that speaks about that  
that all external events are that construction  
on which future events can be built  
i.e. it is practically impossible to make a mistake there, yes

in the external manifested World  
it is always possible to build an ideal structure  
with the right management technology, of course, yes  
approach to her

therefore, as a management for its tasks  
make it simple from the point of view of optics  
control  
energy , so to speak, to its internal

take out all future events  
in front of you  
as if the whole future Reality  
and see that this is the future structure  
which exists precisely in the Light coming from you

similar to how God does it  
how He sees the events of the future

and in this Light build your events  
and just naturally spread to them  
i.e. come on time

so you work now  
I work with you

by the way, in this structure of work  
try not to get distracted  
that's exactly what we assume is external  
there is some kind of parametric Thinking there  
because the construction of structures of future events  
should be able to work accurately enough  
By the way, this is where the fundamental difference lies

because it's one thing to build a target there  
one-time suppose impulse control  
which may well lead to yes  
to a clear, very specific result

it's another matter to build that structure  
which one is there for example visible subject to for example changes  
because you are working you may not be focused, etc.

so work through all the same things  
but very quickly and with concentration  
and if possible try to work this way  
that there is no possibility, let 's assume  
influence your control design

here is the Vision of God  
it precisely consists of that  
what do you see for example external light  
walking as Light we suppose including and often  
and the Light of some event

i.e. any object can also emit some kind of  
some light let's assume  
and when you see  
for example some level of external event  
then first of all I say  
about the inner Light of some object or some action

those. not light for example yes physical optical  
namely the Light perceived, for example, by your Soul

then it turns out that if you  
let's assume you have this action  
then you see that when God  
for example, with His simultaneous Vision and construction of events  
makes the event future accurate

then He relies as if on something that cannot be moved  
although He simultaneously organizes yes  
all external events of the World

and here is this support  
for the human physical body  
this is first of all his next event  
which is spiritually realized in him, among other things  
in its preliminary development, for example, yes  
in his next target

i.e. the aspect of sustainability  
construction of this design  
for a person  
is, in general, essentially the Spiritual Administration

i.e. Infinite quantity

from a logical point of view this is of course understandable  
because logically we get  
that's exactly the factor  
that the Spiritual level is like Infinite  
it has what is called the Infinite property  
level of stability  
because it exists in all phenomena

and from God's point of view  
this is the Physical Body of the One God  
i.e. the design of stability  
for global governance  
is precisely the Physical Body

so when we look at Vision  
from the point of view of the Physical Body of the One God  
i.e. how does God see, for example , having a physical human body

then we see that here we see basically the following  
that God He perceives  
firstly the sound form

at the same time, if we consider the Vision of God  
then the sound form  
so it should be generally downplayed

i.e. when God looks He simultaneously does

but if He says for example

then this action is generally expressed in the word and in the sound

i.e. an element of a generally targeted precise action  
consists in the fact that  
that the action manifested for example in one element  
either visually  
or for example by sound  
it always comes true

and if He wants  
for example, to implement some action  
in a word yes  
sound  
or for example with your own Vision  
then He will choose one or the other

and it turns out that  
and for a person this is expressed in that  
that a person can essentially do this action in exactly the same way  
i.e. he can either call there on the phone  
and some action will take place yes

it is possible to manage there with a mantra principle  
in audio form  
in one word, sound or words

or another element  
express the action of Soul management

i.e. for a person it turns out  
what exactly is the Physical Vision of God  
this is the management of the Soul by analogy

The human soul is controlled in almost exactly the same way  
as the Physical Vision of the One God

then it becomes clear  
what's on your mind  
i.e. a person perceives with his soul  
at least the physical organs of God's Vision  
which exactly happen at the same time  
and create man

i.e. any part of the Physical Body of the One God  
creates man  
This is a logical conclusion, generally speaking, in this case

and when you see such a design  
then it turns out that there is interaction  
cells of God  
means the Body of the Physical Body of God  
creates naturally all external Reality  
because the number of interactions  
it turns out to be Infinite

and it is clear that the Infinite existence of events  
any Reality can be realized

therefore this Reality  
this is natural i.e. free choice of God  
by analogy with what a free man does

and I specifically touched on it here  
the question of freedom of choice of God as a Person, for example  
that when we consider precisely the Vision of God  
then He is free to look wherever He wants  
exactly like a person, for example  
while in the physical body of a person  
representing yes or being the physical body of a person

