

GRIGORY GRABOVOY
The Teaching about God
Soul of God
05.03.2004

Hello again
the topic of my seminar today
This is the Teaching about God
and structure of the seminar
this is the Soul of God

when we talk about that
what is the Soul of God
here in Human Perception
then first of all we should consider
clarity of perception of the person himself

i.e. a person must perceive clearly enough
namely the Soul of God
for clarity is the Soul of God
precisely in Perception

when we want to consider
how about the Soul of God
interacting with a person, let's say
builds Reality

then we see that the Soul of God and the Soul of man
they simultaneously build the human body

and it turns out
that the Soul of God which is manifested for example Yes
in the Action of God
and it turns out in the action of a person in his Perception
forms
like the human body
so is human perception

although this is on the one hand
may be a somewhat complicated concept
for Perception
when there is a kind of multi-component work going on

but on the other hand
that's exactly it It's like there's some kind of complexity to the situation

where basically two Infinite systems operate
allows us to reflect the basic Law of the World

where complex or, for example, super-complex systems
are implementing
precisely some simple and final level of management
and which comes from the Infinite environment

then it's clear what works when
for example the Soul of God
then it turns out that
a person who acts according to the Will of God
he can act the same way and infinitely

i.e. the concept is "death"
it just doesn't exist here
because the Action of the Soul of God
this is an action aimed at Eternal development
well, any element of information in general

so when we look at
such a position in management
that action is from the level of the Soul of God
this is an action that is primarily directed
to achieve Eternal development by man

because when we talk about the Soul of God
we mean this and that
that the human body is practically generally adjustable
using elements such as
let's assume the Physical Body of God

i.e. we can say
for example, if we set a task, let's assume
working well let's assume
man according to God's understanding
then it turns out
that God must give knowledge to man comparable

i.e. a person must see
how, for example, the Soul of God
interacts
let's assume with His Physical Body

and then we can say
that by analogy the Soul of a person for example
can interact

with the physical body of a person

but here there is just one "but"
which consists of
that God as the Creator of man

gave knowledge to the man immediately
in his physical body

i.e. the physical body of a person
from this point of view, this is also knowledge

and it is enough, for example, to focus in your attention
let's assume the status of the human physical body
for God
we see immediately the Soul of God

i.e. I brought it to the fact that it is the status of the body
i.e., it is precisely the movement of , for example , God towards man
through your Soul this is knowledge

those. in this case, the status of cognition
this is knowledge itself

and when we, for example, from this point of view
let's assume there to cure some disease
or make control
as God does for example
then we need to see
how is the Soul of God in general
reacts to some event

i.e. to be able to highlight
it is precisely the element of control from God
and you can perceive it with your own eyes

but then we must know
how eyes are organized from God's point of view
physical eyes let's assume
or the eyes of the Soul of man

i.e. we can see
what do we suppose the Soul has similar eyes
The soul of man
i.e. the Soul somehow perceives
and therefore in relation to a person, for example
these are the eyes of the Soul

it turns out we have concepts like this
in general, conceptual systems arise
what are the eyes of the Soul
this is our understanding of the Soul of God
i.e. we can then with our Soul
see for example the Soul of God

in the context that these phenomena
they are inseparable

i.e. Creator
God created, for example, the Soul of man
He's at some point
still does not lose the gap with the Soul
and moreover, it is constantly present somewhere

Well let's assume by analogy with a person
a person is born there is an umbilical cord
She's kind of torn after giving birth
but nevertheless the following process continues
that for example a mother can still control her child
by means of let's suppose there is Spiritual Perception
yes, except physical

i.e. by analogy
there is a connection between
The Soul of God and the Soul of Man
so this connection exists
implementation in action
Physical Body of the One God

i.e. we can see
Actions of this Body
and so it turns out that as soon as we enter
in the parameter exactly as if co-operation yes
may be of microscopic action
some microelement action
we can act quite consciously
when it comes to multidimensional
or about various processes

i.e. how to save
absolutely accurate perception
all processes of diversity
if you perceive them simultaneously

i.e. well imagine
that you remember many pictures at the same time
stories from physical Reality
how to do it like this
so that your Perception remains concentrated

