

GRIGORY GRABOVOY
The Teaching about God
Action Formation System
02.04.2004

Hello again
the topic of my seminar today
This is my Teaching about God
Action Formation System

in this structure of my Teaching
I show how it should be done
in the control element through your Consciousness
shape the action in the same way
how God shapes His next action

and at the same time when you perceive something
through the structure of your Consciousness
then it turns out that it is necessary that in your Consciousness
that Reality was reflected
which you want to implement

i.e. in fact we are talking about that
what do you generally perceive yes
some information of the current Reality
well including physical Reality
must be able to modify it in real time
into the management structure

as God does
First he does, for example,
but at the same time He achieves the desired effect
i.e. it works out for Him
action and result
which he wants to implement
it's essentially the same action

and the result is a system of action formation
from the point of view of this system
then this is management
when this is precisely the approach to the system of action formation
forms almost simultaneously
and the level of action formation

i.e. you can form both at the level of the Soul
if you do Soul management yes Soul approach

or you can shape the Spirit
if you for example act by the Spirit

but in this system it is quite important
in many ways it is even of fundamental importance that
that you form as a rule of action
at the level of almost like concepts
and Souls, yes, if you, for example, consider the action of the Soul
emanating from your physical body
i.e. the light of the Soul

The soul being in the physical body
realizes light
which acts and shapes the action

but at the same time you can form
management structure
when the Spirit that surrounds your physical body
interacts with the Soul
at the level of your physical body
then your physical body is the action

then in order to be cured , for example
all you need is just
to concentrate the Soul and Spirit so much
and at the same time translate into focus, as it were , optical
body
for two such actions of the Soul and Spirit so
so that the body becomes healthy

i.e. it turns out that your desire
i.e. the action of the Soul of the Spirit and then the body
this is the realization of desire
i.e. the body becomes healthy

in this case it's more reminiscent of
principle of volitional control
but at the same time such a strong-willed one
when for example your gaze
for example , you look somewhere with your physical vision
and at the same time you want
so that within the framework of your viewing
you got control

i.e. your gaze is an element of control
just like you this is a management level
i.e. you are aware of yourself
as a certain level of management

then it turns out that in order for you to have
for example, equal level of access to any events

i.e., in principle, the task is that
to have the same level of access
even to those events
which, for example, in this context of action
not identified

after all, God created the world this way
what if you are some local action
let's assume you are identifying
then it turns out that you still have to have complete control
all external processes

and the more accurately you control external processes
the more accurately you implement local actions

i.e. it turns out to be a multi-lever principle of action
on a specific problem
i.e. formally this basically means
as if a volitional seizure
structures of self
all external controls
and through these elements
you get , as it were, external control
in relation to, for example , its action

and it turns out that you
how do you focus on one side
on a specific control
and on the other hand you are not allowing the development of this element
into a status you don't need
you form such an action
that you immediately get the desired action
in the impulse of one control level

i.e. in fact, this is what we are talking about
what do you practically implement, well, according to logic
such a level of management
when you receive an event

which you control at each element of development
of this event

i.e. for you the action and the realization of the event
it's the same thing

action formation
action formation system
and the final level of action
it's the same thing

i.e. here is the border of control, as it were Yes
this is a level that you do not overcome
and keep it constantly
at the level of volitional concentration of Consciousness

i.e. your Consciousness is so strongly concentrated
that you do not use any other elements
except for the resulting concentration of the visibility zone

example , you need this Well, let 's restore it
if you had to
some process of further action of an event
let's say you need to restore your health level
and you need to act like this
to event level
as if the next event standing nearby
was also at the management level

and you need to suppose do it like this
so that the management level itself was
Well as if central but within the framework of the Norm
and all intermediate systems
then it turns out you need to build
as if a nodal system of action
which regulates all processes as if external

