

GRIGORY GRABOVOY
The Teaching about God
Structure of Soul Purification
03.03.2004

Hello again
The topic of today's seminar
This is my Teaching about God
Structure of Soul Purification

this topic is about that
what when we work
for example with an external control level
i.e. we deal with external management tasks
then the work often goes straight to the Soul

so when we work with the Soul
it is necessary to consider the structure of God
or the structural, so to speak, property of God's control
which is perceived by a person
and therefore which produces the action of cleansing the Soul

i.e. we are talking about
about the technological principle of purification of the Soul
when purification is a technological act

and in this regard, taking into account that the earlier concept
related to the series of purification of the Soul
correlates with the level
for example, prolonged or long-acting often
or actions aimed at high concentration
For example Means well, a person's personal action

then in this technology the purification of the Soul
this is a technological act
in which a person already has the ability
technologically cleanse the Soul for further action

Well for example a specific example
to prevent an explosion at the nuclear power plant
it is necessary to have a pure Soul
which reaches the level
repayments for example there is a nuclear reaction

and for this it turns out
that a person must have a purified Soul
in general, in a technological version of actions, I guess

so at this level
technological principle
this is the principle of achieving results
and more like what are the high criteria of the matter of this action
well, previously conditioned in literature
in the collective Consciousness
they are basically also implemented here
but already at the level of technology of action
for example, due to the optical level of human perception

then it turns out that the action of cleansing the Soul
this is a directed action
as the realization of a complete concept in this sense of the word
and on the implementation of the technological level

therefore, based on this
we need to approach this concept
how exactly to technological
from the point of view of the work of Consciousness

and in this regard we have here
in general, it turns out to be a simple Truth in management
pure Soul pure i.e. controls correctly
and for this you need to be able to highlight
purity of management
i.e. the control faction
as a system of task action
i.e. the task and the action for God are one and the same
He both formulates the problem and solves it at the same time.

at the level of logic
this is a rather complicated category in general
it turns out in Perception as if
but in reality the task and action
for the Soul
it's the same as, for example, the action of the Spirit
and the task of the Soul

here the Soul has a task and the Spirit acts

i.e. a person is designed like this
that due to the conceptual apparatus
he can immediately find comparable structures

for example, to organize
Eternal life of the organism
physical organism, i.e. the human body
it is necessary that the Soul be pure

could give
correct i.e. the correct path of human development

and it turns out that based on this
we have a fairly specific technology as a task
i.e. the task in this case
this is the Eternal development of both Soul and body

pure Soul in technological execution
where it is implied that it is also clean because
that she is clean at all

there is a concept called "enlightenment"
there is a concept of "cleansing the Soul"
well, which requires again I direct your attention to this
often enough time or a long time

in this case, to save the AC
requires immediate action
i.e. the sensation of the Soul is an act of instant action

and it turns out that it is precisely the structure of purification
from God's point of view it is as such
in general, the purification factor itself
in the truest sense of the word

i.e. the external structure and self-purification
for a person it is the same
a person perceives it simply as an act of purification

i.e. how to cleanse the Soul even more
Well for example, if she is generally clean, yes
then what is the technological system of this action

and in this case we are talking about that
that the Soul is concentrated on some level of tasks
here is a cleansing of a specific local
ways of its development
towards solving problems

i.e. it cannot be said that it has

For example there is not a pure view in terms of information
she may be crystal clear
but the concept of "purification" then comes down to
to the concept of "creating a technologically clean path"
i.e. creating a level of concentration

i.e. you understand here
how is concentration created then

i.e. you crystallize
here is this ray of light
coming to you actually from God
because when you see with your own eyes
but in reality it is a level
when you are almost completely protected
from the level of any external influence in general

pure there crystal clear Soul
this is a safe level for the body as well

i.e. if you achieve the act of purification
including in the crystalline sense
at the level of crystal purity of the Soul, so to speak