here in this technology
when do you work
precisely over multidimensional information
it is quite possible to do this

it's enough just
concentrate
at the level of Action of the Physical Body of God
where your Soul is also manifested
for the Action of the Physical Body of the One God
always points to your own Soul

if you want to know
where is it from God's point of view
your Soul
look at His Physical Body
and you will see the location of your Soul
from the point of view of the Soul of God

i.e. we have already defined the coordinate system
where there is diversity and a lot of well in general, not only multi-vector
but also a lot of so to speak parametricity of the system
this is the level of God's Action
in relation to a person

i.e. it is enough to see
Action of God
in relation to a person
and the multidimensional system becomes clear to you

because the Soul of God is the maximum
multidimensional system
for a person
and so that we can know it
and use the resource of this knowledge
For example there for Eternal development
or in general even just for treatment
then we should see let's assume a connection
between treatment and Eternal development

i.e. in Eternal development
a person must be able to restore himself
as if over a constant period of time

it turns out that when we want
see such a structure as the Soul of God
we must definitely see
namely, an action directed towards a person
i.e. to look, in fact, as if through the Eyes of God
but already with Physical Eyes
i.e. we must understand
as the Physical Eyes of God
look at the person

if for the definition of, for example, the Soul of God
we look through the eyes of our Soul
i.e. through the eyes of, for example, the Soul of a person
then the opposite action
this is the understanding of the very Vision of God
how does god even see you

and when you start to understand this
you may well react
Well, a simple example
if you know that the other person
for example, he knows about, let's say, where you are
or what are you doing for example
then another person
maybe on a physical level
well, give some recommendations or wishes
i.e. he sees you yes
and there is already feedback

or even you are talking on the phone
there is a kind of coordinate level
i.e. the other person knows about you yes

that's when you get into that generally known feeling
you start to see the next entity
this is why god needs to see you

when you show Him
your location
you receive information from Him
and in this case

you receive information from His Soul

here is a very important aspect in knowledge
that the Soul reacts only to yours
in general, a free exercise of will

here is where the peculiarity lies
it is in the technology of this management structure

but once you see
that the Soul of God, for example, works for you, let's say
precisely with your free will
what you see is what you get
absolute solution to all questions
already from the point of view of the Creator of the One God

that's when you get this phenomenon yes
it is the solution of issues
because God Himself does it with His Soul, moreover
then it turns out that the issues are resolved
precisely fundamentally
or for example finally
from the point of view of this particular case

i.e. let's say when you do management
and you need to understand
and have you achieved control or not yes
i.e., to what extent from the point of view of all the interconnections in the
World
you made precise control

then you just need to look at everything
what action is located
at the level of Action of the Soul of God

i.e. when you see
that God acts with his Soul
it means the action is achieved harmoniously and it is universal
i.e. it is final
this is the result

from the point of view of technology, namely Eternal development
This is incredibly important knowledge
because in the criteria of Eternal development
There is only a level of knowledge in essence
because there are millions of years to come
what will happen in a million and a second

this is the answer to this question

and when you do management for example

Well there let's assume a person lived a million years

then the next second he should know

that he will continue to live

then it turns out

that here is the knowledge of the end of the action yes

exact knowledge that is stored in general

as if in the genetic code, let's say , of the person himself

or let's call it that in the matrix of his Soul

this is the Action of the Soul of God

Free Action

by analogy with that

what exactly is the Soul of a person

free and the soul of man

solves the main parameters in management

so is the free Soul of God

makes the final move for a person

but in essence God is always free

so considering that the Action of the Soul

this is a universal action

so in this case I am considering

it is the mechanism of the Action of the Soul of God

because for God

His Physical Body

this manifestation is essentially for a person

so that man could Eternally develop by analogy

those. transfer of knowledge through the Physical Body

for human perception it can be local

Well For example there is the Physical Body of the One God

does some action

and a person can learn

some specific system, let's say

or some kind of control system

including access to the level of the Soul of God

but at the same time he learns in general in this case

it's absolutely clear

as a level from person to person

i.e. he learns a specific technology

and technology in this case can be

although it is universal

but it is tied quite clearly
for example, on the Physical Body of the One God

i.e. as if a person learns from a person

i.e. it is still a transmission level
where a person can know
including the Infinite Essence of the World
and manage the Macrostructure of the World
but at the same time
he should, for example, remember in his memory
here is the Physical Body of the One God
at that moment it was
and what did he learn

