

GRIGORY GRABOVOY
The Teaching about God
**Transformation of human consciousness
through God Consciousness**
21.01.2005

Hello
the topic of my seminar today
this is my Teaching about God
Transformation of human consciousness through the Consciousness of God

in this topic i show
how should management be carried out
by isolating such a control function
as God's Consciousness first and foremost

and skill means to highlight the concept
or so to say a slender row yes
human or personal consciousness

and be able to from contact
with God Consciousness
get transformation
by means of which control is carried out

i.e. in this case the control itself is carried out
generally speaking at the moment of transformation

i.e. what we have here is basically a combination
and actions and management
as usually happens with God
Consciousness Action is control

i.e. the moment of realization of Consciousness is control
i.e. there is no division between
by the action itself
and completing the task

i.e. it is not at first that God has a goal of management
then this control is somehow implemented, for example
and only then the result comes
God has it all together

and it turns out that when a person
transfers his Consciousness

it is into this structure of transformation
he gets basically the same type of control element

i.e. it has a goal, an action and a result
in time, they are actually concentrated
at the level of management implementation

i.e. in this case the main management function
is that you are the goal of management, i.e. the result
then you choose from an already accomplished value

God who created Reality
He already has all the phenomena of Reality.
therefore, in fact, His Actions are in His Consciousness
it's like a selection of some elements
from what already exists yes for God

but for God it works out
the very fact of the existence of Reality
this is still His primary Action

if you think about that question
when for example he first perceived
For example yes, the whole Reality before its realization
then it turns out that He was somewhere and somewhere
somewhere with His Consciousness perceived Reality

so this is the level
where He actually created
the structure of one's own Consciousness

i.e. in this lecture I highlight
in its purest form , so to speak
for Human Perception
namely the structure of God's Consciousness

and it turns out that this is the creation of Consciousness
these are certain, so to speak, super-fast processes
which contain, in general, an investigative element of Consciousness
assume that Consciousness there is a person there
some elements of the World

i.e. it turns out that if you ask yourself the question
what was before the primary level of creation of everything

for God

then it turns out that everything is the same and it was

because Consciousness has a single type of function
if now the Consciousness of God has Reality

then God's Consciousness has always had this function

well, that is, from a logical point of view

quite enough in general Well in general, it's easy to understand
this system of Reality

but nevertheless, this is when we begin
transform human consciousness through God's Consciousness
we must achieve such management functions

i.e. any action that is carried out
positive for a person
this action must always exist
i.e. yes in all systems of Reality

and then we identify
consciousness of man and God
and the transformation is obtained
at some point in time

and here, after all, the main control element
is that since for God all phenomena are united
in one level of personal action
then for a person it is the same
that the choice of a personal decision at some point

i.e. it simply defines it at some internal level
that a certain action must occur
i.e. we must go deep
and very well as if insightfully even prognostic
look at a person's personality as a whole even

i.e. the personality of one person is understandable
but the point is that each person's personality
every person has such opportunities

it turns out that it is possible to realize a kind of personal construct
thus be able to well how to retire
into the structure of absolute control
i.e. the ability to have
and general management yes

and completely private

i.e. to see in general management
that private is only your personal perception

Well as if still myself as a person

i.e. you see the personality structure

and then it turns out that for you
the whole world also existed and always did
here you can find out
the structure of this very Reality
which is characteristic and is generally speaking
the rigid structure of God's Consciousness

i.e. you identify on a personal level that
that for God there is well as if by itself yes

and you have to in general
well the structure of one's own personality
output to control context
i.e. as if the control voltage is allocated here
what is this control action for you
i.e. volitional concentrated

but this is enough by the way action
in general, first of all, a strong recovery occurs
but here too the personality becomes
practically impenetrable to external influences
and if you hold this control for a long time
then basically any kind

then it arises
i.e. it is impossible to radically influence the personality
from the point of view of changing some kind of paradigm there
development of personality and tasks

and we can see that in the substructures
i.e. in the subtasks of this control
very clearly manifested
Again, a personal characteristic
and God and man

here the Consciousness of God and man coincide
and they coincide, by the way, precisely in human health
in health aimed at Eternal development

i.e., pay attention to the fact that human health
aimed at Eternal development
has a certain difference, though
from the usual, well, let's say, human health
where such tasks are not set

because even technologically in Eternal development
a person should be able to, for example rejuvenate there
must be able to manage events etc. yes

i.e. it turns out that there are even technological differences here
that's understandable

so it turns out that when we work
for example, over the structure of the Consciousness of God
then we see the next level of management

what for God
The action is , for example, one-time
i.e. for example God is
in the system of governance of the entire world
and for Him the action is like that for the human body, yes , such
that the human body is as if in an approximate
or what state of Reality
to God
does not differentiate to the Physical Body of God
i.e. any element of Reality is absolutely identical for the body
i.e. God controls the physical body, so to speak Yes
that the whole Reality
He does what is proper to His Consciousness.

if you ask a person such a question, for example
for a person how is it differentiated
his own Consciousness

i.e. here is the approach of the phase of Consciousness
some wave of Consciousness
there is Thinking
there is Perception
and there is a structure of Consciousness precisely
this is, in general, a very specific area of information
having a specific form
there is a golden glow

i.e. there are still different management standards there

in the structure of Consciousness

than, for example, the management of the Soul by the Spirit or, for example, there with a thought

i.e. it turns out that we have here

very clear understanding of that

what does a person excrete when

for example, the desire of Consciousness towards itself

i.e. let's assume it allocates pure yes

canonical hard phase of Consciousness

begins to move this structure towards itself

then we get essentially the same type of action

God always works in the structure of His Consciousness.

at the moment when a person can this optics

like just put it on yourself there

take it and walk there in a wave of golden light

but there needs to be identification

that this is your personal consciousness

and when you start managing

well, consciousness as a pure quantity

then here is the system of transformation of consciousness

in the interaction or there through the Consciousness of God

this is work in general with a fairly controlled environment

i.e. it is possible to raise the level of consciousness there

make more expanded make Infinite

to make consciousness ensure Eternal development

a specific person or all of them at once

and for this it turned out to be simple

here with the control technology

through precisely the transformation through the Consciousness of God

it is enough to just know everything

here are the mechanisms of this transformation

i.e. to be able to join fractions

human consciousness and God's Consciousness

at the level of often, well, ordinary, everyday actions

for example, so that a nuclear power plant doesn't explode somewhere in 10 years

and in everyday life it was laid down
an action that prevents an explosion at a nuclear power plant, for example Yes

then you can go through the structure
that by that time it was precisely the nuclear power plant of this hot type
that for example will no longer be in this place

i.e. there will be , for example, another energy installation
which is not dangerous for people yes
first control

and by "this place" I mean any place there
which may be on the territory of the Earth