I use ordinary terms in this case
although they express
right there For example crystal clear state
optical phase of perception

and then it turns out that this beam
or let's say there is an angular optical level
as if coming from the Soul
it looks like some kind of option
resembling a triangle in essence
in optical terms yes
which generally enters the hard phase of the event

i.e. event
and here is the optical level of expression of the Soul
pure soul
i.e. it is clean, there are no layers on it
you see it with Perception

this is where the control of this system lies
completely human
that a person sees her
and when it is not connected to any other systems

not covered
he makes very rigid continuous control
i.e. the result of the state of the Soul and the result of control
it's the same thing

i.e. a pure Soul not containing there for example a nuclear explosion
prevents an explosion from occurring
you get into a very tough shell
protection of your physical body in this technology

and all you have to do is enter this system
then you can have
the most powerful health element
for your body
just holding off for a while
this is a state
there are even a few seconds

and so, holding on to these few seconds
you see what opens up next
the next completely free path of development
related to that
that your physical body develops freely
and a long period
you may not experience any problems

i.e. we are talking about the fact that there is not one such impulse
enough for example for several months of active work
and then only next time
you can again for example yes apply this technology
or there for several years

i.e. and therefore when we talk about this technology
then first of all we mean
that this technology is very closely related
precisely with a prolonged, as it were, future
time

i.e. in this case time
This is a controlled procedure.
and you can say
that under any, even super -strong external influences
you keep your inner line very clearly
Well For example there is a civil position there is Eternal development
Eternal Peace, etc.

but you put it all into technological form
and then your position is Reality
external Reality any more

it turns out that the connection
here is the internal management
with the transition to Reality
This is also God's task

it turns out that we have in this case
technology seen through human eyes
i.e. human perception

but this Perception is not different from the Action of God
in this technology
Human perception
this is the Action of God

here is the fundamental level
it fundamentally distinguishes
for example, some other level of management
because when Perception
This is a personal factor, after all, mainly in humans
transition to the level of God's Action
it means the person perceives correctly

and it turns out that based on this
this is the criterion of Perception
precise perception

i.e. the criterion of correctness of action

For example there a man lives forever
lives a million years
so here's a million years and the next second
this is the accuracy of a person's position
in relation to the Action of God

i.e. he understands that he is truly Eternal
because he understood absolutely clearly
Well there For example there as conventional as two plus two equals four
that this is really so and he is doing the right thing

and it turns out that we have
this is the predicted phase of the future

as a phase of the state of the Soul
namely the purified Soul
i.e. crystal clear Soul
this is essentially the Infinite Life
in the exact logical embodiment of the realization of the Soul

i.e. in the crystal aspect of the purity of the Soul
you have your own absolutely clear
and practically not complicated
some negative events
path

i.e. your Soul creates and maintains its own path
where are you having a physical body
the body in this case is part of the Soul in this technology too
and this is always so according to the general aspect of understanding Reality

it turns out that you create that light for yourself
which is simultaneously
and the light of your physical body
The light of your Soul is no different
from the light emitted by the physical body
for the Creator

and when God looks at you he sees unity
Well, in prayer a person has unity
i.e. the vibration of the body and the Soul at the same level of sending to God
and when this message is directed towards universal Salvation
then God begins to see Himself

i.e. a certain mirror appears
that's why it's easy for God to rule the whole world
because he's only on the whole
can look at Himself
and see the whole state of the World
well, like in a mirror

and when such reflected systems are realized
it turns out that it is precisely for that
to recover or even have an organ replacement
grow an organ
it turns out that it is enough to see here
the line of one's own behavior is obtained
but through the eyes of God

i.e. in this case technology

it's not really complicated
I just hold a management position here
where I show that the external even there is some kind of super-strong
or is there the maximum impact
it does not pass through the system of this technology

so there is just something here
as if an internal concentration
it's not the complexity of the technology
it is not difficult to master this technology

and the main thing here is to perceive this concentration
precisely as an external parameter
which cannot change positive events
or there is your goal for example there is Eternal development

then it turns out that when we want , for example,
there to build an organ or to build some Eternal event
for example a house that stands forever yes

he is under any conditions, for example it won't break there
it won't collapse after billions of years

then it turns out we should build it like this
that the Soul builds this house as an inseparable part of itself

that's why god
He builds everything from Himself.
and each part of the next level
this is also the Action and presence of God
the main thing is to know where He is in this place
and He could build in construction too
and continue doing something else
but at the point of construction He really is
You can always see it and see the technology

i.e. any construction can be seen
from the point of view of technological implementation

and here is the construction
from the point of view of technological implementation
this is the level where you see
how to build a house for the Eternal
i.e. you develop the World, you develop your Soul
to the level of the Eternal Home
to the level of some Eternal section there

there is no specific territory and no action

and gradually you come to that
that your action there your hand your physical body
this is also an Eternal action

i.e. you come to an understanding of Eternity
because your environment is built by you, it is Eternal

then it turns out that there is simply no place for the Eternal
i.e. such information around you, for example, simply does not exist

then it turns out when you do this control
and around you gradually
this information is being replaced
what does it mean that something is not Eternal, for example, there is no

then you actually do the next level of management
aimed at that
so that there is no external influence system
Well For example there is a nuclear power plant explosion
are there some parameters or malfunctions
or terrorist activity perhaps yes

and that's why it turns out
that here the question of external management is precisely this
that you start just as you realized
the structure of its own, as it were, local Eternity around itself
even if it is expressed in millions of years
but she just kind of did as if around you

further you see that all external control
this can also be absolutely clear control
from the point of view of identifying the cause
i.e. it is very easy to identify the difference
when there is some well like a tuning fork
purity of actions
then it is immediately clear what the action is
could lead to an explosion of the nuclear power plant there
or to the development of some disease, etc.