when we talk
on knowledge transfer through management
where it is the Soul of God that gives knowledge
then here we see the status of universality and simultaneity

i.e. the Soul of God
doing one thing
for example, a cure is done
from some minor illness , yes

as if exactly by volume
or some harmless disease
and it turns out that if the disease is small in terms of tissue volume
i.e. it affects a small amount of tissue
as a percentage, for example, of the whole organism
or it is not dangerous at all

it turns out that this action
instantly spreads to everyone
i.e. when a person sees the Soul of God
he sees the whole mechanism of treatment

but when we consider, for example,
control structure from this level further
then it turns out
that for God only
create a healthy person once
and everyone who has access is always healthy
or can be restored

because why would God undertake
further actions

when it is enough for a person to simply find
knowledge channel and see it ^{yes}
i.e. practically come back to Normal

and then from the health level
further arises
already the level of practically favorable developments
or a favorable combination of events
this person
where the concept of "combination" is Action
again and the Souls of God
and the Physical Body of the One God

i.e. it turns out when we consider
what is the level of Norma
this is the access level
for example to the free Action of the Soul of God
we must show the factor of self-discovery
i.e., for example, your physical body
or your thoughts

pay attention
namely the structures of the Soul of God
and it turns out to be a free Action of God
this is our management

i.e. in this case
we get information due to that
that God in his free Will
drew attention

and it turns out that we work precisely in the context
just like with a person in this case

i.e. it turns out that with such a ^{generally} Macro level
as the Soul of God
we can work almost at the level
just like a person to a person

and based on this
it turns out that if we, ^{for example,}
Well as if in practice, or something like that, of the usual understanding
we believe that ^{let's assume} the Soul of God
it's ^{like a} complex concept
and such a Macro concept

it turns out that development
it is this technology of knowledge
how to consider and see the Soul of God
leads to a human level of knowledge

i.e. from the point of view of the Soul
So God is more human

Well in general this is a conclusion yes

but the thing is
that when we look at the management process
for example, related to that
what if we consider for example
resurrection processes
or healing processes
from some kind of complex diseases
although these may be completely unrelated
resurrection is a process that is completely independent of treatment
even the most severe disease
this is not a resurrection

because if a person does not mean he left
it turns out that in the biological sense there was no decay , for example
then it turns out that he didn't die

this is the concept of "undying"
This is the main aspect in the management system
from the point of view of the Soul of God

Eternal Soul of God
forms the Eternal Physical Body

i.e. by analogy it turns out with this
we can well consider the following process
that when the Soul of God reacts to a person
exactly as the Soul of God
i.e. the Soul is aware and self-aware of Itself
how exactly is the Soul of God

then it turns out
we can consider the same process
and in relation to man
here I said the concept of "self-awareness"
i.e. in the Soul of God there is such an element
this is very important

that the element of self-awareness
that this is the Soul of God
this is a voluntary action of God himself

i.e. God gave the element of self-awareness
For the soul for that
so that the Soul is able to create
Infinite Reality

and as soon as a person
Well like this spring or something
in the system of information development is found
he begins to understand
what if he realizes
the structure of Eternal and Infinite access
of your Soul
to any information system
then he too can create Eternal development

maybe of course it is not completely clear
as the Soul of God does
but at least God laid it down
a concept acceptable to man
into Your own Soul
from the point of view of human perception

but when we look at
from God's point of view
He already knows that He creates everything.
i.e. He is already Eternal
He already knows that it is He, yes
this is His Soul

here in the Infinite World
the concept of the "Soul of God"
as a local information object
it is still a special access system
for human Consciousness

why do i say this exactly
because the Soul of God is Eternal and universal
but it is still natural for a person to single out
locality factor
that's why God laid it down specially
this is the level of Self-knowledge of the Soul
thus introduced the level of Self-Recognition of a person