Next we can consider the project
let's say for example there on the moon
there are some problematic systems
let them provide us with energy yes

but formally it is one of the levels of management
it is possible
but we cannot harm in any system of Reality

therefore, from the point of view of God Consciousness
we need to create a system that would function
in principle the same as God's Consciousness

i.e. it turns out when we start to react
on the structure of the external world
as a structure of a conscious reaction
systems

i.e. to put the meaning of a conscious reaction
from the point of view of the Eternal development of any system
well, i.e. the mechanisms of the machine, etc.

then we start to control
in principle, so to speak, more deeply
and state of consciousness
to the level of the human physical body

i.e. such is enough
Well, is it a direct level of interaction ?
the deeper the consciousness of a person
controls the external system
the deeper a person controls himself with his consciousness, the more

and ^{well,} that is, a simple example
the more a person is engaged in lectures
the more he heals, the more experience he gains, ^{yes} it works
the more the more he is healthier then
^{Well,} how does skill increase?
and that's all

or is he more involved in management
This means that it naturally has more management resources
will apply to your tasks

i.e. this is ^{like} a direct system of interaction
external and internal ^{yes} personal system
and ^{as if} socially expressed

i.e. it turns out by analogy
it turns out simply by analogy
from man to God
it is clear that the more it covers ^{per unit of time}
^{let's say so} ^{yes} God Consciousness
external Reality

the deeper his Consciousness is reflected on Himself
i.e. it goes deeper, ^{as it were}
inside his physical body ^{so to speak} ^{Yes}
i.e. we ^{basically} know this logically
from the point of view of human logic

but from God's point of view
It covers everything instantly.

and it turns out that this instant coverage
this is precisely the Eternal physical body of man
this is information

i.e. in fact there is no other system
so to do it exactly ^{like that,} ^{let's say,} ^{well,} demonstratively
socially indicative
this system of management
there is nothing else

because as soon as we show
that the Eternal level of man exists
it is clear that the person at this moment
can master everything
i.e. to equate the external world ^{with} internal management

internal tasks are then implemented
in the outside world
or in the inner world ^{yes}
Spiritual, sensual , etc.

i.e. the position of "external" and "internal" is equalized
what is God Consciousness by the way
there the primary level is really equalized
By God, this is ^{basically} a uniform system
He can influence
and on the inner world and on the outer one at the same time
or synchronize the influence

then the question arises
how god evolves
This is how he generally sees his development

from a human point of view it is understandable
there must be some actions
from God's point of view this is often
instant regulation of the whole Reality

i.e. regulation does not lead to that
that Reality is changing

He still knows everything, ^{yes}
He has already accomplished everything.

and here it is precisely the Perception that is
so that such a perception would be characteristic of a person
this is the transfer of knowledge for a person in fact
this is development and change
information structures around God

because the personal freedom of a person
this is its development
that's why it's clear
God made man absolutely free
to see what happens Self-development

in complete freedom He has personal ^{meaning}
convinced perception of a person
that he is completely free
and that's how it is and it's developing

and it turns out that the human consciousness is absolutely free
its development

this is what is God's task
and the task is development
i.e. God's task is development

as soon as a person learns to live forever
God's task is the next task already ^{yes}
he must be able to create physical Reality
Human

and it turns out that
^{well} I mean at that level
in which he deems necessary
creative level of management, etc.

^{Well} for example, a person there learned to create Reality
there are the following tasks ^{yes}
the more he does, the closer he is to God
So it does fit physically, ^{yes}
at the management level

it turns out that this is precisely integration
i.e. to act
^{Well}, maybe not specifically, like God in general
but at least try to do so ^{yes}
or in some specific directions
there is the Eternal development of the creation of Reality, etc.

and here the next point arises
^{so} what's the difference then , ^{for} example
in Infinite Development
Consciousness of God and man

here is a person who can live forever and can control
and then
that's exactly what's next
the task is exactly instantaneous, ^{so to speak} to the creation of the World
the next element appears

to create two adjacent points
^{Well}, let's say in elementary physics
^{Yes}, such action is known
anyway, mutual action is needed ^{there}
some kind of mutual action

and here is the element of mutual action
God chose man

i.e. having become a human being or having previously become a human being yes let's put it this way
He chose a man

those. namely reciprocity
it is still a personal characteristic

i.e. when a person can do everything there
he can make elements there of Eternal development
it turns out that all he has left is
an element of personal relationship with God and all that.

and when he already begins to understand this
his personality becomes truly absolutely free
he can then do whatever he wants
in a creative sense of course
and then the conversation will continue like this
because it does not provide for any other level of development
a certain level of Consciousness

and then it turns out that this is precisely integration
as if the consciousness of man or humanity yes
in God Consciousness
or transformation through God Consciousness
this is still a level of personal concepts

i.e. a person must be deeply convinced
in something specific, for example one thing, or in everything at once
but he must understand very clearly
what exactly is God Consciousness
where the question is decided immediately, let's assume Yes

as a control element
this is a very strong management in general
for, let's say, precise control systems, including

for example if you can sync
or transform there
your consciousness through the Consciousness of God
leaving as if an investigative element
well as knowledge actually yes
on his consciousness

then complex elements such as microboards of some kind
they can be restored
can we tell you in detail how to do the management
from the point of view of predictive there man-made systems

it is possible to restore some microcells
right down to the vibration of the atom there in the molecule
in the human body, etc.

i.e. it is a very precise, meticulous control system
i.e. you can do things through this system
which require a very precise approach
For example there is reading books at a distance yes

or the ability to say express
let's assume control in this way
what you need is absolutely clear
there to carry out some control in the human body
there is one necessary cell to move somewhere
or remove unnecessary cells there

specifically with this technology you can learn
see perfectly clearly
personal action private
and at the same time control the overall action
without reducing concentration on personal direction
the one you are currently doing
i.e. what are you treating there or what are you doing, for example?
some kind of strategic management

so here they are very clearly identified
management systems specifically for strategic tasks
i.e. strategic long-term goals of the task
and moreover through this system
can be seen quite transparently
all events are their own and precisely
i.e. to perceive events accurately without detailing them

because if you perceive it through detail
Well, it's still a waste of time
i.e. in this case you can control of course
but for now you are drawn into some one event
of some one of your events
or other people there
then it turns out that you are wasting time

but the full field of control yes
at this moment it seems to become
Well, at least that's how it feels
under primary control, as if less controlled

the thing is that in reality
if you have more precise control
part of events
then you can control even more
remote systems