and here it turns out that the external action
this is also a controlled action
because you are entering an external control system
because you are like some kind of monolith
World systems
where everything Eternal is near you

you notice yourself very easily, as if from afar even
i.e. the distant fraction of Consciousness
or any close fraction of Consciousness
and you immediately see the difference

i.e., this is, in general, a certain system of precise diagnostics
where diagnostics do not record a generally negative fact
and in fact does not even leave room for a negative fact
and begins to transform this fact
at the level of absence of well as if of negative action
from possible events

i.e. this is the level
namely the isolation of another fraction of the event
where is the negative status

and it turns out that this is the view of oneself
to your own events
as if from the outside
you also regulate external space

i.e. external control space
begins to be distributed in a practically discrete manner
and any negative systems
delaminate and disappear

i.e. they disappear and not at some level
as if there was some kind of impact on them
and the level of further, as if latent
the inner growth of your Soul
into the structure of creativity of this event

i.e. you work from the inside as if from yourself
and at the same time simply due to Perception
you are working exactly in an external system

That's exactly what I said
what is Perception when it is Perception of God
your Perception is like God's
you work accurately
then you immediately adjust the system to the norm

thus you have already come to a harmonious state
where is the external and, in general, internal, so to speak, control
This is the status of Divine governance
because God once set the task of purity of the Soul

first and foremost
similar in general to its own levels of tasks

i.e. His Soul is always pure anyway
and it turns out that in order to teach a person
have a pure Soul
in general, in a technological and managerial sense, more like that
it turns out that here He had to show
how was the Soul originally created pure?
to a person

i.e. here is the purity of the original creation
this is the criteria level
for any person, generally speaking

and it turns out as soon as a person with his inner eye
looks at the purity of the creation of his Soul
it brightens up
and any action becomes unattainable again
if it is negative
this person

why do i have such a criterion
and generally speaking this is an axiom and a postulate
that there is no real access to the person
from no one but God

because the True Purity of the Soul
this is only contact with God

and it turns out that at the level of real actions
a person always makes decisions independently
therefore, according to this technology of dissemination of my Teaching
where it comes to the purity of the Soul
about the ways of actually cleansing the Soul
in technological terms

criterion for the dissemination of the Teaching
is also to see one's own pure Soul
created originally by God
ability to see

and this light of purity lights up other Souls
they are already beginning to spread the Teaching
just with its light practically
i.e. there is no action there at all
just some kind of technological action

i.e. people see their actual sources as earlier yes
original
created pure and they are purified

i.e. it turns out that this is
well, some kind of cleansing **rain** , so to speak, informative Yes
or as there is a concept there called "manna from heaven"
something coming from heaven

in this case it is the action implemented here
that as soon as a person sees it
he really has a cleansing
well or there is **food**
or for example the following action

i.e. the principle of frequent purification
this is the next action level
i.e. for example, God creating the World he created the World like this
that a person for example there I have to eat, let's say
physical food products
and here it turns out that the Soul is pure
has the right foods
from the point of view of Eternal development

what is the correctness for example Yes
make a light signal so that in the future
there was no example there is destruction of animals and vegetation, etc.
those. nutrition process
the process of , as it were, restructuring physical reality
he is such that he is constantly being laid down
information in the future

the absence of a restructuring process

i.e. a process of some kind of destruction
containing a permanent process of solving the issue
so that this destruction does not happen

and every person has this process
embedded in the purity of his Soul
for the Soul is the Eternal life in the physical body
and it turns out that there is a nutrition process there
this is a derivative action
i.e. the person wanted to eat bread there
he can generally speaking then create it and eat it

if for example we want to mow wheat for this
Well, in principle, it is possible until he learns to create
the question is what will be needed for what then, for example, bread, yes
if we talk about it