Well The easiest way to regulate external processes
inside yourself

i.e. if we ask ourselves the question
where did human will come from anyway
i.e. how is volitional control
leads to the norm yes

if you concentrate there too much
and the level of will there let's assume to do management
in some specific system

then it turns out that it is volitional control
this is the level that comes from
as from the Will of God
for the more accurately a person knows the Will of God
more accurately he realizes his own will, it turns out
in an act of will

i.e. it turns out to be synchronization with the Will of God
where action and result are one and the same

and for God the realization of the Will
this is the level of His complete freedom
because God is always free from the beginning
therefore His personal action
in some aspect of management
this is the level of His complete freedom

those. for Him Will and Action and, for example, freedom of Action
it's the same thing in His understanding
for every action of His
this is His sign of free Will

and so when we look at
the level let's assume that the absence of, for example, destruction, yes
in some system
there is the Will of God's manifestation
then the level of destruction is the level
when God allows others to act
but which, for example, at the moment do not understand
the structure of Divine development
for example , they can somehow destroy

then it turns out that God embraces with knowledge
and these systems
but as if from the internal root control system
i.e. He puts into their actions
next training status
Well , that's where the various systems came from
according to the karmic level of education of a person
works on something

i.e. here the situation is precisely one of management

consists in the fact that
what God puts in
realized creative action
in any status initially

i.e. if you take and look at it
status of some destructive action ^{yes}
some destructive environment
then within this environment there always exists
the status of the Divinely originally creative act

but it really can exist
outside the system of this environment
and ^{as if} above the system as a controlling status

but which, ^{for example,} has not yet reached this environment
i.e. the environment did not receive the required level of ^{education}
it turns out that
or the required control

it turns out when we begin to understand
this is the meaning of volitional action
what is manifestation of will
then it turns out that there is will
as a local level of control over a specific event
as well as the level of general coverage of all events
by means of some kind of means
^{Well or something about the internal state of a person, yes}
or even the state of the body
[...] the state of the body

and when you, ^{for example,} start to show
such a sign of will
it turns out that your body is involved at all levels
at the level of volitional concentration
both Consciousness and body
at the level of realization of the action, in essence, it is still God

because the manifestation of will in the creative aspect
This is the Will of God in a conceptual sense, ^{or something like that yes, I mean}

and it turns out that when you start
sync like this
then you see how it works
in principle, ^{or something of} volitional concentration
Physical Body of God

because when you start to think
what is the sign of Will
from the point of view of your Perception
then it turns out that this is first of all
a sign of awareness of the Physical Body of God
as a sign of the general Will
Well or something manifested in all aspects of the Universe

so the Will is very concentrated yes
i.e. it turns out to be the Physical Body of God
in some aspect of Perception
has super-strong willed concentration
in relation to other objects of information
i.e., as if the principle of superaction

and this principle he proceeds from his own status
i.e. the Physical Body of God is somehow aware of Itself

when you start for example
this principle should be considered
from the point of view of well there is a human eye there
human vision human soul
then it turns out that in principle, in fact
there are no special differences in human status

i.e. the Physical Body of God
it should be, let 's say, as humane as possible
i.e. it must understand all human levels
to cover all the information
and at the same time must be in Action
superconcentration

and that's when God's Action
closes at the final level
it turns out that God always recreates Himself
Your Physical Body

and this Action is simply directed towards others
gives them proper development
i.e. What does he do? Well, let's say yes.
unlike a human
who must learn this Action

He's just for everything
the element of His creation shows to others

and due to the fact that the element of creation

This is still concentration , yes
it is His own Will
expressed in one's own creation
then He doesn't have to control it, for example
all external events
he has enough in his soul for himself well in general, create
the level of some element of manifestation or creation
or just create yourself in some element of time
and time manifested in the volitional levels of other people
i.e. time as a volitional aspect
after all, a person can, in principle, perceive time
as the Will of God
here's an example there God appointed a certain time yes
to perform events

but in essence, time is a volitional aspect
the man himself introduced the hours
and for example, he may simply not react to time at all
perceive events
as an element connected with his own life

i.e. he was born and he did something
if we abstract that at that time the clock was running
then it turns out he can compare events
only from the point of view of the events of one's own life
and such events, both internal and external