the main thing for you is to be able to control it
which is connected with the ideology of Eternal development
with the ideology of absolute, for example, Norm and Creation

and when you are like this
as if the status was somewhat absolutized
enter your consciousness
then this is also one of the docking points
with God Consciousness
where exactly the movement of , say, any other systems
i.e. the development of the structure of the Soul means
for example the Action of the Spirit
or there is Perception if a person has it
expressed in this way

then you can quite increase
for example the Perception system
i.e. you can actually develop
controlled clairvoyance is obtained

i.e. for this you need to be able to control
in the conditions of some external
Well as if the system is sometimes somewhat chaotic, but it would seem
or there is some system that does not correspond
there at your level we suppose Thinking

and at the same time you can in conditions
Well there is basically no external environment
no matter what's going on around there
do target management anyway

i.e. you will not depend on that
what if there is in the control system
in the control information itself, even of a non-physical type, yes
it means there is some kind of interference there
or you have to be distracted by something
then in principle you can do both
in the structure of the Consciousness of God
develop precise control all the time
Well as if to pull the thought yes

all the time pull practically into one control system

and when, for example, you kind of draw this thought into

Well in fact, in some one control system

i.e. after all, the criterion for the process being manageable in general is yes

the criterion, in fact, of some level of management

this or that

always means it is still the same

sort of pulling out target management

to some distant or other environment

where management necessarily takes place

well, how do you go through some systems?

then one after another

and at the same time regardless of that

what information flows are there in the system

physical or informational

you bring the management to a logical level yes

so the accomplishment of management is that

what is unity for God

and goals and actions and results

i.e. God in any case carries out His management

the only thing is that God doesn't have any destructive accomplishments

what is there from the point of view of people's Thinking

and when we consider

for example if we consider

the process of universal resurrection there is like that process

that, for example, some person has a thought

that yes, for example, universal resurrection is the norm

from this moment on how crystallization can be

the universal resurrection will happen at this moment

those. Action of God

God is in control and watching

at what point and why

He has his own systems of communication

why at some point

there must be a general resurrection

why at some point

People there must learn very quickly yes

technologies of Eternal life

i.e. precisely ^{as if} due to the consciousness of one ^{or two}
or there are many people ^{there}
it is logical that the more people
the better
to teach others

but still enough for one person
^{let's say} there to increase the sphere of consciousness
i.e. to learn from one person in particular
^{as if} from start to finish
and that's all
his personal glow is very intense ^{there}
^{there} in telepathy or due to his image
quickly pass on knowledge to the next, etc.

i.e. it turns out that the next level of integration
Consciousness of God and man
namely, transformations through God Consciousness
this is the level where you actually see
myself ^{in general} ^{let's say} the nature of things
transformed by God Consciousness

i.e. one can see the following ^{seemingly} distant events
be able to dock ^{there} ^{for example} with God Consciousness
in some remote control systems

but one must also be able to define, ^{as it were,} the nature of things
from the point of view of Eternal development
see through God Consciousness

i.e. to be able to impose the Consciousness of God and look
like through some kind of filter ^{or something}
through some kind of enlarging optics ^{yes}
what happens to things ^{for example} ^{there}
some ^{ordinary} things
which are in common use by humans

and now try to make such a technological method
just take and look
the shape of these things
i.e. the glow system ^{yes}
luminous conversion system

and you start to see
that in principle things are quite interconnected
among themselves

i.e. you can have just one thing
and logical lines lead to some action yes
which is planned for example in the future
and through a thing one can determine
what action

but there is one material object, yes
near a person
he can take any cell phone , for example
and through a cell phone to see the whole picture of the world
all things are connected all phenomena are connected

i.e. if you act like this
it turns out that God is through every element
gets all the information
but then for Him one element is needed yes
He himself
i.e. He needs a human physical body

therefore the physical body of man
has that conversion system
through God Consciousness
that all the information is as if inside the body
let's say within the physical body
exists

then a search engine appears
for human consciousness
find where at what moment
for example, the human physical body reacts
and from what level does the control context come from
i.e. when the physical body of a person
perceives
in fact, as if well, the external reaction system

i.e. well, there is some external phenomenon of Reality
then what exactly in the body is triggered yes
to determine differentiate yes system
and be able to send back the control impulse , as it were

so here is a whole system in fact
already knowledge of the individual
i.e. a person begins to see the development system
from myself for example Yes

to another personality or to another level
as your own system of knowledge

i.e. he is forced here or so to say he likes it often
he must definitely see
how is it from the point of view of technology there
some system there to convey

i.e. he perceives
information exchange system
as ordinary knowledge

and if we highlight in ordinary knowledge
this system of transforming things
as i said yes
the connection of one thing with another
causal relationships
then it is clear that this can be prevented
not a single violation there, for example
i.e. it is possible to prevent the impact of some crime there, etc.

i.e. all connections between the elements of Reality are visible
that allow you to bypass some process

and just imagine
for example in human understanding
for God
when all Reality was created
there were a lot of tasks there that were, in general,
Well, maybe on a mechanical level they are very simple
here the tree can fall somewhere there on the water
there are animals moving there, etc.
and now we need to make sure that this doesn't happen
and so that there would be some harmony

i.e. there are a lot of systems there
where it was necessary to overcome systems
Well, there may be some contradictions, yes

so it turns out that for God there is an overcoming of contradictions
this is in fact the aspiration of all Reality
to Him

i.e. He shows this one, actually speaking
as if public for people
way yes

Well there prayers are a movement towards knowledge of God

and from the point of view of, for example, that Reality
which exists for any information objects

For example there is the same tree, some kind of material World
then they simply must have the properties of Eternity
because the Eternal God gives the properties of Eternity
of course and to all phenomena of Reality

i.e. then it turns out that He must be somewhere
at the beginning
at the moment of the creation of the World
lay down this system
for any information object

and it turns out that the next level
transformation of human consciousness through the Consciousness of God
it is the ability to find the primary meaning
primary level
for any phenomenon of Reality
from the point of view of the Eternity of this phenomenon