then here until a person masters it
technology for transmitting data about
what how is the product eaten there
for example restores yes
or how is it even produced, for example by Consciousness
because the function of Consciousness is such
that in ideology and generally speaking that is how it really is
it is laid down that we can do it quite well
create any object
at the level of yes Perception there Thinking
for example, at the physical level
the most advanced people there can also create

and it turns out that it is as for God
Thinking and Reality are the same thing
for a person it can be like that too
Well For example there is a magic tablecloth there
which continuously supplies the product

i.e. the question of nutrition is connected with that
what if someone learned to do this
then one person who doesn't know how to do it is enough
he is forced to eat
and then everyone will eat

and here is the question of transferring knowledge to any person
which for example he's just studying somewhere there
consists of
that to pass on knowledge
well, which, for example, can be technically transferred

it may be a bit complicated
the person may not understand the language
or he doesn't do it at all

knowledge can be transmitted by the light of the Soul again
i.e. purity of the Soul and purity of thoughts
and this is visible regardless of the nationalities, location, etc.
i.e. social status overlaps very closely
in general, it turns out with the level of purity of the Soul

and when we do this here

namely the level of transition to social status
we see that all people are created by God so
that people have complete free will
although, for example, we can still consider the level
Human perceptions
where the Perception of man is the Perception of God
or through the Perception of God

Here I showed that social status
in fact, he works as if from an internal position
practically well about the same

i.e. we see here such a structure or something
reverse growth of social status
in relation to a person

i.e. practically all people develop
in the structure of its development
towards creating conditions for Eternal life
for one person in particular
and that means everyone for themselves yes

i.e. products that are constantly pumped up
actually information
no further destruction
this type of product
people who develop
towards creating conditions
for the development of the Eternal one person
and therefore each one individually

and we come to understand God
in the Physical Body of even the One God
where God is near you
For example there he shakes your hand or speaks to you in some way
and at the same time God shows knowledge
at the level of human knowledge

i.e. we see
what is the purity of the Soul in technological terms
this knowledge of God as He is real
including in human form

then it turns out that we are in every person
we can see its structure of organization from God

i.e. again something like this begins
tense principle in terms of that
that the actions and tasks of another person
this is often an unmovable area
as if there is no freedom of speech yes

it turns out that there is a reason for this, it's clear
the word was created
that we can give a choice with a word yes
and then the person makes a decision
and begins to develop further
based on generally simple
free choice and free decision

and it turns out based on this
we already see the Face of God
if we want, for example, to see God in exactly the same way
as if by physical sight
then we can first perceive His Face
and then His Actions

that's if we see the Face of God
then further we see already Actions
man-god

and when do we start
Well, let's draw this analogy
then it becomes generally quite clear
in what context
in the fact that man was created in the Image and Likeness
he sees God in a fundamental sense
generally speaking always

the only question is what he sees at the moment

so that's when we talk about that
than at the moment
then we are talking generally speaking about the organization of a person
and precisely at the point of its organization
man always sees God

and considering that the Soul is organized immediately and Infinitely
i.e. it turns out that we always mean
a very simple postulate in general
that in order to see, for example, the development of a person
you need to know the structure of his own organization

i.e. how does he see himself at all

i.e. you can really help a person
if we know
how a person perceives himself
and then the purification of the Soul
this is a connection
to the system of collective for example level of Salvation

i.e. to the system of Eternal development
where the criterion is, for example, Eternal development
is still the level of human action
conscious human action
where a person, in principle, already consciously
chooses the decision about Eternal Life

and then it is created around him
pole of Eternal development
already from the point of view of that
that God is conducting his structure of governance of Eternity

i.e. Divine Eternity
For example there is the coming of Jesus Christ
in terms of this very knowledge
where do you see that already
that having seen the free will of man
God allowed this action

for example, how God creates a free event for Himself
i.e. God knows everything
act as a man, for example
and do some management
it turns out that we come to this concept
that for God to create a random event
generally speaking it's the same thing
to create a non-random event
as if, i.e., or an unambiguous event

God creates all events

but so that He would fall into the structure of the randomness of the series of
events
It must actually form the basis for this.

