

GRIGORY GRABOVOY
The Doctrine of the Resurrection
Collective Resurrection
19.09.2005

Hello again
The topic of today's seminar
to emphasize the theme
my Teaching about the Resurrection
Collective resurrection

In this topic I am considering the following principle
and actually the methodology methods techniques

i.e. here in general it is possible to say quite generally
about specific technologies leading to this
what collectively
collective resurrection is meant
one person

i.e. people work in a team
and for example one is resurrected, the second one is resurrected, the next one is
resurrected
i.e. consistently yes or there at the same time
but it is individual

i.e. they work collectively for a specific name

and collective resurrection implies
that they are all resurrected together

so the aspect of resurrection also comes into play here
what does it mean to do how the social system is organized
that collective resurrection in those cases if there is
Well some generalized methods of action
external destructive forces there
and it turns out that there was a collective event, for example , after death
we are collectively canceling it

i.e. it means that in this case
the concept of this word "collective resurrection"
has many aspects in general yes

so let's consider the first aspect
collective resurrection
namely one specific person in a collective action

Firstly, there is a very simple status in this system
God is Eternal He gave Eternal life to all

For example , the concept of "death" does not exist for him initially

that is why the concept of "collective resurrection"
in this level of Infinite Life
this is a selection
a specific life in a specific event

i.e., for example, what is happening in Beslan, an event took place there
basically the same as in any other system
where there is some collective destructive effect
Well For example Hirashimi Nagasaki is there nuclear weapons
collective, such as an action on a large number of people

needs to be considered
the life of each individual person
which is in this action
and exclude technologically its defeat
against the background of, as it were, generalized information

We are not considering this information yet
i.e. we logically know
that there was, for example, some problematic action
that many people for example there was destroyed yes For example

so we are simply considering even in the history of civilization
Let's summarize the situation
not specifically in relation to any event

In this event we highlight one person
and we actually bring it into the Norm phase

for this it is enough to find
any one person any
which is the first one that comes across in the control system

as a rule, everyone finds their own , yes
who well what does he do then

and so this is the conclusion of this person to the Norm
against the background of known technology yes
this is a special task

so the first level is when you are this person

are you considering
everyone can consider their own person

who works from the outside
the first person you see in the information
and who works with his person
it doesn't matter when he sees people in the information
definitely works with them
individual work

that's why a digital series is introduced here

it means digital series
rationing of each individual person
in a collective, as if in a mass damaging factor
next
7 3 9 8 1 9 4 1 9

so in this case it is necessary to consider
vibrational order of number so-called
when the number goes to one

i.e. the numbers work like this
that they allocate one level of management
and actually put protection on this person

because if you prove it
that one person did not die in this situation
it turns out that we then led to a collective resurrection

because we are just changing Reality ^{yes}
the most simple direct path

we took one person and saved him
i.e. isolated from this Reality
everyone is alive, everything

because it's like a rigid system of connections
it is enough to remove one event from the control level
the system is instantly restored

so that's why it's basically an event
of sufficiently great importance

that's why, by the way, the resurrection of each individual person
this is a colossally important moment
when there is a mass defeat

and in connection with this it turns out sometimes it's enough
one resurrected objectified to present
instantly there is a mass practically means Well mass
where was the defeat
mass
this is a situation of mass destruction
the information seems to scroll backwards
and the fixation of the Norm is included

then it turns out that this level arises
in fact, like a mass resurrection

and here you need to be very clear in this parameter yes very clear
to derive strategy is the task of each individual person
i.e. what I say should be clear as an algorithm

for example we met well even at a distance if even yes
first time
you already clearly record everything else
immediately start doing management
where is everyone else
first yes

the second option is when
after all, the task is not to meet at a distance
task when a person comes alive
an ordinary person comes home alive
just ordinary
he has no differences from a living person

Well there the state of health is a different matter
as a rule people are healthy

so that's why the task is the location of other people
Means this is a special task
by determining their level of events in the system of the following

there is a God
there is space-time created by God
there are some elements
Well ordinary so to speak so to speak, common sense
what is the process of Norms

i.e. what is it
he needs somewhere to eat man
have some clothes
i.e. the most basic actions

he walks past the kiosk
where will he buy matches for himself ?