i.e. time for a person
these are both internal and external events
in this case
if it excludes the element of time
as if defining the social status of events
i.e. time as the Norm of all external and social events

this is exactly how God determines time
as a structure for one's own development
if for example we look from God's point of view
to all galaxies
and His personal Action
in the manifestation of the whole World
then here we are talking about such a time
as if in human understanding it is not worth it
He just has a question about that
how should he perceive all events
within the framework it turns out to be your own well in general, my own
i.e. He must perceive events
within the framework of its own development

and it turns out when we have
for example the action of this time level
then we can perceive it this way

God first
shows its own status
at the level of manifestation, for example, well as if
from the level of your actions and your organism
when you perceive some control
then it turns out that you can perceive
such as an action coming from you
i.e. in the element as if a connection
your actions
and external actions

but you can also perceive
action in this way
what do you regulate, for example?
your own event
for example, you need to cure someone there, yes
restore your body

then you can see the development of the organism
just as if in the system of internal Perception

then it turns out that your action
this is essentially the action that you define
as a structure of self-knowledge

i.e. it is only necessary to somehow limit the action
as if an element of one's own self-regulation
then you get that your action
this is the effect of your level of development

i.e., for example, you abstract from other phenomena of Reality
consider only the element of action in your development
you have no concept of "time"
then you get what you can
for example, get this action in this way
what do you realize first
Well for example what happened for example in the work of your heart
how did you react
to some external environment, for example
how did you perform some action, let's say
let's assume Well, it doesn't have to be external, yes For example

if you start doing management this way
that your own events are built like this
that you see them as if with your inner eye
as if God saw it
in the timeless aspect of management

then you get
that this is the context of the Eternal development of your events
it's primarily the level of what you can consider
let's assume the status of your action is like this
what do you see through the Eyes of God
how are your events in general
from God's point of view they develop

well, that is, what I am doing now
I just enter your action on everything
into a timeless aspect

i.e. I try to show from God's point of view
what do your actions look like in general
where there are no social connections, yes
where there are no elements of control, let's say
through the element of Perception of events
as for example is done in the structure of temporary Perception

i.e. if the question is how to do it
for example Human perception
if we want to assume Well, somehow connect the line
and the internal line of events of this person
and from this line be able to single out the action of Salvation

This is how a man should save the whole world
when he has well For example there are a lot of things to do there
are a lot of events there
and it turns out that if this level of action, for example, yes
his personal actions
this is the level let's assume
and the Actions of God
and human actions

then here is the system of formation
in general, it works out here
what exactly is formation
more Actions even of God than of man
is revealed by God himself

and is presented to a person

i.e. where the synthesis of action takes place
and God and man

we can see the following status
as if the development of a person's personality

when we see it
we can then determine any microstructure
or there is a Macrostructure near a person
or there is a microstructure inside a person

i.e. we are actually opening
access to a person
and to the system of human action control
in conditions when he himself of course agrees

i.e. if we find such a level
this level is still timeless
where the system of action is implemented

it turns out that we can quite easily distinguish here
a single human cell
and highlight it so that this cell
as if it were hanging in the space of Perception
and around this cell
there is a level of control
which is practically very simple

i.e. then it is enough to act by will
Let's assume this cell there to withdraw yes
which could be a negative cell
there carrying negative information
and it turns out that the further level of events in a person
is leveling out
i.e. he becomes, for example, healthy

when you teach knowledge for example
associated with the identification of the internal spectrum of the event
or internal level of event action
it turns out that here the identification
this is what this cellular composition is like
that you begin to analyze the connections
between for example different cells
and you can see how the human body is built in general
and transfer the actions for Rescue

into the structure of only one cell
and this cell will transmit it to the whole organism
i.e. an unconditional information transmission system

educational technology
when it is not the spectrum of Perception that is captured
and not a spectrum of time, yes
and is captured only under control conditions
it's just like it 's being captured
i.e. it is captured by Consciousness
what needs to be given as if into the internal passage
human actions
into the internal development of man
so that a person understands the education system
and was saved