and it turns out that this is precisely the basis

where do you generally see future events
with my own eyes, with my own Perception

freedom of human perception
this is a field for creating the next event

because the Soul
crystal clear soul
this is practically the whole world

and it turns out that there is at least something there

Well how to enter yes

as if in an external system in an external fraction
we are forced to proceed from free will
which does the following

and here is the next freedom of will, this is what
that God is realized as a man too

after all, for example, the task here is very simple
man created the machine
but he can't become a machine

and based on this, the sign of comparativeness
here is the point, for example
there is what is the difference between the Spirit and the Soul
if you ask this question, yes, from the point of view of knowledge

then you can just know the information
for example I know and I say
Soul Eternal construction
Spirit is also the action of the Soul , etc. , yes.
i.e. some systems are possible
in general, maybe not even classifications
or regions ?
highlight information
where each area here formally means
some level of action

and when we put the question this way
then the question is what is a random event
differs
from not random
category of thoughts
it's about the same as the difference
suppose the Spirit from the Soul
i.e. a series of concepts that arises from God

here we can highlight those concepts
which are given

Well For example there they are given to people like that
so that people can know the World from God
but a level of concepts is created

that's why when we talk
about the level of crystal purity of the Soul
about the level of light of the crystal clear light of the Soul
each next concept
this is a special organization of Reality
this is a special organization, generally speaking, of the entire external world

i.e. it is necessary to be able to externally understand the World
how to introduce into the structure of the Soul

and if a person
example , does not pay any attention to something
he doesn't react to something
or he reacts to something as if
on the contrary, it's too emotional there
or let's say he takes some action too quickly yes
from your Soul
then if he doesn't pay attention to something
Well there are some subtleties there
then this is it
where God also acts

and if we have for example here
Well like such an action
that God gives external knowledge
For example there is a formulation of the question
what is the difference between Spirit and Soul
or is there a difference in that
that a person, for example, cannot become, for example there by car

then these structures in the form of questions
some phraseological turns
which characterize
exactly well as if the qualitative level of speech
i.e. we can simply by speech
by means of some special criteria of speech turnover
or turns of speech
I specifically speak in different transcriptions
from different positions it's the same thing

what we can do here very clearly
identify the following structure
that we can know quite clearly
what comes from God

i.e. what is Action from God
what action what knowledge
this is the knowledge of God Divine knowledge

and we can very clearly define this
when exactly does the Soul crystallize
that's exactly in the event
i.e. Soul as a crystal of event
as an event matrix

and then a pure matrix and a pure crystal
this is the level that actually gives
it is the true light of events
from the point of view of its development

why for example the future of a person as a rule
more even known as a rule yes
than some well For example there are external events
because then freedom of action arises
freedom to organize the following events
with crystal clear Souls

i.e. the purer the Souls
especially since distant events are clearly manifested
i.e. the future becomes a completely known category

then it turns out that the person
he is already coming more to the level
in fact, the perception is exactly like this
how God perceives

and in this case he comes to this
already from the point of view of their own technologies
it turns out that then the Perception of God
and Human Perception
they are no different

but at the same time with all this
this is the absence of any real difference
this level is realized here
what is the level anyway
what well as if those people who do not comprehend this Truth

they have a difference in the perception of God and man

and then it turns out that here and immediately it is clear
who and where to give education

i.e. here is the process of formation

here it is quite simplified in general

i.e. it is enough to set it up

your Perception

on the Perception of God

and it's immediately clear where to add fractions

some knowledge of the world

and then their Perception of these people is normalized

they, for example, will receive knowledge about Eternal development

or if they have then they will increase yes

stock of knowledge or baggage of knowledge

and based on this, if we consider, for example,

this management process

as a process of precisely technological action

that is, very specific technological methods

associated precisely with the level of purification of the Soul

For example there is a function of the Spirit

or by the action of the Spirit

i.e. it is simply allocated for this purpose

as if the controlling action of the Soul in optics

for example the light coming from you yes

in the form of a cone there

in relation to some event

the end of this cone for example

stops at the level of fixation of this event

and it turns out that you can just do everything

external action of the Spirit

carry out simple cleaning activities

i.e. just activate the Spiritual phase

and increase the intensity of the Spirit's work

in this area

and then you get a very active level of control

and you see how the Soul is purified only because

that you correctly perceive the optics of the Spirit

and you can activate it

as a system of purification simply for all purification

and now let's do such a management training

i.e. you will work with the structure of your Soul
i.e. everyone will set their own tasks
in front of you
will output , for example, a control cone
coming from your physical body

because the physical body is a part of the Soul
so you just focus your optics on everything
and start working Spiritually

i.e. try to consider the Spiritual faction
because the Spirit faction
this is the management level

and accordingly you naturally receive
very clear control
only by correctly perceiving the Spirit faction
for this you need to know how the Spirit perceives
your Creator

i.e. tune in to His view
select the Spirit faction
and just clean it mechanically
your Soul faction
here, do this

you can even act on your phrases, on your speech
you can somehow on anything here
i.e., in simpler terms, cleanse the structure of the Soul
and I will work with you