this is how, *let's say*, a person identifies himself
i.e. why does a person think, *for example*
what's in Infinite Level Control
this is his action
self-recognition is meant
in Infinite Action
and in Infinite development

but here there is, *in general*, a very simple factor
that a person only has to allocate
its presence in the Infinite Development
it already exists there
this is its action

i.e. knowledge of one's actions
this is the accomplished action
in the Infinite level of development

if in the end
it is only possible
local presence level
i.e. the final action
this is still, *in general*, some kind of fragment, *yes*
Infinite development
and therefore in the final action
the system is more flexible

i.e. to say definitely
what is in this final action
only this person works
and this final action depends only on him
this is practically not always possible

but when we talk about Infinite action
then we see that in the Infinite action

it is precisely the factor of universality
gives a person the opportunity to highlight
your own line of conduct
i.e. a person can actually
learn from yourself

and when, *for example*, we consider
let's assume a factor of general development
we see that the same is true for the Soul of God
has the property of Self-knowledge *yes*

and the training itself in general

i.e. the element of self-development of the Soul of God
This is a fundamentally important point
distinguishing the Soul of man
from the Soul of God

i.e. if the Soul of a person
has more ability
for example structuring
then the Soul of God may have a function
Self-knowledge
and Self-development
and Self-study

and therefore by analogy with the Soul of God
the level of the human physical body has been created
level of human consciousness
where a person can develop himself , for example, yes

i.e. it turns out that a person
more initially similar in its manifestation
precisely on the structure of the Soul of God
in fact, on the Soul of God itself, but in Action

and it turns out that when we look further
this process
then it turns out that way
that a person is closer
to the fundamental level of God
we can definitely see
as from the Soul of God
is being created
The Physical Body of the One God
if we consider , for example,
God Consciousness Organization Status
near the Soul of God

i.e., for example, let's consider the level
where God is, so is man
and we want to see
like near the Soul of God for example
His own Consciousness is being formed

so here is the Consciousness of God

from the point of view of human perception
this is a human action
but in Infinite development

i.e. the criterion of God's Thinking
it is always the endless development of man

and when you start for example
Well like this one is a bit more complicated
possible for the Perception of others
or there are other people who are not involved
For example there is an infinite level of development in every action
consider

then you see that from the point of view of your process
this factor is simple
i.e. the task is , in general, trivial and simple
how to teach complex knowledge means well other people yes
if this knowledge is considered complex

it's enough just to come to a point of view
what from the point of view of well like some people
this knowledge is complex
then they will become simple for you
and your general condition
it is precisely the ease of assimilation of this knowledge
will convey simple constructions to them for understanding
i.e. other people will also learn this knowledge

i.e. if we consider
that something is difficult
for knowledge
it turns out that in essence it is not difficult for everyone
as if the opposite meaning of this statement
if it is difficult for one person
so it's not difficult for everyone

and according to this principle of self-knowledge
It is the Soul of God that develops
i.e. every piece of information
this is the level of practical development
all external fragments

and thus is formed
the inner Reality of man
a person's feeling formed , for example
how can human feeling be balanced

his physical Reality
or influence his physical life

in order for a person's feeling
affected physical life
it is necessary to consider first of all
level of organization of the sensory plane
those. interaction
various fragments of the Soul of God
this is a formation
the inner world of man

for the statics of the Soul
this is the human body
its like a material level yes

and when we consider interaction
those. development of the Soul
our feelings develop in the same way

and it turns out if we want to know
where does what feeling come from, for example
from the point of view of the Action of God and His Soul
we just need to look at everything
position means interacting parts of the Soul of God
and the matrix of our feeling becomes clear to us