i.e. the element when a person is considered
as an element of God's Action

and when you consider
this level of education
then you get that the Action of God for example
this is a simultaneous action of a person
but directed towards God

if you start to analyze this level further
then you see for example why they are born yes
children immediately created for Eternal life
because it is a synchronous action
the volitional act of God and man
this is the Eternal Man in essence

for God is originally Eternal
giving Eternal Action

it turns out that the child is initially born
in fact, he is immediately born Eternal
and it is precisely like this that it is initially formed
in the history of information so to speak
that he has all the prerequisites for Eternal life
i.e. there are specific systems of Eternal development

and if, for example, a person is at some level
these systems do not develop
then it's quite easy to follow
if we know exactly

extra -event context of action development

because it's the easiest option
just to study the non-event aspect of the action
when we consider the action outside the event
it is easier to study
Well, this can be compared to that
what if we just take for example
and we just stop some information yes
and then we can deal with this information more easily

and so if we set a task
just go and stop the action
and look at it from all sides yes
how is action created in the history of information
what does it look like from God's point of view
from a human point of view

then we must enter the structure
where the action is as if there is none
i.e. it is a structure outside of events outside of action

but the structure outside the event outside the action
this is a structure that is
basis for action
i.e. as a kind of substrate yes
the ground for action, well, a supporting plane , or something

and further based on this
we can do it this way
setting your personal goals
just go ahead and set your personal goals right now
bring these tasks into the system
both actions and in the system outside of the action

i.e., for example, select a plane where there is no action
and to highlight, as it were, the control phase
some optical system
where does this action take place
you just watch it from the side
as a kind of optical display system
and neutral at that
no need to put it into action
some kind of control element initially

and you just need to implement the necessary management system

i.e. you need for example there to cure well specifically something yes
insert this into the action system
into the system of no action
and you will see that the implementation process is happening
i.e. God begins to rule
and you see how God controls the action then

and this is where the control element starts to happen
where there is no control over the action
as if the system is out of action

the system of actions itself
and your event is located
as in the scope of action
as well as in the sphere of absence of action

then it turns out that you have
entry level management
i.e. where the action is still absent yes
you are just getting started
you have a dynamic system in the second sphere, so to speak
and it is possible to create a third one
or there is a tenth of any number of spheres
where the result is only for just
it is the interaction of these two spheres
the beginning of the action and the next action

and then the controls become very simple
you just take everything and don't let the action end
i.e. you kind of artificially prolong the action

and when you start to drag out the action
This is a technologically very simple technique
from the level well you can perceive
as from the body level
or better yet, from the level of the Soul
which is currently inside the physical body
there is a ray that passes through the sphere
beginning of action
is included in the scope of development of the action yes
and your event is here inside
and you don't let the event unpack
in negative status

i.e. you look at the event like this
that you always have the status that is needed for you
or it's a cure

or it's some kind of social event

Of course, there is tension of will in this case let's say you have to use your will
but in this management it is just the same
the volitional aspect is very pronounced
because you actually hold it at the volitional level
almost the entire spectrum of management
in this system

because when you start working
with the structure of the organization of action
you work on principles
where is the Soul, Spirit and Consciousness
they are very tightly implemented
i.e. they are connected in terms of control over the action

because control over the action
it's not the action itself
i.e. in this case you are forced to work
at the level of volitional concentrations
as if for the element of action as such

and when, for example, you reach the level of control
and this glow and control over the action
this is the realization of your inner desire

i.e. when you know the goal
and the goal is being formed
and Soul and Spirit and Consciousness as well
and for example there with your physical body
then the formed target is obtained, the target glows yes
this level becomes so strong in optics
what do you start in the structure of the action
already influence by its own actual glow
i.e. you can achieve control
only by fixing the desired event

and at the same time you can even perceive, for example, Yes
some negative signal
signal to translate into the structure of the beginning of the action