Here we are in the development of civilization at that point
which is actually already very expedient
find remote influence systems
when a nuclear missile doesn't take off, for example, yes
i.e. remote control

and when what we can do for example management
and create a system of Eternity
by level well For example there is material
a piece of land there, let it be a meter by a meter square, yes
and thickness there for example there is a millimeter
or maybe more, two millimeters

then if this area has the properties of Eternity
then the rocket won't be able to get there, etc. yes
there is a system of mutual influence

i.e. it turns out that if we mean Well, we can now
implement this system throughout the entire system of Reality
namely the Eternal Consciousness of God
for the whole Reality
then a person naturally acquires
namely the properties of Eternal development

and this level of naturalness
Well, of course it doesn't quite fit there

like putting on eternal gloves for example Yes
and man becomes Eternal

but still he starts
man see in Reality

the context that becomes closer to him Spiritually
i.e. he perceives spiritually closer
that system where development is Eternal
where are the properties of Eternity for example
some things are more manifested yes

at the same time if we watch some thing
she may be yes there is worn out
or somehow torn there, etc.
but maybe we are talking about that
what not to tear a thing in order to know
that one can see the structure of Eternity

and here it was meant
that we can see the action of God
in relation to
to some thing
and in relation to you

for God all phenomena are equal
if there is Eternal development
then in principle a person always has clothes

i.e. the properties of Eternity are obtained
it's not necessarily the same clothes there
having such a property
this is any clothes naturally
but the main thing is to see the nature of these things yes

i.e. the main thing is to see
how god looks at you at this moment
i.e. to see through the structure of things of the external World
and be in the contact you need

because it is God's Action
This isn't surveillance of you.
this is, on the contrary, providing even greater freedom

hence the next level of intersection
Consciousness of God and man
from the point of view of Eternal development

this is when a person becomes
more and more free in their actions

for example, free from a possible global catastrophe from
free from diseases , etc.

and when you start to see this structure
then it is clear what in principle can be known there

that the things you need you will have them ^{yes}
the systems that you want to implement
they are being implemented by you
because you are on the principle of freedom
still find time

Well, you can give a logical example ^{there}
if you have free time
During this time, something can be realized

so when you see
greater freedom of action
so you naturally come to that conclusion
that you solve issues in the future

so the following ^{is like} a consequence already
transformation of human consciousness through the Consciousness of God
this is the acquisition of even greater freedoms ^{yes}
in action
in personal action

and when do we start
these are ^{some} canonical, ^{so to speak,} principles
observe
then we can clearly see what we have here
quite huge in ^{essence}
for certain points of view
resource
in order to be able to do this
actually, such a fairly voluminous mass ^{yes}
where is the Consciousness of God and man
it is still a single, i.e. one level of management
i.e. in one push , ^{as it were}
take and lift this mass of control
a little higher

and what is "higher"
if you were able to move it ^{as if} Yes
Consciousness of God and Man

by his personal action

this level of information
take it and make it manageable
well at least raise it by a millimeter with optics
so that's what happens

you have already synchronized with God's Consciousness
the transformation system is already like that
what is your consciousness
interacts with God's Consciousness correctly

because you were able to make a control
as if by a cumulative level
God and man ^{yes}
Consciousness of God is the consciousness of man

and then it turns out that you are doing
this is action
as if knowledge actually ^{yes}
at the management level, it may not be very close
but you are solving the issue of personal management
i.e. your earlier tasks begin to be solved
or the target management that exists now
can be resolved instantly

By the way, this level can often be used
as a level of instant control

i.e. it is taken and actually allocated
level in Perception
Consciousness of God and man
this is one volume
and just move the system

if it works out
to move you have to move
it is precisely from the point of view that it is desirable
or horizontal
or slightly lower along the horizon from bottom to top
just vector

and as soon as the movement begins
consider the tasks that you have as a goal
put
often the tasks are completely different

i.e. the goal is not here
not at this level of consciousness
and in another place
and this goal is being realized

so now you make such control
through the level of Macrosalvation
take, allocate
the faction of the Consciousness of God and man
and move it a little bit
geometrically this sphere there moves a little bit
and all your questions are resolved

I will work with you

when you work under this control system
try to keep your natural level of Perception
i.e. well, the natural system of consciousness , so to speak, of yours
these systems were practically balanced

i.e. try not to highlight this action
as a concentrated control system
i.e. work as it is natural for you
you work with your consciousness

so it turns out that within the limits of your Consciousness
you don't have to strain yourself
this is a natural state
you don't need to increase the resource , for example
increase the control system

and that's why it turns out
what you try to do here is like this
so that the natural state is the governing one

quite often there is no need to increase
it is the control context
as if yes control voltage

because for God the whole dynamically developing World
there is all the future Reality of the creative type
where is the Eternal development of people
and each person individually
this is the Reality that exists
and it does not cause any tension in God
He just knows and sees it

i.e. try to see here
this Reality but through consciousness
you can see with your eyes
you can see with your Soul
but try to see with your personal consciousness

seeing with Consciousness is still a different technology

i.e. you need to be able to put forward a management structure
for example, you make a selection of the Consciousness faction
i.e. all Consciousness is there
and at the same time there is a local area

i.e. you understand spiritually
what is the local area
i.e. Infinite quantity
you understand local area yes

The Infinite Spirit passes into the point of fact

and the Soul means it embraces, as it were
the external whole sphere of Consciousness

and we get Spirit and Soul
interaction between Spirit and Soul
this is that faction of Consciousness
who will know the truth that in the future
all are naturally Eternally Living

i.e. this Reality, this truth, it emerges as if
Well, here is a sign of the development of events
it's that you move towards it
but the event exists in any case

i.e. it turns out that you have
in general well, it is quite characteristic for your Consciousness
action
when you look at something
you perceive first
some events sequence of events
by the way, you can take a look
when you look at something
where your faction of Consciousness is initially located
i.e. what carpet i.e. what corridor of Reality
begins to unfold
or what your Consciousness is imposed on

what specific geometric object
or ^{there} territory
what exactly
By the way, you can even do this training
look specifically

for example you need to concentrate
there on ^{there} feature film
in the cinema which will be tomorrow ^{yes}
before going there thought ^{well} how to focus
You somehow embrace it with your Consciousness
some element of Reality
you highlight some kind of circle

and look at the border areas
at the same time, the allocation of the Consciousness fraction
this is, by the way, a certain sound environment
you can even distinguish the boundary system by sound
and see where the systems touch
with your Reality
and why
so that's how it is once you find it
^{there is} an instant impulse of God
and you will find
where is the Consciousness faction
touches
with physical Reality
this element becomes Eternal
in your Perception
physical Reality

it can get on the body ^{there}
on some object ^{for example} there is any material ^{there}
can get to the Spiritual basis

i.e. for God you will see
that the action of His Consciousness
towards you
this is a monotonous action
It acts the same on your physical matter.
It acts the same on your Spirit.
It even acts ^{in almost the} same way.
but the truth is from the point of view of the Spirit
on your Soul

i.e. He can show that He is absolutely
^{Means} Well, let's say Macro manager

in such a human understanding
i.e. it can act on everything at the same time
and in principle with the same force, yes

i.e. it turns out that the omnipotence of God is precisely in that
that He gives almost complete and comprehensive knowledge
across all systems of Reality
to a person

and by and large to any system of Reality
It gives the opportunity to develop to the Eternal level

therefore the next level of human transformation
through God Consciousness
is the transfer of knowledge to any elements of Reality
about the fact that here is Eternal development
this is the canon of Eternity
this is a canon for everyone
not only for humans

and when you begin to see this Reality
then you can enter by analogy with that

how God enters into contact with an instant impulse
with your Consciousness
you can enter with any element of Reality
there with a molecule for example yes with atom
with a large structure with a house, etc.