I exclude in this case, for example, the feeling of Love
where Love is a universal feeling
which is completely individual
i.e. this is a level that seems to be given from nowhere
a person just has it and that's it
this is the status of his own knowledge of God
through Love
i.e. the level of interaction

in this case i mean
any feeling other than Love

i.e. when we consider the feeling of pity there
the feeling is, for example, some other
Well there is a desire to achieve some goal
let's assume let's take and express this concept as a feeling
although it may just be a desire yes
logical status

i.e. logic can be translated

to the level of feeling
if you indicate that feeling
this is some kind of action

exactly the same when the Physical Body of the One God
organized by the Soul of God
shows some action
we can create designs
where some action is a transition level
from one level to another

i.e. to clearly indicate, for example
where there is, for example, a sensory level
and where is there, let's say, a logical level
often not always, for example, yes it is possible
especially if you act quickly

that for example arises ahead
or there is a feeling ahead let's assume yes
or an action occurs ahead

then it turns out that when you start working
it is precisely in this system
you can differentiate the information very clearly
i.e. what originally
Reality signal i.e. what will happen in the future
or the element of Thinking

i.e. you in this case
let's assume you are thinking through some information
or is this the Reality of the future

in this technology you can very clearly recognize
signal of the future
moreover in this technology
you can learn to predict very clearly
i.e. you can see the system of connections and their differences
because when we talk about the Soul of God
we exclude it
an element of God's Thought after all
from a human point of view
i.e. we are talking about the Action of the event plan

for the Soul of God
Action
and event
and generally speaking human thinking

it's the same thing

and it turns out that here
highlight Thinking
in general it turns out to be elementary

enough in the background
in general, even against the background of the Light of the Soul of God
consider the action of human Thinking
and it is immediately clear what the essence of his event is

i.e. mechanically or something like that it looks like this
take think over some situation any
and from the point of view of your Thinking
your future is immediately visible

and it turns out
depending on the structure of Thinking
you can completely manage your events ^{yes}
elementary level of thinking of your own

those. please note
what is your current Thinking
influences the structure of the future

by the way, they are also treated
for example, complex severe diseases
by enumerating the structure of Thinking
in relation to the management position
well to the disease system

i.e. you enter
into the structure of some platform ^{yes}
and the platform is the Action of the Soul of God
or, in fact, the Light of the very Soul of God
and whoever succeeds can
stand up
to the position of the Soul of God in general

and then it turns out
that when you have such a basis
then your Thinking is Salvation
and by the way, any Thinking
this is the salvation of the element
which in your Perception

i.e. if at this level

you just look at the person
who needs help
well, just for example there with physical vision yes
look with your eyes

and at the same time you can well for example to do
some kind of construction of Thinking any
you still save this person
i.e. you still help him

and from this point of view it is quite clear
why is God being supposed
well, even on one level of Perception
helps everyone at once
He sees everyone simply
and it turns out
that He thus builds Reality

when do you start doing
further analysis of Reality
from this point of view
it's clear that
any event
any level of reaction of Reality
For example there is a plant there
is an Eternal construct
from the point of view of the Perception of God

but why for example does a plant not grow forever
from a human point of view yes
if we start to consider
this difference
in the construction of human cognition
it turns out that it is enough for a person
just to look at everything
plant organization level
from the point of view of the Soul of God
and he can restore the plant
or for example give the opportunity
Eternal development to the plant

but for this he must do
some physical level
i.e. build a nature reserve there yes
or create some
namely the conditions of physical development

that's why physical Reality exists
where is a person on a physical level
completely free

he must be able to
in general, knowing the technology, it turns out to be Eternal development
be able to have social status

transform
control is practically on oneself
thus in Eternal development
to create conditions for Eternal development
any element of information
creative element of information

and it turns out that in this design
there is only one level of organization of Reality
where Reality is formed
constantly
multilayered
and Infinitely
from the point of view of the Action of the Soul of God

if we want
for example, to get a cure for some disease
complex for example
then it turns out we should see
as from the point of view of the Soul of God
this disease, for example, is restructured

i.e. we need to understand
what is happening at this moment
in the Soul of God
when the disease restructures

or do we need
meet a resurrected man
we need to see then
what fragment in the Soul of God
as if responsible for this information

i.e. there must be a clear targeting of the action
when do we start to see it
we see it quite clearly
where is the resurrected one anyway

and it turns out

the level is kind of completely normal
coordinate system for example yes man
in the recognition of the World
or there in the formation of the structure of Reality
understands absolutely clearly
what is where

a person gets into
to the level of harmonious attitude towards the World
and becomes harmonious