when you work with this technology
actually cleanse your Soul
the structure of your Spirit
look how the space around is brightened

i.e. the criterion of the Norm is
enlightenment of outer space
i.e. other people become
at a more enlightened level, perhaps?
accessible to Perception

i.e. they are actually doing better
their health improves
here is a very important element
in this control technology

that when you do Soul enlightenment
i.e. you actually cleanse your Soul in this way
First of all, you don't contradict
systems by any canonical
from the point of view of for example there are no church canons or religious
foundations
because you help other people first and foremost
for purification
coming to a pure Soul
this is the normalization of external events

after all, the luminous Soul comes from you
from your physical body

and when you clean
you are normalizing the external Reality
in fact, the outside world

and when you start doing this for example
then the experience of acquiring management in general
other people other people
not necessarily even by people
there are some elements from for example there is no flora there
it doesn't matter, it could even be from the atomic level, yes
where the atom does not explode
you get this practice for yourself

i.e. it turns out that you can do it this way
get an internship that is
well, maybe a non-specific level of practical action
i.e. why would a person need to know, for example?
how is the atom restored yes
how does an atom even hold its position?
in this multidimensional world, so to speak
multi-tiered or unique World

it turns out that with this knowledge
you can get the Perception of the state of the atom
because when you work exactly
you perceive as God perceives

and for the Perception of God it makes absolutely no difference
He understands every component of Reality.

and based on this you can enter
into any structure of Reality

for example, from the point of view of let's say there at the cellular level
restore organ
can you do human resurrection like this
how does god do it
i.e. precisely by external control

the canon in this case is
the action again is like some kind of tuning fork of a lighthouse
and what does this glow of the Soul have to do with it
where do you consider your action?
as an action in relation to
to this glow

i.e. you see it all the time
where are you
you see your inner position all the time

it's quite simple
For example there Save everyone
make your own personal management

and it turns out that this is a kind of lighthouse
i.e. you yourself yes
you yourself are the source of action in this case
and a conscious action

it's not even a technology, it's just applied
where you just do
some kind of mechanical technological movement
get the result

this is technology
conscious action at every step
for the Soul
this is a conscious action of God
it is a complete awareness of the whole Reality
By God

and it turns out that this Light of universal knowledge
what is absolute purity of the Soul
there is that lighthouse
around which you perform the action

and it turns out
that any action is naturally creative
for the light of action

i.e. if you do an action around something
and the original Light
this is Eternal development this is Eternal creation

then any external action is obtained
so that there would be a connecting system for organizing the World
continuity of the world
this is an action of the same order

i.e. external action is standardized because
that you have, in essence, an inseparable connection with the World
in a deep understanding of the fundamental nature of the World

any external action
this is an internal action

and many solve all the issues
only internal
as if by spiritual or mental understanding

and when you see the world like that
you see very clearly that there is a Spirit on the optics
i.e. your optical vision is developing
from the point of view of differentiation of the Spirit
Soul Cleansing

Well in general, in logical terms, it is known
that when the Spirit is active the Spirit means high level
it purifies the Soul
Spiritual actions highly spiritual actions
they cleanse the Soul
This is a generally known fact

another level what how to cleanse the Soul
for example, by the action of Consciousness
i.e. the cone of Consciousness
or there is the external space of Consciousness
cleanses the Soul

but in Consciousness is
and the Perception of the Soul itself
i.e. this is the optics of the Perception of the Soul and Consciousness
in this technology they are often one and the same
it's just some kind of golden light
or the golden glow coming from the concept
"The Active Soul" and Consciousness

i.e. everything is within the limits of human Consciousness

it turns out that you are acting absolutely consciously
and your Consciousness
has a real impact on the surrounding Reality

this is where it is very important that in this technology
you practically act
at the level where the Soul and Consciousness are
from God's point of view these are indistinguishable concepts

just like the body and the soul
for God
it can also be a level of the same order

after all, for God everything is basically the same, everything is one, yes
He is one and the same
and he extended this unity to his own Perception

so that this level of Perception
differentiate and see
where is the Soul in Consciousness?