i.e. it is possible to profile systems
there are destructions of houses there for example
influence molecules
so that it is not there let's assume there is a nuclear explosion, etc.

i.e. you enter a certain system
where do you convey the situation
and then the situation is about the same
you look further at yourself, yes as if on myself
and watch when God gives you information
what are you doing
how do you behave

then you begin to understand
how another piece of information reacts
I don't mean a person but some molecule
Well, not exactly the same

but at least you understand
how long does it take for a reaction
between you and this molecule

i.e. you start from synchronization of action
God and man
God gave you the information
i.e. in fact, there is Its own faction of Consciousness there
information for exchange .
He showed that such and such exists.
you can consider this, or you can not look at it, for example
but as a rule it becomes clear later anyway
what did you want from me earlier
By God

and you can see the same thing by analogy
in relation to external control, as it were

so when you do
transformation of one's own consciousness
through God Consciousness
you actually cover in the management system
all that part that concerns
namely all the phenomena of Reality

i.e. you can practically then
make management
For example there from any side in relation to a person
in terms of exactly for example
meaning geometrically from any side
make management by means of that
that wherever a person is
put those control systems around it
which create for him Eternal development

so it turns out that you
as if you have universal access to a person
for man is Eternal
it allows such access to be carried out
precisely from the point of view of Eternal development
there he has complete freedom

because here the opposite action occurs
Eternal development means man
in Infinity completely free

that means he is there personally with complete free will
gives you the opportunity to approach from any side
and pass on the information to you

that's when you'll learn
transmit information from any side
to a person
then he will definitely have it worked out
Well how would such a solution be

i.e. he either accepts information there or not
but you have carried out all the systems as if the transfers

the Consciousness of God is also structured in the same way
He created a big world with a lot of events.
or even some unique events
and all this in order to convey the knowledge of God

you can for example take knowledge you can take it later there
but sooner or later a person will still
by and large it is aimed at accepting them
i.e. initially he chose it on his own
this is exactly the way
Human

and therefore it turns out that when you, for example, ask the question
there and why did the person choose exactly this path there yes Means

but all Reality is the Action of God
and he agreed to live in this Reality
So that means he chose this path
well, one of the logical examples , etc.
you can find the Spiritual level of knowledge
of this system

when you find
as if a logical level of choosing a person's path
and that means there are aspirations there let's say God Consciousness
well improve make this path easier
then we see that at an infinite distance from you
i.e. in Infinite time in Infinite information
naturally you are there

this is where it comes up
very strong unambiguous certainty

and even knowledge
what exactly is in Infinite Development
you are undoubtedly there
in Infinite development you are

the only question is that this should be Reality
for the Spirit of the Soul for example of all systems
and for consciousness it is absolute Reality
in terms of each subsequent transformation

i.e. the more contacts with the Consciousness of God
is happening
in the human consciousness
the more accurate this knowledge is

first fact first
Well, make two or three mechanical types there
contacts
take a fraction of your consciousness
and bring out the target at high speed
contact with God's Consciousness yes
there was a flash of Light there
all contacts are there, for example
you will see the place and then further, etc.
further you see the technology
what needs to be done now

i.e. simply contacts with the Consciousness of God
as a management goal, just if you set
simple goal
transform human consciousness through God's Consciousness

and do it through any universal methods
this given work yes let's say so

gradually from the work itself by the way
the human body becomes like this
that it is precisely the waves of Eternity that seem to be rolling in
and it is clear that there is an Eternal Man there
here you can take a look at it
you can see that there is a wave of Eternity there and that's it

i.e. it turns out that he is in Infinite time
Eternal
i.e. here it is even clear that it was not at that specific moment
he is Eternal

which kind of happened by itself at that moment
namely in Infinity
i.e. the waves of Infinite Eternity are rolling in

that's where the difference lies
namely the structures of Consciousness
God and man
where is the structure of Consciousness
it is still a certain value
it is precisely the golden aspect that is so optical
it allows you to highlight
such a silvery-blueish color
namely the optics of Eternity
i.e. it is very easy to understand the element of influx
as if the waves of Eternity

and this is very important for Consciousness
because here when we start
Well, let's assume we think logically
we can single out, for example, the sphere of Consciousness, yes
we can highlight the sphere of Thinking
and try to connect
there is the sphere of Consciousness
with the sphere of Thinking

but here it turns out there is such a moment
as polar unipolar quantities
the sphere of Thinking begins to shrink
inside the sphere of Consciousness
Well, Consciousness is a more general quantity in this case
and Thinking has different color systems

it turns out that we can do this
more concentrated Thinking
when we consider

namely the sphere of human Consciousness

i.e. you do n't even have to concentrate there for long, yes
just take a thought with concentration
and simply introduce into the sphere of Consciousness in a mechanical way
we get high concentration of Thinking
i.e. the implementation of actions becomes more effective

and when do we start
For example there in the structure of Thinking
let 's draw out the system of action

when for example we need time yes
we need to take and exclude that there is no time

we need to do some action
we pull the thought we expand the Consciousness
or it doesn't matter how mechanically we do something with it
there you can narrow it, you can make it flatter there
or more multifaceted
it doesn't matter, we can control it here
from the outside as if yes with Soul
we can control Consciousness

and now we begin to move this structure
then it's exactly flat
flat system of Consciousness
they took this and reflected the flat line in Consciousness
but it is clear that the Infinite Light is coming
from any flat value

i.e. Consciousness as such is a system
cannot have a static image

i.e. a flat system does n't last long
begins to instantly turn into large balls of light
and there the multidimensional region begins

more general sphere it can hold on for quite a long time

then we come to that level
that in principle all people have Consciousness
it's quite uniform
from the point of view of Eternal development I mean
Every person has it there
Consciousness in principle from the point of view of Eternal development
has approximately the same systems

how is complete human freedom expressed?
he has the same structure of Consciousness
personally strives for some systems yes
this is again a sign of absolute freedom

because in order to have Eternal development
it's still like a basic school course
we need to take some kind of optical control system
and this system in the form of knowledge
just take it and implement it, that's all
there is nothing special there in principle

it's precisely in the technological aspect of management

it turns out that when you see
management structure as if from outside

i.e. for example there for Eternal development
you need a certain amount of consciousness there
it is visible by the way
how much does a person need to learn to live forever

well, it's not easy to know at some point, yes
that he lives forever
It's not just spiritual to realize it
it's not easy to be confident
and in general it is definitely worth doing
from the point of view of the systemic approach
i.e. in fact, we are talking about the need to teach others
in essence, by and large