here is the exact knowledge of the control system
exact knowledge of any action in general
this is harmony

and it turns out from God's point of view
he is in universal harmony
because he knows everything

and when do we start
Now this level needs to be transferred to yourself
it turns out that for us this is what
in harmony for example there is no end there
meaning in terms of time of action

then the man took it there let's say he did something with his hand yes
he made some movement with his hand
and this is the interval of the final action that results
for let's say a person
so that this level would be Infinite
it must be carried out
in the reflective structure
movement of the Soul of God
in Human Perception

i.e. if, for example, you just carry out
it's like a level of , let 's say, some local action
which manifests itself somewhere in the Infinite magnitude

if you want to spend
For example there with your finger and get control
by management objective
you must see the Light of the Soul of God
in this area of Perception

those. formation
optical background of action

near the physical body

i.e. it turns out that you can do some actions

for example I need it to be on the peninsula

let's say somewhere for example

Well, let's take the Apennine Peninsula

or let's take Sakhalin for example

and we suppose we want at these two points

At the same time there was an environmental standard

's add France here for example

the territory is just local

i.e. it is already located on land territory

and there are no clear boundaries here

however, we simply add verbally

but we perceive it clearly and unambiguously

we somehow perceive

and so that I can perceive it clearly and unambiguously

Well, let's assume someone remembers the map Yes

this is a logical action

this is a projection of the Soul of God

on your knowledge

i.e. knowledge exists

only in the structure of the projective component

knowledge or thoughts

do not exist outside the Action of the Soul of God

i.e. as such, empty space does not exist

there is no something there somewhere it is not clear that it lives

or falling from somewhere incomprehensibly

everything exists in a very clear coordinate system

precisely according to the structure of the Soul of God

so i can do it

for example, simply not because it relates to the subject

there let's assume the territory of France

but it's just convenient for me, let's assume show there

some kind of hand gesture showing maybe development

optical background information

for example from myself

and I get control over three territories

but at the same time I must see the reaction of the Soul of God

when I see her

I see life in its universal manifestation
including the life of your own organism, for example, yes
own life
the life of those people
who participate in this process

keep that in mind
when you work with the Soul of God
you can see clearly
the collegiality of the presence of those people
who are engaged in the same process

which is of colossal importance
for example, when distributing my technologies
namely, transmissions to those groups of students
information

who work on the same process
or there at the moment

i.e. it is possible with the help of this technology
consider
Who of those present is doing what, generally speaking?
Well, it's like at a construction site, right?
when constructing a building it is clearly visible
who does what

the same can be considered
from the point of view of the organization of the human immune system, for
example
the same can be considered
how are human organs generally constructed
from the point of view of, for example, the cellular level

i.e. what is the level of cells
generally speaking throughout the body
is responsible for a specific organ for its functions
or, generally speaking, for human life activity in general

i.e. this position allows very clearly
to indicate systematicity in the approach
For example there is some kind of body system there
and it turns out we are very clear
we can see at this level
what needs to be done to restore
some specific system of the body
then this is basically what we get in this case

system level of Thinking

as soon as we received
this system level of Thinking
we can get to the structure
over a person
i.e. on the structure outside the physical body of a person
i.e. from an external system
we can restore a person
to heal, to create for him Eternal life
and at the same time we can, for example, there to resurrect, etc.

i.e. the ability to distinguish is obtained
in general, investigative or factual
it is a collective signal
by management objective by overall objective
This is an external control system

it is dogmatically clear why this is so
because you just have to consider the position

let's assume outside of man
social status there is a person walking somewhere
he participates in some social programs
he eats something, drinks something, etc.
i.e. it is like an external level

and exit to the outer level
this is contact with the Soul of God
from the point of view of mental development
i.e. thought can go into Infinity
thought can touch the Soul of God
at any distance

i.e. everything that is at this level
fits close to a person
this is the soft Action of the Soul of God

i.e. this softness
i.e. precisely the soft level
Eternal development of man
he is comfortable

i.e. the person must be located
as if against a soft background of information development
i.e. there are no rigid segments here

that's when you start
to reach such a level
you see
that any level of rigidity
any level of link
or any level of action stop
This is self-management, moreover