and when you are considering here  
that's why for example there God is supposed to be there  
from the point of view of the logical level of a person  
looked somewhere

then for God this phenomenon does not exist at all  
The man is certainly used to it  
what if he looks at some one point  
then he basically concentrates  
somehow focuses on this particular point  
or there at this viewing level  
or events  
or some specific action, for example

but at the same time if we want to express  
let's assume the sound form  
then the sound form with such Vision  
she is being diminished

and in this case it is, well, like an action of the Soul  
depreciation of sound form

when God looks

then we  
well, i.e. we can here  
from the point of view there let's assume an ordinary person  
consider  
what a person can think  
that God can also locally perceive man

so how then should God act, for example Yes  
by analogy with the person himself  
i.e. how can God  
localize a specific person  
and highlight  
let's assume some kind of sound factor  
in general action  
or let's assume some target factor, for example

then it turns out that it is precisely localization  
for God  
this is the universal Eternal development  
according to the tasks of the God of Eternal Development himself

i.e. when all people strive for one goal  
God sees everyone, that means yes more clearly more specifically  
and in general maybe more works out yes  
direct to perform some specific missions and tasks

and from this it is clear that the more people are united  
there in terms of the True goals  
there for example Eternal Infinite development  
in a healthy physical body  
namely, a happy life for people to have  
the more clearly identified, the more clearly  
all elements of a specific person

i.e. a person becomes more disposed  
precisely to God  
in its generally speaking elementary action  
and then it is already possible to avoid it and it works out  
some kind of catastrophes, not only there, but also local ones  
but some minimal damage to the physical body  
there are small cuts, bruises, etc.  
i.e. even more diseases

and it turns out that this is the level of unity  
in terms of interaction  
also a technological tool  
from God's point of view

where He singles out each one then  
in conditions of a kind of universal concentration  
to Eternal development

i.e. to mean how to help or something  
speed up the speed of interaction  
with the Vision of God  
in terms of Eternal development  
need to concentrate more and more  
precisely on the task of Eternal development

and precisely according to the technology of my Teaching  
in this case, according to the methodology  
it means considering the Vision of God  
spreading information here to God is very simple

it is enough to imagine only yourself in this world  
i.e. your own understanding

there is such a level  
when a person presents his own understanding  
everything he knows is positive  
and everyone sees it right away  
in this world it is really so

i.e. when you are at this level of management  
you see that you are transmitting knowledge  
just as Infinitely as God the One does

and among other things  
and God who is manifested towards you  
for example, with your Physical Vision  
OR for example Spiritual Vision

i.e. Spiritual Vision of God  
it is more acceptable in terms of Perception  
maybe less concentrated systems yes  
Human perceptions

but the Spiritual vision of man  
allows us to highlight a kind of characteristic, so to speak  
of their own development  
what is the Physical Vision of God  
can be perceived  
only by the physical body of a person  
from the point of view of the entire Perception  
all actions

and therefore the physical body of man  
this is the level of the human Soul  
which essentially performs both at the same time  
and the level of reception of information  
from the Sight of God

and at the same time the level of implementation

i.e. for God  
human physical body  
this is the most harmonious level of the World

therefore in the Physical Body of the One God  
exactly Visual level yes  
like an organ that physically looks  
per person  
generally on the World  
it's just for the whole human eye  
absolutely exactly the same as that of an ordinary person  
physiologically no different

and the only difference here is that  
what God knows  
i.e. the concentration of knowledge in these Eyes is such  
what can you do from this Light there  
or recover  
or get the Event Norm there  
and at the same time you know that you have the same eyes

and therefore what difference does it make  
that you perceive the entire external world  
and then you are completely normal  
and you can develop forever

and so did God who created him  
perceives and develops Eternally

We came here at the right time  
I came to this fundamental conclusion  
that God has Eternal development including  
this is of course one of the characteristics  
because He perceives  
the entire developing outer world  
With Your Own Sight

then it turns out that when you have

for example the structure of future development in Infinity  
then the more you build up this structure  
the more you increase the events of the World  
the more you get development in terms of that  
as does the Physical Body of the One God  
i.e. you become even more physiologically stronger  
you are becoming spiritually stronger  
and you develop a structure  
as if your inner Thinking  
which always sees God

based on this  
we will look at the principles here  
it means remote viewing  
i.e. remote control  
there, for example, there is a clairvoyant controller, etc.