And
because when a person is convinced
that other Eternal Living
it naturally moves to a uniform level
he also becomes Eternal even for this reason

and to guarantee that a person, for example, lives forever
any yes
if at least one does not live forever
It's no longer possible, the system is not the same
management
i.e. the system of Reality is not the same

if all people except one live forever
but something is happening with that too, yes
the life of one ends
it is clear that all people
it is no longer possible to say that they live forever

it turns out that in any case
this is more like a system of knowledge transfer

here is a similar system
and the system works for everyone

it turns out that this volume is quite understandable
i.e. all people should live forever yes

some kind of sphere of information yes

For example there q_0 conditionally as in elementary school physics there

then let's assume the second level there

each one lives separately forever

well let it be there q_1 let's assume

then we begin to enter into these areas
your own Thinking

and that's when we start the dive

there in this sphere in the first there the second

to bring one's own Thinking as if Yes

those. isolate a thought from consciousness

i.e. how to take and artificially separate these systems

then we will see exactly the interaction there let's say

q_0 q_1

the flow of this information

this is the instantaneous Action of God

i.e. the knowledge that God immediately gave to everyone

and God gave it to everyone individually at once

i.e. to everyone

and to all at once

and it turns out that this is what

there is a faction in the collective Consciousness

where this knowledge is quite simple

It is natural that one person can look there and pass on yes

i.e. it means that since he can

that means every person

purely well let's say informationally logically speculatively let's say so

there is an area where this area exists

inside the physical body for example

as a sign of the individuality of a given person

Well this level exists

and in the Spirit of man

and in the Soul, etc.

but for general objectification

there is a physical body

so the physical body is needed

from the point of view of God Consciousness

for the objectification of Eternal development
and for the activation or existence of something like that
this information inside a person

so it turns out that we have now come to this
that even as if for storing this information yes Means

but if
so that the information is stored forever
i.e. this is a powerful healing effect by the way
know where this area is
Well as if storage is not necessarily inside a person
it can be an element of knowledge of a person

i.e. the person is not used
like there's some kind of information storage there
namely as a point of natural acceptance
i.e. the person personally accepted it
he personally decided, after all, he is absolutely free

and he keeps it not because he is there
they took it as a cell and put it there for storage
and that he chose this path and he defends it
he takes the element of Eternity
and somewhere there for example Well, what can be done to store it there?
can hide yes
maybe you can carry it somewhere with you in your briefcase, for example

but the best option
take and teach everyone
then it's clear that you can't do anything about it

i.e. it turns out that it is on
precisely on personal initiative
i.e. not the concept of , say, "storage" as such
namely the concept of that place, let's say
is a completely unique system
where God trusts man
namely the structure of Eternal development
this is the principle of trust, yes, the principle of complete trust

and then it turns out that a person lives forever
because God trusts him
He tells him yes, there is such and such knowledge
you just have to find them there
Well let's assume there inside the human body of the human where

where is the maximum illumination of this information
at the moment of some actions yes it happens

i.e. let's assume you interact
with some object of Reality

Well For example there with the computer
look where your body is more exposed , so to speak
where is the glow greater
precisely from the physical body
and look
why is this happening

the human body transmits knowledge about Eternal development
computer

i.e. well as if it regulates the actions of the computer

look
how do these microprocessor circuits work
interaction with the structure of the Eternal life of man
there everything happens according to completely linear laws

by the way any technological object
interacts with a person
always according to the same laws
although the objects are different

and if we assume that objects are made like this
so that they well as if they took into account
here is this interaction scheme
then no object can destroy a person
under no circumstances

i.e. these are special technologies there
which in the future they will be implemented in any case
technologies when technology does not destroy man

in general, no event should be there somehow
For example there negatively with some damage
develop for a person

i.e. it turns out that God originally laid it there
your personal and True path like this
so that a person can learn this

it turns out that this is the Consciousness of God
already transformed by human tasks

i.e. after all, the Consciousness of God can also be transformed
from a human point of view of course

because God has all the knowledge anyway
and all elements of Consciousness are under His control
including there, let's say, our own level of Consciousness
which is controlled by the Soul of God

and here it turns out that after all it is the Consciousness of God
is being transformed
and this is the level of transformation in human consciousness
and the reverse level
he just shows it
that the body is any
any system of the body in general physical
in the information of God's Consciousness has an Infinite value

i.e. God may not perceive a person
such as there is just a finite physical body and that's all

He can see the presence of one cell there.
there's a piece of skin surface somewhere there
or just literally one molecule of a person
from the point of view of the Infinite duration of events

well, that is, it's like some kind of information
looks similar
well, like some kind of informational rubber band or something
such as this one, which has the property of viscosity
system
such a plastic, rubberized environment
this is how it is perceived at the management level

that any human cell, even any atom
so it has the properties of infinite stretchability here
i.e. you can take it and sort of stretch it out in information
Well of course I mean to stretch it out over all the events
it's like a speculative element

i.e. why such a plastic environment
i.e. you can train each cell

and if you start doing this
then it's actually very powerful by the way
human rejuvenation mechanism

any cell is allocated
and further
or there is cell information of course
it means it stands out informatively

then you [...] well as if you were looking at her

from the point of view of its Infinite interaction
with any elements of Reality
and start managing
sometimes stretching, sometimes compressing
here stretch squeeze
i.e. until she knows all the systems of external Reality
but she herself will know

it's about the same here
that God when gave free will to man
and man began to learn
it's the same here
you gave free rein to information, for example, a cell
let her know
and it begins to sort of group itself together to pull Reality together
and increase tighten and increase yes

and therefore man perceives external Reality
as if these were some kind of fluctuations
then increase
that suggests that there may be a reduction yes

so when you trained the cell, for example, let's say Yes
They trained her for a few seconds
took back introduced into the structure of the body
a powerful level has gone
At first, as a rule, recovery occurs
Well then rejuvenation in a few seconds

and that's when you start to embrace
rejuvenation system
adaptation of other cells to the younger one

why is she young
because when a child is born
he has interaction with the outside world
they also have a plastic character
because he will have to learn a lot

i.e. the element of knowledge

and an element of knowledge transfer

and when you through the Consciousness of God
go through this aspect
then it is clear that God can have, ^{let's say so}
that age ^{that} He wants as a person
but it should still be synchronized
with a person

i.e. He should be able to, ^{for example there} to grow old ^{yes}
some time, etc.