then there is only one factor left
see your own physical body
in the structure of Consciousness
then it is clear that this is the Soul

and it turns out that when we start
to perform an action of this order
then we see it very clearly
that the development of Consciousness, i.e. the action of Perception
This is an act of both God and man
we can see where God helps us
what He wants to give us is the following
from His point of view where we want well to study there
and do something else

and when we move to such a level of Reality
then we see that inside the structure of Consciousness
local control systems are achievable
to the point that there was none
For example there may even be some local disasters there

and for this you just need to decide
with the status of a physical body

Do you have time to call ^{there} to convey information or not?
maybe you are holding information
so that there is no explosion of the nuclear power plant and you have no time
^{yes}
to reach physical realization somewhere ^{there} to call

then it turns out that due to the glow of the Soul
by teaching students ^{there}
due to the fact that you can with the light of the Soul
still turn the event around
you can easily turn this technology around even
and local events

this is where I am increasingly leading to that
that if possible it is necessary to influence that
so that there are no local disasters
therefore, to the point that there was no
if possible some
let's assume ^{there} there may even be local diseases ^{there}
even small ones

i.e. it is possible due to this technology
maintain body status
practically ^{at the same} level
at least there is practical health ^{there}
but often even at a higher reserve level

and here it's just a question of time ^{as a rule}
because technology requires
mastering the difference in perception
^{for example,} the actions of the Spirit
and the difference in Perception should be like this
that the Soul in optical expression
^{for example ,} I can clearly see it ^{there}
the structure of the Soul
and how does the Spirit work
in which faction

i.e. the Soul needs to be cleansed
after some action it is not necessary everywhere
i.e., ^{for example,} there is a concept in the collective Consciousness
that there is some kind of "karma" in terms of cause-and-effect systems
what if a nuclear power plant explodes
so maybe there is such a philosophy
what is this karma ^{yes}

this philosophy is still layered somewhere
on the structure of your action
but it can kind of layer on top of each other
in one local place

if you see where for example just activate
the structure of the Spirit's action
highlighting the optical level , as it were
i.e., we need to see the dynamic action of the Spirit
and calmly just distance yourself from everything
fragment as a petal
and that's all
parallelize the system

and it turns out that you have a pure Soul structure
for the next action

because the action is still the same
that it may not always be there from ten stations
kind of structure once
but theoretically and practically it can get there
then you will have to do the action of cleansing the Soul
in a technological sense

also in the treatment of the disease
but the disease does not give layering
then on your Soul
any treatment for any disease
on the contrary, it enlightens your Soul

i.e. you are mastering the next level of Reality
as God does
creates conditions for a healthy human life

in this case i'm talking about
that this technology is more needed
in the structure of Macromanagement
so that there would be no global catastrophe in the first place
so that there is no explosion at the nuclear power plant, etc.

or do you want to get your point across like this
so that it is not changed
no design at all
there is **any** superpower there
for example, **all of** them are destructive forces
for example, they decided to unite

in this technology it is useless to somehow put pressure on you
you have stated your point of view
there Save everyone
you will save

because you act
the structure of one's own Soul
no external pressure passes

Only God has access to your Soul
and God gives only life

and it turns out that when you technologically
consider this structure
you are practically protected
from any influence from any impact
when you start working with it technologically
here try to look at the phases of influence yes
what they could be in this technology

i.e. as a rule it can often be considered
process of earlier influence
i.e. you can differentiate very clearly
in statics
what influence happened why such influence
i.e. very much in this technology
you can simply analyze the external action factor
there are no problems there at all

i.e. the action there is very clearly fragmented
almost at the same level
that each fragment
this is the level of specific information

i.e. the information is just there in a ready-made form
there in the form of layers

took a look at the reason for the action
to remove the reason
quite often just a little bit
information in general this by an effort of will
lift from the Soul

i.e. create a movement of the Spirit
between this information
and Soul
and that's all

it dissipates
further events for you are even calmer
and even better ones, etc.

i.e. technology in this regard
she gives a very good application
the possibility of logic itself
i.e. analyticalness at the level of the usual
like a logical level of Consciousness, SO to speak

you have learned to differentiate
level for example Soul
where the Soul is active
for example, it is always visible to you
and all external systems are systems of some influence
very clearly define here the tasks of your Soul

this is the technology by the way
you can change the tasks of the Soul
which well in general, it works out here
that which you formed perhaps a very long time ago
still in the structure of the formation of the Soul

this is the level here in general
what is the verbal phase
it is already becoming uncertain
i.e. the word here does not carry all the information
or it doesn't carry at all because there is no word there
this is a pre-verbal level

and it turns out that words can be transformed
can be transformed
information presentation systems
in the form of phrases
in the form of action

and here it turns out that you enter
to that control level
which is quite mobile and agile
and then the tasks of your Soul can change
i.e. at the management level
you can change the tasks of your Soul