For example there if he smokes

Well Smoking is of course harmful, we are against it

I think we also need to conduct propaganda

but man is free, well he needs something yes

so here is the situation, every detail is important
how many matches how many matchboxes
now on sale in the store
where will it take place
what is in this store, in this stall, etc.

i.e. to follow the entire course of events
literally instant coverage
one control pulse

Now I'll tell you about it
what does this impulse look like

i.e. the task is completely clear to everyone
we need to provide them with
fine precise structure of events
All

and this needs to be done in one impulse
in one impulse you need to immediately understand and do yes

then the impulse must contain
as an impulse containing the future of these people
and even before the impulse starts it turns out yes

and the action which is practically
Well as if it were shaping the event

to see the future of people
we have to do something
to reach the level where they were healthy and alive in the past
There is information about them there
i.e. they are alive and well there, no problems

we're just stretching out control
in the detail structure
what would happen if they just calmly well developed lived

i.e. we instantly form
as if we enter the control impulse it should be like this
we introduce the structure of continuity of life

at this point
introduced their next development
because ^{well} who knows, maybe the person just left
and is he even alive?

this is also by the way, except for specific cases
it's not always known there ^{yes} For example there
^{Well} In Kherasim there were such processes
it was not at all clear who was there, etc.

so here it turns out that we are talking about the situation in general
what is possible

i.e. we are on the factuality of possibility
i.e. we should at least have something, ^{yes} fact in Reality

we stretch that with everyone too
then it becomes normal
then it becomes just normal
because there is the next aspect of resurrection

so if you think through the situation
how is the physical body organized in general
what is the physical body anyway
why is the physical body walking and moving there

there God alone created
the structure of the Physical Body
but He somehow organizes it
i.e. He constantly organizes the Body

The body is the manifested part of matter

i.e. nothing out of the ^{ordinary}
from the point of view of the body and cellular composition
he doesn't have

the main thing is the structure of the Soul and human life

i.e. it turns out that the Soul of a person
^{as if} pushed into the structure of non-manifestation ^{yes}
what is a factor anyway
namely, "biological so-called death"

what exists in the collective Consciousness
what is biodegradation

it turns out that they took it in the unmanifested part
these people
revealed
Their souls are there
and they can come out to manifest in a physical body

if we show in one case
that one lives peacefully
we showed it all
the path is already known yes

therefore natural events of life
well in that case if we consider
the factor of non-existence of this object
i.e. well such an object as a disaster

i.e. we believe that there was no disaster
Well no yes in the information we display there is none of it

we come to the exclusion of the disaster factor

of course, in order to exclude technologically
you need to know every element, every movement
bullets impulse specks of dust there all the harm that is done to a person
and rewind it to the level of the initial substance

the bullet flies out
look where this machine gun was made
or where it flies out from
how weapons were assembled

disband the weapon on the build structure
see how the delivery of materials is going
for the creation of weapons

look at economic ties political
look at the nature of the origin of this type of weapon
enter the design documentation
there are sketch working drawings in all these projects
Erase everything

i.e. for each type of weapon
we'll have to make a neutralization structure
there is no such type of weapon
untie the story from the very beginning yes

so next we go

Well stabilized the situation
i.e. in principle this is a long-term action sometimes
but sometimes it is enough to untie
there's one Kalashnikov there
who inflicted it there, for example there is maximum damage there
or some object
everything collapses instantly

and by the way, in the elimination of natural disasters
Well some kind of natural disaster
or there is some kind of mass attack
use of weapons against a large number of people

so far no information in numbers has been revealed
you can apply this system powerfully
because there are cases of very strong
Well as if returning information back

i.e. the striking property is not revealed
if it works correctly yes

although the task is to eliminate completely

then those are the numbers that came to light
they need to be minimized
and then if they are fixed
will have to work this way
how to exclude any element of Reality

why is detailing important of course
very important
so that there is detail in the collective Consciousness
what happened