here it turns out that remote viewing  
this is an analogy of the development of the World precisely in terms of level  
as does the Physical Vision of the One God  
in terms of Spiritual development of this Vision

i.e. here in this, for example, formulation  
long enough  
but it's better to understand it this way  
that Spiritual development of God's Vision  
i.e. Light given for example yes by sight  
in terms of events  
and event organization  
further develops the topic  
that the Spiritual status of the event increases

i.e. for example there high Spiritual people  
develop this Reality, etc.

i.e. Spiritual consequence  
primary physiological impulse

it's exactly the same with humans  
physiological level of action  
will be expressed in that  
what you will definitely have by analogy  
Spiritual, i.e. informational investigative development  
any action from your physical body

and once you start to understand this  
generally speaking, take a closer look at this

you see absolutely clear  
Infinite truth is often  
but sometimes they are final but less often  
if we are talking about something like that  
to prevent  
some possible global catastrophe  
i.e. it is precisely the concentration of finite systems

then you start to practically see  
exactly as he sees with Physical Vision  
God  
from the point of view of Eternal development again  
I always make allowance for that  
what I give is still local, i.e. exactly that structure  
which I think is necessary  
there for example for Macro Salvation Salvation of the World  
and at the same time it is technologically simple

in this case it is used for that  
to make specific management  
we still have to study  
namely to have specific management

because the question is  
which can of course be sorted out  
fit perfectly in a generalized form  
to management  
but then where is the concentration  
as if a technological system

in this case, from this necessity  
namely the concentration of technology  
development of systematic perception  
I am considering in this case  
here is exactly some specific approach

but by the way I don't always do that  
Often it is necessary to obtain a specific technology  
have a very general idea of the system

namely, in my Teaching about God  
where the Vision of God is considered  
including Physical Vision  
His Physical Organ for example Eyes

then we can quite well talk about that

that here is localization by a person  
i.e. from a human point of view  
knowledge of this technology suggests that  
that we are still working  
within certain systems

we define them ourselves  
for example, we say that we will consider it here  
let's assume there is a specific concept  
having some boundary conditions  
these are the light conditions  
and we continue to work  
within one light pulse <sup>yes</sup>  
for example, your own or an external one

it turns out that the unification of the light pulse  
it's the will of a person in general  
what i said is the will of man  
where a person can essentially single out the impulse himself  
and make the controls yourself

i.e., generally speaking, he does not depend on anyone  
after all, from the point of view of impulse formation  
He is also the Light

and when you see a management structure like this  
coming from you  
then you come to that completely  
that God naturally still has Light  
comparable to the physical Sight of Himself  
this is the Light of His Soul

i.e. the Light of His Soul  
from the point of view of events  
for God, generally speaking, we are indistinguishable  
in terms of creating Action again  
events

God acts with some often one magnitude  
and either he made the event with the Light of Physical Vision  
or there by Spiritual and Soulful Vision

so here is the distribution of event quality  
often speaks about the characteristics of what He does

for example, reproduction of an external system

there in natural conditions yes  
the same tree rocks well fertile soil for example  
it's more of a visual context of the action  
that's why we see it with our own eyes

and reproduction by the Spiritual level  
this is the Action of the Soul of God  
those. Vision of the Soul of God  
this is the spiritual characteristic of a person  
in terms of Eternal development again

and from the point of view of technology, it is the Vision of God

and when we look at this Vision  
how Vision is comparable to what a person does  
for example with his clairvoyance  
yes direct control

not only here the concept of natural "clairvoyance"  
and the fact that a person really controls  
all systems of Reality  
while often being  
Well let's assume there in a state of sleep  
or there in an inactive way from the point of view of the person himself  
management state

after all, Light cannot bear external loads  
if it has other functions for example yes  
there is a man sleeping there  
its light coordinate system has been modified

but if he is resting there  
or he is actively doing something there  
after all, it's like a lever principle  
maximum concentration of Light  
from all over the outside world  
he generally always has the same one

i.e. as if Light in form  
in the form of the Light of your own Soul  
a person is always in the same essentially governing state

and when you begin to perceive this state  
then it is clear that all external actions  
this is what you basically deploy  
in front of yourself