i.e. it turns out that He is a fraction, ^{let's assume,} of Consciousness
translates to structure ^{well for example of} an organism
but at the same time He can and then He manages to rejuvenate
i.e. He wanted to grow old there, he wanted to become younger
but He must have a natural Path of development

i.e. what is the difference
differences between
in the physical sense ^{yes}
there is practically none
a person can do this too

and when we, ^{for example,} make this powerful transition
from the point of view of exactly where it happened
wow ^{where} is this transfer of knowledge
we begin to analyze "where"
then the transition again is precisely in all people of civilization
and those that will be in the future
that they should live forever

i.e. there is no such thing there
like the concept of some kind of "storage" again
some point ^{yes}
as such a phenomenon on a universal scale
there is no such thing
there is only a level when all people can
and they ^{seem to transmit} mutual knowledge

Of course you can learn one
In principle, you can learn millions of things there
and live ^{well at least there for a long time} ^{yes there}
^{For example there} for thousands of years
but that doesn't solve the issue

because if everyone can't do it
if there is no collective action function
then there is some kind of threat
really are no external comets there, etc.
purely logically exists

so that the whole system of Reality
was as if imbued with Eternity
those. invulnerable environment
Eternal planet there Eternal trees there etc.
naturally Eternal people

then it does not happen with any development
some negative impact of the external environment

moreover, gradually the entire external environment
starts with this silver glow
how to fill up

i.e. we further impart the properties of Eternity
other objects of Reality
as if from the Earth yes at some distance
are simply geometrically located
in space

and it turns out that we have an autonomous system then
which is not accessible to external influence
moreover, it is completely organized
can pass on knowledge quite calmly
there in other systems

and when we already achieve such control
some kind of third control arises
where to develop

Well then a simple meaning arises
develop evenly in all directions

so God's Consciousness is like this
what is this glow yes let's say uniform
to all systems of the World
this is the level of transformation of all Reality

So the task is more on the person, yes
transfer of knowledge about Eternal development
to all systems of Reality

well if somewhere there
there for example, purely logically I mean
there is a light there that someone somewhere can do something
Well, God grant that I can do this more skillfully, yes

but nevertheless, while we are talking about it
that every person and humanity should have this
i.e. when it is determined
i.e. we know the goals of God's Consciousness
for example in this aspect

By the way, these goals can be understood even logically
there Eternal development implies this process

and when do we start further?
do management
on your personal there Infinite development
then the mechanism is already completely clear to us

i.e. the mechanism of development of God's Consciousness
transformation through human consciousness
and vice versa
transformation of human consciousness through God's Consciousness
this is a specific mechanism
where you can achieve very specific systems

i.e. Eternal development of the human physical body
creation for this of all social, moral and aesthetic
and any other conditions yes

I specifically highlighted the word "aesthetic"
because it generally implies any
conditions , yes , about which, well as if a person wants to know there yes
or which he thinks about

that's why I highlighted the word
as an "aesthetic system"
i.e. the aesthetics of development

it turns out that when you start
do management here
then it is clear that at least the social needs of humanity
must be resolved

then the process begins

Well, there is **actually no control** there
namely, the Infinite Life, etc.

and further for example there are the properties of the environment
external development external world
i.e. such clear regulation yes
i.e. at each level it is clear what to do

on the other hand, the next level arises
significantly do Infinite time
well, i.e. it is clear that Infinite time
Evolve forever
the question arises, isn't it tiresome all the time?
like doing the same thing over and over again
there to develop forever and all yes

here, well, this is so purely human
Well, this may be somewhat theoretical

but such a question may arise
always the same there Eternal development
and that's all

so God has a very simple answer here
that means **control** over, well , actually, the whole of Reality, yes
it is still the knowledge of one's own Personality
after all, God also knows the Person, yes
in one or another of its manifestations
which means the manifestations are quite diverse
and there is no concept of "fatigue" there
there is only the happiness of Eternal development

here for example is just development
This is of course also good
something creative
but it is precisely the Eternal development that implies the presence
still happiness of Eternal development

if a person is sure that he is developing forever
means the component of happiness
is necessarily present in his Perception
well at least there sooner or later
he will be happy anyway
Eternal amount of time

and if so, then he has these elements right now, yes
here

this is where it happens

that's why it turns out
that the element is precisely Eternal development
as an ideology in itself
this is already a sign of a person's happiness

i.e. he is happy when he
at least ideologically engaged in this
but not to mention when he can
cure yourself there
cure someone
make events manageable
i.e. begins to be convinced

and therefore this is his life there
and here the concept of "fatigue" does not exist
there is no concept that something should not be done
i.e. such concepts are excluded in themselves

i.e. they do n't fall into the sphere of Thinking, do they?
do not even often fall into the sphere of management

i.e. a person as soon as he begins
these technologies to comprehend
he simply doesn't have such a question, over time
or maybe it's never worth it

and it turns out that
well, the people there are most enlightened there are enlightened
they apparently may not have any at all initially
this question

I meant that in some billions of years
perhaps such a question could arise
but the answer lies precisely in the very understanding of personality

and God is Eternal
He doesn't have such a question
He is still Eternal
and He gives Eternal development

so here it turns out
that one of the properties of God's Consciousness
convey the answers to the person

to the questions that exist
from a speculative point of view , so to speak
answers and questions

and here we can take, so to speak
and come up with any hypothetical questions
so here are the answers to any possible questions
there are always answers within the structure of Consciousness

there is a basic transformation system in this
find in the structure of Consciousness
answers to any questions

and it is better to find it in the applied aspect
how to apply for Eternal development
these answers

and when you start already
this is the direction that needs to be developed
as a transformation system
maybe there are other people's consciousnesses there
which should also develop in any case Eternally

then you see that this is exactly your direction
it means something that you already have
as if a personal level of management
i.e. personal level of task implementation

i.e. you see that this is already
it's entirely up to you
you start to see
how much depends on you in the long term yes
in the social system there
or let's assume in the system of some future development

and then you start
this is the level of tasks that God gives you
perceive from that level
when God first started giving them

i.e. He set the task there
from the point of view of a linear and time-dependent process
you start to see
how does he give you tasks as if Well, if I say so
there it describes conditionally yes

and starts transmitting

i.e. you see

speed

the beginning of the task coming from God

and transmissions

i.e. you begin to see the functionality of God Consciousness

but it's good enough to know in advance

i.e. the task has not been transferred yet

and you already know there

see ahead as if

and then it's very

Well, you have a lot of time

in order to have time to solve the problem yes

because God always gives tasks in a clear way

and they well in general such

that they should be performed naturally

because it's still your choice

to live in such an Infinite Reality

then it turns out that you

by the way, you can set tasks there in the same way

or give education to other people

i.e. viewed perceived

there is one of the managers there

there might be something specific to do there

took put

handed over

or asked to make management , etc.