i.e. to throw as if into the sphere before the beginning of the Perception of the
signal
such a generally artificial method
and replace theme management
so that the signal is not implemented

i.e. this system is very well as if it were manageable and very simple
that you have no surprises then
i.e. if you perceive a negative signal
it turns out you can replace it

you don't need to build a kind of signal restructuring system yes
you don't need to hit the signal fixation point
i.e. you have a signal disbandment
in this case it should happen in real time

and then it turns out that any element of events
for you it becomes, well, actually, kind of safe
i.e. you can see some event like this
what is safe in terms of that
that you are implementing positive actions
it may be an event that is not dangerous at all
but the technology of your management is just like that
that you are at the same time the volitional aspect of management
make you calm

i.e. it turns out that you just need to hold your attention
It's just a matter of extending the time
in the implementation of the event
and you get that the event is realized like this
as you wish

i.e. at the same time you know
that on a certain kind of substrate yes
there may have been a negative event status
but you just take this backing
and by an effort of will you seem to displace
from the level of its own control space

then it turns out that you come
generally speaking to the global action in this case
i.e. you record the external information of the World in this way
as you need in this situation

and this is the level of management it is
that this level is like a negative event
it is overcome by your level of will
at the level of action of the Spirit of the Soul of the Consciousness of the body

i.e. here you use

mechanism for the practical implementation of well, completely personality , so to speak

and the achievable action is this

what are you in

in the status of the logical plane of Perception

i.e. you do not reach the status of, for example, information systems

as if external to the action

i.e. here it is enough just to concentrate attention

on some control element

just like transferring a negative status

in the status of not being implemented

it turns out that these so-called remaining substrates are yes

i.e. you did the action

and you got positive control

i.e. what you wanted has happened to you

but it turns out that this so-called there yes

outer lining

where the negative effect was stored somewhere

i.e. the negative aspect of the event existed somewhere yes

once you have at least indirectly come into contact with him

even if it is just an element of information

then it turns out to be easier from now on

having fixed a situation that is good for you

you calmly reach the level

already possible area of negative status of events

and calmly disband

i.e. the main thing in this technology

perform the action you need

those. action for example yes Macro Rescues

positive action

there Well for example, recovery from a disease

the act of achieving some level of control

that's why there is a volitional principle here

it is primarily aimed at that

in order not to record a negative event

and here is the division of the negative event

into , like , specific fragments

is contained here in that

that you even have some preliminary information

about a negative event

you know how to get this information out of her
outside the aspect of the action of the whole World

i.e. how would the World be realized like this
that in your management the event is normal
but only you know that there could possibly be a negative status

it turns out to be easier to work with local information yes
as if with a single signal
than with a signal that is connected to the whole world

if there was any diagnostics
and the diagnostics recorded some negative situation
then this information entered the structure of the entire World
but if you are like
and then you will have to do a lot of work
to treat , to put it simply

and if you didn't allow it
completion of diagnostics of negative status
but you had a preliminary piece of information
that maybe there was such a problem yes
but you through volitional control
by implementing the action
as God does
they brought it to the structure that the diagnosis was not confirmed, for example
Yes
then it turns out that where you worked
with the fact that the diagnosis was not confirmed
this is already local information
it's much easier to deal with it

then it's enough just
one small impulse of universal control
and the information simply disintegrates

so here in this design
you can apply control
in relation to any system
Well for example if we consider
let's assume such an aspect as well there is a possible explosion at a nuclear power
plant

then here is the volitional control it is like this

what if it concerns a large number of people
then for example possible action yes
for example, an explosion would be possible
and you did not allow this action to happen

then it turns out that it's all the same then
if it could affect a large number of people
or there to affect the interests of, as it were, the greater part of the World

then here anyway you will look in the management later
that neutralization of this, as it were yes negative effect
this level is still quite difficult

i.e. if the aspects of the phenomenon are very great, it is possible
then negation
it still has quite a high weight, yes
in the information system
even if only you perceived this control

then it turns out that your action should be directed at that
to provide information about the so-called dense phase of negative status
be able to break into a number of fragments
and then you can work it out
each fragment separately