i.e. you can control yourself
let's assume there to heal yourself yes
it's generally simple
for this you need to fix it
at some point the structure of Consciousness
and this fixation heals you
because you went out
into the system of self-control

by analogy with that
as it happens in the Soul of God
one fragment controls another fragment
just a geometric output element
in this case it turns out that way

and then it turns out
the other fragment is completely under control

and if this option of control is generally like this
that it is quite easy to know
what we control
external control element
and he is controlled by Him, i.e. God
and you can control it yourself

then it turns out you have a level
when for example in one word
you can make dual control
those. in one word
the meaning of two controls is to implement

i.e. you can
by one action of the organism yes
i.e. to perform an action with vision
how to go and generally speaking what to do next
how to go on a physical level
what to do next
meant in terms of Thinking

and it turns out that
physical action
i.e. the signal of Perception
can be transferred by analogy
as in physical action
and in action informative

i.e. any external signal
may have a different property
I'm just analyzing everything
what can a person do

A
and by analogy with this it is clear
what is the Soul of God
where the functions of action are not limited
may be manifested in this case
Infinite properties of signals

and here is one of the properties
this is for example the creation of man
it turns out that a person is a manifestation
The Infinite Magnitude of the Actions of the Soul of God

and from this it is clear that the person
represents the whole world

because it is built through Infinite Action
through the possibility of Infinite Action

i.e. the possibility personifies in God
and, in fact, the Action itself
if the possibility to act infinitely
therefore, the Action is Infinite

Human thinking is also built in the same way
if we assume a person's thought
this is an action, for example, final
i.e. for example, a person thinks that he
thinks through some situation
then he gets the Infinity factor
it's kind of arranged in feedback
i.e. his thought comes out
into the structure of his Infinite organization

and it's very easy to go through this channel

from thought to the Action of God
i.e. to the Action, for example, of the Soul of God
in relation to a person

to the Action of God Consciousness
in relation to a person

and you can see that the Consciousness of God
is organized for a person
in the person himself
i.e. it can have
element of Divine Consciousness

and from here you can see very clearly
how is it differentiated
let's assume the level of understanding of a person
in the structure of your Thinking

i.e. why does a person have, for example,
some kind of well there are quite a large number of possibilities there
in Thinking
after all, a person can provide
An infinite number of situations
but for some reason he chooses
some specific situations

i.e. if we want to know in ourselves, for example Yes
or in another person
why did a person choose a specific system of solutions

then we just need to see
transition
from the magnitude of thought to the Infinite magnitude
i.e. from a finite value, as it were
Completed Sentence of Thinking
into Infinite magnitude

and then it is clear that the concept of, for example, "clairvoyance"
the concept of "remote access" there
it's just a reaction level
on this point of view

i.e. we are just looking at everything in this case
what does the Soul of God do
in relation to this event
and thus
is formed together with God

for example, the most favorable event

i.e. the element of formation here

this is a viewing element

well let's say the level of the control plane of Spiritual vision ^{yes}

or the level of active clairvoyance

and when we see this design

we can already make further predictions

i.e. what will happen ^{for example there} with a specific person

what does he have ^{for example Well how} could it be

in the form of some kind of health problem perhaps

and even more than that, we immediately align

i.e. this point of view

allows maximum in one impulse

first align

and then maybe fix it

some small consequence already

i.e. the main diagnosis can be cured immediately

for this it is enough

just to consider

this is the point of view

positional decision making

from an infinite number of options

why man

chooses exactly those that he needs

and once we understand this

from the point of view of the Action of the Soul of God

or even just understand how people ^{do}

i.e. we just understand

why did he do it

we cure him this way

i.e. this is by the way

a very powerful mechanism of self-support for people

i.e. in this way a person can support another

and at the same time heal

and if we consider the work of the team

then this is the level of internal communication

it always exists between people

i.e. people latently or explicitly
understand
interaction of others at the target level
i.e. it turns out that people in a team are healthier

and when we, for example, consider the process, well as if targeted
it is clear that at the collective level
a person can achieve more
through collective work