This is a colossally important characteristic
because the Soul
This is the defining design in management

and it often happens like this
what are you doing long management
and the Soul actually fulfills its task

and until she does this, you wo n't move on
to the next phase of management
at the level of simply physical Reality

in this case you can change the tasks of the Soul
i.e. how is it there well, let's say in dominoes
take and put specific data there
in the form of a specific domino piece in a specific place
you can add tasks at the same time
you can form the following
you can change the time for solving problems

this is actually the management of the Soul level

and when, for example, you come to this technology
here, of course, be more careful
because it happens here very often
rapid influence on the structure of the physical plane

i.e. for example, you need to cure some disease there
you can assume by abrupt action yes
just make a complete change of the body system there
or local organ
but maybe it makes sense to just treat it locally

i.e. here the impulses are very strong
they are super fast

therefore this management must be done carefully
because it should be, in general
necessarily balanced
i.e. you try to make logical decisions here
you need to cure it very quickly
or to achieve some positive control in events

think this way
how many actions do you need to take
to achieve events

i.e. here we still need to think logically about it
what fraction of light
what faction of control

bring to what area
then you get precise control

i.e. precise control here also depends on you
but it is of colossal importance
i.e. in fact you can achieve
as if absolute in the ideal of mastery
when any control you have is carried out precisely

and then you can there if necessary
for example, build any control systems like this
what you practically get here
control in practice
each control
and what's more, you can this element
change in real time

i.e. a very dynamic control system
because this is what God does by showing knowledge to man
as He does through His same Perception
as Human Perception

i.e. the World is also alive, yes
the outside world
he is a living world in everything

so when you start it means working at this level
actually added it to it as if you are reviving
with your own life
i.e. you give the following status to life

for example, resurrection occurs
healing occurs
just because you're just on everything
you understand Reality correctly
here is the level of your correct understanding
that you have some kind of technological methods
there is no need to even apply it here

i.e. correct understanding
or a special volitional entry into the correct understanding
as if it turns out here in a certain pure state of the Soul

and you get targeted management

and even if someone doesn't understand
someone does completely different techniques

which for example Well as if they do not contribute to the accomplishment of tasks
there is a system of destruction
maybe not even destruction
and just people who don't understand
then just lock in
at the level of a remote section of Consciousness
in a crystal clear state of Soul
maybe even at the primary level of creation
it means your Soul
level of universal Salvation

and you will see that events will align
without even touching on your spectrum of events
those.
in a negative way

i.e. you are actually teaching your Consciousness
any remote areas of Consciousness
work dynamically
and work as, for example, your Soul works
knowing the work of God

i.e. it turns out to be the Soul
Well, after working for a while
in a crystal clear version, yes
in fact it fits together
with the system of God's Action in essence
and that means she gains knowledge naturally

and when do you start
this knowledge
even if only in optical form
transmit to distant factions of Consciousness
your Consciousness begins to be just as protected

i.e. you will then be able to come up with any creative idea
have a logical method of cognition
and select a fraction there
even this is very important in treatment
you can highlight the creative potential of your body
or the creative level that stands out
how the spectrum is obtained in the logic of yours
and in general it is possible to transform here
quite a lot of systems one into another

i.e. to allocate by the system of Consciousness

optics of the Spirit
system of Spiritual management
to highlight the structure of the Soul's action
although the action of the Soul is also the Spirit
i.e. be in the same systems
through conceptual systems, etc.

i.e. to use
the entire resource of personal Perception for that
to really achieve control ^{there}
For example ^{there} according to Eternal development
or solve any issue locally
towards creation
i.e. a person necessarily lives ^{yes}
he will definitely be cured, etc., etc.

i.e. here is the level of attainability
systematic action
without fail
keep in mind this is extremely important
i.e. with this technology you can achieve
necessarily any creative process

in certain areas it might be ^{like this}
what could it be or very quickly
Sometimes a feeling of tension is possible
but this is no longer tension
because if there is pressure somewhere
you took, ^{let's say}, translated
to some distant faction of Consciousness
made control from there
so the pressure spectrum is actually of no concern to you
you just translated into another geometric area
and made the control similar from there

because the trained faction of Consciousness
acts the same as the purified Soul level

and in this way you can create
multidimensional level of control
just like God does
due to personal purity ^{yes}

every element works for Him
often practically the same

and here is simply the purification of the Soul

it is also a purification of Consciousness

purification of the Spirit
you can act from different levels in the same way

i.e. the level of management increases many times over
this is in the usual sense
the amount of force simply increases

if at the same point
shine
from different levels
under the same level of management
it turns out that you just get
super power control

This concludes today's seminar.

thank you for your attention