when by analogy with that even  
how God unfolds  
or Physical Reality yes  
or Spiritual  
human  
it is quite possible to build the next event  
from the point of view of fundamental organization

i.e. let's assume **why** well For example there are a lot of fertilizers there  
there to bring under some big tree yes  
when can you do Spiritual Management  
and the tree will grow even more intensively

i.e. replacement of the structure of some material level  
It is quite possible with consciousness  
and practically anyone can do it  
there having planted something on my plot

so when you start doing management  
from the point of view of unity with God  
in terms of constructing Reality  
then the first element of this action  
is generally speaking the life of a person

i.e. the allocation of human life  
and what is the creation of such a selection  
that human life has an Infinite factor

we get exactly the level  
when that concentrated Light I spoke of  
for example yes, the selection of the very Vision of God  
for the Soul of man  
this is the release of precisely concentrated Light  
Eternal life of man  
and in that context  
what exactly did you do  
so that a specific person lives, for example, Forever  
or is everything better at once?

and when you, for example , highlight this structure  
then you see that for God, generally speaking, there is no difference  
if one can live forever  
so all people can do it too

and the transfer of knowledge was originally like this  
that a person could always master the knowledge of another person

and when you see this design for example  
Well as if in vain i.e. essentially and completely  
and at the same time on the Spiritual level  
which you understand, including verbally, independently

then your own unique path of development emerges  
where you can see quite well  
that any knowledge can be spread  
including knowledge of Eternal development  
and specifically by you personally

but the only thing that is needed  
there specifically do personal actions  
aimed at knowledge  
For example there are God's actions  
The Visions of God  
His level there is no physiology there

or let's assume the level of Spiritual development  
God himself  
in terms of developments

this is when we talk about the Spiritual development of God  
we are talking about spiritual development  
events that we perceive

i.e. people can see  
how is it perceived spiritually  
for example, by external observers yes well the same people  
events

and you can also watch how God teaches them  
here is the learning element  
teaching another person  
this is the highlighted Vision of God

knowledge from God means it is known for sure  
that God paid attention to him  
i.e. He focused his Vision

therefore He Himself is the exact canon  
in the allocation of a specific person in localization  
pass on knowledge to him

and such a person  
Well How means being practically under the Eye of God  
or being in a state

when God gives him knowledge  
in general you can say it like this

this can be said about him  
that this is a person who perceives knowledge  
while simultaneously being the Creation of God

well, that is, we can quite well consider it here  
the developmental structure of a given person  
as if he is developing his Consciousness  
in understanding this level and this state

it turns out that you can do it  
experience this state for yourself  
because when you see yourself  
or for example, you cooperate with God  
often do some elementary events

then this is the level of deification of man in general  
which is present in this context yes  
Perceptions in the form of words  
it is generally speaking an internal deep state  
self-aware  
even in the structure of one's own Consciousness

i.e. the Consciousness faction works often  
as an autonomous quantity  
realizes deification  
your own personality

i.e. you see what any person means  
including you  
characterized by the fact  
that here is the personality manifested in action  
when you deeply understand the structure of the World

but at the same time a deep understanding  
you should watch then  
on the external structure of the World yes as if

and the external structure of the World  
this is basically a whole complex of events

it turns out that the external Light is external Light  
i.e. internal awareness of personality  
and the outer Light  
this is what creates in essence

your physical body  
in terms of further development

i.e. we are talking about that  
how is a goal created in human action  
to understand this external Light  
you need to clearly feel some kind of boundary

i.e. Light is in principle a certain distinction with that  
to mean to do some next action  
somehow differentiate between your own goals and objectives  
or yourself there  
with this Light

it turns out that when we set this task  
then we solve it at the same time  
i.e. the system of demarcation is the solution

and that means the physical body is needed in general for that  
To God

for example, from the point of view of what He needs , for example  
it is the physical body of a person  
so that generally speaking some events  
developed and moved

and the same thing happens to a person  
a physical body is needed  
so that there would be an element of distinction  
according to the structure of that, for example  
that this person is in this place  
has a specific body  
and all the external glow  
This includes external glow

although it may be inside the person himself  
in terms of awareness of one's own personality

then it turns out to be basically just logic  
what I said I mean now in general for example, five minutes  
only within the logical control system  
told