and the splitting happens very simply
you just take it then
so you're giving it again
for example, the initial level status of the action
i.e. that the information has not yet been realized

further logically if it was not realized
then there is already a way to translate
through the logical control level
that then it might not have existed at all, yes
this information
i.e. the usual logic of Perception works

and then broken into fragments
i.e. where could it be yes
some arise nodes there nuclear power plants

then you just diagnose them
in the current tense
you see that there are no problems there
and all information is dismantled

i.e. you can break down the Macroinformation
through what you do
simply by breaking it into a series of fragments

and further if you want
for example, to transfer knowledge there at a high level yes
or there is a large amount of knowledge there
transmit to remote systems
or where, for example, there are problems with the language
in mastering knowledge

then you can use it the other way around
in general, a different principle
i.e. saturation of action

i.e. you can transmit information in this way
that you are here yes
and let's say there mentally in Russian
to activate the action
that language becomes understandable at the information level
in any other place

and thus you transmit even to those systems
where for example the language is there Yes
If it's Russian, then maybe it's not very well understood
but nevertheless due to that
that you are applying exactly the action control
to language as such
i.e. as an external control system
you are beginning to be understood at the level of, for example, there is telepathy yes

and at the same time it is possible to build
such distance education systems
i.e. to give knowledge well let's say this to someone specifically
or you can suppose to do the management like this
that you receive not only, for example, the transmission of information
but you can see
how a person perceives information

i.e. the study of action as such
well maybe even in a philosophical sense
although I am now talking about the applied aspect of the action
allows you to see the management structure like this
that you can quite see
how the action is organized by the entire system of connections
i.e. how does God participate there, for example?
how do you participate

how each person participates in the formation of the action
for example, the fraction of collective Consciousness participates
i.e. all people, but those who are manifested specifically
in an information management system or something

then you can see that
what if you want to know yes
the structure of the development of one's own Soul
i.e. you want to see what your Soul is doing
it's enough to dial as many as possible
information actions
i.e. here is the Soul of a person manifested
she is closest to him and more knowable

if you have a lot of action here
this option is actually somewhat paradoxical
that in order to know we say
the deep structure of the Soul in statics
you need to get the maximum amount of external action

from the point of view of the action control system
systems of action development
it is clear that if we have a static system
the other one is maximally developed yes

and the Soul as the original level of the World
this means a static, i.e. calm system
from the point of view and from the point of view of knowing God

it turns out that by typing
maximum number of external actions
you can consider the state of the Soul
moreover, at the logical level of control
i.e. to develop clairvoyance

because the maximum level of development of clairvoyance
it is to look at your own Soul as often as possible

i.e. to restore, for example , let's say yes
remote access level
Well, to put it simply, an irrational controlling vision
see some control
for example, you diagnosed a nuclear power plant
and you need to recover
then look at your own Soul
through logical vision

then you will see that a full recovery is underway

i.e. the Soul is restored

Well how by the way with the eyes of its own glow

i.e. with the eyes that God sees from the outside, as it were
at a great distance

where He forms all the Macro-phases of the World

i.e. He sees the glow of the eyes of the Soul actually for Him

because for God

human eyes physical eyes

and the eyes of the Soul of man

by similarity it is one and the same

for God it's the same thing

His physical vision and the eyes of the Soul are one and the same

and therefore

It is in action that this is mainly manifested

and it turns out that when He looks

He sees the World as He made it and as He sees with His eyes

i.e. for Him it is also one and the same

it turns out that when you start

for example, set the task of Eternal development

for this to happen there must be no macro-catastrophe

you need your gaze to cover

all elements where there are no macro-catastrophes

why do you need to be able to collect

positive constructive actions

volitional level

because the more you are in the viewing phase, the more you actually

collect positive actions of the future

the less likely

that some negative action will occur

hence

one of the levels of management in this system

this is a skill in one viewing option

collect as much positive information as possible

needed for you for the World for the Salvation of the World

and it turns out that here then we have to

develop the level of vision of Reality

because that's how Reality works

because in this case
you will be able to really really dial
a large amount of knowledge
and this knowledge is as if due to that
that you saw them they become attracted
actually to the place of control