Means and based on this we carried out the management
i.e. it turns out that we do it by force of will
we exclude the factor of disaster as such

then we look further
well, here's a person who lived naturally
where is it then
what are his habits
what was he supposed to do

first element kinship
fix all elements
which are related to relatives
where did they go where might they be now

enter into the psychology of the state of relatives

for example, a person comes to him, well resurrected yes

for a relative

he may not exclude the factor

if he doesn't know this technology or there is a friend

what does his friend do then

what does a person who knows him do

provided that he asks him not to say yes

resurrected

for example, the specificity of behavior

reinforce these behavioral traits in these people

how do they behave then

for example, you are walking through the forest

suddenly your neighbor doesn't talk to you for no reason

Weird

With such a good attitude she doesn't talk

Why

i.e. you kind of understand the internal

that she knows you well

you can't have any problems whatsoever

Why

Means strengthen the structure

that the resurrected one came asks not to speak

There are many such cases by the way

this already happened in Bulgaria, for example

Well i.e. people around change

they don't understand why

they think that some kind of conflict is brewing

or it's not clear at all what's going on

then you need to strengthen

there, for example, he tries to get by

ok then she has a resurrected one that's good

Let her tell it herself

i.e. we already live in practice in everyday life

we need well it's not quite clear that everything is there let's say it right away

but that's exactly how it starts to manifest

collective resurrection factor

the first elements in the collective resurrection

people's arrival at the right place as if to familiar people

because there is such an element here
actually the next in control

who is actively involved in resurrection
a person will come to those, of course, right away, yes

but there are people who are not actively involved
but the collective resurrection must still take place

so the resurrected man must come
Where
first to the place where there is a greater chance that he will be accepted
friends acquaintances distant relatives

i.e. well , there are, for example, ten people there with him, yes
or some number of friends
he thinks analytically, that's where he should go
and comes first to that place
where is it ? as if they meet him as much as possible under his conditions
i.e. they don't ask again why he has such clothes
there like the fifties and so on why

i.e. well, they accept it
when the resurrection was well known about the fact of death
now everyone has read the bible about the resurrection
many have read books for example there are mine about resurrection
there are other books there

they know that this is a natural process

then this action of the Soul begins and that's it

for example, I here in practice
when I talk about resurrection
I have not encountered a person who disagrees with anything

as a rule, people always agreed in a personal conversation
i.e. I also know many such factors
that there were some radical ones or something contradictions
a person still can't have it anyway

because it is the very basis of life
and say that there is a rejection of the resurrection
where exactly this does not happen in the Soul
i.e. you can't say that

it means that the person thinks more

and what will they think of him?
what will they say about him
and how some people think what will happen next

These are such peculiar people by the way
analysts are often found who say
so this is what happens next
they start thinking about civilization right away

really at the moment of resurrection
there is precisely the task factor
and as if questions about civilization

and therefore civilizations are all the better
it's just that the more people the better
how god god created people born
then God's task is an infinite number of people
Any other questions that might arise?

so we start thinking further
how can we find it technologically now
such a person

and here we move on to the factor
again individual resurrection
when a person works individually
with the resurrection of the person he resurrects

there is an element here, here is the next one to consider
resurrection of jesus christ

it is precisely resurrection and resurrection at the same time

i.e. Jesus until the moment of biological death
knew exactly how to restore himself
exactly
it's God, i.e. it's clear that He knows, yes

means bringing the management system to completion
until you know exactly how it's done , for example
Well in fact the way of Christ
because the celebration and the fact that here are the suras
there are specific suras in the Quran there
There are specific data in the Bhagavad Gita, well etc. there
basically, they have it in the Torah
if you read the text correctly, as if from the side of the lunar signs
there you can also find a technological structure

i.e. what needs to be done from a technology point of view
for complete control over the physical body

at the same time, a person must know this knowledge
who is resurrected ^{yes}
for God he is always alive
He has no biological death

there may be a period for a person
when he can send information to the resurrected

i.e. the system of the path ^{is a system of} assembling the body
body independent of circumstances
they took the molecules and they came together
and that's all

This action is rare but in people
in critical situations this happens to many

here from the point of view of death
this is not a natural state
because such things happen to people

Moreover, if we consider
how do human internal organs work ^{yes}
for example, the liver, the heart, the brain from the point of view of Thinking

then you can see that the reproduction of the control elements
occurs from the point of view of organ assembly
as if a filtering moment
the system came together and that's it

and the structure of human thinking is determined
^{Well} not necessarily there Thinking happens in the head
or somewhere ^{yes} in the space of Thinking