then it turns out that this is the spectrum of transfer of tasks

well, provided that you see

what task is reproduced yes

this is the level when it is already happening

it's not just a transformation there

but some kind of integration

Consciousness of God with human consciousness

those. at the moment of setting the task

By God

in front of you, your consciousness is already participating in this process

i.e. at this point you practically get it
set yourself a task in the grand scheme of things

because God gave free will
and so it turns out that as soon as you sort of
Well, you look at this moment in advance
then this line of such linear control
this looks like this at all
as a perfectly clear optical quantity
which is very stable and has properties
well, some kind of uniformity in management

then at this moment you get
you solve your own problem
which, in principle, you set for yourself
there at that moment
when God gave you a task

i.e. you are very close very precisely
to how God does it
simultaneously with the Action of Consciousness
initial value action and decision yes

and then as soon as you come ,
by this moment
what is it technologically, well, how is it expressed
predictive capabilities are developing, etc.

then you see that everything has already been done for you
i.e. you see this Reality

all the best for you has been accomplished
i.e. you are starting to be confident in this
i.e. initially confident , let's say yes from birth

you see why you are like this from this information
Did you take action earlier ?
why were you sure of this from birth
by the way, you can even see this aspect
in this control system

and then of course any action
do you do it often or sometimes quickly
sometimes there are some technological processes involved
but at least they are always stable
are you confident in the result

so now make such control
connect your consciousness
at the level of the pre -task, as it were Yes
here is the optical interval here is the problem
God sets a task here
a little further away, well, 5 centimeters in information
and you just pull out the controls
as if you are starting to participate already here
i.e. to see the task that God sends you in advance

and through this linear system
all events on this level
they are of course resolved positively

because you are in control
the task itself
participate in choosing a solution
and if you set yourself a solution to some problem
you will naturally solve it
you set it for yourself

so do this control as if at this point
here at the point of the task
and try to solve as many problems as possible
here in this management
I will work with you together

By the way, it is advisable to do this control
in more such well how can I say something like a cheerful state
here is the internal one
because these are very remote systems

just imagine that you are working with the Infinite Environment
Well, by the way, there really is such a level going on there
high event level
as if the environment is balanced
that's why you need to work
Well as if in a good mood or something
i.e. they took and synthesized
just take and do the management
in a good mood

because management is a system
This is a very strong level of regulation.
your next position as it were

i.e. when the task is from God
it's still quite far in distance
Here

and therefore try to generate something from yourself
this is such a good mood
i.e. well, in a normal mood
what should management do

because I don't use it that often
that some special conditions are needed yes
do the management as you wish

but in this case I give a recommendation
It is better to do this in a good mood
there with some funny context

because there is contact
personalities of God and man
it doesn't mean that God is simply speaking there
and a person in such a concentrated version
I should react to all this, yes

He simply must in the ordinary human sense
take on tasks
and calmly influence on a human level

i.e. nothing can negatively affect a person
but since nothing can negatively affect you
then it turns out that this is well as if it were a reason for fun yes
Well, that's a logical transition.

so it turns out it is necessary
These are the tasks that need to be done after all
Well as if technologically

with a good level of fun
i.e. well as if it were an internal plan or something

when contact
at the level of Consciousness of God and man
i.e. a person contacts God
as man to man
this is what is important

and when you start to see this system

then naturally a person always
that's basically it
can negotiate with another person
in some respects ^{yes}
at least along the line of Eternal development for sure

that's why it turns out
which can be seen quite well here
Well as if from the point of view of technology ^{there} ^{yes} Eternal development

just imagine
a lot of controls exist in a person
and when it develops Forever
it works out with each of the people ^{yes}
can occur Eternal number of times ^{yes}
Well, this is just a purely abstract model

then naturally the system of solutions
will actually be completely the same
which exhausts
all possible interpersonal relationships

i.e. why is God so stable
in the system of personal plan ^{and} management
He has Infinite Time
and it is balanced
in relation to any person here

and that's why it exists
the necessity of the general resurrection
because personality and God
decided all life issues between themselves
In fact
and therefore it turns out that they will definitely be alive
Right
those who had life
because the issue has already been resolved
in relationships on a personal level

and it turns out that ^{well, it} 's clear
that the main thing for people now is not to die , etc.
how ^{exactly} is the action on the task of Eternal development

but in a personal context it is understandable
that as soon as personal relationships arise
man is God

then a person immediately becomes Eternal

and when we see, for example, this system, yes
transformations of human consciousness
when a person directly means as a matter of fact
so it transforms in the end
your Consciousness
that perceives God simply as a Person
and the one that gives exactly the knowledge about Eternal development
and at the same time passes this knowledge on to others

then it is natural that his management
becomes completely natural and sustainable
and so pronounced
from the point of view of a kind of Infinite development
i.e. from Infinity to it
come
the answers to the situation determined there turn out to be even

and he begins to understand
that the external environment begins to him the external World as if so to say yes
external event system
starts helping

and here, in principle, he begins to see
that God is actually personal to him
laid down in general in the multidimensional Infinite Reality
very specific systems
solutions to his problems

i.e. he begins to see it
what exactly is where for him personally

and as soon as he starts
Well, this system how to recognize in more detail
then in principle any control system
naturally realized harmoniously
naturally he achieves
some creative elements
and creative management achieves

i.e. its management does not interfere with anyone there
does not harm anyone, etc., etc.

but in general the direction is towards Eternal development

never harms anyone at all
because it's still universal control for everyone

there is the prevention of a possible global catastrophe
and all systems that are connected specifically with Macrosalvation
they are in any combination of events
they cannot harm anyone
it's initially like well postulating logically clear
and this is the implementation of technology
when there is no negative effect on anyone there

therefore, in Eternal development it is important to recognize here
this is precisely the personal sustainable level
when you are personally confident

i.e. you see yourself at that level
when you perceive Spiritually
some good event of my own yes
when you perceive with your Soul
some useful event it is stable
and you generally implement it calmly
some intermediate matters

i.e. this is the level of a calm stable state

and it can be achieved
through just the same
transformation
human consciousness through God's Consciousness

This is where I end today's seminar.

Thank you very much for your attention