it turns out that the external level of light  
this is the light that a person actually creates  
creating your own organism

and when we come

to the structure of creating one's own organism  
naturally then we should see  
and how do we even look anywhere?  
for example, to create something  
create next cell  
we have to look at this place somehow  
where the cell was created

and if we consider  
to the level of the general initial development of man  
then God naturally initially gave knowledge  
by self-assembly and self-healing  
and then a person in essence  
he collected himself somewhere

and when you consider  
this technology of knowledge  
then we see that here is the element  
generally speaking, the primary assembly, so to speak  
primary control element  
given to man in the expression of his desires  
i.e. its internal  
as if spiritual impulses  
levels of development of the Soul

and only then do we come to that  
that only then does physiological vision arise

i.e. a person generally speaking creates himself  
by first creating the structure of the Spiritual impulse  
let's assume some there is a future element of action

it's logically clear  
that a person chooses a goal  
when he first perceives some event  
at the logical level  
or there the structure of your Thinking  
clearly enough laid out  
in terms of behavioral structure

and then he already implements this action  
physical body  
does something in a specific place

and here it turns out to be some kind of paradoxical thing  
from the point of view of external observers  
situation

external well let's take it as it were  
some completely autonomous systems  
which seem to possess  
a function of external observation

and when for example we see here  
that the function of external observation is supposed to be such  
let's assume we see our physical body  
how is the body well there passing somewhere  
in some specific place

then we get here  
a fairly simple principle of observation  
as if from the point of view of knowledge by other people

i.e. here we have  
a very simple factor of self-knowledge  
how other people perceive us in general

i.e. if we are considering again then  
how does this particular person mean  
Well let's say we passed some specific place there  
so having done some actions yes

then he made these actions in accordance with God  
i.e. the fundamental principle  
how does it even work  
and at the same time freely for example Yes  
and at the same time interacting with God

then here it turns out  
which we can well consider  
very simple factor  
as if the next development of our Consciousness

i.e. it's enough to look  
how a person acts for example correctly  
can basically do the same thing

one can reason the same way  
what if they look at us acting correctly  
then you can teach someone this, for example

but from God's point of view  
knowledge is often given instantly and immediately  
then it turns out exactly like this  
Well, what is the paradox itself?

what does it mean on the one hand when we observe  
for example for people  
that is, the investigative system  
i.e. Eternal structure of development of knowledge yes  
i.e. some time characteristic  
what I have just described is the time of development of knowledge

or another moment  
that when we consider for example  
the structure of the next development  
as a structure of instant knowledge  
then it turns out that it means the human body  
i.e. we are looking at a specific person  
passing somewhere or doing something

then the person himself is the bearer of knowledge  
i.e. the person himself imparts knowledge  
precisely as if prolonged, i.e. linear in time  
future characteristics

the human body is that structure  
which creates knowledge

and when you proceed from this  
then from the point of view of the Body of God, for example  
when you look at the Body of God for example  
and consider the Physical, let's say, the Vision of God

it's quite clearly visible here  
that knowledge is generally speaking as a function yes  
physical body of a person  
and also an element of the future development of life

at the same time, knowledge comes  
from what has already been created, including by God  
Realities

i.e. here you can see very clearly  
what is the future Reality  
already created by the One God  
because His Physical Body  
it also builds the future Reality

but when we look at  
that His Physical Body originally built  
as if Well, that's all for us, as it were Yes  
and at the same time we were also

participants in the construction of their body

then it turns out in the Spirit  
well at the level of development of the Soul  
even at the level of structuring the Soul  
a person is practically indistinguishable  
it is precisely the function of Vision that is directed towards Infinity

Here it is necessary to highlight precisely this important characteristic  
there is absolutely no difference here  
in this structure, as it were, exactly what I was talking about  
where we look at human vision  
directed precisely towards Infinity

when we consider, let's assume, the term "vision" yes  
i.e. we can see at different levels

but when physical vision yes  
for example Spiritual vision  
Souls  
Consciousness  
and generally speaking there is a cellular  
generally speaking, all that can be said from the point of view  
from the point of view of the philosophical order, let us assume that there is  
providence, etc.