Thinking is defined by the fact that when assembling an organ
the light remains
this is the primary space of human thinking

so when i talk about concentration
I actually withdraw quite often
into the structure ^{of a kind of} logical assembly of an already investigative system

concentration is a system

where did the thought go towards the person

and the boundaries of the transition between Thinking
and for example a resurrected person
very thin

for example, a person thinks logically, he can think
Yes, man is risen
i.e. he can imagine seeing it
and what is the difference between logic and these facts yes

i.e. for cases of resurrection
the only difference
in the structure in nature as if Thinking is obtained

it means that a person's thought is a fine line
it should be formulated very clearly

this is how God's thought is
this is Action
the Eternal thought of God
God is Eternal
and gives the Eternal structure the Infinite structure

means the translation of thought into the Infinite system
through the structure of one's own body

I may even be making it more complicated on purpose
because there is an opportunity to work exactly like this

i.e. we have reached a rather fine line
where does the transition occur in the system
that the thought of a person that comes to him
as if building a body yes
information passed through thought
the body is created

and further, when a person thinks, he takes into account the body

i.e. he went to the store somewhere
he takes into account that he goes with his body
body counting is in progress
how logical
and through the structure of this part
from what thought is the body created

i.e. in a living person

creation of the body i.e. manifestation is underway
through the structure of Thinking
where the organization of tissue through thought takes place
therefore the thought is rigidly structured

at the resurrected
there is a balance body for example Yes

because it turns out that he is forced to
for means resurrection structures
activate the external environment even more

Well i.e. he is as if in Thinking in thought
holds the following system as it were

a person has a support for a living person who has not died
the body seems to have no problems
he can think well as if in one coordinate system yes
in one space in one plane even

although Thinking is certainly not a plane
but nevertheless it is still
as if a sequential series of events there is no load

in a resurrected person
it turns out that he is forced
how to compensate for this condition
for example, by the fact that it makes a balancing body
as if by means of the reproduction of Thinking
makes the structure of such a transitional body
and which appears as if it flows over

but it turns out that God doesn't have the concept of "death"
i.e. for God these processes always occur
in the structure of life

it turns out where where in this system
structure of life unifying system

i.e. if you think as a person who has already been resurrected
already resurrected
as a rule this process is very short in general
the process of resurrection itself
what is called this transition there when a person is already alive

nevertheless, we must study this transition

it takes milliseconds there
but we must know it

Means and it turns out that there could be milliseconds
but there are large spaces used there
in this management

and so it turns out that when we start
consider transition
it is necessary to have a kind of uniformity of thinking

for this you need to look
how does god think
and how a person thinks

after all, God also creates a Body for Himself
Moreover, He even creates a structure
internal and external Reality at the same time

i.e. it would seem that the burden on God should be higher, yes
that's how one can put it
He keeps everything in his memory, yes.

resurrected holds
Well as if only a balance body or access structure
Well maybe he still holds the state of the cellular level there
there are two or three additional elements of Thinking

and in general, life is easiest for a person who has not died
like he has everything, everything is stabilized
and he can think as if Well quite calmly

but logically we understand
which is easier for God
after all, He is God, i.e. It should be easier for Him, yes

so it turns out that based on this
it is precisely in the collective, collegial resurrection
It is very important to highlight the status
that there is a level
where Thinking for example there
God
human

resurrected
these systems of thinking coincide
match

and here it is very important to see
where do they coincide

they coincide in the way in action
in the matter of the general resurrection

God knows
man does
resurrected in principle shows by his personal example
what is this, yes

that is why the movement is precisely resurrected
Well like information-social or something movement yes
maybe like this or something political like that
Well socializing can be yes
or something socially significant there

when this element appears
Well or what? actions on society
there is no such fact for example Yes
they all understand when they are resurrected
this status is still Reality

the verbal phase changes there
Well as if in the structure of the action
even the verbal level is formed there
at the moment of action

then the next action
it turns out that there may be a factor
look different well in different ways
individual there public

and here the level of clear understanding begins
what is in society among people
there may be many resurrected and they exist
but they are like ordinary people

here we found a place yes where do they come
i.e. after all, the arrival of people occurs in society
i.e. for example a large number of people

there is even one carpenter and a second one
if one looks at the other
then who of them knows who is who yes For example