and to do this you need to be able to restore
level of logical clear for example knowledge yes
this means the level of the state of the Spirit
in the normalized plan of the Soul

i.e. the Soul as a level of some kind of substrate yes
for management as a base level
and it turns out that we can have the Spirit
as a level of action

and when we start our action
i.e. we are technologically able to arrange
inside the sphere of the Soul
and within the sphere of the Spirit
dynamic system and static system yes For example
then we get the Action of God
but expressed by your personal will

i.e. the development of your will is the Will of God
but you are aware of it and control it
you just see how this process happens

i.e., by the way, this is a powerful restorative level
for the human body
Make such control right now

take any event
enter into the sphere of the Spirit
dynamic level
and into the sphere of the Soul
and look how you start
as if to be filled with such a strong-willed effort of control
this is both your will and the Will of God

and it turns out that when you start to consider
this level of management as a level is omnipresent
for the Will of God is omnipresent

then you see very clearly
where you need to further develop your management system
this is what you need to develop
so that you have practically well certainly
some kind of Infinite access

i.e. here it is very clearly immediately traced
what you need to learn

if a person has a task, for example, to understand
that's what to study next
then your own willpower is enough
highlight
in relation to the Volitional manifestation of God
in relation to, for example, your task and your action

then it turns out very clearly visible
educational coordinates
i.e. what needs to be brought to the management level

and then you see that the division for example Yes
for statics and dynamics
it is still a dynamic process
from God's point of view

i.e. how God organized the World in this case
that where the process is not yet stabilized
i.e. where it is needed, for example yes, to finish studying, so to speak
it is a process of action and development
and where it is already known what needs to be done
this process of God realization
this means that any action strives towards God
logically it is clear

and here if you for example in this aspect
start inserting yours
i.e. you identify lines in your Perception
just take it and put it into your body
you just see yourself and insert yourself into your so-called physical body
Soul Spirit Consciousness
then you have a very powerful recovery status
coming from you generally speaking
but going to God and to the development of God
and you restore yourself immediately in aspects

and Soul and Spirit and Consciousness and body
generally speaking, all personality parameters

and your event is normalized
i.e. all that is needed is to identify it
the internal status of the action is ^{yes}
directed towards God
you restore yourself very strongly with this action

when you start to see this process ^{as if from the outside} ^{yes}
then you see that you can already see yourself quite well
as a personality that develops in Infinity

because the management structure is the most stable
if you perceive yourself as a person
Eternal Infinitely evolving

Eternal personality is everything that is Eternal, ^{yes}, it is one concept
An ever-evolving personality
a person who sees his/her Infinite development

and the interaction of Eternity and Infinity
in your own Perception
within a single personality

this is the level where God is manifested
as a structure of formation of both Eternity and Infinity
those. action formation
and the formation of statics
it is God in any case

then you understand
that any aspect of your personality
it is expressed in God in fact
i.e. you see God
with the eyes of the logic of understanding the process

when you start to get to this level, well ,
^{as if from a technological point of view,} ^{yes}
organizations of some level of technology
it turns out that God gives you technology
already by your own interaction
at the level of your logical thinking

what i'm doing now
this is just a logical level option

including the development of Thinking

and when you, *for example*, begin to consider this process
from the point of view of, *for example*, Eternal Development
then you see that your personal management
this is control directed towards you
but through structure
when God transforms your governance for everyone

i.e. even when you are in control in relation to
for example to an external management goal
Well, it would seem that there is some kind of business project *there*
then it turns out that you manage like this
that the actions are coming to you
but the truth is that they are implemented in action worldwide

so it is clear that any negative event *there*
or *there* is some evil message to the external environment
it still comes back to you
through truth in a transformed form
as if in a distracted manner
in terms of a general management plan, *yes*