when everything I just described  
directed towards Infinity  
we get a completely clear technological structure of self-government

i.e. managing, for example, your own events  
in this case it is that  
what you can do in this event  
be aware of very simple structures of action

i.e. actions leading to that  
that events begin to differ

for example there is one continent yes  
Well, how did God create the World, for example, in terms of the development of  
space there  
and there is a change in space

there is an event  
there is a change of event

those. dynamics of the event

in relation to a static environment  
this is the structure of creation

formally static environment  
this is basically any environment  
which has static characteristics

i.e. for example there is some volume of liquid there  
added another volume yes  
some kind of condition there let's assume people  
and a change begins to take place among these people

i.e. there one part does one thing  
another one starts doing something else  
i.e. they are not united  
in terms of for example there is no single target management

so when it comes to Eternal development  
then the target management turns out to be united  
in terms of completely different actions

i.e. when all actions are reduced to one goal  
for example, yes, Eternal life and at the same time happy  
then we get a completely simple concentration  
in the form of, in general, the selection of terms  
Eternal life and happy yes

some sphere of information  
a certain ray of Light there  
he is the same in words  
the word allows means to set a completely clear form  
which does not change

in these words which I have just spoken about  
you can't change, for example, even a letter

it turns out we have allocated  
a certain fragment of Light  
if to this Light for example  
everyone is striving at the same time  
then you can definitely strive for it  
doing, generally speaking, some different things

absolutely all people are free

but the word describes the general action  
hence the word

this is the structure of the selection in this position <sup>yes</sup>  
in this from the point of view of this structure of my Teaching  
the selection of a very specific private system  
in the maximum number of events

generally speaking in infinite quantity  
external or internal events

and that's why it's initially clear  
that when <sup>we suppose</sup> such a postulate is considered as  
that "in the beginning was the Word"  
then the allocation of this level in this system  
it becomes clear  
that we allocate a fixed level  
where the Word can be God <sup>yes</sup>  
i.e. the Light coming from outside

but at the same time  
we allocate ourselves  
we distinguish it with our own logic  
its own development

and it turns out that for a person the concept of "God"  
it is just as spiritual and just as close  
like any other person, <sup>generally speaking</sup>  
in essence of the organization <sup>yes</sup>  
or something closer  
or at <sup>least</sup> not further away

God is the same man  
in terms of His specific action

i.e. God He is essentially then being <sup>yes</sup>  
in the physical body of a person  
He is no different from a human being.  
and yet He possesses there  
the same physiological parameters, etc., etc.

i.e. that's what it is  
Generally speaking, His main idea  
He must  
show as a person  
and being with a person  
show  
what is possible Eternal development  
prove it  
and at the same time give <sup>yes</sup> to technology

but then what's the difference  
just a person who is mastering these technologies, yes  
for example directly from God  
and simply transmits

it turns out that there is no difference here  
a control function that comes from one person  
or from all the people there  
or there from , for example, the Physical Body of the One God  
from the point of view of Eternal development  
she turns out to be alone  
universal control function  
aimed specifically at Eternal development

so when you realize this  
Now try to concentrate and do the management  
coming from you so that you already have resources  
you can do it for example there is that action  
what won't happen there at the current hour  
for example, yes, a macro catastrophe

having done this action, for example, they took and did yes  
We simply realized it with our consciousness  
maybe they didn't even accept anything technological there

in fact you did this action  
having constructed this Reality exactly like this  
how it is manifested, for example , in my words

i.e. this Reality is built by you  
here in this action  
and says that let's assume that it folded there by accident  
or there, as it were, this is a probabilistic characteristic  
in principle, of course, it is possible  
but there won't be any weighty evidence there

because the strongest evidence is the understanding of God  
when you understand less  
you understand your actions more precisely

and now try to highlight it  
this is precisely the precise understanding of the action  
i.e. the Light of action that you will produce  
must be absolutely accurate

future management future event

It should be absolutely clear to you

when you understand an event  
you are fixed precisely in the environment of harmonious development  
exactly, well, like in that future environment  
where absolutely everything is the norm

therefore, as such a generally simple training  
at this level of God's Vision  
highlight in this Light of God's Vision  
your event but very accurate

i.e. Spiritually perceive it very accurately  
this will be your management

I will work on your tasks right now  
for example with your own well there so that there is no macro-catastrophe  
you do this work too

i.e. try to do some kind of common work  
while constantly highlighting  
precision of your management  
a somewhat more complicated task  
I will work with you now