for example resurrected or is it a person

or there is a living person who did not die

and it's good that the technologists there are according to my Teaching
they can see

and now the resurrected ones are so adapted
because here is the universal light of the universal resurrection
so strong
that the line is practically unbroken

i.e. the resurrected now are no different from the living
with normal viewing it is absolutely easy
unlike literally a few months ago
the line was still visible, but it's not anymore

and so it turns out
that a situation arises in the management structure
that even when one person meets another
and even that cannot be said for sure
who met
he's just not dying but living there
either he is resurrected there or he is just there
apparently this is also considered
as I say
the most important thing is not to let the person die

and here the next status begins
don't let die
i.e. you make life like this
so that it would be prolonged as if forever

and pay attention to the fact that when people meet
exactly that this is forever
this is the main factor
what does it give to a person
in the conditions of absolutely rigid systems
Well some kind of related ones
with biological death of wars of various yes etc.
maintain a calm status

It is always necessary to meet with a person
here two personalities met
so they received information at that moment
this is forever, no one will take this away from them

and this is the control factor
forever

this is the uniformity of thinking

translated into a meeting with the already resurrected

i.e. a task where there are actions simultaneously of God and
Simultaneous Level of Thinking
transition from God
through human action
for example to the resurrected

the resurrected one comes to a person alive and unharmed

so here is precisely a direct action
when a person sees another person
All
we need to clearly capture this moment
that there are no other elements besides that
how to see forever
i.e. we saw it and that's it
everything to infinity

here is the most fundamentally simple element
but a very powerful element for the meeting
from the point of view of collegial collective resurrection

after all, our topic is actually quite specific
collective resurrection

this means perhaps those who ^{well there} are dead people ^{there}
when there is some group of people there

if we want to translate this topic
when there is, ^{for example,} one dead person
I enter this phrase on purpose
there is no "natural death" there
such a concept , ^{yes}
from the point of view of my Law on the Prohibition of Death

then it turns out
although this is the Law in principle of every person

then here to apply
Collegial resurrection technology
it is necessary that from the collective resurrection ^{means}
there was a connection
those. single resurrected
need to translate optics

to the collegial phase of life of these people

not even the facts of course
when the event had already happened there

and already the lives of these people

i.e. translation of even a single case of resurrection
there is no other one at all

For example Well we wanted
technologies to use for resurrection
there is one specific person there
who was not connected to the team there at all, yes
and he had an individual problem

then we have to see
look at the lives of these people
and connect with a straight line
i.e. again the exclusion of the factor of a negative event here

and thus we begin to see
that in order for the resurrection to be clear to everyone
i.e. absolutely everyone
there to enemies there to friends in general absolutely to everyone

because then it's easier to contact
i.e. it is easier to contact

we need to develop our own inner self or something position
by analogy with that
that there is a question of faith there yes
there is a question of action
there is a question about meeting with the resurrected one
there They meet at the station and say they stay there for hours
such facts just recently
shake hands and suppose there they diverge in different directions yes

nowhere
such reasons to bring the resurrected one, etc.

here is the situation
completely different points of view
someone there achieves it easier for someone else
it doesn't matter what happens in this world
everyone must meet it anyway
resurrected very specific

and that means nothing happened
whatever anyone wants
or, on the contrary, there are mass resurrections going on there

but that's what we're talking about
what if at least one did not meet the resurrected one

then the system failed

can all the people of the planet meet the resurrected one
but if one did not achieve
then what are we talking about we haven't solved the problem

of course we did good to people ^{yes}
but in general we are for civilization generally speaking
the issue was not resolved at the root

because we can solve the problem
then any other person will be resurrected
by his personal will there thanks to their own technology, ^{yes}

anyone else can resurrect him
i.e. ^{well} some kind of commonwealth
when there is simply no death at all

we excluded her
because firstly we have proven
anyone resurrected everything
what kind of weapon could there be?

then we are guaranteed
that in the Infinite development of civilization
we have no problems
no matter what satellites are hanging out there
no matter what comets fly by
we have no problems
we can pull ourselves together

and this is exactly when we are talking about this
but there is no need to exceed it
We are basically doing this on a large scale
in general, it's essentially the same process there
that we should give technology
which brings a person to the norm

just when there are no damaging factors

following

it's simpler, he's a person who calmly resurrected and came, for example Yes
was resurrected

but imagine there an infinite amount of time development
what awaits a person there

we must first prove very clearly
that we will restore everything, this is a systemic task

and here is the transition of this level
that we can do it
and not because we need this Infinite time at all
there everyone has their own tasks and
the technology just doesn't work any other way
we need to understand what we are doing
what world are we in

here God sees the way before Him
He does everything Himself.