so there is no point in showing
there is no negative effect
for action originally *means for example* pledged
how destructive is possible

it still pours out
to the expressor of this action
in a destructive way

i.e. he will be forced to fight *yes*
with myself

and in this case *it turns out* that if you analyze it
analysis of some processes *yes*
such as pathological diseases
or some systems
when events do not come true

need to see
and here is your initial impulse
as far as *well as if* clean
how justified is it?
how enlightened is he in terms of future events

and here you can control
the original system
your outgoing, as it were, volitional impulse of action

i.e. if you, for example, are there under the influence of certain events
you need to shift the event
so that there is no negative status for you
then you just need to follow up
what do you put into the event
what do you put into the action

i.e. there is the concept of "action"
and there is a concept of "putting information into action"
i.e. the concept of "action" is separated here from "action information"
this is a colossal important advantage

you can have the same scheme of action
like a certain there yes, the rink rolled out the form
and put any information there
and exactly the one you want to implement

it turns out that the form of action
i.e. direction of action
and what do you put into the action
these are different concepts

form is static
and you can generally insert an action like this
in some event yes

what you can do with your Soul state
constantly adjust
positiveness for you actions

it turns out that the division
into static and dynamic forms
this is the level when the state of your body
regulates all processes around you
in a positive way for you

i.e. you can, for example, fixate
at some specific state
and always put the same meaning into it
for example in different forms
i.e. different events but the meaning is the same

i.e. why does God control all processes
as if in real time
because there is enough of that here
that He worked out the correct level of input of the action
i.e. He always puts the right meaning into it
into various forms

and it turns out that based on this
we have something like this so let's say the management layer
when can you take control
coming to you for example
as the level of Divine action
i.e. you can see the Action of God
towards you
if you know your own action very clearly

In the World there are essentially two levels of action
yours
and the Action of God

if you identify your action correctly yes
then God's action is quite clear
it's just the next step

and when do you start working in this regard
then you can see the following
revealing the action of God yes
in the chain well there or in the investigation
in cause-and-effect systems
their future events
you can very simply light of Divine Action
spread

as of the current time
and for the future

i.e. it is enough to identify in the fragment of the action of a longer one
at least one Action of God
and then there are no problems

open just say entry levels
into your action
up to the present time
and into the future
and you will get the correct controlled event

i.e. the more the structure of God is manifested
in your actions
the more precisely you control

and for this you can do
a very simple technological thing
i.e. take some event, well there for example, the distant future
there ten years ahead twenty five
or maybe not very distant

to reveal very simple
as if in a comfortable situation without rushing
reveal the structure of God
where does He operate at all
with the very technique that I just gave

i.e. to identify the action as such ^{yes}
distinguish action from form
i.e. the form is different and the filling can be different ^{too}
but to reveal some static form
i.e. fix some form one
For example Well, in twenty five years
plant ^{means} for you it is a form
let's assume a sphere with a radius of ^{five} centimeters

you take and just for everything
you fill
from the point of view of volitional control through Consciousness
this sphere
different concepts, for example, "a plant grows" ^{yes}
"the plant is just getting organized"

and you see that if you fill it
some fundamentally different action
For example there that it is ^{some} other element of Reality

then you will see it very clearly
how God begins to touch this sphere
i.e. He immediately begins to normalize the situation
what is this plant for you
and you see immediately the Light of God

then just for everything
take and spread the Light to yourself
i.e. take it and i.e. stretch out ^{your} hand and say

so that the Light comes to you here now
and in all your future events
there for example fifty years ahead

then you will see this solid structure of Light
the landmarks become clear to you

i.e. the next level of management
how to do

when you do an action you have a path
and in this case you have no problems
when you have a way
you always do any action correctly

and from the point of view of this technology
revealing yes it turns out like a thread of the path
through the revelation of the structure of God in Action

you can do it quite well without even straining yourself then yes
completely calmly at the usual volitional level of control
perform a wide variety of actions
but at least it's right

This concludes today's seminar.

Thank you very much for your attention