when you work in this technology  
don't go away  
from a specific one for example there is physical Reality

i.e. solve the issues so that they are already solved  
i.e. your future Reality  
reveals itself to you like this  
that the issues have been resolved

if the issue there, for example, is not resolved  
this should be quite clearly visible  
and you will have to build, generally speaking, Reality  
just again

i.e. there are no correction options here

that's the difference  
Physical Body of the One God  
that He doesn't correct it a second time

in this technology you can only  
rebuild

yes He can, for example, change the structure of the past , yes  
but the next construction starts all over again  
but every next action  
it's always a new action  
and it must be absolutely accurate

here is the question of accuracy  
I'm coming back to him again  
in this technology is of great importance  
as in principle and in essence it is always desirable to strive  
to maximum accuracy  
in any other technique yes  
in knowledge management  
precisely from the point of view of Eternal development

because once we know the exact technology  
we can say with complete confidence  
that the next element is predictable and controllable, for example

so here again  
go out already with Spiritual vision to what you have just done  
to a greater extent, for example , logically  
according to the purpose of the tasks that I formulated logically  
highlight a clear structure

and do the same with Spiritual Administration

the only difference will be that  
that the external Spiritual Light  
Infinite Level of Light  
going for example from above yes  
and as soon as he comes here  
he becomes Infinite

i.e. we give Infinity  
the properties of Infinity of Light arise then  
when we come into contact with this Light

and from here it is clear that in order to create  
Infinite World  
God must see the physical body of man  
or a specific person  
in which He sees  
The Infinity of His External World

and from here it follows  
what is external and development

This like a Macrocosm

let's assume there is space, some kind of metagalaxies, etc.

Microworld

this is the structure of the vision of God  
through the personality of a person

a person is aware of this  
so God also understands it

this is the level of awareness of the whole world  
this is a single criterion  
for Vision Perception  
Physical Sight of God  
and the Spiritual vision of man

i.e. God sees with Physical Vision  
how a person perceives the whole world  
With soul  
In Spirit  
or, for example, the most , let's say, active part of Consciousness  
close to a person precisely  
part of Consciousness close to man  
exactly sees when a person  
i.e. when, for example , he helps another person more

and then it turns out  
that here you can quite well see the Vision of God  
i.e. to realize His Vision  
and then it becomes easier

well, a simple one for example there is a situation, let's say yes  
or even more like a task

two drivers are driving  
here is one watching the road  
although someone else is driving  
but at the same time he can empathize  
and roughly feel what needs to be done yes

it is enough to tune into the Vision of God  
and generally speaking you can control the situation  
in this case

at least if he gets behind the wheel  
especially if you have rights  
he can basically do the same thing

and here it seems to work out  
that it is precisely co-Vision in this case  
this is the level of human behavior  
in a specific place for example Yes  
at a specific time there  
in a particular society  
but this is the level of human behavior  
in Infinite Development

i.e. if you set yourself the task  
for example, some billions of years pass there  
and the task before man  
live infinitely  
Well, it's his personal choice, yes.  
his personal for example there is happiness, etc.

how should he behave then at that time

and then we should basically look through it  
it is to perceive oneself, i.e. how one can  
just to see myself, really, just in that time

because the evolutionary system  
it means a person [...] exclusively a person  
since it is yes the physical body  
comparable to the Physical Body of the One God  
it doesn't change for example there physically  
what is changing around

i.e. this point of view  
this is the structure of the organization of external events  
just for those that should be there  
so that a person, for example, lives forever

i.e. the technology is basically elementary again, yes  
you can teach there at preschool level

but when we suppose we are considering  
management position as a position of action  
i.e. let's assume we can say  
what if the action is directed from you  
and your action, for example, caused  
some specific well for example the reverse action

i.e. you can, for example, catch some fish in a pond  
at the same time there is one less fish

then it means the opposite action  
Well as if this pond in relation to you  
that there is some reduction yes

but he is God  
He is always whole and He does not change.  
just as the physical body of a person does not change

i.e. the concept of "reduction" i.e. how to take something away yes  
from the control system  
this is still not the same level of Reality in essence

because if we consider  
as if the level of Real Eternal development  
then a person can and should manage Reality in this way  
that he practically creates himself  
the next element of Reality

when you kind of get to that level of management  
then it turns out that you can do it  
consider a position that is , in general, very simple  
what is the next system  
she's very well in general, well, it's manageable , so to speak Yes

i.e. you can quite well consider  
Let's assume a system of future management  
when it means based on the following development plan  
you can see your future  
being here