example , you could ask God
what's there For example can you shift something onto someone else

you can't translate, you can only teach
when another person does it on their own
and does this by personal choice
All

i.e. i.e. he does the same as God does yes
the same job
there he takes responsibility

you can't force anyone there anyway
we can say it there give
for a number of reasons if a person does something
because there is some pressure there
it's temporary anyway

man can save the world
hold almost the entire world on one's own
if he is endowed with freedom

Nobody forced God

and then we come to a position of understanding

but in general, no one forced God, right?
what was His idea of creating the World in general of such a Reality

first element
People should be happy to live forever
i.e. it turns out that God did formulate it first
tasks for yourself

so it turns out that he wanted a happy life
but wanted to see a happy life
Well I'd like to make something similar For yourself
people

but in this case He should still see
their happy lives
how does he see her well there is yours for example Yes

i.e. it turns out to be the happiness of life
at a direct level of contact with God
direct message from God
this is the next level already in the collegial resurrection

this means that such a person is brought to the center of events
to the center of all events that exist
or all people mean
and it looks good
and in general where does God give happiness to this person
Where
i.e. where is this channel
i.e. happiness comes from God, there is universal happiness
His personal

let's find Him

why does a person forget about Him
that he is leaving this path

one level is the level as I said of sacrifice
The children of Beslan simply took and saw
Well took responsibility for preventing the disaster
but they knew that they would be resurrected simply
these are very enlightened children

after all, many people said so in the forecast
that the school is on fire
Well, well There are currently a lot of publications on this topic

i.e. it turns out that the predictive base was
here's ^{an example there} there was no prohibition of death ^{yes}
Now I am introducing a ban on death
then it's easier to already enter ^{so let's say now}

It would be easier to know of course
but everything is determined by the amount of knowledge
considering that we give this knowledge
^{as if} Well into the structure of Infinite time after all

then it turns out we are teaching them now
at a time when they could have acted differently
and we start to act using another method

i.e. with the knowledge of direct control of direct action

give them strength so that they at that time
they defused the events themselves
ourselves

i.e. we enter the structure when they are alive
i.e. ^{well} we educate
and for God they are always alive
they are now resurrected, they are also here, ^{for example} , alive

that's why we take control and give it to them there
from birth literally technology
technologies so that they can cope with this event themselves

and then it turns out that they come
and ^{in general} the situation is even simpler
we exclude it from the event
we are transferring information
they constantly move away from this event ^{as if}

i.e. they disband it

so we gave them strength, they do it themselves , ^{yes} more additionally

Now pay attention to what happens in the event sequence
in physical Reality the structures of events can change

those. defeat system
which ^{seemed to} arise there in physical Reality
may begin to minimize

i.e. there is a system of some evidence there, etc.
but nevertheless our task here is to show in general
that the events are still minimal

i.e. there is an objective principle of the signs of an event yes
on a physical level
our task is to show
what well for example, an existing model nearby
it does not contain any informational events there

although the objectification of the event is needed for that
to exclude well as if such a mutual factor
collegial or something actions for resurrection

it means we influence events
only with this
only from that side
only from that side
and we even bring factuality into management

evidence base
that it promotes both collegiality and each individual
resurrection
moreover, there is not even a specific one there
first of all those who were in this event

but in general, the event actually needs to be output
from the control field
so that there is no negativity
Means and for all people

i.e. the attitude towards facts is only this
to restore life
and that's all

the objective phase exists it is fixed
there is a video yes photo audio
and any viewing of events any
only meeting with a living resurrected person

or
Well you have to think right after the meeting
his happy normal good life
and that's all

and like all these factors
we will only move in this direction

although they are of course recorded there to some extent
nevertheless being in this structure
only this structure of life ^{yes}