then here it is
God's desire for him
in its collective action this is what it is
that God has so concentrated all the elements of events
at My Place
that He achieves any control
i.e. just for everything yes it becomes clear logically

i.e. the more levels are reduced to Him
the more conscious the more targeted the action
for His Soul in every aspect of management
even for Consciousness
for the Spirit of God
for the Physical Body of God
the faster it turns out, so to speak yes it reaches
absolute control

and it turns out that when we know this picture
the structure itself is ideological
that all control systems are transferred to God
this is the level of absolute access

because then
precisely targeted collective action
i.e. collective for some clear purpose

it turns out that here
when we act, for example, let's assume at the level
let's assume as if collective management
coming from you for example Yes
or coming towards you, for example
then it turns out that we see
that the creation of precisely targeted collective functions
this is an achievement for example there is a local achievement
level of self-salvation, let's say, yes

and if we for example Well let's assume we consider the level

what is the collective goal
is precisely Eternal life there Eternal development

it turns out that we can quite easily see it here
that is like a level of collective action
this is a level practically aimed at that
that we are basically only synchronizing on just about everything
with the state of the Soul of God

i.e. the Soul of God is, in general, Eternal development

and it turns out
that the Eternal state of the Soul of God
where, for example, the factors of Eternal development are defined
it turns out that the level of management here is like this
what can you suppose to highlight
Well as if the main idea of this management
consisting of
what when target management levels
concentrated as if by a logical phase of control
i.e. the goal of management in this case
this is a logical and, in general, quite clearly defined characteristic

then you see that the next level is yes for example actions
or a further level of management
this is something that only needs to be logically identified
for example all parameters
in relation to
to some specific action

Well for example, you need to do it like this
so that some process can be cured
or you need to achieve resurrection

then it turns out that it is enough to highlight here
all collective lines of control

in this case
i.e. uniformity of actions
i.e. to consider this perspective of all systems of the World
in which you see
let's assume the status well, like, say, a crystal
sparkling precisely from one goal yes
from the goal there healing there let's assume there are diseases there

as soon as you

in your Consciousness you highlight the status
i.e. let's assume in any phenomenon
so you highlight
it is this piece of control
then it turns out that you achieve it
just on the whole topic
that you activate this World status

i.e. in principle
you are like at the level of personal action
in this case you don't do anything special
you are just in your Consciousness yes
how do you highlight the status exactly that way
that all phenomena of Reality
work on the structure of your task
For example there is healing or resurrection
or achieving some kind of just any control

the Soul of God acts in exactly the same way
i.e. in the Soul any level of control
it is aimed at the fact that this crystallization
i.e. let's just say this is a conditional concept of "crystallization"
what is meant is the identification of a kind of vectoriality
the direction of any event towards that
for another element of the action to happen
here it is done simply at an ideal level
for Human Perception
and the ideal is

i.e. in the Soul of God
every event is an accomplishment
creative status of the event
i.e. this is basically an exception
some unfavorable level

when you realize it
you can only do so much
internal so to speak yes, by mood or by will
or level of Consciousness
physical body

generally speaking, whatever
can you react to this information
but as soon as you see for example the level, let's assume this one
you solve your problems almost immediately
and you often solve them instantly

here to solve instantly

for example, let's assume there is no explosion at the nuclear power plant Yes

or not some kind of accident , let's say

i.e. to react instantly to some situation

which may happen very quickly

it is enough to just highlight the factor

that all phenomena of the World exclude this situation

and it turns out that you are by analogy with the Action of the Soul of God

you are already making the world like this

that this situation simply does not exist

because all phenomena are oriented towards absence

i.e. in the collective Consciousness this phenomenon does not exist

if we look at it this way

for example process

that there are no phenomena that a person, for example , left yes

what is he like for example died there

then the person is alive

i.e. he is resurrected

because there is no data

what ever happened to him

there let's assume a biodegradation system

and the same applies

for example, to the tissue or organ regeneration system

this is in this lecture

there is a powerful system for restoring human organs

i.e. here you can only concentrate

to the level of lack of structure

due to the correct crystallization , yes

collective level of target actions

and we get the absence of a problem

well, which applies in general to any event in Reality

This concludes today's seminar.

thank you for your attention