I showed it now  
absolutely accurate characteristics  
how can you see the future  
in terms of a managed future

i.e. how can I help?  
or there specifically precisely control the future  
so that the events that developed were such  
as is necessary for the Physical Body of the One God  
as God needs in principle in general

i.e. they  
I mean "in general"  
from the point of view of general perception in general  
as to God Himself  
and so it is with all people

and if all people need it  
To his creations  
so it turns out that this is it  
I mean the term "in general" i.e. in general to everyone yes

when we start this way  
consolidate the management structure  
then we can see it quite clearly  
what we can consider in this regard  
as if the next level of our own development

when our any private action  
directed , for example, to Infinity  
First of all, it is an action  
regarding regulation, as it were, of the external, let 's say so  
general level  
when you can consider this level  
as the level goes  
and in relation to you  
and coming from you

i.e. the point of unity of the external and internal  
this is God again

striving for God  
this is the exact desire  
in terms of Infinite development

and this striving for God  
this is basically the path  
i.e. we can say  
that we have the right path there  
when we do as God does

and when do we do this for example  
from the point of view of God's Vision  
where Vision is generally manifested and optically yes  
it is aimed at some specific action

it turns out that we have it all  
as if adequate characteristics  
for knowledge and for perception  
i.e. simple and adaptable enough

and it is quite possible to say  
what if we do for example  
let's assume some of our own action

well, such that we, for example, this action  
we lay it ourselves  
i.e. we form it ourselves  
then the origin of this action  
we should know anyway

i.e. we should quite as if consider here  
such a level  
what is like an action that is like going on  
from you for example yes  
it should be like this  
that you are confident in its positive accomplishment, for example  
from the point of view of Eternal development

because the impulse coming from God  
it is always aimed at that  
what exactly is the action that is taking place, it is like that  
what God gives to everyone  
it is the possibility of Eternal development

and the only question that arises is  
Generally speaking, what do I have?  
i.e. where this knowledge is concentrated

How does a person even understand this?  
what is given to him, for example, by God  
namely Eternal development  
and yet everything is located  
in completely real conditions  
when he should realize it and do something  
as if in terms of self-organization

it turns out that the action is for someone else  
or there is an action with selection  
like the next level of management  
this is what we essentially need to know that  
something we produce, for example, or what we produce  
this is the level when we should know  
the fundamental meaning of the produced

i.e. we must again highlight the Light of God  
how God organized it from His point of view  
How did he organize this anyway ?  
then our action will be correct

so here as a management  
take very for example there is a simple characteristic, for example

related to that  
what when you do not do management  
coming from you  
then this control is always precise  
if you see God's Action  
aimed at Infinity

i.e. you act freely, act as you want  
but highlighting the Light of Infinity  
in your future event  
which you control  
or the level that you create for example or who yes

then you can make the control very omnipresent  
well "create someone"  
for example, to create a cell in the body , etc. , i.e.  
or in a more general sense including

but this is often a more general meaning  
applies only to the Physical Body of the One God  
you need to understand that you can do it

that is why the goal of today's technology, for example,  
namely, to work through the knowledge of the Vision of God  
do it yourself  
using the mechanisms of his own Vision  
just by analogy with that  
how it is arranged, for example, in the Physical Body of the One God

as a practice  
try to use the mechanism  
there may be some kind of internal backup of the action  
i.e. understand independently  
and understand as if through the structure of external Consciousness  
God Consciousness

i.e. try to understand  
does God perceive this structure  
your control  
and what does he think about it yes

i.e. to consider through the Vision of God  
the structure of God's Thought

and synchronizing as if to understand  
here is a specific action  
i.e. find as many parameters as possible

for understanding  
then you will see more clearly  
precisely the visual level

although this technology is often like that  
what can be used here and not there  
the structure of the thought analysis there  
just look  
and you will receive healing of another person there  
exactly the one you looked at, for example

but the look should be like this  
that he was cured  
and that means you're cured and that's it  
the transfer of knowledge is already coming from you  
and the mood of your Soul

i.e. tune in like this  
that you can help everyone  
and it will really be so

This concludes the seminar