i.e., in principle, we are kind of looking for our own life
and we develop

thus it is the collegial system
as God does

For ^{example,} imagine a lot of events, ^{yes}
ahead of every person

Means everyone faces this naturally

but with God they don't stick together
as if some negative events
Well there was once such a war there
but for Him it's all the same
For him, negative events don't stick together

i.e. He has a clear gradation structure

if you think about it
how does he make this gradation

why during the great patriotic war
there people did not die there many were there
there in the fire in difficult situations
or there were funeral notices there
it turned out that the person was alive later
although they saw that he was destroyed there with witnesses even
there were basically no such things during the Great Patriotic War
there were also quite a lot of cases

and it turns out that
or there during there not necessarily there great patriotic

there were data find in information
where the resurrection took place
contrary to the collective Consciousness

find these factors in the information simply
and with all this
people took it for granted
i.e. they first seemed to record the fact

as I said there might even be some messages there
nevertheless once and no ^{yes}

the collective consciousness can do nothing more
if a resurrected person appears

All

nothing more can be done

this is an ordinary living person, that's all

constitutionally it is immediately protected

and no one has the right to touch him there with a finger

this is an ordinary living person

All

and this subtle gradation

being at any level of management

only the structures of his life and all people's

and at the same time understanding

that nothing unusual will happen next

cases especially during the Great Patriotic War

there were a lot

in some complex actions there in Afghanistan

there is a lot of such information

Means in some hot spots

and try to understand

is there even a sign of Peace?

at least one action having the ^{same} characteristic

This means that something like this exists, maybe everywhere

naturally we can work out this information

in order to mean get the result

it is precisely the speed of meeting with the resurrected one

here we are already talking about the speed of meeting with the resurrected one
those who got caught up in those events in Beslan

and when we begin to deduce their personal factor

Of course they are happy to meet you

we must try to see what is in the general understanding

naturally nothing else can happen

something that someone doesn't want there or changes their mind there

this naturally cannot be

man is always alive for God

he ^{well} there if he looks at God there ^{yes} listens

he can't die

and considering that there is a general resurrection
he is still alive for God
to something there then

and therefore it turns out that the task of transmitting information
task of collegial collective action
where you act collectively on one person there
taking it out of control
already move on to the scale of virtually universal resurrection
through collective resurrection as such
i.e. there will be groups that will then say
that and already there is that already collectively they have precisely resurrected
collectively

and here is where it is very important
while maintaining the status well like leaders or something Well their
they are not even leaders, but rather they are just
They are more enlightened there

Well, it looks like leadership
first the first are resurrected
It is necessary to keep in mind that in the collective Consciousness
they seem to be the first to appear

but for God everyone is alive, He has no concept of "death"
so it turns out that there is no concept of "first" "second"

or is there a "tenth" there is no such thing
or "third"
there is a concept that "everyone is alive"

i.e. we are sometimes on one side, sometimes on the other
we kind of open someone up yes we find
Well it is considered as some kind of labyrinth there
some there For example so let's say catacombs
what the hell in general, imagine some kind of forest

here we are looking, here they are standing somewhere
here is the first one we found the second one there
as if it were our task they are all alive
we are actually looking for them

it turns out that there is no concept of "first", "second", "third"
and here is the factor of universal resurrection
that's exactly what we just find more of

and that's all

i.e. we ^{well} we have identified this event, let's say in management
but let's say it like that recorded so it happened ^{yes}

so that's the ^{situation} here ^{as if} it turns out
that the situational level is very important
i.e. everyone must do their own thing
must always exclude the event anyway

i.e. it's still further and further
until there are no signs
this is a very simple principle of operation

until we run out
until everyone has invested all their resources, this is out of the question
everyone is resurrected
for everyone this is work in general for every inhabitant of the Earth
and in relation to everyone in general this is work

Means and here it turns out that we found it then
and we figured out that after all, ^{well} especially in Beslan ^{for example}
this is a damaging factor close
^{Well} some kind of cynicism
that there are no problems with nuclear weapons here at all

a person ^{as if} a person the life of another becomes
it turns out to be completely devalued
it means that life is valuable, life is indestructible

means finding a collective level

this is the maximum value of life
that we are ^{like} super value priceless
the concept of "no price"
this is a priceless element
this is ^{how we say} life is life
she is imperishable and indestructible
this is a living always living person everything
that's all there is in the real world, ^{yes}

and we start along these ^{labyrinths} , ^{well} relatively speaking
in fact, it is often an open area

the only question is
to say and he came
also a question

there is someone who actively comes, someone wants well how to relax
it's different there
i.e. a purely human criterion begins to work

and here in collective management
a level arises
that they collectively sort of get into as a matter of fact
to some other one or something optical system
there is personal perception

for example, here's a man running down a mountain
there is some kind of optics there
another one is going to meet him there or is swimming there
there are different optics, there are different distances

try to understand
how do they perceive the path from a distance
For example even to the same person well ask a question
who often traveled to the area
what is the distance from here to here approximately

they will say different things
Well there even at different times the distance is different
and if at all, the longer the path
the more it varies
accuracy of logical understanding of distance

because we work with logic
and here it turns out in the collective Consciousness
what does the collective consciousness do
who doesn't know yes about resurrection technologies
it just takes and tries to lead to Infinity
by distance

because in fact it is, in general, like a form of distance according to logic
Well as if into the past yes For example

and then it turns out that in their collective Consciousness
he begins to search in Thinking
the man who resurrects
where is it located
and the coordinates are not aligned

here is a simple task
two people are walking
who know each other there alive not dead

if one is given the task of meeting another
without using means of communication there

because the world is arranged in such a way that a person comes to Earth
there is born here nothing matters
there is no phone, no radio, nothing
there is a natural order of meetings, yes

and now restore this order
this is a look to God
why did man come into this world yes
The World is Infinite
that means all the people here will be those who haven't even been born yet

then what is everyone's task?
i.e. of course it is often individual
but everyone's task is what's there For example even Infinite Life
it's clear there Eternal development is clear

we just know the technology there
we know the structure of the Eternal development, so to speak
I have experience, practice, logic, after all
if you can do it there for example there's a finger there
there is no problem in healing some scratches
why can't the body be restored there, etc.
logical version

but that's exactly what is given to a person yes
essentially there in the Infinite Development

i.e. Infinite life is like that itself
the innermost essence of this phenomenon

so a person is given the ability to overcome any situation
towards life
Well according to my Teaching, for example , without dying
and the person who has mastered even just one thing there will not die

some were convinced at least there
in some special remote control technologies yes

I have a lot of students who are very clear
means they won't die

and it turns out that the task here is the ability to overcome
any situation in any position

Well, if you ask God

He created the world
what was his position in general

and when we already find
this internal system ^{yes} at the resurrected one
everything is resolved

so you just go and ask
^{Well} is it really there ? something like that
^{Well} literally there, if I may say so
there's just a simple situation, ^{well} just nonsense
that gather your strength and there ^{well} how to get out ^{yes}
get out of this situation openly
here they are somewhere

so here in collective management
the main thing is to highlight the personal structure of each
that this is the powerful force that every person has
he just puts it into action
All
it's like a powerful spring
and it is so powerful that it can really solve everything

and that's how we brought it
to the structure of the personal factor of resurrection
everyone consider it a collective resurrection
and the individual has naturally already taken place

it means to show, ^{well}, it's easier to say
that he is capable and it is not that difficult
I just need to gather my strength
and you gave me strength

Means and so it's ^{like} ^{Well} such
^{Well} actually, ^{it's like} an internal conversation, ^{yes} private

it's not that hard to give it a little push
^{as if to} tense up internally and that's all
a little

^{Well} and basically everything
i.e. this is the output technology
up to the personal action of each
exactly the way a normal living person acts

i.e. in this case pay attention
you no longer think that he has any problems with him

you still give control
and you ask
Well what's so complicated about it
just come already come to the meeting
and that's all

and that's basically enough
to get a clear, full meeting
when everything is just alive resurrected
an ordinary person who lives in a house
it's not going anywhere

[and well just lives like a normal person
what we should prove what we should do]
both in collective and private versions

Well , that's enough for today
[as I said the main level
it is a meeting through a personal context
what next
i.e. unique]

and in developing this technology
Be sure to look at how it is presented
Well to such a real awareness of personality
that he is really capable

[i.e. there are no problems for him, he was born
he was born in the World where God] already did so
all this solution is there

No problem

We just tell him this in our minds
You can even take my lecture, so to speak
mentally tell all this retell the same thing yes
and that's all

Thank you very much for your attention
